ACKNOWLEDGMENTS

This edition of the *Statistical Abstract* was prepared under the general direction of Edwin D. Goldfield, Chief, Statistical Reports Division. William Lerner, Assistant Chief, was responsible for general supervision, planning of content, and overall review. Helen E. Teir was primarily responsible for compilation, assisted by Dorothy M. Belzer for technical editorial work and Juanita A. Wright for editing and clerical operations.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 994–998) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract.*

JULY 1964.

Library of Congress Card No. 4–18089

SUGGESTED CITATION

U.S. Bureau of the Census, *Statistical Abstract of the United States: 1964.* (Eighty-fifth edition.) Washington, D.C., 1964.

PREFACE

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, the Guide to Sources (pp. 949–987), the section on Publications of Major Censuses (pp. 987–990), and the Guide to State Statistical Abstracts (pp. 991–993).

This volume includes a selection of data from many statistical publications, both governmental and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in published sources but obtained from unpublished tabulations and records of contributing agencies are identified in the source notes as "unpublished data." More information on the subjects covered in tables so noted may generally be obtained from the contributing agency.

Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States. Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in the State tables whenever available and are supplemented by information in section 32. Statistics for cities or other relatively small geographic units appear only in a few instances. Additional information for cities, counties, metropolitan areas, congressional districts and other small units, as well as more historical data, are available in various supplements to the *Abstract*. (See page V).

Changes in the 1964 edition.—This edition, the 85th annual issue, presents data for the most recent year or period available during the early part of 1964.

Each year the more than 1,300 tables and charts are reviewed and evaluated. New tables and charts of current interest are added, continuing series are brought up to date, and less timely data are curtailed or eliminated. Text notes are revised as necessary to incorporate new definitions and source references. This year, to the extent that data are available and space permits, a white-nonwhite classification is given in more tables than in previous editions.

The only major change in organization is that the tables on land, air, and water transportation, which formerly appeared in three sections, are now consolidated into two. The former section, "Roads and Motor Vehicles," is combined with the land transportation part of the former section "Transportation, Land and Air." The air transportation part of that section is combined with the former section "Waterways, Water Traffic, and Shipping." The titles of the two sections are "Transportation—Land" and "Transportation—Air and Water."

There are 67 entirely new tables in this edition, scattered through 23 of its 33 sections. Topics of current major interest and concern are covered statistically by 8 new tables on education, of which 2 reflect the segregation-desegregation status of public schools in Southern States, 6 new tables on social insurance and welfare services, and 7 new tables on income, 1 of which features a comparison of all families and poor families. Significant additions to other sections include 3 new tables on crime and law enforcement, 3 on revenue and expenditure of State and local governments, 6 on science and related subjects, and 3 on housing. A highlight of the international statistics section is a new summary table giving world totals for selected series.

Following is a list of some of the subjects covered by the new tables:

Urban and rural population, by color (p. 24)
Population aged 65 and over reporting medical costs (p. 74)
Years of school completed, by color and sex (p. 113)
School enrollment status and age (p. 116)
High school graduates and dropouts (p. 117)
School segregation–desegregation (p.125)
Public secondary schools, number (p. 129)
Charges in institutions of higher education (p. 132)
Vocational training (p. 140)
Crime rates (p. 148)
Federal and State prisons (p. 162)
Gaseous air pollutant levels (p. 178)
Expenditures for outdoor recreation (p. 205)
Experienced civilian labor force (p. 229)
Number of veterans, by States (p. 268)
Federal grants for social welfare (pp. 283, 284)
Assets of welfare and pension plans (p. 294)
Federal employees covered by retirement system (p. 295)
Family income (pp. 339, 340)
Income of persons (p. 343)
Revenue Act of 1964 (p. 400)
State and local revenue and expenditure (p. 424)
Commercial banks (p. 456)
Sales of corporations and merchandising firms (p. 491)
Telephone distribution, by States (p. 515)
Industrial research and development (p. 542)
Scientists and engineers in industry (p. 544)
Value of nuclear material in reactor cores (p. 549)
Air carriers, accidents (p. 587)
Air carriers, payroll and salaries (p. 590)
Shipping through Panama Canal (p. 599)
Shipbuilding in private shipyards (p. 603)
Man-hours of farm labor (p. 644)
Mineral production, U.S. and world (p. 703)
Phosphate rock and potash (p. 726)
Sales of new one-family homes (p. 752)
Housing units, selected characteristics (p. 755)
Households with specified appliances (p. 757)
Manufactures—horsepower of equipment (p. 787)
Acquisitions of manufacturing facilities (p. 787)
Federal expenditures for international programs (p. 856).
Value of imports of leading commodities (p. 875)
World summary (p. 905)

Of the tables included in the 1963 edition, 46 were omitted from this issue. The omissions, scattered through 20 sections, represent tables for which comparable details appear in the new or retained tables or for which no recent data are available.

Responsibility.—The contents of this volume are taken from a large number of sources (see pp. 994–998). The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

SUGGESTIONS AND COMMENTS

Many persons have offered suggestions for improving the presentation of data in the *Statistical Abstract* and its supplements. Their comments have been most helpful. Users of these publications are urged to continue to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington, D.C., 20233.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

please write to the agency indicated in the source note to the table which covers the desired subject. Write to the Bureau of the Census only if it is cited as the source.

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1962. A compact presentation of 161 items of statistical data for each State and county in the United States, and 163 items of statistical data for each of 676 incorporated cities having 25,000 inhabitants or more in 1960. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan statistical areas, urbanized areas, and unincorporated places. Items included based largely on results of most recent Censuses of Agriculture, Business, Governments, Housing, Manufactures, Mineral Industries, and Population. Includes 53 maps, explanatory and definitive text, and source notes. 705 pages Issued 1962. Price $5.25 (clothbound).

Congressional District Data Book (Districts of the 88th Congress). Includes 254 statistical items for the 435 congressional districts as constituted at the time of the 1962 elections; 113 items pertaining to nonwhite population for selected districts; and 144 items for districts or combinations of districts following county lines. Based largely on results of the most recent censuses. Includes text, source notes, maps for each State showing congressional district boundaries, and lists of urban places with 10,000 or more inhabitants. 603 pages. Issued 1964. Price $4.75 (clothbound).

Historical Statistics of the United States, Colonial Times to 1957. Prepared with the cooperation of the Social Science Research Council. A compilation of more than 8,000 statistical time series, largely annual, on American social and economic development covering periods from 1610 to 1957. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 801 pages. Issued 1960. Price $6.00 (clothbound).

Continuation to 1962 of Historical Statistics of the United States. In preparation. Will carry forward through 1962 those series in the basic volume that are still current. Will include revisions and corrections of data appearing in the basic volume.

Purchase orders should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402.

CONTENTS

Page

Fig. I. Map of the United States, showing Census divisions and regions XII

Sec. 1. POPULATION 1

Censuses, current surveys, and projections—Projections—Geographic distribution—Urban and rural—Sex—Age—Race—Nativity and parentage—Marital status—Mobility status—Migration—Households and families—Institutional population—Religious bodies.

Figs. II–IV. Population: Urban and rural trends; Households; Center of population for conterminous United States.

Sec. 2. VITAL STATISTICS, HEALTH, AND NUTRITION 44

Births—Reproduction rates—Fertility—Life expectancy—Deaths—Marriage and divorce—Children living with parents—Physicians, dentists, and nurses—Medical care expenditures—Medical costs for the aged—Hospitals—Mental hospitals, clinics, and institutions—Health conditions—Diseases—Accidents and injuries—Nutrition—Federal food programs.

Figs. V–VI. Physicians, by type of practice; Vital statistics rates.

Sec. 3. IMMIGRATION AND NATURALIZATION 89

Immigration quotas—Characteristics of immigrants—Displaced persons and refugees—Aliens—Migratory workers—Passports issued—Passengers arriving and departing—Naturalization.

Figs. VII–VIII. Immigrants admitted; Displaced persons and refugees admitted.

Sec. 4. EDUCATION 104

Types of schools—Enrollment—Projections—Years of school completed—School dropouts—Elementary and secondary schools—Segregation-desegregation—Institutions of higher education—Degrees conferred—Adult education—Public library systems—Vocational training—Federal aid.

Fig IX. Current expenditure per pupil, by States.

Sec. 5. LAW ENFORCEMENT, FEDERAL COURTS, AND PRISONS 145

Major crimes—Crime rates—Arrests—Federal courts—Lawyers—Prisoners—Prison employees—Executions.

Figs. X–XI. Prisoners present in Federal and State prisons; Crimes known to the police.

Sec. 6. AREA, GEOGRAPHY, AND CLIMATE 165

Territorial expansion—Coastlines—Land and water areas—Rivers—Lakes—Altitudes—Storms and floods—Water use and supply—Air pollution—Dates of freeze—Temperature—Precipitation—Snow and sleet—Sunshine—Wind velocity—Relative humidity—Degree days.

Fig. XII. Territorial expansion of the United States.

Sec. 7. PUBLIC LANDS, PARKS, AND RECREATION 193

Public domain—Land ownership—Federal real property—Leases, permits, and licenses—Entries and patents—Indian lands—National parks and forests—State, county, and municipal parks—Public recreation expenditures and areas—Fishing and hunting—Recreational expenditures and activities—Domestic and foreign travel.

Sec. 8. LABOR FORCE, EMPLOYMENT, AND EARNINGS..... 212
Employment status—Projections—Unemployment—Multiple jobholders—Employment, by industry—Female labor force—Transportation to work—Occupations, by sex, color, earnings, and age—Output indexes—Production worker earnings and hours—Supplementary wage benefits—Farm employment—Wage rates—Labor turnover—Injuries—Union membership—Work stoppages.
Fig. XIII. Trends in the labor force.

Sec. 9. NATIONAL DEFENSE AND VETERANS AFFAIRS..... 252
Defense expenditures—Military procurement—Civil defense—Fallout shelters—Military assistance—Defense contracts and payrolls—Military personnel—Pay rates—War service and casualties—Ships—Aircraft—Selective service—Veterans and veterans benefits.
Figs. XIV-XV. Federal budget expenditures for national defense; Selective service registrants.

Sec. 10. SOCIAL INSURANCE AND WELFARE SERVICES..... 276
Public expenditures—Federal grants—Population 65 and older—Old-age, survivors, and disability insurance—Pension funds and plans—Public retirement systems—Railroad retirement and other benefits—Unemployment insurance—Public employment offices—Workmen's compensation—Public assistance—Maternal and child welfare services—Boy Scouts and Girl Scouts—Vocational rehabilitation—United Fund and Red Cross—Foundations.
Fig. XVI. Social welfare expenditures.

Sec. 11. INCOME, EXPENDITURES, AND WEALTH..... 317
Gross national product—Economic growth—Personal consumption expenditures—National income—Personal income—Flow-of-funds accounts—Personal saving—Income of families and individuals—Poor families—Income distribution by color, sex, and age—Assets of individuals and spending units—National wealth.
Figs. XVII-XVIII. Gross national product and personal income and expenditures; Family personal income.

Sec. 12. PRICES..... 348
Purchasing power of dollar—Wholesale price indexes—Consumer price indexes—Family budget costs—Unit values of import and export articles—Retail prices and price indexes—Residential rent indexes—Medical service costs—Fuel and electricity costs.
Figs. XIX-XX. Wholesale and consumer price indexes.

Sec. 13. ELECTIONS..... 367
Electoral and popular vote for President—Vote for U.S. Senators—Apportionment of U.S. Representatives—Southern primaries—Vote for U.S. Representatives—Composition of Congress; legislative activity; bills vetoed—Vote for Governors—State legislatures—Elective local officials—Population of voting age and voter participation.
Figs. XXI-XXII. Popular vote cast for President; Gain or loss of membership in House of Representatives, by States.

Sec. 14. FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT..... 383
Administrative budget and trust fund receipts and expenditures—Cash receipts and payments—National income accounts—New obligational authority—Subsidies—Tax revenue—Income tax returns and rates—Savings bonds—Public and private debt—Government securities—Employment and payrolls.
Figs. XXIII–XXV. Organization of the Federal Government; Federal administrative budget; Federal budget dollar.

Sec. 15. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT..... 412
Local governmental units—Federal aid—Tax revenue—Revenue, expenditure, and debt—State finances and taxes—Assessed taxable property—City finances—Employment and payrolls.
Figs. XXVI–XXVII. Revenue and expenditure; Per capita tax revenue.

Sec. 16. BANKING, FINANCE, AND INSURANCE..... 443
Money stock and money in circulation—All banks—Federal Reserve banks—Commercial banks—Deposit insurance—Bank suspensions—Farm credit—Mortgages—Home loan banks—Savings and loan associations—Credit unions—Consumer credit—Securities: Sales, prices, and yields—Stock ownership—Life, health, and fire insurance.
Figs. XXVIII–XXIX. Commercial bank assets; Stock prices.

Sec. 17. BUSINESS ENTERPRISE..... 484
Turnover—Legal form of organization—Finances—Sales—Assets and liabilities—Profits and dividends—Expenditures for new plant and equipment—Investment—Corporate funds—Inventories—Mergers and acquisitions—Failures and liabilities—Bankruptcies.
Fig. XXX. New plant and equipment expenditures.

Sec. 18. COMMUNICATIONS..... 507
Postal service—Telephone—Telegraph—Radio and television—Newspapers and periodicals—Books—Copyrights.
Figs. XXXI–XXXII. Surplus or deficit in postal revenues and obligations; Operating revenues of selected communications media.

Sec. 19. POWER..... 527
Horsepower of prime movers—Energy production and consumption—Electric utilities—Electric energy—Waterpower—Rural electrification—Gas utility and pipeline industries.

Sec. 20. SCIENCE..... 539
Research and development—Scientists and engineers—Science doctorates conferred—Patents and trademarks—Atomic energy—Space programs and vehicles.

Sec. 21. TRANSPORTATION—LAND..... 553
Road mileage—Federal highways—Road finances—Motor vehicles: Travel, sales, and registrations—Motor fuel—Drivers' licenses—Automobile insurance—Motor-vehicle speed and accident deaths—Intercity traffic—Railroads: Equipment, revenues and expenditures, freight, passengers, employees, and accidents—Intercity bus lines—Transit industry—Motor carriers—Petroleum pipelines.
Figs. XXXIII–XXXIV. Highway construction contracts awarded; Intercity freight traffic.

Page

Sec. 22. TRANSPORTATION—AIR AND WATER..... 582
Civil aviation: Air carriers; accidents; aircraft; airports—Waterborne commerce—International transportation transactions—Commerce of ports, inland waterways, and Panama Canal—Vessels engaged in foreign trade—Shipyard employees and seamen—U.S. merchant vessels—Shipbuilding—U.S. Merchant Marine.
Figs. XXXV–XXXVI. Revenues and expenses of air carriers; Waterborne commerce of the United States.

Sec. 23. AGRICULTURE—FARMS, LAND, AND FINANCES..... 607
Farm population—Farms: Number, acreage, and value—Value of products sold—Color and tenure of operators—Land utilization—Irrigation—Federal reclamation—Drainage—Soil conservation—Fertilizer use—Mortgaged farms—Balance sheet of agriculture—Farm debt—Farm income and expenditures—Farm prices and price supports—Commodity Credit Corporation—Farm-to-retail price spreads—Farm-operator level-of-living—Farm machinery and equipment—Farm labor—Taxes and insurance—Cooperatives.
Figs. XXXVII–XXXVIII. Indexes of prices received and paid by farmers; Farm population and number and average size of farms.

Sec. 24. AGRICULTURE—PRODUCTION, MARKETING, AND TRADE.. 641
Indexes of productivity, farm output, and marketings and consumption—Farm labor output per man-hour—Exports and imports—Acreage, production, and value of crops—Field crops—Vegetables and fruits—Canned and frozen foods—Livestock—Meats and lard—Dairying—Poultry—Fats and oils.

Sec. 25. FORESTS AND FOREST PRODUCTS..... 679
Commercial forest land, growing stock, and live sawtimber— National forests—Tree distribution—Forest fires—Lumber—Prices—Millwork, wood products, and paints—Naval stores—Pulpwood and paper—Newsprint.
Figs. XXXIX–XL. Forest fires; Lumber production.

Sec. 26. FISHERIES..... 693
Quantity and value of catch—Fishermen and fishing craft—Catch of principal species—Catch landed at leading ports—Canned and frozen fishery products—Exports and imports of fishery products.

Sec. 27. MINING AND MINERAL PRODUCTS..... 701
Quantity and value of mineral production—Prices—Supply—Imports and exports—Strategic and critical materials—Shipments, value added, capital expenditures—Employment—Injurier—Coal, petroleum, natural gas—Stone and earth minerals—Metals.
Fig. XLI. Indexes of physical volume of mineral production.

Sec. 28. CONSTRUCTION AND HOUSING..... 736
Value of construction—Building permits—Residential upkeep—Construction costs—Public works expenditures—Construction contracts—Mobile homes—Housing units: Location, starts, costs, vacancy, occupants, condition, tenure, equipment, rent, value—Public housing—Mortgages—Home loans—Urban renewal.
Figs. XLII–XLIII. Value of new construction; New nonfarm housing units started.

Sec. 29. MANUFACTURES 767
Manufacturing summary—Production indexes—Industry groups: Firms, employees, value added—Inventories—Employment and output concentrations—Acquisitions—Horsepower—Capital expenditures—Water use—Alcohol and spirits—Tobacco and smoking habits—Textiles and clothing—Leather—Rubber—Chemicals—Medicinals—Glass and clay products—Metal products—Home appliances—Farm machines—Tractors.
Fig. XLIV. Industrial production indexes.

Sec. 30. DISTRIBUTION AND SERVICES 816
National income source—Retail trade: Establishments, sales, employees, inventories—Department stores—Wholesale trade: Establishments, sales, stocks, employees, inventories—Selected services: Establishments, receipts, employees—Motion picture theaters—Hotels—Advertising.
Figs. XLV-XLVI. National income in industries; Retail store sales.

Sec. 31. FOREIGN COMMERCE AND AID 848
Balance of payments—International investments—Foreign investments in U.S.—U.S. gold stock, liabilities, foreign currency holdings—Foreign assistance—Foreign trade—Exports and imports in relation to output—Trade by area and country—Indexes of quantity, price, value—Employment due to exports—Dutiable imports.
Figs. XLVII-XLVIII. Foreign assistance; Exports and imports.

Sec. 32. OUTLYING AREAS UNDER THE JURISDICTION OF THE UNITED STATES 889
Population characteristics—Vital statistics—Schools—Federal employees—Principal crops—Mineral production—Imports and exports—Puerto Rico: Government receipts and expenditures, employment, manufactures, gross product, personal and net income, and commercial business summary.

Sec. 33. COMPARATIVE INTERNATIONAL STATISTICS 903
World summary—Area and population—Vital statistics and food supply—Gross domestic product—Per capita product indexes—Mining and manufacturing indexes—European countries: Gross national product; industrial production indexes; foreign trade—Cost-of-living—Economic indexes—Agricultural production—Labor force—Energy—Mineral products—Manufactures—Foreign trade—Gold and foreign exchange holdings and rates—Transportation—Communications—Housing—Education and health—International organizations: Assessments, financial resources, U.S. contributions.

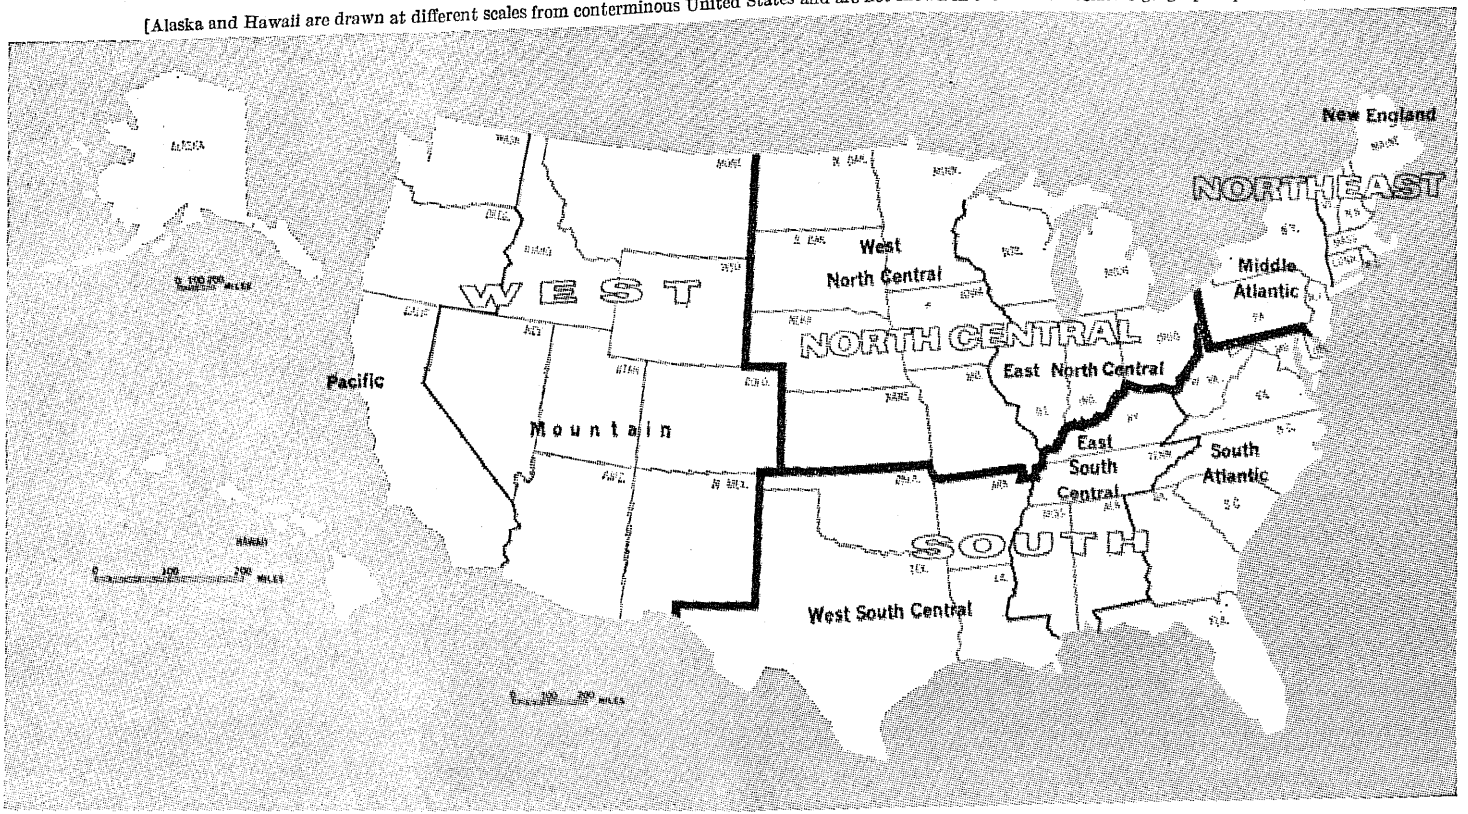
FIG. I. MAP OF THE UNITED STATES, SHOWING CENSUS REGIONS AND DIVISIONS

[Alaska and Hawaii are drawn at different scales from conterminous United States and are not shown in their correct relative geographic positions]



Source: Department of Commerce, Bureau of the Census.

Section 1
Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of Members of the House of Representatives among the several States. Until 1902, the census organization was temporary. The Bureau of the Census was then established as a permanent agency of the Government charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, this Bureau supplies intercensal data based on surveys and estimates in addition to making the comprehensive decennial census enumeration.

Decennial censuses.—In accordance with census practice dating back to 1790, each person enumerated in the 1960 Census was counted as an inhabitant of his usual place of residence (the place where he lives and sleeps most of the time). This place is not necessarily his legal residence, voting residence, or domicile; in most cases, however, the use of these different bases of classification would produce substantially the same statistics, although there may be appreciable differences for a few areas.

For the 1940, 1950, and 1960 Censuses, certain of the data are indicated as being obtained from representative samples of the population: 25 percent in 1960, 20 percent in 1950, and 5 percent in 1940. Exact agreement is not to be expected among the various samples, nor between them and the complete census count, but the sample data may be used with confidence where large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources.

Current Population Survey.—Until May 1956, this Survey, conducted monthly by the Bureau of the Census, covered a sample of approximately 21,000 interviewed households spread over a sample of areas throughout the United States. Since then, the sample has been expanded to approximately 35,000 interviewed households in a larger number of areas. For a discussion of the reliability of estimates based on this sample, see Technical Note, page 215.

Population estimates.—Population estimates for dates after April 1950, which are not the result of sample surveys, are based on data from the 1950 and 1960 Censuses; statistics of births and deaths provided by the Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service; statistics on the Armed Forces and their dependents provided by the Department of Defense; statistics on net movement from Puerto Rico reported by the Puerto Rico Planning Board; and statistics on Federal employees abroad provided by the Civil Service Commission. Estimates of State population are based on the same types of data and also on school statistics provided by State Departments of Education and parochial school systems.

Urban and rural areas.—According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (*a*) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (*b*) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (*c*) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a popu-

lation of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (*d*) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (*e*) unincorporated places of 2,500 inhabitants or more.

This definition of urban is substantially the same as that used in 1950. The major difference between 1950 and 1960 is the designation in 1960 of urban towns in New England and of urban townships in New Jersey and Pennsylvania. In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different special rules relating to population size and density.

In all definitions, the population not classified as urban constitutes the rural population. The term "current urban definition" refers to the population classified in accordance with the definitions used in 1950 and 1960. The term "previous urban definition" refers to the definition used prior to 1950.

A number of large and densely settled places are not included as urban because they are not incorporated places. To improve its measure of the urban population, the Bureau of the Census adopted, in 1950, the concept of the urbanized area and delineated, in advance of enumeration, boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition.

Farm and nonfarm residence.—The rural population is divided into the rural-farm population, which comprises all residents living on farms, and the rural nonfarm population, which comprises the remaining rural population. According to the definition used in the 1960 Census, the farm population consists of all persons living in rural territory on places of less than 10 acres yielding agricultural products which sold for $250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for $50 or more in the previous year. In the 1950 Census, farm population was determined by answers to the question, "Is this house on a farm (or ranch)?" However, persons on "farms" who paid cash rent for a house and yard only were classified as nonfarm. In both the 1950 and the 1960 Censuses rural persons in institutions, motels, and tourist camps were classified as nonfarm.

Color and race.—The concept of race as it has been used by the Bureau of the Census is derived from that which is commonly accepted by the general public. It does not, therefore, reflect clear-cut definitions of biological stock, and several categories used obviously refer to nationality. "Color" divides the population into two groups, white and nonwhite. The nonwhite population consists of Negroes, American Indians, Japanese, Chinese, Filipinos, and all other groups not classified as white. Persons of Mexican birth or ancestry who are not definitely Indian or of other nonwhite stock are included in the white population. Persons of mixed parentage are placed in the race or color classification of the nonwhite parent.

Beginning with the 1960 Census, information regarding color and race was obtained by self-enumeration or self-reporting; formerly, race and color classification was obtained, in most cases, by the Census enumerator's observation.

Mobility status.—The population of the United States has been classified according to mobility status on the basis of a comparison between the place of residence of each individual at the survey or census date and the place of residence at a specified earlier date. *Mobile persons or movers* includes all persons living in a different house in the United States at the end of the period from the one they occupied at the beginning. They are subdivided into "same county movers" and "different county movers, or migrants," depending on whether they moved within the same county or into a different county. Migrants in turn are classified according to whether they moved within the same State or into a different State. *Nonmobile persons or nonmovers* includes all persons who were living in the same house in the United States at the beginning and

end of the period. *Persons abroad* includes all persons whose place of residence was outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, or a possession of the United States. It also includes persons born in a foreign country or at sea who have at least one parent born in the United States. Persons whose place of birth was not reported are assumed to be native unless their census report contains contradictory information, such as an entry of a language spoken prior to coming to the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Household.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the housing unit who are related to the head) and also the lodgers and employees, if any, who regularly live in the house. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household.

Prior to 1960 a household was defined as all the persons occupying a "dwelling unit." See section 28, Construction and Housing, for definitions of "housing unit" and "dwelling unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A house with at least 5 lodgers, an institution, a college dormitory, or a military barracks.

Family.—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 Censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or group quarters (other than the negligible number of such groups among inmates of institutions) and related to each other.

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is defined as a husband and his wife living together, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or group quarters such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or group quarters.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. II. POPULATION, URBAN AND RURAL: 1890 TO 1960

[See table 12. For description of previous and current definitions, see pp. 1, 2]

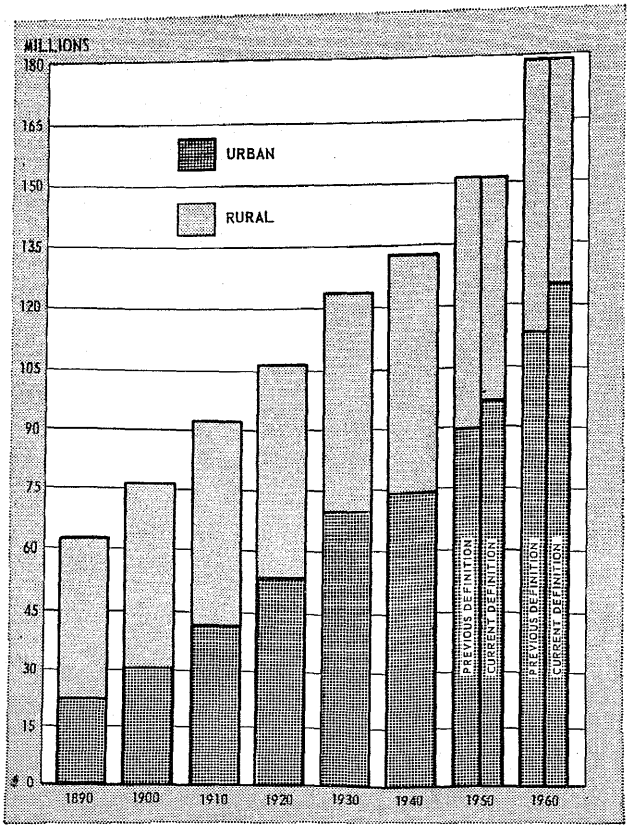


FIG. III. POPULATION AND HOUSEHOLDS: 1890 TO 1960

[See tables 1, 2, and 34]

No. 1. Area and Population: 1790 to 1960

[Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Area figures have been adjusted to bring them into agreement with remeasurements made in 1940. For additional area data, see tables 4 and 226. See also *Historical Statistics, Colonial Times to 1957*, series A 17-21]

Census date	Area (square miles)			Population

No. 2. Estimated Population: 1900 to 1964

[**In thousands.** As of July 1, except where noted. Beginning 1940, includes Alaska and Hawaii. Estimates for 1900 to 1909 are sums of State estimates based on local data indicative of population change. Estimates for 1910 to 1964 are based on decennial censuses and statistics of births, deaths, immigration, emigration, and Armed Forces. See also *Historical Statistics, Colonial Times to 1957*, series A 1-3]

No. 3. Population, by Age and Sex: 1960 and Projections to 1985

[**In thousands.** As of July 1. Includes Alaska, Hawaii, and Armed Forces abroad; does not contain revisions made in the 1960 estimate shown in table 2. Projections based on current estimates of the population by age and sex for July 1, 1963, and imply an annual net immigration of 300,000. The underlying projections of fertility were computed by the "cohort" method and imply that completed fertility of women (i.e., the average number of children per 1,000 women at end of childbearing) moves gradually toward the following levels: Series A, 3,350; Series B, 3,100; Series C, 2,775; and Series D, 2,450. Series A results do not differ substantially from those obtained by assuming that the average annual level of fertility in the 1960-63 period will persist throughout the projection period]

YEAR, SEX, AND SERIES	Total, all ages	Under 5 years	5 to 9 years	10 to 14 years	15 to 19 years	20 to 24 years	25 to 34 years	35 to 44 years	45 to 54 years	55 to 64 years	65 and over	14 and over	18 and over	21 and over

No. 4. Population and Area—United States and Outlying Areas: 1940 to 1960

[For area figures of individual States, see table 228. See also *Historical Statistics, Colonial Times to 1957*, series A 4-16 and J 2]

AREA	POPULATION			Gross area (land and water), 1960
	1940	1950	1960	
				Sq. mi.
Total	[1] 150,622,754	154,233,234	183,285,009	3,628,150
United States	132,164,569	151,325,798	179,323,175	3,615,211
Conterminous United States	131,669,275	150,697,361	178,464,236	3,022,387
Alaska	[2] 72,524	128,643	226,167	586,400
Hawaii	422,770	499,794	632,772	6,424
Commonwealth of Puerto Rico [3]	1,869,255	2,210,703	2,349,544	3,435
Possessions:				
Guam	22,290	59,498	67,044	212
Virgin Islands of the U.S	24,889	26,665	32,099	133
American Samoa	12,908	18,937	20,051	76
Midway Islands	437	416	2,356	2
Wake Island		349	1,097	3
Canton Island and Enderbury Island	44	[4] 272	[4] 320	27
Johnston Island and Sand Island	[5] 69	[5] 46	[5] 156	([6])
Swan Islands	([7])	[8] 36	[8] 28	1
Other [9]	[10] 10	([11])	([11])	[12] 9
Other outlying areas:				
Canal Zone [13]	51,827	52,822	42,122	553
Corn Islands [14]	[15] 1,523	[15] 1,804	[15] 1,872	4
Trust Territory of the Pacific Islands [16]	([17])	[18] 54,843	[19] 70,724	[20] 8,484
Population abroad [21]	[22] 118,933	[23] 481,545	1,374,421	
Members of the Armed Forces	118,933	301,595	609,720	
Civilian citizens employed by the U.S. Government		26,910	34,492	
Families of Armed Forces personnel or of civilian citizen employees	n.a.	107,350	507,827	
Crews of merchant vessels	n.a.	45,690	32,464	
Other citizens	n.a.	n.a.	[24] 189,918	

n.a. Not available.

[1] Includes estimated population of the Philippines (16,356,000), not shown separately.

[2] Census taken as of Oct. 1, 1939.

[3] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[4] Enderbury Island uninhabited at time of enumeration.

[5] Sand Island uninhabited at time of enumeration.

[6] Less than 0.5 square mile.

[7] Not enumerated.

[8] Little Swan Island uninhabited at time of enumeration.

[9] Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukulailai, Nurakita, Palmyra, Penrhyn, Rakahanga, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands not inhabited in 1950 and 1960. Quita Sueño Bank, Roncador Cay, and Serrana Bank, claimed by both the United States and Colombia, not enumerated.

[10] Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

[11] Not enumerated or uninhabited at time of enumeration.

[12] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (combined area 3 square miles), and Palmyra (4 square miles). Excludes Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square miles); area of other islands listed in footnote 9 not available.

[13] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[14] Leased (1914) from the Republic of Nicaragua for 99 years.

[15] Figures from Government of Nicaragua. Little Corn Island uninhabited at time of enumeration.

[16] Under the United Nations Trusteeship System with the United States as administering authority since July 18, 1947.

[17] Population 1940, 131,258 (Census of Japan).

[18] Estimated civilian population as of June 30, 1950; see *Current Population Reports*, Series P-25, No. 238, for derivation of estimates.

[19] Census of 1958 conducted by the Office of the High Commissioner. Civilian population; see *Census Report, 1958: Trust Territory of the Pacific Islands*, Office of the High Commissioner, Agana, Guam, June 1959.

[20] See references in footnotes 18 and 19, above. Comprised of 687 square miles of land area and 7,797 square miles of water area.

[21] Excludes United States citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of households.

[22] Excludes dependents of Federal employees and crews of merchant vessels.

[23] Based on 20-percent sample of reports received.

[24] Represents U.S. citizens abroad for extended periods of time. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

No. 5. Center of Population: 1790 to 1960

["Center of population" is that point which may be considered as center of population gravity of the U.S. or that point upon which the U.S. would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

YEAR	North latitude			West longitude			Approximate location
CONTERMINOUS U.S.[1]	°	′	″	°	′	″	
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1800	39	16	6	76	56	30	18 miles west of Baltimore, Md.
1810	39	11	30	77	37	12	40 miles northwest by west of Washington, D.C. (in Virginia).
1820	39	5	42	78	33	0	16 miles east of Moorefield, W.Va.[2]
1830	38	57	54	79	16	54	19 miles west-southwest of Moorefield, W.Va.[2]
1840	39	2	0	80	18	0	16 miles south of Clarksburg, W.Va.[2]
1850	38	59	0	81	19	0	23 miles southeast of Parkersburg, W.Va.[2]
1860	39	0	24	82	48	48	20 miles south by east of Chillicothe, Ohio.
1870	39	12	0	83	35	42	48 miles east by north of Cincinnati, Ohio.
1880	39	4	8	84	39	40	8 miles west by south of Cincinnati, Ohio (in Kentucky).
1890	39	11	56	85	32	53	20 miles east of Columbus, Ind.
1900	39	9	36	85	48	54	6 miles southeast of Columbus, Ind.
1910	39	10	12	86	32	20	In the city of Bloomington, Ind.
1920	39	10	21	86	43	15	8 miles south-southeast of Spencer, Owen County, Ind.
1930	39	3	45	87	8	6	3 miles northeast of Linton, Greene County, Ind.
1940	38	56	54	87	22	35	2 miles southeast by east of Carlisle, Haddon township, Sullivan County, Ind.
1950	38	50	21	88	9	33	8 miles north-northwest of Olney, Richland County, Ill.
1960	38	37	57	88	52	23	4 miles east of Salem in Marion County, Ill.
UNITED STATES[3]							
1950	38	48	15	88	22	8	About 3 miles northeast of Louisville, in Clay County, Ill.
1960	38	35	58	89	12	35	6½ miles northwest of Centralia, Ill., and approximately 50 miles east of East St. Louis, Ill.

[1] Excludes Alaska and Hawaii.
[2] West Virginia was set off from Virginia Dec. 31, 1862, and admitted as a State June 19, 1863.
[3] Includes Alaska and Hawaii.

[2] For United States, population of U.S. has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted, except that 1930 figures are based on revised land areas used for 1940.

[3] Less than 0.1 percent.

No. 10. Population—Standard Metropolitan Statistical Areas: 1960

[**Areas as defined in October 1963.** Minus sign (—) denotes decrease. A standard metropolitan statistical area (SMSA) is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. In addition to the county, or counties, containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities are the units used in defining SMSA's. This list of areas is based on *Standard Metropolitan Statistical Areas, 1964*, issued by the Executive Office of the President, Bureau of the Budget. For area components, see source]

STANDARD METROPOLITAN STATISTICAL AREA	1960	Rank	Percent change, 1950 to 1960

No. 13. Cities With 100,000 Inhabitants or More in 1960—Population, 1910 to 1960, and Area, 1960

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin. Land area figures generally supplied by city engineers and reviewed for reasonableness by Bureau of the Census]

n.a. Not available.

[1] The cities of Madison, Wis., and Rockford, Ill., share the same rank of 96. In order to have the lowest rank equal to the number of cities presented, the number 97 is omitted.

[2] Population shown is for New York City as now constituted.

[3] Revised population figure for Norfolk is 304,869.

[4] Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1910: 150,355.

No. 17. Population, by Age and Sex, 1930 to 1960, and by Color, 1950 and 1960

[**In thousands.** Includes Alaska and Hawaii. The median is the value which divides the distribution into two equal parts—one-half of the cases falling below this value and one-half exceeding this value. See also *Historical Statistics, Colonial Times to 1957*, series A 71–94]

No. 29. Marital Status of the Population, by Sex: 1890 to 1963

[**In thousands of persons 14 years old and over.** Beginning 1960, includes Alaska and Hawaii. Total population, 1890 to 1940, and civilian population, 1950 to 1963. 1950–1963 based on Current Population Survey; see Technical Note, p. 215. Civilian population includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Armed Forces included are as follows: 1950, 547,000; 1955, 800,000; 1960, 1,117,000; 1963, 964,000. See also *Historical Statistics, Colonial Times to 1957*, series A 210–227]

No. 34. Households, by Race of Head, and Population Per Household: 1890 to 1960

[In thousands. Beginning 1960, includes Alaska and Hawaii. For definition of household, see p. 3. See also *Historical Statistics, Colonial Times to 1957*, series A 242 and A 255–263]

Date	Households				Race of head			
	Number	Annual increase over preceding date		Population per household [2]	White	Negro	Other	Percent white
		Number	Percent [1]					
1890 (June 1) [3]	12,690			4.93	11,255	1,411	24	88.7
1900 (June 1)	15,964	327	2.32	4.76	14,064	1,834	66	88.1
1910 (Apr. 15) [3]	20,256	434	2.44	4.54	[4] 18,002	2,173	[4] 81	88.9
1920 (Jan. 1) [3]	24,352	418	1.90	4.34	21,826	2,431	95	89.6
1930 (Apr. 1)	29,905	542	2.02	4.11	26,983	2,804	118	90.2
1940 (Apr. 1)	34,949	504	1.56	3.77	31,680	3,142	127	90.6
1950 (Apr. 1)	42,857	791	2.06	3.52	39,044	3,633	149	91.2
1960 (Apr. 1)	53,021	1,016	1.92	3.38	47,868	5,153		90.3

[1] Computed by compound interest formula.
[2] Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.
[3] Includes small number of hotels, institutions, and other quasi-households. [4] Estimated.

No. 37. Households, Families, and Married Couples: 1962 and Projections to 1980

[**In thousands.** Includes Alaska and Hawaii. Data for 1962 based on current definition of a household; projections based on 1950 definition. (See text, pp. 3 and 738.) Figures take account of 1960 Census information on age and sex composition of the population. Projections based on Series II population projections from *Current Population Reports*, Series P-25, Nos. 241 and 251. (See also table 3.) Series A and B assume, in different degrees, increases in the proportion married in each age group. Given the initial projection of marital status for each series, the general method of projection for that series was as follows (except for the number of male primary individuals): A—average annual change from 1950 to 1956–58 in the proportion of persons in each age group who were household heads of a given type was assumed to continue to 1965; one-half assumed for 1965 to 1975; one-quarter assumed for 1975 to 1980. B—one-half the average annual change from 1950 to 1956–58 was assumed for 1957 to 1965; one-quarter assumed for 1965 to 1975; it was assumed that no change would occur thereafter. Projections of the number of male primary individuals were based on average annual change from 1950 to 1960–62. See *Current Population Reports*, Series P-20, No. 123]

No. 44. Religious Bodies—Church Membership, Number of Pastors, and Sunday School Enrollment

[Beginning 1959, includes Alaska and Hawaii. Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed]

Religious body	Year	Number of churches reported	Church membership (1,000)	Number of pastors with charges	Sunday or Sabbath School enrollment [1] (1,000)
Total	------	**319,240**	**117,946**	**246,600**	**44,616**

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental health, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the Public Health Service in its annual report, *Vital Statistics of the United States*, and its *Monthly Vital Statistics Report*. Reports in this field are also issued by the individual State bureaus of vital statistics.

Births and deaths.—The collection of death statistics on an annual basis began in 1900. Then the death-registration States consisted of 10 States and the District of Columbia. In 1915, the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas[1] makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, and in 1955, birth statistics were based on a complete count of the records received in the Public Health Service. From 1951 to 1954, and for 1956 and subsequent years, the figures were based on a 50-percent sample of all registered births. Adjustments shown for underregistration of births are based on the results of nationwide tests of registration completeness in 1940 and 1950. Such adjustments in the published data were discontinued in 1960.

Current death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) and deaths among Armed Forces abroad are excluded.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries and Causes of Death*. The current classification, "Seventh Revision of the International Lists," has been used in the United States beginning with 1958. It has been the practice to revise the *International Lists* every 10 years to keep abreast of medical knowledge. Each revision has produced some break in the comparability of cause-of-death statistics. Comparability ratios which measure the net effect of changes in classifications according to the Sixth and Seventh Revisions are shown in *Vital Statistics of the United States, 1958*, Vol. 1. The extent of earlier changes is discussed in "The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends," *Vital Statistics-Special Reports*, Vol. 36, No. 10, and *Vital Statistics of the United States, 1958*, Vol. 1.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence of the mother or of the decedent.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to 1940, and each year since 1944. Estimates have been made for the intervening years as well as for years in which collections were not complete. A marriage-registration

[1] For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1-5.

area was established by the Public Health Service on January 1, 1957, and a divorce-registration area on January 1, 1958. At the beginning of 1963, the marriage-registration area covered 35 States and 3 independent registration areas; the divorce-registration area, 21 States and 1 independent registration area.

Vital statistics rates.—Vital statistics rates computed by the Public Health Service are based upon the enumerated population figures as of April 1 for 1940, 1950, and 1960 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted. Birth and divorce rates for 1940 and 1947 to 1960, and death and marriage rates for 1940 to 1960, for the United States and the individual States are based on total population present in the area, excluding Armed Forces abroad; the population base for 1945 birth and divorce rates includes Armed Forces abroad.

Morbidity.—Annual data on notifiable diseases are compiled by the Public Health Service at its Communicable Disease Center in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report.* The data are based on reports from State health departments of cases of those diseases which are required to be reported under State laws. The list of notifiable diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are communicable diseases of national importance.

General health statistics, including morbidity, disability, and the utilization of health services are provided by the various surveys that make up the National Health Survey, conducted by the Bureau of the Census for the Public Health Service. They are published in *Vital and Health Statistics,* Series 10 to 12.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see pp. 246 and 247).

Medical care.—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually in *Hospitals,* Guide Issue, and include only hospitals that meet the Association's requirements for listing. Institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Included are nearly all hospitals in the country that meet the following definition: A hospital is any establishment providing medical and registered nurse supervision; and offering services, facilities, and beds for use beyond 24 hours by 6 or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality, or pregnancy; and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, (b) obstetrical care, or (c) other definitive medical treatment of similar extent. Statistics supporting comprehensive, long-range plans for construction of hospitals and related medical facilities authorized under Title VI of the Public Health Service Act, as amended, are submitted annually by the Hill-Burton State Agencies to the Public Health Service. National data on hospital beds in 1948 to 1962 and detailed State data as of January 1, 1962, appear in *Hill-Burton State Plan Data: A National Summary as of January 1, 1962,* Public Health Service Publication No. 930-F-2.

Statistics on institutional population based on the 1960 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U.S. Census of Population, 1960,* PC(2)-8A).

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

Mental health care.—Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, psychiatric services of general hospitals, outpatient psychiatric clinics, and institutions for the mentally retarded. From 1923 to 1946, data in the field of mental health were collected annually by the Bureau of the Census. With the passage of the National Mental Health Act in 1946, the data-collecting function was transferred to the Public Health Service. Beginning with the 1947 report, the data appear in the annual report, *Patients in Mental Institutions*, issued by the Public Health Service.

Nutrition.—Statistics on the apparent per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation.* A discussion of methods used to compute these figures and more detailed information appear in Agriculture Handbook No. 62, *Consumption of Food in the United States, 1909–52.* The 1961 and 1962 supplements to that publication present revised and current figures.

Statistics on Federal food distribution programs, data on the quantity and costs of the food commodities distributed, and the number of persons participating in the programs are published annually in *Agricultural Statistics.*

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 47. Live Births, Deaths, Marriages, and Divorces, and Rate Per 1,000 Population: 1910 to 1963

[**In thousands.** Beginning 1959, includes Alaska, and 1960, Hawaii. Births and deaths are registered births and deaths only; for years prior to 1933 not all States were represented (see text, p. 45). See also *Historical Statistics, Colonial Times to 1957*, series B 7–9, B 129, B 176, and B 178]

No. 48. Live Births and Birth Rate Per 1,000 Population, by Color: 1910 to 1962

[**In thousands.** Beginning 1959, includes Alaska, and 1960, Hawaii. Data for 1910 to 1958 are adjusted for underregistration; 1959 data are shown for both registered and adjusted births; beginning 1960, registered births only. For total registered births, see table 47. See also *Historical Statistics, Colonial Times to 1957*, series B 6 and B 19–21]

Year	Number [1]			Rate [2]		
	Total	White	Nonwhite	Total	White	Nonwhite
1910	2,777	2,401	(3)	30.1	29.2	(3)
1915	2,965	2,594	(3)	29.5	28.9	(3)
1920	2,950	2,566	383	27.7	26.9	35.0
1925	2,909	2,506	403	25.1	24.1	34.2
1930	2,618	2,274	344	21.3	20.6	27.5
1935	2,377	2,042	334	18.7	17.9	25.8
1940	2,559	2,199	360	19.4	18.6	26.7
1945	2,858	2,471	388	20.4	19.7	26.5
1950	3,632	3,108	524	24.1	23.0	33.3
1955	4,104	3,488	617	25.0	23.8	34.8
1958 [4]	4,255	3,598	657	24.6	23.3	34.3
1959 [4] (adj.)	4,295	3,622	673	24.3	23.1	34.1
1959 [4] (reg.)	4,245	3,597	647	24.0	22.9	32.8
1960 [4]	4,258	3,601	657	23.7	22.7	32.1
1961 [4]	4,268	3,601	667	23.3	22.2	31.6
1962 [4]	4,167	[5] 3,394	[5] 642	22.4	[5] 21.4	[5] 30.5

[1] Includes adjustments for States not in the birth-registration area before 1933; see text, p. 45.
[2] For 1940, 1950, and 1960, based on population enumerated as of April 1; for all other years, estimated as of July 1. For 1945, based on population including Armed Forces abroad; for all other years based on total population (in specific group) residing in area.
[3] Not estimated. Differences between estimated numbers of all births and white births do not give reliable estimates for nonwhite births. [4] Based on a 50-percent sample.
[5] Excludes data for New Jersey since this State did not require reporting of color.

n.a. Not available.
[1] Based on 50-percent sample of live births.
[2] Provisional. By place of occurrence.
[3] Based on population (excluding Armed Forces abroad) enumerated as of April 1 for 1940, 1950, and 1960, and estimated as of July 1 thereafter.
[4] Beginning 1960, includes Alaska and Hawaii.
[5] Includes estimate for Massachusetts.

No. 50. Live Births, by Color, for Urban and Rural Areas—States: 1961 and 1962

[**By place of residence.** Represents registered births. Based on a 50-percent sample. For definitions of urban and rural, see "Technical Appendix" in 1960 annual report, *Vital Statistics of the United States*. Tests made in 1950 indicate that, for the country as a whole, errors in residence reporting results in a significant overstatement of births to residents of urban places, and a corresponding understatement in the number to residents of areas classified as rural]

No. 51. Live Births, by Sex of Child and by Attendant: 1940 to 1962

[**In thousands.** Beginning 1959, includes Alaska, and 1960, Hawaii. Represents registered births. Beginning 1957, based on a 50-percent sample. For total estimated births prior to 1960, see table 48]

Year	Total	Number of live births			Attended by—		
		Male	Female	Males per 1,000 females	Physician, in hospital [1]	Physician, not in hospital	Midwife, other, and not specified
1940	2,360	1,212	1,149	1,055	1,317	825	218
1945	2,735	1,405	1,331	1,056	2,156	403	177
1950	3,554	1,824	1,731	1,054	3,126	252	177
1955	4,047	2,074	1,974	1,051	3,819	101	128
1957	4,255	2,180	2,075	1,051	4,070	75	109
1958	4,204	2,153	2,051	1,050	4,037	65	103
1959	4,245	2,174	2,071	1,050	4,091	56	98
1960	4,258	2,180	2,078	1,049	4,114	49	94
1961	4,268	2,186	2,082	1,050	4,135	44	90
1962	4,167	2,132	2,035	1,048	4,049	36	82

[1] It is assumed that all births in hospitals or institutions are attended by physicians.

No. 52. Live Birth Rate, by Color and Age of Mother: 1940 to 1962

[**Births per 1,000 women in each specified group.** Beginning 1959, includes Alaska, and 1960, Hawaii. Data for 1940 to 1958 are adjusted for underregistration; 1959 data are shown for both registered and adjusted births; beginning 1960, registered births only. For 1940, 1950, and 1960, based on enumerated population as of April 1; for all other years, on estimated population as of July 1. Beginning 1957, based on a 50-percent sample. See also *Historical Statistics, Colonial Times to 1957*, series B 22-23]

Year	15 to 44 years [1]			Age of mother							
	Total	White	Nonwhite	10 to 14 years	15 to 19 years	20 to 24 years	25 to 29 years	30 to 34 years	35 to 39 years	40 to 44 years	45 to 49 years [2]

[1] Rates computed by relating total births, regardless of age of mother, to women aged 15 to 44 years.
[2] Rates computed by relating births to mothers aged 45 years and over to women aged 45 to 49 years.
[3] Excludes data for New Jersey since this State did not require reporting of color.

No. 53. Birth Rate, by Live-Birth Order, Native White Women: 1930 to 1962

[**Births per 1,000 women 15 to 44 years old.** Beginning 1959, includes Alaska, and 1960, Hawaii. Live-birth order refers to number of children born alive. Data for 1940 to 1958 are adjusted for underregistration; 1959 data are shown for both registered and adjusted births; beginning 1960, registered births only. Includes adjustments for States not in the birth-registration area prior to 1930. Figures for births of order not stated are distributed. Estimates and population bases for 1930 (as of July 1) prepared by P. K. Whelpton. For 1940, 1950, and 1960, based on enumerated population as of April 1; for all other years, estimated as of July 1. Beginning 1957, based on a 50-percent sample. See also *Historical Statistics, Colonial Times to 1957*, series B 10-18]

Live-birth order	1930	1940	1950	1955	1957	1958	1959 (adj.)	1959 (reg.)	1960	1961	1962 [1]

No. 55. Gross and Net Reproduction Rate, by Color: 1905 to 1962

[Beginning 1959, includes Alaska, and 1960, Hawaii. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. Rates computed using annual vital statistics life tables and population estimates by age, except as noted for earlier years. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. A comparison of the net reproduction rate with the gross reproduction rate affords an indication of the loss sustained *by the potential childbearing population through mortality.* Data for 1951–1954 and for 1956 and subsequent years based on a 50-percent sample of births. See also *Historical Statistics, Colonial Times to 1957*, series B 31–36]

[1] Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more, or was not stated.

[2] Represents deaths of infants under 28 days old, exclusive of fetal deaths.

[3] Deaths from deliveries and complications of pregnancy, childbirth, and the puerperium. Beginning 1958, deaths are classified according to seventh revision of *International Lists of Diseases and Causes of Death*; see text, p. 45.

[4] Excludes data for New Jersey since this State did not require reporting of color.

[5] Provisional.

[1] Excludes data for New Jersey since this State did not require reporting of color.

[2] Includes deaths for which age was not stated.

[3] Adjusted for age with the age distribution of the population as enumerated in 1940 used as the standard.

[4] Based on enumerated population adjusted for age bias in nonwhite population at ages 55 to 69 years.

n.a. Not available.
[1] Provisional, by place of occurrence.
[2] Based on total population residing in area, enumerated as of April 1 for 1940, 1950, and 1960 and estimated as of July 1 thereafter.
[3] Beginning 1960, includes Alaska and Hawaii.
[4] Includes estimate for Massachusetts.
[5] By place of occurrence.

No. 67. Death Rate, 1950 to 1962, and Deaths, 1961 and 1962, From Selected Causes

[Beginning 1959, includes Alaska, and 1960, Hawaii. Seventh revision of *International Lists of Diseases and Causes of Death* used beginning 1959. See text, p. 45. See also *Historical Statistics, Colonial Times to 1957*, series B 114–128]

Cause of death (seventh revision)	Deaths per 100,000 population [1]						Deaths	
	1950	1955	1959	1960	1961	1962	1961	1962
All causes	963.8	930.4	938.6	954.7	929.6	945.4	1,701,522	1,756,720
Tuberculosis, all forms	22.5	9.1	6.5	6.1	5.4	5.1	9,938	9,506
Syphilis and its sequelae	5.0	2.3	1.7	1.6	1.6	1.5	2,850	2,811
Meningococcal infections	0.6	0.6	0.4	0.4	0.3	0.3	586	649
Acute poliomyelitis	1.3	0.6	0.3	0.1	0.0	0.0	90	60
Infectious hepatitis	0.4	0.5	0.5	0.5	0.5	0.5	976	911
Other infective and parasitic diseases	4.4	3.1	3.3	3.2	3.1	3.1	5,638	5,837
Malignant neoplasms, including neoplasms of lymphatic and hematopoietic tissues	139.8	146.5	147.3	149.2	149.4	149.9	273,502	278,562
Asthma	2.9	3.6	2.8	3.0	2.7	2.6	4,910	4,896
Diabetes mellitus	16.2	15.5	15.9	16.7	16.4	16.8	30,098	31,222
Meningitis, except meningococcal and tuberculous	1.2	1.1	1.3	1.3	1.2	1.2	2,263	2,322
Major cardiovascular-renal diseases	510.8	506.0	515.9	521.8	511.5	521.4	936,218	968,809
Diseases of cardiovascular system	494.4	496.3	508.9	515.1	505.1	515.2	924,622	957,437
Vascular lesions affecting central nervous system	104.0	106.0	108.4	108.0	105.4	106.3	192,951	197,451
Diseases of heart	356.8	356.5	363.2	369.0	362.4	370.3	663,391	688,009
Rheumatic fever and chronic rheumatic heart disease	14.8	12.0	10.4	10.3	9.8	9.6	17,872	17,751
Arteriosclerotic heart disease, incl. coronary disease	213.0	247.0	268.6	275.6	274.4	283.9	502,351	527,561
Nonrheumatic chronic endocarditis and other myocardial degeneration	56.5	39.9	31.8	31.8	29.8	29.4	54,632	54,645
Other diseases of heart	15.9	12.6	13.8	14.3	13.8	13.9	25,254	25,876
Hypertensive heart disease	56.5	45.0	38.6	37.0	34.6	33.5	63,282	62,176
Other hypertensive diseases	8.3	6.8	7.4	7.1	6.7	6.7	12,185	12,497
General arteriosclerosis	20.4	19.8	19.6	20.0	19.3	19.8	35,388	36,848
Other diseases of circulatory system	4.9	7.3	10.3	11.0	11.3	12.2	20,707	22,632
Chronic and unspec. nephritis and other renal sclerosis	16.4	9.6	7.0	6.7	6.3	6.1	11,596	11,372
Influenza and pneumonia [2]	31.3	27.1	31.2	37.3	30.1	32.3	55,175	59,995
Influenza	4.4	1.7	1.6	4.4	1.2	1.8	2,137	3,431
Pneumonia [2]	26.9	25.4	29.6	32.9	29.0	30.4	53,038	56,564
Bronchitis	2.0	1.9	2.2	2.4	2.2	2.5	4,064	4,665
Ulcer of stomach and duodenum	5.5	5.9	6.0	6.3	6.3	6.6	11,540	12,228
Hernia and intestinal obstruction	5.9	5.3	5.2	5.1	5.0	5.2	9,177	9,723
Gastritis, duodenitis, enteritis, and colitis, except diarrhea of newborn	5.1	4.7	4.4	4.4	4.3	4.4	7,820	8,194
Cirrhosis of liver	9.2	10.2	10.9	11.3	11.3	11.7	20,737	21,824

n.a. Not available.
[1] Includes patients in private hospitals, not shown separately.
[2] Patients per 100,000 population estimated as of July 1. Total population used for 1935; civilian, thereafter.
[3] Includes veterans with mental disorders resident in VA hospitals and public health service hospitals at Fort Worth, Tex., and Lexington, Ky.
[4] Includes patients in State-operated psychopathic hospitals and, through 1950, in city hospitals (which ceased to exist thereafter).
[5] Includes patients in city institutions through 1945. Last city institution was transferred to State auspices in 1948.

Source: Dept. of Health, Education, and Welfare, Public Health Service; *Patients in Mental Institutions, Mental Health Statistics—Current Reports; Annual Statistical Report of Outpatient Psychiatric Clinics, Data on Patients of Outpatient Psychiatric Clinics in the United States; Veterans with Mental Disorders Resident in Veterans Administration Hospitals*, and unpublished data.

No. 97. Personnel and Maintenance Expenditures of Mental Hospitals, Outpatient Psychiatric Clinics, and Public Institutions for the Mentally Retarded: 1940 to 1961

[Beginning 1960, includes Alaska, and 1961, Hawaii]

n.a. Not available.
[1] Prior to 1950, includes State hospitals only.
[2] Includes estimates.
[3] Based on average daily resident patient population of hospitals reporting personnel by occupation.
[4] Includes clinical directors, psychiatrists and psychiatric residents, other staff physicians and residents excluding medical interns.
[5] Includes salaries and wages, purchased provisions, fuel, light, water, etc.
[6] Total maintenance expenditures divided by average daily resident patient population of institutions reporting expenditures.
[7] Full-time equivalents of full-time, part-time, and trainee personnel; excludes trainees of VA clinics.

No. 100. Days of Disability—Total and Per 100 Persons, by Acute Condition Group: 1963

[For year ending June 30. Includes Alaska and Hawaii. Data refer to civilian noninstitutional population and contain some duplications, since time lost because of several concurrent conditions is counted under each contributing condition. Based on a sample and subject to sampling variability; see source for detailed explanation. For definitions of types of time lost, see footnotes, table 101]

ITEM	ACUTE CONDITION GROUP[1]				
	Infective and parasitic	Respiratory	Digestive	Injuries	All other
Number of cases—1,000,000	44.7	232.9	20.5	50.7	52.0
Rate per 100 persons	24.4	127.2	11.2	27.7	28.4
TOTAL DISABILITY DAYS (1,000,000)					
Restricted activity	201.3	764.1	73.8	300.8	267.3
Bed disability	98.4	377.6	36.1	79.0	104.2
Work loss	19.5	121.9	10.5	69.6	38.9
School loss	51.5	108.8	7.1	11.8	17.2
DAYS PER 100 PERSONS					
Restricted activity	109.9	417.2	40.3	164.3	145.9
Bed disability	53.7	206.2	19.7	43.2	56.9
Work loss	28.7	179.4	15.5	102.4	57.2
School loss	128.0	270.5	17.6	29.3	42.7

[1] Excludes all conditions involving neither restricted activity nor medical attention.

No. 101. Days of Disability—Total and Per Person, by Type of Disability, Sex, and Region: 1963

[For year ending June 30. Includes Alaska and Hawaii. Data refer to civilian noninstitutional population. Based on a sample and subject to sampling variability; see source for detailed explanation]

TYPE OF TIME LOST	TOTAL DISABILITY DAYS (1,000,000)			DAYS PER PERSON						
	Both sexes	Male	Female	Total	Sex		Region			
					Male	Female	Northeast	North Central	South	West
Restricted-activity days [1]	2,969.0	1,291.5	1,677.5	16.2	14.5	17.8	14.0	15.7	18.0	17.0
Bed-disability days [2]	1,212.8	507.3	705.5	6.6	5.7	7.5	5.8	6.4	7.5	6.6
Work-loss days [3]	415.4	261.8	153.6	6.1	5.9	6.6	5.8	5.6	7.0	5.9
School-loss days [4]	224.3	107.3	117.0	5.6	5.3	5.9	5.7	5.3	5.3	6.4

[1] A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days.

[2] A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.

[3] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.

[4] A day when a child lost the entire school day because of illness or injury. Computed for children 6 to 16 years of age.

[1] Beginning 1961, includes other types of meningitis.
[2] For 1945 and 1950, figures from Economic Research Service, Dept. of Agriculture.
[3] Based on reports from 39 States.

Source: Dept. of Health, Education, and Welfare, Public Health Service, Communicable Disease Center, Atlanta, Ga.; *Morbidity and Mortality Weekly Report* (annual supplement), Vol. 3, No. 53 and Vol. 11, No. 53; and unpublished data.

No. 106. Specified Reportable Diseases—Cases Reported, by Month: 1962

[Includes Alaska and Hawaii. Figures in this table and table 105 should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned]

No. 108. Persons Injured and Rate Per 1,000 Population Per Year, by Type of Accident, Sex, and Age: 1959–61

[Annual average for July 1959–June 1961. Data based on household interviews conducted by the National Health Survey and covering a sample of the civilian noninstitutional population, including Alaska and Hawaii. Includes only persons with injuries involving 1 or more days of restricted activity or medical attention. For definitions and methodology, see source]

TYPE OF ACCIDENT	Total	SEX		AGE				
		Male	Female	Under 15 years	15 to 24 years	25 to 44 years	45 to 64 years	65 and over
PERSONS INJURED (1,000)								
Total	44,995	25,835	19,160	17,127	6,759	10,346	7,856	2,906

No. 110. Nutrition—Nutrients Available for Civilian Consumption Per Capita Per Day: 1930 to 1963

[Excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics, Colonial Times to 1957*, series G 546–551]

[1] Represents cost to the Federal Government of the commodity as delivered to the State distributing agency; includes cost of purchase, handling, warehousing, and transportation, but excludes administrative costs.
[2] For 1940, represents School Milk Program, which was merged with indemnity plan in July 1943. See also headnote, table 112. Cost refers to subsidy payments by the Federal Government; excludes administrative costs.
[3] Initiated in September 1954 to increase the consumption of fluid milk in schools and child-care institutions authorized under the Agricultural Act of 1954, as amended.

No. 112. School Lunch Program (Indemnity Plan)—Schools and Children Participating, States and Other Areas: 1963

[Comprises elementary and secondary schools. The indemnity plan is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Federal Government for local purchases of food on a basis of quality and quantity of meals served]

Section 3

Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report* of the Immigration and Naturalization Service. Immigration statistics are prepared from entry documents. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compilations of data from alien address report cards.

Although the reporting of alien arrivals was required in certain of the colonies and original States, the continuous record begins in 1819. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. For subsequent fiscal years, annual reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published independently.

Immigration.—Since 1820 the official immigration statistics (see table 115) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. For reporting purposes, Hawaii in 1901, Puerto Rico in 1902, and Alaska in 1904 were treated as integral parts of the United States. Travel between the Philippines and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934. Prior to 1868 arriving alien passengers were recorded; thereafter aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895 to 1897 when the reporting of arrivals was resumed. Two classes of alien admissions are now reported, immigrant under either quota or nonquota status, and nonimmigrant.

Immigrant.—An immigrant is defined as an alien, other than a returning resident, admitted for permanent residence.

Quota immigrant.—Quotas limit immigration from countries other than those of the Western Hemisphere. Until 1920 there was only a qualitative limitation on immigration into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population. In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States, as determined

from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas and thereby raised the total quota authorized to 153,714. By 1952, this figure had become 154,277 by virtue of minor changes. The most recent step in legislation was in the Immigration and Nationality Act of 1952, which simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. By Presidential proclamation effective January 1, 1953, new quotas were established for each quota area, totaling 154,657. Quotas were further revised by Presidential proclamation during 1957 and each year thereafter; the total now stands at 156,987.

Nonquota immigrant.—Nonquota immigrants comprise immigrants born in Canada, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and countries of Central and South America, and their spouses and children under age 21 if accompanying or following to join such immigrants; spouses and children of citizens of the United States; ministers of religious denominations, their spouses and children, if accompanying or following to join such ministers; refugees; and others.

Nonimmigrant.—Nonimmigrants are aliens who enter the United States for temporary periods or resident aliens returning from a temporary stay abroad. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants, and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; returning resident aliens; students; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Displaced persons and refugees.—The Displaced Persons Act of 1948, as amended, authorized the entry of certain displaced persons and other refugees without regard to the current availability of quotas, but subject to charges made against future annual quotas. The major provisions of the Displaced Persons Program expired in December 1951, and the program was nearly completed by June 30, 1952.

The Refugee Relief Act of 1953 authorized the issuance of 214,000 special nonquota visas until the end of 1956 to German, Italian, Greek, Far-Eastern, and other refugees and expellees from the Soviet and other Communist-dominated countries. An act passed September 11, 1957, further provided for the reallocation of 18,000 of these visas which were unused. The act of July 29, 1953, authorized nonquota admission of eligible orphans adopted by citizen members of the Armed Forces or by government employees serving overseas. The acts of July 25, 1958, and of July 14, 1960, authorized the adjustment of status to that of permanent residents for Hungarian parolees and for paroled refugee-escapees, respectively, after they had acquired 2 years' residence in the United States. The act of September 2, 1958, authorized admission as nonquota immigrants of Azores victims of earthquakes and of Netherlands nationals displaced from Indonesia. The act of September 22, 1959, allowed nonquota admission of certain relatives of refugees who had previously been admitted under the Refugee Relief Act.

Alien registration.—The Immigration and Nationality Act provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address to the Attorney General during the month of January. Alien address report cards are distributed through the Post Offices of the United States or the local offices of the Immigration and Naturalization Service.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 122. Alien Agricultural Laborers Admitted, by Country of Last Permanent Residence: 1950 to 1963

[For years ending June 30. Mexican workers are employed as agricultural laborers only when the Secretary of Labor has certified that sufficient domestic employees are not available, that employment of alien workers will not adversely affect the wages and working conditions of domestic agricultural workers, and that reasonable efforts have been made to attract domestic workers for such employment. Admission of alien agricultural workers from countries other than Mexico is determined by the Attorney General after consultation with appropriate agencies of the Government, upon petition of the importing employer]

Spouses and children of exchange visitors [7]	----------	----------	----------	3,039	7,666
Returning resident aliens [8]	61,442	97,895	103,931	112,261	135,701
NATO officials	----------	633	755	1,005	1,767
Other nonimmigrants	25	7	3	----------	----------

[1] Prior to Act of Sept. 22, 1959, all sons or daughters of U.S. citizens over 21 were classified as fourth preference quota. Adopted sons or daughters with petitions approved prior to Sept. 22, 1959, remained fourth preference.
[2] Prior to Act of Sept. 22, 1959, included only children under 21 of resident aliens. Adult sons or daughters of resident aliens were classified as nonpreference quota.
[3] Prior to Act of Sept. 22, 1959, classified as nonpreference quota.
[4] Under the Act of 1924, this class covers only women who had been U.S. citizens.
[5] New classes under the provisions of the Immigration and Nationality Act of 1952.
[6] Not reported prior to 1959. [7] Classes established by Act of Sept. 21, 1961.
[8] Returning resident aliens who have once been counted as immigrants are included with nonimmigrants.

Section 4

Education

This section presents data concerning the personnel, level, extent, and finances of formal education in the United States. The chief sources of these data are the decennial Census of Population and the Current Population Survey, both conducted by the Bureau of the Census (see text, p. 1), and a number of annual, biennial, and other periodic surveys conducted by the Office of Education. The Census of Population has included data on school enrollment since the Census of 1840 and on educational attainment since the Census of 1940. The Current Population Survey has reported on school enrollment annually beginning in 1945 and on educational attainment and illiteracy periodically beginning in 1947. The surveys of the Office of Education are summarized in the *Digest of Educational Statistics*, an annual publication issued for the first time in 1962. The *Digest* continues many of the tables which formerly appeared in the *Biennial Survey of Education in the United States*, published from 1916–18 through 1956–58 by the Office of Education. It includes data on pupils, staff, finances, and organization at elementary, secondary, and college levels.

Other regular sources of education data include special studies of the Office of Education, publications of the National Education Association, and annual or biennial reports of education agencies in individual States. The Office of Education's biennial report, *Federal Funds for Education,* contains detailed data on Federal expenditures for education. Administrative statistics on programs concerned with the distribution of Federal funds are issued by the agencies responsible. The quinquennial Census of Governments provides data on school district finances. Reports published by the Bureau of Labor Statistics contain data relating employment experience to educational attainment. Special studies by the National Science Foundation present statistics on scientists and technicians. Similar studies by the National Institutes of Health cover medical fields. Data on vocational training are available in the *Digest of Annual Reports of State Boards for Vocational Education,* issued annually by the Office of Education.

Types of data.—The statistics in this section are of two general types. One type, exemplified by data from the Bureau of the Census, is based on direct interrogation of individuals to obtain information about their own and their families' education. Tabulations of this type of data relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population.

The second type, exemplified by data from the Office of Education and the National Education Association, is based on reports obtained from administrators of educational institutions and of local and State agencies having jurisdiction over education. This type of data relates to school enrollment, attendance, staff, and finances for the United States, individual States, and local areas, according to institutional characteristics.

State laws.—Although all States except Mississippi and South Carolina have requirements that children attend school, State laws vary as to the ages and circumstances of compulsory attendance. In the majority of States, the laws require that formal schooling begin by age 7 and continue to age 16.

Schools.—The Office of Education defines "school" as "A division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

The basic Office of Education statistics for elementary and secondary schools are concerned with the local school systems serving the general population. Data from other types of schools are secured from time to time. School enrollment statistics of the Bureau of the Census are based on attendance or enrollment in any regular school within a given period; educational attainment statistics are based on the highest grade completed by an individual. "Regular" schools include public and private kindergartens, graded schools, colleges, universities, and professional schools. "Public" schools are defined as schools controlled and supported by local, State, or Federal governmental agencies; "private" or "nonpublic" schools are those controlled and supported mainly by religious organizations or by private persons or organizations. Neither the Office of Education nor the Bureau of the Census regularly includes specialized vocational, trade, or business schools, residential schools for exceptional children, and correspondence schools. Office of Education enrollment data include kindergartens and those nursery schools which are publicly financed; Census enrollment data include kindergartens but exclude nursery schools. At the higher education level, the basic Office of Education statistics and the Bureau of the Census enrollment statistics are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges. Statistics for certain other types of institutions beyond the high school, such as those offering organized occupational curriculums of nondegree character, are also collected by the Office of Education.

With respect to school levels, the Bureau of the Census defines "elementary" schools as including grades 1 through 8; "high" schools as including grades 9 through 12; and "colleges" as including junior or community colleges, regular 4-year colleges, and graduate or professional schools. Statistics reported by the Office of Education according to organization, as elementary level and secondary level, may not be strictly comparable because the grades included at the secondary level vary, depending on the organization of junior high schools. The trend is for the enrollment in grades seven and eight to shift from an elementary to a secondary organization, with the result that grade distribution between elementary and secondary is changing over time.

School year.—Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year which generally begins in September of the preceding year and ends in June of the year stated. Statistics concerning school finances are for a 12-month period, usually July 1 to June 30.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 135. Number of Public and Private Schools, by Level: 1930 to 1962

[Beginning 1958, includes Alaska and Hawaii. Schools classified by type of organization, rather than by grade-group; elementary excludes kindergarten and secondary includes junior high schools]

n.a. Not available.
[1] Excludes schools of nursing not affiliated with institutions of higher education.
[2] Public and nonpublic exclude subcollegiate departments of institutions of higher education, residential schools for exceptional children, and Federal schools, except that, for kindergarten, available data are included in the total through 1958 and in the breakdown thereafter.
[3] Bureau of the Census, *Current Population Reports*, Series P–20.
[4] Schools for the blind, deaf, mentally deficient, epileptic, and delinquent.
[5] 1927 data. [6] 1946 data. [7] Includes kindergarten. [8] Includes capital outlay.
[9] Expenditures for all departments, including preparatory. For 1930, includes expenditures for auxiliary enterprises and activities, scholarships, fellowships, prizes, and other noneducational current expenditures, excluded for following years. In 1940, such expenditures amounted to $59,034,000 for public institutions and $93,665,000 for private institutions; in 1950, $255,474,000 and $283,743,000; in 1958, $457,125,000 and $448,126,000; and in 1960, $550,963,000 and $537,204,000.

No. 140. Persons 5 to 20 Years Old—School Enrollment, by Age: 1920 to 1960

[**In thousands, except percent.** Excludes Alaska and Hawaii. In 1920 and 1930, school enrollment question not restricted as to type of school or college; data refer, respectively, to periods Sept. 1, 1919–Jan. 1, 1920, and Sept. 1, 1929–Apr. 1, 1930. In 1940 and 1950, data based on attendance at or enrollment in any regular school or college, including night schools, or vocational schools, if part of a regular school system, and exclude correspondence schools; data refer, respectively, to periods Mar. 1–Apr. 1, 1940, and Feb. 1–Apr. 1, 1950. Data for 1950 based on 20-percent sample. In 1960, data refer to period Feb. 1–Apr. 1; based on 25-percent sample of households and persons not in households]

No. 143. Projections of School Enrollment, by Sex and by Level of School: 1965 to 1980

[**In thousands.** As of fall of year. Beginning 1960, includes Alaska and Hawaii. Elementary includes grades 1-8; high school, grades 9-12 and postgraduates. Series shown represent projections based on different combinations of assumptions about population and enrollment rates. Population series II and III based on following assumptions as to fertility: II—1955-57 level continues to 1975-80; III—1955-57 level declines to 1949-51 level by 1965-70, then remains at that level to 1975-80. Enrollment series A and C based on following assumptions: A—age-specific enrollment rates will continue to increase but average annual rate of increase will be one-half the average annual rate of change between 1950-52 and 1957-59 by 1968 and level off by 1975 to 1980; C—average annual enrollment rates for 1957-59 will remain constant to 1980. Projections based on other assumptions, and more detailed methodology, are given in source]

No. 144. Retention Rate Per 1,000 Students Attending School From Fifth Grade Through First Year of College: 1942–1950 to 1954–1962

[Excludes Alaska and Hawaii. Period covers year of entrance into 5th grade, except as noted, to year of high school graduation. Rates for the 5-grade through high school graduation are based on enrollments in successive grades in successive years in public elementary and secondary schools, and are adjusted to include estimates for nonpublic schools. Rates for first-time college enrollment are based on data supplied by institutions of higher education]

No. 145. Persons 25 Years Old and Over—Educational Attainment and Sex: 1960 and Projections to 1980

[**In thousands, except median.** As of spring of year. Excludes Alaska and Hawaii. Data for 1970 and 1980 based on projected age-grade specific attainment rates from 1950 Census and Current Population Surveys of October 1952 and March 1957. Series A and B in 1970 and 1980 imply following assumptions regarding trends: A, continuation of short-term past trends, and B, continuation of long-term past trends, in attainment of younger adult age groups. Figures based on projections of population as published in Series P-25, No. 187]

Date and sex	Persons 25 years old and over	Years of school completed								Median school years completed
		None	Elementary school			High school		College

[1] For 1940 and 1950, includes persons not reporting years of school completed, not shown separately here; for 1960, persons not reporting years of school completed were assigned values for that item, as explained in source.
[2] Includes persons reporting no school years completed.
[3] Medians computed on basis of unrounded data on years of school completed.

No. 149. Lifetime and Mean Income of Males 25 to 64 Years Old, by Years of School Completed: 1949, 1956, and 1961

[Beginning 1961, includes Alaska and Hawaii. Figures for lifetime income based on application of appropriate life tables to arithmetic mean income, by age, as obtained for a cross section of population in each year shown. Figures for mean income for 1949 based on Census of Population data and, for 1956 and 1961, on Current Population Survey]

Years of school completed	Lifetime income			Mean income		
	1949	1956	1961	1949	1956	1961
Elementary:						
Less than 8 years [1]	$79,654	$108,310	$124,930	$2,232	$2,979	$3,483
8 years	106,889	148,033	168,810	2,988	4,079	4,750
High school:						
1 to 3 years	121,943	169,501	193,082	3,279	4,634	5,305
4 years	148,649	208,322	224,417	3,820	5,553	6,102
College:						
1 to 3 years	173,166	243,611	273,049	4,489	6,505	7,392
4 years or more	241,427	340,131	360,604	6,236	8,716	9,530

[1] Includes males reporting no years of school completed.

n.a. Not available.

[1] For 1900, enumerated population as of June 1; for 1960, enumerated population as of April 1; for all other years, estimated population as of July 1 of preceding year (1919, 1939, etc.). Excludes Armed Forces abroad.

[2] Includes librarians and other nonsupervisory instructional staff. Prior to 1940, figures represent number of persons employed rather than number of positions. [3] Estimated.

[4] Beginning 1956, not comparable with prior years because of reclassification of items comprising "intermediate" and "local."

[5] Includes a relatively minor amount from other sources (transportation fees and tuition from patrons, and gifts) which accounted for 0.5 percent of total revenue receipts in 1960.

[6] Through 1950, includes community services.

[7] Comprises summer schools, community colleges, adult education, and, beginning 1958, community services.

[8] Based on current expenditure allocable to pupil costs, capital outlay, and interest.

[9] Based on expenditure allocable to pupil costs. [10] Includes interest.

Not reported separately [4]	([5])	([5])	11,067	([5])	([5])	11,998

[1] Includes District of Columbia.
[2] Total number of different school systems reporting a program for one or more of the specified types of exceptional children; not the sum of the figures reported in the column.
[3] Not reported in the 1947-48 survey. Figures for 1948 are the sums of those for "delicate" and "epileptic."
[4] Includes enrollments given in a combined report for two areas of exceptionality.
[5] Distributed throughout other categories.

n.a. Not available.

[1] Per pupil in average daily attendance based on expenditures allocable to pupil costs.

[2] Includes community services, summer schools, community colleges, and adult education.

[3] Excludes amounts expended by State and local school building authorities in Indiana, Kentucky, and Pennsylvania.

[4] Dollar amounts should be reduced about one-fourth to make them roughly comparable to those of other States.

[5] Excludes excused absences. [6] Expenditures for summer schools and adult education included in day schools.

[7] Includes expenditures for junior colleges. [8] Includes net expenditure for school lunch and milk programs.

[9] Includes expenditures for public junior-college program.

[10] Includes cost of administration at the State level, State contributions to teacher retirement fund, and Federal funds for school lunch program.

[11] Includes interest payments to holding companies.

[12] Includes State contributions to teacher retirement and social security.

[13] Expenditures for summer schools and adult education only.

[1] Data have been adjusted to conform to a major reclassification of institutions, which excludes from the "junior college" category those institutions (classified as technical institutes and semiprofessional schools) which do not offer programs consisting wholly or principally of work creditable toward a bachelor's degree. A total of 41,437 students were enrolled in these institutions in 1955 (32,057 in publicly controlled institutions and 9,380 in private institutions).

Section 5

Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, Federal court cases, the legal profession, Federal and State prisoners, and the use of the death penalty. The chief sources of data on these subjects are: *Uniform Crime Reports for the United States*, issued annually by the Federal Bureau of Investigation; the *Annual Report of the Director, Administrative Office of the U.S. Courts;* and *Federal Prisons*, an annual review, and *National Prisoner Statistics*, a series of periodical bulletins and reports, both issued by the Bureau of Prisons.

In addition, limited information concerning juvenile delinquency and the operation of juvenile courts is collected by the Children's Bureau of the Department of Health, Education, and Welfare. Statistics on the number of lawyers and certain of their characteristics are compiled by the American Bar Foundation, Chicago, Illinois. Data on prosecution and disposition of persons charged with misdemeanors and other minor offenses may be found for some of the larger cities in the annual reports of their municipal courts or governments.

Law enforcement and legal jurisdiction.—Law enforcement is for the most part a function of State and local officers and agencies. The U.S. Constitution reserves general police powers to the States. By act of Congress, Federal offenses include only offenses against the U.S. Government and against its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. Excluding the military, there are 52 separate criminal law jurisdictions in the United States, 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State, although there are among the States often substantial differences in the penalties provided for like offenses.

Law enforcement can be divided into three parts. The first covers the activities of the police agencies, namely, the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State, and Federal grand juries, and prosecuting court officers. The third division of administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the application of the penalty is carried out by the prison, reformatory, or jail, or by probation or parole officials.

Crime.—The Federal Bureau of Investigation, through its Uniform Crime Reporting Program, receives monthly and annual reports on a voluntary basis from law enforcement agencies throughout the country. Each month, city police, sheriffs, and State police file reports on the number of offenses that become known to them in seven crime categories—criminal homicide, forcible rape, robbery, aggravated assault, burglary, larceny, and auto theft. These seven categories are the basis of the FBI's Crime Index, a measure of the extent, fluctuation, and distribution of serious crime in the United States. The monthly reports also contain data on the number of

these crimes cleared by arrest and certain other analytical data pertaining to specific crime categories. Annual reports provide summaries of data concerning persons arrested for all criminal offenses, by age, sex, and race of the offender, as well as an accounting of the number of persons formally charged and their disposition. The law enforcement agencies currently reporting to the FBI represent 94 percent of the national population.

In summarizing and publishing crime data, the FBI does not vouch for the validity of the reports it receives, but presents the data as information useful to persons concerned with the problem of crime and criminal-law enforcement.

Courts.—Court statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole although data are available for many States individually. The only national compilations of such statistics were made by the Bureau of the Census which, from 1932 to 1945, obtained reports from a number of States on defendants prosecuted, convicted, and sentenced in courts of general trial jurisdiction. At no time, however, were there more than 32 States involved in the reporting system.

Comprehensive information on the business of the Federal courts is collected by the Administrative Office of the U.S. Courts and is published in the *Annual Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine. Generally, the Federal courts have jurisdiction over the following types of cases:

(1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every State and one each in Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11, known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

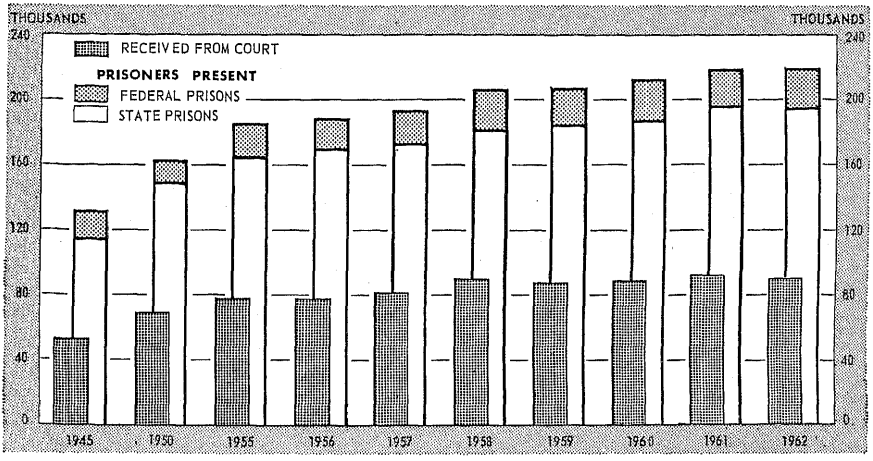
Prisoners.—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950 when this work was transferred to the Bureau of Prisons. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority are now published periodically by the Bureau of Prisons in *National Prisoner Statistics* and in its annual report, *Federal Prisons*. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. X. PRISONERS PRESENT IN FEDERAL AND STATE PRISONS AT END OF YEAR: 1945 TO 1962

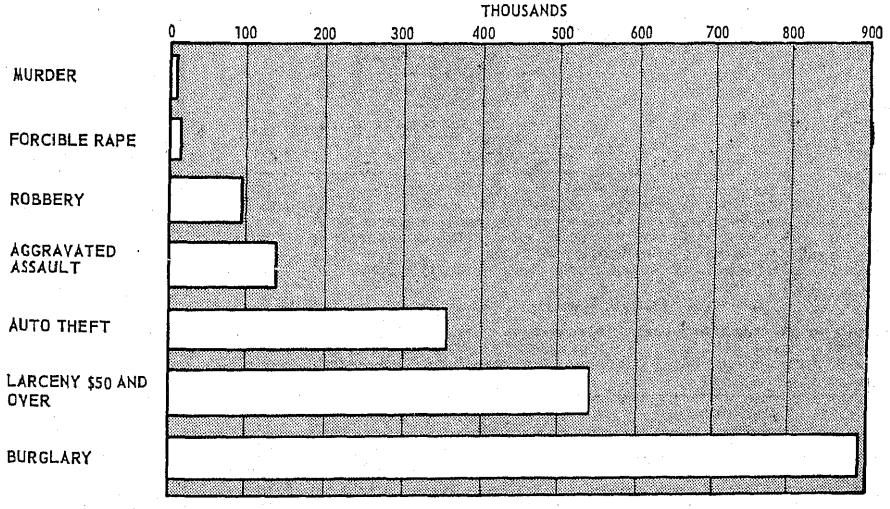
[See table 215]



Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Dept. of Justice, Bureau of Prisons.

FIG. XI. CRIMES KNOWN TO THE POLICE, BY TYPE: 1962

[See table 195]



Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Dept. of Justice, Federal Bureau of Investigation.

No. 195. Crimes Known to the Police, by Type: 1959–61 Average and 1962

[Includes Alaska and Hawaii. Estimates based on reports from city and rural law enforcement agencies representing 94 percent of the population for 1962, according to Bureau of the Census data. Minus sign (–) denotes decrease. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*]

Type of crime	Estimated number of offenses		Change			
	1959–61 average	1962	1959–61 to 1962		1961 to 1962	
			Number	Percent	Number	Percent
Total	**1,807,100**	**2,048,370**	**241,270**	**13**	**122,280**	**6**
Murder [1]	8,670	8,400	–270	–3	–200	–21
Forcible rape [2]	15,860	16,310	450	3	300	2
Robbery [3]	87,570	95,260	7,690	9	3,600	4
Aggravated assault [4]	129,400	139,600	10,200	8	6,580	5
Burglary [5]	789,300	892,800	103,500	13	40,300	5
Larceny $50 and over [6]	464,300	539,900	75,600	16	41,800	8
Auto theft [7]	312,000	356,100	44,100	14	29,900	9

[1] Includes all willful felonious homicides; excludes suicides and justifiable homicides.
[2] Limited to forcible rapes and attempts.
[3] Includes the stealing or taking of anything of value by force or violence or by threat of force or violence; includes attempted robbery.
[4] Includes assault with intent to kill. Excludes simple assault, assault and battery, fighting, etc.
[5] Includes any unlawful entry to commit a felony or a theft. Includes attempted burglary and burglary followed by larceny.
[6] Includes theft of property or articles of value (except auto theft) without the use of force and violence or fraud. Excludes larceny resulting from burglary.
[7] Includes all cases where motor vehicles are driven away and abandoned. Excludes those taken for temporary use when actually returned by the taker.

No. 196. Urban Crimes Known to the Police: 1957–61 Average and 1962

[Excludes Alaska and Hawaii. Offenses known to the police in 2,471 cities over 2,500, total 1962 population as estimated by FBI, 87,781,000. For definitions not shown here, see footnotes, table 195. Minus sign (–) denotes decrease. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*. See *Historical Statistics, Colonial Times to 1957*, series H 445–451, for related but not comparable data]

Type of crime	Number of offenses		Percent change
	1957–61 average	1962	
Total	**1,950,304**	**2,304,540**	**18.2**
Murder and nonnegligent manslaughter	3,844	4,351	13.2
Manslaughter by negligence [1]	2,629	2,844	8.2
Forcible rape [2]	7,355	8,126	10.5
Robbery	49,398	57,907	17.2
Aggravated assault	73,706	83,750	13.6
Burglary—breaking or entering	449,953	538,573	19.7
Larceny—theft [3]	1,159,512	1,369,479	18.1
Auto theft	203,907	239,510	17.5

[1] Includes deaths primarily attributable to gross negligence on the part of some individual other than the victim.
[2] Beginning 1958, the rape category was limited to forcible offenses. Prior to 1958 statutory cases were also included. The forcible rapes used to construct the annual averages for 1957–58 were estimates based on special offense analyses furnished by over 400 selected cities (total population over 50,000,000) which showed the proportion of reported rapes classified as forcible each year.
[3] Includes all reported thefts regardless of value of property stolen.

No. 197. Crime Rates, by Type: 1957 to 1962

[**Represents offenses known per 100,000 population.** Beginning 1958, includes Alaska and Hawaii. Based on population estimated as of July 1, except as otherwise noted. Excludes Armed Forces abroad. For definition of crimes, see footnotes, table 195. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*]

Type of crime	1957	1958	1959	1960 [1]	1961	1962
Total	**862.3**	**925.9**	**921.4**	**1,038.7**	**1,052.8**	**1,102.3**
Murder	4.6	4.6	4.8	5.0	4.7	4.5
Forcible rape	7.9	8.8	8.8	8.9	8.8	8.8
Robbery	42.8	47.4	44.2	51.7	50.1	51.3
Aggravated assault	67.3	67.8	70.2	73.0	72.7	75.1
Burglary	360.7	399.3	393.3	456.5	466.0	480.4
Larceny $50 and over	215.9	234.1	235.9	266.0	272.3	290.5
Auto theft	163.1	163.8	164.4	177.6	178.3	191.6

[1] Based on population enumerated as of April 1.

Source of tables 195–197: Dept. of Justice, Federal Bureau of Investigation; annual report, *Uniform Crime Reports for the United States.*

No. 198. Crime Rates, by Type—States: 1961 and 1962

[Represents offenses known per 100,000 population. Based on population estimated as of July 1. Excludes Armed Forces abroad. For definitions of crimes, see footnotes, table 195. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*]

No. 203. Arrests in Urban and Rural Places, by Age Groups: 1962

[Includes Alaska and Hawaii. Represents arrests reported by 2,936 cities of 2,500 or more, total population o 94,014,000, and by 1,039 other area agencies, total population of 29,558,000. Population as estimated by FBI; covers 67 percent of total 1962 population as estimated by Bureau of the Census. Each person arrested is counted rather than the number of charges filed against one person. Arrest of a juvenile is counted with the offense actually committed even though a technical charge, such as juvenile delinquency, must be filed under local procedure. Figures not comparable with those published in 1959 and previous editions of the *Statistical Abstract*]

Offense charged	Total, all ages	Age (years)							
		Under 18	18 to 20	21 to 24	25 to 34	35 to 44	45 to 49	50 and over	Not known

[1] Not included in State figures.
[2] Beginning 1960, excludes misdemeanant prisoners received from court into adult correctional institutions.
[3] Through 1955, covers only the New Castle County workhouse; thereafter, also includes the Kent and Sussex County workhouses which were united with it to form a State correctional system.
[4] Includes only prisoners liable to imprisonment in Georgia State Prison.
[5] Beginning 1960, excludes misdemeanant prisoners received from court.

No. 219. Average Time Served by Prisoners Released From Federal Institutions for First Time, by Offense: 1963

[For year ending June 30. Includes a few prisoners committed from the Federal courts in Alaska and Hawaii. Excludes 1,243 first releases other than by parole, expiration of sentence, and mandatory release; also excludes 1,163 parole releases of offenders sentenced under the Youth Corrections Act and 1,676 second or subsequent releases. In computing averages, sentences to life and to more than 45 years were counted as 45 years; minority sentences of juvenile delinquents were counted from date of sentence to 21st birthday; percent of average sentence figures computed from aggregate sentence lengths and aggregate time served]

Section 6

Area, Geography, and Climate

Statistics in this section relate to area, climatologic, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements (issued infrequently by the Bureau of the Census), which present area and geography statistics of national scope. However, many data are compiled for particular regions or for internal administrative purposes by such Federal Government agencies as the Geological Survey, the Coast and Geodetic Survey, and the Weather Bureau.

Area.—Area measurements in the United States began with measurements for the country as a whole and developed, as mapping progressed, to measurements for the States.

The annual report of the U.S. General Land Office for 1850 contained the first reference to the areas of the several States and Territories, although there was no indication of the method used in obtaining these measurements. Until 1881, the General Land Office was practically the sole source of information concerning the areas of the States and Territories.

In 1881, the Bureau of the Census, as a part of the 1880 Census of Population, laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement. In 1940, the same Bureau, in its publication, *Areas of the United States: 1940*, presented the first basic measurement of the United States since its work in 1880. The data presented in that study cover the total land and water areas of the States, counties, cities, and minor civil divisions. For the 1950 and 1960 Censuses no comprehensive remeasurement of all areas was made, but adjustments in selected area figures were made for three principal reasons: (1) Changes in boundaries, (2) the development of water reservoirs, or (3) the improvement in maps from which area measurements are made.

Geography.—The Geological Survey, cooperating in some instances with State and local agencies, is responsible for topographic and geologic maps and for basic data concerning the quantity, quality, and movement of surface and ground water.

The Bureau of Land Management conducts cadastral surveys.

The Coast and Geodetic Survey has responsibility for coastal and geodetic surveys and measurement of certain physical phenomena. Authorized in 1807, this agency's original function was to survey and chart the coast of the United States and the outlying islands and fishing banks. In 1871, Congress authorized an extension of the geodetic surveys from coast to coast to provide the States with reference markers for the control of their topographic and geologic mapping and their boundary surveys, and to provide data for use by the Geological Survey and other agencies. Since 1927, the Coast and Geodetic Survey has also been in charge of preparing aeronautical charts for the United States and its outlying areas.

A civil mapping activity of the Corps of Engineers, the U.S. Lake Survey, was established in 1841. Its primary function is to furnish Great Lakes navigators with reliable charts and information regarding harbor facilities. It also maintains records of the fluctuating levels of the lakes, the flow through connecting rivers, and the precipitation over the lakes, and reports on all hydraulic problems relating to the Great Lakes.

Air pollution.—The Public Health Service first established an air sampling network in 1953. The Federal Air Pollution Research and Technical Assistance Act (PL 159, 84th Congress), under the provisions of which the present National Air Sampling Network was created, became effective in 1955. The Network's objectives are to determine the extent and nature of air pollution, to study trends in levels of atmospheric contaminants, and to investigate relationships between air pollution and socio-economic, geographic, topographic, and other factors. Currently there are 250 sampling stations in the Network, 215 urban and 35 nonurban.

The Radiation Surveillance Network is a cooperative air sampling program consisting of 72 collection stations. It was established by the Public Health Service and is operated by the Division of Radiological Health in conjunction with State health departments.

Climate.—The Weather Bureau is responsible for essentially all meteorologic data and collects, processes, and publishes climatologic data. It maintains about 11,000 weather stations, of which nearly 3,000 produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871 although some detailed records began in the 18th century.

Nearly all weather stations have been moved several times in their history. Consequently, the Weather Bureau uses "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1931 to 1960. For stations having records for the entire 30 years from the same instrument site, monthly precipitation and temperature normals are the means of the monthly values for the 30 years; for temperature, the normal maximum and normal minimum values were used to obtain monthly normals. The annual normal temperature is obtained by dividing by 2 the sum of the annual normal maximum value and the annual normal minimum value of temperature.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1931 to 1960, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare aganist both sites for obtaining the resultant adjustment factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1931 to 1960) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated.

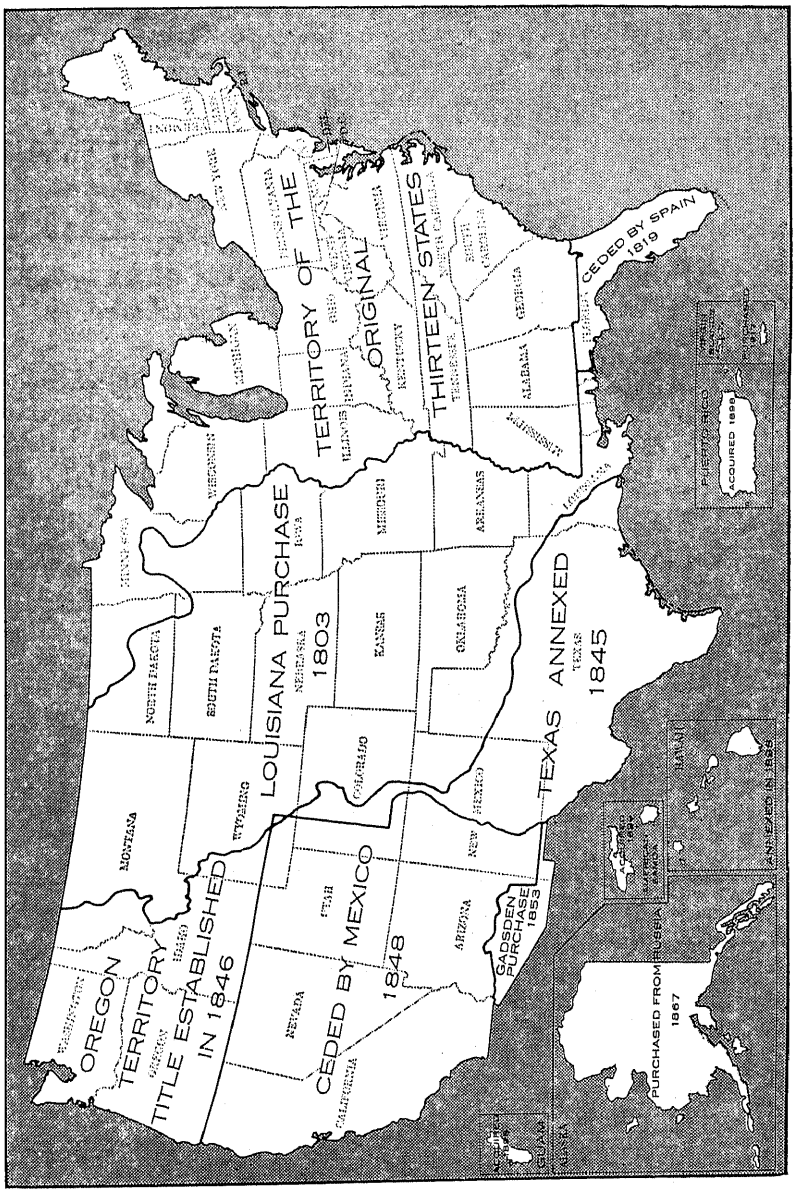
The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and computed from the standard base 65° F. The degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XII. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER PRINCIPAL AREAS

[See table 226]



Source: Dept. of Commerce, Bureau of the Census.

No. 226. Territorial Expansion of the United States and Acquisitions of Other Areas

[Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession, which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1960. See also *Historical Statistics, Colonial Times to 1957*, series J 1-2]

ACCESSION	Date	Gross area (land and water)	ACCESSION	Date	Gross area (land and water)
		Sq. mi.			*Sq. mi.*
Total	1960	3,628,150	Other:		
United States		3,615,211	*The Philippines* [2]	*1898*	*115,600*
Territory in 1790 [1]		888,811	Puerto Rico	[3] 1899	3,435

Pennsylvania		89	Washington	157	3,026
Rhode Island	40	384			
			Arctic coast, Alaska	1,060	2,521

[1] Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1: 1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.
[2] Figures obtained in 1939-1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

[1] Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

[2] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

[3] Year of ratification of Constitution; one of the original 13 States.

No. 229. Extreme Points of the United States

[The geographic center of an area may be defined as the center of gravity of the surface, or that point on which the surface of the area would balance if it were a plane of uniform thickness. Because there is no generally accepted definition of geographic center, and no completely satisfactory method of determining it, there may be as many geographic centers of a State or country as there are definitions of the term. Because many factors such as curvature of the earth, large bodies of water, and irregular surfaces affect the determination of centers of gravity, the following positions should be considered as approximations only]

Location	Direction from geographic center	Coordinates		Distance from geographic center
		Latitude (N)	Longitude (W)	
				Miles
From geographic center of conterminous United States near Lebanon, Smith County, Kans., 39°50′, 98°35′ to—				
Lake of the Woods, Projection, Minnesota	North	49°23′	95°09′	680
Key West, Florida	South	24°33′	81°48′	1,436
West Quoddy Head, Maine	East	44°49′	66°57′	1,640
Cape Alava, Washington	West	48°10′	124°44′	1,412
From geographic center of United States (excl. Hawaii)[1] near Castle Rock, Butte County, S. Dak., 44°59′, 103°38′ to—				
Point Barrow, Alaska	North	71°23′	156°29′	2,504
Key West, Florida	South	24°33′	81°48′	1,865
West Quoddy Head, Maine	East	44°49′	66°57′	1,779
Cape Wrangell, Attu Island, Alaska	West	52°55′	172°27′ (E)	3,623
From geographic center of United States (incl. Alaska and Hawaii)[2] west of Castle Rock, S. Dak., 44°58′, 103°46′ to—				
Point Barrow, Alaska	North	71°23′	156°29′	2,502
Ka Lae (South Cape), Hawaii Island, Hawaii	South	18°56′	155°41′	3,456
West Quoddy Head, Maine	East	44°49′	66°57′	1,785
Cape Wrangell, Attu Island, Alaska	West	52°55′	172°27′ (E)	3,620

[1] Excludes islands adjacent to the conterminous United States.
[2] Excludes islands adjacent to the conterminous United States, but includes all islands of the Aleutian chain and Hawaii.

Note.—The following distances in statute miles are computed to mean sea level: (*a*) from West Quoddy Head, Maine, west along the parallel to the Pacific Ocean, 2,807 miles; (*b*) from the south point of Texas due north to the 49th parallel, 1,598 miles; (*c*) from West Quoddy Head, Maine, to Cape Wrangell, Alaska, 4,839 miles; (*d*) from West Quoddy Head, Maine, to Kure Island, Hawaii, 5,788 miles; (*e*) from Mangrove Point, Florida, to Cape Wrangell, Alaska, 5,496 miles; (*f*) the two points farthest apart are Mangrove point, Florida, and Kure Island, Hawaii, a distance of 5,848 miles; (*g*) length of the northern boundary, excluding Alaska, is 3,987 miles; (*h*) length of the Canadian-Alaskan boundary, 1,538 miles; (*i*) length of the Mexican boundary from Gulf of Mexico to the Pacific Ocean, approximately 2,013 miles; (*j*) Cape Mendocino, California projection extends to latitude 40°27′, at longitude 124°24′; Cape Sable, Florida (on mainland) projection extends to latitude 25°07′, at longitude 81°05′; Kure Island, Hawaii projection extends to latitude 28°25′, at longitude 178°22′. The extreme south point of Texas is in latitude 25°50′, longitude 97°24′.

No. 231. Lengths of Principal Rivers

[Comprises rivers 400 miles or more in length. Length represents distance to designated outflow from (*a*) original headwater of named river where name applies to entire length of channel, or (*b*) upper limit of channel so-named, usually the junction of 2 tributaries or headwater streams]

River	Outflow	Length (miles)	River	Outflow	Length (miles)
Apalachicola-Chattahoochee	Gulf of Mexico	500	Niobrara	Missouri River	431
Arkansas	Mississippi River	1,450	North Canadian	Canadian River	760
Brazos	Gulf of Mexico	870	North Platte	Platte River	618
Canadian	Arkansas River	906	Ohio	Mississippi River	981
			Ohio-Allegheny	Mississippi River	1,306
Cimarron	Arkansas River	600			
Clark Fork-Pend Oreille	Columbia River	505	Ouachita	Red River	605
Colorado (U.S.-Mex.)	Gulf of California	1,450	Pearl	Gulf of Mexico	490
			Pecos	Rio Grande	735
Colorado (Texas)	Matagorda Bay	840	Pee Dee-Yadkin	Winyah Bay	435
Columbia	Pacific Ocean	1,214			
Columbia, Upper	To mouth of Snake River	890	Porcupine	Yukon River	450
Connecticut	Long Island Sound	407	Red (Okla.-Tex.-La.)	Mississippi River	1,018
Cumberland	Ohio River	687	Red River of the North	Lake Winnipeg	545
			Republican	Kansas River	445
Gila	Colorado River	630	Rio Grande	Gulf of Mexico	1,885
Green (Utah-Wyo.)	Colorado River	730			
James (N. Dak.-S. Dak.)	Missouri River	710	St. Francis	Mississippi River	425
Koyukuk	Yukon River	500	Salmon (Idaho)	Snake River	420
			Santee-Wateree-Catawba	Atlantic Ocean	538
Kuskokwim	Kuskokwim Bay	550	Smoky Hill	Kansas River	540
Little Missouri	Missouri River	560			
Marais des Cygnes—Osage	Missouri River	500	Snake	Columbia River	1,038
Milk	Missouri River	625	South Platte	Platte River	424
Mississippi	Mouth of SW Pass	2,348	Susquehanna	Chesapeake Bay	444
Mississippi, Upper	To mouth of Missouri River	1,171	Tanana	Yukon River	800
			Tennessee	Ohio River	652
Mississippi-Missouri-Red Rock	Mouth of SW Pass	3,710	Tennessee-French Broad	Ohio River	862
Missouri	Mississippi River	2,315	Tombigbee	Mobile River	409
Missouri-Red Rock	Mississippi River	2,533	Wabash	Ohio River	475
Mobile-Alabama-Coosa	Mobile Bay	639	Washita	Red River	500

No. 237. Inventory of Public Water Supplies for Community Water Systems: 1961

[Includes only systems serving a population of 25,000 or more. Estimated total number of public water systems in the United States (conterminous area) is 21,000 systems serving a population of approximately 139 million. An estimated 16.0 percent of water used by manufacturing industries is supplied by public water systems]

ITEM	Total	COMMUNITIES HAVING A POPULATION SERVED OF—				
		500,000 or more	250,000 to 499,999	100,000 to 249,999	50,000 to 99,999	25,000 to 49,999
Communities and districts—number	804	40	35	132	225	372

No. 238. Air Pollution—National Air Sampling Levels, Selected Cities: 1962

[Air pollution is defined as the presence in the air of substances put there by the activities of man, in concentrations sufficient to interfere with comfort, safety, or health or with use and enjoyment of property. Data represent values of samples taken nationally on a biweekly basis by the National Air Sampling Network. See text, p. 166]

No. 239. Suspended Particulate Matter Levels, by Urban Population Groups: 1957–62

[**In micrograms per cubic meter.** Based on approximately 18,500 air samples taken in 215 cities. Suspended particulate matter consists of particles of smoke, dust, and fumes and droplets of viscous liquid remaining in the air for varying periods of time and ranging from less than 1 micron (1/25,000 inch) to 100 microns. Benzene-soluble organic matter is particulate matter soluble in benzene]

Population group	Number of cities	Suspended particulate matter			Benzene-soluble organic matter		
		Minimum	Maximum	Arithmetic average	Minimum	Maximum	Arithmetic average
United States	**215**	**6**	**1,706**	**115**	(1)	**123.9**	**9.5**

Section 7

Public Lands, Parks, and Recreation

Statistics in this section relate to the Federal public domain and other Federally owned and leased real property, national parks and forests, State and municipal parks, foreign and domestic travel, and other forms of recreation.

Public lands statistics are published primarily by the Department of the Interior, Bureau of Land Management, in *Public Land Statistics* (formerly *Statistical Appendix to the Annual Report of the Director*). Data on Federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World.* The Economic Research Service of the Department of Agriculture also compiles and issues statistics on land use and land ownership.

The National Park Service of the Department of the Interior publishes information on national parks in its annual report, *Areas Administered by the National Park Service*, and its monthly report, *Public Use, National Parks and Related Areas*; and on State park systems in its annual report, *State Park Statistics*. Data for municipal parks and playgrounds, as well as for other outdoor recreational activities, have been compiled by a private agency, Resources for the Future, Inc., Washington, D.C., and published in *Statistics on Outdoor Recreation* (1958). The Forest Service collects, and issues in its *Annual Report of the Chief*, figures for recreational uses of the national forests. The Fish and Wildlife Service compiles data on hunting and fishing. Figures on expenditures for recreation and on domestic and foreign travel are compiled by the Department of Commerce and appear periodically in the monthly *Survey of Current Business* and in other reports.

Public-domain and acquired lands.—The U.S. Government acquired sovereignty over its present land area through a series of international agreements and treaties, but did not gain title to all of this land by such agreements. At the time of acquisition of U.S. sovereignty over the areas involved (now 2,271 million acres) title to about 463 million acres rested in individual States and their political subdivisions or in private owners, and was not relinquished to the U.S. Government. Title to the remaining land area passed to the U.S. Government. This area, with the exception of lands in the District of Columbia, is known as the original public domain.

Public-domain lands or public lands are those Federally owned lands to which the public land laws apply. In general, these lands include that portion of the original public domain not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be public lands.

In addition to the original public domain, the U.S. Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands, to distinguish them from public-domain lands.

Indian lands.—Indian lands refer to public-domain lands ceded to the Government by Indian tribes on condition that proceeds from their sale or other disposition would be earmarked in the Treasury as in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to

public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 257. Area and Acquisition of the Public Domain: 1781 to 1962

[**In thousands of acres.** Areas are as computed in 1912; hence do not agree with figures in square miles shown in table 226, which includes later adjustments and reflects subsequent remeasurement. See also *Historical Statistics, Colonial Times to 1957*, series J 3–9]

YEAR	Estimated area [1]	YEAR	Estimated area [1]
1802	200,000	1955	411,000
1850	1,200,000	1958	410,000
1880	900,000	1959	771,000
1912	600,000	1960	772,000
1946	413,000	1961	768,000
1950	412,000	1962	771,000

YEAR AND ACQUISITION	Total	Land	Inland water
Aggregate	**1,837,763**	**1,807,682**	**30,081**
1781–1802 (State Cessions)	236,826	233,416	3,410
1803, Louisiana Purchase [2]	529,912	523,446	6,465
1819, Cession from Spain	46,145	43,343	[3] 2,802
Red River Basin [4]	29,602	29,067	535
1846, Oregon Compromise	183,386	180,644	2,742
1848, Mexican Cession [2]	338,681	334,479	4,202
1850, Purchase from Texas	78,927	78,843	84
1853, Gadsden Purchase	18,989	18,962	27
1867, Alaska Purchase	375,296	365,482	9,814

[1] Estimated from imperfect data available for indicated years. Beginning 1959, includes Alaska.
[2] Data for Louisiana Purchase exclude areas eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.
[3] Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public-domain State.
[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase; others maintain it was acquired from Great Britain.

No. 265. Public Lands—Homestead Entries, 1942 to 1963, and Vacant Lands, 1940 to 1963, by States

[Homestead entries for years ending June 30; vacant lands as of June 30. See text, pp. 193 and 194. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry; the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See *Historical Statistics, Colonial Times to 1957*, series J 10, for vacant land excluding Alaska and J 17-18 for homestead entries]

[1] A trip involves one or more members of a household going out of town overnight or going to a place 100 miles or more on a one-day trip. Comprises trips taken for all purposes, including attending school out-of-town.
[2] A traveler is a person on a trip and is counted each time he takes a trip.
[3] Accommodations shown in traveler-night units, defined as the number of nights each person spent on the trip, exclusive of accommodations used by students while attending school out-of-town.

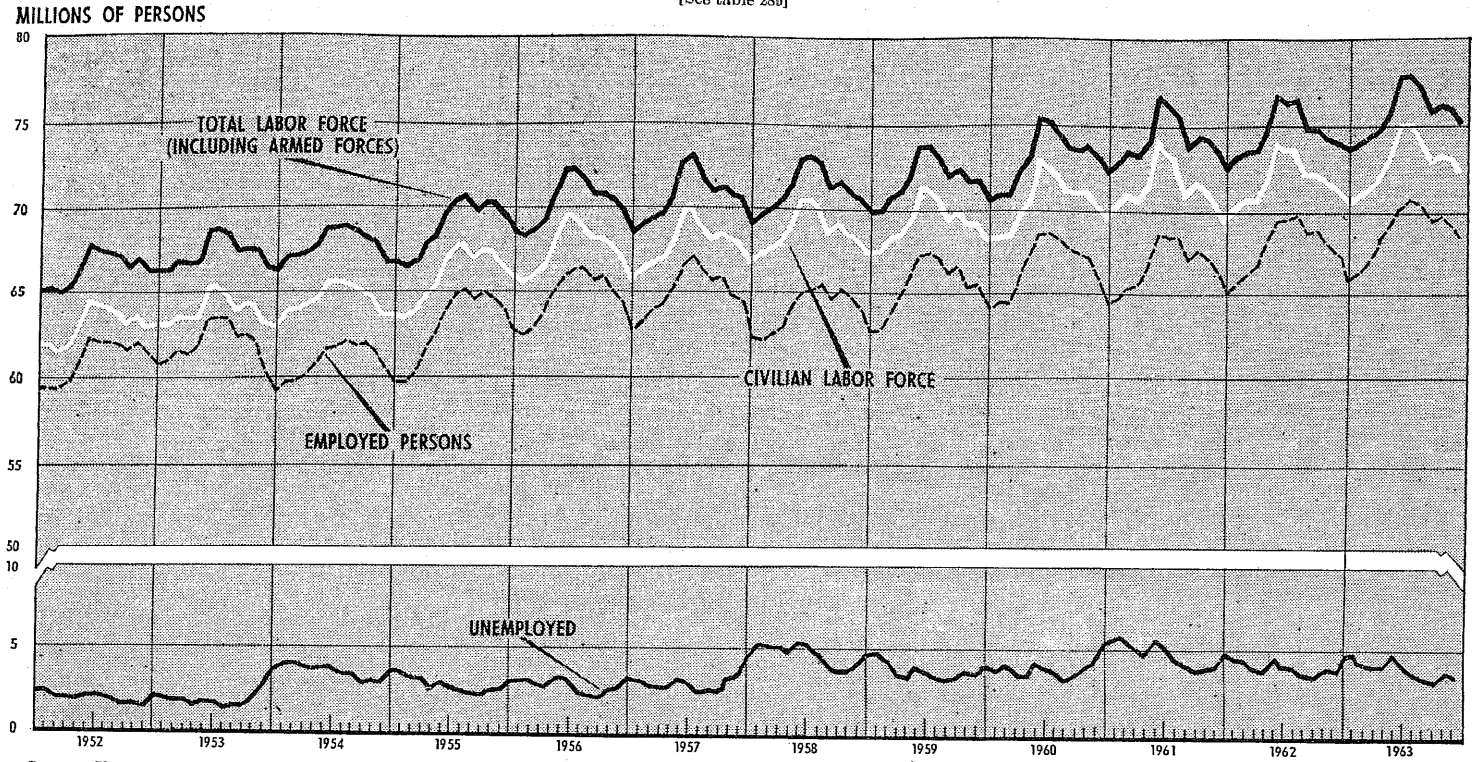
FIG. XIII. TRENDS IN THE LABOR FORCE: 1952 TO 1963

[See table 289]



Source: Chart prepared by Dept. of Commerce, Bureau of Census. Data for 1952–June 1959 are from Bureau of the Census; thereafter, Dept. of Labor, Bureau of Labor Statistics.

Section 8

Labor Force, Employment and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the Decennial Census of Population conducted by the Bureau of the Census (see text, p. 1); *Employment and Earnings*, *Monthly Labor Review*, and *Monthly Report on the Labor Force*, issued by the Bureau of Labor Statistics; and *Farm Labor*, issued monthly by the Statistical Reporting Service, Department of Agriculture.

Types of data.—Statistics shown in this section are of two types. One type is obtained by the "population approach" represented by the Census of Population of the Bureau of the Census and by the monthly labor force survey of the Bureau of Labor Statistics, for which data are collected by the Bureau of the Census as a part of the Current Population Survey (see text, pp. 1 and 215). This approach involves direct enumeration and interrogation to obtain information on employment activity from workers or members of workers' households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period.

The second type of data is obtained by the "establishment approach," represented by the industry surveys of the Bureau of Labor Statistics and the surveys of the Department of Agriculture's Statistical Reporting Service. These data are based on reports from employers, i.e., farms, businesses, or industrial establishments. Such data as wages, hours worked, labor turnover, and industry affiliation of employees can be more accurately obtained from employers' records than from inquiries directed to a worker or a member of his household. Workers appearing on more than one payroll for the same time period are counted more than once in establishment statistics.

The Census of Population provides detailed data for the United States and for each State, city, and other area. It includes personal characteristics (sex, age, race, etc.) of the numbers employed and unemployed, the numbers reported in each occupation and industry, and other items. The labor force survey provides current data published in Employment and Earnings and in related publications series of the Bureau of Labor Statistics. Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industries and in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupation groups of those employed and duration of unemployment of those unemployed.

In addition, the Bureau of Labor Statistics, in *Employment and Earnings*, provides detailed monthly data on employment, unemployment, labor turnover, earnings, and hours. These data are shown for broad groupings in the *Monthly Labor Review*, which also presents statistics on wage rates, industrial relations, and output per man-hour. Certain of these data are shown for States and large cities. Historical statistics are shown in the Bureau of Labor Statistics Bulletin No. 1312–1, *Employment and Earnings Statistics for the United States, 1909–62*, and in No. 1370, *Employment and Earnings Statistics for States and Areas, 1939–62*.

Labor force.—The labor force data published by the Bureau of Labor Statistics and by the Bureau of the Census include persons 14 years old and over who were employed, unemployed, or in the Armed Forces during a specified week. Employed persons include those who did any work for pay or profit during the week, worked without pay for 15 hours or more in a family enterprise (farm or business), or did not work or look for work but had a job or business from which they were temporarily absent during the week. Unemployed persons comprise those who did not work at all during the week but were looking for work or were on layoff from a job.

In the 1960 Census, the labor force data relate to the first or second week of April for the majority of the population. "Experienced civilian labor force" refers to all employed workers and unemployed workers with previous work experience.

Employment and earnings.—The monthly estimates of nonagricultural employment prepared by the Bureau of Labor Statistics are based on voluntary reports from establishments which employed 11 million manufacturing workers in March 1962 (65 percent of total manufacturing employment at that time) and 8 million workers in nonmanufacturing industries except Government (27 percent of the total in nonmanufacturing industries). These reports are supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Government social insurance programs. The monthly estimates exclude persons not normally on establishment payrolls, such as proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and persons in the Armed Forces. The employment data are for all employees, whether full- or part-time, who received pay for any part of the period reported.

Estimates are available on a continuous basis from 1919 for total nonfarm payroll employment and the 8 major industry divisions. Estimates for other periods are available for several hundred selected industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 240 manufacturing subgroups, and 10 mining industries. Also, estimates for nonsupervisory workers are published for individual wholesale trade, retail trade, public utility, and some finance and service industries; estimates for construction workers are published for the contract construction industries; and 335 series are published for the employment of women.

Average weekly hours and average weekly and hourly earnings are available for production and related workers for over 320 series in manufacturing; in mining, laundries, and cleaning and dyeing industries; and for nonsupervisory employees and working supervisors in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*.

Output per man-hour.—The Bureau of Labor Statistics prepares and publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production; the second, net output per man-hour, with the relationship between value added (at fixed prices) and man-hours. Both indexes measure the relationship between production and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor do they measure increased efficiency resulting from technological changes or changes in production procedures.

The indexes of output per man-hour for selected industries are based on the physical output per man-hour concept; measurements relating to the total economy and various sectors are based on the net output per man-hour concept. These indexes are influenced by the divergent movements of various industries which make up the total, as well as by changes in the relative importance of these components.

Labor turnover.—Labor turnover rates are published monthly in the *Monthly Labor Review* and in *Employment and Earnings* for over 220 industries on the basis of reports from cooperating establishments employing almost 9 million workers (about 51 percent of the universe surveyed). Labor turnover data are available on a monthly

basis from January 1930 for manufacturing as a whole. Labor turnover rates for individual industries and industry groups are available on a continuous basis only from January 1958.

Work stoppages.—The basic measures of strike statistics compiled by the Bureau of Labor Statistics are the number of stoppages, of workers involved, and of man-days of idleness. Basic statistical data are obtained from the employers and unions involved. Knowledge of strikes comes from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau prepares annual reports published in the *Monthly Labor Review* and, later, in bulletin form, giving total figures for each month of the year and analyses of strikes by industry, State, city, causes, and other pertinent classifications.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

Technical Note—Current Population Survey

Source of data.—The Current Population Survey is a monthly sample survey conducted by the Bureau of the Census. Monthly data on the labor force are collected and compiled for the Bureau of Labor Statistics as a part of the Current Population Survey. The current sample design is spread over 357 areas comprising 701 counties and independent cities, with coverage in each of the 50 States and the District of Columbia. Approximately 35,000 households are interviewed each month. Another 1,500 occupied dwelling units, on the average, are visited but interviews are not obtained because the occupants are not found at home after repeated calls or are unavailable for some other reason. There are also about 5,500 sample units in an average month which are visited but are found to be vacant or otherwise not to be enumerated. Data on the Armed Forces are obtained from the Department of Defense.

Reliability of the estimates.—According to current computations, the relative sampling error for summary estimates such as civilian labor force, total employment, and nonagricultural employment is about 0.4 percent; for agricultural employment and for unemployment, it is roughly 3 to 4 percent. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than 2½ times the percentage.

The sampling variability indicated above is illustrative of the variability of data based on the Current Population Survey. For further details on the sampling variability, see the original releases of the Bureau of the Census and explanatory notes in the Bureau of Labor Statistics *Employment and Earnings*.

Comparability with Decennial Population Census data.—Statistics obtained from the Current Population Survey may differ from Decennial Census data because of sampling variability, as described above. In addition, comparability between the two sets of data may be affected by other factors, such as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U.S. Census of Population: 1960*, Vol. I.

No. 289. Employment Status of the Noninstitutional Population, by Sex and Color: 1940 to 1964

[**In thousands of persons 14 years old and over, except percent.** Beginning 1960, includes Alaska and Hawaii. Annual figures are averages of monthly figures. Data for 1947–1956 adjusted to reflect changes in definition of employment and unemployment adopted in January 1957. Beginning 1955, labor force and employment figures not strictly comparable with previous years as a result of introduction into estimating procedure of 1950 Census data through March 1962 and of 1960 Census data thereafter. See *Historical Statistics, Colonial Times to 1957*, series D 1–14 and D 20, for similar but not exactly comparable data]

No. 298. Employees in Nonagricultural Establishments—Annual Averages, by Industry: 1940 to 1964

[In thousands. Beginning 1959, includes Alaska and Hawaii. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, self-employed persons, farm workers, unpaid family workers, domestic servants, and personnel of Armed Forces. Data are adjusted to March 1962 benchmark levels indicated by data from Government social insurance programs. See also *Historical Statistics, Colonial Times to 1957*, series D 48-56]

No. 302. Marital Status of Women in the Civilian Labor Force: 1940 to 1963

[In thousands of persons 14 years old and over, except percent. Beginning 1960, includes Alaska and Hawaii. Includes institutional population. Figures for 1940 based on complete census revised for comparability with intercensal series. Data for 1944–1963 based on Current Population Survey; see Technical Note, p. 215. Beginning 1953, figures not strictly comparable with previous years as a result of introduction into estimating procedure of 1950 Census data through 1961 and of 1960 Census data beginning March 1962. See table 29. See also *Historical Statistics, Colonial Times to 1957*, series D 33-35]

No. 308. Experienced Civilian Labor Force, by Sex and Occupation, 1950 and 1960, and by Selected Characteristics, 1960—Continued

[Covers persons 14 years old and over]

Sex and occupation	1950	1960				
		Total	Nonwhite		Median earnings, 1959	Median age of employed
			Number	Percent		
Female—Continued						
Private household workers	1,413,689	1,759,804	958,875	54.5	$684	44.8
Private household workers—living in	204,100	159,679	42,175	26.4	1,178	51.6
Private household workers—living out	[7] 1,209,589	1,600,125	916,700	57.3	658	44.2
Service workers, exc. private household	2,014,857	3,020,193	590,053	19.5	1,385	41.7
Attendants, hospital and other institution	125,173	300,979	73,254	24.3	1,840	39.6
Charwomen, janitors, and porters	[4] 133,724	213,267	56,650	26.6	1,332	48.8
Cooks, except private household	252,412	381,078	89,688	23.5	1,337	47.5
Hairdressers and cosmetologists	194,474	271,623	34,482	12.7	1,993	39.5
Housekeepers and stewards, exc. private household	85,291	121,811	12,775	10.5	2,118	51.3
Practical nurses and midwives	140,439	208,267	35,788	17.2	1,839	48.5
Waiters, bartenders, and counter workers	649,551	916,976	69,728	7.6	1,055	35.4
Other service workers, exc. private household	433,793	606,192	217,688	35.9	1,207	43.4
Farm laborers and foremen	469,000	269,697	91,390	33.9	602	40.0
Farm laborers:						
Unpaid family workers	320,543	125,392	15,890	12.7	624	42.9
Exc. unpaid, and farm foremen	148,457	144,305	75,500	52.3	600	36.4
Laborers, except farm and mine	139,849	125,049	30,003	24.0	1,872	39.1
Occupation not reported	462,006	1,297,693	238,281	18.4	2,187	39.7

[1] Exact median not available. [2] Includes group workers.
[3] Includes tractor drivers. [4] Includes sextons.
[5] Includes constables, detectives, and bailiffs. [6] Includes underwriters.
[7] Includes all baby sitters, whether living in or living out.

No. 310. Indexes of Output, Payments, and Prices in the Private Economy and the Nonfarm Sector: 1947 to 1963

[1957–59=100. Beginning 1960, includes Alaska and Hawaii. In addition to wages and salaries of employees, labor payments include such supplements as employer contributions to social security, private insurance and pension funds, compensation for injuries, and other minor items of labor income. Nonlabor payments are derived as the difference between labor payments and gross national product in current dollars]

ITEM	1947	1950	1955	1960	1961	1962	1963 (prel.)
Output per man-hour:							
Total private economy:							
Output per man-hour—all persons	70.9	80.9	93.8	105.2	108.7	112.9	116.8
Output per man-hour—employees	75.6	84.6	95.0	103.9	107.1	110.7	113.0
Private nonfarm sector:							
Output per man-hour—all persons	76.3	85.1	95.3	104.6	107.6	111.7	115.0
Output per man-hour—employees	75.8	84.7	94.9	104.4	107.4	111.1	113.4
Compensation per man-hour:							
Total private economy:							
Compensation per employee man-hour	55.8	65.8	85.5	108.0	111.6	115.9	119.7
Real compensation per employee man-hour	71.7	78.5	91.6	104.8	107.1	110.0	112.2
Private nonfarm sector:							
Compensation per employee man-hour	55.9	66.1	85.7	108.4	111.7	116.0	119.6
Real compensation per employee man-hour	71.9	78.9	91.9	105.1	107.2	110.1	112.1
Prices and costs:							
Private nonfarm sector:							
Payments per unit of output (implicit prices)	73.7	80.6	92.2	102.9	103.9	104.7	106.0
Employee compensation per unit of output	73.7	78.0	90.4	103.8	104.0	104.4	105.5
Nonlabor payments per unit of output	73.7	83.9	94.5	101.8	103.7	104.9	106.8
Underlying data:							
Total private economy:							
Product in constant dollars	68.4	77.3	95.0	106.8	108.6	115.3	120.0
Product in current dollars	52.4	63.6	87.6	109.7	112.6	120.6	126.9
Man-hours of all persons	96.5	95.6	101.3	101.5	99.9	102.1	102.7
Man-hours of employees	90.5	91.4	100.0	102.8	101.4	104.2	106.2
Compensation of employees in current dollars	50.5	60.1	85.5	111.0	113.2	120.8	127.1
Wages and salaries of employees in current dollars	51.9	61.2	86.3	110.1	112.2	119.3	125.1
Private nonfarm sector:							
Product in constant dollars	67.7	76.4	94.5	106.9	108.8	115.9	120.7
Product in current dollars	49.9	61.6	87.1	110.0	113.0	121.3	128.0
Man-hours of all persons	88.7	89.8	99.2	102.2	101.1	103.8	105.0
Man-hours of employees	89.3	90.2	99.6	102.4	101.3	104.3	106.4
Compensation of employees in current dollars	49.9	59.6	85.4	111.0	113.2	121.0	127.3
Wages and salaries of employees in current dollars	51.2	60.8	86.2	110.1	112.2	119.5	125.3
Nonlabor payments in current dollars	49.9	64.1	89.3	108.8	112.8	121.6	128.9
Consumer price index	77.8	83.8	93.3	103.1	104.2	105.4	106.7

No. 311. Indexes of Real Product Per Man-Hour for the Private Economy: 1947 to 1963

[1957–59=100. Beginning 1960, includes Alaska and Hawaii. Covers wage and salary workers, self-employed, and unpaid family workers. Man-hour estimates based primarily on data from reports specified; see text, p. 213. See *Historical Statistics, Colonial Times to 1957*, series W 9–11, for indexes on a 1947–49 base]

YEAR	BASED ON ESTABLISHMENT REPORTS					BASED ON LABOR FORCE REPORTS		
	Total	Agriculture	Nonagricultural industries			Total	Agriculture	Nonagricultural industries
			Total	Manufacturing	Nonmanufacturing			
1947	70.9	50.2	76.3	74.8	76.8	68.5	50.2	73.8
1950	80.9	64.7	85.1	83.7	85.6	77.5	64.5	81.4
1952	84.7	69.9	87.6	86.4	87.9	83.7	69.4	86.7
1953	88.2	77.8	90.0	90.6	89.0	87.5	77.3	89.5
1954	89.8	83.4	91.4	89.8	92.0	89.7	83.0	91.5
1955	93.8	86.4	95.3	96.0	94.6	94.1	85.9	95.8
1956	93.9	88.3	94.9	97.1	93.4	94.4	87.8	95.7
1957	97.2	94.2	97.6	97.3	97.6	97.5	94.2	98.0
1958	99.6	103.0	99.4	99.1	99.8	99.1	103.1	98.8
1959	103.2	102.8	103.0	103.7	102.6	103.4	102.7	103.2
1960	105.2	109.3	104.6	(1)	(1)	104.8	109.3	104.1
1961	108.7	115.8	107.6	(1)	(1)	107.4	116.3	106.0
1962	112.9	119.7	111.7	(1)	(1)	112.1	119.9	110.6
1963 (prel.)	116.8	128.5	115.0	(1)	(1)	115.8	128.8	113.5

[1] Since the output data on which the manufacturing estimates are based are being substantially revised by Dept. of Commerce, Dept. of Labor considers it misleading to continue to publish the manufacturing (and nonmanufacturing) indexes previously released. Revised indexes will be published in mid-1964 when all revised production data will be available.

Source of tables 310 and 311: Dept. of Labor, Bureau of Labor Statistics; periodic releases.

No. 312. Indexes of Output Per Man-Hour—Production Workers, Selected Industries: 1939 to 1961

[1957–59=100. Beginning 1959, includes Alaska and Hawaii. See also *Historical Statistics, Colonial Times to 1957*, series W 13–32 and W 44, for indexes on a 1947 base]

INDUSTRY	1939	1947	1950	1955	1957	1958	1959	1960	1961
NONMANUFACTURING									
Coal mining [1 2 3]	48.4	54.3	61.4	87.4	92.6	103.0	107.1	116.2	131.3

n.a. Not available.
[1] Includes anthracite and bituminous coal. [2] Production-worker-hours paid.
[3] Adjusted to levels indicated by 1939, 1954, and 1958 Censuses of Mineral Industries.
[4] Class I line-haul railroads; in terms of hours worked plus constructive allowances, hourly basis employees.
[5] Adjusted to levels indicated by 1947, 1954, and 1958 Censuses of Manufactures.
[6] Not comparable to index for basic steel due to changes in Standard Industrial Classification.
[7] Production-worker-hours paid prior to 1947, and hours worked thereafter.
[8] Production-worker-hours worked.
[9] Adjusted to levels indicated by 1947 and 1954 Censuses of Manufactures.

No. 313. Production Workers in Manufacturing Industries—Number, Weekly and Hourly Earnings, and Weekly Hours: 1940 to 1964

[Beginning 1959, includes Alaska and Hawaii. Workers include all full- and part-time employees who worked during, or received pay for, any part of pay period including 12th of month; data adjusted to March 1962 benchmark levels indicated by data from Government social insurance programs. Net spendable average weekly earnings represent average gross earnings less social security and income taxes for which specified worker is liable. Net spendable earnings then divided by BLS consumers price index, adjusted to average 1957–59 base, to obtain net spendable earnings in 1957–59 dollars. Overtime defined as work in excess of either straight-time workday or workweek and paid for at time and one-half. Computation of average hourly earnings exclusive of overtime makes no allowance for special rates of pay for work on holidays. See also *Historical Statistics, Colonial Times to 1957*, series D 626–628]

YEAR	Workers, annual average (1,000)	Gross average weekly earnings	NET SPENDABLE AVERAGE WEEKLY EARNINGS				Average weekly hours	AVERAGE HOURLY EARNINGS	
			Worker with no dependents		Worker with 3 dependents			Gross	Excluding overtime
			Current dollars	1957–59 dollars	Current dollars	1957–59 dollars

No. 314. Production Workers—Hours and Gross Earnings, by Industry: 1960, 1962, and 1963

[Includes Alaska and Hawaii. Data based on reports from cooperating establishments covering both full- and part-time employees who worked during, or received pay for, any part of the pay period ending nearest the 15th of the month. For mining, manufacturing, laundries, and cleaning and dyeing plants, data refer to production and related workers only; for contract construction industries, to employees engaged in actual construction work; for other industries, to nonsupervisory employees and working supervisors. See also *Historical Statistics, Colonial Times to 1957*, series D 626-641 and D 669-684, for selected industries]

INDUSTRY	AVERAGE WEEKLY EARNINGS			AVERAGE WEEKLY HOURS			AVERAGE HOURLY EARNINGS		
	1960	1962	1963	1960	1962	1963	1960	1962	1963
Mining	$105.44	$110.70	$114.40	40.4	41.0	41.6	$2.61	$2.70	$2.75
Metal mining	111.19	117.45	118.66	41.8	41.5	41.2	2.66	2.83	2.88

No. 318. Percent of Workers Employed in Establishments Having Formal Provisions for Selected Supplementary Wage Benefits, 212 SMSA's: 1963

[Surveys relate geographically to the 212 standard metropolitan statistical areas in the United States, including Alaska and Hawaii, as established by the Bureau of the Budget through 1961. Based on occupational wage surveys conducted in 80 areas, selected to represent the 212 areas. Information on establishment practices is obtained annually in 6 of the largest areas. In the other areas, it is obtained biennially in a rotating cycle. Data for a majority of the workers relate to late 1962 and early 1963; for the remainder, to late 1961 and early 1962. Data obtained from sample of establishments which employ 50 workers or more, except in 12 of the largest areas where the minimum size was 100 employees for manufacturing, public utilities, and retail trade; see source. Excludes data for government institutions, and construction and extractive industries. Excludes administrative, executive, and professional employees]

Type of benefit	Office workers	Plant workers	Type of benefit	Office workers	Plant workers
Paid holidays: [1]			Paid vacations [2]—Con.		
Under 6 days	5	12	4 weeks or more	n.a.	n.a.
6 or more days	95	88	After 20 years of service	19	16

1964, April 1	6,098	4,680	1,418	158	206	6.50	7.10	121

[1] Data are arithmetic means of monthly estimates of persons employed during last full calendar week in each month.
[2] Includes farm operators doing 1 or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.
[3] Includes all persons doing 1 or more hours of farm work for pay during survey week. Members of operators' families doing any farm work for cash wages are counted as hired workers.
[4] Weighted averages of wage rates as reported quarterly by crop reporters.

No. 323. Farm Workers Covered by Old-Age, Survivors, and Disability Insurance—Taxable Earnings: 1955 to 1962

[Includes Alaska, Hawaii, Puerto Rico, and Virgin Islands. Based on earnings reports filed under the farm coverage provisions of the Social Security Act]

ITEM	1955	1957	1958	1959	1960	1961	1962
HIRED FARM WORKERS [1]							
Number....1,000	1,920	1,880	1,880	1,890	1,910	1,940	1,945
Taxable wages....mil. dol.	1,530	1,690	1,750	1,880	1,970	2,050	2,125
Average per worker	$795	$906	$930	$995	$1,030	$1,055	$1,090
SELF-EMPLOYED FARMERS [2]							
Number....1,000	2,350	2,430	2,410	2,240	2,160	2,140	2,060
Taxable self-employment income....mil. dol.	3,890	4,480	4,740	4,400	4,330	4,570	4,460
Average per farmer	$1,655	$1,845	$1,965	$1,965	$2,005	$2,140	$2,170

[1] For 1955, represents workers receiving at least $100 cash farm wages; beginning 1957, at least $150 wages, or employed 20 days or more on a time-paid basis. Maximum taxable wages: $4,200 for 1955-1958, $4,800 beginning 1959. Adjusted to eliminate duplication of workers reported by two or more employers.
[2] Represents farmers with net self-employment earnings of at least $400.

Source: Dept. of Health, Education, and Welfare, Social Security Administration; *Social Security Farm Statistics, 1955-1959*, and unpublished data.

No. 324. Farm Wage Rates—Geographic Divisions: 1950 to 1963

[Excludes Alaska and Hawaii. Annual average. Some wage rates in certain geographic divisions not obtained because seldom used; U.S. rates include estimates for these divisions]

No. 325. Indexes of Union Wage Rates and Weekly Hours in Selected Trades: 1945 to 1963

[1957-59=100. Excludes Alaska and Hawaii. As of July 1, except that 1950 data for local transit operators are as of October 1. For 1945 to 1961, covers 53 cities in printing and 52 in the other trades; for 1962, 54 cities in printing and 53 in the other trades; for 1963, 62 cities in printing and 61 in the other trades. Indexes of rates reflect changes in minimum hourly wage scales; indexes of hours reflect changes in the negotiated straight-time weekly hours. Year-to-year changes in union scales are based on comparable quotations for each individual trade weighted by membership for current year. See *Historical Statistics, Colonial Times to 1957*, series D 642-653, for printing on 1948-49 base and other trades on 1947-49 base]

No. 326. Monthly Labor Turnover Rates Per 100 Employees in Manufacturing Industries: 1955 to 1963

[Beginning 1960, includes Alaska and Hawaii. Data refer to wage and salary workers. Beginning 1959, transfers between establishments of the same firm are included in total accessions and total separations; therefore, rates for these items are not strictly comparable with prior data. For annual rates, see also *Historical Statistics, Colonial Times to 1957*, series D 779-784]

TYPE AND YEAR	Annual average	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Total accessions: [1]													
1955	4.5	3.8	3.7	4.2	4.2	4.5	5.3	4.5	5.8	5.5	5.0	4.0	2.9

No. 327. Injury-Frequency Rates, 1950 to 1959, and Severity Measures, 1959, for Selected Industries

[Excludes Alaska and Hawaii. Frequency rate is average number of disabling work injuries, and severity rate is average number of days disability, per one million employee-hours worked. "New series" data are on basis of Standard Industrial Classification as revised in 1957. See also *Historical Statistics, Colonial Times to 1957*, series D 785, for injury-frequency rates for manufacturing on old basis]

Industry	Injury-frequency rates				Severity measures, 1959				
	Old series		New series		Percent of injuries resulting in—			Average days of disability per case	Severity rate
	1950	1958	1958	1959	Death	Permanent impairment	Temporary total disability		
Manufacturing	14.7	10.9	11.4	12.4	0.3	5.7	94.0	57	752

[1] Workers counted more than once if involved in more than 1 stoppage during year.

[2] Total employed workers for 1940–1950 refers to all workers except those in occupations and professions in which there is little if any union organization or in which stoppages rarely if ever occur. In 1951, concept was changed, to coincide with the Bureau of Labor Statistics figures for nonagricultural employment, excluding Government but including workers in all occupational groups. Tests show that percentage of total idleness computed on basis of these new figures usually differs by less than one-tenth of a point, while percentage of workers idle differs by about 0.5 or 0.6 of a point.

[3] Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

Section 9

National Defense and Veterans Affairs

This section presents statistics on national defense and its human and financial costs; military personnel, ships, and aircraft; Selective Service operations; and various Federally sponsored programs and benefits for veterans. The principal sources of these data are the Office of the Secretary of Defense; annual reports of the Departments of the Army, Navy, and Air Force; the Selective Service System; *Annual Report of the Administrator of Veterans Affairs*, Veterans Administration; and *Budget of the United States Government*, Bureau of the Budget. Data on veterans also appear in reports of the Census of Population, conducted by the Bureau of the Census.

Department of Defense.—Until 1947, the Army, Navy, and Air Force operated under independent jurisdiction, answering only to the Commander-in-Chief, the President of the United States. In 1947, passage of the National Security Act resulted in the National Military Establishment, organized to provide for the coordination and unified direction of the Army, Navy, and Air Force under a civilian Secretary of Defense. The three services remained separately administered, however, and each retained its Department status. Amendments to the Act in 1949 redesignated the National Military Establishment as the Department of Defense.

Selective Service.—The Selective Service System is responsible for the registration, classification, selection, forwarding for examination, and delivery for induction into the Armed Forces of all men required to register under the Universal Military and Training Act, as amended. The act requires all men in the United States between the ages of 18 and 26 to register, and makes those between 18½ and 26 years old liable for service in the Armed Forces. It also provides exemptions from service or deferments for reasons of previous service, essential occupation, etc. Deferred persons remain liable for service until they reach 35 years of age. Selective Service is also authorized to determine availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency.

Veterans Administration.—The Veterans Administration administers laws authorizing benefits for eligible former and present members, and for the beneficiaries of deceased former members of the Armed Forces. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; U.S. Government and National Service Life Insurance; hospitalization; domiciliary care; nursing home care; out-patient medical and dental care for service-connected disability; prosthetic and other appliances; special housing and automobiles or other conveyances for certain disabled veterans; burial allowances; and educational assistance to war orphans.

Estimates of veterans in civil life as published by the Veterans Administration generally cover all persons with war service and include those living outside the United States. Similar data from the Bureau of the Census relate to civilian males, 14 years old and over, who live in the United States and who have served in the Armed Forces, whether in war or peacetime.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 336. Federal Administrative Budget Expenditures for National Defense Functions and Veterans Benefits and Services: 1930 to 1965

[**In millions of dollars, except percent.** For year s ending June 30. Includes expenditures of Department of Defense, Veterans Administration, and other agencies for activities *primarily* related to national defense and veterans programs. Excludes expenditures for programs which, though closely related to national defense or veterans services, have a primary relationship to other categories of the functional classification (see table 523). Functional classification revisions for national defense have been carried back through 1939. For further detail as to classification of particular items in 1963, 1964, and 1965, see *Budget of the United States Government, 1965*, pp. 132-144 and 150-309. See also *Historical Statistics, Colonial Times to 1957*, series Y 357-358 and Y 360]

[1] Includes awards since Jan. 1, 1962, for certain common supplies for which procurement responsibility was transferred from the military departments.
[2] Covers Defense Communications Agency, Office of Civil Defense, and Office of the Secretary of Defense, for which data first became available in 1963. [3] Includes Alaska, Hawaii, Puerto Rico, and outlying areas.
[4] Covers firms not dominant in their fields of operation and generally employing fewer than 500 persons; in some cases, firms with less than 750 employees, or with less than 1,000. For certain types of firms, other criteria are used, such as yearly gross sales. Criteria are promulgated by Small Business Administration and changed from time to time. [5] Covers all awards for work to be performed in foreign countries.
[6] Through 1962, covers purchases from other Federal agencies and also interservice purchases placed by one military service, bureau, or command against contracts executed by other military services, bureaus, or commands. Effective 1963, covers only purchases from other Federal agencies.

No. 341. Civil Defense—Federal Matching Funds Obligated, and State and Local Government Expenditures: 1952 to 1963

[**In thousands of dollars.** For fiscal years ending in year stated. Federal funds are obligated from a specified appropriation, not necessarily in a given fiscal year, and are made available to help State and local governments acquire civil defense emergency operating centers, survival supplies, equipment and training; and for personnel and administrative expenses. Federal contributions made on basis of applications submitted by States and approved by Department of Defense, Office of Civil Defense and predecessor civil defense organizations. States and outlying areas are required to match Federal funds on an equal basis, except that for 1952 to 1957, the matching ratio for Alaska was 70 percent Federal and 30 percent local]

ITEM	1952 to 1963, total	1952 to 1959	1960	1961	1962	1963

[1] Based on National Fallout Shelter Survey.
[2] Facility owner has signed fallout shelter license which permits use of facility as a public shelter.
[3] Official fallout shelter sign posted on facility.
[4] Survival items (food, water, sanitation, and medical supplies) placed in shelters.
[5] Number of spaces accommodated by supplies; not total capacity of facilities stocked.

No. 343. Military Assistance Program—Value of Programs and Deliveries, by Area and Country: 1950 to 1964

[**In millions of dollars.** For years ending June 30. Programs and deliveries are military equipment, supplies, and services planned for delivery and actually delivered. Includes (*a*)equipment and supplies procured for the Military Assistance Program or from procurement or stocks of military departments; (*b*) services, such as training, military construction, repair and rehabilitation of excess stocks, supply operations, and other charges, the delivery of which is included on the basis of the expenditure for the service; and (*c*) purchases of military equipment and supplies initially credit financed with MAP funds. The fact that there is a military assistance program for a country is not to be construed as a commitment of the United States]

n.a. Not available.
[1] Union forces only. Estimates of the number serving in the Confederate forces range from 600,000 to 1,500,000.
[2] Covers period Dec. 1, 1941, to Dec. 31, 1946.
[3] Covers period June 25, 1950, to July 27, 1953.
[4] Covers period Apr. 21 to Aug. 13, 1898.
[5] Includes Air service.
[6] Includes Army Air Corps.
[7] Based on Army and Marines only.
[8] Excludes Navy. See footnote 9.
[9] Covers period July 1950 through January 1955. Represents Far East area only.
[10] During hostilities only.
[11] Covers war personnel who departed from conterminous U.S. through December 1898.
[12] For periods covered, see footnotes 2, 3, 4, and 9.
[13] Includes gassed in action. Army data include casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920; Marine data represent casualties in Europe only.
[14] Excludes personnel lost in sinking of the *Maine*, which occurred 2 months before hostilities.
[15] Includes casualties incurred in October 1941, due to hostile action.
[16] Covers only Army personnel base of 1,908,800.
[17] Covers only Army personnel base of 246,410.
[18] Covers only Army personnel base of 3,665,000.
[19] Covers all services base of 9,370,986.
[20] Covers all services base of 4,428,939.

Disqualified	2,761	37.7	116	44.9	239	44.7	153	49.8	266	50.0
Medically disqualified only	1,288	17.6	57	22.1	110	20.6	70	22.7	128	24.0
Failed mental test only[2]	1,157	15.8	49	18.8	108	20.1	66	21.5	115	21.6
Failed mental test and medically disqualified	226	3.1	7	2.9	15	2.9	9	3.0	16	3.1
Administratively disqualified	90	1.2	3	1.1	6	1.1	8	2.6	7	1.3

[1] 1950 data are for July through December only.
[2] Since August 1958, includes medically and administratively qualified draftees who failed the mental tests (Mental Group V), as well as those in Mental Group IV (numbering 47,000 draftees in 1963) who failed the Army Classification Battery (ACB), or, since mid-September 1961, the equivalent Army Qualification Battery (AQB).

No. 357. Selective Service Draftees Found Acceptable for Military Service—Percent Distribution, by Mental Group: 1956 to 1963

[Includes Alaska, Hawaii, and outlying areas]

Mental group and percentile score	1956	1957	1958	1959	1960	1961	1962	1963
Group I (93-100)	12.3	13.3	14.6	16.5	14.3	10.3	10.2	9.9
Group II (65-92)	27.0	25.9	27.2	28.4	31.9	32.2	32.1	34.1
Group III (31-64)	32.6	32.8	33.8	34.7	34.5	34.5	33.8	38.0
Group IV (10-30)[1]	27.5	27.7	24.2	20.1	19.0	22.5	23.2	16.6
Administrative acceptees[2]	0.6	0.3	0.2	0.3	0.3	0.5	0.7	1.4

[1] Since August 1958, includes only draftees in Mental Group IV who passed Army Classification Battery (ACB), or, since mid-September 1961, equivalent Army Qualification Battery (AQB). See footnote 2, table 356.
[2] Refers to draftees who failed the mental test or ACB (or AQB), but who were administratively declared acceptable on the basis of their education and findings of a personal interview.

[1] Under amendments of June 19, 1951, to Universal Military Training and Service Act, age of military liability was extended to 35 years for certain specified kinds of registrants.

[2] Legally exempted registrants; no longer liable for service because of age. See also footnote 1.

[3] Cumulative since inception of Universal Military Training and Service Act, as amended, September 1948.

[4] Includes enlistments and deferments between time of preinduction examination and notice of induction.

[5] Cumulative net credits resulting from inductions plus home address reports minus separation reports, as reported by the Armed Forces September 1948 through June 1963. Each State is credited with its inductions as well as its enlistments and reserves called to active duty. Because of time lag in reporting to local boards, credits given are not necessarily in complete accord with present strength of Armed Forces contributed by each State.

[6] Comprises trained reservists who are not in either the ready or the retired reserve, but who are liable for recall to active duty in time of war or national emergency.

No. 360. Estimated Number of Veterans, by Period of Service: 1945 to 1963

[**In thousands.** As of June 30. Excludes persons who served only in peacetime (Regular Establishment) unless they were receiving VA compensation for service-connected disability. A small number of veterans of two or more periods prior to the Korean conflict are included more than once. Veterans of both World War II and the Korean conflict are counted only once. See also *Historical Statistics, Colonial Times to 1957*, series Y 776-786]

PERIOD OF SERVICE	1945	1950	1955	1959	1960	1961	1962	1963

[1] Excludes transfers from appropriations to insurance trust funds from which the actual payments are made. Expenditures from VA Revolving Supply Fund also excluded to avoid duplication.

[2] Includes direct payments to beneficiaries from insurance appropriations, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Some noncash transactions, e.g., interest credited to dividends left on deposit also included.

[3] Includes education and training allowances under Public Laws 346 and 550, and war orphans educational assistance under Public Law 634.

[4] Includes subsistence allowances, tuition, supplies, and equipment of veterans training under Public Laws 16 and 894, and vocational rehabilitation allowances for World War I veterans.

[5] Total differs from supporting detail by the net of overpayments collected and written off as uncollectable under the readjustment benefits appropriation amounting to $1,140,000 in 1956, $647,000 in 1957, $260,000 in 1958, $54,000 in 1959, $198,000 in 1960, $321,000 in 1961, $136,000 in 1962, and $459,000 in 1963.

[6] Less than $500,000. [7] Credit.

[8] Credit of less than $500,000.

[9] Includes statutory burial allowances; automobiles and other conveyances for disabled veterans; homes for paraplegics; payments to participants in yellow fever experiments; military and naval family allowances of World War I veterans; marine and seamen's insurance in World War I; adjusted compensation (World War I bonus); withdrawals of the personal funds of patients held by VA as banker and funds due incompetent beneficiaries; soldiers' and sailors' civil relief; vocational rehabilitation revolving fund, and other miscellaneous expenditures.

[10] Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

[11] Comprises construction and related costs which include expenditures from funds allotted under NRA of 1933, PWA Act of 1938, grants to Republic of Philippines for construction and equipping of a hospital, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

[12] Includes expenses for vocational counseling, travel for certain programs, reporting allowances paid schools for certifying attendance of veteran trainees, private laws for relief, and all administrative salaries and expenses.

No. 369. U.S. Government Life Insurance and National Service Life Insurance Policies in Force, by Plan: 1963

[Money figures in thousands of dollars. As of June 30. Includes data for all veterans, regardless of place of residence. Veterans Administration operates two insurance programs: (*a*) U.S. Government life insurance for veterans of World War I; and (*b*) national service life insurance for veterans of World War II and later. These two programs are segregated and administered separately in all particulars. See also *Historical Statistics, Colonial Times to 1957*, series Y 851-852]

Paid-up insurance	3,261	8,239	3,231	5,928	5	7	14	18	8	4

[1] Fund is administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from the fund for death claims, dividends, and other benefits. Government, however, bears cost of administration of this fund in addition to expenses for certain types of losses.

[2] Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between October 8, 1940, and September 2, 1945.

[3] For veterans discharged on or after April 25, 1951, with service-connected disability which would be compensable if 10 percent or more in degree, but who are otherwise insurable.

[4] Veterans who are entitled to indemnity protection under the Servicemen's Indemnity Act of 1951 and who were separated from active service without a service-connected disability after Apr. 25, 1951, and before Jan. 1, 1957, were granted nonparticipating NSLI on the 5-year renewable nonconvertible term plan without medical examination. Effective Jan. 1, 1959, this insurance was made convertible to any one of the 6 permanent plans (ordinary life, 20-payment life, 30-payment life, 20-year endowment, endowment at age 60, and endowment at age 65) or exchangeable to 5-year limited convertible term. This latter plan is not renewable after age 50.

No. 371. Veterans Administration Patients Resident in VA and non-VA Hospitals: 1955 to 1962

[As of October 31, except as noted. Includes data for all veterans, regardless of place of residence. Based on sample of VA patient load in VA and non-VA hospitals]

PATIENTS' COMPENSATION AND PENSION STATUS [1]	1955 [2]	1959	1960	1961	1962
All patients	114,876	113,115	114,360	114,307	112,500
Treated for SC disabilities (group 1)	41,928	37,575	36,545	35,197	34,635
Treated for NSC disabilities only but with compensable SC disabilities (group 2)	9,708	10,305	10,456	11,201	10,540
Treated for chronic NSC disabilities [3] (group 3)	37,792	38,895	39,310	38,842	38,340
Treated for presumed nonchronic NSC disabilities, [4] and—					
In receipt of, or filed for, VA pension (group 4)	11,492	12,715	13,740	14,582	14,245
Filed claim for VA compensation (group 5)	1,156	515	596	454	290
Filed no claim for VA compensation or pension (group 6)	12,264	12,805	13,386	13,739	13,925
Status unknown (group 7)					
Nonveterans (group 8)	536	305	324	292	525

[1] Groups are mutually exclusive. Patients who possess the characteristics of more than one group are included only in that group with the lowest group number. Abbreviations SC and NSC refer to "service-connected" and "nonservice-connected," respectively.
[2] As of November 30.
[3] Includes veterans hospitalized for "nonservice-connected" psychoses or tuberculosis, and those hospitalized for the treatment of other "nonservice-connected" disabilities for 90 days or more.
[4] Includes veterans hospitalized for less than 90 days for "nonservice-connected" other psychiatric, neurological, and general medical and surgical disabilities.

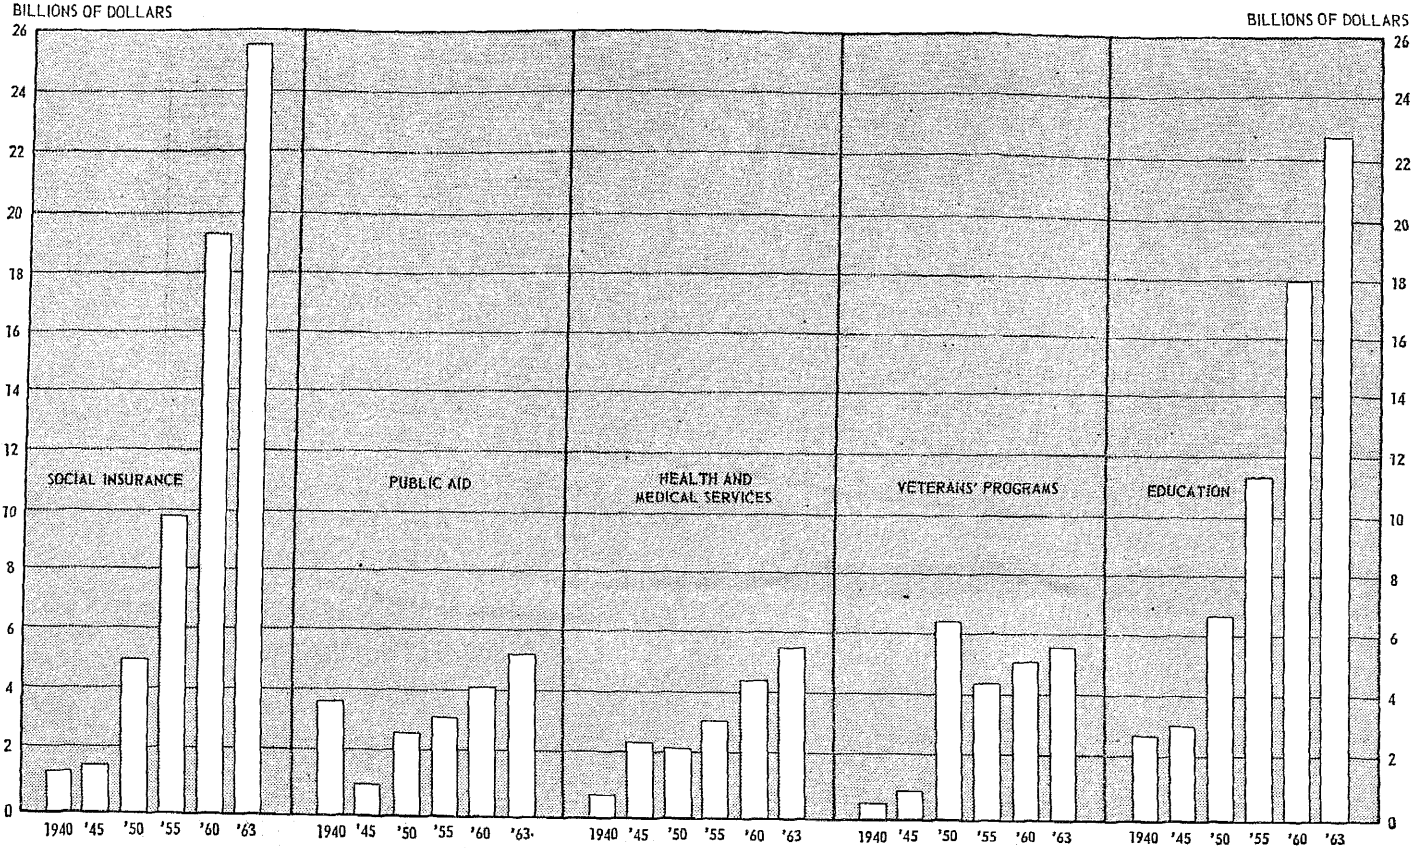
FIG. XVI. SOCIAL WELFARE EXPENDITURES UNDER SELECTED PUBLIC PROGRAMS: 1940 TO 1963

[See table 375]



Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Dept. of Health, Education, and Welfare, Social Security Administration.

Section 10

Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, and disability insurance, public and railroad employee retirement, unemployment and temporary disability insurance, aid to the needy, and maternal, child, and other welfare services. Also included here are selected data concerning private pension plans and financial data relating to corporate pension funds, the American Red Cross, the Community Chest, and philanthropic trusts and foundations.

There are several principal sources for these data. *Social Security Bulletin*, a monthly publication of the Department of Health, Education, and Welfare, presents current data on many of the programs and summarizes annual data in a statistical supplement published each year. A large volume of statistics flows from employers' wage reports submitted under the Social Security Act and used in accounting operations of the old-age, survivors, and disability insurance program. Detailed information on workers and beneficiaries and on establishments, employment, and payrolls covered by this Act is published in the Social Security Administration's *Handbook of Old-Age and Survivors Insurance Statistics*. Establishment data for counties, showing employment and payrolls, by industry, are also available in *County Business Patterns*, issued by the Bureau of the Census. Current data on employment security activities are published monthly in the Department of Labor's *Labor Market and Employment Security* and its supplements. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *Monthly Review* and *Annual Report*.

Social insurance under the Social Security Act.—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment. Under old-age, survivors, and disability insurance, protection against wage loss due to old age, disability, or death is available to nearly all the gainfully employed (excluding chiefly self-employed doctors of medicine and most civilian employees of the Federal Government).

Old-age, survivors, and disability insurance provides monthly retirement benefit to fully insured workers at age 65 or over (or at age 62 if they elect to receive a reduced benefit) and supplementary benefits to their wives, if they are aged or have a child of the earner in their care, to aged dependent husbands, and to dependent children under age 18 (or older if the child has a disability that began before 18). Monthly survivor benefits are payable to certain dependents of fully or currently insured workers. Monthly disability benefits are payable to fully insured workers with a prolonged disability that meets the definition in the Act, and to the dependents of these workers, on the same basis as dependents of retired workers. A lump-sum death payment is made in the case of all insured deaths.

Covered workers and their employers each pay contributions of 3⅝ percent on the worker's wages, not counting amounts above the first $4,800 a year. The rate is scheduled to rise by steps until it reaches 4⅝ percent each in 1968. Self-employed persons now pay 5.44 percent or 1.5 times the employee rate. The money collected is deposited in the social insurance trust funds.

Both unemployment insurance and the public employment (placement) service are administered through the Bureau of Employment Security of the Department of Labor and each State's employment security agency. Under agreements with the

721-041°—64——19

Secretary of Labor, the State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees.

State unemployment insurance laws pay benefits to unemployed covered workers meeting the qualifications in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 22 to 39 weeks among the States: maximum weekly benefits without dependents' allowances range from $30 to $55. In 11 States, maximum allowances ranging from $3 to $27 for dependents raise the range of maximum augmented benefits to $44 to $70. Massachusetts pays $6 for each dependent up to an unspecified amount. In Puerto Rico, benefits are payable for a maximum of 12 weeks; the maximum weekly benefit is $16.

Under the Federal Unemployment Tax Act, a 3.1-percent tax is levied on the payroll of employers of 4 or more workers in industries covered by the Act and is used to finance the Federal-State program. Wages paid during 1962 and 1963 were taxed at 3.5 and 3.35 percent, respectively, to provide Federal funds for financing the benefit and administrative costs incurred under the Temporary Extended Unemployment Compensation Act of 1961. The Federal tax will revert to 3.1 percent on wages paid during 1964 and thereafter. Employers subject to the Federal law are allowed a credit of 2.7 percent of taxable payrolls for contributions paid to State agencies under State unemployment insurance laws; the Federal Government retains 0.4 percent for employment security purposes. The Congress appropriates funds each year to cover administrative costs.

Principal industries excluded from coverage are agriculture, State and local government, domestic service, nonprofit organizations, and railroads (see below).

The standard rate of contributions payable by employers in most States is 2.7 percent of the first $3,000 a year paid to an employee. Exceptions are Alaska (2.9 percent), California (3.2), Delaware (2.7–4.2), Idaho (2.7–3.3), Missouri (2.7–3.2), New Jersey (2.8), New York (2.7–3.7), North Dakota (4.2), Ohio (3.2–4.5), Pennsylvania (4.0), Rhode Island (2.7–3.3), and South Dakota (3.6–4.1). In Tennessee, the rate applies to the first $3,300; in Delaware, Hawaii, Idaho, Massachusetts, Michigan, Nevada, Rhode Island, Vermont, and West Virginia, to the first $3,600; in California and Oregon, to the first $3,800; in Utah, to the first $4,200; and in Alaska, to the first $7,200. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

Social insurance for railroad workers.—The social insurance programs administered by the Railroad Retirement Board cover employees of railroads or companies and organizations affiliated with railroad transportation. The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. Credits of employees who die or retire with less than 10 years railroad service are transferred to the Social Security Administration for payment of old-age, survivors, and disability insurance benefits. Funds for the railroad retirement and survivor benefit system come primarily from a tax on earnings. Effective November 1963, the first $450 of each month's earnings were taxable under the Railroad Retirement Tax Act. The tax, divided equally between employer and employee, is 14½ percent for 1964; it will rise thereafter by the number of percentage points that old-age, survivors, and disability insurance tax rates (for employers and employees combined) exceed 5½ percent.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness, including maternity. The unemployment insurance program is financed by contributions from covered employers, paid directly to the Board. The contribution rate for 1964 is 4 percent (applicable to earnings not in excess of $400 a month).

Social insurance for Federal Government employees.—One contributory retirement system for Federal civilian employees and two noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed services (supplementing old-age, survivors, and disability insurance under which they are covered on a contributory basis) and for special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the U.S. Government and in the District of Columbia government if not subject to another retirement system or excluded by statute or by administrative order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate is 6½ percent, computed on base pay. Employing agencies pay into the Retirement Fund amounts equal to employee contributions.

Workmen's compensation.—All States have programs providing protection against work-connected injuries and deaths. Federal workmen's compensation laws cover Federal Government employees, private employees in the District of Columbia, and longshoremen and harbor workers. Most State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-fourth of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

Public assistance.—Six programs, all administered by the States and localities, provide public assistance. Payments to four groups—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The States may also receive grants for medical assistance to those aged persons not receiving old-age assistance and not able to take care of their medical bills themselves. The Welfare Administration's Bureau of Family Services handles the Federal aspects of these programs. Aid to other needy persons is furnished mainly through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any Social Security Act program a State must have a plan approved as meeting the requirements of the Act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

Health and welfare services.—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, and control of specific diseases). The Children's Bureau, a part of the Welfare Administration, administers the first three of these programs; the others are administered by the Vocational Rehabilitation Administration and the Public Health Service.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 375. Social Welfare Expenditures Under Public Programs: 1935 to 1963

[**In millions of dollars.** For Federal Government, most States, and some localities, years ending June 30; for other States and localities, various 12-month periods ending within year. All programs except workmen's compensation include some payments and expenditures for Alaska, Hawaii, and outlying areas. Beginning 1960, all programs include data for Alaska and Hawaii. Represents expenditures under public law and from trust accounts. Includes administrative expenditures and capital outlay for hospitals, public elementary and secondary schools, and publicly controlled higher education. Corrected to November 1963. See *Historical Statistics, Colonial Times to 1957*, series H 1-45, for data covering civilian programs only]

[1] Although total social welfare and social insurance expenditures include non-Federal workmen's compensation benefits payable under law by employers and private insurance carriers, such expenditures and that part of temporary disability insurance payments made through private carriers have been omitted in computing percentages relating to all government expenditures.

[2] Includes hospital construction and medical research; excludes health and medical expenditures under veterans programs, public education, public aid, workmen's compensation, and vocational rehabilitation (such expenditures have been included in the total expenditures for these programs), and medical expenditures provided subordinate to the performance of other functions.

[3] Represents vocational rehabilitation, child welfare services, school lunch program, and institutional care.

[4] Excludes Federal bonus payments, appropriations to Government life insurance trust fund, and accounts of several small revolving funds. State and local data represent State expenditures for bonus and other payments and services for veterans; local data not available.

[1] Excludes refunds of contributions to those leaving service. Federal expenditures include retirement pay of military personnel.
[2] Includes unemployment compensation for Federal employees, for ex-servicemen (under Act of 1944), and for veterans (under Act of 1952).
[3] Programs operate in 4 States only: Calif., N.J., N.Y., and R.I.
[4] Payments by private insurance carriers, State funds, and self-insurers.
[5] Old-age assistance; medical assistance for the aged; aid to families with dependent children; aid to the blind and the permanently and totally disabled; and, from State and local funds, general assistance.
[6] Emergency aid programs and value of surplus food distributed to needy families.
[7] Excludes expenditures for: Domiciliary care in institutions other than mental or tuberculosis; health and medical service included in other programs; international health activities; and medical programs of Federal agencies. "Medicare" represents medical care for military dependents in non-Federal facilities.
[8] Includes expenditures for medical equipment and supplies for civil defense, and administrative costs, but excludes expenditures for water supply and sanitation services.
[9] Expenditures for homes for dependent or neglected children and for adults other than veterans; and value of surplus food for nonprofit institutions.
[10] Cash apportionment, and value of commodities purchased and distributed under National School Lunch Act and other agricultural programs.
[11] Includes payments for foster care and professional and facilitating services; excludes expenditures of public institutions and day-care centers, capital expenditures by courts and youth authorities, payments from parents and relatives, and direct appropriations by legislatures to voluntary agencies and institutions.
[12] Federal expenditures exclude bonus payments and expenditures from veterans' life insurance trust funds; State and local expenditures include State bonus and other payments and services.
[13] Includes subsistence payments to disabled veterans undergoing training, and burial awards.
[14] Includes vocational rehabilitation, specially adapted homes and automobiles for disabled veterans, counseling, beneficiaries' travel, loan guarantees, and domiciliary care.

Workmen's compensation programs [7]	72.1	80.3	83.5	82.2	81.7

[1] Data from Dept. of Commerce, Office of Business Economics. Total earnings include earnings of self-employed; all wages and salaries represent disbursements for civilian and military pay in cash and in kind.
[2] Beginning 1955, adjusted for duplication of payrolls covered by both old-age, survivors, and disability insurance and State and local retirement systems. [3] Taxable plus estimated nontaxable wages and salaries.
[4] Taxable wages plus estimated nontaxable wages and salaries. Beginning 1950, also represents coverage for railroad temporary disability insurance.
[5] Excludes voluntary contributions and service credits.
[6] Taxable plus estimated nontaxable wages and salaries; beginning 1955, includes pay of Federal civilian personnel.
[7] Payrolls of employers insured with private carriers, State funds, or self-insured, and pay covered by Federal programs in all areas.
[8] Represents percent of all wages and salaries to reflect inclusion of Armed Forces pay.

1961	6,920	37.90	3,968	2,167	359	284	723	436	2,623	329
1962	7,702	41.48	4,550	2,432	449	305	898	465	2,783	369
1963	8,320	44.13	4,843	2,730	330	343	911	528	3,023	454

[1] Based on estimates of total population, excluding Armed Forces abroad, as of July 1.
[2] Old-age assistance, medical assistance for the aged, aid to dependent children, aid to blind, and aid to permanently and totally disabled.
[3] Administration of unemployment insurance service, employment service, and veterans' unemployment allowances, and the distribution of certain tax collections to State accounts in unemployment trust fund, when applicable.
[4] Maternal and child health services, services for crippled children, and other public health programs.
[5] Vocational rehabilitation; State and territorial homes for disabled soldiers and sailors; child welfare services; national school lunch program; and others.
[6] Colleges of agriculture and mechanic arts, agricultural extension work, vocational education, education of the blind, Office of Education emergency grants, maintenance and operation of schools, school survey and construction, defense educational activities, library services, training for education of mentally retarded, and others.
[7] Federal-aid highways, including regular and emergency, prewar and postwar; and trust fund activities, including restoration of roads and bridges, flood relief, secondary and feeder roads, grade crossing elimination, public land highways, and others.

n.a. Not available.

[1] For old-age, survivors, and disability insurance, average monthly number; for the railroad retirement program, public employee retirement systems and the veterans' programs, number on rolls June 30; State unemployment and temporary disability insurance and veterans' unemployment allowances, average weekly number; railroad unemployment and temporary disability insurance, average number during 14-day registration period. Beneficiary data for workmen's compensation not available.

[2] Includes benefits to dependents (spouses and children) where applicable.

[3] Excludes refunds of contributions to employees who leave service.

[4] Retirement data include a significant amount and number of disability payments for 1940.

[5] Retirement data are for veterans of the Civil War, Indian Wars, Spanish-American War, Boxer Rebellion, and Philippine Insurrection; beginning October 1951, includes all service pensions. Disability data represent pensions, compensation, and subsistence payments to disabled veterans undergoing training. Lump sums are for burial of deceased veterans. [6] Excludes payments for medical care.

[7] Payable in Calif., N.J., N.Y., and R.I. Includes maternity data for R.I. and private-plan beneficiaries in Calif. and N.Y.; data for beneficiaries in N.J. not available. [8] Includes maternity data.

[9] Federal programs are under the Uniformed Services Contingency Option Act of 1953. For State and local government retirement systems, number represents families.

[10] For beneficiaries, less than 500; for benefits, less than $500,000.

[11] Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1958 and payments under the temporary extended unemployment insurance programs. Beginning 1962, includes Puerto Rico.

[12] Under the Servicemen's Readjustment Act of 1944 (terminated July 1949), and the Veterans' Readjustment Assistance Act of 1952 (terminated January 1960).

No. 386. Old-Age, Survivors, and Disability Insurance—Paid Employment and Coverage Status: 1940 to 1962

[**In millions, except percent.** As of December. Beginning 1960, includes Alaska and Hawaii. Represents civilian noninstitutional population aged 14 and over and the Armed Forces. Based on Current Population Survey; see technical note, p. 215. Coverage status generally determined on basis of the job with the greatest number of hours worked during the survey week. Corrected to December 1963]

Coverage status	1940	1950	1955	1958	1959	1960	1961	1962
Paid employment (including self-employment)	47.1	61.3	65.7	65.3	66.9	67.1	68.1	69.2
Covered by law	30.4	40.4	59.4	59.3	60.8	61.0	61.9	63.1
Percent of paid employment	64.5	65.9	90.4	90.8	90.9	90.9	90.9	91.2
Coverage in effect[1]	30.4	40.4	56.0	56.8	58.3	58.4	59.2	60.3
Wage and salary	30.4	40.4	49.2	49.7	51.0	51.0	52.0	53.6
Self-employment	------	------	6.8	7.1	7.3	7.4	7.1	6.7
Elective coverage not arranged[2]	------	------	3.5	2.4	2.5	2.6	2.7	2.8
Excluded from coverage by law	16.7	20.9	6.3	6.0	6.2	6.2	6.2	6.1
Agriculture	7.2	5.3	1.3	1.0	1.0	1.0	.9	.8
Wage and salary	1.9	1.3	.1	.3	.3	.3	.3	.3
Self-employment	5.3	3.9	1.2	.7	.7	.7	.7	.6
Federal, State, and local governments	3.7	5.9	2.2	2.2	2.2	2.2	2.3	2.4
Domestic service	2.3	2.1	.9	.9	.9	.9	1.0	1.0
Other[3]	3.5	7.6	1.9	1.9	2.0	2.0	2.0	2.0

[1] Includes persons in railroad employment and Armed Forces; excludes those not electing coverage under voluntary coverage provisions (beginning 1951, certain employees of State and local governments and nonprofit organizations; beginning 1955, certain ministers).
[2] Represents persons for whom coverage is authorized by law on an elective basis (generally on a group elective basis), but for whom coverage had not yet been arranged. Most are employees of State and local governments; others are members of religious and nonprofit organizations.
[3] Consists primarily of physicians and other self-employed persons in nonagricultural industries, employees of nonprofit organizations, and ministers not eligible for coverage.

[1] Includes benefits payable to wives or husbands of disabled workers.
[2] Includes benefits payable to dependent children of disabled workers; also includes benefits payable to disabled children aged 18 or over (whose disability began before age 18) of disabled, deceased, or retired workers.
[3] Payable to disabled workers under age 65. For months prior to November 1960, disability benefits were limited to disabled workers aged 50 to 64.
[4] As of end of November. [5] Represents new entitlements.
[6] January–November awards. [7] December 1958–December 1959 awards.
[8] Represents only awards made under the 1950 amendments.

No. 388. Old-Age, Survivors, and Disability Insurance—Accounts Established, Employers Reporting, and Covered Employment: 1940 to 1963

[Includes Alaska, Hawaii, and, beginning 1955, Puerto Rico and Virgin Islands. Quarterly estimates of employment and earnings exclude self-employment and agricultural labor. Beginning 1958, data are preliminary. Excludes joint coverage under the railroad retirement and old-age, survivors, and disability insurance programs. Corrected to February 1964. See also *Historical Statistics, Colonial Times to 1957*, series H 118–120]

1963:							
January–March	1,651	4,290	56,400	62,000	1,100	61,500	1,090

[1] As of Dec. 27, 1963, 151.6 million account numbers had been issued under the social security system and 2.8 million under the railroad retirement system.

[2] Annual data represent number of different employers filing returns for year; quarterly data, number of returns for quarter. A return may relate to more than 1 establishment if employer operates several separate establishments but reports for concern as a whole.

[3] Annual data represent persons reported; quarterly data include estimates of wage and salary workers who received taxable limit in previous quarter of calendar year from a given employer. See *footnote 5*.

[4] Includes estimates of nonreportable earnings in excess of annual taxable limit. See footnote 5.

[5] Wages up to taxable limit from each employer and self-employment income. Annual taxable limit on wages from a given employer or on self-employment income was $3,000 through 1950; $4,200, 1955–58; $4,800 beginning 1959.

[6] A worker is not reported for a quarter if he has attained annual taxable limit in an earlier quarter of the year from a given employer.

[1] See footnote 1, table 391.

[2] Distribution by type of benefit and by State or other area estimated. Supplementary benefits are paid to insured workers' wives or dependent husbands aged 62 or over, wives under age 62 with child beneficiaries in their care, and children under age 18 (or older, if they have a disability that began before age 18). Survivor benefits are paid to widows or dependent widowers aged 62 or over, children under age 18 (or older, if they have a disability that began before age 18), widows or divorced wives with child beneficiaries in their care, and dependent parents aged 62 or over of deceased insured workers.

[3] Distribution by State or other area based on 10-percent sample.

[4] Benefits payable from the disability insurance trust fund to disabled-worker beneficiaries and their dependents.

1963	1,099	66	1,210	68	20	−133	2,235	2,115	120

[1] January 1937–June 1940, equals appropriations transferred; July 1940–December 1950, taxes collected; beginning January 1951, amounts appropriated. Beginning May 1951, includes State deposits under voluntary coverage agreements. For 1947–51, includes appropriations to cover benefits payable to certain veterans' survivors. Beginning 1952 for old-age and survivors and 1959 for disability insurance trust funds, includes deductions for refunds of employee tax overpayment.

[2] Includes interest and profit on investments and, beginning 1958, adjustment for interest on administrative expenses reimbursed to the old-age and survivors insurance trust fund from the disability insurance trust fund.

[3] Beginning October 1953, includes expenses for central office building construction. Since January 1957 inception of disability fund, most administrative expenses paid initially from old-age and survivors fund, with subsequent reimbursement (plus interest) from disability fund for allocated cost of disability insurance operations

[4] The purpose of the financial interchange is to place the trust funds in the position they would have been in had railroad employment always been covered under old-age, survivors, and disability insurance system. Negative figures indicate payments from the trust funds to the railroad retirement account.

[5] Book value; includes net unamortized premium and discount, accrued interest purchased, and repayments on account of interest accrued on bonds at time of purchase.

[6] 1937–1939, includes transactions of predecessor fund, the old-age reserve account.

[1] Through June 30, 1940, data relate entirely to employees retired under various age and length-of-service requirements and to employees with at least 5 years service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, certain employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 189,855 in 1963. Beginning Jan. 24, 1942, employees with at least 5 years service who separated prior to eligibility for retirement may obtain deferred annuity at age 62. Prior to 1955, excludes annuities purchased by voluntary contributions.

[2] Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

[3] Refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or who, if eligible, elected to take a refund. [4] Refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died in service or after separation.

[5] Refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

n.a. Not available.
[1] Application submitted for unemployment when worker applies for benefits for first time with respect to benefit year, for sickness at the beginning of each spell of sickness. Beginning 1950, data include some applications submitted in June with respect to following year.
[2] Per 2-week claim period. Based on sample data and not adjusted for settlement of underpayments and recovery of overpayments.
[3] Adjusted for settlement of underpayments and recovery of overpayments.
[4] Not reported on comparable basis.
[5] Excludes retroactive payments made under 1959 amendments and (for unemployment) extended benefits.
[6] All data except applications received and accounts exhausted include temporary extended benefits.

n.a. Not available.

[1] Data represent unduplicated counts. Excludes temporary unemployment programs in 1958, 1959, and 1961 to 1963; see table 407.

[2] Adjusted for voided benefit checks and transfers under interstate combined wage plan. For 1958, State amounts include $81.5 million spent under State programs for temporary extension of benefit payments; for 1959, $54.8 million; for 1960, $15.3 million; for 1961, $24.0 million; for 1962, $35.3 million; for 1963, $57.4 million.

[3] Prior to 1959, excludes Alaska and Hawaii.

[4] Insured unemployment as a percent of average covered employment during the previous year.

[5] Includes the Federal employee program for January 1958–June 1959.

[6] Represents number of first payments during year.

[7] Number of weeks compensated divided by first payments. [8] For total unemployment.

[9] Represents average employment on payroll ending nearest the 15th of the month.

[10] Wages subject to unemployment insurance tax. For 1950–1955, private industry coverage only; beginning 1958, also includes State and local government coverage.

[11] Includes contributions, penalties, and interest from employers; also employee contributions in States which tax workers.

[12] Represents number of first payments during year. Prior to 1959, includes data for employees filing for unemployment compensation to supplement benefits under other programs; beginning July 1959, excludes first payments filed jointly with State unemployment insurance programs.

[13] Program terminated Jan. 31, 1960.

[14] Cumulative from beginning of program, Oct. 15, 1952.

[15] Program established under title XV of the Social Security Act, effective Oct. 27, 1958.

[1] Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown were in effect as of December 1962.

[2] Average of 12 monthly figures, each of which is total number of workers in covered employment in pay periods ending nearest 15th of month. [3] Total wages in covered employment for all pay periods ending in year.

[4] Wages subject to unemployment insurance tax. *Includes State and local government coverage as well as* private industry coverage; see text, p. 278.

[5] Includes 14,805 employees and $111,577,120 wages, not reported by States and not shown for Virgin Islands.

[6] And wages over $100 in any quarter.

[7] Or 4 in 8 weeks and payroll over $6,000 in any quarter. [8] And wages of $150 in any quarter.

[9] Or 25 in 1 week. [10] Or 4 in 3 quarters of preceding year, and $50 per quarter for each worker.

[11] Employers of fewer than 4 and outside corporate limits of a city, village, or borough of 10,000 inhabitants or more not liable for contributions unless subject to Federal Unemployment Tax Act.

[12] Or wages over $500 in a calendar year. [13] Or wages of $10,000 in any quarter.

[14] And wages of $225 in any quarter. [15] And wages of $450 in any quarter, or 2 in 13 weeks.

[16] And wages of $300 in any quarter. [17] Or annual payroll of $24,000 in current or preceding year not counting more than $3,000 wages per employee in applying the test of $24,000 in year. [18] And wages of $140 in any quarter.

[19] Or wages of $6,000 in any year or wages of $10,000 in any quarter not counting more than $1,000 wages per employee in applying the test of $10,000 per quarter. [20] And wages of $500 in any year.

[1] Comprises insured unemployment under State, UCX, UCFE, and railroad programs; latter program included in total but not distributed by State.
[2] Represents number of first payments during year; Wisconsin figure, first payments on a "per employer" basis.
[3] Adjusted for voided benefit checks and transfers under interstate combined wage plan.
[4] For total unemployment.
[5] Excludes data on ex-servicemen filing for unemployment compensation payments to supplement benefits under State and/or UCFE programs.
[6] Excludes data on Federal employees filing for unemployment compensation payments to supplement benefits under State programs. [7] Less than 500. [8] Not applicable.

No. 411. Workmen's Compensation Payments, by States: 1940 to 1962

[**In thousands of dollars.** Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator* (*Insurance by States . . . of Casualty Lines*) and from published and unpublished reports of State insurance commissions); net disbursements of State funds (from the *Spectator* and from State reports, published and unpublished), estimated for some States; and self-insurance payments, estimated from available State data. Calendar-year data, except fiscal-year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Bases Compensation Act for States in which such payments are made]

No. 412. Workmen's Compensation Payments, by Type of Benefit and of Insurance: 1940 to 1962

[In millions of dollars. Prior to 1959 excludes Alaska and Hawaii, except that data for payments to Federal employees are for all employees regardless of where stationed. See also *Historical Statistics, Colonial Times to 1957*, series H 175–185]

YEAR	Total payments	TYPE OF BENEFIT				TYPE OF INSURANCE					
		Medical and hospitalization payments	Compensation payments			Insurance losses paid by private carriers [1]		State fund disbursements [2]		Self-insurance payments [3]	
			Total	Disability	Survivor	Amount	Percent of total	Amount	Percent of total	Amount	Percent of total
1940	256	95	161	129	32	135	52.7	73	28.4	48	18.9
1945	408	125	283	241	42	253	61.9	91	22.3	65	15.8
1950	615	200	415	360	55	381	62.0	149	24.2	85	13.8
1955	916	325	591	521	70	563	61.4	238	26.1	115	12.5
1958	1,112	375	737	647	90	694	62.5	285	25.6	132	11.9
1959	1,210	410	800	700	100	753	62.2	316	26.1	141	11.7
1960	1,288	435	853	748	105	812	63.0	324	25.2	152	11.8
1961	1,361	460	901	791	110	853	62.7	348	25.5	160	11.8
1962	1,465	495	970	850	120	923	63.0	371	25.3	171	11.7

[1] Net cash and medical benefits paid during calendar year by private insurance carriers under standard workmen's compensation policies. Data from *Spectator (Insurance by States, of . . . Casualty Lines)* and from published and unpublished reports of State insurance commissions.

[2] Net cash and medical benefits paid by competitive and exclusive State funds, and by Federal system for Government employees. Compiled from State reports (published and unpublished) and from *Spectator* or other insurance publications; data for fiscal years for some funds.

[3] Cash and medical benefits paid by self-insurers, plus medical benefits paid by employers carrying workmen's compensation policies that exclude standard medical coverage. Estimated from available State data.

n.a. Not available.

[1] Program initiated November 1960 under the Social Security Act Amendment of 1960.

[2] Includes the children and 1 or both parents, or 1 caretaker relative other than a parent, in families where the needs of such adults were considered in determining the amount of assistance.

[3] Includes 3,778 recipients under 65 in Colorado.

[4] Includes 79 recipients of payments made without Federal participation in California, 688 in Missouri, and 12,683 in Pennsylvania.

[5] Partly estimated; total not as large as sum of State figures because of adjustment. See footnote 7.

[6] Estimated.

[7] Includes unknown number of cases receiving medical care, hospitalization, or burial only.

No. 430. Foundations—Grants, by Subject Field

[**In millions of dollars, except percent.** Includes Alaska, Hawaii, and Virgin Islands. Figures are for latest year reported by foundations, usually 1957 or 1958. A foundation may be defined as a nongovernmental, nonprofit organization having a principal fund of its own, managed by its own trustees or directors, and established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, or which are captive trusts, within colleges, churches, or other organizations, or are small—defined as having neither assets of $100,000 nor making grants of at least $10,000 in the latest year of record]

Subject field	Total		176 large foundations [1]		847 intermediate foundations [2]		4,984 small foundations [3]

Section 11

Income, Expenditures, and Wealth

This section presents statistics relating to two different aspects of income and expenditures: One aspect is the entire complex of the Nation's economic activities and the interaction of its major components (the national income and product system and the flow-of-funds system); and the other, the distribution of families and individuals by income size-classes or type of expenditure. Statistics on national wealth are also included.

The primary source for national income and product information is *Survey of Current Business,* published monthly by the Department of Commerce, Office of Business Economics. Each July issue of the *Survey* is identified as the *National Income Number* and contains the most recent and detailed statistics on this subject. *National Income, 1954,* is the basic reference source for concepts and methodology which are still applicable, and for numerous statistics on the 1929–1945 period. A more recent supplement, *U.S. Income and Output,* contains a complete set of revised statistics for the 1946–1957 period and introduces a number of new statistical series.

A further development of the general body of national income data appears in a *Survey* supplement, *Income Distribution in the United States, 1944–50,* which presents personal income data classified by income size-groups. More recent data are presented in the *Survey of Current Business* for March 1955, June 1956, and the April issues of 1958 and following years.

The primary source for flow-of-funds data is the Board of Governors of the Federal Reserve System; the *Federal Reserve Bulletin* from time to time presents summarized versions of these data. Detailed historical data appear in *Flow of Funds in the United States, 1939–53.*

A primary source for annual data on distribution of income by size-class is the Bureau of the Census, *Current Population Reports—Consumer Income,* Series P–60. A brief discussion of the Current Population Survey which is the basis for the data in the above report appears in the Technical Note on page 215 and also on page 1. Data on the distribution of income in 1959 were also collected in the 1960 Census of Population. Another primary source for information in this field is the national Survey of Consumer Finances conducted annually since 1946 by the Survey Research Center of The University of Michigan. From 1946 through 1960, this survey consisted of a sample of approximately 2,700 family units or 3,000 spending units located in 66 sampling areas; from 1961 to 1963, it consisted of approximately 1,850 family units or 2,000 spending units. The results of these surveys are published in a monograph series, *Survey of Consumer Finances.*

National income and product.—A general view of the economy is provided by a summary of the Nation's income, expenditure, and saving, shown in the form of a balancing set of accounts for the major economic categories—consumers, business, and government. (See table 434.) These statistics, assembled by the Council of Economic Advisers, are a part of the "national income and product" accounts of the Department of Commerce. An explanation of the items included in this summation may be found in the 1962 *Historical and Descriptive Supplement to Economic Indicators,* 87th Congress, 2d Session.

Gross national product.—Gross national product (called GNP) represents the total national output of goods and services at market prices. It measures this output in terms of the expenditures by which the goods and services are acquired. The expenditures comprise purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included in GNP are, for the most part, those actually bought for final use (excluding illegal transactions) in the markets. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP, the total national output, also measures the product attributable to the factors of production—labor and property—supplied by residents of the United States. GNP differs from "national income," described below, mainly in that GNP includes allowances for depreciation and similar capital consumption and for indirect taxes (such as sales and excise taxes).

National income.—National income is the aggregate of earnings by labor and property from the Nation's current production of goods and services. It is the sum represented by compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of taxes on those earnings.

Personal income.—Personal income is the current income received by individuals, by unincorporated businesses, and by nonprofit institutions (including pension, trust, and welfare funds) from all sources. It includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes and the value of food consumed on farms.

Disposable personal income is equal to personal income less taxes on individuals (including income, property, and other taxes not deductible as business expense), and other general Government revenues (e. g., fines, penalties, etc.) received from individuals as individuals.

Flow-of-funds accounts and saving and investment estimates.—Another general view of the economy is provided by the flow-of-funds accounts. This system of national accounts presents a record designed to picture the flow of funds through the major sectors of the national economy, the structure of the economy's saving and investment, by sector and by form of investment, and the relation between saving and the structure of financial flows. The transactions covered include transactions in financial instruments, existing assets, transfers of various kinds, and transactions involving currently produced goods and services. A similar presentation of the accounts in amounts outstanding for the financial categories gives the structure of financial assets and liabilities and a summary of the principal assets and liabilities by sector and by type of financial instrument. Quarterly flow data are available currently in the *Federal Reserve Bulletin.*

Distribution of income by size-class.—Money income statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social security taxes unless otherwise specified in individual tables. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is "personal income."

A size distribution of family "personal income" (less amounts received by Institutional residents or retained by private trust, pension, health, and welfare funds) is prepared by the Office of Business Economics based on data from consolidated Federal individual income tax returns and the sample data from the surveys mentioned above. These are described in *Income Distribution in the United States, 1944–1950*, mentioned above. Detailed statistics, including information on Federal individual income tax liabilities, are available in the *Survey of Current Business* for March 1955, June 1956, and the April issues of 1958 and following years.

Individuals' savings and assets.—The Securities and Exchange Commission issues detailed estimates of individuals' savings showing the increase in financial assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. A continuous series starting with 1942 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 452.) A reconciliation of the annual SEC estimates with the Department of Commerce estimates of personal savings appears in the Office of Business Economics publication, *U.S. Income and Output*, for the years 1946 to 1958, and *National Income, 1954 Edition*, for prior years back to 1933. The Federal Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 614.)

The Survey Research Center of The University of Michigan also collects annual data (except for 1961) covering the distribution of liquid assets and occasional data covering positive, negative, and net savings of families, by income groups. In 1962 and 1963, the Survey Research Center collected data on the gross worth and net worth of spending units. The data on net worth are comparable to those for 1953 published in the *Federal Reserve Bulletin* for September 1953. Detailed comparisons and an explanation of methods are published in the monograph *1962 Survey of Consumer Finances*, Chapter 6.

National wealth.—The national wealth data shown here (tables 472 and 473) represent the most recent attempt to derive a consistent and comprehensive series in this field. They were compiled by Raymond W. Goldsmith. As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth of wealth over long periods. Careful examination of the methods and sources of the estimates, as they are described in *A Study of Saving in the United States* and in *The National Wealth of the United States in the Postwar Period*, is therefore advisable before use is made of the figures.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 436. Gross National Product or Expenditure in Current and Constant (1954) Dollars: 1950 to 1963

[**In billions of dollars.** Beginning 1960, includes Alaska and Hawaii. Constant dollar figures obtained by dividing current-dollar estimates, in as fine a product classification as possible, by appropriate price indexes based on 1954 as 100, in order to eliminate from the current dollar estimates all price changes as compared with 1954. For definition of gross national product, see text, p. 318. See also *Historical Statistics, Colonial Times to 1957*, series F 67–103]

No. 437. Rates of Economic Growth: 1910 to 1963

[**Percent.** Figures represent average annual compounded rates of change in national product, based on estimates by Department of Commerce of real gross national product expressed in 1954 dollars (with 1960 estimates adjusted for consistency in coverage of Alaska and Hawaii). Minus sign (−) represents decline. To obtain annual rate of change between any 2 years shown, find column for initial year at top of table and read figure in that column opposite terminal year shown at left]

TERMINAL YEAR	INITIAL YEAR												
	1910	1915	1920	1925	1929	1935	1940	1945	1950	1955	1960	1961	1962
1911	2.5												
1916	2.0	7.7											
1921	0.7	0.5	−8.5										
1926	3.0	4.0	5.3	5.6									
1931	1.7	2.0	1.8	−0.9	−8.3								
1936	1.9	2.1	2.0	0.6	−0.7	13.3							
1941	2.6	3.0	3.1	2.4	2.3	7.7	15.7						
1946	2.7	3.0	3.2	2.7	2.6	5.7	5.4	−10.0					
1951	2.9	3.2	3.3	2.9	2.9	5.2	4.7	1.4	7.4				
1956	2.9	3.2	3.3	3.0	3.0	4.7	4.3	2.2	3.9	2.1			
1961	2.8	3.1	3.1	2.9	2.9	4.2	3.8	2.2	3.1	2.2	1.8

[1] Preliminary totals for 1963, as follows: GNP current dollars, $585 billion, and GNP constant (1954) dollars, $493 billion; detail not available.

[2] Represents gross national product measured as sum of final products minus real gross national product measured as sum of industry products. Excludes the statistical discrepancy, since industry real product has been calculated using industry totals adjusted to include a proportional share of the discrepancy.

No. 443. National Income, by Industrial Origin: 1950 to 1963

[**In billions of dollars.** Beginning 1960, includes Alaska and Hawaii. National income (for definition, see text, p. 318) originating in each industry is the sum of factor costs incurred by the industry in production. Hence, it is net value added to production by industry, measured at factor costs. See also *Historical Statistics, Colonial Times to 1957*, series F 22–33]

Personal net saving:									
Current prices, bil. dol.	4.2	−.6	4.2	28.7	12.6	17.5	21.7	29.1	29.4
Percent of disposable personal income	5.1	−1.3	5.5	19.1	6.1	6.4	6.2	7.6	7.3
Population [4], 1,000	121,875	125,690	132,122	139,928	151,689	165,276	180,684	186,656	189,375

[1] Dollar estimates in current prices divided by the implicit deflator for the personal consumption expenditures component of gross national product on a 1963 base.
[2] These estimates represent an approximate conversion of the Dept. of Commerce series in 1954 prices. This was done by major components, using the implicit price deflators converted to a 1963 base.
[3] Total expenditures in 1963 prices divided by population.
[4] Population as of July 1; includes Armed Forces abroad.

No. 446. Personal Income, 1940 to 1962, and Rank Order, 1962, by States

[State personal income is a measure of current income received from all sources during the calendar year by the residents of each State. Excludes wages and salaries received by Federal military and civilian employees temporarily stationed abroad; hence, U.S. data shown here differ from those in tables 435, 438, and 444. See text, p. 318]

STATE	AMOUNT (millions of dollars)						PER CAPITA (dollars)						1962 rank order

[1] Comprises agricultural and similar service establishments, forestry, fisheries, and rest of world.
[2] Comprises employer contributions to private pension, health, and welfare funds; compensation for injuries; pay of military reservists; directors' fees; and several other minor items.
[3] Net income of farm proprietors, farm wages, and farm "other" labor income, less personal contributions under the old-age, survivors, and disability insurance program.

SOURCES, BY STATES: 1962

See headnote, table 446]

No. 449. Summary of Flow of Funds/Savings Accounts: 1963

[**Flows in billions of dollars.** Preliminary. Includes Alaska and Hawaii. Financial uses of funds ("U") represent net acquisitions of assets; financial sources of funds ("S"), net changes in liabilities. Differences in total uses and sources of funds for transaction categories result from valuation, timing, and classification differences, and from statistical discrepancies. For explanation of general concepts, see text, p. 318. For description of sectors and types of transactions, see *Federal Reserve Bulletin*, August 1959. "N.e.c." means not elsewhere classified]

Errors and omissions	.1	−.1	.7	−.1	−3.9	−3.3	−2.8

[1] Includes accidental damage to fixed property.
[2] Includes depreciation on farm property owned by nonfarm landlords.
[3] Excludes changes in Government insurance and pension reserves amounting to $3.09 billion in 1955; $2.27 billion in 1959; $3.42 billion in 1960; $1.15 billion in 1961; and $2.78 billion in 1962; and small amounts in Armed Forces leave bonds. (Both these items are ascribed to the Government sector in the national income accounts.)
[4] Includes changes in assets of noncorporate enterprises of the types specified.
[5] Less than $50,000,000.
[6] Includes shares and deposits in credit unions and the Postal Saving System.
[7] Includes increase in redemption value of outstanding bonds.

No. 471. Gross Worth, 1953, 1962, and 1963, and Net Worth, 1950 to 1963—Percent Distribution, by Asset Size-Class of Spending Units

[Excludes Alaska and Hawaii. Gross worth is defined as the value of the private holdings of owner-occupied houses and farms; other real estate; mortgages and land contracts; livestock and farm equipment; automobiles; unincorporated businesses; savings accounts in banks, savings and loan associations, and credit unions; savings bonds and other government securities, including those of State and local governments; stocks, bonds, and the share of privately held corporations. Debt associated with any of these assets, together with any medical and general purpose debt, was deducted in order to arrive at net worth. Among the items not included are: Cash value of life insurance policies; pensions; jewelry; clothing; house furnishings; trust accounts; and currency. For definition of spending unit, see headnote, table 453]

ASSET SIZE-CLASS	GROSS WORTH			NET WORTH			
	1953	1962	1963	1950	1953	1962	1963

[1] Estimates obtained by multiplying the *constant dollar* figures shown in table 473 by the appropriate price index for current year. See also footnote 1 in that table.

[2] 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947–49) of deflator applied in transforming original cost data into current values but also because of minor changes in sources of data and methods of estimation used.

[3] Estimates are based on book values.

[4] Estimates for farm land are based on Census or similar data. For other private land, estimates are derived by application of rough ratios of land to structure values for different types of real estate. Excludes subsoil assets.

[1] Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (1) Reducing each year's gross capital expenditures in current prices to 1929 (or 1947–49) price level by means of appropriate construction cost or wholesale price indices; (2) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1929 (or 1947–49) prices; (3) cumulating net capital expenditures for as many years backwards as corresponds to the assumed length of life of the type of asset involved.

[2] 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947–49) of deflator used but also because of minor changes in sources of data and methods of estimation used.

[3] Estimates reflect book values reduced by means of wholesale price indices.

Section 12

Prices

This section presents indexes of wholesale, retail, and consumer prices, as well as prices for selected commodities. The primary sources of these data are publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review; Handbook of Labor Statistics; Consumer Price Index* (monthly); *Retail Food Prices by Cities* (monthly); *Retail Prices and Indexes of Fuels and Electricity* (monthly); and *Wholesale Prices and Price Indexes* (monthly and annual). The Statistical Reporting Service of the Department of Agriculture prepares indexes of prices received and prices paid by farmers (see text, p. 608).

The Bureau of Labor Statistics prepares weekly and monthly indexes of wholesale prices; a daily index of spot market prices of 22 commodities; and indexes of consumer prices for urban wage-earner and clerical-worker families for 46 cities, and individually for 20 large cities, as well as component indexes for food and other groups.

Wholesale price index.—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of commodities sold in primary markets in the United States.

The index has undergone 4 major revisions (see *Monthly Labor Review*, February 1962). It is now based on nearly 2,200 commodity price series instead of the approximately 1,900 included in the 1947–60 period and the 900 included for the period prior to 1947. Prices used in constructing the index are collected directly from sellers, if possible, and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price, the importer's selling price, the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value including value of sales for export, f.o.b. production point, less interplant transfers, but plus value of imports for consumption, for the producing and processing sector of the economy. For the 1947–54 period these values were based primarily on dollar value of transactions reported in the 1947 industrial censuses. For 1955–57, weights were computed from values of primary market transactions in 1952 and 1953. For 1958–60, the weights were the net selling value of commodities in 1954. Effective January 1961, the weights were the net selling value of commodities in 1958, with the value of shipments from Alaska and Hawaii included. Formerly these were represented by estimates of imports from these 2 States.

Beginning January 1962, the various wholesale price indexes were converted to a new base of 1957–59=100 from the previous base of 1947–49=100. The all-commodities wholesale price index series on both bases has been extended back to 1890 on an annual average basis. Monthly indexes on the 1947–49 base have been computed from 1926 forward for most of the major commodity groups. Monthly indexes on the 1957–59 base are available for all major commodity groups from 1947 forward and, in a few instances, from earlier periods back to 1913. Any index on the 1957–59 base can be extended as far back as data are available by use of a conversion factor applied to the corresponding index on the 1947–49 base. The Bureau of Labor Statistics will supply conversion factors upon request.

Consumer price index.—This index as constructed through June 1964 measures the average change in prices of goods and services purchased by city wage-earner and clerical-worker families. The weights used in calculating the index are based on studies of actual expenditures by families of wage earners and clerical workers. The quantities and qualities of the items in the "market basket" remain the same between

consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living of these families. The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917–19 provided the weights used for 1913 to 1935. Since then, this index has undergone four major revisions, which involved bringing the "market basket" of goods and services up to date and improving the sample and methodology. From 1935 through 1949, time-to-time changes in retail prices were weighted by 1934–36 average expenditures except for certain temporary wartime adjustments. Weights used for 1950 through 1952 represented estimated 1949–50 spending patterns. Beginning 1953, the weights represent average purchases of urban wage-earner and clerical-worker families in fiscal year 1952. The most recent revision was incorporated in a new series beginning in 1964. The description which follows and the tables in this section, however, refer to the old series which was discontinued in mid-1964. Both old and new series indexes are available from January through June 1964.

The list of items currently priced for the index includes approximately 300 goods and services. For some items, several different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable.

Beginning 1953, prices have been obtained in a sample of 46 cities. Foods, fuels, and a few other items are priced monthly in all cities. Prices of most other goods and services are obtained monthly in the 5 largest cities and every 3 months in other cities. Rents are surveyed bimonthly in the 5 largest cities and every 3 months in other cities. Estimates are made for unpriced cities each month. Price changes for the 46 cities are combined for the United States with weights based on 1950 population of cities represented by each sample city. City indexes are compiled for 20 of the 46 cities. Prior to 1953, indexes were based on food prices in 56 cities monthly, and prices of other commodities in 34 cities quarterly or monthly.

Retail food price index.—Retail food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. In March 1943, the weights were revised to take account of wartime changes in food purchases. In January 1946, the wartime adjustments were eliminated and certain other revisions made. In January 1950 and January 1953, the weights were revised as for the total consumer price index.

The indexes were computed from prices of 54 foods for January 1935 to March 1943, 61 foods for March 1943 to June 1947, 50 foods for June 1947 to January 1950, 60 foods for January 1950 to December 1952, and 90 foods beginning January 1953.

Comparability with other indexes.—In comparing the movement of the indexes of consumer prices and of the prices paid by farmers for commodities bought for family living (table 889), it should be noted that the consumer price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differ because farm family buying differs considerably from that of city families.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States, excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 474. Wholesale Price Indexes—All Commodities and All Commodities Except Farm Products and Foods: 1913 to 1964

[Beginning 1961, applies to Alaska and Hawaii; for treatment in index weights, see text, p. 349. See also *Historical Statistics, Colonial Times to 1957*, series E 25–26, for indexes on a 1947–49 base]

No. 477. Indexes of Spot Primary Market Prices: 1950 to 1964

[1957–59=100. Index computed daily; represents unweighted geometric average of daily price quotations of 22 commodities, traded on organized exchanges. This index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

DATE	All commodities	Foodstuffs	Raw industrials	Livestock and products	Metals	Textiles and fibers	Fats and oils
Number of commodities	22	9	13	5	5	4	4
1950—June 20	101.9	102.6	101.5	103.1	103.1	121.1	93.0
1951—June 19	142.1	123.3	156.8	155.8	135.1	176.6	145.2
1952—June 17	111.8	112.7	111.1	103.0	118.2	120.0	101.7
1953—June 16	99.6	103.5	97.0	85.6	102.7	113.2	85.4
1954—June 15	105.6	117.9	97.8	104.4	101.0	110.3	108.8
1955—June 14	104.2	105.8	103.1	93.9	111.7	105.3	104.2
1956—June 12	102.6	98.6	105.5	92.0	122.0	99.7	104.6

No. 478. Wholesale Price Indexes, by Stage of Processing and Durability of Product: 1950 to 1963

[1957–59=100. Beginning 1961, applies to Alaska and Hawaii; for treatment in index weights, see text, p. 349. These indexes are a regrouping of the regular Wholesale Price Index Series to show price movements at various levels of production and in the various sectors of the economy. The new series comprise three major categories: (*a*) raw or crude materials; (*b*) intermediate materials, components, and supplies for further processing; (*c*) finished goods. Each of these three is further divided in accordance with end-use and durability. See *Historical Statistics, Colonial Times to 1957*, series E 42–64 for indexes on 1947–49 base]

ITEM	1950	1955	1958	1959	1960	1961	1962	1963
STAGE OF PROCESSING								
All commodities	86.8	93.2	100.4	100.6	100.7	100.3	100.6	100.3
Crude materials for further processing	104.2	96.7	101.6	99.0	96.6	96.1	97.1	95.0
Foodstuffs and feedstuffs	108.9	96.2	104.2	97.4	96.2	94.9	96.8	94.0
Nonfood materials, except fuel	100.0	99.1	97.6	101.0	96.8	97.9	97.4	96.2
For manufacturing	101.4	100.0	97.4	101.0	96.2	97.4	96.9	95.6
For construction	77.1	90.2	100.4	101.3	102.7	102.8	103.2	103.0
Fuel	86.1	87.1	99.8	101.6	102.5	102.3	101.8	103.0
For manufacturing industries	86.4	87.1	99.9	101.5	102.4	102.2	101.8	103.0

No. 479. Wholesale Prices of Selected Commodities: 1950 to 1963

[In dollars per unit. Annual average. See also *Historical Statistics, Colonial Times to 1957*, series E 101–112, for selected items]

ITEM	1950	1955	1959	1960	1961	1962	1963
Farm products:							
Wheat, hard winter, No. 2, Kansas City [1] ---bu	2.226	2.256	1.978	1.993	2.014	n.a.	2.178
Steers, choice [2] ---100 lb	30.258	24.052	28.583	26.708	25.063	27.552	24.292
Cotton, raw [3] ---lb	.362	.336	.333	.314	.322	n.a.	.335
Wool, combing and staple ---lb	1.981	1.423	1.217	1.163	1.181	1.245	1.323
Eggs, extras, New York ---doz	.447	.449	.349	.409	.399	.390	.381
Corn, No. 2 yellow, Chicago ---bu	1.507	1.413	1.222	1.157	1.135	1.126	1.252
Processed foods:							
Flour, Kansas City [4] ---100 lb	5.427	5.935	5.080	4.992	5.167	5.621	5.365
Beef, choice ---100 lb	47.424	40.280	46.816	44.881	42.307	45.941	41.813
Milk, Chicago ---qt	.175	.199	.217	.238	.252	.257	.266
Sugar, granulated (excl. excise tax) ---lb	.078	.084	.086	.087	.087	.089	.112
Coffee, tin ---lb	n.a.	.907	.714	.699	.684	.659	.646
Lard, refined, cartons, Chicago ---lb	.157	.151	.129	.135	.151	.147	.139
Textile products:							
Cotton sheeting, Class A ---yd	.259	[5] .213	.213	.223	.215	.226	.224
Print cloth, 80 x 80, in gray ---yd	.240	.192	.196	.203	.176	.176	.184
Suits, men's, medium grade ---each	n.a.	40.640	42.696	44.442	45.477	45.573	n.a.
Hides, skins, leather, and leather products:							
Cattlehides, packer, heavy native, steer ---lb	.256	.125	.193	.138	.149	.151	.111
Cattlehide leather, upper workshoe elk ---sq. ft	.489	.339	.484	.375	.413	.431	.411
Oxfords, men's, elk or kip side upper ---pair	4.857	[5] 5.113	6.006	n.a.	5.680	n.a.	5.890
Fuel, power, and lighting materials:							
Coal, anthracite, chestnut ---sh. ton	12.583	n.a.	14.177	13.948	13.347	13.050	13.361
Coal, bituminous, large domestic sizes ---sh. ton	n.a.	6.831	7.733	n.a.	n.a.	n.a.	7.014
Gasoline, Oklahoma ---gal	.100	.108	n.a.	.117	.117	.113	.109
Distillate fuel oil, No. 2 N.Y. harbor ---gal	.083	.101	.100	.095	.099	.092	.092
Chemicals and allied products:							
Sulfuric acid ---ton	18.054	22.350	22.350	22.350	22.350	22.350	22.350
Benzene ---gal	.253	.360	.310	.340	.328	.260	.250
Paint, outside ---gal	3.749	4.349	4.799	4.806	4.953	n.a.	4.954
Turpentine [6] ---gal	.531	.640	.535	.489	.332	.197	.314
Rubber and rubber products:							
Natural rubber, No. 1 ribbed, smoked sheets ---lb	.413	[5] .390	.365	.385	.296	.285	.263
Synthetic rubber, butyl, Grade I type ---lb	.186	.230	.230	.230	.230	.235	.276
Reclaimed rubber ---lb	.090	.101	.110	.110	.115	n.a.	.115
Lumber and wood products:							
Softwood plywood, interior grade [7] ---1,000 sq. ft	88.126	[5] 80.884	71.909	n.a.	59.901	57.570	60.015
Flooring, maple ---1,000 bd. ft	180.271	181.477	211.100	208.948	203.978	203.860	205.802
Pulp, paper, and allied products:							
Woodpulp, sulphate, bleached ---sh. ton	126.156	147.625	157.000	156.208	147.500	140.375	138.875
Book paper, A grade ---100 lb	11.661	14.300	16.283	16.853	16.950	n.a.	16.391
Newsprint, standard ---ton	101.625	125.038	134.400	134.400	134.400	134.400	134.400
Toilet tissue ---case	6.147	[5] 7.050	[5] 7.103	7.383	7.381	7.097	7.072
Paper towels ---case	3.263	[5] 3.742	3.981	4.110	4.123	4.067	4.067
Grocery bags ---1,000	3.151	3.408	4.769	4.752	4.801	4.550	4.103
Metals and metal products:							
Iron ore, mesabi, non-Bessemer ---long ton	7.717	10.067	11.450	11.450	11.450	10.750	10.633
Iron and steel scrap, No. 1 heavy melting [8] ---long ton	39.133	40.542	40.250	32.958	35.333	29.417	26.785
Steel rails, standard [9] ---100 lb	3.417	4.663	5.825	5.825	5.825	5.825	5.825
Copper ingot, electrolytic ---lb	.216	.373	.311	.325	.303	.310	.310
Aluminum ingot ---lb	.177	.237	.268	n.a.	.255	.239	.226
Aluminum sheet ---lb	n.a.	n.a.	.443	.468	.467	.449	.421
Nails, wire, 8d, common [10] ---100 lb	6.343	8.180	9.825	9.596	n.a.	4.715	4.621
Nonmetallic minerals—structural:							
Brick, building ---1,000	25.671	[5] 29.151	[5] 31.665	n.a.	n.a.	n.a.	n.a.
Glass, window, single B ---50 sq. ft	n.a.	n.a.	4.386	n.a.	4.560	4.728	4.951
Shingles, asphalt roofing, strip ---square	n.a.	5.305	[5] 5.792	5.261	n.a.	n.a.	5.765
Miscellaneous:							
Cigarettes, nonfilter tip (excl. excise tax) ---1,000	3.443	3.938	4.281	4.281	4.281	4.281	4.500
Soybean meal ---ton	62.943	56.646	56.250	52.583	63.188	65.563	72.042
Bran ---ton	46.915	40.188	38.167	37.396	39.208	40.875	41.500

n.a. Not available. [1] Beginning July 1962, No. 1 hard winter wheat.
[2] Grade description changed from good to choice in January 1951 with no change in quality.
[3] 1950 price for 10 spot market, 15/16″ middling; 1955, for 14 spot market, 15/16″ middling; 1″ thereafter. Beginning September 1962, price is for 15 market average. [4] Prices for 100 lb. sack, except 1959, for bulk.
[5] Break in price series caused by change in reporter sample.
[6] 1950 price for bulk lots, Savannah; 1955–1958, tank cars, New York; 1959, carlots or trucklots at processing plants in Georgia or Florida. [7] 1950–1958 prices for 5/16″ thickness; ¼″ thereafter.
[8] 1950–1957 prices, broker to consumer, Pittsburgh basing point; thereafter, consumers' buying price, including brokerage, delivered, Pittsburgh district.
[9] 1950 price, standard, heavier than 60 lb., No. 1 open hearth, f.o.b., mill; thereafter, standard, carbon steel, No. 1 open hearth, 115 lb. per linear yard, control cooled, base quantity, f.o.b. mill.
[10] 1950 price for nails, wire, 8d common; 1955, nails, wire, 8d common, carload lots; 1957 through August 1960, packed in fiberboard boxes; September 1960, lots of 30,000 lbs.; September 1961, 50 lbs.

[1] Prior to 1955, 34 cities except that indexes for food are based on prices in 51 cities in 1940 and 56 cities in 1950. Separate city indexes not compiled for 26 medium- and small-sized cities included in the national average.
[2] As of November. [3] As of October.
[4] Includes restaurant meals and other food bought and eaten away from home.
[5] Includes home purchase and other home owner costs.
[6] Comprises tobacco, alcoholic beverages, and miscellaneous services such as legal services, banking fees, and burial services.

No. 483. Consumer Price Indexes—Relative Importance of Commodity Groups and Services (Percent Distribution): 1947 to 1963

[Excludes Alaska and Hawaii. The relative importance of a component of the Consumer Price Index at any given time represents its expenditure weight multiplied by the relative price change from the weight date to a later period and the result expressed as a percentage of the total for all items. Changes in the relative importance of a component result from (*a*) major weight revisions based on comprehensive consumer expenditure surveys; (*b*) minor weight adjustments to take account of changes in the list of items priced; and (*c*) different rates of price change among the various items. In the absence of a weight revision, if prices of all items changed at the same rate, the relative importance of each item or group in the index would remain unchanged. For further explanation of the index, see text, p. 349]

No. 485. Annual Budget Costs—City Workers' Families and Retired Couples, 20 Cities: 1959

[Based on autumn prices. City worker's family consists of 38-year-old employed husband, wife not employed outside home, 13-year-old boy, and 8-year-old girl, living in a rented dwelling. Retired couple consists of retired husband and wife, 65 years old or over. Budget represents an estimate of total cost of a representative list of goods and services necessary to maintain a "modest but adequate" (not a minimum subsistence) level of living in a large city]

[1] Includes alcoholic beverages. For retired couples, also includes a small allowance for guest meals.
[2] Average contract rent for tenant-occupied dwellings (5 rooms for city worker's family and 2 or 3 rooms for retired couple) that conform to housing standards specified for budget plus cost of required amounts of heating fuel, gas, electricity, water, and specified equipment.
[3] Weighted average costs of automobile owners and nonowners.
[4] Includes allowances for life insurance, occupational expenses, Federal old-age and survivors insurance, and, for California and New York, employee contributions to disability insurance as required by State law.

No. 486. Annual Average Unit Values—Selected Articles Imported and Exported: 1950 to 1963

[**In dollars per unit.** Includes trade of Alaska, Hawaii, and Puerto Rico with foreign countries. Average values obtained by dividing total value of imports for consumption or domestic exports by total quantity. Values of goods imported represent market values in foreign country from which imported. Values of goods exported represent values at port of exportation. Average values may show actual price movements only roughly for commodities subject to considerable price variations among different grades, methods of packing, etc., and to year-to-year variations in proportions of grades etc. Also average values of agricultural exports include effects of CCC sales for exports, at prices well below U.S. market quotations, and of other Government programs]

ARTICLE	Unit	1950	1955	1959	1960	1961	1962	1963

No. 487. Average Retail Prices of Selected Foods: 1940 to 1964

[**In cents per pound, except as indicated.** Excludes Alaska and Hawaii. Data are averages of prices reported by retail dealers in cities included in the Retail Food Index. (See footnote 2, table 488.) Number of cities also varies slightly according to availability of prices for each item. Sales taxes not included after 1940. Prices for individual cities combined on basis of population weights. See also *Historical Statistics, Colonial Times to 1957*, series E 161–176]

Section 13

Elections

This section relates primarily to Presidential, Congressional, and gubernatorial elections. Also presented are summary tables on Congressional legislation.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election.* The Congressional Quarterly Service publishes a special report, *Complete Returns of the 19— Elections by Congressional District* in March or April of each odd-numbered year. This report, prepared from figures gathered by the Governmental Affairs Institute, presents the official results of Presidential, Congressional, and gubernatorial elections. A detailed presentation of both Federal and State election statistics appears also in *America Votes,* issued biennially by the Governmental Affairs Institute. Data on Federal elections also appear in the *Congressional Directory,* United States Congress, and in the official State documents of the separate States.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices and, in most States, for State offices.

The conduct of elections for Federal, State, and local offices and on State and local issues is regulated by State laws or, in some cities and a few counties, by local charter. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States, and grants to Congress the right to regulate the times, places, and manner of electing Federal officers.

The election of the President of the United States is provided for in the Constitution, article II, section 1, through the establishment of an electoral college in each State, for each Presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States. The 22d Amendment to the Constitution, adopted in 1951, limits Presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years. The 23d Amendment to the Constitution, adopted in 1961, grants the District of Columbia electors for President and Vice President.

The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912, it has remained constant at 435. However, the legislation granting Statehood to Alaska and Hawaii allotted 1 Representative to each of those States and, during 1960 to 1962, increased the total of members to 437. The total reverted to 435 after reapportionment following the 1960 Census. The Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers . . . ." The Constitution also requires that each State have at least 1 Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were

originally chosen by the State legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in headnotes to each table unless the inclusion or exclusion is self-evident.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

FIG. XXI. POPULAR VOTE CAST FOR PRESIDENT, BY MAJOR PARTIES: 1900 TO 1960

[See table 497]

[1] Includes votes for minor party candidates, independents, unpledged electors, and scattered write-in votes.
[2] Includes Alaska and Hawaii.
[3] Mainly Progressive in 1912 and 1924, States Rights and Progressive in 1948.
[4] Socialist Labor only.
[5] Includes 4,831,289 votes cast for La Follette, official candidate for the Progressive Party.
[6] Workers Party.
[7] See also table 504.
[8] Includes minor party votes.
[9] Includes Hawaii figures for July 1959.

No. 502. Apportionment of Membership in House of Representatives, by States: 1790 to 1960

[Population figures used for apportionment purposes are those determined for States by each decennial census. Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, excluded two-fifths of slaves. Until 1850, apportionment ratios were chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by predetermined number of Representatives; from 1910 on, apportionment ratios shown were computed by dividing fixed number (435) of Representatives into apportionment population but were not used in the original calculations, which were based on priority lists. No reapportionment based on 1920 Population Census. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics, Colonial Times to 1957*, series Y 155-204]

[1] Figures rounded to the nearest thousand.
[2] Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 6.
[3] Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 6.
[4] Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192).
[5] Includes one member each assigned to Alaska and Hawaii after apportionment.
[6] Assigned after apportionment. [7] Members seated in 1959.
[8] Included in apportionment act in anticipation of Statehood.
[9] Included in the 20 members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 503. PRIMARY ELECTIONS HELD IN SELECTED SOUTHERN STATES: 1960 AND 1962

[**Vote in thousands.** A primary election is one in which the voters of a political party nominate candidates to run for public office in a general election. *Because of the overwhelming supremacy of the Democratic Party in the South, votes cast in the primary elections for Senator or Governor are often a better measure of voter participation than those cast in the general elections*]

STATE	1960		1962		STATE	1960		1962	
	Office	Vote cast	Office	Vote cast		Office	Vote cast	Office	Vote cast
Alabama	Senator	404	Governor [1]	637	South Carolina	Senator	306	Governor	328
Arkansas	Governor	407	Governor	405	Tennessee	Senator	718	Governor	727
Florida	Governor [1]	937	Senator	698	Texas	Governor	1, 529	Governor [1]	1, 447
Georgia	(2)	(2)	Governor	852	Virginia	(2)	(2)	Governor [5]	352
Louisiana	Governor [1 3]	843	Governor [4]	906					
Mississippi	Senator	145	Governor [1 4]	474					
North Carolina	Governor [1]	653	(2)	(2)					

[1] First primary.
[2] No contested Democratic primary for Senator or Governor this year in this State.
[3] Vote in 1959.
[4] Vote in 1963.
[5] Vote in 1961.

Source: Governmental Affairs Institute, Washington, D.C.; unpublished data.

No. 504. Vote Cast for United States Representatives, by Major Political Parties, by States: 1958, 1960, and 1962

[**In thousands.** In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Alaska, Delaware, Hawaii, Nevada, Vermont, and Wyoming, only 1 Representative is elected from the State at large. In New Mexico and North Dakota, 2 Representatives are elected from the State at large. In Connecticut, Representatives are elected by district, except 1 who is elected at large; these at-large votes are not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party as such are cast in endorsement of a candidate of another party, the votes are counted as for the endorsing party. See also notes below]

[1] Includes vote cast for minor parties.
[2] Includes Alaska and Hawaii; general election held in Alaska on Nov. 25, 1958, and in Hawaii on July 28, 1959.
[3] Includes vote cast based on the candidate receiving the greatest number of votes.
[4] 1958 and 1960 data for the 5th District only; 1962 for 3rd and 4th Districts. Arkansas law does not require tabulation of votes for unopposed candidates.
[5] A person may be candidate of one or more parties for same office, so party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.
[6] General election held July 28, 1959.
[7] Voters entitled to vote for any 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party.
[8] Beginning 1960, 2 at-large positions filled separately, candidates filing for position 1 or 2. Voters have 1 vote for each separate position. State totals represent largest number of votes cast for either position. Therefore, total shown for each party does not necessarily add to overall State total.
[9] Includes votes cast by minor parties for Democratic-endorsed and Republican-endorsed candidates.

Section 14

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, receipts, expenditures, and debt. The personnel data relate to civil staffing and payrolls for the various public functions and agencies, to employee characteristics, and to civil service status.

Principal sources of the fiscal data are *The Budget of the United States Government*, published annually by the Bureau of the Budget, and the Treasury Department's annual *Combined Statement of Receipts, Expenditures, and Balances*, the official report relating to the receipts, appropriations, expenditures, and fund accounts. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields.

The day-to-day cash operations of the Federal Government clearing through the accounts of the Treasurer of the United States are reported in the *Daily Statement of the United States Treasury*. The issue for the last day of the month contains information as to the public debt receipts and expenditures for the month and the outstanding public debt as of that day.

Receipts and expenditures of the Government classified as to administrative budget and other transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities, including financial statements of Government corporations and business-type enterprises. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Circulation Statement of United States Money*.

Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and geographic area. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns, respectively; the latter presents income data for sole proprietorships and partnerships along with summary statistics for corporations. Biennial *Statistics of Income* publications present data from fiduciary income tax, estate tax, and gift tax returns.

Federal employment and payroll figures are compiled primarily by the Civil Service Commission and published in its regular *Annual Report* and its *Monthly Report of Federal Employment*. The Commission also publishes annual reports on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service* and on occupations of both white-collar and blue-collar Federal workers. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

Major budget concepts.—Data on Government financial transactions are used for so many purposes that no single budgetary system is wholly adequate for complete analysis of the effect of Federal fiscal operations on the level and composition of economic activity. For this reason, several accounting concepts have been developed, among which the major ones are the administrative budget, the consolidated cash statement of Federal transactions, and the Federal sector of the national income and product accounts.

The *administrative budget* covers receipts and expenditures of government-owned funds, of which there are four types. (1) The general fund is credited with all receipts not earmarked by law for a specific purpose and is charged with expenditures from the amounts appropriated by the Congress for the general support of the Government. (2) Special fund accounts are credited with receipts from specific sources as authorized by law but not generated from a cycle of operations and may be expended only for the particular purposes specified by law. (3) Public enterprise (revolving) funds finance a cycle of operations in which expenditures generate receipts, primarily from the public. (4) Intragovernmental revolving and management funds finance a continuing cycle of operations with receipts derived from those operations and facilitate financing operations within and between Government agencies. For many years, the administrative budget accounts served as the principal basis for financing the affairs of Government and so long as Federally owned funds provided the bulk of financial support for governmental programs, it provided adequate coverage of Federal financial transactions.

The administrative budget does not include trust funds, which consist of money held in trust by the Government for use in carrying out specific purposes or programs in accordance with the terms of a trust agreement or statute, nor does it include deposit fund accounts consisting of funds held by the Government in suspense or as banker or agent pending appropriate disposition. In recent years, trust fund operations have grown so rapidly that the flow of financial transactions between the Federal Government and the public is considerably larger than indicated by the administrative budget.

The *consolidated cash statement* of Federal receipts and payments is more comprehensive than the administrative budget. It covers not only funds wholly owned by the Federal Government but also the financial transactions of Federal trust funds, the largest of which are the social security and highway trust funds, and the transactions of five Government-sponsored enterprises (the Federal Deposit Insurance Corporation; the Federal intermediate credit, land, and home loan banks; and banks for cooperatives).

The Federal sector of the *national income and product accounts* provides a measure of the direct impact of Federal fiscal activity on the Nation's economy. Like the consolidated cash statement, this account includes most trust fund transactions. In contrast to both the administrative budget and the consolidated cash statement, however, it records only those receipts and expenditures which directly affect the current flow of income and output. Therefore, it excludes such capital or financial transactions as loans, mortgages, and the purchase or sale of existing assets, which represent neither the production of current output nor incomes earned in production. Also, whereas the cash and administrative budgets count business tax receipts as they are collected and generally count expenditures at the time of payment, the Federal sector account records some taxes as they accrue and records purchases when delivery is made.

The Federal sector account is especially suited for an analysis of fiscal policy; it was designed to complement the data on private expenditures and incomes contained in the national income accounts. The consolidated cash statement is generally more useful than the national income accounts for purposes of analyzing the Federal impact on financial markets since the actual flow of cash payments to the Government may be more significant for such purposes than the accrual of tax liabilities.

Treasury receipts and expenditures.—All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States, regardless of their ultimate disposition or availability for expenditure. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

Receipts such as taxes, customs duties, trust receipts, etc., and miscellaneous budget receipts, which are collected by Government agencies, and expenditures represented by checks issued and cash payments made by disbursing officers are reported in the *Monthly Statement of Receipts and Expenditures of the United States Government* and in the annual *Combined Statement of Receipts, Expenditures, and Balances*. These monthly and annual reports include deposits and collections in, and payments from, cash accounts of Government agencies held outside the Treasury as well as those of the general account of the Treasurer of the United States.

Foreign currency operations.—Transactions relating to foreign currencies acquired by the Government, without the payment of dollars, are not included in reports of dollar appropriations and therefore are reported as a separate and distinct Government activity in Part V of the annual *Combined Statement of Receipts, Expenditures, and Balances*. Such currencies are primarily generated under the Agricultural Trade Development and Assistance Act, as amended.

Public and private debt.—These data appear annually in the May issue of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the private area, those affiliated corporations which operate under a single management. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

Employment and payrolls.—The Civil Service Commission collects employment and payroll data from all departments and agencies of the Federal Government but not from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month. Employment totals exclude persons serving without compensation, persons on leave without pay for scheduled periods longer than 30 days, persons in leave status after reduction-in-force, and persons hired informally "on the spot" without formal appointment procedures to cope with fire, flood, or other extreme emergencies.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months. Monthly payroll totals fluctuate in amount because the number of work days in each month varies from 20 to 23 days. Holidays may be disregarded since Federal employees are paid for the eight national holidays on which they do not work.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in headnotes to each table unless the inclusion or exclusion is self-evident.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

1964 estimate				114.4	122.7	−8.3			
1965 estimate				119.7	122.7	−2.9			

[1] Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust (including deposit) accounts and Government-sponsored enterprises as reflected on the books of the Treasurer of the United States as well as administrative budget accounts of Federal Government.

[2] Estimated by Council of Economic Advisers from receipts and expenditures in the national income accounts. Cash receipts consist of personal tax and nontax receipts, indirect business tax and nontax accruals, and corporate tax accruals adjusted to a collection basis. Cash payments are total expenditures less Federal grants-in-aid and less contributions for social insurance. (Federal grants-in-aid are therefore excluded from State and local receipts and payments and included only in Federal payments.)

[3] Less than $50 million.

Source: Executive Office of the President, Council of Economic Advisers; published in *Economic Report of the President*, January 1964. Data from Treasury Dept., Bureau of the Budget, and Dept. of Commerce, except as noted.

No. 518. Federal Receipts and Expenditures in the National Income Accounts: 1950 to 1965

[**In billions of dollars.** For years ending June 30. Beginning 1960, includes Alaska and Hawaii. Includes transactions of trust accounts; excludes capital transactions of a financial nature and certain lending transactions. Business taxes included on an accrual basis; purchases timed with delivery of goods and services; Commodity Credit Corporation guaranteed price-support crop loans financed by banks counted as expenditures when loans are made]

No. 519. Reconciliation of Federal Administrative Budget and Consolidated Cash Statement With National Income Accounts: 1960 to 1965

[In billions of dollars. For years ending June 30]

Receipts and expenditures	1960	1962	1963	1964 est.	1965 est.
Administrative budget receipts	77.8	81.4	86.4	88.4	93.0
Less: Intragovernmental transactions	3.0	3.8	4.3	4.1	4.1
Receipts from exercise of monetary authority	.1	.1	(1)	.1	.1
Plus: Trust fund receipts	20.3	24.3	27.7	30.2	30.9
Equals: Federal cash receipts from the public	95.1	101.9	109.7	114.4	119.7
Adjustments for agency coverage: Less: Dist. of Col. revenues	.2	.2	.3	.4	.4
Adjustments for netting and consolidation:					
Less: Interest, dividends, and other earnings	1.4	1.0	1.1	1.2	1.3
Plus: Contributions to Federal employees' retirement funds, etc.	1.6	1.8	1.9	1.9	1.9
Adjustments for timing: Plus: Excess of corporate tax accruals over collections; personal taxes, social insurance contributions, etc.	.4	2.0	.6	—.1	—.2
Adjustments for capital transactions: [2] Less: Realization upon loans and investments, sale of Government property, etc	.9	.9	1.5	1.1	1.0
Equals: Receipts—National income accounts	94.5	103.6	109.3	113.6	118.8
Administrative budget expenditures	76.5	87.8	92.6	98.4	97.9
Less: Intragovernmental transactions	3.0	3.8	4.3	4.1	4.1
Accrued interest and other noncash expenditures (net)	.4	1.5	1.1	.9	.5
Plus: Trust fund expenditures (including Government-sponsored enterprise expenditures, net)	21.2	25.1	26.5	29.3	29.4
Equals: Federal cash payments to the public	94.3	107.7	113.8	122.7	122.7
Adjustments for agency coverage: Less: Dist. of Col. expenditures	.3	.3	.3	.4	.4
Adjustments for netting and consolidation:					
Less: Interest received and proceeds of Government sales	.9	.8	.6	.6	.9
Plus: Contributions to Federal employees' retirement funds, etc.	1.6	1.8	1.9	1.9	1.9
Adjustments for timing:					
Less: Commodity Credit Corporation foreign currency exchanges	.9	1.1	.3	.3	.1
Plus: Excess of interest accruals over payments on savings bonds and Treasury bills	.5	.7	.9	.8	.6
Excess of deliveries over expenditures and misc. items [3]	—.3	2.1	(1)	—.4	.6
Adjustments for capital transactions: [2]					
Less: Loans, Federal National Mortgage Association secondary market mortgage purchases, redemption of International Monetary Fund notes, etc	1.0	2.7	.7	1.1	.2
Trust and deposit fund items	.7	.8	1.9	3.4	2.6
Purchase of land and existing assets	.1	.1	.1	.1	.1
Equals: Expenditures—National income accounts	92.1	106.4	112.6	119.1	121.5

[1] Less than $50 million.
[2] Transactions in financial assets and liabilities, land, and secondhand assets. Acquisition of newly produced tangible assets included in expenditures for goods and services as defined in national income and product accounts.
[3] Includes net change in Commodity Credit Corporation guaranteed nonrecourse loans and increase in clearing account.

No. 523. Federal Administrative Budget and Trust Fund Receipts and Expenditures, by Source and Function: 1955 to 1965

[**In millions of dollars.** For years ending June 30. Expenditures reported on a checks-issued basis. "Administrative budget" receipts and expenditures are mainly those of general and special accounts and exclude refunds of receipts, transfers from the general fund to trust funds, interest paid to the U.S. Treasury by revolving funds, transfers of capital between wholly owned Government corporations and the U.S. Treasury, and debt transactions of Government enterprises. Expenditures from public debt authorizations are included as well as net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises. Trust fund data also exclude refunds of receipts, but trust fund expenditures include security transactions of Government-sponsored enterprises. See also *Historical Statistics, Colonial Times to 1957*, series Y 254–256 and Y 356–367]

No. 524. Subsidy Programs of the Federal Government—Net Expenditures: 1955 to 1965

[**In millions of dollars.** For years ending June 30. Minus sign (−) indicates receipts exceeding expenditures. Excludes veterans programs, foreign aid, public assistance to the needy, grants to States to help finance low-priced school lunches, hospital operation and medical care administered by the Public Health Service, and various aids to Indians. Due to changes in classification, not all programs are strictly comparable for all years. Agency indications refer to status in fiscal year 1963]

[1] Actual tax liability on selected net incomes and necessary assumptions.
[2] Mar. 1, 1913, to Dec. 31, 1915.
[3] Normal tax rates of 1928 Act were reduced for 1929 only by Joint Resolution of Congress, No. 133, approved in December 1929.
[4] Rates and exemptions for 1936 and 1938 Acts were identical and resulted in the same tax liabilities.
[5] Individual Income Tax Act of 1944. [6] Excludes self-employment tax.
[7] Internal Revenue Code of 1954. [8] Split-income basis.
[9] Tax liability divided by stated net income.

n.a. Not available.
[1] Net income for 1940.
[2] Income and defense tax before credits for 1940; income tax after credits beginning 1945.
[3] Joint returns counted twice for percent of population filing.
[4] Exemptions 1940: Married $2,000, single $800, each dependent $400. Exemptions 1945: Married $1,000, single $500, each dependent $500. Exemptions 1950 and after: Joint return $1,200, single $600, each dependent $600, additional exemption for taxpayer, and his spouse on joint return, of $600 if blind and $600 if age 65 or over.
[5] Beginning 1955, salaries after sick pay exclusion.
[6] Beginning 1955, dividends after exclusions.
[7] For 1950, business profit or loss after net operating loss deduction.
[8] Comprises all income subject to income tax not elsewhere listed; for 1945-1955, includes not more than $100 per return reported on Form W-2 of dividends, interest, and wages not subject to income tax withholding and, for 1959, not more than $200 per return reported on form 1040A. However, for 1955-1961, this income has been reduced by net operating loss deduction which is a component of adjusted gross income.

No. 533. Corporation Income Tax Returns—Summary: 1940 to 1961

[**Money figures in millions of dollars.** Represents returns covering accounting periods ending between July 1 of year shown and July 1 of following year. Includes Alaska and Hawaii; based on income tax retunrs as filed, prior to audit adjustments and other changes made after filing. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations. Includes data from returns of small business corporations which after September 2, 1958, could elect to be taxed through shareholders. Beginning 1958, income tax shown excludes tax on profits of corporations making this election. See source publications for changes in law affecting comparability of historical data. Beginning 1955, based on a probability sample. Corporate data based on income tax returns appear on pp. 493–495, 498, and 847. See also *Historical Statistics, Colonial Times to 1957*, series Y 280–291]

Adjusted excess profits net income	912	8,368	8,985	----	----	----	----	----

[1] Consists of business receipts, interest less amortizable bond premium, rents, royalties, net gain from capital assets (as defined by law) and other property, dividends, and other taxable income.
[2] Net income (or deficit) is gross *taxable* income less allowable current year deductions except statutory deductions for dividends and Western Hemisphere trade corporations. Excludes tax-exempt Government interest, which is included in total compiled receipts. [3] Includes defense tax.
[4] For tax reported, see above.

[1] Includes categories of debt not subject to statutory debt limit. Net Federal debt defined as gross debt outstanding less Federal Government securities held by Federal agencies and trust funds, and Federal agency securities held by U.S. Treasury and other Federal agencies; it thus equals Federal Government and agency debt held by the public.

[2] Includes State loans to local units.

[3] Long-term debt, original maturity of 1 year or more from date of issue; short-term, less than 1 year.

[4] Debt of farmers and farm cooperatives to institutional lenders and Federal Government lending agencies; farmers' financial and consumer debt included under "nonfarm" category.

[5] Comprises debt incurred for commercial (nonfarm), financial, and consumer purposes, including debt owed by farmers for financial and consumer purposes.

[1] Based on estimated population for U.S., as of July 1 of each year; beginning 1959, includes Alaska, and 1960, Hawaii.

[2] Excludes bonds issued to Pacific railways and Navy pension fund.

[3] Calculated on total Federal expenditures which have not been reduced by the amounts of interfund transactions representing interest payments and certain other payments to Treasury.

[4] Bank eligible bonds; for 1945–54 also includes bank restricted bonds.

[5] Comprises postal savings and Panama Canal bonds, and prior to 1947, also conversion bonds.

[6] Comprises depositary bonds, and adjusted service bonds until they matured on June 15, 1945. Also includes Armed Forces leave bonds for 1947–51; Treasury bonds, Rural Electrification Administration series, beginning 1961; certificates of indebtedness, foreign series, and foreign currency series, beginning 1962; treasury notes, foreign series; and treasury bonds, foreign currency series, beginning 1963.

No. 540. Civilian Employment and Payrolls of the Federal Government, by Branch: 1930 to 1964

[Includes data for employees in Alaska, Hawaii, outlying areas of the U.S., and in foreign countries. Monthly employment figures represent number in active-duty status as of last day of month, including intermittent employees who worked during month. Annual employment figures are averages of monthly figures. Payrolls are totals for calendar year or month, as indicated. Excludes employees of Central Intelligence Agency and, beginning August 1959, those of the National Security Agency, for security reasons. Employees of General Accounting Office and Government Printing Office included with legislative branch. See *Historical Statistics, Colonial Times to 1957*, series Y 241-250, for employment for years ending June 30]

[1] As of January 31.
[2] Federal Civil Defense Administration and Office of Defense Mobilization combined as Office of Civil and Defense Mobilization in 1958; became Office of Emergency Planning by 1962.
[3] Includes employees hired under the Public Works Acceleration Act by the following departments in 1963 and 1964, respectively: Agriculture 3,291 and 88, and Interior 3,681 and 2,804; in 1963: Army, 242, Veterans Administration, 39, and Tennessee Valley Authority, 158.
[4] 1960 figure includes 15,574 temporary piece-rate workers on 1960 Census and data for 1960 to 1964 include an average of 164 seamen per year employed by the Maritime Administration.
[5] 1961, 1962, 1963, and 1964 data include, respectively, 227, 784, 1,110, and 1,057 employees in the Peace Corps and 14,751, 15,495, 16,782, and 16,798 employees in the Agency for International Development.
[6] Functions transferred to Dept. of State, Development Loan Fund in 1962, and Foreign Operations Administration in 1956.
[7] 1955 and 1959 include Federal Intermediate Credit Banks and Central Bank for Cooperatives under Farm Credit Administration supervision.
[8] Became National Aeronautics and Space Administration.

Section 15

State and Local Government Finances and Employment

Nationwide statistics relating to State and local governments, their numbers, finances, and employment, are compiled primarily by the Bureau of the Census. Each five years, the Bureau conducts a Census of Governments (most recently for the year 1962) involving collection of data for all governmental units in the United States. The Bureau of the Census also conducts annual surveys which cover all the State governments and a sample of local governments. Publications issued annually by the Bureau of the Census include a report on governmental finances which presents figures for the Federal Government, nationwide totals for States and local governments, by type, and State-local data by States. Also issued annually are series of publications on State finances, city finances, and public employment and a descriptive leaflet, *Bureau of the Census Publications on Governments.* There is also a series of quarterly reports on tax revenue of State and local governments.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for some of the largest local governments are compiled from their official records and reports by Census Bureau personnel, and classified into uniform categories for statistical reporting.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections (for example, Education, Transportation—Land, and Social Insurance and Welfare Services).

Governmental units.—The governmental structure of the United States includes, in addition to the Federal Government and the States, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of "special districts." As shown by table 551, more than 90,000 local governments were identified by the 1962 Census of Governments. The figures for governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending June 30, except for a few States with other closing dates in the calendar year specified. Local government figures are for fiscal years ending in the calendar year specified, except for a few units which close their fiscal years in the succeeding January. Most school districts have fiscal years ending June 30; a majority of other local governments operate on a fiscal year ending December 31.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States, although based upon the

official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

The framework for these statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved and as to expenditure according to the purpose of the spending.

The general government sector comprises all activities other than those classified as utilities, liquor stores, and insurance trusts. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments. Liquor stores are operated by 16 States and by a few local governments. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

In the basic framework of these statistics, revenue and expenditures reported for these sectors, individually and in total, represent only external transactions and exclude transfers among agencies and funds of the government concerned. Certain internal transactions are shown separately, however, in related tables.

Employment and payrolls.—Public employment and payroll data are primarily from Census Bureau reports based on mail canvassing of State and local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 550. County, Municipal, and Township Governments, 1962, and Their Population, 1960, by Population Size-Group

[Number of governments as of January 1962; population as of April 1960. Includes Alaska and Hawaii. Township governments include "towns" in the 6 New England States, New York, and Wisconsin]

Population size-group	Counties			Municipalities			Townships

No. 551. Local Governments, by Taxing Power and Type, and Public School Systems—States: 1962

[Limited to governments actually in existence. Excludes, therefore, a few counties and numerous townships and "incorporated places" existing as areas for which statistics can be presented as to population and other subjects, but lacking any separate organized county, township, or municipal government]

[1] Relates to officially recorded or "assessed" values, which should not be interpreted as representing the current market worth of taxable property. Excludes value of property wholly exempt from local property taxes.

[2] Entries appear only for types of property subject to State assessment, and do not represent valuations that comprise all railroad or utility property.

[3] Less than 0.05 percent.

[4] All assessment in Hawaii is performed by a State agency, but valuations are shown here as "locally assessed" for comparability with data for other States.

No. 573. Summary of City Government Finances: 1955 to 1962

[**In millions of dollars.** Beginning 1959, includes Alaska, and 1960, Hawaii. Represents all municipalities (see tables 550 and 551) and their dependent agencies; excludes other local governments overlying city areas. Includes sample-based estimates for cities of less than 25,000 through 1960, and less than 50,000 beginning 1961; thus subject to sampling variation]

[1] Federal civilian employment within the U.S. as of September 1963, including employees of the National Guard paid directly from the Federal treasury. Total accordingly differs from Federal employment reported in tables 574 and 575 which pertain to October 1963 and include employees working outside U.S.

[2] Subject to sampling variation.

[3] Based on estimated population as of July 1, 1963.

[4] Data for Federal employees in the District of Columbia are for Washington, D.C., Standard Metropolitan Statistical Area, and include substantial numbers of employees working in suburban locations in Maryland and Virginia.

Source: Dept. of Commerce, Bureau of the Census; annual report, *State Distribution of Public Employment in 1963*.

No. 578. State and Local Government Employment and Payrolls, by Type of Government: 1955 to 1963

[For October, except as noted. Beginning 1959, includes Alaska and Hawaii. For payrolls, see also *Historical Statistics, Colonial Times to 1957*, series Y 223-240]

Section 16

Banking, Finance, and Insurance

Banking system.—Banks in this country are organized under the laws of both the States and the Federal government. State-chartered banks are supervised by officials of the respective States. "National" banks, organized under Federal law passed in 1863, are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected from national banks since 1893; from 1897 to 1961, summaries of these reports were published in the *Abstract of Reports of National Banks.* Since September 1963, some of these data, by States, have been published in *The National Banking Review,* a quarterly publication of the Comptroller of the Currency. Summaries of call report data also appear in the *Annual Report* of the Comptroller.

The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. It includes national banks and such State banks as voluntarily join the System. After its establishment, State bank members began to submit their statements of condition at the same time and in substantially the same form as national banks. These statements are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the System. They are published in the *Summary Report, Assets and Liabilities of Member Banks,* usually four times a year, and in summary form in the *Federal Reserve Bulletin.*

The Federal Deposit Insurance Corporation, established in 1933, insures each deposit account up to $10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund. Beginning with 1947, an all-bank series has been tabulated twice a year by the Corporation. A monthly series, also beginning with 1947 and based in part on the all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

Currency.—Currency, including coin and paper money, represents a relatively small part of the total media of exchange in the United States, as most payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, except gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States, whether in current active use or held idle. It also includes some currency which, strictly speaking, is not a part of the money supply in the hands of the public, such as cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers. Historical data on the stock of money and money in circulation appear in the *Annual Report of the Secretary of the Treasury.*

Credit agencies.—Government corporations and credit agencies, operating under mandates and powers given them by the Congress, make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Statistics relating to the operations of Government credit agencies are available in reports of the individual agencies; statistics on their assets and liabilities are published quar-

terly in the *Treasury Bulletin.* In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by The Spectator. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare. Consumer credit data are published currently in the *Federal Reserve Bulletin.*

Securities.—Statistical information on new security issues has been provided by the *Journal of Commerce* since 1906 and the *Commercial and Financial Chronicle* from 1919 to 1957. The statistics of the *Commercial and Financial Chronicle* include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and of foreign governments and their subdivisions. A more comprehensive series of new issues with detailed information on the intended uses of net and gross proceeds has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over $100,000 and with terms to maturity of more than one year. (See table 635.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin,* and the *Survey of Current Business.*

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin.*

Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

Security price averages.—Among the most widely known indexes of security prices are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Indexes of the Standard and Poor's Corporation, available since 1918, are now based on daily closing prices of 500 stocks. (See table 632.) The Securities and Exchange Commission compiles an index of weekly closing prices of 300 stocks listed on the New York Stock Exchange, comprising 32 industry groups. These indexes are published in the Commission's *Statistical Bulletin,* the Council of Economic Advisers' *Economic Indicators,* and the *Federal Reserve Bulletin.*

Insurance.—Insurance was formerly classified into three categories—life, fire and marine, and casualty. With the introduction of multiple-line underwriting, insuring companies are now classified as either life or property. Companies which underwrite accident and health insurance only are included with life insurance companies; those

which underwrite accident and health insurance in addition to one or more property lines are included with property insurance companies. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital and/or surplus.

The regulation of insurance is in the hands of the various States and the District of Columbia, which collect a great deal of primary information on insurance. The Federal Government does not collect comprehensive statistics on insurance on a national basis. Basic theories and practice are parallel throughout insurance but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Individual States collect data on all insurers operating within their respective jurisdictions, and many of the States publish an annual insurance report giving individual company data and aggregates of certain items for the companies operating within the State. Organizations representing certain classes of insurers collect data and publish many studies and reports for these classes. A sourcebook of statistics on life insurance, the *Life Insurance Fact Book*, is published annually by the Institute of Life Insurance. Health insurance data are published by the Health Insurance Council in the annual report, *The Extent of Voluntary Health Insurance in the United States*, and by the Health Insurance Institute in its annual *Source Book of Health Insurance Data*. Another source of insurance statistics is represented by the commercial publishers, such as The Spectator and the Alfred M. Best Company. The annual *Spectator Health Insurance Index* (formerly *Accident Insurance Register*) contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. Spectator's annual publication *Insurance by States of Fire, Marine, Casualty, Surety and Miscellaneous Lines*, gives less detailed data for other classes of insurance. *Best's Life Insurance Reports* and *Best's Insurance Reports*, fire and casualty edition, both annual publications, give individual company data for all types of life and fire and casualty insurance companies.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

[1] Beginning May 1961, reclassification of deposits of foreign central banks reduced this item by $1,900 million ($1,500 million to time deposits adjusted and $400 million to demand deposits adjusted).
[2] Deposits other than interbank and U.S. Government, less cash items reported in process of collection.
[3] Excludes interbank time deposits; U.S. Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.
[4] Prior to 1950, includes a relatively small amount of demand deposits. Beginning June 1961, includes amounts now reported by insured mutual savings banks as demand deposits; formerly, before passage of the recent amendment of the F.D.I. Act, reported as time deposits or other liabilities.

No. 588. Demand Deposit Accounts—Bank Debits and Deposit Turnover: 1945 to 1964

[Excludes Alaska and Hawaii. Data partly estimated for 1945 and 1950 and comprise only debits or charges to demand deposit accounts of individuals, partnerships, and corporations, and of State and local governments, and payments from trust funds on deposit in the banking department. Excludes debits to U.S. Government deposit accounts, debits to time deposit accounts, and payments of certified and officers' checks, payments in settlement of clearing house balances, charges to expense and miscellaneous accounts, corrections and similar charges, and debits to the accounts of banks, that is, to interbank accounts. See *Historical Statistics, Colonial Times to 1957*, series X 216–225, for related but not comparable data]

No. 591. All Banks—Number and Principal Assets and Liabilities, by Class of Bank: 1940 to 1964

[**Money figures in millions of dollars.** As of December 31, except as indicated. Includes all banks in conterminous U.S. and, beginning 1959, all banks in Alaska (one Federal Reserve System member bank was previously included) and all banks in Hawaii. Banks added in 1959 had total assets of $900 million on December 31, 1959. All banks comprise all commercial banks and all mutual savings banks. Commercial banks comprise all Federal Reserve System member banks (including one bank in the Virgin Islands that became a member on May 31, 1957) and all nonmember commercial banks. Stock savings banks and nondeposit trust companies are included with commercial banks. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc. See *Historical Statistics, Colonial Times to 1957*, series X 20-41 and X 95-128, for related but not comparable data]

[1] Includes other assets and liabilities not shown separately. [2] Excludes reciprocal balances, except for 1940. Reclassification of deposits of foreign central banks in May 1961 reduced interbank deposits by a total of $1,900 million ($1,500 million time to other time and $400 million demand to other demand).

[3] Preliminary. [4] New York City and Chicago were reclassified as reserve cities effective July 28, 1962.

[5] Beginning June 1963, 3 New York City banks with loans and investments of $392 million and total deposits of $441 million were reclassified as country banks.

In effect June 1, 1964	[4]	16½	12	4

[1] First-of-month or midmonth dates record changes at country banks, and other dates (usually Thursday) record changes at central reserve or reserve city banks.
[2] Demand deposits subject to reserve requirements which, beginning Aug. 23, 1935, comprise total demand deposits minus cash items in process of collection and demand balances due from domestic banks (also minus war loan and Series E bond accounts during the period Apr. 13, 1943-June 30, 1947).
[3] Requirement became effective at central reserve and reserve city banks on Aug. 11, and at country banks on Aug. 16.
[4] Authority of Board of Governors to classify or reclassify cities as central reserve cities was terminated July 28, 1962.

[1] Adjusted to Dec. 31, 1963.

[2] Includes principal disbursements in all cases; in deposit payoff cases also includes field payoff expenses and other insurance expenses; in deposit assumption cases includes advances for asset protection, liquidation expenses, and other insurance expense.

[3] For definition of "member," see headnote, table 603.

[4] Disbursement totals for each year relate to cases occurring during that year and may thus contain some amounts disbursed in subsequent years for such cases.

[5] No cases requiring disbursements by FDIC originated in 1962.

No. 611. Federal Home Loan Bank System—Member Institutions: 1950 to 1963

[**Money figures in millions of dollars.** Includes Alaska, Hawaii, Puerto Rico, and Guam. Federal Home Loan Bank System is composed of savings and loan associations, savings banks, and insurance companies engaged in home financing. Federal Home Loan Banks provide a permanent reserve credit system for member institutions. The Banks are privately owned by their members and are entirely self-sustaining. Federal Home Loan Bank Board supervises the operations of the 11 Federal Home Loan Banks, and of the Federal Savings and Loan Insurance Corporation, and charters and regulates Federal savings and loan associations. See *Historical Statistics, Colonial Times to 1957*, series N 188, for advances outstanding]

[1] Averages of daily offering rates of dealers.
[2] Averages of daily rates, published by finance companies, for varying maturities in the 90-179 day range.
[3] Averages of daily quotations. Beginning 1957, separate quotations for stock exchange call loans on renewals and new loans were discontinued; therefore, only a going rate is quoted.
[4] Except for new bill issues, yields are averages computed from daily closing bid prices.
[5] Certificates of indebtedness and selected note and bond issues.
[6] Selected note and bond issues. [7] Tax-exempt bills.

No. 623. Bank Rates on Short-Term Business Loans, by Banks in Selected Cities and by Size of Loan: 1940 to 1963

No. 630. Margin Requirements on Securities Credit: 1945 to 1964

[Prescribed in accordance with Securities Exchange Act of 1934. Regulations limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of the extension; the margin requirement is the difference between the market value (100 percent) and the maximum loan value. Data shown here are for regular accounts. For rates for 1934 to 1945, see *Statistical Abstract, 1957*, table 554. See also *Historical Statistics, Colonial Times to 1957*, series X 378-380]

[1] For 1950, straight average of market prices of all taxable marketable bonds due or callable in 15 years and over; thereafter, on the basis of an assumed 3 percent 20-year bond.

[2] Prices derived from average yields on basis of an assumed 4 percent 20-year bond based on Wednesday closing prices.

[3] Based on composite of data (including industrial, utility, and railroad) and are a conversion of yield indexes, based on yield to maturity of each bond and assuming a 4-percent coupon with 20 years to maturity. Prices are averages of weekly data for A1+ bonds (17 to 21 bonds represented).

[4] Prices derived from averages of median yields on noncallable high-grade stocks on basis of a $7 annual dividend. Data from Board of Governors, Federal Reserve System.

[5] Based on daily closing prices; indexes weighted by number of shares of each stock outstanding in base period, with adjustment when necessary to offset changes in capitalization. Number of stocks represents number currently used; continuity of series not affected by change in number.

[6] Averages of daily closing figures. Changes have been made in stocks used at various times. However, the number of stocks has remained constant over the period shown here.

[7] Based on prices end of month. 200 stocks used represent for the most part an identical list, except in public utility group, which is a continuous series composed of 24 electric utilities (representing operating electric companies). Data for A.T.&T. Co. included in figures for 200 stocks; excluded from utilities in order to show more clearly the trend for electric companies.

[8] Includes also 15 banks and 10 insurance stocks and 1 additional public utility stock (see footnote 7).

[9] Averages of weekly closing prices. Number of stocks represents number currently used.

Source: Dept. of Commerce, Office of Business Economics (except as noted). Monthly data in *Survey of Curren Business*. For original sources, see table stub.

Public utility (24 stocks)	6.0	5.7	4.3	3.9	3.8	3.1	3.2	3.1

[1] Through 1950, average yields on taxable bonds due or callable after 15 years; thereafter, on those due or callable in 10 years or more.
[2] Number of issues as of Dec. 1, 1963; number varies for earlier years.
[3] 1940 and 1950, estimated yields prevailing on highest grade issues in first quarter of year; thereafter, in February only. Data from National Bureau of Economic Research through 1959; thereafter, Scudder, Stevens and Clark.
[4] More than usually liable to error.
[5] 1940, yield based on 15 stocks and determined from average of 9 median yields; thereafter, on 14 stocks and average of 8 median yields. Issues converted to a price equivalent to $100 par and a 7 percent annual dividend before averaging.
[6] Yields are obtained by dividing the average per-share dividend by the average per-share price in each group.
[7] Includes also 15 banks and 10 insurance stocks, and 1 additional public utility (see footnote 7, table 632).

Capital and surplus [4]	1,838	4,639	7,008	9,117	9,674	10,576	11,256	12,033

[1] Includes $1,028,000,000 group life insurance for Federal employees.
[2] Beginning 1950, total income and payments to policyholders include data on operations of accident and health departments of life insurance companies; since these data not shown separately, components do not add to totals.
[3] Beginning 1955, accidental death benefits included with death benefits.
[4] For all years, business of accident and health departments of U.S. life insurance companies included in "Liabilities" and "Capital and surplus"; beginning 1950, also included in "Policy dividends" and "Policy reserves."
[5] Includes cash, policy loans, collateral loans, due and deferred premiums, and all other assets.
[6] For 1940, calculated after some Federal income taxes; beginning 1950, calculated before all such taxes.

[1] Includes members of Blue Shield plans that provide hospital benefits, and persons enrolled in "independent" plans (community plans, employer-employee-union plans, private group clinic plans, medical society plans not affiliated with Blue Shield, and college and university health services).
[2] Generally includes expense for obstetrical services.
[3] Includes Blue Cross and "independent" plans providing surgical benefits.
[4] Expense for physicians' services other than surgery, mainly physicians' visits in the hospital.
[5] Includes Blue Cross, Blue Shield, and all other plans providing these benefits.
[6] Based on civilian population as of end of each year.

No. 646. Major Medical Expense Insurance—Number of Persons Covered, by Type of Coverage: 1955 to 1963

[**In thousands.** As of December 31. Includes Alaska and Hawaii. Represents persons covered by insurance companies only. Excludes members of Blue Cross-Blue Shield, medical-society sponsored, and all other independent plans. Major medical expense insurance provides protection against especially heavy medical bills resulting from "catastrophic" or prolonged illness, and is used as a supplement to basic medical care insurance or as a comprehensive integrated program providing both basic and major medical protection, including charges for private duty nursing, drugs, and medical appliances]

Retirement [8]	23	23	[6] 45.1		5,560	[6] 2.30	2,150

[1] Excludes dividends in group insurance.
[2] Coverage data include persons covered by group comprehensive major medical expense insurance as well as those with basic benefits.
[3] Includes private hospital benefits written in compliance with California temporary disability insurance law, shown separately.
[4] Group supplementary and comprehensive major medical insurance underwritten by commercial insurance companies.
[5] Includes private plans written in compliance with State temporary disability insurance laws in California, New Jersey, and New York, shown separately, and formal sick-leave plans.
[6] Computed as percent of private wage and salary labor force and private wages and salaries.
[7] Excludes dismissal wage and separation allowances, except when financed from unemployment benefit funds covering temporary and permanent layoffs.
[8] Includes pay-as-you-go and deferred profit-sharing plans, plans for nonprofit organizations, union pension plans, and railroad plans supplementing the Federal railroad retirement program.

No. 650. Fire Losses—Total and Per Capita: 1901 to 1963

[**In thousands of dollars, except per capita.** Beginning 1962, includes Alaska and Hawaii. Prior to 1916 figures are a compiled by the New York Journal of Commerce and include losses of $10,000 or over in the principal cities of the United States, plus 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being $214,531,000 as against $258,378,000) which cover all fires reported to the Actuarial Bureau Committee, plus 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter. Estimated fire losses are based on paid losses through 1953, on incurred losses thereafter]

YEARLY AVERAGE	Amount	YEARLY AVERAGE OR YEAR	Amount	YEAR	Amount	Per capita[1]
1901–1905	173,324	1941–1945	382,547	1956	989,290	5.91
1906–1910	270,858	1946–1950	643,489	1957	1,023,190	6.01
1911–1915	204,136	1951–1955	833,257	1958	1,056,266	6.09
1916–1920	334,044	1956–1960	1,044,729	1959	1,047,073	5.94
1921–1925	529,160	1940	285,879	1960	1,107,824	6.19
1926–1930	492,190	1945	484,274	1961	1,209,042	6.64
1931–1935	326,083	1950	648,909	1962	1,265,002	6.81
1936–1940	268,215	1955	885,218	1963	1,405,558	7.45

[1] Based on population estimates of the Bureau of the Census. Excludes Armed Forces abroad.

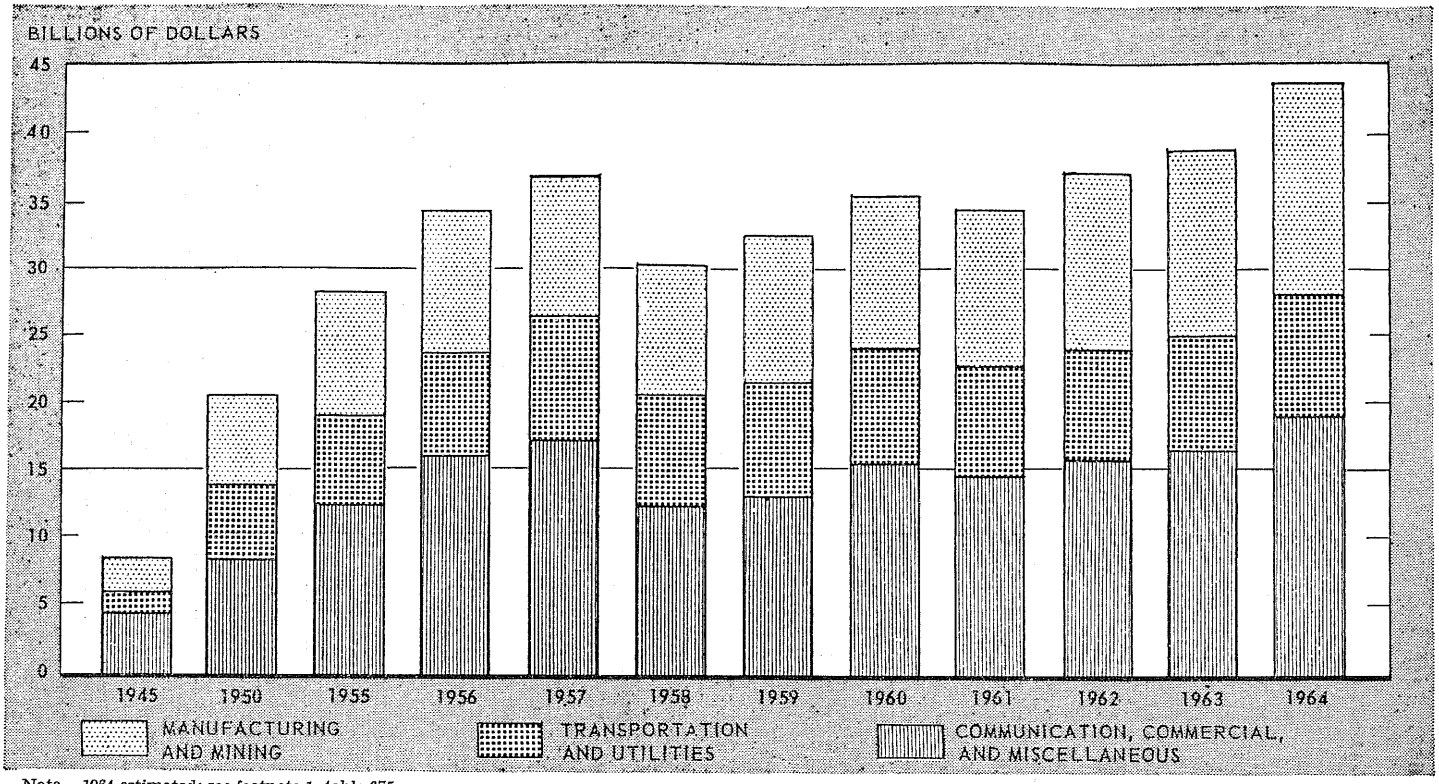
FIG. XXX. BUSINESS EXPENDITURES FOR NEW PLANT AND EQUIPMENT: 1945 to 1964

[See table 675]



Note.—1964 estimated; see footnote 1, table 675.

Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Securities and Exchange Commission and Dept. of Commerce, Office of Business Economics.

Section 17

Business Enterprise

Statistics in this section relate in general to the place and behavior of the business firm and of business initiative in the American economy. The data include measures of and changes in the number of businesses; assets and liabilities of corporations; types of business income and expenditures; business sales and inventories; and consumer cooperatives.

The principal sources of these data are the *Survey of Current Business* and its *National Income Supplement* (1954) and *U.S. Income and Output* (1958), published by the Office of Business Economics, Department of Commerce; the *Federal Reserve Bulletin* issued by the Board of Governors of the Federal Reserve System; and monthly statements published by Dun & Bradstreet, Inc. Other sources are publications of the Securities and Exchange Commission and the Internal Revenue Service.

Firms in operation, entering, and leaving.—The number of firms in existence and the number of new, discontinued, and transferred businesses are estimated by the Office of Business Economics on the basis of data from the Internal Revenue Service and the Bureau of Old-Age and Survivors Insurance.

A business firm is defined by the Office of Business Economics as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. A self-employed person is considered a firm only if he has either one or more employees or has an established place of business. This count of firms differs from that of the Bureau of the Census which ordinarily represents a count of establishments, e.g., manufacturing plants or retail stores, larger than a specified minimum size.

New businesses include firms which are newly established; discontinued businesses refer only to liquidations. Business transfers represent purchases of going businesses, acquisitions of businesses through inheritance, transfers of businesses to a trustee or executor, as well as changes in the form of business organization.

Industrial and commercial failures.—These data are collected by Dun & Bradstreet, and are available by years since 1857 and by months since 1900. The number of failures includes concerns involved in court proceedings or voluntary actions likely to end in loss to creditors; discontinuances with outside obligations paid in full are not included. Data cover manufacturers, wholesalers, retailers, building contractors, and certain types of commercial service, but do not encompass all business enterprises. Specific types of business not listed are: Finance, insurance, and real estate companies; railroads and steamship lines; amusement enterprises. Failures data are published monthly in summary form in *Dun's Review & Modern Industry*.

Corporate assets and liabilities.—Data on corporate assets and liabilities are from the Internal Revenue Service and the Securities and Exchange Commission. In its annual report, *Statistics of Income, Corporation Income Tax Returns*, the Internal Revenue Service presents balance sheet and income account data for all United States corporations. In a quarterly release entitled *Net Working Capital of U.S. Corporations*, the Securities and Exchange Commission publishes data on the net working capital position of all United States corporations, exclusive of banks, savings and loan associations, and insurance companies, showing the principal components of current assets and liabilities.

Corporate income, profits, dividends, and taxes.—Several agencies (the Internal Revenue Service, the Office of Business Economics, and the Federal Reserve Board)

compile corporate income account data. These data, however, are not comparable because of differing methods of compilation.

The Internal Revenue Service publishes corporate data based on income tax returns in the aforementioned *Statistics of Income.*

The corporate data issued by the Office of Business Economics are a part of its national income and product accounts and are defined as required for purposes of national income estimation. The primary sources of data for the Office of Business Economics estimates of profits, taxes, dividends, and undistributed profits are the original corporate tax returns submitted to the Internal Revenue Service. Various adjustments of the *Statistics of Income* data are required by the national income treatment, particularly with respect to depletion, capital gain or loss, and intercorporate dividends, and because the original corporate income statements do not represent the final stage of information.

Federal Reserve Board data relating to profits and dividends apply to particular ndustrial segments only, such as large manufacturing and public utility corporations.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and the manner in which they are financed. Sources of funds are equal to their uses. Certain discrepancies, however, apart from errors in estimation, interfere with this equality. These discrepancies are not particularly significant and are due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment, and (2) transactions in securities held as permanent investments except public offerings.

Business sales and inventories.—Business sales and inventories as defined by the Office of Business Economics are the sum of data for manufacturing, wholesale, and retail trade. Sales are estimated aggregate values and inventories are book values at the end of the period. Sales signifies sales or shipments for retail and wholesale trade and billings or shipments for manufacturing. Trade inventories are valued at cost of merchandise on hand, while manufacturers' inventories are valued at approximate current costs or at book values, as reported by the manufacturer. The data on inventories for manufacturing (see table 679) are based on annual data from the *Census of Manufactures* and the *Annual Survey of Manufactures.*

Net change in business inventories.—To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios of current prices to base year prices. No inventory valuation adjustment is shown for farm inventories because change in farm inventories is estimated by the Department of Agriculture from physical quantity data.

Plant and equipment expenditures.—A joint survey by the Securities and Exchange Commission and the Department of Commerce presents quarterly data on actual plant and equipment expenditures, and on anticipated expenditures for the next two quarters. In addition, at the beginning of each year, a survey is made of plans of business as regards capital expenditures during that year. The data are based on reports submitted by corporations registered with the Securities and Exchange Commission, by transportation companies under Interstate Commerce Commission jurisdiction, and by a large sample of nonregistered companies, unincorporated as well as corporate, reporting to the Department of Commerce.

Alaska and Hawaii.—Statements specifying inclusion or exclusion of figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 654. Firms in Operation, and New and Discontinued Businesses: 1940 to 1963

[**In thousands.** Excludes Alaska and Hawaii, except as noted. Excludes firms in agriculture and the professional services. New businesses include only firms which have been newly established; going concerns which have been purchased are considered business transfers. Discontinued businesses include closures of all kinds without reference to reason for discontinuing—e.g., failure, retirement, illness of proprietor, etc. See also *Historical Statistics, Colonial Times to 1957*, series V 4-19]

Net profit (less loss)	1,564	6,768	8,394	8,072	8,116	8,845	8,360	8,689

n.a. Not available. [1] Individually owned businesses and farms.
[2] Receipts from sales and services less allowances, rebates, and returns; excludes capital gains or losses, and investment income not associated with the business. [3] Depreciation, obsolescence, and depletion.
[4] Gross receipts less returns and allowances. For partnerships engaged in finance, insurance, and real estate, excludes a sizable part of income because reporting instructions prescribe separate entries for investment income.
[5] Interest, rents, nonqualifying dividends, and other income.

Services	8,580	3,312	890

[1] Individually owned businesses and farms.
[2] Receipts from sales and services less returns and allowances:
(a) For sole proprietorships, excludes capital gains or losses and investment income not associated with the taxpayer's business.
(b) For partnerships and corporations engaged in finance, insurance, and real estate, excludes a sizable part of income because reporting instructions prescribe separate entries for investment income.
[3] Includes business not allocable to individual industries.
[4] Net profit or net income less loss or deficit:
(a) Sole proprietorships: Business receipts less total deductions, including cost of goods sold.
(b) Partnerships: Total receipts less total deductions, including cost of goods sold. Net profit includes investment and other income.
(c) Corporation returns: Gross income subject to tax, less ordinary and necessary business deductions.
[5] Net loss exceeds net profit.

No. 658. Reporting Units Under Social Security Act, Employment, and Taxable Payrolls—States and Other Areas: First Quarter, 1962

[Based on reports of employers under the Federal Insurance Contribution Act. A reporting unit is, generally, a single establishment or group of similar establishments of an employer. Data for the following types of employment covered by the Social Security Program in whole or in part are excluded: Farm workers, domestic workers, self-employed persons, members of the uniformed services of the United States, Federal civilian employees, employees of State and local governments. Also excludes railroad employment subject to the Railroad Retirement Act and employment on oceanborne vessels]

n.a. Not available.

[1] Dept. of Health, Education, and Welfare, Social Security Admin. "Business" refers to loans outstanding.

[2] Dept. of Agriculture, Rural Electrification Admin. Distribution cooperatives currently borrowing from REA, average number of consumers served, and total revenues.

[3] Dept. of Agriculture, Rural Electrification Admin. Cooperatives currently borrowing from REA, number of subscribers at end of year, annual revenues.

[4] Dept. of Health, Education, and Welfare, Social Security Admin. Enrollees in December and annual income of plans, estimated.

[5] Federal Housing Admin. Cooperative projects insured, housing units, and value of mortgages, cumulative from beginning of Section 213 program, in 1950, through December 31.

[6] Dept. of Agriculture, Farmer Coop. Service. Data cover fiscal years 1960-61 and 1961-62. 1961-62, preliminary. Since many cooperatives do more than one type of business, totals are less than would be obtained by adding number of cooperatives handling individual items or performing individual services.

[1] Interest on Treasury notes issued on or after Dec. 1, 1940, and on obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "Other taxable receipts" for 1950–1961.

[2] Excludes (*a*) Federal income and profits taxes; (*b*) estate, inheritance, legacy, succession, and gift taxes; (*c*) income and profits taxes paid to a foreign country or possession of the United States if any portion was claimed as a tax credit; (*d*) taxes assessed against certain local benefits; (*e*) Federal taxes on tax-free covenant bonds; and (*f*) unidentifiable amounts of taxes reported in "Cost of sales and operations," 1955–1961. For prior years, excludes all taxes reported in these costs.

No. 667. Corporate Profits, Taxes, and Dividends: 1940 to 1962

[**In millions of dollars.** Beginning 1960, includes Alaska and Hawaii. Data are for corporations organized for profit. Represent profits accruing to U.S. residents, without deduction of depletion charges and exclusive of capital gains and losses; intercorporate dividends from profits of domestic corporations are eliminated; net receipts of dividends and branch profits from abroad are added. In other major respects, the definition of profits is in accordance with Federal income tax regulations. Taxes refer to Federal and State corporate income and excess profits taxes. Cash dividends represent amount disbursed to U.S. residents, and therefore are measured after elimination of intercorporate dividends. Undistributed profits represent difference between corporate profits after taxes and net dividend payments]

YEAR	Profits before taxes	Income tax liability	Profits after taxes	Cash dividends	Undistributed profits
1940	9,320	2,834	6,486	4,043	2,443
1945	18,977	10,689	8,288	4,691	3,597
1950	40,628	17,865	22,763	9,208	13,555
1955	44,862	21,827	23,035	11,215	11,820
1957	43,208	20,922	22,286	12,588	9,698
1958	37,410	18,646	18,764	12,358	6,406
1959	47,657	23,188	24,469	13,682	10,787
1960	44,261	22,252	22,009	14,523	7,486
1961	43,784	22,014	21,770	15,266	6,504

No. 677. Gross Private Domestic Investment and Its Components: 1940 to 1963

[**In billions of dollars.** Beginning 1960, includes Alaska and Hawaii. Consists of acquisitions of newly produced capital goods by private business and nonprofit institutions and of value of change in volume of inventories held by them; covers all private new dwellings, including those acquired by owner-occupants. Series revised beginning 1946. For details, see *U.S. Income and Output*, a supplement to the *Survey of Current Business*. See also *Historical Statistics, Colonial Times to 1957*, series F 72–80]

CLASS	1940	1950	1955	1958	1959	1960	1961	1962	1963 (prel.)
Gross private domestic investment	13.2	50.0	63.8	56.6	72.7	72.4	69.0	78.8	82.3
Nonfarm producers' plant and equipment [1]	7.0	23.4	33.4	33.7	36.7	40.3	38.4	42.2	44.4
Equipment [2]	4.9	16.2	20.6	20.3	23.1	25.1	22.9	26.0	27.9
Construction [3]	2.0	7.2	12.8	13.5	13.7	15.1	15.6	16.2	16.5
Farm equipment and construction [4]	.8	4.4	4.1	4.3	4.5	4.1	4.6	4.6	4.8
Residential construction (nonfarm)	3.0	14.1	18.7	18.0	22.3	21.1	21.0	23.2	25.0
Other private construction [5]	.2	1.3	1.8	2.5	2.6	2.9	3.1	3.3	3.3
Net change in business inventories [6]	2.2	6.8	5.8	−2.0	6.6	4.1	1.9	5.5	4.7
Nonfarm	1.9	6.0	5.5	−2.9	6.5	3.7	1.5	4.9	4.2
Farm	.3	.8	.3	.9	.1	.3	.3	.7	.5

[1] Items for nonfarm producers' plant and equipment are not comparable with those shown in table 675 principally because the latter exclude equipment and construction outlays charged to current expense and also investment by nonprofit organizations and professional persons.
[2] Total producers' durable equipment less farm machinery and equipment, and farmers' purchases of tractors and business motor vehicles.
[3] Industrial buildings, public utilities, gas- and oil-well drilling, warehouses, office and loft buildings, stores, restaurants, garages, miscellaneous nonresidential construction, and all other private construction.
[4] Farm construction (residential and nonresidential) plus farm machinery and equipment, and farmers' purchases of tractors and business motor vehicles. (See footnote 2.)
[5] Includes religious, educational, social and recreational, and hospital and institutional.
[6] After inventory valuation adjustment.

Source: Dept. of Commerce, Office of Business Economics; unpublished data.

No. 678. Uses and Sources of Corporate Funds: 1950 to 1963

[**In billions of dollars.** Includes Alaska and Hawaii in many of the components. Covers nonfinancial business corporations only, excluding banking and insurance companies which are primarily suppliers of capital funds for business or intermediaries in flow of savings from consumers to business. Based on Securities and Exchange Commission and other financial data. Data through 1960 have been adjusted to Internal Revenue Service statistics. Minus sign (−) indicates a reduction in assets or liabilities]

No. 684. Industrial and Commercial Failures—Number and Liabilities: 1921 to 1963

[Excludes Alaska and Hawaii. Excludes all railroad failures. Series revised beginning 1933 to exclude real estate and financial companies. These revisions bring "Failures" more nearly in accordance with type of concerns covered by "Total concerns in business," in which no changes were made. Beginning 1939, new series includes voluntary discontinuances with loss to creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series. See also *Historical Statistics, Colonial Times to 1957*, series V 1-3]

Yearly average or year	Total concerns in business [1] (1,000)	Failures [2] Number	Rate per 10,000 concerns	Current liabilities [3] ($1,000)	Average liability	Year or month	Total concerns in business [1] (1,000)	Failures [2] Number	Rate per 10,000 concerns [4]	Current liabilities [3] ($1,000)	Average liability
