### ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* was prepared under the direction of Edwin D. Goldfield, Chief, Statistical Reports Division. Compilation was under the supervision of William Lerner, Assistant Chief, assisted by Dorothy M. Belzer for editorial supervision and Helen E. Teir for planning and review.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 989-992) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract*.

JULY 1962.

Library of Congress Card No. 4-18089

### SUGGESTED CITATION

U.S. Bureau of the Census, *Statistical Abstract of the United States: 1962*. (Eighty-third edition.) Washington, D.C., 1962.

## PREFACE

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, the Guide to Sources (page 947), and a new feature, Guide to State Statistical Abstracts (page 986). The new Guide is intended for persons who need more detailed information for individual States than can be included in the national *Abstract*.

This volume includes a selection of data from many statistical publications, both governmental and private. The publications cited as sources usually contain additional statistical detail and a more complete discussion of definitions and concepts than can be presented here. Where contributing agencies are cited as sources, without mention of publications, more detailed information frequently is available from their unpublished tabulations and records.

Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States. Statistics for outlying areas of the United States are included in the State tables whenever available and supplemented by specialized information for those areas in section 32. Statistics for cities or other relatively small geographic units appear only in a few instances.

Wherever possible, statistics shown for the United States represent the 50 States and the District of Columbia. Figures for Alaska and Hawaii, whenever available, are presented separately in State tables and are also included in United States summary tables. Statements specifying inclusion or exclusion of the figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident.

**Changes in the 1962 edition.**—This edition, the 83d annual issue, presents data for the most recent year or period available during the early part of 1962.

Each year, in addition to the bringing up to date of the over 1,300 tables and charts included, new tables of current interest are introduced. Data that are less timely are eliminated and format and text changes are made where considered advisable.

A more comprehensive selection of statistics from the 1960 Census of Population is presented in this issue than was possible in the previous edition. In addition, final data from the 1959 Census of Agriculture have replaced preliminary figures published in the previous edition. Also, more of the data from the 1958 Census of Manufactures have been adjusted to include Alaska and Hawaii.

The tables on agriculture which were formerly divided into three sections have been reorganized and now appear as two sections. The former section, "Irrigation and Drainage," has been combined with the former section, "Agriculture—General Statistics," under the title "Agriculture—Farms, Land, and Finances." The second section on agriculture is now entitled "Agriculture—Production, Marketing, and Trade." A slighter change has affected the former "Power and Scientific Development" section which is now entitled "Power; Research and Development."

A total of 62 tables are new in this edition as compared with the 1961 edition. Some of these tables were included in earlier editions but were temporarily omitted until this year, pending the availability of more recent data. Certain others represent major rearrangement of subject matter. A third group contains data never presented before in the *Abstract*.

A large number of the new tables concern population characteristics and public welfare subjects, presented in various sections of the *Abstract*. Nine new tables were added to the population section alone, as more details became available from further analysis of the 1960 Census returns. Five new tables were added to the Vital Statistics section from such varied sources as the Public Health Service, the American Hospital Association, the Department of Agriculture, and the Bureau of the Census. Ten tables, primarily from the Office of Education, the National Education Association, and the Bureau of the Census were added to the Education section. Other subjects for which new tables are included concern air pollution, recreational activities, insurance coverage, labor unions, and assets and income of families and individuals. Statistical coverage of scientific activities was also considerably increased by the addition of seven new tables to the Power; Research and Development section, including four from the National Science Foundation and two from the National Aeronautics and Space Administration.

Following is a list of some of the subjects covered by the new tables:

Characteristics of the nonwhite population (p. 35)	U.S. defense expenditures abroad (p. 250)
Population mobility and migration, by States (pp. 39-40)	Characteristics of veterans in civil life (p. 263)
Live births, by sex and by attendant (pp. 53, 56)	Financial assets and liabilities of individuals (p. 328)
Children born to women 35 to 44 years old (p. 59)	Families, by income level (p. 333)
Hospital expense per patient day (p. 81)	Unit values of items imported and exported (p. 352)
Food donated to needy families (p. 92)	Assessed value of property subject to local taxation (p. 429)
Years of school completed (pp. 117, 118)	Interest rates paid by Federal Reserve member banks (p. 453)
Teachers' salaries (pp. 128-129)	Life insurance payments by family income groups (p. 477).
Pupil-teacher ratios (p. 130)	Employment in atomic energy (p. 541)
Marital status of students (p. 131)	Scientists and engineers (pp. 545-546)
College enrollment by educational status of fathers (p. 136)	Manned spacecraft (p. 547)
Adult education (p. 139)	Acreage treated and materials dispensed by aircraft (p. 628)
Urban and rural arrest rates (p. 152)	Production and sales of medicinals (p. 793)
Characteristics of lawyers (p. 157)	Employment attributable to exports (p. 881)
Air pollution (p. 176)	Economic development in Western Europe (p. 917)
Participation in recreational activities (p. 207)	Cost of living in various cities of the world (p. 940)
Expenditures of fishermen and hunters (p. 208)	
Farm workers covered by Federal old-age, survivors, and disability insurance programs (p. 237)	
Union membership (p. 242)	

Of the tables included in the 1961 edition, 54 were omitted from this issue. The majority of the omissions represent tables for which comparable details are given in the new or retained tables or for which no recent data are as yet available. The largest number of omissions occurs in the sections on Education, Agriculture, and Power, primarily as a result of rearrangement of the data rather than actual loss of information presented in 1961.

**Supplements to the Abstract.**—The *Statistical Abstract*, as an annual one-volume publication, is limited in amount of detail shown. To meet the need for more detailed information for small areas (cities, counties, metropolitan areas, and others) and for more historical data, a series of supplements to the *Abstract* has been issued.

The *County and City Data Book, 1962*, is the sixth edition in the *County and City Data Book* series. It is designed to help satisfy the need for statistical information about the social, economic, and governmental aspects of counties, cities, and other geographic areas. Conveniently assembled are 161 statistical items for each State and county in the United States and 163 items for each of the 676 incorporated cities

having 25,000 inhabitants or more in 1960. Comparable information is presented for geographic regions and divisions, standard metropolitan statistical areas, urbanized areas, and unincorporated places. Many of the statistics in this volume were obtained from the results of the most recent Censuses of Agriculture, Business, Governments, Housing, Manufactures, Mineral Industries, and Population. Also included are descriptive text, source notes, and maps. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D.C., for \$5.25 (cloth-bound).

The *Congressional District Data Book (Districts of the 87th Congress)*, issued in June 1961, is the first report of its type to be published by the Bureau of the Census. Based primarily on data from the most recent censuses, it presents 135 items on population, housing, and elections for all 437 congressional districts as constituted in 1960; 72 similar items pertaining to nonwhite population for selected districts; and 125 items on economic subjects for the 297 districts whose boundaries follow county lines. This report is available in most large public libraries.

*Historical Statistics of the United States, Colonial Times to 1957*, is the second edition in the *Historical Statistics* series. Compiled by the Bureau of the Census with the cooperation of the Social Science Research Council, this volume presents in compact and convenient form more than 8,000 statistical time series (mostly on an annual basis) covering periods from 1610 to 1957. It includes historical data on every major aspect of the Nation's social and economic development. The statistics are accompanied by text notes which specify the sources of the data, include references to other sources, discuss the historical development and reliability of the data, and present definitions of technical terms. Also included is a separate chapter on colonial statistics and a 15-page subject index. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D.C., for \$6.00 per copy (clothbound).

**Responsibility.**—The contents of this volume are taken from a large number of sources (see pp. 989–992). The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

#### SUGGESTIONS AND COMMENTS

Many persons have offered suggestions for improving the presentation of the material. These comments have been most helpful and users are urged to continue to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington 25, D.C.

#### FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

## STATISTICAL ABSTRACT SUPPLEMENTS

*County and City Data Book, 1962.* A compact presentation of 161 items of statistical data for each State and county in the United States, and 163 items of statistical data for each of 676 incorporated cities having 25,000 inhabitants or more in 1960. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan statistical areas, urbanized areas, and unincorporated places. Items included based largely on results of most recent Censuses of Agriculture, Business, Governments, Housing, Manufactures, Mineral Industries, and Population. Includes 53 maps, explanatory and definitive text, and source notes. Issued 1962. Price \$5.25 (clothbound).

*Congressional District Data Book (Districts of the 87th Congress).* A handy reference consisting of 135 statistical items for all 437 congressional districts as constituted in 1960; 72 items pertaining to nonwhite population for selected districts; and 125 items for the 297 districts whose boundaries follow county lines. Based largely on results of the most recent censuses. Includes text and source notes. 176 pages. Issued 1961. (Out of print.)

*Historical Statistics of the United States, Colonial Times to 1957.* Prepared with the cooperation of the Social Science Research Council. A compilation of more than 8,000 statistical time series, largely annual, on American social and economic development covering periods from 1610 to 1957. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 801 pages. Issued 1960. Price \$6.00 (clothbound).

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

	Page
<i>Fig. I. Map of the United States, showing Census divisions and regions</i> .....	XII
<b>Sec. 1. POPULATION</b> .....	<b>1</b>
Population estimates—Projections—Geographic distribution—Urban and rural—Sex—Age—Race—Nativity and parentage—Marital status—Mobility status—Migration—Households and families—Institutional population—Religious bodies.	
<i>Figs. II–IV. Population: Urban and rural trends; Households; Center of population for conterminous United States.</i>	
<b>Sec. 2. VITAL STATISTICS, HEALTH, AND NUTRITION</b> .....	<b>49</b>
Births—Reproduction rates—Fertility—Life table values—Deaths—Accidents and injuries—Marriage and divorce—Physicians, dentists, and nurses—Health insurance—Medical care expenditures—Hospitals—Mental hospitals and institutions—Morbidity—Medical costs for the aged—Nutrition—Federal food programs.	
<i>Fig. V. Vital statistics rates.</i>	
<b>Sec. 3. IMMIGRATION AND NATURALIZATION</b> .....	<b>93</b>
Immigration quotas—Characteristics of immigrants—Displaced persons and refugees—Migratory workers—Resident aliens reporting—Passports issued—Arrivals and departures—Naturalization.	
<i>Figs. VI–VII. Immigrants admitted; Displaced persons and refugees admitted.</i>	
<b>Sec. 4. EDUCATION</b> .....	<b>108</b>
Public and private schools—Enrollment—Projections—Years of school completed—Educational attainment—Elementary and secondary schools—Institutions of higher education—Degrees conferred—Land grant institutions—Adult education—Public library systems—Vocational programs—Federal aid.	
<i>Fig. VIII. Current expenditure per pupil.</i>	
<b>Sec. 5. LAW ENFORCEMENT, FEDERAL COURTS, AND PRISONS</b> .....	<b>145</b>
Major crimes—Crime rates—Arrests—Police employment—Federal courts—Legal profession—Prisoners in Federal and State prisons—Federal and State prison employees—Prisoners executed.	
<i>Figs. IX–X. Prisoners present in Federal and State prisons; Crimes known to the police.</i>	
<b>Sec. 6. AREA, GEOGRAPHY, AND CLIMATE</b> .....	<b>166</b>
Land and water areas—Coastlines—Extreme points—Rivers—Lakes—Altitudes—Tornadoes, floods, and tropical storms—Water use and supply—Air pollution—Elevation of weather stations—Occurrence of freeze—Temperature—Precipitation—Snow and sleet—Sunshine—Wind velocity—Relative humidity—Degree days.	
<i>Fig. XI. Territorial expansion of the United States.</i>	
<b>Sec. 7. PUBLIC LANDS; PARKS; AND RECREATION</b> .....	<b>191</b>
Public domain—Land ownership—Federal real property—Public and Indian lands—Mineral leases—Grazing districts—National parks and forests—State and municipal parks—Public recreation areas—Selected recreational activities—Fishing and hunting—Expenditures for recreation—Domestic and foreign travel.	

	Page
<b>Sec. 8. LABOR FORCE, EMPLOYMENT, AND EARNINGS.....</b>	<b>211</b>
Employment status—Labor force projections—Unemployment—Labor force characteristics—Female labor force—Occupation—Multiple jobholders—Output per man-hour—Production workers, hours, and earnings—Supplementary wage benefits—Farm employment and wages—Union wage rates—Labor turnover—Industrial injuries—Union membership—Work stoppages.	
<i>Fig. XII. Trends in the labor force.</i>	
<b>Sec. 9. MILITARY SERVICES AND VETERANS AFFAIRS.....</b>	<b>246</b>
Expenditures for national defense—Military procurement—Military assistance—Civil defense—Military personnel—Coast Guard personnel—Pay rates—War service and casualties—Ships—Aircraft—Selective service—Veterans and veterans benefits.	
<i>Fig. XIII. Federal expenditures for national defense functions and veterans benefits.</i>	
<b>Sec. 10. SOCIAL INSURANCE AND WELFARE SERVICES.....</b>	<b>270</b>
Social welfare expenditures—Federal grants—Population 65 years old and over—Old-age, survivors, and disability insurance—Private pension plans—Corporate pension funds—Civil Service retirement—State and local retirement systems—Railroad retirement and other benefits—Unemployment insurance—Public employment offices—Workmen's compensation—Public assistance—Maternal and child welfare services—Boy Scouts and Girl Scouts—Vocational rehabilitation—Red Cross—Community Chest and United Fund—Foundations.	
<i>Fig. XIV. Social welfare expenditures.</i>	
<b>Sec. 11. INCOME, EXPENDITURES, AND WEALTH.....</b>	<b>308</b>
Gross national product—Income, expenditure, and saving—National income—Personal income—Flow-of-funds accounts—Personal saving—Assets of individuals—Income of families and individuals—National wealth.	
<i>Figs. XV-XVI. Gross national product; Number of families by family income.</i>	
<b>Sec. 12. PRICES.....</b>	<b>340</b>
Wholesale price indexes—Purchasing power of the dollar—Wholesale prices—Consumer price indexes—Budget costs—Unit values of articles imported and exported—Retail prices and price indexes—Residential rents—Costs of medical service—Costs of fuels and electricity.	
<i>Figs. XVII-XVIII. Wholesale price and consumer price indexes.</i>	
<b>Sec. 13. ELECTIONS.....</b>	<b>359</b>
Electoral and popular vote for President—Vote for U.S. Senators—Apportionment of U.S. Representatives—Vote for U.S. Representatives—Composition of Congress; legislative activity; bills vetoed—Vote for Governors—State legislatures—Elective local officials—Population of voting age.	
<i>Figs. XIX-XX. Popular vote cast for President; Gain or loss of membership in House of Representatives, by States.</i>	
<b>Sec. 14. FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT.....</b>	<b>375</b>
Receipts and expenditures—Subsidies—Internal revenue—Income tax returns—Gift and estate tax—Public and private debt—Government securities—Savings bonds—Employment and payrolls.

<b>Sec. 19. POWER; RESEARCH AND DEVELOPMENT.....</b>	<b>527</b>
Supply and consumption of energy—Horsepower of prime movers—Electric energy—Electric utilities—Waterpower—Rural electrification—Gas utility and pipeline industries—Atomic energy—Scientific research and development—Scientists and engineers—Science doctorate degrees conferred—Patents—Space vehicles.	
<b>Sec. 20. ROADS AND MOTOR VEHICLES.....</b>	<b>549</b>
Road mileage—State and Federal highways—Public roads finances—Gasoline taxes and motor fuel consumption—Drivers' licenses—Motor-vehicle sales, exports, scrappage, and taxes—Motor-vehicle travel and registrations—Automobile ownership, financing, and insurance—Motor-vehicle speed and accident deaths.	
<i>Figs. XXX-XXXI. Motor-vehicle factory sales; Highway construction contracts awarded.</i>	
<b>Sec. 21. TRANSPORTATION, LAND AND AIR.....</b>	<b>567</b>
Intercity traffic—Railroads: Mileage; equipment; fuel consumed; revenues and expenditures; service; employees; pullman operations; accidents—Transit industry—Motor carriers—Civil aviation: Air carriers; aircraft; airports—Petroleum pipelines.	
<i>Figs. XXXII-XXXIII. Intercity freight traffic; Operating revenues for selected transport groups.</i>	

	Page
<b>Sec. 22. WATERWAYS, WATER TRAFFIC, AND SHIPPING.....</b>	<b>588</b>
Waterborne commerce, foreign and domestic—International transportation transactions—Ocean ports—Great Lakes ports—Rivers, canals, and connecting channels—Panama Canal traffic—Vessels entered and cleared in foreign trade—Expenditures, Corps of Engineers—Merchant marine—Merchant fleets of the world.	
<i>Figs. XXXIV-XXXV. Waterborne commerce of the United States; Percent of cargo tonnage on American flag vessels in U.S. trade.</i>	
<b>Sec. 23. AGRICULTURE—FARMS, LAND, AND FINANCES.....</b>	<b>605</b>
Farm population—Number, acreage, and value of farms—Value of products sold—Color and tenure of operators—Farm mortgage—Land utilization—Irrigation—Federal reclamation—Drainage—Soil conservation—Fertilizer use—Aerial application—Balance sheet of agriculture—Off-farm income—Farm income, expenditures, and prices—Price support—Commodity Credit Corporation—Farm-to-retail price spread—Farm-operator level-of-living—Farm labor—Facilities, machinery, and equipment—Taxes and insurance—Cooperatives.	
<i>Figs. XXXVI-XXXVII. Indexes of prices received and paid by farmers; Tractors, motortrucks, and automobiles on farms.</i>	
<b>Sec. 24. AGRICULTURE—PRODUCTION, MARKETING, AND TRADE...</b>	<b>641</b>
Indexes of farm output and acreage, land, livestock productivity, marketings, labor—Products exported and imported—Acreage, production, and value of crops—Field crops—Vegetables and fruits—Livestock—Stockyard receipts and shipments—Meats and lard—Dairying—Poultry—Cold-storage holdings—Fats and oils.	
<i>Fig. XXXVIII. Agricultural exports under Government programs.</i>	
<b>Sec. 25. FORESTS AND FOREST PRODUCTS.....</b>	<b>683</b>
Commercial forest land—Growing stock and live sawtimber—National forests—Tree distribution—Forest fires—Lumber—Timber—Millwork products and paints—Naval stores—Pulpwood and paper—Newsprint—Processed woodpulp and wood products.	
<b>Sec. 26. FISHERIES.....</b>	<b>697</b>
Fishermen and fishing craft—Catch of principal species—Quantity and value of catch—Canned and frozen fishery products—Exports and imports of fishery products.	
<b>Sec. 27. MINING AND MINERAL PRODUCTS.....</b>	<b>706</b>
Quantity and value of mineral production—Prices—Mineral industries summary—Supply—Imports and exports—Strategic and critical materials—Employment and injuries—Coal, oil and gas wells, petroleum, natural gas—Stone and earth minerals—Metals.	
<i>Fig. XXXIX. Indexes of physical volume of mineral production.</i>	
<b>Sec. 28. CONSTRUCTION AND HOUSING.....</b>	<b>740</b>
Value of construction—Wholesale price indexes of construction materials—Construction costs—Public works expenditures—Construction contracts—Construction and housing units—Mobile homes—Housing units: Inventory, starts, costs, characteristics—Public housing—Mortgages—VA home loans—Urban renewal.	
<i>Figs. XL-XLI. Value of new construction; Nonfarm housing units started.</i>	

	Page
Sec. 29. MANUFACTURES.....	768
Manufacturing summary—Production indexes—Major industry groups—Inventories—Employment and output of large companies—Capital formation and expenditures—Water use—Canned and frozen foods—Medicinals—Alcohol and spirits—Tobacco and smoking patterns—Textiles and clothing—Leather—Rubber—Chemicals—Glass and clay products—Metal products and machinery—Home appliances—Farm machines—Tractors.	
<i>Fig. XLII. Industrial production indexes.</i>	
Sec. 30. DISTRIBUTION AND SERVICES.....	820
Source of national income—Retail trade: Establishments, sales, employees, kinds of business, inventories—Department stores—Wholesale trade: Establishments, sales, employees, kinds of business, stocks—Selected services: Establishments, receipts, employees, kinds of business—Motion picture theaters—Hotels—Advertising.	
<i>Fig. XLIII. Indexes of department store sales and stocks.</i>	
Sec. 31. FOREIGN COMMERCE AND AID.....	855
Balance of payments—International investments—Foreign assistance—Mutual Security Program—Foreign trade: Merchandise; trade balances; economic classes and commodity groups; Employment attributable to exports; trade by area and by country of destination and origin—Imports and duties.	
Sec. 32. OUTLYING AREAS UNDER THE JURISDICTION OF THE UNITED STATES.....	895
Population and characteristics—Vital statistics—Schools—Housing—Agriculture—Sugar production—Mineral production—Imports and exports—Puerto Rico: Government receipts and expenditures, employment, manufactures, gross product, income, and business.	
Sec. 33. COMPARATIVE INTERNATIONAL STATISTICS.....	909
Area and population—Vital statistics and food supply—Gross domestic product—European countries: Gross national product or expenditure; industrial production indexes; imports and exports—Economic indexes—Agriculture—Energy—Mineral products—Manufactures—Foreign trade—Foreign exchange holdings and rates—Transportation—Communications—Education and health—U.N. member assessments—International Monetary Fund, International Bank, International Development Association—Inter-American Development Bank—Cost-of-living, selected cities—U.S. contributions to international organizations.

## Section 1

### Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of Members of the House of Representatives among the several States. Until 1902, the census organization was temporary. The Bureau of the Census was then established as a permanent agency of the Government charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, this Bureau supplies intercensal data based on surveys and estimates in addition to making the comprehensive decennial census enumeration.

**Decennial censuses.**—In accordance with census practice dating back to 1790, each person enumerated in the 1960 Census was counted as an inhabitant of his usual place of residence (the place where he lives and sleeps most of the time). This place is not necessarily the same as his legal residence, voting residence, or domicile; in most cases, however, the use of these different bases of classification would produce substantially the same statistics, although there may be appreciable differences for a few areas.

For the 1940, 1950, and 1960 Censuses, certain of the data are indicated as being obtained from representative samples of the population: 25 percent in 1960, 20 percent in 1950, and 5 percent in 1940. Exact agreement is not to be expected among the various samples, nor between them and the complete census count, but the sample data may be used with confidence where large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources.

**Current Population Survey.**—Until May 1956, this Survey, conducted monthly by the Bureau of the Census, covered a sample of approximately 21,000 interviewed households spread over a sample of areas throughout the United States. Since then, the sample has been expanded to approximately 35,000 interviewed households in a larger number of areas. For a discussion of the reliability of estimates based on this sample, see Technical Note, page 213.

**Population estimates.**—Population estimates for dates after April 1950, which are not the result of sample surveys, are based on data from the 1950 and 1960 Censuses; statistics of births and deaths provided by the Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the Armed Forces provided by the Department of Defense. Estimates of State population are based on the same types of data and also make use of school statistics provided by State Departments of Education and parochial school systems throughout the country.

**Urban and rural areas.**—According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a popu-

lation of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more.

This definition of urban is substantially the same as that used in 1950. The major difference between 1950 and 1960 is the designation in 1960 of urban towns in New England and of urban townships in New Jersey and Pennsylvania. In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different special rules relating to population size and density.

In all definitions, the population not classified as urban constitutes the rural population. The term "current urban definition" refers to the population classified in accordance with the definitions used in 1950 and 1960. The term "previous urban definition" refers to the definition used prior to 1950.

A number of large and densely settled places are not included as urban because they are not incorporated places. To improve its measure of the urban population, the Bureau of the Census adopted, in 1950, the concept of the urbanized area and delineated, in advance of enumeration, boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition.

**Farm and nonfarm residence.**—The rural population is divided into the rural-farm population, which comprises all residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. According to the definition used in the 1960 Census, the farm population consists of all persons living in rural territory on places of less than 10 acres yielding agricultural products which sold for \$250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for \$50 or more in the previous year. In the 1950 Census, farm population was determined by answers to the question, "Is this house on a farm (or ranch)?" However, persons on "farms" who paid cash rent for a house and yard only were classified as nonfarm. In both the 1950 and the 1960 Censuses rural persons in institutions, motels, and tourist camps were classified as nonfarm.

**Color and race.**—The concept of race as it has been used by the Bureau of the Census is derived from that which is commonly accepted by the general public. It does not, therefore, reflect clear-cut definitions of biological stocks, and several categories used obviously refer to nationality. "Color" divides the population into two groups, white and nonwhite. The nonwhite population consists of Negroes, American Indians, Japanese, Chinese, Filipinos, and all other groups not classified as white. Persons of Mexican birth or ancestry who are not definitely Indian or of other nonwhite stock are included in the white population. Persons of mixed parentage are placed in the race or color classification of the nonwhite parent.

Beginning with the 1960 Census, however, information regarding color and race was obtained by self-enumeration or self-reporting, whereas formerly race and color classification was obtained in most cases by the Census enumerator's observation.

**Mobility status.**—The population of the United States has been classified according to mobility status on the basis of a comparison between the place of residence of each individual at the survey or census date and the place of residence at a specified earlier date. *Mobile persons or movers* includes all persons living in a different house in the United States at the end of the period from the one they occupied at the beginning. They are subdivided into "same county movers" and "different county movers, or migrants," depending on whether they moved within the same county or into a different county. Migrants in turn are classified according to whether they moved within the same State or into a different State. *Nonmobile persons or nonmovers* includes all persons who were living in the same house in the United States at the beginning and

end of the period. *Persons abroad* includes all persons whose place of residence was outside the United States at the beginning of the period.

**Nativity.**—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, or a possession of the United States. It also includes persons born in a foreign country or at sea who have at least one native United States parent. Persons whose place of birth was not reported are assumed to be native unless their census report contains contradictory information, such as an entry of a language spoken prior to coming to the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

**Household.**—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the housing unit who are related to the head) and also the lodgers and employees, if any, who regularly live in the house. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household.

Prior to 1960 a household was defined as all the persons occupying a "dwelling unit." See section 28, Construction and Housing, for definitions of "housing unit" and "dwelling unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A house with at least 5 lodgers, an institution, a college dormitory, or a military barracks.

**Family.**—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 Censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or group quarters (other than the negligible number of such groups among inmates of institutions) and related to each other.

**Subfamily.**—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

**Married couple.**—A married couple is defined as a husband and his wife living together, with or without children and other relatives.

**Unrelated individuals.**—"Unrelated individuals" refer to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or group quarters such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or group quarters.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series A 17-21") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

UNITED STATES <sup>4</sup>							
1950 (Apr. 1) -----	3, 015, 211	3, 552, 206	63, 005	151, 325, 798	42.6	19, 161, 229	14.5
1960 (Apr. 1) -----	3, 015, 211	3, 548, 974	66, 237	179, 323, 175	56.5	27, 997, 377	18.5

<sup>1</sup> Area figures for each census year represent continuous United States (see text, p. 3) on indicated date, including in some cases considerable areas not then organized or settled, and not covered by the census. Area figures have been adjusted to bring them into agreement with remeasurements made in 1940.

<sup>2</sup> Excludes Alaska and Hawaii.

<sup>3</sup> Revised to include adjustments for underenumeration in Southern States; unrevised number is 38,553,371.

<sup>4</sup> Includes Alaska and Hawaii.

## No. 2. ESTIMATED POPULATION: 1900 TO 1962

[In thousands. As of July 1, except where noted. Beginning 1940, includes Alaska and Hawaii. Estimates for 1900 to 1909 are sums of State estimates based on local data indicative of population change. Estimates for 1910 to 1962 are based on decennial censuses and statistics of births, deaths, immigration, emigration, and Armed Forces. See also *Historical Statistics, Colonial Times to 1957*, series A 1-3]

Population abroad <sup>21</sup> .....	<sup>22</sup> 118,933	<sup>23</sup> 481,545	1,374,421	-----
Members of the Armed Forces.....		301,595	609,720	-----
Civilian citizens employed by the U.S. Government.....	118,933	26,910	38,010	-----
Families of Armed Forces personnel or of civilian citizen employees.....	( <sup>24</sup> )	107,350	505,393	-----
Crews of merchant vessels.....	( <sup>24</sup> )	45,690	32,464	-----
Other citizens.....	( <sup>24</sup> )	( <sup>24</sup> )	<sup>25</sup> 187,834	-----

<sup>1</sup> Includes estimated population of the Philippine Islands (16,356,000), not shown separately.

<sup>2</sup> Census taken as of Oct. 1, 1939.

<sup>3</sup> Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

<sup>4</sup> Enderbury Island uninhabited at time of enumeration.

<sup>5</sup> Sand Island uninhabited at time of enumeration.

<sup>6</sup> Less than 0.5 square mile.

<sup>7</sup> Not enumerated.

<sup>8</sup> Little Swan Island uninhabited at time of enumeration.

<sup>9</sup> Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukulailai, Nurakita, Palmyra, Penrhyn, Rakahanga, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands not inhabited in 1950 and 1960. Quita Sueño Bank, Roncador Cay, and Serrana Bank, claimed by both the United States and Colombia, not enumerated.

<sup>10</sup> Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

<sup>11</sup> Not enumerated or uninhabited at time of enumeration.

<sup>12</sup> Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (combined area 3 square miles), and Palmyra (4 square miles). Excludes Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square mile); area of other islands listed in footnote 9 not available.

<sup>13</sup> Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

<sup>14</sup> Leased (1914) from the Republic of Nicaragua for 99 years.

<sup>15</sup> Figures from Government of Nicaragua. Little Corn Island uninhabited at time of enumeration.

<sup>16</sup> Under the United Nations Trusteeship System with the United States as administering authority since July 18, 1947.

<sup>17</sup> Population 1940, 131,258 (Census of Japan).

<sup>18</sup> Civilian population; Department of the Navy. *Report on the Administration of the Trust Territory of the Pacific Islands for the Period July 1, 1949, to June 30, 1950*, Government Printing Office, Washington, D.C., 1950.

<sup>19</sup> Census of 1958 conducted by the Office of the High Commissioner. Civilian population; see *Census Report, 1958: Trust Territory of the Pacific Islands*, Office of the High Commissioner, Agaña, Guam, June 1959.

<sup>20</sup> See references in footnotes 18 and 19, above. Comprised of 687 square miles of land area and 7,797 square miles of water area.

<sup>21</sup> Excludes United States citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of households.

<sup>22</sup> Excludes dependents of Federal employees and crews of merchant vessels.

<sup>23</sup> Based on 20-percent sample of reports received.

<sup>24</sup> Not available.

<sup>25</sup> Represents U.S. citizens abroad for extended periods of time. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

## No. 5. CENTER OF POPULATION: 1790 TO 1960

["Center of population" is that point which may be considered as center of population gravity of the U. S. or that point upon which the U. S. would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

YEAR	North latitude	West longitude	Approximate location
CONTERMINOUS U.S. <sup>1</sup>			
1790.....	39 16 30	76 11 12	23 miles east of Baltimore, Md.
1800.....	39 16 6	76 56 30	18 miles west of Baltimore, Md.
1810.....	39 11 30	77 37 12	40 miles northwest by west of Washington, D. C. (in Virginia).

<sup>1</sup> For United States, population of U.S. has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940.

<sup>2</sup> Less than 0.1 percent.

## No. 10. POPULATION OF STANDARD METROPOLITAN STATISTICAL AREAS: 1960

[Minus sign (—) denotes decrease; percent increase based on areas as defined in 1960. A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. In addition to the county, or counties, containing such a city or cities, contiguous counties are included in a standard metropolitan statistical area if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities are the units used in defining standard metropolitan statistical areas. This list of areas is based on *Standard Metropolitan Statistical Areas, 1961*, issued by the Executive Office of the President, Bureau of the Budget]

# No. 14. POPULATION OF CITIES HAVING 100,000 INHABITANTS OR MORE IN 1960, 1910 TO 1960, AND AREA, 1960

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin. Land area figures generally supplied by city engineers and reviewed for reasonableness by Bureau of the Census]

<sup>1</sup> The cities of Madison, Wis., and Rockford, Ill., share the same rank of 96. In order to have the lowest rank equal to the number of cities presented, the number 97 is omitted.

<sup>2</sup> Population shown is for New York City as now constituted.

<sup>3</sup> Revised population figure for Norfolk is 304,869.

<sup>4</sup> Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1910: 150,355.

# NO. 18. POPULATION, BY AGE AND SEX, 1930 TO 1960, AND BY COLOR, 1950 AND 1960

[In thousands. Beginning 1960, includes Alaska and Hawaii. The median is the value which divides the distribution into two equal parts—one-half of the cases falling below this value and one-half exceeding this value. See also *Historical Statistics, Colonial Times to 1957*, series A 71-94]

1930 (Apr. 1).....	29,905	542	2.02	4.11	26,083	2,804	118	90.2
1940 (Apr. 1).....	34,949	504	1.56	3.77	31,680	3,142	127	90.6
1950 (Apr. 1).....	42,857	791	2.06	3.53	39,044	3,633	149	91.2
1960 (Apr. 1).....	53,021	1,016	1.92	3.38	47,868	5,153	-----	90.3

<sup>1</sup> Computed by compound interest formula.

<sup>2</sup> Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.

<sup>3</sup> Includes small number of hotels, institutions, and other quasi-households. <sup>4</sup> Estimated.

Source: Department of Commerce, Bureau of the Census; Reports of the Thirteenth, Fifteenth, Sixteenth, Seventeenth, and Eighteenth Censuses, and records.

## No. 38. HOUSEHOLDS, FAMILIES, SUBFAMILIES, MARRIED COUPLES, AND UNRELATED INDIVIDUALS: 1947 TO 1961

[In thousands. As of April, except as noted. Beginning 1960, includes Alaska and Hawaii. Percent not shown where base is less than 200,000. Minus sign (-) denotes decrease. For definitions of type of unit, see pp. 2, 3. See also *Historical Statistics, Colonial Times to 1967*, series A 242-247]

# **No. 40. HOUSEHOLDS, FAMILIES, AND MARRIED COUPLES: 1959 AND PROJECTIONS TO 1980**

[In thousands. Excludes Alaska and Hawaii. Based on 1950 Definition of Household; see text, p. 3. Population base from *Current Population Reports*, Series P-25, No. 187. (See also table 3.) Series A and B based on population projection Series II, and Series C and D on population projection Series III. Series A, B, and C assume, in varying degree, increases in the proportion married in each age group; Series D assumes no change. The general method of projection in each series, given the initial projection of marital status for that series, was as follows: A—average annual change from 1950 to 1956-58 in the proportion of persons in each age group who were household heads of a given type was assumed to continue to 1965; one-half assumed for 1965 to 1975; one-quarter assumed for 1975 to 1980. B—one-half the average annual change from 1950 to 1956-58 was assumed for the period 1957 to 1965; one-quarter assumed for 1965 to 1975; it was assumed that no change would occur thereafter. C—one-quarter the average annual change from 1950 to 1956-58 was assumed for the period 1957 to 1965; it was assumed that no change would occur thereafter. D—1956-58 proportion of persons in each age group who were heads of households of a given type was assumed to continue to 1980]

## No. 46. RELIGIOUS BODIES—CHURCH MEMBERSHIP, NUMBER OF PASTORS, AND SUNDAY SCHOOL ENROLLMENT

[Beginning 1959, includes Alaska and Hawaii. Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed]

## Section 2

### Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental health, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the Public Health Service in its annual report, *Vital Statistics of the United States*, and its *Monthly Vital Statistics Report*. Reports in this field are also issued by the individual State bureaus of vital statistics.

**Births and deaths.**—The collection of death statistics on an annual basis began in 1900. Then the death-registration States consisted of 10 States and the District of Columbia. In 1915, the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas<sup>1</sup> makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, and in 1955, birth statistics were based on a complete count of the records received in the Public Health Service. From 1951 to 1954, and for 1956 and subsequent years, the figures were based on a 50-percent sample of all registered births. Adjustments shown for underregistration of births are based, for the most part, on the results of nationwide tests of registration completeness in 1940 and 1950.

Current death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices; deaths among Armed Forces abroad are excluded. Fetal deaths (stillbirths) are also excluded from death statistics. *Fetal death figures* represent only fetal deaths for which the period of gestation was 20 weeks or more, or was not stated, since many States do not require the registration of earlier fetal deaths. Neonatal deaths represent deaths of infants under 28 days old, exclusive of fetal deaths.

Since 1900 the causes of death have been classified according to 7 different revisions of the *International Lists of Diseases and Causes of Death*, issued by the Public Health Service. It has been the practice to revise the *International Lists* every 10 years to keep abreast of medical knowledge. Each revision has produced some break in the comparability of cause-of-death statistics. The extent of the changes is discussed in "The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends," *Vital Statistics-Special Reports*, Vol. 36, No. 10, and *Vital Statistics of the United States*, 1958, Vol. 1. The latest (7th) revision was made in 1958.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence of the mother or of the decedent.

**Marriages and divorces.**—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to 1940, and 1944 to 1961. Estimates have been made for the intervening years as well as for years in which collections were not complete. A marriage-registration area was

<sup>1</sup> For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1-5.

established by the Public Health Service on January 1, 1957; it covers 35 States and 3 independent registration areas. A divorce-registration area was inaugurated on January 1, 1958; it comprises 21 States and 1 independent registration area. These registration areas were established in order to improve national statistics of marriages and divorces. Criteria for the participation of a State in these registration areas are listed in *Vital Statistics of the United States, 1958*, Vol. 1, pp. 1-10.

**Vital statistics rates.**—Vital statistics rates computed by the Public Health Service are based upon the enumerated population figures as of April 1 for 1940, 1950, and 1960 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted. The special situation created by the changes in size and disposition of the Armed Forces necessitated the use of different types of population bases during the war and postwar period. Birth and divorce rates for 1941 to 1946 for the United States are based on the total population including members of the Armed Forces abroad. Birth and divorce rates for 1940 and 1947 to 1960, and death and marriage rates for 1940 to 1960, for the United States and the individual States are based on total population present in the area, excluding Armed Forces abroad.

**Morbidity.**—Annual data on morbidity are compiled by the Public Health Service and published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases reported by individual States depends upon laws or regulations within the various States. However, most of the common communicable diseases are reportable in all States. Data on morbidity in the general population are also obtained occasionally by special surveys conducted in various communities or States. A clearing-house of such surveys is maintained by the Public Health Service.

Another source of health statistics is the National Health Survey's continuing program which collects statistics on disease, injury, impairment, disability, and related topics on a uniform basis for the nation as a whole. The various reports are published under the general title, *Health Statistics From the U.S. National Health Survey*.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see pp. 240 and 241).

**Medical care.**—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually by that organization in *Hospitals*, Guide Issue, and include only hospitals that meet American Hospital Association requirements for listing. A relatively large number of institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Included are nearly all hospitals in the country that meet the following definition: A hospital is any establishment providing medical and registered nurse supervision; and offering services, facilities, and beds for use beyond 24 hours by 6 or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality, or pregnancy; and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, (b) obstetrical care, or (c) other definitive medical treatment of similar extent. Statistics supporting comprehensive, long-range plans for construction of hospital facilities authorized under Title VI of the Public Health Service Act, as amended, are revised annually, and are available from the Public Health Service. Summary data from the same source on existing hospital beds from 1948 to 1959 appear in *Public Health Reports* (December 1959 issue). Detailed data on existing hospital beds as of July 1, 1956, appear in *The Nation's Health Facilities—Ten Years of the Hill-Burton Hospital and Medical Facilities Program, 1946-1956*, Public Health Service Publication No. 616.

Statistics on institutional population based on the 1950 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U. S. Census of Population, 1950*, Vol. IV, Part 2C).

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. From 1926 to 1946, such data were collected annually by the Bureau of the Census. Beginning with the 1947 report, the data appear in the annual report, *Patients in Mental Institutions*, issued by the Public Health Service.

**Nutrition.**—Statistics on the apparent per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation*. A discussion of methods used to compute these figures and more detailed information appear in Agriculture Handbook No. 62, *Consumption of Food in the United States, 1909-52*, and the 1956 and later supplements to that publication present revised and current figures.

Statistics on Federal food distribution programs, data on the quantity and costs of the food commodities distributed, and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series B 7-9") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

# No. 51. GROSS AND NET REPRODUCTION RATE, BY COLOR: 1905 TO 1960

[Beginning 1959, includes Alaska, and 1960, Hawaii. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. Rates computed using annual vital statistics life tables and population estimates by age, except as noted for earlier years. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, an improvement in mortality alone would not prevent a potential decline in population. See also *Historical Statistics, Colonial Times to 1867*, series B 31-36]

PERIOD OR YEAR	NET RATE			GROSS RATE		
	Total	White	Nonwhite	Total	White	Nonwhite
1905 to 1910 <sup>1</sup>	1,336	1,338	1,329	1,768	1,740	2,240

# No. 54. REGISTERED LIVE BIRTHS, BY COLOR, FOR URBAN AND RURAL AREAS, BY STATES: 1959 AND 1960

[By place of residence. Based on a 50-percent sample. Prior to 1960, definitions of urban and rural based on Census of Population definition used prior to 1950; beginning 1960, see "Introduction" in 1960 annual report, *Vital Statistics of the United States*. Tests made in 1950 indicate that, for the country as a whole, errors in residence reporting result in a significant overstatement of births to residents of urban places, and a corresponding understatement in the number to residents of areas classified as rural.]

<sup>1</sup> Standard is the distribution by age of all women of corresponding marital status in the United States in 1950.

<sup>2</sup> Standardized rate not computed where there are fewer than 150,000 women in several component 5-year age groups.

<sup>3</sup> Rate not shown where base is less than 150,000. <sup>4</sup> Not available.

# NO. 70. DEATH RATE, 1950 TO 1960, AND DEATHS, 1959 AND 1960, FROM SELECTED CAUSES

[Beginning 1959, includes Alaska, and 1960, Hawaii. Seventh revision of *International Lists of Diseases and Causes of Death* used beginning 1959. See text, p. 49. See also *Historical Statistics, Colonial Times to 1957*, series B 114-128]

CAUSE OF DEATH (seventh revision)	DEATH RATE PER 100,000 POPULATION <sup>1</sup>						DEATHS	
	1950	1956	1957	1958	1959	1960 <sup>2</sup>	1959	1960 <sup>2</sup>
All causes.....	963.8	935.4	959.0	951.3	939.1	945.7	1,656,814	1,702,000
Tuberculosis, all forms.....	22.5	8.4	7.8	7.1	6.5	5.9	11,456	10,670
Syphilis and its sequelae.....	5.0	2.3	2.2	2.0	1.7	1.7	3,069	3,070
Meningococcal infections.....	0.6	0.5	0.5	0.4	0.4	0.3	699	615
Acute poliomyelitis.....	1.3	0.3	0.1	0.1	0.3	0.1	454	200
Infectious hepatitis.....	0.4	0.5	0.5	0.5	0.5	0.5	597	880
Other infective and parasitic diseases.....	4.4	3.2	3.1	3.3	3.3	3.2	5,846	5,750
Malignant neoplasms, including neoplasms of lymphatic and hematopoietic tissues.....	139.8	147.9	148.7	146.9	147.4	147.4	260,047	265,260
Asthma.....	2.9	3.6	3.9	2.9	2.8	2.8	4,984	4,060
Diabetes mellitus.....	16.2	15.7	16.0	15.9	15.9	17.1	28,080	30,790
Meningitis, except meningococcal and tuberculous.....	1.2	1.2	1.2	1.3	1.3	1.2	2,208	2,230
Major cardiovascular-renal diseases.....	510.8	510.7	523.7	523.8	516.2	518.9	910,635	933,000
Diseases of cardiovascular system.....	494.4	501.5	514.9	515.8	509.2	512.0	898,336	921,640
Vascular lesions affecting central nervous system.....	104.0	106.3	110.2	110.1	108.5	107.1	191,876	192,720
Diseases of heart.....	356.8	361.1	369.6	367.9	363.4	366.4	641,044	659,410
Rheumatic fever and chronic rheumatic heart disease.....	14.8	12.0	11.8	10.9	10.4	10.2	18,290	18,350
Arteriosclerotic heart disease, incl. coronary disease.....	213.0	255.6	265.7	266.3	268.8	273.4	474,143	492,140
Nonrheumatic chronic endocarditis and other myocardial degeneration.....	56.5	37.7	36.8	33.8	31.8	32.1	56,099	57,810
Other diseases of heart.....	15.9	12.6	12.8	14.2	13.8	14.2	24,553	25,503
Hypertensive heart disease.....	56.5	43.3	42.5	42.7	38.6	36.5	68,159	65,010
Other hypertensive diseases.....	8.3	6.5	6.5	8.0	7.4	7.1	13,119	12,750
General arteriosclerosis.....	20.4	19.1	19.5	19.9	19.6	20.3	34,622	36,600
Other diseases of circulatory system.....	4.9	8.4	9.0	9.9	10.3	11.2	18,176	20,160
Chronic and unspec. nephritis and other renal sclerosis.....	16.4	9.1	8.8	8.0	7.0	6.9	12,299	12,360
Influenza and pneumonia, except pneumonia of newborn.....	31.3	28.2	35.8	33.2	31.2	36.6	55,039	65,820
Influenza.....	4.4	1.4	4.4	2.6	1.6	4.5	2,846	8,170
Pneumonia, except pneumonia of newborn.....	26.9	26.8	31.4	30.6	29.6	32.0	52,194	57,650
Bronchitis.....	2.0	1.9	2.1	2.3	2.2	2.5	3,840	4,500
Ucer of stomach and duodenum.....	5.5	0.0	6.1	6.2	6.1	6.0	10,674	10,830
Hernia and intestinal obstruction.....	5.9	5.1	5.0	5.1	5.2	4.8	9,106	8,660
Gastritis, duodenitis, enteritis, and colitis, except diarrhea of newborn.....	5.1	4.5	4.7	4.5	4.4	4.2	7,758	7,490
Cirrhosis of liver.....	9.2	10.7	11.3	10.8	10.9	11.2	19,242	20,200
Cholelithiasis, cholecystitis, and cholangitis.....	3.9	3.1	2.9	2.7	2.5	2.3	4,497	4,080
Acute nephritis, and nephritis with edema incl. nephrosis.....	2.3	1.4	1.3	1.3	1.0	0.9	1,821	1,580
Infections of kidney.....	2.1	3.4	3.7	4.0	3.9	3.9	6,822	6,980
Hyperplasia of prostate.....	4.2	3.2	3.0	2.7	2.6	2.6	4,683	4,720
Deliveries and complications of pregnancy, childbirth, and the puerperium.....	2.0	1.0	1.0	0.9	0.9	0.8	1,588	1,360
Congenital malformations.....	12.2	12.6	12.8	12.4	12.3	12.0	21,780	21,510
Certain diseases of early infancy.....	40.5	38.6	39.1	39.8	38.5	37.0	67,934	66,510
Symptoms, senility, and ill-defined conditions.....	14.9	11.3	11.3	11.4	10.8	12.0	19,066	21,530
Accidents.....	60.6	56.7	56.0	52.3	52.2	51.9	92,080	93,380
Motor-vehicle accidents.....	23.1	23.7	22.7	21.3	21.5	20.6	37,910	37,160
Non motor-vehicle accidents.....	37.5	33.0	33.2	31.0	30.7	31.2	54,170	56,170
Accidents in the home.....	16.0	13.5	13.4	13.1	13.0	13.6	23,020	24,420
Other non motor-vehicle accidents.....	21.5	19.4	19.0	17.8	17.7	17.6	31,130	31,750
Suicide.....	11.4	10.0	9.8	10.7	10.6	10.8	18,633	18,450
Homicide.....	5.3	4.6	4.5	4.5	4.6	4.5	8,159	8,010
All other causes.....	40.3	38.8	40.9	42.3	43.0	42.8	75,817	77,060

<sup>1</sup> Based on population enumerated as of April 1 for 1950, and estimated as of July 1 for other years. Rates per 100,000 population residing in area.

<sup>2</sup> Estimated; based on a 10-percent sample of death certificates.

# No. 71. DEATH RATE PER 100,000 POPULATION, FOR THE 10 LEADING CAUSES OF DEATH, BY STATES: 1959

[By place of residence. Refers only to deaths occurring within the U.S. including Alaska. Rates per 100,000 estimated midyear population in each area. Causes of death classified according to seventh revision of *International Lists of Diseases and Causes of Death*; see text, p. 49. For method of selecting the leading causes of death, see *Vital Statistics—Special Reports*, Vol. 54]

STATE	Dis- eases of heart	Malig- nant neo- plasms <sup>1</sup>	Vas- cular lesions affect- ing central nervous system	Acci- dents	Cer- tain diseases of early infancy	Influenza and pneumonia, exc. pneumonia of new- born	General arterio- sclerosis	Diabetes mellitus	Con- genital malfor- mations	Othorho- sis of liver

# **No. 76. ESTIMATES OF MARRIAGES FOR THE UNITED STATES AND MARRIAGE LICENSES ISSUED IN MAJOR CITY AREAS, BY MONTH: 1950 TO 1961**

(Beginning 1959, includes Alaska, and 1960, Hawaii. Provisional data. Figures for major-city areas represent licenses issued in 35 cities with population of 100,000 or more according to the 1950 Census, and in 69 counties containing the remaining 72 cities in that population-size group. These areas contain nearly two-fifths of the total population of the United States)

Health insurance, not cost <sup>5</sup> .....	200	614	620	740	845	3.5	4.8	3.7	4.1	4.3

<sup>1</sup> Estimated from data in the annual report *Hospitals*, Guide Issue, on patient revenues or operating expense, adjusted for estimated patient revenues in government hospitals, less government payments for hospital care under public programs.

<sup>2</sup> Department of Commerce estimate plus estimated salaries to physicians in group-practice prepayment plans and student health services. Department of Commerce estimate is income of physicians in private practice less income from nonconsumer sources—business, workmen's compensation, and government programs.

<sup>3</sup> Department of Commerce estimate of personal consumption expenditures for these items.

<sup>4</sup> Estimated on basis of estimated patient days of care in skilled nursing homes multiplied by estimated average per diem cost.

<sup>5</sup> Difference between income and benefit expenditures of all health insurance plans.

Source: Department of Health, Education, and Welfare, Social Security Administration; *Social Security Bulletin*, December 1961.

## **No. 92. HOSPITAL USE: 1935 TO 1960**

[Beginning 1959, includes Alaska and Hawaii]

1960.....	136.3	1,264.8	9.3	2.3	1,490.9	0.4	80.0	200.3

<sup>1</sup> Includes all types of hospitals other than mental and tuberculosis.

<sup>2</sup> Rate per 1,000 estimated population: as of July 1, excluding Armed Forces abroad.

Source: Department of Health, Education, and Welfare, Public Health Service; *Health, Education, and Welfare Trends*, annual supplement to *Health, Education, and Welfare Indicators*. (Computed from data prepared by American Medical Association and American Hospital Association.)

## No. 93. HOSPITALS—TYPE OF SERVICE AND CONTROL: 1946 TO 1960

[Beginning 1958, includes Alaska and Hawaii. Covers hospitals accepted for listing by the American Hospital Association. Listing is a basic recognition extended to hospitals and related institutions in accordance with requirements outlined in *Requirements for Accepting Hospitals for Listing*, officially adopted by the House of Delegates of the American Hospital Association; see text, p. 50. Short-term hospitals have an average patient stay of 30 days or less; long-term, an average stay of longer duration. See also *Historical Statistics, Colonial Times to 1957*, series B 195-248]

# No. 102. SPECIFIED REPORTABLE DISEASES—CASES REPORTED, BY MONTH: 1960

[Includes Alaska and Hawaii. Figures in this table and table 101 should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned.]

# No. 105. DAYS OF DISABILITY PER YEAR AND PER 100 PERSONS, BY ACUTE CONDITION GROUP: 1961

[For year ending June 30. Includes Alaska and Hawaii. Data refer to civilian noninstitutional population and contain some duplications, since time lost because of several concurrent conditions is counted under each contributing condition. Based on a sample and subject to sampling variability; see source for detailed explanation. For definitions of types of time lost, see footnotes, table 106]

ITEM	ACUTE CONDITION GROUP				
	Infectious and parasitic	Respiratory	Digestive	Injuries	All other
Number of cases-----1,000,000--	49.1	196.3	22.6	49.7	41.7
Rate per 100 persons-----	27.6	110.3	12.7	27.9	23.4
TOTAL DISABILITY DAYS (1,000,000)					
Restricted activity-----	225.4	631.4	77.4	331.6	259.5
Bed disability-----	107.7	267.9	34.4	83.5	97.8
Work loss <sup>1</sup> -----	16.0	68.0	12.4	75.8	23.1
School loss <sup>2</sup> -----	46.8	84.9	6.9	10.5	11.1
DAYS PER 100 PERSONS					
Restricted activity-----	126.6	354.7	43.5	186.3	145.8
Bed disability-----	60.5	150.5	19.3	46.9	55.0
Work loss <sup>1</sup> -----	25.7	109.6	20.0	122.1	45.2
School loss <sup>2</sup> -----	121.7	220.6	17.8	27.3	23.8

<sup>1</sup> Computed for persons 17 years old and over.

<sup>2</sup> Computed for children 6 to 16 years old.

<sup>3</sup> Population upon which rate is computed is only persons 17 years old and over who reported "working" as their major activity during the 12-month period preceding the week of interview.

# No. 106. DAYS OF DISABILITY PER YEAR AND PER PERSON, BY TYPE OF TIME LOST AND SEX: 1961

[For year ending June 30. Includes Alaska and Hawaii. Data refer to civilian noninstitutional population. Based on a sample and subject to sampling variability; see source for detailed explanation]

TYPE OF TIME LOST	TOTAL DISABILITY DAYS (1,000,000)			DAYS PER PERSON					
	Both sexes	Male	Female	Total	Sex		Residence		
					Male	Female	Urban	Rural nonfarm	Rural farm
Restricted-activity days <sup>1</sup> -----	2,937.4	1,261.9	1,675.5	16.5	14.6	18.3	16.3	15.8	19.1
Bed-disability days <sup>2</sup> -----	1,040.0	436.1	603.9	5.8	5.0	6.6	5.8	5.6	6.4
Work-loss days <sup>3</sup> -----	364.6	237.1	127.5	5.4	5.3	5.6	5.3	5.3	6.6
School-loss days <sup>4</sup> -----	183.9	94.7	89.2	4.8	4.8	4.7	5.1	4.7	3.9

<sup>1</sup> A day when a person cuts down on his usual activities for the whole of the day because of an illness or an injury. Includes bed-disability, work-loss, and school-loss days.

<sup>2</sup> A day on which a person was kept in bed either all or most of the day because of an illness or injury. Includes those work-loss and school-loss days actually spent in bed.

<sup>3</sup> A day is counted as a work-loss day if a person loses the entire work day because of illness or injury. Computed for persons 17 years of age and over. Population upon which rate is computed includes only persons who were "currently employed," defined as those who were working or had a job or business during the 2-week period preceding the week of interview.

<sup>4</sup> A day is counted as lost from school if the child lost the entire school day because of illness or injury. Computed for children 6 to 16 years of age.

# No. 108. PERCENT DISTRIBUTION OF AGED COUPLES AND NONMARRIED BENEFICIARIES BY MEDICAL COST INCURRED: 1957

[Based on survey of old-age and survivors insurance beneficiaries. For coverage under social security, see text, p. 273. See headnote, table 13, for definition of median]

TOTAL MEDICAL COSTS	BENEFICIARY COUPLES <sup>1</sup>		NONMARRIED BENEFICIARIES <sup>3</sup>		TOTAL MEDICAL COSTS	BENEFICIARY COUPLES <sup>1</sup>		NONMARRIED BENEFICIARIES <sup>3</sup>	
	Total	With 1 or both hospitalized <sup>2</sup>	Total	Hospitalized <sup>2</sup>		Total	With 1 or both hospitalized <sup>2</sup>	Total	Hospitalized <sup>2</sup>
Total	100.0	100.0	100.0	100.0	\$400 to \$499	5.6	9.1	2.5	6.0
None incurred	2.8		8.3		\$500 to \$599	4.0	8.1	1.0	3.9
\$1 to \$99	28.0	1.2	42.8	1.8	\$600 to \$799	3.4	8.3	1.7	8.4
\$100 to \$199	17.1	3.6	17.1	9.3	\$800 to \$999	2.3	7.7	1.0	6.0
\$200 to \$299	12.6	5.5	8.6	8.1	\$1,000 or more	7.0	28.2	4.0	21.6
\$300 to \$399	8.5	7.9	3.8	6.9	Not reported	8.7	20.3	9.2	28.1
					Median <sup>4</sup>	\$195	\$700	\$95	\$600

<sup>1</sup> A couple consists of a beneficiary drawing a retired worker's benefit and a spouse, whether or not entitled to benefits. Included are 47 couples that had a member hospitalized the entire survey year or that were broken by death, divorce, or legal separation during the survey year.

<sup>2</sup> In a general hospital or in an institution for long-term care such as a nursing home or mental or tuberculosis hospital; in case of beneficiary couples, one or both members were hospitalized.

<sup>3</sup> Includes beneficiaries never married and those widowed, divorced, or separated during the entire survey year.

<sup>4</sup> Medians are interpolated from intervals, excluding beneficiary groups with cost not reported.

Source: Department of Health, Education, and Welfare, Social Security Administration.

### No. 109. PERCENT DISTRIBUTION OF AGED COUPLES AND NONMARRIED BENEFICIARIES, BY MEANS OF MEETING MEDICAL COST: 1957

[Based on survey of old-age and survivors insurance beneficiaries. For coverage under social security, see text, p. 273]

MEANS OF MEETING COST	BENEFICIARY COUPLES <sup>1</sup>			NONMARRIED BENEFICIARIES <sup>2</sup>		
	All couples	Not hospitalized	Hospitalized <sup>3</sup>	All beneficiaries	Not hospitalized	Hospitalized <sup>3</sup>
<b>Total</b> .....	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
No cost incurred.....	2.8	3.5	-----	8.3	9.9	-----
All costs met out of beneficiary's resources <sup>4</sup> .....	78.4	84.5	56.9	70.3	75.3	42.2
Some costs met out of beneficiary's resources; beneficiary incurred debts for balance.....	5.5	2.6	15.8	2.2	1.6	6.0
Some or all costs met by others, total <sup>5</sup> .....	13.2	9.3	27.0	19.0	13.3	51.8
By relatives <sup>6</sup> .....	0.5	4.4	14.1	10.4	7.3	28.1
By public assistance agency.....	2.2	1.6	4.1	5.6	3.9	15.3
By other public or private welfare agency, including hospital <sup>7</sup> .....	5.6	3.4	13.2	4.7	2.6	16.5
Percent with costs met by health insurance.....	15.2	4.4	52.9	7.7	1.4	43.4
Percent incurring medical debts.....	6.8	3.0	20.3	3.1	2.0	9.6

<sup>1</sup> See footnote 1, table 108. <sup>2</sup> See footnote 2, table 108. <sup>3</sup> See footnote 3, table 108.

<sup>4</sup> Beneficiary resources include income, assets, and health insurance.

<sup>5</sup> Total is smaller than sum of sub-items because sub-items are not mutually exclusive.

<sup>6</sup> Includes only beneficiaries who had medical bills paid directly by relatives or who received money from relatives to pay their medical bills. Excludes beneficiaries whose housing and food costs were paid wholly or in part by relatives.

<sup>7</sup> Includes a few cases where a private physician made no charge.

### No. 111. NUTRITION—NUTRIENTS AVAILABLE FOR CIVILIAN CONSUMPTION PER CAPITA PER DAY: 1930 TO 1961

[Excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics, Colonial Times to 1967*, series G 546-551]

## Section 3

### Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report* of the Immigration and Naturalization Service. Immigration statistics are prepared from passenger and crew lists or manifests, and land border station registrations. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compilations of data from alien address report cards.

Although the reporting of alien arrivals was required in certain of the colonies and original States, the continuous record begins in 1819. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. For subsequent fiscal years, annual reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published independently.

**Immigration.**—Since 1820 the official immigration statistics (see table 118) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. For reporting purposes, Hawaii in 1901, Puerto Rico in 1902, and Alaska in 1904 were treated as integral parts of the United States. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934. Prior to 1868 arriving alien passengers were recorded; thereafter aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895 to 1897 when the reporting of arrivals was resumed. Two classes of alien admissions are now reported, immigrant under either quota or nonquota status, and nonimmigrant.

**Immigrant.**—An immigrant is defined as an alien, other than a returning resident, admitted for permanent residence.

**Quota immigrant.**—Quotas limit immigration from countries other than those of the Western Hemisphere. Until 1920 there was only a qualitative limitation on immigration into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population. In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States, as determined

from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas and thereby raised the total quota authorized to 153,714. By 1952, this figure had become 154,277 by virtue of minor changes. The most recent step in legislation was in the Immigration and Nationality Act of 1952, which simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. By Presidential proclamation effective January 1, 1953, new quotas were established for each quota area, totaling 154,657. Quotas were further revised during 1957, 1958, 1959, 1960, and 1961 by Presidential proclamation, and the total now stands at 156,487.

**Nonquota immigrant.**—Nonquota immigrants comprise immigrants born in Canada, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and countries of Central and South America, and their spouses and children under age 21 if accompanying or following to join such immigrants; spouses and children of citizens of the United States; ministers of religious denominations, their spouses and children, if accompanying or following to join such ministers; refugees; and others.

**Nonimmigrant.**—Nonimmigrants are aliens who enter the United States for temporary periods or resident aliens returning from a temporary stay abroad. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; returning resident aliens; students; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

**Displaced persons and refugees.**—The Displaced Persons Act of 1948, as amended, authorized the entry of certain displaced persons and other refugees without regard to the current availability of quotas, but subject to charges made against future annual quotas. The major provisions of the Displaced Persons Program expired in December 1951, and the program was nearly completed by June 30, 1952.

The Refugee Relief Act of 1953 authorized the issuance of 214,000 special nonquota visas until the end of 1956 to German, Italian, Greek, Far-Eastern, and other refugees and expellees from the Soviet and other Communist-dominated countries. An act passed September 11, 1957, further provided for the reallocation of 18,000 of these visas which were unused. The act of July 29, 1953, authorized nonquota admission of eligible orphans adopted by citizen members of the Armed Forces or by government employees serving overseas. The act of July 25, 1958, authorized the adjustment of status to that of permanent residents for Hungarian parolees after they had acquired 2 years residence in the United States. The act of September 2, 1958, authorized admission as nonquota immigrants of Azores victims of earthquakes and of Netherlands nationals displaced from Indonesia. The act of September 22, 1959, allowed nonquota admission of certain relatives of refugees who had previously been admitted under the Refugee Relief Act.

**Alien registration.**—The Immigration and Nationality Act provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address to the Attorney General during the month of January. Alien address report cards are distributed through the Post Offices of the United States or the local offices of the Immigration and Naturalization Service.

**Naturalization.**—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series C 139") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

# **No. 125. ALIEN AGRICULTURAL LABORERS ADMITTED, BY COUNTRY OF LAST PERMANENT RESIDENCE: 1950 TO 1961**

[For years ending June 30. Mexican workers are employed as agricultural laborers only when the Secretary of Labor has certified that sufficient domestic employees are not available, that employment of alien workers will not adversely affect the wages and working conditions of domestic agricultural workers, and that reasonable efforts have been made to attract domestic workers for such employment. Admission of alien agricultural workers from countries other than Mexico is determined by the Attorney General after consultation with appropriate agencies of the Government, upon petition of the importing employer]

<sup>1</sup> Prior to Act of Sept. 22, 1959, all sons or daughters of U.S. citizens over 21 years of age were classified as fourth preference quota. Adopted sons or daughters with petitions approved prior to Sept. 22, 1959, remained fourth preference.

<sup>2</sup> Prior to Act of Sept. 22, 1959, included only children under 21 of resident aliens. Adult sons or daughters of resident aliens were classified as nonpreference quota.

<sup>3</sup> Prior to Act of Sept. 22, 1959, classified as nonpreference quota.

<sup>4</sup> Under the Act of 1924, this class covers only women who had been U.S. citizens.

<sup>5</sup> New classes under the provisions of the Immigration and Nationality Act of 1952.

<sup>6</sup> Not reported prior to 1959.

<sup>7</sup> Returning resident aliens who have once been counted as immigrants are included with nonimmigrants.

FIG. VIII. CURRENT EXPENDITURE PER PUPIL IN AVERAGE DAILY ATTENDANCE FOR PUBLIC ELEMENTARY AND SECONDARY DAY SCHOOLS: 1960

[See table 141]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Department of Health, Education, and Welfare, Office of Education.

## Section 4

### Education

This section presents data concerning the personnel, level, extent, and finances of formal education in the United States. The chief sources of these data are the decennial Census of Population and the Current Population Survey, both conducted by the Bureau of the Census (see text, p. 1), and the annual *Statistics of Education in the United States*, issued by the Office of Education. The Census of Population has included data on school enrollment since the Census of 1840 and on educational attainment since the Census of 1940. The Current Population Survey has reported on school enrollment annually beginning in 1945 and on educational attainment and illiteracy beginning in 1947. *Statistics of Education in the United States*, first published for the school year 1958-59, basically continues the former *Biennial Survey of Education in the United States*, published from 1916-18 through 1956-58 by the Office of Education. It includes data on pupils, staff, finances, and organization at elementary, secondary, and college level.

Other regular sources of education data include special studies of the Office of Education, publications of the National Education Association, and annual or biennial reports of education agencies in individual States. The Office of Education's biennial report, *Federal Funds for Education*, contains detailed data on Federal expenditures for education. Administrative statistics on programs concerned with the distribution of Federal funds are issued by the agencies responsible. The quinquennial Census of Governments provides data on school district finances. Reports published by the Bureau of Labor Statistics contain data relating employment experience to educational attainment. Special studies by the National Science Foundation present statistics on scientists and technicians. Similar studies by the National Institutes of Health cover medical fields. Data on vocational training are available in the *Digest of Annual Reports of State Boards for Vocational Education*, issued annually by the Office of Education.

**Types of data.**—The statistics in this section are of two general types. One type, exemplified by data from the Bureau of the Census, is based on direct interrogation of individuals to obtain information about their own and their families' education. Tabulations of this type of data relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population.

The second type, exemplified by data from the Office of Education and the National Education Association, is based on reports obtained from administrators of educational institutions and of local and State agencies having jurisdiction over education. This type of data relates to school enrollment, attendance, staff, and finances for the United States, individual States, and local areas, according to institutional characteristics.

**State laws.**—Although all States except Mississippi and South Carolina require that children attend school, State laws vary as to the ages of compulsory attendance. In the majority of States, the laws require that formal schooling begin at age 7 and continue to age 16.

**Schools.**—The basic Office of Education statistics for elementary and secondary schools are concerned with the local school systems serving the general population. Data from other types of schools are secured from time to time. School enrollment

statistics of the Bureau of the Census are based on attendance or enrollment in any regular school within a given period; educational attainment statistics are based on the highest grade completed by an individual. "Regular" schools include public and private kindergartens, graded schools, colleges, universities, and professional schools. "Public" schools are defined as schools controlled and supported by local, State, or Federal governmental agencies; "private" or "nonpublic" schools are those controlled and supported mainly by religious organizations or by private persons or organizations. Neither the Office of Education nor the Bureau of the Census regularly includes specialized vocational, trade, or business schools, residential schools for exceptional children, and correspondence schools. Office of Education enrollment data include kindergartens and nursery schools if they are publicly financed; Census enrollment data include all kindergartens but exclude nursery schools. At the higher education level, the basic Office of Education statistics and the Bureau of the Census enrollment statistics are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges. Statistics for certain other types of institutions beyond the high school, such as those offering organized occupational curriculums of nondegree character, are also collected by the Office of Education.

With respect to school levels, the Bureau of the Census defines "elementary" schools as including grades 1 through 8; "high" schools as including grades 9 through 12; and "colleges" as including junior or community colleges, regular 4-year colleges, and graduate or professional schools. Statistics reported by the Office of Education according to organization, as elementary level and secondary level, may not be strictly comparable because the grades included at the secondary level vary, depending on the organization of junior high schools. The trend is for the enrollment in grades seven and eight to shift from an elementary to a secondary organization, with the result that grade distribution between elementary and secondary is changing over time.

**School year.**—Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year which generally begins in September of the preceding year and ends in June of the year stated. Statistics concerning school finances are for a 12-month period, usually July 1 to June 30.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series H 383-394") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

## No. 138. NUMBER OF PUBLIC AND PRIVATE SCHOOLS, BY LEVEL: 1930 TO 1960

[Beginning 1958, includes Alaska and Hawaii]

## No. 145. PROJECTIONS OF SCHOOL ENROLLMENT, BY SEX AND LEVEL OF SCHOOL: 1965 TO 1980

[In thousands. As of the fall of the year. Beginning 1960, includes Alaska and Hawaii. The 4 series shown represent projections based on different combinations of assumptions about population and enrollment rates. Population series II and III are based on the following assumptions as to fertility: II—1955-57 level continues to 1975-80; III—1955-57 level declines to 1949-51 level by 1965-70, then remains at that level to 1975-80. Enrollment series A and C are based on the following assumptions: A—age-specific enrollment rates will continue to increase but the average annual rate of increase will be one-half the average annual rate of change between 1950-52 and 1957-59 by 1968 and level off by 1975 to 1980; C—average annual enrollment rates for 1957-59 will remain constant to 1980. Projections based on other assumptions, and more detailed methodology, are given in the source report.]

<sup>1</sup> For 1940 and 1950, includes persons not reporting years of school completed, not shown separately here; for 1960, persons not reporting years of school completed were assigned values for that item, as explained in source.

<sup>2</sup> Includes persons reporting no school years completed.

<sup>3</sup> Medians computed on basis of unrounded data on years of school completed.

# No. 150. LIFETIME AND ANNUAL MEAN INCOME OR EARNINGS OF MALES 25 YEARS OLD AND OVER, BY YEARS OF SCHOOL COMPLETED: 1939 TO 1958

[Excludes Alaska and Hawaii. Data not directly comparable for all years shown due to minor differences in concepts and coverage. Figures for lifetime income or earnings are based on the application of appropriate life tables to the arithmetic mean income, by age, as obtained for a cross section of the population in each year shown. Figures for annual mean income for 1939 and 1949 are based on census of population data and, for 1946, 1956, and 1958, on Current Population Survey. See Technical Note, p. 213]

YEARS OF SCHOOL COMPLETED	LIFETIME INCOME			ANNUAL MEAN INCOME

# No. 151. SCHOOL LEAVERS—SCHOOL EXPERIENCE, EARLY EMPLOYMENT EXPERIENCE, AND LEVEL OF MENTAL ABILITY: 1952-57

[Percent distribution. School leavers are high school graduates who did not go on to college or other formal training immediately after graduation, and students who dropped out of junior or senior high school before graduation from high school. Based on 7 surveys (1 in the summer of 1956; 6 in the summer of 1957) conducted at least 1 year after graduation or after dropping out. The 7 geographic areas covered by the surveys are not necessarily representative of the United States]

CHARACTERISTICS	DROPOUTS		HIGH SCHOOL GRADUATES		CHARACTERISTICS	DROPOUTS		HIGH SCHOOL GRADUATES

Less than 1 week.....	39	41	51	52					
1 to 3 weeks.....	31	36	23	25					
4 to 6 weeks.....	12	11	13	12					

<sup>1</sup> Based on survey of all school leavers in the 7 areas (approximately 22,000).

<sup>2</sup> Less than 0.5 percent.

<sup>3</sup> Includes "ungraded". This classification was used by only 1 area and is defined as students who failed to earn promotion for 2 years.

<sup>4</sup> Based on sample of approximately 4,000 school leavers in the 7 areas.

<sup>5</sup> Includes "not reported".

<sup>6</sup> Based on Otis Mental Ability Group Test in 4 areas and on Terman-McNemar in 1 other; data for other areas not available. A quotient of 85 is the point below which successful completion of most high school subjects is regarded by educational authorities as generally difficult, since useful reading ability is not usually acquired below this point. Those with I.Q.'s between 85 and 89 are usually slow learners; 90 to 109 represents the normal range; and 110 or above is regarded by educators as the level of ability needed for college work.

Note: The 7 geographic areas surveyed were: Vanderburgh County, Ind.; Phoenix, Ariz.; Saginaw, Mich.; Port Huron, Mich.; Utica, N.Y.; Harrison County, W. Va.; and Providence, R.I.

# No. 152. EDUCATIONAL ATTAINMENT FOR PERSONS 25 YEARS OLD AND OVER, BY SEX: 1960 AND PROJECTIONS TO 1980

[In thousands. As of spring of year. Excludes Alaska and Hawaii. Data based on projected age-grade specific attainment rates from the 1950 Census and Current Population Surveys of October 1952 and March 1957. Series A and B in 1970 and 1980 imply the following assumptions regarding trends in educational attainment: A—continuation of short-term past trends in attainment of younger adult age groups; B—continuation of long-term past trends in attainment of younger adult age groups. Figures are based on projections of population as published in Series P-25, No. 187]

# No. 153. ILLITERACY OF PERSONS 14 YEARS OLD AND OVER, BY AGE, COLOR, SEX, AND RESIDENCE: 1947 AND 1959

[In thousands. As of October 1947 and March 1959. Excludes Alaska and Hawaii. Data relate to civilian non-institutional population based on Current Population Survey. Persons unable to both read and write in any language were classified as illiterate. Information on illiteracy was obtained in 1959 only for persons completing less than 6 years of school, and in 1947 only for persons completing less than 5 years of school. Persons completing more than that amount were classified as being literate. See also *Historical Statistics, Colonial Times to 1957*, series H 407-411]

# No. 159. PUBLIC ELEMENTARY AND SECONDARY SCHOOLS—ENROLLMENT, TEACHERS, AND SCHOOLROOMS, BY STATES: FALL 1961

[Enrollment data, compiled in the fall, are not directly comparable with the cumulative statistics on enrollment which, in *Biennial Survey of Education in the United States*, are given for an entire school year. Except as noted, schools are classified by type of organization, rather than by grade-group; elementary includes kindergarten and secondary includes junior high schools]

<sup>1</sup> Data have been adjusted to conform to a major reclassification of institutions, which excludes from the "junior college" category those institutions (classified as technical institutes and semiprofessional schools) which do not offer programs consisting wholly or principally of work creditable toward a bachelor's degree. A total of 41,437 students were enrolled in these institutions in 1955 (32,057 in publicly controlled institutions and 9,380 in private institutions).

## Section 5

### Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, Federal court cases, the legal profession, Federal and State prisoners, and the use of the death penalty. The important publications in which figures relating to these subjects appear are: *Uniform Crime Reports*, an annual bulletin of the Federal Bureau of Investigation; the *Annual Report of the Director*, Administrative Office of the U.S. Courts; and the Bureau of Prisons annual review, *Federal Prisons*, and its *National Prisoner Statistics*, a series of periodical bulletins and reports.

In addition, limited information concerning juvenile delinquency and the operation of juvenile courts is collected by the Children's Bureau of the Department of Health, Education, and Welfare and statistics on the number of lawyers and certain of their characteristics are compiled by the American Bar Foundation, Chicago, Illinois. Data on prosecution and disposition of persons charged with misdemeanors and other minor offenses may be found for some of the larger cities in the annual reports of their municipal courts or governments.

**Law enforcement and legal jurisdiction.**—Law enforcement is for the most part a function of State and local officers and agencies. The U.S. Constitution reserves general police powers to the States. By act of Congress, Federal offenses include only offenses against the U.S. Government and against its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. There are 52 separate criminal law jurisdictions in the United States, 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State, although there are among the States often substantial differences in the penalties provided for like offenses.

Law enforcement can be divided into three parts. The first covers the activities of the police agencies, namely, the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State, and Federal grand juries, and prosecuting court officers. The third division of administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the application of the penalty is carried out by the prison, reformatory, or jail, or by probation or parole officials.

**Crime.**—Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes summaries for the

country as a whole in its annual *Uniform Crime Reports*. However, in publishing the data submitted by law enforcement agencies throughout the United States, the Federal Bureau of Investigation does not vouch for their accuracy. They are issued as information which may throw some light on problems of crime and criminal-law enforcement. The great majority of communities are now reporting to the Federal Bureau of Investigation and the reports received cover 96 percent of urban and rural population in the United States.

In 1958 the Federal Bureau of Investigation appointed a consultant committee to make a study of crime reporting in the United States. As a result of the findings and recommendations of this committee, the FBI has revised its methods of compiling, classifying, and presenting statistics on crime. Because of the changes in methodology and definitions, crime figures presented in this edition of the *Statistical Abstract* for the most part are not comparable with those shown in 1959 and prior editions. The revisions are discussed in *Uniform Crime Reports for the United States* for 1958 and 1959.

**Courts.**—Court statistics for criminal offenses and the outcome of the prosecutions for the country are quite incomplete. In many States, an annual or biennial publication presents data on the disposition of criminal cases in the trial courts. The only national compilation of such statistics was made by the Bureau of the Census which until 1945 published data annually in *Judicial Criminal Statistics* on the disposition of criminal cases in the general trial courts.

Comprehensive information on the business of the Federal courts is collected by the Administrative Office of the U.S. Courts and is published in the *Annual Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine, but generally speaking the Federal courts have jurisdiction over the following types of cases:

- (1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every State and one each in Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11. They are known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

**Prisoners.**—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950 when this work was transferred to the Bureau of Prisons. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority are now published periodically by the Bureau of Prisons in *National Prisoner Statistics* and in its annual report, *Federal Prisons*. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series H 445-451") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. IX. PRISONERS PRESENT IN FEDERAL AND STATE PRISONS AT END OF YEAR: 1940 TO 1960

[See table 209]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Department of Justice, Bureau of Prisons.

FIG. X. CRIMES KNOWN TO THE POLICE, BY TYPE: 1960

[See table 188]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Department of Justice, Federal Bureau of Investigation.

## No. 188. CRIMES KNOWN TO THE POLICE, BY TYPE: 1957-59 AVERAGE AND 1960

[Includes Alaska and Hawaii. Estimates based on reports from city and rural law enforcement agencies representing 88 percent of the population for 1960, according to Bureau of the Census data. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*; see text, p. 146]

TYPE OF CRIME	ESTIMATED NUMBER OF OFFENSES		INCREASE			
	1957-59 average	1960	1957-59 to 1960		1959 to 1960	
			Number	Percent	Number	Percent
<b>Total</b> .....	<b>1,547,590</b>	<b>1,861,300</b>	<b>313,710</b>	<b>20</b>	<b>230,870</b>	<b>14</b>
Murder <sup>1</sup> .....	8,290	9,140	850	10	560	6
Forcible rape <sup>2</sup> .....	14,240	15,560	1,320	9	400	3
Robbery <sup>3</sup> .....	72,540	88,970	16,430	23	13,770	18
Aggravated assault <sup>4</sup> .....	116,020	130,230	14,210	12	6,640	5
Burglary <sup>5</sup> .....	663,500	821,100	157,600	24	122,800	18
Larceny \$50 and over <sup>6</sup> .....	388,800	474,900	86,100	22	59,100	14
Auto theft <sup>7</sup> .....	284,200	321,400	37,200	13	27,600	9

<sup>1</sup> Includes all willful felonious homicides; excludes suicides and justifiable homicides.

<sup>2</sup> Limited to forcible rapes and attempts.

<sup>3</sup> Includes the stealing or taking of anything of value by force or violence or by threat of force or violence; includes attempted robbery.

<sup>4</sup> Includes assault with intent to kill. Excludes simple assault, assault and battery, fighting, etc.

<sup>5</sup> Includes any unlawful entry to commit a felony or a theft. Includes attempted burglary and burglary followed by larceny.

<sup>6</sup> Includes theft of property or articles of value (except auto theft) without the use of force and violence or fraud. Excludes larceny resulting from burglary.

<sup>7</sup> Includes all cases where motor vehicles are driven away and abandoned. Excludes those taken for temporary use when actually returned by the taker.

Sources: Department of Justice, Federal Bureau of Investigation; annual report, *Uniform Crime Reports for the United States*.

## No. 189. URBAN CRIMES KNOWN TO THE POLICE: 1955-59 AVERAGE AND 1960

[Excludes Alaska and Hawaii. Offenses known to the police in 2,382 cities over 2,500, total population 77,356,000, according to Bureau of the Census data. For definitions not shown here, see footnotes, table 188. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*; see text, p. 146. See also *Historical Statistics, Colonial Times to 1957*, series H 445-451, for related but not comparable data]

TYPE OF CRIME	NUMBER OF OFFENSES		Percent increase
	1955-59 average	1960	
<b>Total</b> .....	<b>1,493,618</b>	<b>1,850,298</b>	<b>23.9</b>
Murder and nonnegligent manslaughter.....	3,140	3,541	12.8
Manslaughter by negligence <sup>1</sup> .....	2,129	2,352	10.5
Forcible rape <sup>2</sup> .....	5,806	6,866	18.3
Robbery.....	38,691	47,638	23.1
Aggravated assault.....	61,805	70,150	13.5
Burglary—breaking or entering.....	333,425	432,905	29.8
Larceny—theft <sup>3</sup> .....	892,784	1,104,048	23.7
Auto theft.....	155,838	182,797	17.3

<sup>1</sup> Includes deaths primarily attributable to gross negligence on the part of some individual other than the victim.

<sup>2</sup> Beginning 1958, the rape category was limited to forcible offenses. Prior to 1958 statutory cases were also included. The forcible rapes used to construct the annual averages for 1955-59 were estimates based on special offense analyses furnished by over 400 selected cities (total population over 50,000,000) which showed the proportion of reported rapes classified as forcible each year.

<sup>3</sup> Includes all reported thefts regardless of value of property stolen.

Sources: Department of Justice, Federal Bureau of Investigation; annual report, *Uniform Crime Reports for the United States*.

## No. 190. CRIME RATES, BY TYPE, BY STATES: 1959 AND 1960

[Rates based on offenses known per 100,000 population. Based on 1960 Bureau of the Census population data, excluding Armed Forces abroad. For definitions of crimes, see footnotes, table 188. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*, see text, p. 146]

## No. 197. ARRESTS IN URBAN AND RURAL PLACES, BY AGE GROUPS: 1960

[Includes Alaska and Hawaii. Represents arrests reported by 2,460 cities of 2,500 or more, population of 81,661,000 (73 percent of total population of all cities), and those reported by 981 rural agencies, population of 24,688,000; population figures according to 1960 Bureau of the Census data. Each person arrested is counted rather than the number of charges that may be filed against one person. Arrest of a juvenile is counted with the offense actually committed even though a technical charge, such as juvenile delinquency, must be filed under local procedure. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*; see text, p. 146]

OFFENSE CHARGED	Total, all ages	AGE (years)

<sup>1</sup> Not included in State figures.<sup>2</sup> Beginning 1953, excludes misdemeanant prisoners received from court into Adult Correctional Institutions.<sup>3</sup> Covers only the New Castle County workhouse through 1955; beginning 1953, also includes the Kent and Sussex County workhouses which were united with it to form a State correctional system.<sup>4</sup> Includes only prisoners liable to imprisonment in Georgia State Prison.<sup>5</sup> Beginning 1953, excludes misdemeanant prisoners received from court.Source: Department of Justice, Bureau of Prisons; *National Prisoner Statistics*, bulletins No. 24 (revised) and No. 27.

# No. 212. AVERAGE TIME SERVED BY PRISONERS RELEASED FROM FEDERAL INSTITUTIONS FOR FIRST TIME, BY OFFENSE: 1961

[For year ending June 30. Includes a few prisoners committed from the Federal courts in Alaska and Hawaii. Excludes 824 first releases other than by parole, expiration of sentence, and mandatory release; also excludes 1,056 parole releases of offenders sentenced under the Youth Corrections Act and 1,318 second or subsequent releases. In computing averages, sentences to life and to more than 45 years were counted as 45 years; minority sentences of juvenile delinquents were counted from date of sentence to 21st birthday]

# No. 216. PRISONERS EXECUTED UNDER CIVIL AUTHORITY, BY OFFENSE AND RACE: 1930 TO 1961

[Includes 2 Federal executions in Alaska, 1 in 1948 and 1 in 1950. Excludes executions by military authorities. The Army (including the Air Force) carried out 160 (148 between 1942 and 1950, 3 each in 1954, 1955, and 1957, and 1 each in 1958, 1959, and 1961). Of the total, 106 were executed for murder (including 21 involving rape), 53 for rape, and 1 for desertion. The Navy carried out no executions during the period. See also *Historical Statistics, Colonial Times to 1967*, series H 432-444]

FIG. XI. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER PRINCIPAL AREAS  
[See table 218]

Source: Department of Commerce, Bureau of the Census.

## Section 6

### Area, Geography, and Climate

Statistics in this section relate to area, climatologic, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements (issued infrequently by the Bureau of the Census), which present area and geography statistics of national scope. However, many data are compiled for particular regions or for internal administrative purposes by such Federal Government agencies as the Geological Survey, the Coast and Geodetic Survey, and the Weather Bureau.

**Area.**—Area measurements in the United States began with measurements for the country as a whole and developed, as mapping progressed, to measurements for the States.

The annual report of the U.S. General Land Office for 1850 contained the first reference to the areas of the several States and Territories, although there was no indication of the method used in obtaining these measurements. Until 1881, the General Land Office was practically the sole source of information concerning the areas of the States and Territories.

In 1881, the Bureau of the Census, as a part of the 1880 Census of Population, laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement. In 1940, the same Bureau, in its publication, *Areas of the United States: 1940*, presented the first basic measurement of the United States since its work in 1880. The data presented in that study cover the total land and water areas of the States, counties, cities, and minor civil divisions. For the 1950 and 1960 Censuses no comprehensive remeasurement of all areas was made, but adjustments in selected area figures were made for three principal reasons: (1) Changes in boundaries, (2) the development of water reservoirs, or (3) the improvement in maps from which area measurements are made.

**Geography.**—The Geological Survey, cooperating in some instances with State and local agencies, is responsible for topographic and geologic maps and for basic data concerning the quantity, quality, and movement of surface and ground water.

The Bureau of Land Management conducts cadastral surveys.

The Coast and Geodetic Survey has responsibility for coastal and geodetic surveys and measurement of certain physical phenomena. Authorized in 1807, this agency's original function was to survey and chart the coast of the United States and the outlying islands and fishing banks. In 1871, Congress authorized an extension of the geodetic surveys from coast to coast to provide the States with reference markers for the control of their topographic and geologic mapping and their boundary surveys, and to provide data for use by the Geological Survey and other agencies. Since 1927, the Coast and Geodetic Survey has also been in charge of preparing aeronautical charts for the United States and its outlying areas.

A civil mapping activity of the Corps of Engineers, the U.S. Lake Survey, was established in 1841. Its primary function is to furnish Great Lakes navigators with reliable charts and information regarding harbor facilities. It also maintains records of the fluctuating levels of the lakes, the flow through connecting rivers, and the precipitation over the lakes, and reports on all hydraulic problems relating to the Great Lakes.

**Climate.**—The Weather Bureau is responsible for essentially all meteorologic data and collects, processes, and publishes climatologic data. It maintains about 11,000 weather stations, of which nearly 3,000 stations produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871 although some earlier and less detailed records began in the 18th century.

Nearly all weather stations have been moved several times in their history. Consequently, the Weather Bureau has adopted the practice of using "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the several different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1931 to 1960, inclusive. Where a station had a record for the entire 30 years from the same instrument site, monthly precipitation normals are the mean of the monthly values for the 30 years. For such stations, the temperature normals were obtained in a similar manner, with normal maximum and normal minimum values used to obtain monthly normals. The annual normal temperature is obtained by dividing the sum of the annual normal maximum value and the annual normal minimum value for temperature by 2.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1931 to 1960, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining the resultant adjusting factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1931 to 1960) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated.

The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and are computed on the standard base 65° F. The degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series J 1-2") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

# No. 218. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER AREAS

[Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession, which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1960. See also *Historical Statistics, Colonial Times to 1957*, series J 1-2]

ACCESSION	Date	Gross area (land and water)	ACCESSION	Date	Gross area (land and water)
<b>Total (1960)</b> .....		<i>Sq. mi.</i> 3,628,150	<b>Other:</b>		<i>Sq. mi.</i>

			<b>Arctic coast, Alaska</b> .....	1,060	2,521

<sup>1</sup> Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

<sup>2</sup> Figures obtained in 1939-1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

<sup>1</sup> Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

<sup>2</sup> Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

<sup>3</sup> Year of ratification of Constitution; one of the original 13 States.

<sup>4</sup> See table 4, footnote 13.

<sup>5</sup> See table 4, footnote 16.

No. 221. EXTREME POINTS OF THE UNITED STATES

[The geographic center of an area may be defined as that point on which the surface of the area would balance if it were a plane of uniform thickness or, in other words, the center of gravity of the surface. The exact position of the geographic center of the United States cannot be determined from the data available and the positions given here must be considered approximate only. They are believed to be sufficiently accurate for ordinary purposes]

LOCATION	Direction from geographic center	COORDINATES		Distance from geographic center
		Latitude (N)	Longitude (W)	
From geographic center of United States (conterminous area) near Lebanon, Smith County, Kans., 39°50', 98°35' to—				Miles
Lake of the Woods, Minnesota.....	North.....	49°23'	95°09'	680
West Quoddy Head, Maine.....	Northeast.....	44°49'	66°57'	1,640

Cape Sable, Florida.....	Southeast.....	25°07'	81°05'	1,800
Cape Wrangell, Attu Island, Alaska.....	Northwest.....	62°55'	172°27' (E)	3,623
From geographic center of the United States (incl. Alaska and Hawaii) west of Castle Rock, S. Dak., 44°58', 103°46' to—				
Point Barrow, Alaska.....	Northwest.....	71°23'	156°29'	2,502
West Quoddy Head, Maine.....	East.....	44°49'	66°57'	1,785
Ka Lae (South Cape), Hawaii Island, Hawaii.....	Southwest.....	18°56'	155°41'	3,455
Kure Island, Hawaii.....	Southwest.....	28°25'	178°22'	4,136

<sup>1</sup> Excludes adjacent islands.

<sup>2</sup> Excludes islands adjacent to the United States (conterminous area).

<sup>3</sup> Excludes islands adjacent to the United States (conterminous area) but includes all islands of the Aleutian chain and Hawaii.

Note.—The following distances are computed to mean sea level: (a) from West Quoddy Head west along the parallel to the Pacific Ocean the distance is 2,807 miles; (b) from the south point of Texas due north to the 49th parallel the distance is 1,698 miles; (c) from West Quoddy Head, Maine, to Cape Wrangell, Alaska, the distance is 4,839 miles; (d) from West Quoddy Head, Maine, to Kure Island, Hawaii, the distance is 5,788 miles; (e) from Mangrove Point, Florida, to Cape Wrangell, Alaska, the distance is 5,496 miles; (f) the two points farthest apart are Kure Island, Hawaii, and Mangrove Point, Florida, a distance of 5,848 miles; (g) length of the northern boundary, excluding Alaska, is 3,987 miles; (h) length of the Mexican boundary from the Gulf of Mexico to the Pacific Ocean is approximately 2,013 miles; (i) length of the Canadian-Alaskan boundary from Arctic Ocean to Portland Canal is approximately 1,638 miles.

The Lake of the Woods projection extends to latitude 49°23' at longitude 95°09'. The extreme south point of Texas is in latitude 25°50', longitude 97°24'.

<sup>1</sup> Tropical cyclones have maximum winds of 39 to 73 miles per hour; hurricanes have maximum winds of 74 miles per hour or higher. <sup>2</sup> 1956-59 data. <sup>3</sup> Not available.Source: Department of Commerce, Weather Bureau: *Climatological Data*, annual national summary issues.

## No. 228. ESTIMATED WATER USE: 1900 TO 1960, AND PROJECTIONS TO 1980

[In billions of gallons daily average. In preparing these projections, it was estimated that the population residing in the United States (conterminous area) would grow from 176.2 million in 1959 to 230.8 million in 1980, and that the index of industrial production would rise from approximately 152 to 330 in the same period. See also *Historical Statistics, Colonial Times to 1867*, series J 91-102]

## Section 7

### Public Lands; Parks; and Recreation

Statistics in this section relate to the Federal public domain and other Federally owned and leased real property, national parks and forests, State and municipal parks, foreign and domestic travel, and other forms of recreation.

Public lands statistics are published primarily by the Department of the Interior, Bureau of Land Management, in the *Annual Report of the Director*. Data on Federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*. The Economic Research Service of the Department of Agriculture also compiles and issues statistics on land use and land ownership.

The National Park Service of the Department of the Interior publishes information on national parks in its annual report, *Areas Administered by the National Park Service* and its monthly report, *Public Use, National Parks and Related Areas*; and on State park systems in its annual report, *State Park Statistics*. Data for municipal parks and playgrounds, as well as for other outdoor recreational activities, have been compiled by a private agency, Resources for the Future, Inc., Washington, D.C., and published in *Statistics on Outdoor Recreation* (1958). The Forest Service collects and issues in its *Annual Report of the Chief*, figures for recreational uses of the national forests. The Fish and Wildlife Service compiles data for hunting and fishing. Figures on expenditures for recreation and on domestic and foreign travel are compiled by the Department of Commerce and appear periodically in the monthly *Survey of Current Business* and in other reports.

**Public-domain and acquired lands.**—The U.S. Government acquired sovereignty over its present land area through a series of international agreements and treaties, but did not gain title to all of this land by such agreements. At the time of acquisition of U.S. sovereignty over the areas involved (now 2,271 million acres) title to about 463 million acres rested in individual States and their political subdivisions or in private owners, and was not relinquished to the U.S. Government. Title to the remaining land area passed to the U.S. Government. This area, with the exception of lands in the District of Columbia, is known as the original public domain.

Public-domain lands or public lands refer to those Federally owned lands to which the general body of public land laws applies. In general, these lands include that portion of the original public domain not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be public lands.

In addition to the original public domain, the U.S. Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands, to distinguish them from public-domain lands.

**Indian lands.**—Indian lands refer to public-domain lands ceded to the Government by Indian tribes on condition that proceeds from their sale or other disposition would be earmarked in the Treasury as in trust for the Indians.

**Entries, selections, patents, and certifications.**—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to

public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series J 3-9") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

#### No. 244. ACQUISITION AND EXTENT OF PUBLIC DOMAIN OF THE UNITED STATES: 1781 TO 1960

[Areas are as computed in 1912; hence do not agree with figures in square miles shown in table 218, which includes later adjustments and reflects subsequent remeasurement. See also *Historical Statistics, Colonial Times to 1957*, series J 3-9]

ITEM	ACQUISITION OF THE ORIGINAL PUBLIC DOMAIN			Estimated area of the public domain (selected years) <sup>1</sup>
	Total area	Land area	Water area

1846, Oregon Compromise.....	183,386,240	180,644,480	2,741,760	-----
1819, Cession from Spain.....	46,144,640	43,342,720	2,801,920	-----
Red River Basin <sup>3</sup> .....	29,601,920	29,066,880	535,040	-----
1803, Louisiana Purchase <sup>4</sup> .....	629,911,680	623,446,400	6,465,280	-----
1802, estimate of public domain.....	-----	-----	-----	200,000,000
1781-1802 (State Cessions).....	236,825,600	233,415,680	3,409,920	-----

<sup>1</sup> Estimated from imperfect data available for indicated years. Beginning 1959, includes Alaska.

<sup>2</sup> Data for Louisiana Purchase exclude areas eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.

<sup>3</sup> Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain State.

<sup>4</sup> Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.

Source: Department of Interior. Estimated area, Bureau of Land Management; all other data, Office of the Secretary, *Areas of Acquisitions to the Territory of the U.S.*, 1922.

**No. 245. TOTAL LAND AND FEDERALLY OWNED LAND AND BUILDINGS, BY ACQUISITION AND COST, 1955 TO 1961, AND BY STATES, 1961**

[Land in thousands of acres; cost in millions of dollars. As of June 30. Beginning 1959, includes Alaska, except as noted, and beginning 1960, includes Hawaii]

<sup>1</sup> Comprises receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For periods prior to 1901, receipts were \$340,821,000.<sup>2</sup> Excludes data for Alaska. As of June 30, 1961, process of legal adjudication had not yet been completed for all grants, so small change in data for certain years may occur. For period 1802-1900, total land granted to States was 156,044,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands left to States, for which States received indemnity in cash.<sup>3</sup> Includes homesteads. <sup>4</sup> Includes some classes of final entries and patents prior to 1911.<sup>5</sup> Excludes commuted homesteads. <sup>6</sup> 1920 only.Source: Department of the Interior, Bureau of Land Management; *Annual Report of the Director* (Statistical Appendix), and records.

## No. 254. VACANT PUBLIC LANDS—ACREAGE, BY STATES: 1900 TO 1961

[In thousands. As of June 30. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry, the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See also *Historical Statistics, Colonial Times to 1937*, series J 10, for U.S. totals excluding Alaska]

<sup>1</sup> A trip involves 1 person being out of town at least overnight or taking a 1-day round trip to a place that is at least 100 miles (1 way) away from home. A round trip starts and ends in the traveler's home locality. If 2 persons in the same household take a round trip together, 2 round trips are counted.

<sup>2</sup> Days spent away from home locality by 1 person on a round trip.

<sup>3</sup> Includes both "direct business" in which the traveler goes principally for business reasons, and "indirect business" in which others in the household accompany the person who went for business purposes.

<sup>4</sup> Includes Alaska, Hawaii, and outlying and foreign areas.

## Section 8

### Labor Force, Employment, and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the Bureau of the Census' Decennial Census of Population (see text, p. 1); the Bureau of Labor Statistics' *Employment and Earnings*, *Monthly Labor Review*, and *Monthly Report on the Labor Force*; and the monthly report of the Statistical Reporting Service of the Department of Agriculture, *Farm Labor*.

Statistics shown in this section are of two types. One type is obtained by the "population approach" represented by the Census of Population of the Bureau of the Census and by the monthly labor force survey of the Bureau of Labor Statistics, for which data are collected by the Bureau of the Census as a part of the Current Population Survey (see text, p. 2). This approach involves direct enumeration and interrogation to obtain information on employment activity from workers or members of workers' households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period.

The second type of data is obtained by the "establishment approach," represented by the industry surveys of the Bureau of Labor Statistics and the surveys of the Department of Agriculture's Statistical Reporting Service. These data are based on reports from employers, i.e., farms, businesses, or industrial establishments. Such data as wages, hours worked, labor turnover, and industry affiliation of employees can be more accurately obtained from employers' records than from inquiries directed to a worker or a member of his household. Workers appearing on more than one payroll for the same time period are counted more than once in establishment statistics.

The Census of Population provides detailed data for the United States and for each State, city, and other area. It includes personal characteristics (sex, age, race, etc.) of the numbers employed and unemployed, the numbers reported in each occupation and industry, and other items. The labor force survey provides current data published in *Employment and Earnings* and in related publications series of the *Bureau of Labor Statistics*. Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industries and in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupation groups of those employed, and duration of unemployment of those unemployed.

In addition, the Bureau of Labor Statistics' *Employment and Earnings* provides detailed monthly data on employment, unemployment, payrolls, labor turnover, earnings, and hours. These data are shown for broad groupings in the *Monthly Labor Review*, which also presents statistics on wage rates, industrial relations, and output per man-hour. Certain of these data are shown for States and large cities. Historical statistics for the United States are shown in the Bureau of Labor Statistics' Bulletin No. 1312, *Employment and Earnings Statistics for the United States, 1909-60*.

**Labor force.**—The labor force data published by the Bureau of Labor Statistics and by the Bureau of the Census include persons 14 years old and over who were employed, unemployed, or in the Armed Forces during a specified week. Employed persons include those who did any work for pay or profit during the week, worked without pay for 15 hours or more in a family enterprise (farm or business), or did not work or look for work but had a job or business from which they were temporarily absent during the week. Unemployed persons comprise those who did not work at all during the week but were looking for work or were on layoff from a job.

In the 1960 Census, the labor force data relate to the first or second week of April for the majority of the population. "Experienced civilian labor force" refers to all employed workers and unemployed workers with previous work experience.

**Employment and earnings.**—The monthly estimates of nonagricultural employment prepared by the Bureau of Labor Statistics are based on voluntary reports from establishments which employed 11 million manufacturing workers in March 1959 (66 percent of total manufacturing employment at that time) and 7 million workers in nonmanufacturing industries except Government (28 percent of the total in nonmanufacturing industries). These reports are supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Government social insurance programs. The monthly estimates exclude persons not normally on establishment payrolls, such as proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and persons in the Armed Forces. The employment data are for all employees, whether full- or part-time, who received pay for any part of the period reported.

Estimates are available on a continuous basis from 1919 for total nonfarm payroll employment and the 8 major industry divisions. Estimates for other periods are available for several hundred selected industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 240 manufacturing subgroups, and for mining industries. Also, estimates for nonsupervisory workers are published for individual wholesale trade, retail trade, public utility, and some finance and service industries. Estimates for construction workers are published for the contract construction industries.

Average weekly hours and average weekly and hourly earnings are available for production and related workers for over 300 series in manufacturing; in mining, laundries, and cleaning and dyeing industries; and for nonsupervisory employees and working supervisors in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*.

**Output per man-hour.**—The Bureau of Labor Statistics prepares and publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production. The indexes measure the relationships between the volume of goods produced and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor do they measure increased efficiency resulting from more economical use of fuels and materials or more efficient integration of industries. The indexes of output per man-hour for selected industries are based on this concept.

The other concept of productivity measurement, net output per man-hour, deals with the relationship between value added (at fixed prices) and man-hours. These indexes reflect not only average productivity change of industry components, but shifts among industries, and savings in materials consumption.

**Labor turnover.**—Labor turnover rates are published monthly in the *Monthly Labor Review* and in *Employment and Earnings* for over 200 industries on the basis of reports from cooperating establishments employing almost 10 million workers (about 55 percent of the universe surveyed). Labor turnover data are available on a monthly

basis from January 1930 for manufacturing as a whole. Labor turnover rates for individual industries and industry groups are available on a continuous basis only from January 1958.

**Work stoppages.**—The basic measures of strike statistics compiled by the Bureau of Labor Statistics are the number of stoppages, of workers involved, and of man-days of idleness. Basic statistical data are obtained from the employers and unions involved. Knowledge of strikes comes from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau prepares annual reports published in the *Monthly Labor Review* and, later, in bulletin form, giving total figures for each month of the year and analyses of strikes by industry, State, city, causes, and other pertinent classifications.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—*Tabular headnotes* (as "See also *Historical Statistics, Colonial Times to 1967*, series D 1-14") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

---

#### Technical Note—Current Population Survey

**Source of data.**—The Current Population Survey is a monthly sample survey conducted by the Bureau of the Census. Monthly data on the labor force are collected and compiled for the Bureau of Labor Statistics as a part of the Current Population Survey. The current sample design, instituted in May 1956, is spread over 333 areas comprising 641 counties and independent cities, with coverage in each of the 50 States and the District of Columbia. Approximately 35,000 households are interviewed each month. Another 1,500 occupied dwelling units, on the average, are visited but interviews are not obtained because the occupants are not found at home after repeated calls or are unavailable for some other reason. There are also about 5,500 sample units in an average month which are visited but are found to be vacant or otherwise not to be enumerated. Data on the Armed Forces are obtained from the Department of Defense.

**Reliability of the estimates.**—According to current computations, the relative sampling error for summary estimates such as civilian labor force, total employment, and nonagricultural employment is about 0.4 percent; for agricultural employment and for unemployment, it is roughly 3 to 4 percent. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than  $2\frac{1}{2}$  times the percentage.

The sampling variability indicated above is illustrative of the variability of data based on the Current Population Survey. For further details on the sampling variability, see the *original releases* of the Bureau of the Census and explanatory notes in the Bureau of Labor Statistics *Employment and Earnings*.

**Comparability with Decennial Population Census data.**—Statistics obtained from the Current Population Survey may differ from Decennial Census data because of sampling variability, as described above. In addition, comparability between the two sets of data may be affected by other factors, such as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U.S. Census of Population: 1960*, Vol. I.

FIG. XII. TRENDS IN THE LABOR FORCE: 1950 TO 1960  
[See table 280]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data for 1950-June 1959 are from Bureau of the Census; thereafter, Department of Labor, Bureau of Labor Statistics.

# No. 280. EMPLOYMENT STATUS OF THE NONINSTITUTIONAL POPULATION, BY SEX: 1940 TO 1962

[In thousands of persons 14 years old and over. Beginning 1960, includes Alaska and Hawaii. Annual figures are averages of monthly figures. Data for 1947-1956 adjusted to reflect changes in definition of employment and unemployment adopted in January 1957. Beginning 1953, labor force and employment figures not strictly comparable with previous years as a result of the introduction of material from the 1950 Census into estimating procedure. See also *Historical Statistics, Colonial Times to 1957*, series D 1-14 and D 20, for similar but not exactly comparable data.]

**NO. 292. EMPLOYEES IN NONAGRICULTURAL ESTABLISHMENTS—ANNUAL AVERAGES,  
TOTAL, 1960 AND 1961, AND BY INDUSTRY DIVISION, 1961, BY STATES**

[In thousands. For coverage, see headnote, table 290. National totals differ from the sum of the State figures because a few States prepare combinations of industry divisions, some States have more recent benchmark levels than others, and methods of computation may vary slightly among the States]

### No. 300. INDEXES OF LABOR AND NONLABOR PAYMENTS, PRICES, AND OUTPUT PER MAN-HOUR IN THE PRIVATE ECONOMY AND THE NONFARM SECTOR: 1947 TO 1961

[1957-59=100. Beginning 1960, includes Alaska and Hawaii. In addition to wages and salaries of employees, labor payments include supplements to wages and salaries, such as employer contributions to social security, private insurance and pension funds, compensation for injuries, and other minor items of labor income. Non-labor payments are derived as the difference between labor payments and gross national product in current dollars]

ITEM	1947	1950	1955	1958	1959	1960	1961 (prel.)
Unit labor and nonlabor payments and prices:							
Private nonfarm sector:							
Employee compensation per dollar of real product.....	73.7	78.0	90.3	100.1	101.2	103.6	104.1
Wages and salaries per dollar of real product.....	75.6	79.6	91.1	100.2	100.9	102.7	103.3
Nonlabor payments per dollar of real product.....	73.7	83.9	94.3	99.4	102.3	102.4	104.6
Implicit price change.....	73.7	80.6	92.1	99.8	101.7	103.1	104.4
Real product per man-hour and real hourly earnings:							
Total private economy:							
Real product per man-hour—all persons.....	71.0	81.0	93.8	99.6	103.2	105.3	108.9
Real compensation per employee man-hour.....	71.9	78.5	91.6	98.0	102.8	104.8	107.8
Real wages and salaries per employee man-hour.....	73.8	80.0	92.5	99.1	102.5	103.9	106.9
Private nonfarm sector:

Tobacco products <sup>2 8</sup> .....	55.5	66.3	81.4	85.4	94.8	100.5	104.8	112.7	118.3
Cigars <sup>2 8</sup> .....	48.3	57.0	65.4	75.8	88.7	101.1	111.6	121.4	128.8
Cigarettes, chewing and smoking tobacco, and snuff <sup>2 8</sup> .....	62.7	75.7	99.2	94.4	99.7	100.0	100.3	106.9	111.4

<sup>1</sup> Includes anthracite and bituminous coal.

<sup>2</sup> Production-worker-hours paid.

<sup>3</sup> Adjusted to levels indicated by 1939, 1954, and 1958 Censuses of Mineral Industries.

<sup>4</sup> Refers to Class I line-haul railroads; in terms of hours worked plus constructive allowances, for all hourly basis employees.

<sup>5</sup> Adjusted to levels indicated by 1947, 1954, and 1958 Censuses of Manufactures.

<sup>6</sup> Not available.

<sup>7</sup> Not comparable to index for basic steel due to changes in Standard Industrial Classification.

<sup>8</sup> Production-worker-hours paid prior to 1947, and hours worked thereafter.

<sup>9</sup> Production-worker-hours worked.

<sup>10</sup> Adjusted to levels indicated by 1947 and 1954 Censuses of Manufactures.

### No. 304. PRODUCTION WORKERS IN MANUFACTURING INDUSTRIES—HOURLY AND WEEKLY EARNINGS AND WEEKLY HOURS: 1940 TO 1962

[Beginning 1959, includes Alaska and Hawaii. Net spendable average weekly earnings represent average gross earnings less social security and income taxes for which specified worker is liable. These net spendable earnings are then divided by the BLS consumers price index adjusted to an average 1957-59 base, to obtain net spendable earnings in 1957-59 dollars. Overtime is defined as work in excess of either the straight-time workday or work-week and paid for at time and one-half. Computation of average hourly earnings exclusive of overtime makes no allowance for special rates of pay for work done on holidays. See also *Historical Statistics, Colonial Times to 1957*, series D 626-628]

YEAR	Gross average weekly earnings	NET SPENDABLE AVERAGE WEEKLY EARNINGS				Average weekly hours	AVERAGE HOURLY EARNINGS	
		Worker with no dependents		Worker with 3 dependents			Gross	Exclud- ing overtime
		Current dollars	1957-59 dollars	Current dollars	1957-59 dollars

**No. 306. HOURS AND GROSS EARNINGS OF PRODUCTION WORKERS OR NONSUPERVISORY EMPLOYEES, BY INDUSTRY: 1959, 1960, AND 1961**

[Includes Alaska and Hawaii. Data are based upon reports from cooperating establishments covering both full- and part-time employees who worked during, or received pay for, any part of the pay period ending nearest the 15th of the month. For mining, manufacturing, laundries, and cleaning and dyeing plants, data refer to production and related workers only. For contract construction industries, data relate to employees engaged in actual construction work. For other industries, data relate to nonsupervisory employees and working supervisors. See also *Historical Statistics, Colonial Times to 1957*, series D 626-641 and D 669-684, for selected industries]

## **NO. 309. PERCENT OF OFFICE AND PLANT WORKERS EMPLOYED IN ESTABLISHMENTS HAVING FORMAL PROVISIONS FOR SELECTED SUPPLEMENTARY WAGE BENEFITS, 188 STANDARD METROPOLITAN STATISTICAL AREAS: 1961**

[Surveys relate geographically to the 188 standard metropolitan statistical areas in the United States, excluding Alaska and Hawaii, as established by the Bureau of the Budget through 1959. Based on occupational wages surveys conducted in 80 areas, selected to represent the 188 areas; 34 of the areas were surveyed in late 1960, and 46 during the first half of 1961. Data obtained from sample of establishments which employ 50 workers or more, except in 12 of the largest areas where the minimum size was 100 employees for manufacturing, public utilities, and retail trade; see source. Excludes data for government institutions, and construction and extractive industries. Excludes administrative, executive, and professional employees]

### No. 315. INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1945 TO 1961

[1947-49 average=100, except for printing where 1948-49 average=100. Excludes Alaska and Hawaii. Data for 1945 and 1954 to 1961 were collected as of July 1 and cover 53 cities in printing and 52 in the other trades. For 1950, however, data were collected as of October 1 for streetcar and bus operators. Indexes of rates reflect changes in minimum hourly wage scales; indexes of hours reflect changes in the negotiated straight-time weekly hours. Year-to-year changes in union scales are based on comparable quotations for each individual trade weighted by membership for current year. See also *Historical Statistics, Colonial Times to 1967*, series D 642-653]

## No. 323. WORK STOPPAGES: 1940 TO 1961

[Beginning 1950, includes Alaska, and 1960, Hawaii. Excludes work stoppages involving fewer than 6 workers or lasting less than 1 day. Information obtained directly from companies and unions involved as well as from various Government labor boards, conciliation services, and other neutral parties. See also *Historical Statistics, Colonial Times to 1967*, series D 764-769 and D 774]

YEAR	WORK STOPPAGES BEGINNING IN YEAR		WORKERS INVOLVED		MAN-DAYS IDLE DURING YEAR		
	Number	Average duration (calendar days)	Number (1,000) <sup>1</sup>	Percent of total employed <sup>2</sup>	Number (1,000)	Percent of estimated working time <sup>3</sup>	Per worker involved
1940.....	2,508	20.9	577	2.3	6,700	0.10	11.6
1945.....	4,760	9.9	3,470	12.2	38,000	0.47	11.0
1946.....	4,985	24.2	4,600	14.5	116,000	1.43	26.2
1947.....	3,693	25.6	2,170	6.5	34,600	0.41	15.9
1948.....	3,419	21.8	1,960	5.5	34,100	0.37	17.4
1949.....	3,606	22.5	3,030	9.0	50,500	0.59	16.7
1950.....	4,843	19.2	2,410	6.9	38,800	0.44	16.1
1951.....	4,737	17.4	2,220	5.5	22,900	0.23	10.3
1952.....	6,117	19.6	3,540	8.8	59,100	0.57	16.7
1953.....	5,091	20.3	2,400	5.6	28,300	0.26	11.8
1954.....	3,468	22.5	1,530	3.7	22,600	0.21	14.7
1955.....	4,320	18.5	2,660	6.2	28,200	0.26	10.7
1956.....	3,825	18.9	1,900	4.3	33,100	0.29	17.4
1957.....	3,673	19.2	1,390	3.1	16,500	0.14	11.4
1958.....	3,694	19.7	2,060	4.8	23,900	0.22	11.6
1959.....	3,708	24.6	1,880	4.3	69,000	0.61	36.7
1960.....	3,333	23.4	1,320	3.0	19,100	0.17	14.5
1961.....	3,367	23.7	1,450	3.2	16,300	0.14	11.2

<sup>1</sup> Workers counted more than once if involved in more than 1 stoppage during year.

<sup>2</sup> Total employed workers for 1940-1950 refers to all workers except those in occupations and professions in which there is little if any union organization or in which stoppages rarely if ever occur. In 1951, concept was changed to coincide with the Bureau of Labor Statistics' figures for nonagricultural employment, excluding Government but including workers in all occupational groups. Tests show that percentage of total idleness computed on basis of these new figures usually differs by less than one-tenth of a point while percentage of workers idle differs by about 0.5 or 0.6 of a point.

<sup>3</sup> Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

## No. 324. WORK STOPPAGES—MAJOR ISSUES INVOLVED AND DURATION: 1959 TO 1961

[Beginning 1959, includes Alaska, and 1960, Hawaii. See headnote, table 323. Data by issues based on stoppages beginning in year; duration data based on stoppages ending in year. See also *Historical Statistics, Colonial Times to 1967*, series D 770-778, for related but not comparable data]

FIG. XIII. FEDERAL GOVERNMENT EXPENDITURES FOR NATIONAL DEFENSE FUNCTIONS AND VETERANS BENEFITS AND SERVICES: 1940 TO 1963

[See table 327]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Bureau of the Budget.

## Section 9

### Military Services and Veterans Affairs

This section presents statistics relating to national defense, several measures of its human and financial costs, and indicators of military personnel, ships, aircraft, and Selective Service operations. Also included are statistics on the various programs and benefits sponsored for veterans by the Federal Government. The principal sources of these data are the Department of Defense, Office of the Secretary of Defense; annual reports of the separate Departments of the Army, Navy, and Air Force; the Selective Service System; the *Annual Report of the Administrator of Veterans Affairs*, Veterans Administration; and the *Budget of the United States Government*, Bureau of the Budget.

**Department of Defense.**—Until 1947 the Army, Navy, and Air Force operated under independent jurisdiction answering only to the Commander-in-Chief, the President of the United States. In 1947, as a result of the passage of the National Security Act, a new executive department was established, the National Military Establishment. This department was organized to provide for the coordination and unified direction of the Army, Navy, and Air Force under a civilian Secretary of Defense. The Army, Navy, and Air Force were not merged, however. Each remained separately administered and retained its individual Department status. Amendments to the National Security Act in 1949 added new powers to the Secretary of Defense and redesignated the National Military Establishment as the Department of Defense.

**Selective Service.**—The Selective Service System is responsible for the registration, classification, selection, forwarding for examination, and delivery for induction into the Armed Forces of all men required to register under the Universal Military and Training Act, as amended. The act requires the registration of all men in the United States between the ages of 18 and 26, and makes those between 18½ and 26 years old liable for service in the Armed Forces. Deferred persons remain liable for service until they attain 35 years of age. The act also provides exemptions or deferments from service for many persons for reasons of previous service, essential occupation, etc. Selective Service is also authorized to determine the availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency.

**Veterans Administration.**—The Veterans Administration administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the dependents and other beneficiaries of deceased former members of such forces. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pension for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; U.S. Government and National Service Life Insurance; servicemen's indemnity in lieu of insurance; hospitalization; domiciliary care; outpatient medical and dental care for service-connected disability; prosthetic and other appliances; special housing for certain seriously disabled veterans; automobiles or other conveyances for certain disabled veterans; burial allowances; and educational assistance to war orphans.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series Y 357-358") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

### No. 327. FEDERAL GOVERNMENT EXPENDITURES FOR NATIONAL DEFENSE FUNCTIONS AND VETERANS BENEFITS AND SERVICES: 1930 TO 1963

[In millions of dollars. For years ending June 30. Includes expenditures not only of Department of Defense and Veterans Administration but also of other agencies for activities *primarily* related to national defense and veterans programs. Excludes expenditures for programs which, though closely related to national defense or veterans services, have a primary relationship to other categories of the functional classification (see table 505). Functional classification revisions for national defense have been carried back through 1939. For further detail as to classification of particular items in 1961, 1962, and 1963, see *Budget of the United States Government, 1963*, pp. 103-109 and 118-266. See also *Historical Statistics, Colonial Times to 1957*, series Y 367-388 and Y 360]

# No. 333. MILITARY ASSISTANCE PROGRAM—VALUE OF PROGRAMS AND DELIVERIES, BY AREA AND COUNTRY: 1950 TO 1962

(In millions of dollars. For years ending June 30. Programs and deliveries represent the value of military equipment, supplies, and services planned for delivery and actually delivered to recipient countries. Includes (a) equipment and supplies procured for the Military Assistance Program or provided from procurement or stocks of military departments; (b) services, such as training, military construction, repair and rehabilitation of excess stocks, supply operations, and other accessorial charges, the delivery of which is included on the basis of the expenditure for the service; and (c) purchases of military equipment and supplies initially credit financed with MAP funds. Excludes equipment and supplies which are excess to requirements of U.S. military departments. The fact that there is a military assistance program for a country is not to be construed as a commitment of the United States.)

**No. 336. CIVIL DEFENSE—FEDERAL FUNDS OBLIGATED, BY PROGRAM, AND STATE AND CITY EXPENDITURES: 1952 TO 1961**

*[In thousands of dollars. Federal funds are obligated from a specified appropriation, not necessarily in a given fiscal year. Federal funds are made available to help the State and local governments acquire civil defense supplies, equipment, facilities, and training, and for personnel and administrative expenses. Federal contributions were made on the basis of applications submitted by the States and approved by the Office of Civil and Defense Mobilization (now the Office of Civil Defense). States and outlying areas are required to match Federal funds on an equal basis, except that for 1952 to 1957, the matching ratio for Alaska was 70 percent Federal and 30 percent local.]*

<sup>1</sup> Union forces only. Estimates of the number serving in the Confederate forces range from 400,000 to 1,500,000.

<sup>2</sup> Covers period Dec. 1, 1941, to Dec. 31, 1946.

<sup>3</sup> Covers period June 25, 1950, to July 27, 1953.

<sup>4</sup> Covers period Apr. 21 to Aug. 13, 1898.

<sup>5</sup> Includes Air service.

<sup>6</sup> Includes Army Air Corps.

<sup>7</sup> Not available.

<sup>8</sup> Based on Army and Marines only.

<sup>9</sup> Excludes Navy. See footnote 10.

<sup>10</sup> Covers period July 1950 through January 1955. Represents Far East area only.

<sup>11</sup> During hostilities only.

<sup>12</sup> Covers war personnel who departed from continental U.S. through December 1898.

<sup>13</sup> For periods covered, see footnotes 2, 3, 4, and 10.

<sup>14</sup> Includes gassed in action; Army data include casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920. Marine data represent casualties in Europe only.

<sup>15</sup> Excludes personnel lost in sinking of the *Maine*, which occurred 2 months before hostilities.

<sup>16</sup> Includes casualties incurred in October 1941, due to hostile action.

<sup>17</sup> Covers only Army personnel base of 1,908,800.

<sup>18</sup> Covers only Army personnel base of 246,410.

<sup>19</sup> Covers only Army personnel base of 3,665,600.

<sup>20</sup> Covers all services base of 9,370,986.

<sup>21</sup> Covers all services base of 4,428,939.

Administratively disqualified.....	75	1.2	8	1.6	4	2.5	3	1.1	6	1.1

<sup>1</sup> 1950 figures for July through December only. 1950-1961 adjusted for examinees disqualified prior to January 1952 for failing mental test only, but later reexamined and found acceptable under modified mental test procedures.

<sup>2</sup> As of August 1958, includes medically and administratively qualified registrants who failed mental test as well as medically and administratively qualified registrants in Mental Group IV who failed the Army Classification Battery (ACB). The latter registrants are referred to as "Trainability Limited (V-O)" group; 36,000 registrants were so classified in 1961.

# No. 349. PERCENT DISTRIBUTION OF SELECTIVE SERVICE REGISTRANTS FOUND ACCEPTABLE, BY MENTAL GROUP: 1955 TO 1961

[Includes Alaska, Hawaii, and outlying areas]

MENTAL GROUP AND PERCENTILE SCORE	1955	1956	1957	1958	1959	1960	1961
Group I (93-100).....	11.3	12.3	13.3	14.6	16.5	14.3	10.3
Group II (65-92).....	26.9	27.0	25.9	27.2	28.4	31.9	32.2
Group III (31-64).....	31.6	32.6	32.8	33.8	34.7	34.5	34.5
Group IV (10-30).....	28.6	27.5	27.7	24.2	20.1	19.0	22.5
Administrative acceptees <sup>2</sup> .....	1.6	0.6	0.3	0.2	0.3	0.3	0.5

<sup>1</sup> Beginning August 1958, includes only those registrants within Mental Group IV who subsequently passed the Army Classification Battery (ACB). (See footnote 2, table 348.)

<sup>2</sup> Refers to registrants who failed the mental test or the ACB but who were administratively declared acceptable either on the basis of their education or the findings of a personal interview.

<sup>1</sup> Under amendments of June 19, 1951, to Universal Military Training and Service Act, age of military liability was extended to 35 years for certain specified kinds of registrants.

<sup>2</sup> Legally exempted registrants; no longer liable for service because of age. See also footnote 1.

<sup>3</sup> Cumulative since inception of Universal Military Training and Service Act, as amended, September 1948.

<sup>4</sup> Includes enlistments and deferments between time of preinduction examination and notice of induction.

<sup>5</sup> Cumulative net credits resulting from inductions plus home address reports minus separation reports, as reported by the Armed Forces September 1948 through June 1961. Each State is credited with its inductions as well as its enlistments and reserves called to active duty. Because of time lag in reporting to local boards, credits given are not necessarily in complete accord with present strength of Armed Forces contributed by each State.

<sup>6</sup> Comprises trained reservists who are not in either the ready or the retired reserve, but who are liable for recall to active duty in time of war or national emergency.

Other wars and Regular Establishment <sup>5</sup> .....	143	135	128	128	132	138	130	144

<sup>1</sup> Excludes persons who served in the Armed Forces only in peacetime (Regular Establishment) unless they were receiving Veterans Administration compensation for service-connected disability. A small but unknown number of persons with service in two or more periods prior to the Korean conflict are included more than once. Veterans with service both in World War II and the Korean conflict are counted only once.

<sup>2</sup> Estimated cumulative returns to civil life since June 27, 1950, of all persons who served in the Armed Forces of the United States between that date and January 31, 1955 (including persons who had also served in World War II), less estimated deaths out of service and less estimated returns to active duty from civil life.

<sup>3</sup> Estimated cumulative returns to civil life since September 16, 1940, of all persons who served in the Armed Forces of the United States between that date and July 25, 1947 (including persons who also served in the Korean conflict), less estimated deaths out of service and less estimated returns to active duty from civil life.

<sup>4</sup> Estimated by application of appropriate survival rates to the 1918 age distribution of World War I participants.

<sup>5</sup> Includes veterans of Civil War, Indian Wars, Spanish-American War. Only former members of Regular Establishment (peacetime service only) who are receiving Veterans Administration compensation for service-connected disability are included. Spanish-American War totals estimated by application of appropriate survival rates to the 1902 age distribution of living Spanish-American War participants.

<sup>1</sup> Excludes transfers from appropriations to insurance trust funds from which the actual payments are made. Expenditures from VA Revolving Supply Fund also excluded to avoid duplication.

<sup>2</sup> Includes direct payments to beneficiaries from insurance appropriations, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Some noncash transactions, e.g., interest credited to dividends left on deposit also included.

<sup>3</sup> Includes education and training allowances under Public Laws 346 and 550, and war orphans educational assistance under Public Law 634.

<sup>4</sup> Includes subsistence allowances, tuition, supplies, and equipment of veterans training under Public Laws 16 and 894, and vocational rehabilitation allowances for World War I veterans.

<sup>5</sup> Total differs from supporting detail by the net of overpayments collected and written off as uncollectable under the readjustment benefits appropriation amounting to \$1,140,000 in 1956, \$647,000 in 1957, \$280,000 in 1958, \$54,000 in 1959, \$198,000 in 1960, and \$321,000 in 1961.

<sup>6</sup> Includes cumulative adjustment for prior years of \$295,650, 997.

<sup>7</sup> Less than \$500,000.

<sup>8</sup> Credit.

<sup>9</sup> Credit of less than \$500,000.

<sup>10</sup> Includes statutory burial allowances; automobiles and other conveyances for disabled veterans; homes for paraplegics; payments to participants in yellow fever experiments; military and naval family allowances of World War I veterans; marine and seamen's insurance in World War I; adjusted compensation (World War I bonus); withdrawals of the personal funds of patients held by VA as banker and funds due incompetent beneficiaries; soldiers' and sailors' civil relief; vocational rehabilitation revolving fund, and other miscellaneous expenditures.

<sup>11</sup> Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

<sup>12</sup> Comprises construction and related costs which include expenditures from funds allotted under NRA of 1933, PWA Act of 1938, grants to Republic of Philippines for construction and equipping of a hospital, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

<sup>13</sup> Includes expenses for vocational counseling, travel for certain programs, reporting allowances paid schools for certifying attendance of veteran trainees, private laws for relief, and all administrative salaries and expenses.

# No. 360. U.S. GOVERNMENT LIFE INSURANCE AND NATIONAL SERVICE LIFE INSURANCE POLICIES IN FORCE, BY PLAN: 1961

[Money figures in thousands of dollars. As of June 30. Includes data for all veterans, regardless of place of residence. Veterans Administration operates two insurance programs: (a) U.S. Government life insurance for veterans of World War I; and (b) national service life insurance for veterans of World War II and later. These two programs are segregated and administered separately in all particulars. See also *Historical Statistics, Colonial Times to 1957*, series Y 851-852]

Paid-up insurance.....	3,260	7,916	2,926	4,948	5	7	7	9	5	3

<sup>1</sup> Fund is administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from the fund for death claims, dividends, and other benefits. Government, however, bears cost of administration of this fund in addition to expenses for certain types of losses.

<sup>2</sup> Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between October 8, 1940, and September 2, 1945.

<sup>3</sup> For veterans discharged on or after April 25, 1951, with service-connected disability which would be compensable if 10 percent or more in degree, but who are otherwise insurable.

<sup>4</sup> Veterans who are entitled to indemnity protection under the Servicemen's Indemnity Act of 1951 and who were separated from active service without a service-connected disability after Apr. 25, 1951, and before Jan. 1, 1957, were granted nonparticipating NSLI on the 5-year renewable nonconvertible term plan without medical examination. Effective Jan. 1, 1959, this insurance was made convertible to any one of the 6 permanent plans (ordinary life, 20-payment life, 30-payment life, 20-year endowment, endowment at age 60, and endowment at age 65) or exchangeable to 5-year limited convertible term. This latter plan is not renewable after age 50.

FIG. XIV. SOCIAL WELFARE EXPENDITURES UNDER SELECTED PUBLIC PROGRAMS: 1935 TO 1960  
[See table 366]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data from Department of Health, Education, and Welfare, Social Security Administration.

## Section 10

### Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, and disability insurance, public and railroad employee retirement, unemployment and temporary disability insurance, aid to the needy, and maternal, child, and other welfare services. Also included here are selected data concerning private pension plans and financial data relating to corporate pension funds, the American Red Cross, the Community Chest, and philanthropic trusts and foundations.

There are several principal sources for these data. *Social Security Bulletin*, a monthly publication of the Department of Health, Education, and Welfare, presents current data on many of the programs and summarizes annual data in a statistical supplement published each year. A large volume of statistics flows from employers' wage reports submitted under the Social Security Act and used in accounting operations of the Bureau of Old-Age and Survivors Insurance. Detailed information on workers and beneficiaries and on establishments, employment, and payrolls covered by this Act is published in the Social Security Administration's *Handbook of Old-Age and Survivors Insurance Statistics*. Establishment data showing employment and payrolls, by industry, for counties, are also available in the cooperative report of the Bureau of the Census and the Social Security Administration, *County Business Patterns*. Current data on employment security activities are published monthly in the Department of Labor's *Labor Market and Employment Security* and its supplements. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *Monthly Review and Annual Report*.

**Social insurance under the Social Security Act.**—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment. Under old-age, survivors, and disability insurance, protection against wage loss due to old age, disability, or death is available to nearly all the gainfully employed (excluding chiefly self-employed doctors of medicine and most civilian employees of the Federal Government).

Old-age, survivors, and disability insurance provides monthly retirement benefits to fully insured workers at age 65 or over (or at age 62 if they elect to receive a reduced benefit) and supplementary benefits to their wives, if they are aged or have a child of the earner in their care, to aged dependent husbands, and to dependent children under age 18, or older if the child has a disability that began before 18. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers. Monthly disability benefits are payable to fully insured workers (from July 1957 to October 1960, only those aged 50 to 64) with a prolonged disability that meets the definition in the Act, and to the dependents of these workers, on the same basis as dependents of retired workers. A lump-sum death payment is made in the case of all insured deaths.

Covered workers and their employers each pay contributions of 3½ percent on the worker's wages, not counting amounts above the first \$4,800 in a year. The rate is scheduled to rise by steps until it reaches 4½ percent each in 1969. Self-employed persons pay 1.5 times the employee rate. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid. One-fourth of 1 percent of the contributions collected from employees and from employers and ¾ of 1 percent of the

contributions from the self-employed are allocated to a separate disability trust fund, from which benefits to disabled workers and their dependents are paid.

Both unemployment insurance and the public employment (placement) service are administered through the Bureau of Employment Security of the Department of Labor and a State employment security agency in each State. Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees.

State unemployment insurance laws pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 20 to 39 weeks among the States; maximum weekly benefits without dependents' allowances range from \$30 to \$55 under the several State laws. In 12 States maximum allowances ranging from \$3 to \$25 for dependents raise the range of maximum augmented benefits to \$30 to \$70. In Puerto Rico, benefits are payable for a maximum of 12 weeks; the maximum weekly benefit is \$16.

Under the Federal Unemployment Tax Act, a 3.1-percent tax is levied on the payroll of employers of 4 or more workers in industries covered by the Act, although smaller employers are also covered by some State laws. Wages paid during 1962 and 1963 are taxed at 3.5 percent to provide Federal funds for benefits paid under the Temporary Extended Unemployment Compensation Act of 1961. Principal industries excluded from coverage are agriculture, State and local government, domestic service, nonprofit organizations, and railroads (see below). Employers subject to the Federal law are allowed a credit of 2.7 percent of taxable payrolls for contributions paid to State agencies under State unemployment insurance laws. The Federal Government, in 1962 and 1963, collects 0.8 percent, which is earmarked for employment security purposes. The Congress appropriates funds each year to cover administrative costs.

The standard rate of contributions payable by employers in most States is 2.7 percent of the first \$3,000 a year paid to an employee. Exceptions are Alaska (2.9 percent), New Jersey (2.8), North Dakota (4.2), Pennsylvania (4.0) and South Dakota (3.6). In Delaware, Hawaii, Massachusetts, Nevada, Oregon, Rhode Island, and West Virginia the rate applies to the first \$3,600; in California to the first \$3,800; and in Alaska to the first \$7,200. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

**Social insurance for railroad workers.**—The social insurance programs administered by the Railroad Retirement Board under the Railroad Retirement Act and Railroad Unemployment Insurance Act cover employees of railroads or companies and organizations affiliated with railroad transportation, including the Railway Express Agency and the Pullman Company.

The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. Credits of employees who die or retire with less than 10 years railroad service are transferred to the Social Security Administration for payment of old-age, survivors, and disability insurance benefits under the Social Security Act. Funds for the railroad retirement and survivor benefit system come primarily from a tax on earnings up to \$400 a month under the Railroad Retirement Tax Act. The tax, divided equally between employer and employee, is 14½ percent for 1962 to 1964; it will rise thereafter by the number of percentage points that old-age, survivors, and disability insurance tax rates (for employers and employees combined) exceed 5½ percent.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness, including maternity. The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for 1962 and 1963 (1961 Temporary Railroad Unemployment Insurance Benefits Act) is 4 percent (applicable to earnings not in excess of \$400 a month).

**Social insurance for Federal Government employees.**—One contributory retirement system for Federal civilian employees and two noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed services (supplementing old-age, survivors, and disability insurance under which they are covered on a contributory basis) and for special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the U.S. Government and in the District of Columbia government if not subject to another retirement system or excluded by statute or by administrative order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate is 6½ percent, computed on base pay. Employing agencies pay into the Retirement Fund amounts equal to employee contributions.

**Workmen's compensation.**—All States have programs providing protection against work-connected injuries and deaths. Federal workmen's compensation laws cover Federal Government employees, private employees in the District of Columbia, and longshoremen and harbor workers. Most State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-fourth of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

**Public assistance.**—Public assistance is provided through six programs, all administered by the States and localities. Payments to four groups of needy persons—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The States may also receive grants for medical assistance to the aged who are not recipients of old-age assistance, and who cannot take care of their medical bills themselves. The Federal aspects of these programs are the responsibility of the Bureau of Family Services of the Social Security Administration. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any Social Security Act program a State must have a plan approved as meeting the requirements of the Act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

**Health and welfare services.**—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, and control of specific diseases). The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs; the others are administered by the Office of Vocational Rehabilitation and the Public Health Service; all are units of the Department of Health, Education, and Welfare.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series H 1-45") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

## No. 366. SOCIAL WELFARE EXPENDITURES UNDER PUBLIC PROGRAMS: 1935 TO 1960

[In millions of dollars. For Federal Government, most States, and some localities, years ending June 30; for other States and localities, various 12-month periods ending within year. All programs except workmen's compensation include some payments and expenditures for Alaska, Hawaii, and outlying areas. Beginning 1960, all programs include data for Alaska and Hawaii. Represents expenditures under public law and from trust accounts. Includes administrative expenditures and capital outlay for hospitals, public elementary and secondary schools, and publicly controlled higher education. See also *Historical Statistics, Colonial Times to 1957*, series II 1-45, for data covering civilian programs only. Corrected to November 1961]

<sup>1</sup> Although total social welfare and social insurance expenditures include non-Federal workmen's compensation benefits payable under law by employers and private insurance carriers, such expenditures and that part of temporary disability insurance payments made through private carriers have been omitted in computing percentages relating to all government expenditures.

<sup>2</sup> Includes hospital construction and medical research; excludes health and medical expenditures under veterans programs, public education, public aid, workmen's compensation, and vocational rehabilitation (such expenditures have been included in the total expenditures for these programs), and medical expenditures provided subordinate to the performance of other functions.

<sup>3</sup> Represents vocational rehabilitation, child welfare services, school lunch program, and institutional care.

<sup>4</sup> Excludes Federal bonus payments, appropriations to Government life insurance trust fund, and accounts of several small revolving funds. State and local data represent State expenditures for bonus and other payments and services for veterans; local data not available.

<sup>1</sup> Excludes refunds of contributions to those leaving service. Federal expenditures include retirement pay of military personnel.

<sup>2</sup> Includes unemployment compensation for Federal employees, for ex-servicemen (under Act of 1944), and for veterans (under Act of 1952).

<sup>3</sup> Programs operate in 4 States only.

<sup>4</sup> Payments by private insurance carriers, State funds, and self-insurers.

<sup>5</sup> Old-age assistance; aid to dependent children, the blind, and the permanently and totally disabled; and, from State and local funds, general assistance.

<sup>6</sup> Emergency aid programs and value of surplus food distributed to needy families.

<sup>7</sup> Excludes expenditures for: Domiciliary care in institutions other than mental or tuberculosis; health and medical service included in other programs; international health activities; and medical programs of Federal agencies.

<sup>8</sup> Includes expenditures for medical equipment and supplies for civil defense, and administrative costs, but not expenditures for water supply and sanitation services.

<sup>9</sup> Expenditures for homes for dependent or neglected children and for adults other than veterans; and value of surplus food for nonprofit institutions.

<sup>10</sup> Cash apportionment, and value of commodities purchased and distributed under National School Lunch Act and other agricultural programs.

<sup>11</sup> Includes payments for foster care and professional and facilitating services; excludes expenditures of public institutions and day-care centers, capital expenditures by courts and youth authorities, payments from parents and relatives, and direct appropriations by legislatures to voluntary agencies and institutions.

<sup>12</sup> Federal expenditures exclude bonus payments and expenditures from veterans' life insurance trust funds; State and local expenditures refer to State bonds and other payments and services.

<sup>13</sup> Includes burial awards and subsistence payments to disabled veterans undergoing training.

<sup>14</sup> Includes vocational rehabilitation, specially adapted homes and automobiles for disabled veterans, counseling, beneficiaries' travel, loan guarantees, and domiciliary care.

Veterans' unemployment allowances <sup>14</sup> .....		32	72	2		60	93	158

<sup>1</sup> For old-age, survivors, and disability insurance and the railroad retirement program, average monthly number; public employee retirement systems and the veterans' programs, number on rolls June 30; State unemployment and temporary disability insurance and veterans' unemployment allowances, average weekly number; railroad unemployment and temporary disability insurance, average number during 14-day registration period.

<sup>2</sup> Includes benefits to dependents (spouses and children) where applicable.

<sup>3</sup> Excludes refunds of contributions to employees who leave service.

<sup>4</sup> Retirement data include a significant amount and number of disability payments for 1940 and a small but unknown amount and number of disability and survivor payments for 1950.

<sup>5</sup> Retirement data are for veterans of the Civil War, Indian Wars, Spanish-American War, Boxer Rebellion, and Philippine Insurrection; except for 1940, include all service pensions. Disability data represent pensions and compensation, and subsistence payments to disabled veterans undergoing training. Lump sums are for burial of deceased veterans.

<sup>6</sup> Excludes payments for medical care.

<sup>7</sup> Payable in Calif., N.J., N.Y., and R.I. Includes maternity data for R.I. and private-plan beneficiaries in Calif. and N.Y.; data for beneficiaries in N.J. not available.

<sup>8</sup> Includes maternity data.

<sup>9</sup> For Federal programs under the Uniformed Services Contingency Option Act of 1953 and for State and local government retirement systems, number represents families.

<sup>10</sup> Small but unknown amount of lump-sum death payments included with monthly survivor payments.

<sup>11</sup> Not available.

<sup>12</sup> For beneficiaries, less than 500; for benefits, less than \$500,000.

<sup>13</sup> Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1958 and payments under the temporary extended unemployment insurance programs.

<sup>14</sup> Under the Servicemen's Readjustment Act of 1944 (terminated July 1949), and the Veterans' Readjustment Assistance Act of 1952 (terminated January 1960). Amount (but not number) includes self-employment allowances—for 1950, \$1,000,000 to 1,600 veterans (average monthly number); and a negligible amount thereafter.

Workmen's compensation programs <sup>7</sup> .....	72.1	70.2	80.3	82.0	79.9

<sup>1</sup> Data from Department of Commerce, Office of Business Economics. Total earnings include earnings of self-employed; "all wages and salaries" represent disbursements for civilian and military pay in cash and in kind.

<sup>2</sup> Beginning 1955, adjusted for duplication of payrolls covered by both old-age, survivors, and disability insurance and State and local retirement systems. <sup>3</sup> Taxable plus estimated nontaxable wages and salaries.

<sup>4</sup> Taxable wages plus estimated nontaxable wages and salaries. Beginning 1950, also represents coverage for railroad temporary disability insurance.

<sup>5</sup> Excludes voluntary contributions and service credits.

<sup>6</sup> Taxable plus estimated nontaxable wages and salaries; beginning 1955, includes pay of Federal civilian personnel.

<sup>7</sup> Payrolls of employers insuring with private carriers, State funds, or self-insured, and pay covered by Federal programs in all areas.

<sup>8</sup> Represents percent of all wages and salaries to reflect inclusion of Armed Forces pay.

<b>Public assistance</b> <sup>3</sup> .....	2,400	2,420	2,400	20.8	15.3	14.0
No money income or income solely from other sources.....	3,400	830	1,390	29.4	5.2	8.1
<b>Income from more than one of specified sources</b> .....	420	3,550	3,070	3.6	22.4	23.2
Employment and social insurance or assistance.....	270	2,820	3,190	2.3	17.8	18.6
Social insurance and public assistance.....	150	730	780	1.3	4.6	4.6

<sup>1</sup> Total population 65 and over is less than sum of the first 4 major classifications by the number in the fifth: persons with more than 1 major source of income were counted under each appropriate classification and then classified separately.

<sup>2</sup> Persons with income from more than one program counted only once. In addition, unemployment insurance, workmen's compensation, and temporary disability insurance provided income for an unknown number; overlap with other programs cannot be estimated. Includes the estimated number of male beneficiaries' wives not in direct receipt of benefits.

<sup>3</sup> Old-age assistance recipients and persons aged 65 and over receiving aid to the blind and aid to the permanently and totally disabled. Includes a small number of persons receiving vendor payments for medical care but no direct cash payment.

# No. 376. OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE—LABOR FORCE, BY EMPLOYMENT AND COVERAGE STATUS: 1950 TO 1960

[In millions. As of December. Prior to 1960, excludes Alaska and Hawaii. Represents persons aged 14 and over in the civilian labor force, and all members of the Armed Forces. Based on survey week data from the Current Population Survey of the Bureau of the Census; see Technical Note, p. 213. See also *Historical Statistics, Colonial Times to 1967*, series H 46-50, for civilians only]

EMPLOYMENT AND COVERAGE STATUS	1950	1954	1955	1959	1960
Labor force, total	64.8	66.8	69.5	71.8	73.1
Unemployed	2.2	2.8	2.4	3.6	4.5
Employed	62.6	64.0	67.1	68.2	68.6
Covered by insurance <sup>1</sup>	40.3	49.8	56.0	58.3	58.4
Covered under 1939 act	36.5	36.3	38.7	39.6	39.3
Additional coverage under subsequent amendments	3.8	13.4	17.2	18.7	19.0
Railroad retirement	1.5	1.2	1.3	0.9	0.9
Other than railroad	2.3	12.2	16.0	17.8	18.2
Not covered by insurance	22.3	14.2	11.2	9.9	10.2
Federal, State, and local governments	5.9	5.5	5.4	4.5	4.7
Agriculture	5.3	4.3	1.3	1.0	1.0
Wage and salary workers	1.3	0.8	0.1	0.3	0.3
Self-employed	3.9	3.5	1.2	0.7	0.7
Domestic service	2.1	0.9	0.9	0.9	0.9
Unpaid family workers	1.3	1.2	1.4	1.3	1.4
Agricultural	0.9	0.6	0.9	0.7	0.8
Nonagricultural	0.4	0.5	0.5	0.6	0.6
Other <sup>2</sup>	7.7	2.4	2.2	2.1	2.2

<sup>1</sup> Includes persons in railroad employment jointly covered by railroad retirement and old-age, survivors, and disability insurance programs (shown separately below). Excludes employees of State and local governments and nonprofit organizations and ministers who have not elected coverage under voluntary coverage provisions (about 2.3 million in December 1960). Ministers classified as employees in labor force statistics are here classified as self-employed, since they are so treated for purposes of old-age, survivors, and disability insurance coverage.

<sup>2</sup> Beginning 1954, includes noncovered workers in the following partially covered industries: Nonagricultural self-employment; educational institutions and agencies; medical and health services; religious, charitable, and membership organizations; and forestry and fisheries. For 1960, includes in addition to the above groups, non-covered workers in banks and trust companies.

Source: Department of Health, Education, and Welfare, Social Security Administration; *Social Security Bulletin*, annual statistical supplement.

# No. 377. OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE—ACCOUNTS ESTABLISHED, AND WORKERS AND EARNINGS UNDER COVERED EMPLOYMENT: 1937 TO 1961

[Includes Alaska and Hawaii and, beginning 1955, Puerto Rico and Virgin Islands. After 1950, estimates of employment and earnings include self-employment on an annual but not quarterly basis; beginning 1958, they are preliminary. Excludes joint coverage under the railroad retirement and old-age, survivors, and disability insurance programs. See also *Historical Statistics, Colonial Times to 1967*, series H 118-120. Corrected to December 1961]

YEAR OR QUARTER	Social security accounts established <sup>1</sup>	COVERED EMPLOYMENT				
		Workers during period <sup>2</sup>	All earnings <sup>3</sup>		Taxable earnings <sup>4</sup>

July-September <sup>7</sup>	1,115	57,000	60,000	1,040	45,800	850
October-December <sup>7</sup>	597	57,000	61,000	1,070	33,400	680
1961:						
January-March <sup>7</sup>	653	55,000	57,000	1,040	50,000	1,020

<sup>1</sup> As of Oct. 27, 1961, 138.0 million account numbers had been issued under the social security system and 2.8 million under the railroad retirement system.

<sup>2</sup> Includes workers with earnings in excess of annual taxable limit. See footnote 4.

<sup>3</sup> Includes earnings in excess of annual taxable limit. See footnote 4.

<sup>4</sup> Excludes earnings in excess of taxable limit. Annual limit on taxable earnings was \$3,000 through 1950; \$4,200 for 1955-1958; and \$4,800 beginning 1959.

<sup>5</sup> A worker is not reported for a quarter if he has attained the annual taxable limit in an earlier quarter.

<sup>7</sup> Includes 17,202,000 accounts established in 1936. <sup>7</sup> Quarterly covered employment excludes agricultural labor.

<sup>1</sup> January 1937-June 1940, equals appropriations transferred; July 1940-December 1950, taxes collected; beginning January 1951, amounts appropriated. Beginning May 1951, includes State deposits under voluntary coverage agreements. For 1947-51, includes appropriations to cover benefits payable to certain veterans' survivors. Beginning 1952 for old-age and survivors and 1959 for disability insurance trust funds, includes deductions for refunds of employee tax overpayment.

<sup>2</sup> Includes interest and profit on investment, and following interfund interest transfers: (1) Under financial interchange, to old-age and survivors fund from railroad retirement account, 1954-1957; to railroad retirement account from old-age and survivors fund, 1958 to date; to disability fund from railroad retirement account, July 1959 and June 1960; and to railroad retirement account from disability fund, June 1961; and (2) on reimbursed administrative expenses, to old-age and survivors fund from disability fund, 1958 to date.

<sup>3</sup> Beginning November 1951, adjusted for reimbursements to trust fund of small amounts for services sold. Beginning October 1953, includes expenses for central office building construction. Since January 1957 inception of disability fund, most administrative expenses paid initially from old-age and survivors fund, with subsequent reimbursement (plus interest) from disability fund for allocated cost of disability insurance operations. Treasury Department expenses reimbursed from appropriate fund.

<sup>4</sup> The purpose of the financial interchange is to place the trust funds in the position they would have been had railroad employment always been covered under old-age, survivors, and disability insurance system. Negative figures indicate payments from the trust funds to the railroad retirement account.

<sup>5</sup> Book value; includes net unamortized premium and discount, accrued interest purchased, and repayments on account of interest accrued on bonds at time of purchase.

<sup>6</sup> 1937-1939, includes transactions of predecessor fund, the old-age reserve account.

### No. 385. PRIVATE PENSION AND DEFERRED PROFIT-SHARING PLANS—ESTIMATED COVERAGE, CONTRIBUTIONS, RESERVES, BENEFICIARIES, AND BENEFIT PAYMENTS: 1940 to 1960

[Excludes Alaska and Hawaii. Includes pay-as-you-go, multiemployer, and union-administered plans, and those of nonprofit organizations and railroad plans supplementing the Federal railroad retirement program. Plans are classified as insured and noninsured, the former underwritten by insurance companies and the latter generally funded through trustees. See also *Historical Statistics, Colonial Times to 1967*, series X 483-500]

1959.....	80,930	23,749	476,539	92,723	723,148	143,734	95,431	4,220	7,323	8,788	3,722
1960.....	65,432	26,237	514,918	101,940	791,953	152,739	114,224	3,957	7,760	9,051	3,572
1961.....	71,610	27,639	559,120	112,060	882,796	130,579	103,680	4,180	8,660	9,452	3,581

<sup>1</sup> Through June 30, 1940, data relate entirely to employees retired under various age and length-of-service requirements and to employees with at least 5 years service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, certain employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 162,597 in 1961. Beginning Jan. 24, 1942, employees with at least 5 years service who separate prior to eligibility for retirement may obtain deferred annuity at age 62. Prior to 1953, excludes annuities purchased by voluntary contributions.

<sup>2</sup> Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

<sup>3</sup> Refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or who, if eligible, elected to take a refund.

<sup>4</sup> Refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died in service or after separation.

<sup>5</sup> Refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

<sup>1</sup> Application submitted for unemployment when worker applies for unemployment benefits for first time with respect to benefit year, for sickness at the beginning of each spell of sickness. Beginning with 1950, data include some applications submitted in June with respect to following year.

<sup>2</sup> Per 2-week claim period.

<sup>3</sup> Adjusted for settlement of underpayments and recovery of overpayments.

<sup>4</sup> Not reported on comparable basis.

<sup>5</sup> Excludes retroactive payments made under 1959 amendments and (for unemployment) extended benefits.

<sup>6</sup> Not available.

<sup>7</sup> All data except applications received and accounts exhausted include temporary extended benefits.

<sup>8</sup> Includes regular and temporary extended benefits; average for normal benefits was \$79.61.

<sup>1</sup> Data represent unduplicated counts. Excludes temporary unemployment programs in 1958, 1959, and 1961; see table 395.

<sup>2</sup> Adjusted for voided benefit checks and transfers under interstate combined wage plan. For 1958, State amounts include \$81.5 million spent under State programs for temporarily extended duration of benefit payments; for 1959, \$54.3 million; for 1960, \$15.3 million; for 1961, \$24.0 million.

<sup>3</sup> Prior to 1959, excludes Alaska and Hawaii.

<sup>4</sup> Insured unemployment as a percent of average covered employment during a 12-month period.

<sup>5</sup> Includes the Federal employee program for January 1958-June 1959.

<sup>6</sup> Represents number of first payments during year.

<sup>7</sup> Number of weeks compensated divided by first payments.

<sup>8</sup> For total unemployment.

<sup>9</sup> Represents average employment on payroll ending nearest the 15th of the month.

<sup>10</sup> Not available.

<sup>11</sup> Wages subject to unemployment insurance tax. For 1950-1957, private industry coverage only; beginning 1958, also includes State and local government coverage.

<sup>12</sup> Includes contributions, penalties, and interest from employers; also employee contributions in States which tax workers.

<sup>13</sup> Represents number of first payments during year. Prior to 1959, includes data for employees filing for unemployment compensation to supplement benefits under other programs; beginning July 1959, excludes first payments filed jointly with State unemployment insurance programs.

<sup>14</sup> Program terminated Jan. 31, 1960.

<sup>15</sup> Cumulative from beginning of program, Oct. 15, 1952.

<sup>16</sup> The program for ex-servicemen (UCX), established under title XV of the Social Security Act, became effective Oct. 27, 1958.

<sup>1</sup> Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown were in effect as of December 1960.

<sup>2</sup> Average of 12 monthly figures, each of which is total number of workers in covered employment in pay periods ending nearest 15th of month. <sup>3</sup> Total wages in covered employment for all pay periods ending in year.

<sup>4</sup> Wages subject to unemployment insurance tax. Includes State and local government coverage as well as private industry coverage; see text, p. 272.

<sup>5</sup> Includes 23,783 employees and \$142,704,000 wages, not reported by States and not shown for Puerto Rico and Virgin Islands. <sup>6</sup> And wages over \$100 in any quarter.

<sup>7</sup> Or 4 in 8 weeks and payroll over \$6,000 in any quarter. <sup>8</sup> And wages of \$150 in any quarter.

<sup>9</sup> Or 25 in 1 week. <sup>10</sup> Or 4 in 3 quarters of preceding year, and \$50 per quarter for each worker.

<sup>11</sup> Employers of fewer than 4 and outside corporate limits of a city, village, or borough of 10,000 inhabitants or more not liable for contributions unless subject to Federal Unemployment Tax Act.

<sup>12</sup> Or wages over \$500 in a calendar year. <sup>13</sup> Or wages of \$10,000 in any quarter.

<sup>14</sup> And wages of \$225 in any quarter. <sup>15</sup> And wages of \$450 in any quarter, or 2 in 13 weeks.

<sup>16</sup> And wages of \$300 in any quarter. <sup>17</sup> Or annual payroll of \$24,000 in current or preceding year not counting more than \$3,000 wages per employee in applying the test of \$24,000 in year. <sup>18</sup> And wages of \$140 in any quarter.

<sup>19</sup> Or wages of \$6,000 in any year or wages of \$10,000 in any quarter not counting more than \$1,000 wages per employee in applying the test of \$10,000 per quarter. <sup>20</sup> And wages of \$500 in any year.

<sup>1</sup> Comprises insured unemployment under State, UCX, UCFE, and railroad program; latter program included in total but not distributed by State.

<sup>2</sup> Represents number of first payments during year; Wisconsin figure, first payments on a "per employer" basis.

<sup>3</sup> Adjusted for voided benefit checks and transfers under interstate combined wage plan.

<sup>4</sup> For total unemployment.

<sup>5</sup> Excludes data on ex-servicemen filing for unemployment compensation payments to supplement benefits under State and/or UCFE programs.

<sup>6</sup> Excludes data on Federal employees filing for unemployment compensation payments to supplement benefits under State programs. <sup>7</sup> Less than 500. <sup>8</sup> Not applicable.

## No. 399. WORKMEN'S COMPENSATION PAYMENTS, BY STATES: 1940 TO 1960

[In thousands of dollars. Estimated by Social Security Administration. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator (Insurance by States, of Casualty Lines)*), net disbursements of State funds (from *Spectator* and State reports; estimated for some States), and self-insurance payments (estimated from available State data). Calendar-year data, except fiscal-year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Base Compensation Act for States in which such payments are made]

<sup>1</sup> Program initiated November 1960 under the Social Security Act Amendment of 1960.

<sup>2</sup> Includes children and 1 parent or other adult in families in which adult was considered in determining amount of assistance.

<sup>3</sup> Includes 3,655 recipients under 65 in Colorado.

<sup>4</sup> Includes 314 recipients of payments made without Federal participation in California, 729 in Missouri, and 12,040 in Pennsylvania.

<sup>5</sup> Partly estimated; total not as large as sum of State figures because of adjustment. See footnote 8.

<sup>6</sup> Estimated.

<sup>7</sup> Not available.

<sup>8</sup> Includes unknown number of cases receiving medical care, hospitalization, or burial only.

Source: Department of Health, Education, and Welfare, Social Security Administration; data appear periodically in *Social Security Bulletin*.

## No. 407. ORPHANS, BY TYPE, 1920 TO 1961, AND BY AGE, 1961

[In thousands. Beginning 1960, includes Alaska, Hawaii, Puerto Rico, and Virgin Islands. Orphans refer to children under age 18 who have been orphaned at any time; full orphan refers to loss of both parents, paternal orphan to loss of father, maternal orphan to loss of mother. Age on last birthday. Data not exactly comparable for all years because of changes in methodology]

DATE AND ITEM		All orphans	Paternal orphans only	Maternal orphans only	Full orphans
1920:	Number	6,400	3,350	2,300	760
	Percent of child population	16.3	8.5	5.9	1.9
1930:	Number	5,050	2,700	1,000	450
	Percent of child population	11.7	6.3	4.4	1.1
1940:	Number	3,840	2,180	1,370	290
	Percent of child population	9.5	5.4	3.4	0.7
1949 (Oct.):	Number	2,930	1,890	960	80
	Percent of child population	6.1	3.9	2.0	0.2
1960 (Jan.):	Number	2,955	2,055	840	60
	Percent of child population	4.5	3.1	1.3	0.1
1961 (Jan.):	Number	2,880	2,010	815	55
	Percent of child population	4.4	3.1	1.2	0.1
	Distribution by age:				(1)
	0 to 4 years	210	155	55	5
	5 to 9 years	610	430	175	20
	10 to 14 years	1,195	760	320	30
	15 to 17 years	955	660	265	30

<sup>1</sup> Less than 500.

<sup>1</sup> Population under 21 years of age, April 1, 1960, Bureau of the Census.

<sup>2</sup> When two or more reporting agencies serve the same child, only one reports giving primary service; the others report supplementary service. Ordinarily the agency reporting primary service has direct contact with the child and assumes major or continuing casework responsibility.

## No. 417. FOUNDATIONS—PERIOD OF ESTABLISHMENT, BY LATEST ASSET CLASSES

[Includes Alaska, Hawaii, and Virgin Islands. A foundation may be defined as a nongovernmental, nonprofit organization having a principal fund of its own, managed by its own trustees or directors, and established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, which are captive trusts, within colleges, churches, or other organizations, or are small—defined as having neither assets of \$50,000 nor making grants of at least \$10,000 in the latest year of record]

DECADE ESTABLISHED	Total foundations	Percent	LATEST ASSET CLASSES					
			\$10,000,000 or more		\$1,000,000 to \$9,999,999		Less than \$1,000,000	
			Number	Percent	Number	Percent	Number	Percent

## Section 11

### Income, Expenditures, and Wealth

This section presents statistics relating to two different aspects of income and expenditures: One aspect is the entire complex of the Nation's economic activities and the interaction of its major components (the national income and product system and the flow-of-funds system); and the other, the distribution of families and individuals by income size-classes or type of expenditure. Statistics on national wealth are also included.

The primary source for national income and product information is *Survey of Current Business*, published monthly by the Department of Commerce, Office of Business Economics. Each July issue of the *Survey* is identified as the *National Income Number* and contains the most recent and detailed statistics on this subject. *National Income, 1954*, is the basic reference source for concepts and methodology which are still applicable, and for numerous statistics for the 1929-1945 period. A more recent supplement, *U.S. Income and Output*, contains a complete set of revised statistics for the 1946-1957 period and introduces a number of new statistical series.

A further development of the general body of national income data appears in a *Survey* supplement, *Income Distribution in the United States, 1944-50*, which presents personal income data classified by income size-groups. More recent data are presented in the *Survey of Current Business* for March 1955, June 1956, and the April issues of 1958 and following years.

The primary source for flow-of-funds data is the Board of Governors of the Federal Reserve System; the *Federal Reserve Bulletin* from time to time presents summarized versions of these data. Detailed historical data appear in *Flow of Funds in the United States, 1939-53*.

A primary source for annual data on distribution of income by size-class is the Bureau of the Census, *Current Population Reports—Consumer Income*, Series P-60. A brief discussion of the Current Population Survey which is the basis for the data in the above report appears in the Technical Note on page 213 and also on page 1. Data on the distribution of income in 1959 were also collected in the 1960 Census of Population. Another primary source for information in this field is the national Survey of Consumer Finances conducted annually since 1946 by the Survey Research Center of The University of Michigan. From 1946 through 1960, this survey consisted of a sample of approximately 2,700 family units or 3,000 spending units located in 66 sampling areas; in 1961, it consisted of approximately 1,850 family units or 2,000 spending units. From 1946 to 1959 these surveys were conducted for the Board of Governors of the Federal Reserve System. Beginning in 1960, they have been conducted with private business and foundation funds. The results are published in a monograph series, *Survey of Consumer Finances*.

**National income and product.**—A general view of the economy is provided by the summary of the Nation's income, expenditure, and saving shown in the form of a balancing set of accounts for the major economic categories—consumers, business, and government. (See table 421.) These statistics, assembled by the Council of Economic Advisers, are a part of the "national income and product" accounts of the Department of Commerce. An explanation of the items included in this summation may be found in the 1960 *Historical and Descriptive Supplement to Economic Indicators*, 86th Congress, 2d Session.

**Gross national product.**—Gross national product (called GNP) represents the total national output of goods and services at market prices. It measures this output in terms of the expenditures by which the goods and services are acquired. The expenditures comprise purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included in GNP are, for the most part, those actually bought for final use (excluding illegal transactions) in the markets. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP, the total national output, also measures the product attributable to the factors of production—labor and property—supplied by residents of the United States (conterminous area). GNP differs from “national income,” described below, mainly in that GNP includes allowances for depreciation and similar capital consumption and for indirect taxes (such as sales and excise taxes).

**National income.**—National income is the aggregate of earnings by labor and property from the Nation's current production of goods and services. It is the sum represented by compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of taxes on those earnings.

**Personal income.**—Personal income is the current income received by individuals, by unincorporated businesses, and by nonprofit institutions (including pension, trust, and welfare funds) from all sources. It includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes and the value of food consumed on farms.

Disposable personal income is equal to personal income less taxes on individuals (including income, property, and other taxes not deductible as business expense), and other general Government revenues (e. g., fines, penalties, etc.) received from individuals as individuals.

**Flow-of-funds accounts and saving and investment estimates.**—Another general view of the economy is provided by the flow-of-funds accounts. This system of national accounts presents a record designed to picture the flow of funds through the major sectors of the national economy, the structure of the economy's saving and investment, by sector and by form of investment, and the relation between saving and the structure of financial flows. The transactions covered include transactions in financial instruments, existing assets, transfers of various kinds, and transactions involving currently produced goods and services. A similar presentation of the accounts in amounts outstanding for the financial categories gives the structure of financial assets and liabilities and a summary of the principal assets and liabilities by sector and by type of financial instrument. Quarterly flow data are available currently in the *Federal Reserve Bulletin*.

**Distribution of income by size-class.**—Money income statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is “personal income.”

A size distribution of family "personal income" (less amounts received by institutional residents or retained by private trust, pension, health, and welfare funds) is prepared by the Office of Business Economics based on data from consolidated Federal individual income tax returns and the sample data from the surveys mentioned above. These are described in *Income Distribution in the United States, 1944-1950*, mentioned above. Detailed statistics, including information on Federal individual income tax liabilities, are available in the *Survey of Current Business* for March 1955, June 1956, and the April issues of 1958 and following years.

**Individuals' savings.**—The Securities and Exchange Commission issues detailed estimates of individuals' savings showing the increase in financial assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. A continuous series starting with 1942 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 438.) A reconciliation of the annual SEC estimates with the Department of Commerce estimates of personal savings appears in the Office of Business Economics publication, *U. S. Income and Output*, for the years 1946 to 1958, and *National Income, 1954 Edition*, for prior years back to 1933. The Federal Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 604.) The Survey Research Center of The University of Michigan also collects annual data (except for 1961) covering the distribution of liquid assets and occasional data covering positive, negative, and net savings of families, by income groups.

**National wealth.**—The national wealth data shown here (tables 457 and 458) represent the most recent attempt to derive a consistent and comprehensive series in this field. They were compiled by Raymond W. Goldsmith. As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth of wealth over long periods. Careful examination of the methods and sources of the estimates, as they are described in *A Study of Saving in the United States* and in *The National Wealth of the United States in the Postwar Period*, is therefore advisable before use is made of the figures.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series F 87-103") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

# No. 420. GROSS NATIONAL PRODUCT AND NATIONAL INCOME—SUMMARY: 1929 TO 1961

[In millions of dollars. Beginning 1960, includes Alaska and Hawaii. For definitions of gross national product and national income, see text, p. 310]

### No. 423. GROSS NATIONAL PRODUCT OR EXPENDITURE IN CURRENT AND CONSTANT (1954) DOLLARS: 1950 TO 1961

[In billions of dollars. Beginning 1960, includes Alaska and Hawaii. Constant dollar figures obtained by dividing current-dollar estimates, in as fine a product classification as possible, by appropriate price indexes based on 1954 as 100, in order to eliminate from the current dollar estimates all price changes as compared with 1954. For definition of gross national product, see text, p. 310. See also *Historical Statistics, Colonial Times to 1957*, series F 67-103]

## No. 428. NATIONAL INCOME, BY INDUSTRIAL ORIGIN: 1950 TO 1961

(In millions of dollars. Beginning 1960, includes Alaska and Hawaii. National income (for definition, see text, p. 310) originating in each industry is the sum of factor costs incurred by the industry in production. Hence, it is net value added to production by industry, measured at factor costs. See also *Historical Statistics, Colonial Times to 1957*, series F 22-23)

INDUSTRIAL DIVISION	1950	1955	1956	1957	1958	1959	1960	1961 (prel.)
All industries.....	241,876	330,206	350,836	366,943	367,384	399,551	417,054	430,200

								180,670	183,650

<sup>1</sup> Dollar estimates in current prices divided by the implicit deflator for the personal consumption expenditures component of gross national product on a 1961 base.

<sup>2</sup> These estimates represent an approximate conversion of the Department of Commerce series in 1954 prices. This was done by major components, using the implicit price deflators converted to a 1961 base.

<sup>3</sup> Total expenditures in 1961 prices divided by population.

<sup>4</sup> Population as of July 1; includes Armed Forces abroad.

1 Comprises agricultural and similar service establishments, forestry, fisheries, and rest of world.

2 Comprises employer contributions to private pension, health, and welfare funds; compensation for injuries; pay of military reservists; directors' fees; and several other minor items.

3 Net income of farm proprietors, farm wages, and farm "other" labor income, less personal contributions under the old-age, survivors, and disability insurance program.

## No. 424. SUMMARY OF FLOW OF FUNDS/SAVINGS ACCOUNTS: 1961

[Flows in billions of dollars. Preliminary. Includes Alaska and Hawaii. Financial uses of funds ("U") represent net acquisitions of assets; financial sources of funds ("S"), net changes in liabilities. Differences in total uses and sources of funds for transaction categories result from valuation, timing, and classification differences, and from statistical discrepancies. For explanation of general concepts, see text, p. 310. For description of sectors and types of transactions, see *Federal Reserve Bulletin*, August 1959. "N.e.c." means not elsewhere classified]

TRANSACTION CATEGORY	Nat'l sav- ing and invest- ment	All sectors		Con- sumer and non- profit sectors		NONFINANCIAL BUSINESS SECTORS				GOVERNMENT SECTORS				FINANCIAL SECTORS				Rest-of- world sector							
		U		S		Farm		Noncor- porate		Corpo- rate		Federal		State and local		Com- mer- cial banking				Savings institu- tions		Insur- ance		Finance, n.e.c.

## NO. 437. COMPONENTS OF PERSONAL SAVING: 1946 to 1960

[In billions of dollars. Beginning 1960, includes Alaska and Hawaii. The OBE and SEC personal savings tables (437 and 438) differ in (a) the definition of savings, (b) statistical methodologies of measuring savings, and (c) the treatment of uninsured pension funds. For example, conceptually, SEC gross savings includes, and OBE personal savings excludes, consumer durable goods and Government insurance funds. See also *Historical Statistics, Colonial Times to 1967*, series F 263 and F 262-303]

PERSONAL SAVING	ANNUAL AVERAGE		1956	1957	1958	1959	1960

<sup>1</sup> Includes accidental damage to fixed property.

<sup>2</sup> Includes depreciation on farm property owned by nonfarm landlords and accidental damage to fixed property.

<sup>3</sup> Excludes changes in Government insurance and pension reserves amounting to \$3.57 billion in 1958; \$3.19 billion in 1957; \$0.59 billion in 1958; \$2.27 billion in 1959; and \$3.33 billion in 1960; and small amounts in Armed Forces leave bonds. (Both these items are ascribed to the Government sector in the national income accounts.)

<sup>4</sup> Includes changes in assets of noncorporate enterprises of the types specified.

<sup>5</sup> Includes shares and deposits in credit unions and the Postal Saving System.

<sup>6</sup> Includes increase in redemption value of outstanding bonds.

<sup>1</sup> Less than \$50,000,000.<sup>2</sup> Includes shares in savings and loan associations and shares and deposits in credit unions.<sup>3</sup> Includes nonguaranteed Federal agency securities.<sup>4</sup> Includes Social Security funds, State and local retirement systems, etc.<sup>5</sup> Mortgage debt to institutions on 1- to 4-family nonfarm dwellings.<sup>6</sup> Consumer debt owed to corporations, largely attributable to purchases of automobiles and other durable consumer goods, although including some debt arising from purchases of consumption goods. Policy loans on Government and private life insurance have been deducted from these items of saving.<sup>7</sup> Change in bank loans made for the purpose of purchasing or carrying securities.<sup>8</sup> Construction of 1- to 4-family nonfarm dwellings less net acquisitions of properties by nonindividuals.Source: Securities and Exchange Commission; data are published quarterly in *Volume and Composition of Individuals' Saving*, and in the *Statistical Bulletin*.

## No. 439. PERCENT DISTRIBUTION OF SPENDING UNITS, 1945 TO 1960, AND SHARE OF LIQUID ASSETS, 1946 TO 1960, BY INCOME GROUPS

[Excludes Alaska and Hawaii. Liquid asset holdings as of January 1, 1952, and at time of interviews in January, February, and early March of other years. Money income groupings for calendar year preceding time of interview. For definition of spending unit, see headnote, table 442. See text, p. 309]

MONEY INCOME BEFORE TAXES	SPENDING UNITS						SHARE OF TOTAL LIQUID ASSETS <sup>1</sup>					
	1945	1951	1955	1958	1959	1960	1946	1952	1955	1958	1959	1960
All income groups.....	100	100	100	100	100	100	100	100	100	100	100	100
Under \$1,000.....	20	13	11	7	7	6	7	7	4	3	3	3
\$1,000 to \$1,999.....	27	15	12	13	12	11	14	8	7	7	6	6
\$2,000 to \$2,999.....	23	18	13	12	10	10	17	10	9	10	7	6
\$3,000 to \$3,999.....	15	18	14	12	11	10	16	14	12	8	7	6
\$4,000 to \$4,999.....	7	15	14	12	12	11	10	11	11	10	7	9
\$5,000 to \$7,499.....	5	14	22	24	26	28	13	18	20	22	20	23
\$7,500 and over.....	3	7	14	20	22	24	23	32	37	40	60	47

<sup>1</sup> Liquid assets represent U. S. savings bonds, checking accounts, savings accounts in banks, and shares in savings and loan associations and credit unions; currency is excluded. Data prior to 1959 include postal savings accounts, which were held by less than 2 percent of all spending units early in 1958. Data prior to 1957 also include marketable U. S. Government bonds, which were held by about 1 percent of all spending units early in 1957.Source: The University of Michigan, Survey Research Center; *Survey of Consumer Finances*. Prior to 1960, sponsored by Board of Governors of Federal Reserve System and published periodically in *Federal Reserve Bulletin*.

## No. 440. FINANCIAL ASSETS AND LIABILITIES OF INDIVIDUALS: 1950 TO 1961

[In billions of dollars. As of end of year. Includes Alaska and Hawaii]

ASSETS AND LIABILITIES	1950	1955	1956	1957	1958	1959	1960	1961

# No. 455. MEAN AND MEDIAN INCOMES OF SPENDING UNITS, BY OCCUPATIONAL GROUPS: 1947 TO 1960

[In dollars. Excludes Alaska and Hawaii. See text, p. 309. For definition of spending unit, see headnote, table 442. Mean income is the average obtained by dividing aggregate money income before taxes by number of spending units. Median income is that of middle spending unit when units are ranked by size of money income before taxes. Figures beginning 1954 are high relative to prior years owing largely to a change in 1954 questionnaire that improved the reporting of income]

<sup>1</sup> Not available.

<sup>2</sup> Changes in 1954 questionnaire resulted in overestimates of farm and nonfarm business incomes relative to earlier years. The effect is thought to have been much greater on the mean than on the median.

<sup>1</sup> Estimates obtained by multiplying the constant dollar figures shown in table 458 by the appropriate price index for current year. See also footnote 1 in that table.

<sup>2</sup> 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator applied in transforming original cost data into current values but also because of minor changes in sources of data and methods of estimation used.

<sup>3</sup> Estimates are based on book values.

<sup>4</sup> Estimates for farm land are based on Census or similar data. For other private land, estimates are derived by application of rough ratios of land to structure values for different types of real estate. Excludes subsoil assets.

<sup>1</sup> Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (1) Reducing each year's gross capital expenditures in current prices to 1929 (or 1947-49) price level by means of appropriate construction cost or wholesale price indices; (2) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1929 (or 1947-49) prices; (3) cumulating net capital expenditures for as many years backwards as corresponds to the assumed length of life of the type of asset involved.

<sup>2</sup> 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator used but also because of minor changes in sources of data and methods of estimation used.

<sup>3</sup> Estimates reflect book values reduced by means of wholesale price indices.

## Section 12

### Prices

This section presents indexes of wholesale, retail, and consumer prices, as well as prices for selected commodities. The primary sources of these data are publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review*; *Handbook of Labor Statistics*; *Consumer Price Index* (monthly); *Retail Food Prices by Cities* (monthly); *Retail Prices and Indexes of Fuels and Electricity* (monthly); *Wholesale (Primary Market) Price Index* (monthly); and *Wholesale Prices and Price Indexes* (annual). The Statistical Reporting Service of the Department of Agriculture prepares indexes of prices received and prices paid by farmers (see text, p. 606).

The Bureau of Labor Statistics prepares weekly and monthly indexes of wholesale prices; a daily index of spot market prices of 22 commodities; and indexes of consumer prices for urban wage-earner and clerical-worker families for 46 cities, and individually for 20 large cities, as well as component indexes for food and other groups.

**Wholesale price index.**—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of commodities sold in primary markets in the United States.

The index has undergone 4 major revisions (see *Monthly Labor Review*, March 1962). It is now based on nearly 2,200 commodity price series instead of the nearly 1,900 included in the 1947-60 period and the 900 included prior to 1947. Prices used in constructing the index are collected directly from sellers, if possible, and apply as nearly as practicable to the first large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price, the importer's selling price, the selling price on an organized exchange or at a central market. Respondents are asked to report prices f.o.b. point of production if possible.

The weights used in the index represent the total net selling value including value of sales for export, f.o.b. production point, less interplant transfers, but plus value of imports for consumption, for the producing and processing sector of the economy. For the 1947-54 period these values were based primarily on dollar value of transactions reported in the 1947 industrial censuses. For 1955-57, weights were computed from values of primary market transactions in 1952 and 1953. For 1958-60, the weights were the net selling value of commodities in 1954. Effective January 1961, the weights are the net selling value of commodities in 1958, as reported in the 1958 Censuses of Manufactures and Minerals Industries, together with data from the Departments of Agriculture and Interior, and other sources. Also included is the value of shipments for Alaska and Hawaii, which were formerly represented by estimates of imports from these 2 States.

Beginning January 1962, the various wholesale price indexes were converted to a new base of 1957-59=100 from the previous base of 1947-49=100. The all-commodities wholesale price index series on both bases has been extended back to 1890. Monthly indexes on both bases are available for most of the major groups of commodities from January 1926. They are available on a 1926=100 base by groups from 1890 and by subgroups beginning 1913.

**Consumer price index.**—This index measures the average change in prices of goods and services purchased by city wage-earner and clerical-worker families. The weights used in calculating the index are based on studies of actual expenditures by families of wage earners and clerical workers. The quantities and qualities of the items in the

"market basket" remain the same between consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living of these families. The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917-19 provided the weights used for 1913 to 1935. Since then, this index has undergone three major revisions, which involved bringing the "market basket" of goods and services up to date and improving the sample and methodology. From 1935 to January 1950, time-to-time changes in retail prices were weighted by 1934-36 average expenditures except for certain temporary wartime adjustments. Weights used from January 1950 to December 1952 represented estimated 1949-50 spending patterns. Beginning January 1953, the weights represent average purchases of urban wage-earner and clerical-worker families in fiscal year 1952, derived from a study of family expenditures in 1950 and estimated changes in income and prices between 1950 and fiscal 1952.

The list of items currently priced for the index includes approximately 300 goods and services. For some items, a number of different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable.

Beginning January 1953, prices are obtained in a sample of 46 cities. Foods, fuels, and a few other items are priced monthly in all cities. Prices of most other goods and services are obtained on a regular rotating cycle—monthly in the 5 largest cities and every 3 months in other cities. Rents are surveyed bimonthly in the 5 largest cities and every 3 months in other cities. Estimates are made for unpriced cities each month. Prior to January 1953, indexes were based on food prices in 56 cities monthly, and prices of other commodities in 34 cities quarterly or monthly.

Price changes for the 46 cities are combined for the United States with weights based on 1950 population of cities represented by each sample city. City indexes are compiled for 20 of the 46 cities.

**Retail food price index.**—Retail food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. In March 1943, the weights for the food index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. In January 1950 and again in January 1953 the weights were revised as described above for the total consumer price index.

The indexes were computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, 50 foods from June 1947 to January 1950, 60 foods from January 1950 to December 1952, and 90 foods beginning January 1953.

**Comparability with other indexes.**—In comparing the movement of the indexes of consumer prices and of the prices paid by farmers for commodities bought for family living (table 874), it should be noted that the consumer price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differ because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States, excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series E 25-26") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

**No. 459. WHOLESALE PRICE INDEXES—ALL COMMODITIES AND ALL COMMODITIES EXCEPT FARM PRODUCTS AND FOODS: 1926 TO 1962**

[Wholesale indexes on the reference base 1947-49=100 are not available after January 1962. As of that month, these indexes were shifted to a new standard base, 1957-59=100. Includes Alaska and Hawaii. See text, p. 341. See also *Historical Statistics, Colonial Times to 1967*, series E 25-26]

# NO. 463. WHOLESALE PRICE INDEXES, BY STAGE OF PROCESSING AND DURABILITY OF PRODUCT: 1950 TO 1961

[1947-48=100. Includes Alaska and Hawaii. These indexes are a regrouping of the regular Wholesale Price Index Series to show price movements at various levels of production and in the various sectors of the economy. The new series comprise three major categories: (a) raw or crude materials; (b) intermediate materials, components, and supplies for further processing; (c) finished goods. Each of these three is further divided in accordance with end-use and durability. See also *Historical Statistics, Colonial Times to 1967*, series E 42-64]

# No. 465. CONSUMER PRICE INDEXES FOR ALL ITEMS AND COMMODITY GROUPS: 1913 TO 1962

[1947-49=100. Excludes Alaska and Hawaii. 1913 to 1952 rebased according to new groupings from adjusted series indexes on 1935-39=100, formerly published. For detailed explanation, see text, p. 341. Includes a correction of new unit bias in the rent index from 1940 to December 1949 and adjusted population and commodity weights beginning with January 1950. These adjustments make a continuous comparable series. See also *Historical Statistics, Colonial Times to 1967*, series E 113-139]

# **No. 468. CONSUMER PRICE INDEXES—RELATIVE IMPORTANCE OF COMMODITY GROUPS AND SERVICES (PERCENT DISTRIBUTION): 1947 TO 1961**

[Excludes Alaska and Hawaii. The relative importance of a component of the Consumer Price Index at any given time represents its expenditure weight multiplied by the relative price change from the weight date to a later period and the result expressed as a percentage of the total for all items. Changes in the relative importance of a component result from (a) major weight revisions based on comprehensive consumer expenditure surveys; (b) minor weight adjustments to take account of changes in the list of items priced; and (c) different rates of price change among the various items. In the absence of a weight revision, if prices of all items changed at the same rate, the relative importance of each item or group in the index would remain unchanged. For further explanation of the index, see text, p. 341]

# Cost of Family Budget

351

## No. 470. ANNUAL BUDGET COSTS—CITY WORKER'S FAMILY AND RETIRED COUPLES, FOR 20 CITIES: 1959

[Based on autumn prices. City worker's family consists of 38-year-old employed husband, wife not employed outside home, 13-year-old boy, and 8-year-old girl, living in a rented dwelling. Retired couple consists of retired husband and wife, 65 years old or over. Budget represents an estimate of total cost of a representative list of goods and services necessary to maintain a "modest but adequate" (not a minimum subsistence) level of living in a large city]

<sup>1</sup> Includes alcoholic beverages. For retired couples, also includes a small allowance for guest meals.

<sup>2</sup> Average contract rent for tenant-occupied dwellings (5 rooms for city worker's family and 2 or 3 rooms for retired couples) that conform to housing standards specified for budget plus cost of required amounts of heating fuel, gas, electricity, water, and specified equipment.

<sup>3</sup> Weighted average costs of automobile owners and nonowners.

<sup>4</sup> Includes allowances for life insurance, occupational expenses, Federal old-age and survivors insurance, and, for California and New York, employee contributions to disability insurance as required by State law.

# No. 471. ANNUAL AVERAGE UNIT VALUES OF SELECTED ARTICLES IMPORTED AND EXPORTED: 1950 to 1961

[In dollars per unit. Includes trade of Alaska, Hawaii, and Puerto Rico with foreign countries. Average values obtained by dividing total value of imports for consumption or domestic exports by total quantity. Values of goods imported represent market values in foreign country from which imported. Values of goods exported represent values at port of exportation. Average values may show actual price movements only roughly for commodities subject to considerable price variations among different grades, methods of packing, etc., and to year-to-year variations in proportions of grades etc. Also average values of agricultural exports include effects of CCC sales for exports, at prices well below U.S. market quotations, and of other Government programs]

## No. 472. AVERAGE RETAIL PRICES OF SELECTED FOODS: 1940 TO 1962

[In cents per pound, except as indicated. Excludes Alaska and Hawaii. Data are averages of prices reported by retail dealers in cities included in the Retail Food Index. (See footnote 3, table 473.) Number of cities also varies slightly according to availability of prices for each item. Sales taxes not included after 1945. Prices for individual cities combined on basis of population weights. See also *Historical Statistics, Colonial Times to 1957*, series E 161-176]

## Section 13

### Elections

This section relates to popular participation in, and results of, Presidential, Congressional, and gubernatorial elections. Also presented are several tables concerning Congressional legislation.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. A detailed presentation of both Federal and State election statistics appears in *America Votes*, issued biennially by the Governmental Affairs Institute. Data on Federal elections also appear in the *Congressional Directory*, United States Congress, and in the official State documents (Registers, Manuals, Reports of the Secretary of State, etc.) of the separate States.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices, and, in most States, for State offices.

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers.

The election of the President of the United States is provided for in the Constitution, article II, section 1, through the establishment of an electoral college in each State, for each Presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States. The 22d Amendment to the Constitution, adopted in 1951, limits Presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years.

The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912, it has remained constant at 435. However, the legislation granting Statehood to Alaska and Hawaii allotted 1 Representative to each of the new States and temporarily (during 1960 to 1962) increased the total of members to 437. The total number reverted to 435 after reapportionment following the 1960 Census. The 14th Amendment to the Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers . . . ." The Constitution also requires that each State have at least 1 Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were

originally chosen by the State legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as “See also *Historical Statistics, Colonial Times to 1957*, series Y 27-31”) provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

<sup>1</sup> Includes votes for minor party candidates, independents, unpledged electors, and scattered write-in votes.

<sup>2</sup> Includes Alaska and Hawaii.

<sup>3</sup> Mainly Progressive in 1912 and 1924, States Rights and Progressive in 1948.

<sup>4</sup> Socialist-Labor only.

<sup>5</sup> Includes 4,831,289 votes cast for La Follette, official candidate for the Progressive Party.

<sup>6</sup> Workers Party.

<sup>7</sup> See also table 439.

<sup>8</sup> Includes minor party votes.

<sup>9</sup> Although the Republican Party received 50.6 percent of the total vote cast, the Democratic Party won a greater number of individual contests for Representatives (221 as against 210 for the Republicans), and thereby retained control of the House of Representatives.

(In some cases, figures have been revised by Governmental Affairs Institute, Washington, D.C.)

# No. 487. APPORTIONMENT OF MEMBERSHIP IN HOUSE OF REPRESENTATIVES, BY STATES: 1790 TO 1960

[Population figures used for apportionment purposes are those determined for States by each decennial census. Until 1940, population for apportionment purposes excluded Indians not taxed and until 1870, excluded two-fifths of slaves. Until 1850, apportionment ratios were chosen arbitrarily; 1850 to 1900, ratios were apportionment ratios shown were computed by dividing fixed number (435) of Representatives into apportionment population but were not used in the original calculations, which were based on priority lists. No reapportionment based on 1920 Population Census. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics, Colonial Times to 1857*, series Y 155-204]

<sup>1</sup> Ratio of apportionment population to Representatives. <sup>2</sup> See headnote.

<sup>3</sup> Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 7.

<sup>4</sup> Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 7.

<sup>5</sup> Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One member assigned to Colorado after apportionment.

<sup>6</sup> Includes one member each assigned to Alaska and Hawaii after apportionment.

<sup>7</sup> Assigned after apportionment. <sup>8</sup> Members seated in 1959.

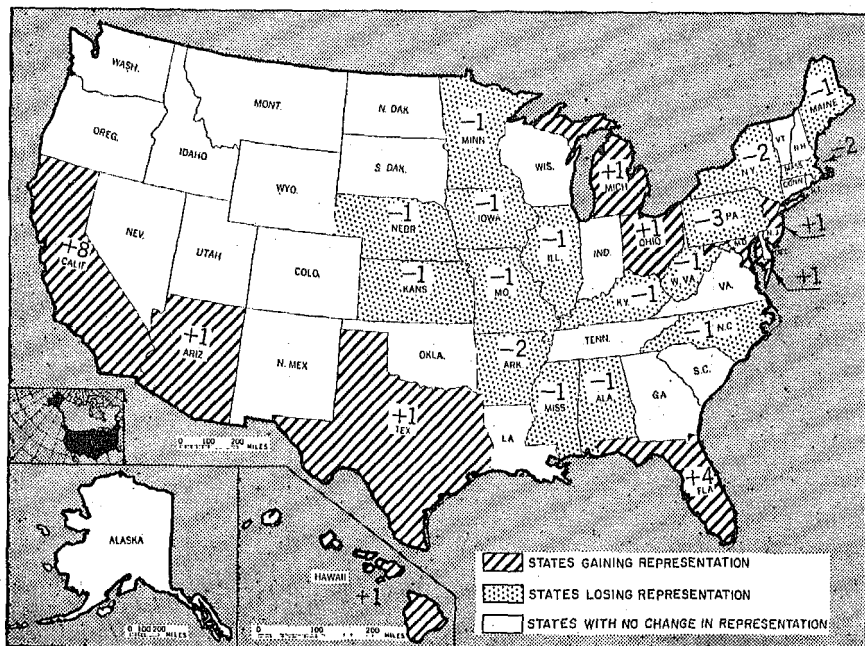

<sup>9</sup> Included in apportionment act in anticipation of Statehood.

<sup>10</sup> Included in the 20 members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

[Vote in thousands. A primary election is one in which the voters of a political party nominate candidates to run for public office in a general election. Because of the overwhelming supremacy of the Democratic Party in the South, votes cast in the primary elections for Senator or Governor are often a better measure of voter participation than those cast in the general elections]

# No. 489. VOTE CAST FOR UNITED STATES REPRESENTATIVES, BY MAJOR POLITICAL PARTIES, BY STATES: 1956, 1958, AND 1960

[In thousands. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Alaska, Delaware, Hawaii, Nevada, Vermont, and Wyoming, only 1 Representative is elected from the State at large. In New Mexico and North Dakota, 2 Representatives are elected from the State at large. In Connecticut, Texas (1956), and Washington (1956), Representatives are elected by district, except 1 who is elected at large; these at-large votes are not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party as such are cast in endorsement of a candidate of another party, the votes are counted as for the endorsing party. See also notes below]

<sup>1</sup> Includes vote cast for minor parties.

<sup>2</sup> Includes Alaska and Hawaii; general election held in Alaska on Nov. 25, 1958, and in Hawaii on July 28, 1959.

<sup>3</sup> Vote for the 6th District only. Arkansas law does not require tabulation of votes for unopposed candidates.

<sup>4</sup> A person may be candidate of one or more parties for same office, so party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party. <sup>5</sup> General election held July 28, 1959.

<sup>6</sup> Voters entitled to vote for any 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party.

<sup>7</sup> Although elected at large, candidates filed for a particular seat. Voters entitled to vote for 1 candidate in each of the 2 contests. Data shown represent contest with the greater total vote cast.

<sup>8</sup> Includes votes cast by minor parties for Democratic-endorsed and Republican-endorsed candidates.

## Section 14

### Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, receipts, expenditures, and debt. The personnel data relate to civil staffing and payrolls for the different public functions and agencies, certain employee characteristics, and civil service status.

Principal sources of the fiscal data are *The Budget of the United States Government* published annually by the Bureau of the Budget and the Treasury Department's annual *Combined Statement of Receipts, Expenditures and Balances*, an abstract of the Treasury books and the official report relating to all of the receipts and the appropriation accounts from which disbursements are made under the appropriations made by the Congress. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields.

The day-to-day cash operations of the Federal Government clearing through the accounts of the Treasurer of the United States are reported in the *Daily Statement of the United States Treasury*. In the issue for the last day of the month the *Statement* contains information as to the public debt receipts and expenditures for the month and the outstanding public debt as of that day.

Receipts and expenditures of the Government classified as to budgetary and non-budgetary transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities, including financial statements of Government corporations and business-type enterprises. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Circulation Statement of United States Money*.

Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and geographic area. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns, respectively; the latter presents income data for sole proprietorships and partnerships along with summary statistics for corporations. Biennial *Statistics of Income* publications present data from fiduciary income tax, estate tax, and gift tax returns.

Federal employment and payroll figures, compiled primarily by the Civil Service Commission, are issued in the Commission's regular *Annual Report* and its *Monthly Report of Federal Employment*. The Commission also publishes annual reports on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service* and on occupations of both white-collar and blue-collar Federal workers. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

**Treasury receipts and expenditures.**—All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States, irrespective of their ultimate disposition or availability for expenditure. The Treasury Department currently uses two bases for the reporting of receipts: (1) Latest available reports of deposits in government depositories in the general account of the Treasurer of the United States; and (2) collections as reported by government collecting agencies.

Receipts on the first basis are presented in the *Daily Statement of the United States Treasury*, the purpose of which is to report receipts as promptly as possible. Receipts on a collection basis (taxes, customs duties, trust receipts, receipts of certain government corporations and public enterprises) and miscellaneous budget receipts which are on the basis of the latest reports of deposits in government depositaries are presented in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The *Monthly Statement* also includes deposits or collections in cash accounts of Government agencies held outside the Treasury as well as those in the general account of the Treasurer of the United States. The final statement issued after the close of the fiscal year is held open until all reports have been received covering deposits or collections for that year.

Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress. The Treasury Department reports Government expenditures on two bases: (1) Checks paid or withdrawals affecting the account of the Treasurer of the United States; and (2) checks issued and cash payments made by disbursing officers. Transactions of the first type are reported in the *Daily Statement* referred to above. Expenditures of the second type are presented in the *Monthly Statement*, mentioned above, and in the annual *Combined Statement of Receipts, Expenditures and Balances*, also cited earlier. These monthly and annual reports include payments from cash accounts of Government agencies held outside the Treasury as well as those from the general account of the Treasurer of the United States.

**Treasury budget and nonbudget accounts.**—All receipts of the Government are recorded by the Treasury in accounts classified generally according to the source and according to whether or not the receipts are earmarked in some degree for expenditure. Disbursements of the Government are similarly classified by accounts reflecting various types of authorizations or conditions under which they may be expended.

Budget accounts include: General fund receipts available for financing the general Government operations to the extent appropriations are made by the Congress (sources of general receipts are income and excise taxes, customs duties, etc.); special fund receipts (earmarked moneys) received subject to special legal authorizations which may be expended only for the particular purpose specified (examples are the Mineral Leasing Act and the National Forest Fund); expenditure (appropriation) accounts which record the amounts authorized by the Congress and expenditures therefrom for the general support of the Government; revolving and management fund accounts which record funds authorized by specific provisions of law to finance without further action by the Congress a continuing cycle of operations, with receipts derived from such operations, and to facilitate accounting for and administration of intragovernmental operations.

Nonbudget accounts include: Trust accounts which record the receipt and expenditure of moneys held in trust by the Government for the benefit of individuals or classes of individuals, such moneys being expended only in accordance with the terms of a trust agreement or statute (examples are Civil Service Retirement Fund, Old-Age and Survivors Insurance Trust Fund, the Highway Trust Fund, etc.); deposit fund accounts which record receipts either held in suspense temporarily and later refunded or transferred to another Government account, or held by the Government as banker or agent and paid out at the owners' direction (example is account for the accumulation of amounts withheld from employees' salaries for bond allotments). Funds in nonbudget accounts have no effect on the budget surplus or deficit.

**Foreign currency operations.**—Transactions relating to foreign currencies acquired by the Government, without the payment of dollars, are not included in reports of dollar appropriations and therefore are reported as a separate and distinct Government activity. Such currencies are primarily generated under the Mutual Security

Acts, as amended, the Agricultural Trade Development and Assistance Act, as amended, Surplus Property and Lend-Lease Acts, etc.

**Public and private debt.**—These data appear annually in the May issue of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the corporate area, those affiliated corporations which operate under a single management. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

**Employment and payrolls.**—Employment and payroll data are collected from all departments and agencies of the Federal Government by the Civil Service Commission. The Commission does not collect personnel statistics from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month. Employment totals exclude persons serving without compensation, persons on leave without pay for scheduled periods longer than 30 days, persons in leave status after reduction-in-force, and persons hired informally "on the spot" without formal appointment procedures to cope with fire, flood, or other extreme emergencies.

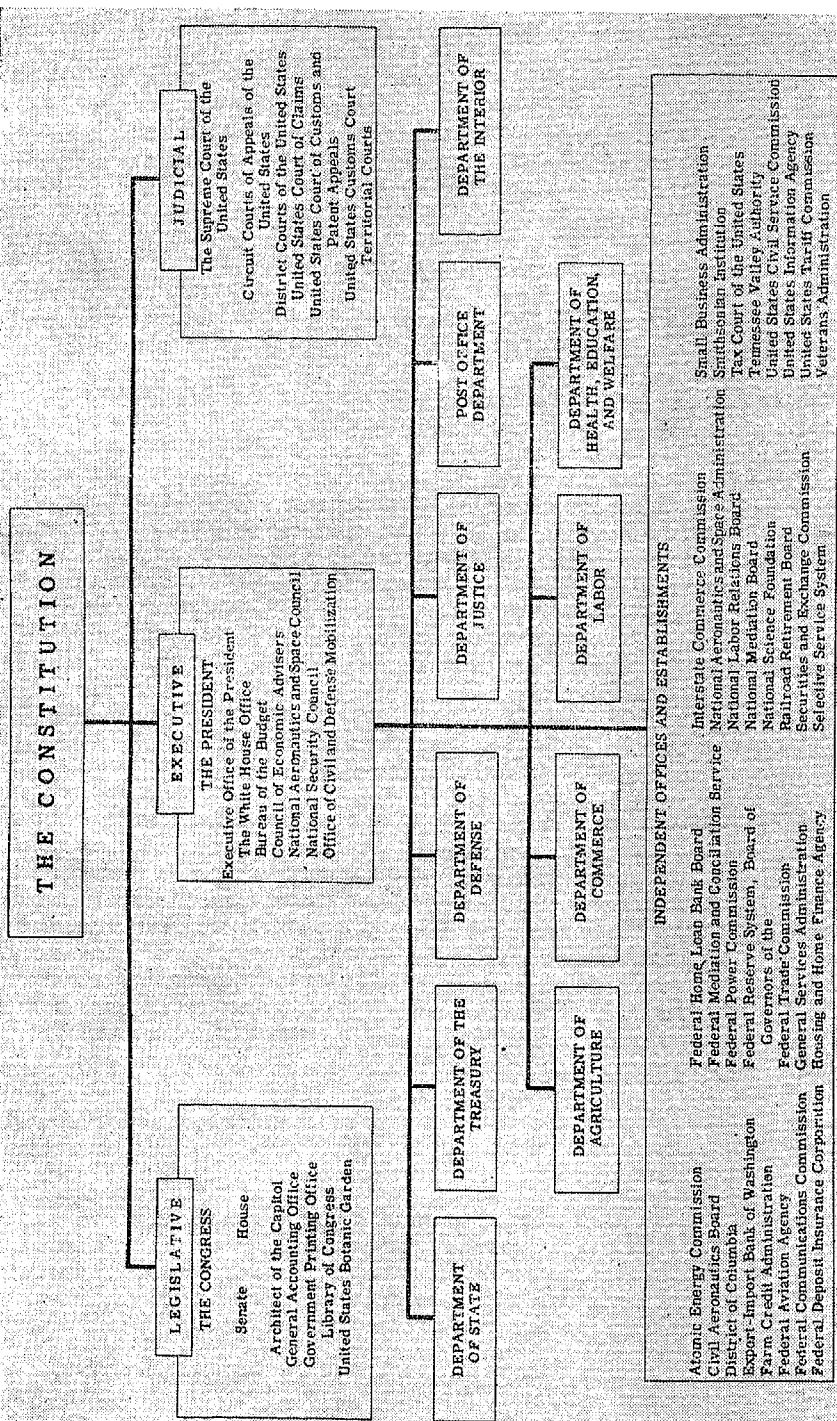

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months. Monthly payroll totals fluctuate in amount because the number of work days in each month varies from 20 to 23 days. Holidays may be disregarded since Federal employees are paid for the eight national holidays on which they do not work.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series Y 254-263") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

<sup>1</sup> Excludes debt retirements, refunds of receipts and capital transfers, and beginning 1951, investments of wholly owned Government corporations in public debt securities.

<sup>2</sup> Beginning 1932, represents total expenditures less interfund transactions.

<sup>3</sup> Represents all expenditures, including those for rivers and harbors, Panama Canal, and, prior to 1949, Air Force.

<sup>4</sup> Includes expenditures for veterans pensions. Beginning 1932, includes net expenditures for wholly owned Govt. corporations; beginning 1952, expenditures of Dept. of Defense not segregated as to respective departments.

<sup>5</sup> Represents gross debt as of end of each period; e.g., 1935, 1940, etc.

<sup>6</sup> For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to \$3,600,000,000) have been consolidated with budget expenditures.

Source of tables 499 and 500: Treasury Department, *Annual Report of the Secretary*; annual and current data published in *Monthly Statement of Receipts and Expenditures of the United States Government*.

### No. 501. FEDERAL GOVERNMENT BUDGET EXPENDITURES, BY ORGANIZATION UNIT: 1955 TO 1962

[In millions of dollars. For years ending June 30. Expenditures reported on a checks-issued basis. "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Excluded from both receipts and expenditures are refunds of receipts, transfers from the general fund to trust funds, interest paid to the U.S. Treasury by revolving funds, transfers of capital between wholly owned Government corporations and the U.S. Treasury, debt transactions of Government enterprises, and certain other interfund payments. Expenditures from public debt authorizations are included as well as net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises. Figures for early years have not been revised to reflect recent changes in organizational structure]

# NO. 503. RECEIPTS FROM AND PAYMENTS TO THE PUBLIC BY THE FEDERAL GOVERNMENT: 1930 TO 1963

[In billions of dollars. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust (including deposit) accounts and Government-sponsored enterprises as reflected on the books of the Treasurer of the United States as well as budget accounts of Federal Government. Net cash borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government-sponsored enterprises, and also excludes certain types of public debt transactions like issuance and redemption of Armed Forces leave bonds. The public is defined to comprise individuals; banks (including Federal Reserve and Postal Savings System); private corporations; businesses; State, local, and foreign governments; and international organizations. For additional explanation, see 1963 Budget, pp. 279-282, and headnote to table 501. See also *Historical Statistics, Colonial Times to 1957*, series Y 380-388]

## No. 507. INTERNAL REVENUE COLLECTIONS, BY PRINCIPAL SOURCES: 1940 TO 1961

[In millions of dollars. For years ending June 30. Includes Alaska and Hawaii, and collections outside U.S.; see table 509. Data prior to 1955 differ from those in table 499 because certain taxes paid currently into Treasury depositories were excluded by Internal Revenue Service until quarterly returns supported by depository receipts reached IRS offices. See also *Historical Statistics, Colonial Times to 1957*, series Y 264-279]

YEAR	Total internal revenue collections	INCOME, PROFITS, AND EMPLOYMENT TAXES <sup>1</sup>			Estate and gift taxes	Alcohol taxes <sup>4</sup>	Tobacco taxes <sup>4</sup>	Manufacturers' excise taxes	All other taxes
		Total	Individual income and employment taxes <sup>2</sup>	Corporation income and profits taxes <sup>3</sup>					
1940.....	5,340	2,963	1,816	1,148	300	624	609	447	337

<sup>1</sup> Beginning 1957, collections are adjusted to exclude amounts transferred to the Government of Guam.

<sup>2</sup> Beginning January 1955, withheld income taxes and social security employment taxes on employees and employers are paid into the Treasury in combined amounts without separation as to type of tax; figures for prior years have been combined accordingly in this table for purposes of comparison.

<sup>3</sup> Includes tax on business income of exempt organizations.

<sup>4</sup> Includes taxes collected in Puerto Rico on tobacco and liquor manufactures coming into the United States.

## No. 508. INTERNAL REVENUE COLLECTIONS, BY DETAILED SOURCES: 1960 AND 1961

<sup>1</sup> Actual tax liability on selected net incomes and necessary assumptions.

<sup>2</sup> Provisions of 1926 Act were retroactive to 1925.

<sup>3</sup> Normal tax rates of 1928 Act were reduced for 1929 only by Joint Resolution of Congress, No. 133, approved in December 1929.

<sup>4</sup> Rates and exemptions for 1936 and 1938 Acts were identical and resulted in the same tax liabilities.

<sup>5</sup> Includes defense tax.

<sup>6</sup> Tax liabilities for 1942 and 1943 unadjusted for transition to current payment basis.

## Individual Income Taxes

<sup>1</sup> Includes net Victory tax. Computed by assuming that deductions are 10 percent of Victory tax net income; i. e., that Victory tax net income is ten-ninths of selected net income.

<sup>2</sup> Individual Income Tax Act of 1944. <sup>3</sup> Taking into account maximum effective rate limitation of 77 percent.

<sup>4</sup> Excludes self-employment tax. <sup>5</sup> Internal Revenue Code of 1954.

<sup>6</sup> Split income basis. <sup>7</sup> Tax liability divided by stated net income.

<sup>1</sup> Net income for 1940.

<sup>2</sup> Income and defense tax before credits for 1940; income tax after credits beginning 1945.

<sup>3</sup> Joint returns counted twice for percent of population filing.

<sup>4</sup> Exemptions 1940: Married \$2,000, single \$800, each dependent \$400. Exemptions 1945: Married \$1,000, single \$500, each dependent \$500. Exemptions 1950 and after: Joint return \$1,200, single \$600, each dependent \$600, additional exemption for taxpayer, and his spouse on joint return, of \$600 if blind and \$600 if age 65 or over.

<sup>5</sup> This is the income tax base for all taxable returns whether or not reported on the return.

<sup>6</sup> Not available.

<sup>7</sup> Beginning 1955, salaries after sick pay exclusion.

<sup>8</sup> Beginning 1955, dividends after exclusions.

<sup>9</sup> For 1950, business profit or loss after net operating loss deduction.

<sup>10</sup> Comprises all income subject to income tax not elsewhere listed and includes wages not subject to income tax withholding, dividends, and interest not exceeding a total of \$100 per return reported on Form W-2 for 1945 and 1950-1957, nor of \$200 for 1958-1959 reported on 1040A returns. However, for 1955-1959, this income has been reduced by net operating loss deduction which is a component of adjusted gross income.

<sup>1</sup> Exemption allowed for income tax purposes; includes the per capita exemption of \$600 for the taxpayer, his spouse on a joint return, and each dependent, together with additional exemptions for taxpayer, and his spouse on a joint return, of \$600 if blind and \$600 if age 65 or over.

<sup>2</sup> This is the income tax base for all taxable returns whether or not reported on the return.

<sup>3</sup> Income tax after credits as percent of taxable income.

## No. 518. CORPORATION INCOME TAX RETURNS—SUMMARY: 1940 TO 1959

[Money figures in millions of dollars. Represents returns covering accounting periods ending between July 1 of year shown and June 30 of following year. Includes Alaska and Hawaii; based on income tax returns as filed, prior to audit adjustments and other changes made after filing. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations, except as noted. Includes data from returns of small business corporations which after September 2, 1958, could elect to be taxed through shareholders. Income tax shown for 1958 and 1959 excludes tax on profits of corporations making this election. See source publications for changes in law affecting comparability of historical data. Beginning 1955, based on a probability sample. Corporate data based on income tax returns appear on pp. 396-398, 492-494, 498, and 854. See also *Historical Statistics, Colonial Times to 1957*, series Y 280-291]

Excess profits net income.....	2,998	14,165	25,654					
Adjusted excess profits net income.....	912	8,368	8,985					

<sup>1</sup> Consists of business receipts, interest less amortizable bond premium, rents, royalties, net gain from capital assets (as defined by law) and other property, dividends, and other taxable income.

<sup>2</sup> Net income (or deficit) is gross taxable income less allowable current year deductions except statutory deductions for dividends and Western Hemisphere trade corporations. Excludes tax-exempt Government interest, which is included in total compiled receipts.

<sup>3</sup> Includes defense tax.

<sup>4</sup> Distributions to stockholders in cash and assets other than own stock exclude \$61 million nondividend distributions of small business corporations taxed through shareholders. Of this amount, \$58 million was reported on returns with net income, \$4 million on returns without net income.

<sup>5</sup> For tax reported, see above.

## No. 519. FIDUCIARY INCOME TAX RETURNS—NUMBER, INCOME, DEFICIT, AND TAX: 1945 TO 1958

[Includes Alaska and Hawaii. Represents income tax returns for trusts and estates. See also headnote, table 511. See also *Historical Statistics, Colonial Times to 1957*, series Y 312-318]

# No. 526. ACTIVE CORPORATION INCOME TAX RETURNS—TOTAL COMPILED RECEIPTS, NET INCOME OR DEFICIT, AND TOTAL TAX, BY INDUSTRIAL DIVISIONS: 1940 to 1959

[Industrial classification of a return is based on the activity accounting for the largest percentage of total corporate receipts. Diversified activities and filing of consolidated returns by some affiliated groups affect data classified by industry. For changes in classification affecting comparability of data, see *Statistics of Income, 1958-59, Corporation Income Tax Returns*, and *Statistics of Income*, Part 2, for 1938 and 1948. See also head-note and footnotes, table 518]

Gift tax.....	104,838	16,328	25,319	25,111	12,979	25,101	.....

<sup>1</sup> A return is required of every citizen or resident who during the calendar year made gifts (or who is considered as having made gifts) to any one donee of more than \$3,000 in value or made gifts of future interests in property regardless of value. A nonresident alien is required to file a return if gifts consist of property situated in the U.S.

<sup>2</sup> By consent of both spouses who are citizens or residents, gifts of husband or wife to third party may be considered as made one-half by each.

<sup>3</sup> Exclusions are the first \$3,000 of gifts (other than gifts of future interests) made to any one donee during calendar year. In case of consent to divide gifts between husband and wife, each spouse is allowed an exclusion against his half of the gift to a common donee.

<sup>4</sup> Deduction allowed citizens or residents for gifts made to the donor's spouse.

<sup>5</sup> The specific exemption of \$30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

## No. 523. FEDERAL ESTATE TAX RETURNS—SUMMARY: 1940 TO 1959

[Includes Alaska and Hawaii. An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Aug. 31, 1935, through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (b) on or after Oct. 22, 1942, value of whose gross estate exceeds \$60,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U.S. at date of death; and (b) on or after Oct. 22, 1942, only if gross estate situated in U.S. at date of death exceeds \$2,000. The estate of an individual who died in the period June 6, 1952, through Aug. 16, 1954, is subject to 2 Federal estate taxes—basic and additional. Basic tax is computed at rates provided by Revenue Act of 1926, and Int. Rev. Code of 1939 as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax. Under the 1954 Code, basic and additional rates were combined into a single tax rate schedule, applying to taxable estate. See also *Historical Statistics, Colonial Times to 1957*, series Y 333-342]

FILING PERIOD <sup>1</sup>	RETURNS FILED		GROSS ESTATE (\$1,000)		NET TAXABLE ESTATE <sup>4</sup> (\$1,000)		TAX <sup>4</sup> (\$1,000)

<sup>1</sup> No data compiled for 1956, 1958, or 1960.

<sup>2</sup> Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

<sup>3</sup> Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

<sup>4</sup> Net taxable estate is net estate for additional tax and regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940, through Sept. 20, 1941.

<sup>1</sup> Includes categories of debt not subject to statutory debt limit. Net Federal debt defined as gross debt outstanding less Federal Government securities held by Federal agencies and trust funds, and Federal agency securities held by U.S. Treasury and other Federal agencies; it thus equals Federal Government and agency debt held by the public.

<sup>2</sup> Includes State loans to local units.

<sup>3</sup> Long-term debt, original maturity of 1 year or more from date of issue; short-term, less than 1 year.

<sup>4</sup> Debt of farmers and farm cooperatives to institutional lenders and Federal Government lending agencies; farmers' financial and consumer debt included under "nonfarm" category.

<sup>5</sup> Comprises debt incurred for commercial (nonfarm), financial, and consumer purposes, including debt owed by farmers for financial and consumer purposes.

### No. 530. CIVILIAN EMPLOYMENT AND PAYROLLS OF THE FEDERAL GOVERNMENT, BY BRANCH: 1930 TO 1962

[Includes data for employees in Alaska, Hawaii, outlying areas of the U.S., and in foreign countries. Monthly employment figures represent number in active-duty status as of last day of month, including intermittent employees who worked during month. Annual employment figures are averages of monthly figures. Payrolls are totals for calendar year or month, as indicated. Excludes employees of Central Intelligence Agency and, beginning August 1959, those of the National Security Agency, for security reasons. Employees of General Accounting Office and Government Printing Office included with legislative branch. See also *Historical Statistics, Colonial Times to 1957*, series Y 241-250, for employment for years ending June 30]

### No. 539. WHITE-COLLAR EMPLOYEES IN THE FEDERAL GOVERNMENT, BY MAJOR OCCUPATIONAL GROUP: 1960

[As of October 31. Covers full-time employees; includes Alaska, Hawaii, outlying areas of the United States, and foreign countries, but excludes foreign nationals overseas. Average grade is median based on employees reported by General Schedule grades; average salary is arithmetic mean based on mean salary for each grade for General Schedule positions and actual salary for those not reported by grades. Employees for whom neither grades nor salaries were reported are included in employment totals but excluded from computation of averages. The General Schedule is a compensation scale for Federal employees set up by the Classification Act of 1949, as amended, which established a system of grades 1 to 18 for grouping of positions, based on relative difficulty of duties and responsibilities.]

## Section 15

### State and Local Government Finances and Employment

Nationwide statistics relating to State and local governments, their numbers, finances, and employment, are compiled primarily by the Bureau of the Census. That Bureau conducts a periodic Census of Governments involving collection of data for all governmental units in the United States. The 1957 Census of Governments is the most recent one for which data are available; results from the 1962 Census will be issued beginning late in 1962. The Bureau of the Census also conducts annual surveys which cover all the State governments and a sample of local governments. Publications issued annually by the Bureau of the Census include a report on governmental finances which presents figures for the Federal Government as well as nationwide totals for States and local governments, by type, and State-local data by States; and series of publications on State finances, city finances, and public employment. A descriptive leaflet, *Bureau of the Census Publications on Governments*, is issued annually.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for some of the largest local governments are compiled from their official records and reports by Census Bureau personnel, and classified into uniform categories for statistical reporting.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections (for example, the sections on Education, Roads and Motor Vehicles, and Social Insurance and Welfare Services).

**Governmental units.**—The governmental structure of the United States includes, in addition to the Federal Government and the States, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of “special districts.” As shown by table 542, more than 100,000 local governments existed at the time of the 1957 Census of Governments. Since then, however, the number of school districts has been reduced considerably, continuing a historical trend. The figures shown for governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—lack this power but are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semiautonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, “dependent” school systems, State institutions of higher education, and certain other “authorities” and special agencies which are under the administrative or fiscal control of an established governmental unit.

**Finances.**—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending on June 30, except for a few States with other closing dates within the calendar year named. Local government figures are for fiscal years ending in the calendar year specified, except for a few units which close their fiscal years in the succeeding January. Most school districts have fiscal years ending on June 30, but a majority of other local governments operate on a fiscal year ending December 31.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly,

financial statistics which appear here for individual States and large cities, although based upon the official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

The framework for these statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved and as to expenditure according to the purpose of the spending.

The general government sector comprises all activities other than those classified as utility or insurance trust in nature. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments, and liquor stores operated by 16 States and by a few local governments. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

Revenue and expenditure reported for each of these sectors and in total, in the basic framework of these statistics, represent only external transactions, and exclude transfers among agencies and funds of the government concerned. Certain internal transactions are shown separately, however, in related tables.

**Employment and payrolls.**—Public employment and payroll data are primarily from Census Bureau reports based on mail canvassing of State and local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series Y 386-391") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

#### No. 541. COUNTY, MUNICIPAL, AND TOWNSHIP GOVERNMENTS, 1957, AND THEIR POPULATION, 1950, BY POPULATION SIZE-GROUP

[Number of governments as of January 1957; population as of April 1950. Excludes Alaska and Hawaii. Township governments include "towns" in the 6 New England States, New York, and Wisconsin.]

<sup>1</sup> Figures for particular types of property are estimates subject to sampling variation. Total includes value of property not subject to classification by type, a relatively insignificant portion for most States.

<sup>2</sup> Simple-sales-based averages, based on a sample survey of "arms-length" transfers involving taxable real properties for which figures could be obtained on assessed values (from local tax records) and on sales price (from the buyer or seller); excludes sales of newly constructed houses.

<sup>3</sup> Excludes Alaska and Hawaii.

Source: Department of Commerce, Bureau of the Census; 1957 Census of Governments, *Taxable Property Values in the United States*.

## NO. 559. SUMMARY OF CITY GOVERNMENT FINANCES: 1954 TO 1960

[In millions of dollars. Beginning 1950, includes Alaska, and 1960, Hawaii. Represents all municipalities (see tables 541 and 542) and their dependent agencies; excludes other local governments overlying city areas. Includes sample-based estimates for cities of less than 25,000 and thus subject to sampling variation]

<sup>1</sup> Federal civilian employment within the U.S. as of September 1961, including employees of the National Guard paid directly from the Federal treasury. Total accordingly differs from Federal employment reported in tables 560 and 561 which pertain to October 1961 and include employees working outside U.S.

<sup>2</sup> Subject to sampling variation.

<sup>3</sup> Based on estimated population as of July 1, 1961.

<sup>4</sup> Data for Federal employees in the District of Columbia are for Washington, D.C., standard metropolitan statistical area, and include substantial numbers of employees working in suburban locations in Maryland and Virginia.

Source: Department of Commerce, Bureau of the Census; annual report, *State Distribution of Public Employment in 1961*.

# No. 564. STATE AND LOCAL GOVERNMENT EMPLOYMENT AND PAYROLLS, BY TYPE OF GOVERNMENT: 1954 TO 1961

[For October, except as noted. Beginning 1959, includes Alaska and Hawaii. For payrolls, see also *Historical Statistics, Colonial Times to 1957*, series Y 223-240]

## Section 16

### Banking and Finance

#### MONEY AND BANKING

**Banking and monetary system.**—Banks in this country are organized under the laws of both the States and the Federal government. "National" banks, organized under Federal law passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established in 1934, insures each deposit account up to \$10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

**Condition of banks.**—The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1863 from these banks and since 1897 has tabulated and published summaries of their reports in detail in the *Abstract of Reports of National Banks* (now usually four times a year). The call report data are also summarized in the annual reports of the Comptroller.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit their statements of condition at the same time and in substantially the same form as national banks. These are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and published in the *Summary Report, Assets and Liabilities of Member Banks* (usually four times a year) and in summary form in the *Federal Reserve Bulletin*.

Beginning with 1947, an all-bank series has been tabulated twice a year by the Federal Deposit Insurance Corporation. A monthly series, based in part on the all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

**Currency.**—Currency, including coin and paper money, represents a relatively small part of the total media of exchange in the United States, as most payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, with the exception of gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which, strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers. Historical data on the stock of money and money in circulation may be found in the *Annual Report of the Secretary of the Treasury*.

**Government credit agencies.**—Government corporations and credit agencies, operating under mandates and powers given them by the Congress, make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions.

Statistics on the assets and liabilities of Government credit agencies are published quarterly in the *Treasury Bulletin*. Statistics relating to the operations of Government credit agencies are also available in reports of the individual agencies.

**Private credit agencies other than banks.**—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by *The Spectator*, which also publishes data on other types of insurance. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare. Consumer credit data are published currently in the *Federal Reserve Bulletin*.

#### SECURITIES MARKETS

**New issues and retirement of securities.**—Statistical information on new security issues has been provided for many years by the *Journal of Commerce* (since 1906) and the *Commercial and Financial Chronicle* (1919–1957). The statistics of the *Commercial and Financial Chronicle* include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and of foreign governments and their subdivisions.

A more comprehensive series of new issues with detailed information on the intended uses of net and gross proceeds has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over \$100,000 and with terms to maturity of more than one year. (See tables 623 and 624.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin*.

**Trading in securities.**—(See tables 612, 614, 616.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

**Security price averages.**—Among the most widely known indexes of security prices are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Indexes of the Standard and Poor's Corporation, available since 1918, are now based on daily closing prices of 500 stocks. (See table 620.) The Securities and Exchange Commission compiles an index of weekly closing prices of 300 stocks listed on the New York Stock Exchange, comprising 32 industry groups. These indexes are published in the Commission's *Statistical Bulletin*, the Council of Economic Advisers' *Economic Indicators*, and the *Federal Reserve Bulletin*.

## INSURANCE

**Insurance statistics.**—The regulation of insurance is in the hands of the various States and the District of Columbia, which collect a great deal of primary information on insurance. The Federal Government does not collect comprehensive statistics on insurance on a national basis. Basic theories and practice are parallel throughout insurance but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

There are a number of published sources for statistics of the various classes of insurance—life, health, fire, marine, and casualty. Individual States collect data on all insurers operating within their respective jurisdictions, and many of the States publish an annual insurance report giving individual company data and aggregates of certain items for the companies operating within the State. Organizations representing certain classes of insurers collect data and publish many studies and reports for these classes. A sourcebook of statistics on life insurance, the *Life Insurance Fact Book*, is published annually by the Institute of Life Insurance. Health insurance data are published by the Health Insurance Council in the annual report, *The Extent of Voluntary Health Insurance in the United States*, and by the Health Insurance Institute in its annual *Source Book of Health Insurance Data*. Another source of insurance statistics is represented by the commercial publishers, such as *The Spectator* and the Alfred M. Best Company. The *Spectator Insurance Year Book*, published annually, contains financial data for individual companies, and the aggregates of each item. The annual *Spectator Health Insurance Index* (formerly *Accident Insurance Register*) contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. *Spectator's* annual publication *Insurance by States of Fire, Marine, Casualty, Surety and Miscellaneous Lines*, gives less detailed data for other classes of insurance. *Best's Life Insurance Reports* and *Best's Insurance Reports*, fire and casualty edition, both annual publications, give individual company data for all types of life and fire and casualty insurance companies.

**Types of insurance.**—Insurance was formerly classified into three categories—life, fire and marine, and casualty. With the introduction of multiple-line underwriting, insuring companies are now classified as either life or property. Companies which underwrite accident and health insurance only are included with life insurance companies; those which underwrite accident and health insurance in addition to one or more property lines are included with property insurance companies. Insuring companies other than those classified as life are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital and/or surplus.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series X 266-274") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XXV. PRINCIPAL ASSETS OF ALL COMMERCIAL BANKS: 1914 TO 1961

[As of end of June 1914 to 1922; end of June and December thereafter. See table 578]

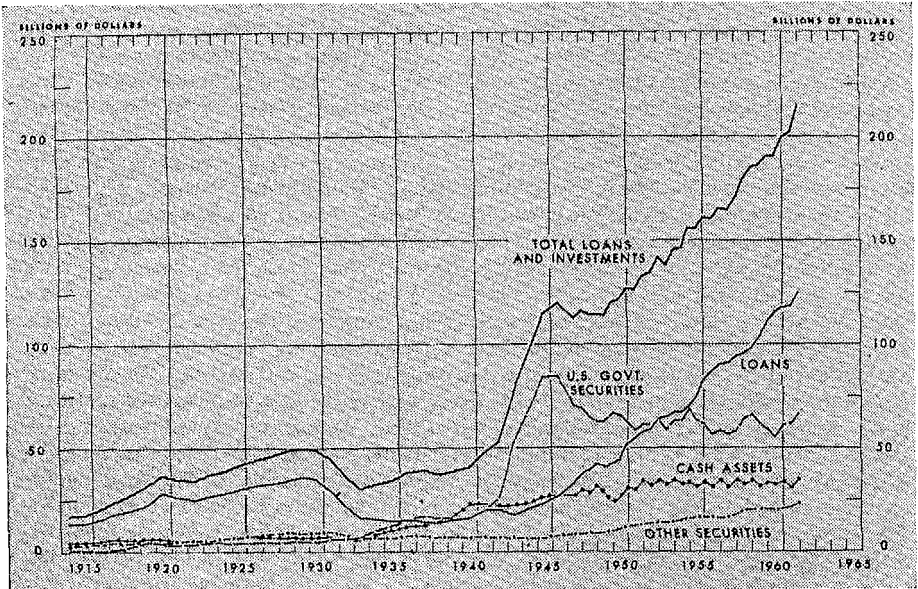

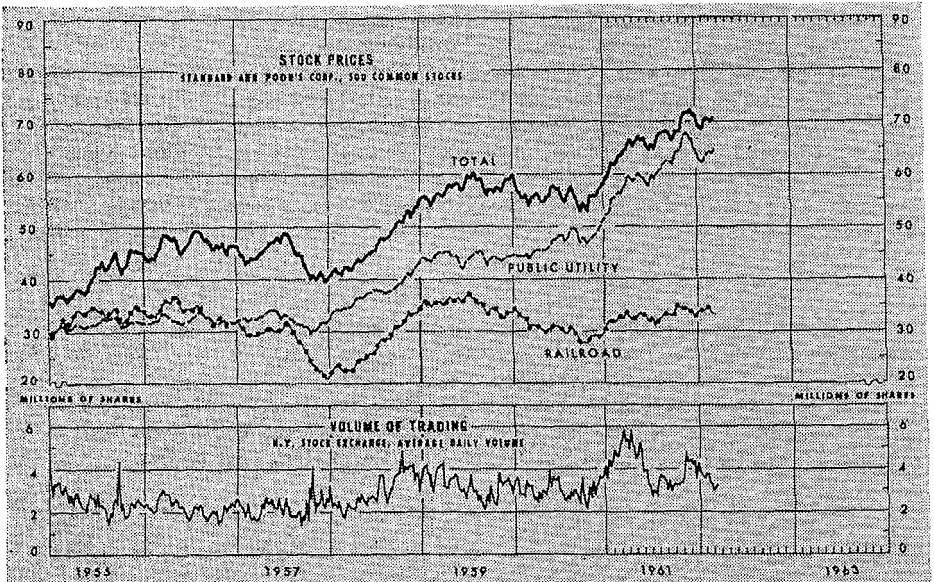

FIG. XXVI. STOCK PRICES: 1955 TO 1962

[1941-43=10. Indexes based on daily closing prices. See table 620]

<sup>1</sup> Beginning May 1961, reclassification of deposits of foreign central banks reduced this item by \$1,900 million (\$1,500 million to time deposits adjusted and \$400 million to demand deposits adjusted).

<sup>2</sup> Deposits other than interbank and U.S. Government, less cash items reported in process of collection.

<sup>3</sup> Excludes interbank time deposits; U.S. Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.

<sup>4</sup> Prior to 1950, includes a relatively small amount of demand deposits. Beginning June 1961, includes amounts now reported by insured mutual savings banks as demand deposits; formerly, before passage of the recent amendment of the F.D.I. Act, reported as time deposits or other liabilities.

# No. 576. ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1945 TO 1960

[Money figures in millions of dollars. As of December 31. Includes banks in Alaska, Hawaii, Puerto Rico, Virgin Islands, Canal Zone, and American Samoa. Figures for mutual savings banks include a few stock savings banks in some years. Statistics for private banks cover only banks under State supervision and those voluntarily reporting. See also *Historical Statistics, Colonial Times to 1957*, series X 20-96, for related but not comparable data]

# NO. 578. ALL BANKS—NUMBER AND PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANK: 1940 TO 1962

[Money figures in millions of dollars. As of December 31, except as indicated. Includes all banks in conterminous U.S. and, beginning 1950, all banks in Alaska (one Federal Reserve System member bank was previously included) and all banks in Hawaii. Banks added in 1959 had total assets of \$900 million on December 31, 1959. All banks comprise all commercial banks and all mutual savings banks. Commercial banks comprise all Federal Reserve System member banks (including one bank in the Virgin Islands that became a member on May 31, 1957) and all nonmember commercial banks. Stock savings banks and nondeposit trust companies are included with commercial banks. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc. For figures on all active banks, including those in outlying areas, see table 576. See also *Historical Statistics, Colonial Times to 1967*, series X 20-41 and X 95-128, for related but not comparable data]

<sup>1</sup> Includes other assets and liabilities not shown separately. <sup>2</sup> Excludes reciprocal balances, except for 1940. Reclassification of deposits of foreign central banks in May 1961 reduced interbank deposits by a total of \$1,900 million (\$1,500 million time to other time and \$400 million demand to other demand).

<sup>3</sup> Preliminary. <sup>4</sup> Less than \$5 million, preliminary data rounded to nearest \$10 million.
