ROBERT F. DRURY, *Deputy Director*

EDWIN D. GOLDFIELD, *Assistant Director for Statistical Information*

ACKNOWLEDGMENTS

This edition of the *Statistical Abstract* was prepared under the supervision of William Lerner, Assistant Chief, Statistical Information Division. Helen E. Teir, Chief, Statistical Abstract Branch, was responsible for compilation, assisted by Juanita A. Wright for technical editorial work and Minerva K. Moreland for editing and clerical operations.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 985–990) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract.*

In a few instances, contributors have requested that their data be designated as subject to copyright restrictions. The source notes to the tables affected include a copyright notice. Permission to use copyright material should be obtained directly from the copyright owner.

SUGGESTED CITATION

U.S. Bureau of the Census, *Statistical Abstract of the United States: 1968.* (89th edition.) Washington, D.C., 1968.

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C. 20402 — Price $4.75 (cloth)

PREFACE

The *Statistical Abstract of the United States,* published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, the Guide to Sources, the section on Publications of Recent Censuses, and the Guide to State Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both governmental and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from the agency's unpublished tabulations and records are identified in the source notes as "unpublished data." More information on the subjects covered in tables so noted may generally be obtained from the contributing agency.

Except as otherwise indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States. Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in the State tables whenever available and are supplemented by information in section 31. Statistics for cities or other relatively small geographic units appear only in a few instances. Additional information for cities, counties, metropolitan areas, congressional districts, and other small units, as well as more historical data, are available in various supplements to the *Abstract.* (See pages v and vi.)

Other changes in the 1968 edition.—This edition, the 89th annual issue, presents data for the most recent year or period available during the early part of 1968.

Each year the more than 1,300 tables and charts are reviewed and evaluated. New tables and charts of current interest are added, continuing series are brought up to date, and less timely data are curtailed or eliminated. Text notes are revised as necessary to incorporate new definitions and source references.

This year, significant changes were made in both the text and tables in section 14—Federal Government Finances and Employment—as a result of the introduction of a new Federal budget concept. An explanation of the new concept and its relationship to various types of financial transactions appears on pages 373 and 374. Section 16—Banking, Finance, and Insurance—was substantially reorganized as to content and sequence of tables to provide a more logical presentation of the data. Also, the data on agriculture, formerly presented in two sections, have been consolidated into one (section 23).

The special section entitled "Metropolitan Area Statistics," introduced in the 1967 edition, has been updated and expanded in this edition as section 33. Reprints of this section may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The price per copy is 30 cents; a discount of 25 percent is allowed on orders of 100 copies or more sent to the same address.

In addition, a new "Guide to Tabular Presentation" (page vi) assembles and defines the various symbols used throughout the book and explains other devices used to present the statistics.

New tables on subjects of particular current interest include components of population change, by race (table 22); health insurance for the aged (table 96); cigarette smoking (tables 114 and 115); school enrollment (table 152); cost of attending college (table 191); civil disorders (tables 207 and 208); Viet-Nam budget expenditures (table 358); hospital and medical insurance programs (table 417); projections of gross national product (table 457); and urban renewal (table 1103).

Altogether there are 83 entirely new tables in this edition, scattered through 27 sections. Following is a list of some of the subjects covered by the new tables:

Projected fertility rates, p. 7
Negro population distribution, p. 20
Population change, by race, p. 23
Households and families, p. 36
Family life cycle, p. 39
National associations, p. 40
Health insurance for the aged, p. 72
Persons wearing corrective lenses, p. 81
Narcotic addiction, p. 81
Cigarette smoking and health, p. 82
School enrollment, pp. 108, 109
Enrollment in Catholic schools, p. 125
Libraries, by type, p. 127
College enrollment projections, p. 128
Cost of attending college, p. 130
Civil disorders, p. 144
Wildlife refuges, p. 205
Outdoor recreation participation, p. 206
Job openings, p. 218
Labor union finances, p. 241
Viet-Nam expenditures, p. 248
Employment in defense industries, p. 252
Hospital and medical insurance, p. 287
Projections of GNP, p. 314
Characteristics of wealthholders, p. 334
Index of living costs, p. 350
Members of Congress, by age, p. 366
Flow of funds, pp. 438–440
Federal Reserve System, pp. 441, 442
Commercial banks, pp. 444, 446
Mutual savings banks, p. 448
Money supply, p. 451
Interest bearing deposits, p. 451
Life insurance companies, p. 462
Private health insurance, p. 466
Trade and service industries, p. 475
Corporation finances, pp. 478, 482
Finances of public utilities, p. 518
Scientists and engineers, p. 533
Spacecraft launchings, p. 537
Employment in transportation, p. 542
Finances of transport companies, p. 542
Passenger car production, p. 554
Expenditures on new and used cars, p. 554
Gross farm product, p. 613
Urban renewal, p. 714
Exports financed by foreign aid, p. 801
Employment attributable to exports, p. 803
Military ships, by country, p. 845
Labor cost indexes, manufacturing, p. 847

Of the tables included in the 1967 edition, 91 were omitted from this issue. The omissions, scattered through 25 sections, represent primarily tables for which comparable details appear in the new or retained tables or for which no recent data are available.

Responsibility.—The contents of this volume were taken from a large number of sources (see "Source Agencies and Table Numbers"). The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

SUGGESTIONS AND COMMENTS

Many persons have offered suggestions for improving the presentation of data in the *Statistical Abstract* and its supplements. Their comments have been most helpful. Users of these publications are urged to continue to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington, D.C. 20233.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

please consult the source publications available in local libraries or write to the agencies indicated in the source notes to the tables covering the desired subject. Write to the Bureau of the Census only if it is cited as the source.

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1967. A compact presentation of 144 items of statistical data for each county in the United States, 113 items for each of 224 standard metropolitan statistical areas, and 148 items for each of 683 incorporated cities having 25,000 inhabitants or more in 1960. Information comparable to that for counties is also presented for geographic regions and divisions, and for States. Items included based largely on results of 1962 census of governments, 1963 censuses of business, manufactures, and mineral industries, and 1964 census of agriculture, as well as data from the 1960 censuses of population and housing. Includes 53 maps, explanatory and definitive text, source notes, and appendixes on area and population of urban places, county governments, cities without weather stations, special censuses, and sources of population estimates. 713 pages. Issued 1967. Price $5.50 (clothbound).

Pocket Data Book, USA 1967. Graphic and tabular presentation of summary statistics on a wide variety of subjects. Designed for quick and easy reference. In color; pocket-size; 368 pages. Issued 1967. Price $1.50 (paperbound).

Historical Statistics of the United States, Colonial Times to 1957. Prepared with the cooperation of the Social Science Research Council. A compilation of more than 8,000 statistical time series, largely annual, on American social and economic development covering periods from 1610 to 1957. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 801 pages. Issued 1960. Price $6.00 (clothbound).

Historical Statistics of the United States, Colonial Times to 1957; Continuation to 1962 and Revisions. Carries forward the more than 6,000 series in the basic volume that are still current; includes about 300 series that are complements to, or substitutes for, series discontinued since 1956; and presents revisions and corrections for more than 650 series. 158 pages. Issued 1965. Price $1.00 (paperbound).

Directory of Federal Statistics for States: 1967. A comprehensive finding guide to sources of Federal statistics available at the State level. Specific sources shown for hundreds of items of information on agriculture, banking, business, construction, governments, housing, income, labor, manufactures, mineral industries, population, transportation, and other subjects. 380 pages. Issued 1968. Price $2.25 (paperbound).

(Continued on page vi)

STATISTICAL ABSTRACT SUPPLEMENTS
(Continued)

Directory of Federal Statistics for Local Areas: 1966. Similar in subject matter coverage to the directory for States, cited above, but devoted entirely to the data available for metropolitan areas, counties, urban places, and other local areas below the State level. 162 pages. Issued 1966. Price $1.00 (paperbound).

Purchase orders should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

GUIDE TO TABULAR PRESENTATION

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

–	Represents zero or rounds to less than half the unit of measurement shown.
B	Base figure too small to meet statistical standards for reliability of derived figure.
D	Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.
NA	Data not enumerated, tabulated, or otherwise available separately.
S	Figure does not meet publication standards for reasons other than that covered by symbol B, above.
X	Figure not applicable because column heading and stub line make an entry impossible, absurd, or meaningless.
Z	Entry would amount to less than half the unit of measure shown.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given in boldface type as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Parallel vertical rules are used to the right of a total column to indicate—

(1) that the components which follow add to the total (e.g., tables 1, 5, 7, etc.);
(2) in the case of derived figures, that the underlying data are additive to their total (e.g., table 16 for percentages, table 23 for ratios, table 58 for rates, table 87 for averages, table 161 for medians, and table 506 for indexes).

Heavy vertical rules are used—

(1) in tables where the stub (the area, date, or descriptive column at the left) is continued into one or more additional columns across the table to separate each segment of stub and its accompanying data columns from the continued segments (e.g., tables 2, 3, 4, etc.);
(2) to set off independent sections of a table (e.g., tables 1, 5, 6, etc.).

In many tables, details will not add to the totals shown because of rounding.

FIG. I. MAP OF THE UNITED STATES, SHOWING CENSUS REGIONS AND DIVISIONS

[Alaska and Hawaii are drawn at different scales from conterminous United States and are not shown in their correct relative geographic positions]

Source: Dept. of Commerce, Bureau of the Census.

Section 1
Population

This section presents statistics on the growth, distribution, and characteristics of the population of the United States. The principal source of these data is the Bureau of the Census, which conducts a decennial census of the population and a monthly current population survey and also prepares periodic population estimates. For a list of publications, see the Guide to Sources in Appendix III of this book.

Decennial censuses.—The Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of Members of the House of Representatives among the States. For over a century after the first census in 1790, the census organization was a temporary one. In 1902, the Bureau of the Census was established as a permanent Federal agency, responsible for enumerating the population and also for compiling statistics on other subjects and at other times.

In the 1960 census, as in previous censuses, each person was counted as an inhabitant of his usual place of residence. While this place is not necessarily his legal residence, voting residence, or domicile, the use of these different bases of classification would usually produce substantially the same statistics.

In the last 3 decennial censuses, some data were obtained from representative samples of the population rather than from a complete count, as follows: 5 percent in 1940, 20 percent in 1950, and 25 percent in 1960. Exact agreement is not to be expected among the various samples, nor between them and the complete count, but sample data may be used with confidence where large numbers are involved and assumed to indicate patterns and relationships where small numbers are involved.

Estimates based on evaluation studies of the 1960 census results indicate a total net underenumeration of about 5.7 million persons, of whom about 2.1 million were nonwhite. Although the amount of underenumeration was about the same as in the 1950 census, the percentage was somewhat less. Data from the 1950 and 1960 censuses have not been adjusted for the estimated underenumeration.

Current Population Survey.—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 449 areas comprising 863 counties and independent cities with coverage in every State and the District of Columbia. About 60,000 housing units and other quarters are designated for the sample at any time, of which about 52,500 (containing 105,000 persons 16 years old and over) are occupied by households eligible for interview; of these, in turn, about 4 to 6 percent are, for various reasons, unavailable for interview. See also text, p. 211.

Population estimates and projections.—National estimates are derived by use of decennial census data as benchmarks and of data available from various agencies as follows: Births and deaths (Public Health Service); immigrants and emigrants (Immigration and Naturalization Service); the Armed Forces (Department of Defense); net migrants (Puerto Rico Planning Board); and Federal employees abroad (Civil Service Commission). State estimates are based on similar data and also on school statistics from State Departments of Education and parochial school systems.

National population projections indicate the approximate future level and characteristics of the population under given assumptions as to future fertility, mortality, and net immigration from abroad. The method used to develop the projections involved preparation of separate projections of each of the components of population change—births, deaths, and net immigration—and the combination of these with July 1 estimates of the current population. The projections by State incorporate further assumptions about population redistribution through interstate migration.

Current estimates and projections are consistent with official census figures and are not adjusted for estimated census underenumeration. For details on methodology, see the sources cited below individual tables.

Standard Metropolitan Statistical Areas (SMSA).—The entire territory of the United States has been classified by the Bureau of the Budget as (*a*) metropolitan, or "inside SMSA's," and (*b*) nonmetropolitan, or "outside SMSA's." An SMSA is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. In addition, other contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than counties are used in defining SMSA's. Central cities are those named in the titles of the areas. For a more detailed explanation and a listing of the component areas of each SMSA, see Bureau of the Budget, *Standard Metropolitan Statistical Areas*, 1967 edition. Data on metropolitan-nonmetropolitan residence relate to SMSA's as defined at the time of the 1960 Census of Population except as otherwise noted.

Urban and rural areas.—According to the 1960 census definition, the urban population comprises all persons living in (*a*) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (*b*) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (*c*) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (*d*) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (*e*) unincorporated places of 2,500 inhabitants or more.

Substantially the same definition was used for the 1950 census, the major difference being the designation in 1960 of urban towns in New England and urban townships in New Jersey and Pennsylvania. In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different rules relating to population size and density. In all definitions, the population not classified as urban constitutes the rural population.

Changes in the size of the urban population from one census to another are affected by 2 components: (*a*) Growth in areas classified as urban at the beginning of the decade; and (*b*) reclassification of rural territory as urban. Between censuses, it is possible only to obtain measures of the first component from the Current Population Survey (see p. 1). Measures of the second are too costly. Since about 60 percent of the urban population growth between 1950 and 1960 was attributable to expansion of urban territory, data on the urban population from the Survey may be misleading. Consequently, regular publication of data on urban-rural residence from the Current Population Survey has been discontinued.

Farm and nonfarm residence.—The rural population is divided into "rural-farm," comprising all persons living on farms, and "rural-nonfarm," comprising the remainder. According to the 1960 census definition, the farm population consists of all persons living in rural territory on places of less than 10 acres yielding agricultural products which sold for $250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for $50 or more in the previous year.

Color and race.—The concept of race as used by the Bureau of the Census is derived from that which is commonly accepted by the general public as reflected in the action of legislative and judicial bodies of the country. It does not, therefore, reflect clear-cut definitions of biological stock, and several categories refer to nationality. "Color" divides the population into white and nonwhite. The nonwhite population consists

of Negroes, American Indians, Japanese, Chinese, Filipinos, and all others not classified as white. Persons of Mexican birth or ancestry who are not definitely Indian or of other nonwhite stock are counted as white. Persons of mixed parentage are classified by the race or color of the nonwhite parent.

Mobility status.—Classification of the population by mobility status is based on comparison of an individual's place of residence at the survey or census date with that of a specified earlier date. *Mobile persons or movers* includes all persons living in different houses in the United States at the beginning and at the end of the period. According to their new location, they may be "same county movers" or "different county movers, or migrants." Migrants in turn are classified according to whether they moved within the same State or into a different State. *Nonmobile persons or nonmovers* includes all persons living in the same house in the United States at the beginning and end of the period. *Persons abroad* includes all persons living outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, or a possession of the United States. It also includes persons born in a foreign country or at sea who have at least one parent born in the United States. Persons whose place of birth was not reported are assumed to be native unless their census report contains contradictory information, such as an entry of a language spoken prior to coming to the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Household.—A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the head of the household, others in the housing unit related to the head, and also the unrelated persons, if any, such as lodgers, foster children, wards, or employees who regularly live in the house. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household. Prior to 1960 a household was defined as all the persons occupying a "dwelling unit." See text, section 27, Construction and Housing, for definitions of "housing unit" and "dwelling unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A house with at least five lodgers, an institution, a college dormitory, or a military barracks.

Family.—The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together. A primary family consists of the head of a household and all other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or group quarters (other than such groups among inmates of institutions) and related to each other.

Subfamily.—A "subfamily" is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A "married couple" is defined as a husband and his wife living together, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or group quarters such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or group quarters.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 7. Current and Projected Population, by Age and Sex: 1960 to 1990

[**In thousands.** Estimates as of July 1. Includes Armed Forces abroad. Projections based on current estimates and projections of the population by age and sex for July 1, 1966, and imply an annual net immigration of 400,000. See p. 1 for derivation of estimates and projections. The underlying projections of fertility were computed by the "cohort" method and imply that completed fertility of all women (i.e., the average number of children per 1,000 women at end of childbearing) moves gradually toward the following levels: Series A, 3,350; Series B, 3,100; Series C, 2,775; and Series D, 2,450. Series A results do not differ substantially from those obtained by assuming that the average annual level of fertility in the 1962–66 period will persist throughout the projection period]

No. 9. Center of Population for Conterminous U.S.: 1790 to 1960

["Center of population" is that point which may be considered as center of population gravity of the United States or that point upon which the United States would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

YEAR	North latitude			West longitude			Approximate location
	°	′	″	°	′	″	
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1850	38	59	0	81	19	0	23 miles southeast of Parkersburg, W. Va.
1900	39	9	36	85	48	54	6 miles southeast of Columbus, Ind.
1940	38	56	54	87	22	35	2 miles southeast by east of Carlisle, Haddon township, Sullivan County, Ind.
1950	38	50	21	88	9	33	8 miles north-northwest of Olney, Richland County, Ill.
1960	38	37	57	88	52	23	4 miles east of Salem, Marion County, Ill.

Crews of merchant vessels	(NA)	45,690	32,464	(X)
Other citizens	(NA)	(NA)	[23] 190,706	(X)

NA Not available. X Not applicable. Z Less than 0.5 square mile.

[1] Includes estimated population of the Philippines (16,356,000), not shown separately.

[2] Census taken as of Oct. 1, 1939.

[3] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[4] Not enumerated.

[5] Enderbury Island uninhabited at time of enumeration.

[6] Sand Island uninhabited at time of enumeration.

[7] Little Swan Island uninhabited at time of enumeration.

[8] Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukulailai, Nurakita, Palmyra, Penrhyn, Rakahanga, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands not inhabited in 1950 and 1960. Quita Sueño Bank, Roncador Cay, and Serrana Bank, claimed by both the United States and Colombia, not enumerated.

[9] Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

[10] Not enumerated or uninhabited at time of enumeration.

[11] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (combined area 3 square miles), and Palmyra (4 square miles). Excludes Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square mile); area of other islands listed in footnote 8 not available.

[12] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[13] Leased (1914) from the Republic of Nicaragua for 99 years.

[14] Figures from Government of Nicaragua. Little Corn Island uninhabited at time of enumeration.

[15] Under the United Nations Trusteeship System with the United States as administering authority since July 18, 1947.

[16] Population 1940, 131,258 (Census of Japan).

[17] Estimated civilian population as of June 30, 1950; see *Current Population Reports*, Series P–25, No. 238, for derivation of estimates.

[18] Census of 1958 conducted by the Office of the High Commissioner. Civilian population; see *Census Report, 1958: Trust Territory of the Pacific Islands*, Office of the High Commissioner, Agana, Guam, June 1959.

[19] See references in footnotes 17 and 18, above. Comprised of 687 square miles of land area and 7,797 square miles of water area.

[20] Excludes United States citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of households.

[21] Excludes dependents of Federal employees and crews of merchant vessels.

[22] Based on 20-percent sample of reports received.

[23] Represents U.S. citizens abroad for extended periods of time. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

Z Less than 0.1 percent.

[2] For United States, population of United States has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted, except that 1930 figures are based on revised land areas used for 1940.

No. 14. Urban and Rural Places and Population, by Size of Place: 1910 to 1960

[Prior to 1960, excludes Alaska and Hawaii. "Previous urban definition" refers to the definition used prior to 1950 when a number of large and densely settled places were not included as urban because they were not incorporated. In 1950, the Bureau of the Census adopted the concept of the urbanized area and delineated boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition. See also *Historical Statistics, Colonial Times to 1957*, series A 181–209]

Z Less than 0.05 percent. [1] Includes resident Armed Forces.
[2] For comparability with data from the Current Population Survey, figures have been adjusted to exclude members of the Armed Forces living in barracks and similar types of quarters, except as noted.
[3] Based on total population. [4] Covers 212 areas as defined in 1960; see text, p. 2. [5] Not shown because of change in definition of farm residence between 1950 and 1960.
[6] Data not strictly comparable with those shown above: 1960 data include all resident Armed Forces; 1966, as of March.

Source: Dept. of Commerce, Bureau of the Census; *Current Population Reports*, Series P-20, Nos. 157 and 163.

No. 18. Estimated Population, 1966, and Components of Change Since 1960—Metropolitan Areas

[In thousands, except as indicated. Covers all SMSA's (see text, p. 2) with 1960 population of 350,000 or more as defined in *Standard Metropolitan Statistical Areas*, 1967, issued by the Executive Office of the President, Bureau of the Budget. For New England, data refer to State Economic Areas, which consist of whole counties, because 1966 estimates were not available for the towns and cities comprising SMSA's in New England. Change measured from Census date, April 1, 1960 to July 1, 1966; minus sign (−) denotes decrease. For data on all metropolitan areas, see section 33]

No. 20. Cities With 100,000 Inhabitants or More in 1960—Population, 1910 to 1960, and Area, 1960

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin. Land area figures, generally supplied by city engineers, have been revised to agree with those in the Bureau of the Census, *Area Measurement Reports*, Series GE-20]

[1] The cities of Madison, Wis., and Rockford, Ill., share the same rank of 96. In order to have the lowest rank equal to the number of cities presented, the number 97 is omitted.

[2] Revised population figure for Milwaukee, Wis., is 741,321; for Mobile, Ala., 202,779; for Norfolk, Va., 304,869.

[3] Population shown is for New York City as now constituted.

[4] Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1910: 150,355.

[5] Not incorporated in 1910.

X Not applicable. [1] Includes small number of hotels, institutions, and other quasi-households. [2] Computed by compound interest formula. [3] Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households. [4] Estimated. [5] Population in occupied housing units.

No. 41. Household and Family Units, 1960 and 1965, and Projections, 1970 to 1985, by Type

[**In thousands.** As of July 1, except as noted. Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. The projections are based on combinations of two different assumptions about the level of the marriage rates in future years and two different assumptions about trends in the proportions of the population in the various household and family status classes. Household projection Series 1 is the product of the higher marriage assumptions and the higher household and family status assumptions. Series 2 is the product of the lower marriage assumptions and the lower household and family assumptions. For additional explanation, see source]

No. 45. Selected Events in Family Life Cycle for Women Born From 1880 to 1939, by Year of Birth

[For definition of median, see headnote, table 8]

EVENT	YEAR OF BIRTH					
	1880 to 1889	1890 to 1899	1900 to 1909	1910 to 1919	1920 to 1929	1930 to 1939
Median age of women at—						
First marriage	21.6	21.4	21.1	21.7	[1] 20.8	[1] 19.9
Birth of first child	22.9	22.9	22.6	23.7	[1] 23.0	[1] 21.5
Birth of last child	32.9	31.1	30.4	31.5	[1] 30.0–31.0	(NA)
First marriage of last child [2]	56.2	53.5	51.9	53.0	51.5–52.5	(NA)
Death of one spouse:						
For all couples [3]	57.0	59.4	62.3	63.7	64.4	64.4
For couples surviving to first marriage of last child [4]	69.2	68.1	67.8	68.2	67.2–68.2	(NA)
Median years between events:						
For all couples:						
First marriage to birth of last child	11.3	9.7	9.3	9.8	9.2–10.2	(NA)
First marriage to death of one spouse	35.4	38.0	41.2	42.0	43.6	44.5
For couples surviving to marriage of last child:						
First marriage of couple to marriage of last child	43.6	32.1	30.8	31.3	30.7–31.7	(NA)
First marriage of last child to death of one spouse	13.0	14.6	15.9	15.2	15.2–16.2	(NA)

NA Not available.
[1] Projected from partial experience.
[2] Assumes woman has last child at median age for cohort and last child marries at estimated median age at first marriage for children; for further discussion, see source.
[3] Assumes wife first married at median age for cohort to husband 3 years older.
[4] Measure applies to couples surviving jointly to median age of women at marriage of last child.

No. 50. Religious Bodies—Church Membership, Number of Pastors, and Sunday School Enrollment

[Prior to 1959, excludes Alaska and Hawaii. Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious *bodies reporting to Bureau of the Census for Census of Religious Bodies in 1936. Not* all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed]

Religious body	Year	Churches reported	Membership (1,000)	Pastors with charges	Sunday school enrollment [1] (1,000)

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental illness, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the Public Health Service in the annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *Monthly Vital Statistics Report*. Reports in this field are also issued by State bureaus of vital statistics. Current data on fertility of the population and on age of persons at first marriage are compiled by the Bureau of the Census from its Current Population Survey (see text, p. 1) and published in *Current Population Reports*, Series P–20.

Births and deaths.—The collection of death statistics on an annual basis began in 1900 with 10 registration States and the District of Columbia; the collection of birth statistics began in 1915, also with 10 States and the District of Columbia. The changing composition of the two registration areas [1] makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, and in 1955, birth statistics were based on a complete count of the records received in the Public Health Service. From 1951 to 1954, and annually since 1956, the figures have been based on a 50-percent sample of all registered births. Adjustments for underregistration of births, based on results of nationwide tests of registration completeness in 1940 and 1950, were discontinued in the published data beginning in 1960.

Current provisional death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) and deaths among Armed Forces abroad are excluded.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries, and Causes of Death*. The current classification, "Seventh Revision of the International Lists," has been used in the United States beginning with 1958. It has been the practice to revise the *International Lists* every 10 years to keep abreast of medical knowledge. Each revision has produced some break in the comparability of cause-of-death statistics. Comparability ratios which measure the net effect of changes in classifications according to the Fifth and Sixth Revisions are shown in *Vital Statistics–Special Reports*, Vol. 51, Nos. 2 and 3; and according to the Sixth and Seventh Revisions in *Vital Statistics of the United States, 1958*, Vol. 1, and in *Vital Statistics–Special Reports*, Vol. 51, No. 4.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence of the mother or of the decedent.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for various years from 1867 to 1940 and for each year since 1944. Estimates have been made for intervening years and for years in which collections were not complete. A marriage-registration area was established by the Public Health Service in 1957, and a divorce-registration area in 1958. At the beginning of 1968, the marriage-registration area covered 39 States and 3 independent registration areas; the divorce-registration area, 22 States.

[1] For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1-5.

Vital statistics rates.—Vital statistics rates computed by the Public Health Service are based upon the enumerated population figures as of April 1 for 1940, 1950, and 1960 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted. Birth and divorce rates for 1940 and 1947 to 1960, and death and marriage rates for 1940 to 1960, for the United States and the individual States are based on total population present in the area.

Medical care.—Historical data on national health expenditures, by source of public and private funds and by object of expenditure, are compiled by the Social Security Administration and appear annually in the *Social Security Bulletin*. From this series are derived estimates of total personal health care expenditures, private consumer expenditures for health services, and those portions of such expenditures which are met by private health insurance and third-party payments.

Data on physicians, dentists, nurses, and other providers of health services are published in the *Health Manpower Source Book Series*, Public Health Service Publication Number 263. A comprehensive compilation of data on some 35 categories of health occupations is presented in *Health Resources Statistics: Health Manpower, 1965*, Public Health Service Publication Number 1509.

Statistics of hospitals are obtained from the American Hospital Association's annual survey of hospitals. They are published annually in *Hospitals*, Guide Issue, and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements, as follows: It must have at least 6 beds for the care of nonrelated patients for an average stay of over 24 hours per admission; be constructed and equipped to insure safety of patients and to provide sanitary facilities for their treatment; have an organized medical staff, registered nurse supervision, and nursing care for round-the-clock patient care; maintain clinical records on all patients and submit evidence of patient care by doctors; provide minimal surgical and obstetrical facilities or relatively complete diagnostic and treatment facilities; have diagnostic X-ray and clinical laboratory services readily available; and offer services more intensive than those required merely for room, board, personal services, and general nursing care.

The Social Security Administration is another source of data for hospitals and nursing homes. These data, available by State for such institutions and for extended care facilities and home health agencies, are based on the Health Insurance for the Aged program (Medicare) begun in 1966. Data from the Social Security Administration differ from those of the American Hospital Association and other sources because they are limited to the facilities meeting Federal eligibility standards for participation in Medicare.

Data on persons receiving inpatient care in short-stay hospitals, resident patients in mental hospitals, and residents of homes for the aged and chronically ill are collected by the Public Health Service and presented in *Vital and Health Statistics*, Series 12 and 13; data on patient visits to physicians, dentists, and other providers of health care are furnished in Series 10.

Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, psychiatric services of general hospitals, outpatient psychiatric clinics, and institutions for the mentally retarded. From 1923 to 1946, data on mental health were collected annually by the Bureau of the Census. Since 1946 they have been issued by the Public Health Service. Beginning with 1947, hospital data appear annually in *Patients in Mental Institutions*, and beginning with 1959, clinic data appear in *Data on Patients of Outpatient Psychiatric Clinics in the United States*.

Statistics on institutional population based on the 1960 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U.S. Census of Population, 1960*, PC(2)–8A).

Morbidity.—Annual data on notifiable diseases, based on reports from State health departments, are compiled by the Public Health Service at its Communicable Disease Center in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report.* The list of notifiable diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are communicable diseases of national importance.

General health statistics, including morbidity, disability, and the utilization of health services, are provided by the various surveys that make up the National Health Survey of the Public Health Service. They are published in *Vital and Health Statistics,* Series 10 and 11. Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see p. 238).

Nutrition.—Statistics on the annual per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation.* A discussion of methods used to compute these figures and more detailed information appear in *Statistical Bulletin No.* 364, *U.S. Food Consumption; Sources of Data and Trends, 1909–63,* and the annual supplements. Data on Federal food distribution programs, quantity and cost of food commodities distributed, and number of persons participating in the programs are published annually in *Agricultural Statistics.*

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

[1] Provisional. By place of occurrence. United States total based on receipts corrected for observed differences between provisional and final data. State data are not corrected in this manner.

[2] Based on population (excluding Armed Forces abroad) enumerated as of Apr. 1 for 1940, 1950, and 1960, and estimated as of July 1 thereafter.

[3] Prior to 1960, excludes Alaska and Hawaii.

No. 57. Live Births, by Sex of Child and by Attendant: 1940 to 1966

[**In thousands.** Prior to 1960, excludes Alaska and Hawaii. Represents registered births. For total estimated births prior to 1960, see table 54]

Year	Total	Number of live births			Attended by—		
		Male	Female	Males per 1,000 females	Physician, in hospital [1]	Physician, not in hospital	Midwife, other, and not specified
1940	2,360	1,212	1,149	1,055	1,317	825	218
1945	2,735	1,405	1,331	1,056	2,156	403	177
1950	3,554	1,824	1,731	1,054	3,126	252	177
1955	4,047	2,074	1,974	1,051	3,819	101	128
1960	4,258	2,180	2,078	1,049	4,114	49	94
1962	4,167	2,132	2,035	1,048	4,049	36	82
1963	4,098	2,102	1,996	1,053	3,989	33	76
1964	4,027	2,060	1,967	1,047	3,925	28	75
1965	3,760	1,927	1,833	1,051	3,661	33	66
1966	3,606	1,846	1,760	1,049	3,535	17	55

[1] It is assumed that all births in hospitals or institutions are attended by physicians.

No. 58. Live Birth Rate, by Color and Age of Mother: 1940 to 1966

[**Births per 1,000 women in each specified group.** Prior to 1959, excludes Alaska, and 1960, Hawaii. Data for 1940 to 1955 are adjusted for underregistration; 1959 data are shown for both adjusted and registered births; beginning 1960, registered births only. For 1940, 1950, and 1960, based on enumerated population as of April 1; for all other years, on estimated population as of July 1. See also *Historical Statistics, Colonial Times to 1957*, series B 22–23]

Year	15 to 44 years [1]			Age of mother							
	Total	White	Nonwhite	10 to 14 years	15 to 19 years	20 to 24 years	25 to 29 years	30 to 34 years	35 to 39 years	40 to 44 years	45 to 49 years [2]

1965	96.6	91.4	133.9	0.8	70.4	196.8	162.5	95.0	46.4	12.8	0.8
1966	91.3	86.4	125.9	0.9	70.6	185.9	149.4	85.9	42.2	11.7	0.7

[1] Rates computed by relating total births, regardless of age of mother, to women aged 15 to 44 years.
[2] Through 1963, rates computed by relating births to mothers aged 45 years and over to women aged 45 to 49 years.
[3] Excludes data for residents of New Jersey.

No. 59. Birth Rate, by Live-Birth Order, Native White Women: 1940 to 1965

[**Births per 1,000 women 15 to 44 years old.** Prior to 1959, excludes Alaska, and 1960, Hawaii. Live-birth order refers to number of children born alive. Figures for births of order not stated are distributed. See also headnote, table 58, and *Historical Statistics, Colonial Times to 1957*, series B 10–18]

Live-birth order	1940	1945	1950	1955	1959 (adj.)	1959 (reg.)	1960	1961	1962	1963	1964	1965

No. 60. Illegitimate Live Births, by Age and Color of Mother: 1940 to 1966

[**In thousands.** Prior to 1960, excludes Alaska and Hawaii. Includes estimates for States in which legitimacy data were not reported. No estimates included for misstatements on birth records or failures to register births]

AGE AND COLOR	1940	1945	1950	1955	1960	1963	1964	1965	1966
Total	**89.5**	**117.4**	**141.6**	**183.3**	**224.3**	**259.4**	**275.7**	**291.2**	**302.4**
Rate [1]	7.1	10.1	14.1	19.3	21.8	22.5	23.4	23.4	23.6
By age of mother:									
Under 15 years	2.1	2.5	3.2	3.9	4.6	5.4	5.8	6.1	6.2
15 to 19 years	40.5	49.2	56.0	68.9	87.1	101.8	111.4	123.1	135.8
20 to 24 years	27.2	39.3	43.1	55.7	68.0	82.6	87.9	90.7	92.5
25 to 29 years	10.5	14.1	20.9	28.0	32.1	35.4	36.4	36.8	35.5
30 to 34 years	5.2	7.1	10.8	16.1	18.9	19.8	19.5	19.6	18.4
35 to 39 years	3.0	4.0	6.0	8.3	10.6	10.9	11.1	11.4	10.5
40 and over	1.0	1.2	1.7	2.4	3.0	3.5	3.6	3.7	3.4
By color of mother:									
White	40.3	56.4	53.5	64.2	82.5	[2] 102.2	114.3	123.7	132.9
Nonwhite	49.2	60.9	88.1	119.2	141.8	[2] 150.7	161.3	167.5	169.5

[1] Rate per 1,000 unmarried (never married, widowed, and divorced) women aged 15 to 44 years enumerated as of April 1 for 1940 and 1950 and estimated as of July 1 for all other years.
[2] See footnote 2, table 61.

No. 61. Net and Gross Reproduction Rate, by Color: 1905 to 1966

[Prior to 1959, excludes Alaska, and 1960, Hawaii. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. Rates computed using annual vital statistics life tables and population estimates by age, except as noted for earlier years. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. A comparison of the net rate with the gross rate affords an indication of the loss sustained by the potential childbearing population through mortality. See also *Historical Statistics, Colonial Times to 1957*, series B 31-36]

PERIOD OR YEAR	NET RATE			GROSS RATE		
	Total	White	Nonwhite	Total	White	Nonwhite
1905 to 1910 [1]	1,336	1,339	1,329	1,793	1,740	2,240

S Does not meet publication standards because reporting less than 90 percent complete.

[1] Provisional. Represents either marriages performed, licenses issued, or intentions filed. U.S. total based on receipts corrected for observed differences between provisional and final data. State data are not corrected in this manner.

[2] Per 1,000 population. Based on total population residing in area; population enumerated as of Apr. 1 for 1950 and 1960, estimated as of July 1 for other years.

[3] Includes reported annulments. [4] 1950 excludes Alaska and Hawaii. [5] Estimated.

[6] Incomplete. [7] Marriage licenses.

[1] Includes any insurance benefits and expenses for prepayment (insurance premiums less insurance benefits).

[2] Includes medical benefits paid under public law by private insurance carriers and self-insurers.

[3] Expenditures for health and medical care primarily through the community action program, including Job Corps, Head Start, VISTA, and other antipoverty programs not shown separately because they were so small.

[4] Includes all items shown under "health and medical services" except (*a*) "expenses for prepayment" and one-fourth of "philanthropy" under private expenditures and (*b*) "other public health activities" and administrative expenses for "health insurance for the aged" and "veterans' hospital and medical care" under public expenditures.

Medical facilities construction	840	1,048	1,912	1,955	4.3	–	1,238	362	355

– Represents zero.

[1] Services of medical and osteopathic physicians in private practice and consumer-sponsored group clinics.

[2] Services of registered and practical nurses in private duty, visiting nurses, podiatrists, physical therapists, clinical psychologists, chiropractors, naturopaths, and Christian Science practitioners.

[3] Includes surgical supplies.

[4] Includes fees of optometrists and expenditures for hearing aids, orthopedic appliances, artificial limbs, crutches, wheelchairs, etc.

[5] Includes the net cost of insurance and administrative expenses of Federally financed health programs.

[6] Includes expenditures of industrial in-plant services, school health services, and the residual amounts of private voluntary health agency and public program expenditures that cannot be allocated by type of service.

No. 83. Health and Medical Care—Per Capita National and Private Consumer Expenditures, by Object: 1950 to 1966

[Based on Bureau of the Census estimated population as of July 1. National expenditures cover total population including Armed Forces and Federal civilian employees abroad; private consumer expenditures cover civilian resident population]

– Represents zero. NA Not available.

[1] Excess of patients released alive from hospital (direct discharges plus leave placements) over those returning to hospital. National data on placements and returns from extramural care are not available, but net releases may be computed from less detailed movement data as follows: Net release equals resident patients beginning of year, plus all admissions excluding transfers, minus deaths in hospital, minus resident patients end of year. Minus sign (–) denotes decrease.

NA Not available.

[1] Prior to 1950, includes State hospitals only. [2] For reporting facilities only.

[3] Based on average daily resident patient population of hospitals reporting personnel by occupation.

[4] Includes clinical directors, psychiatrists and psychiatric residents, and other staff physicians and residents excluding medical interns.

[5] Includes salaries and wages, purchased provisions, fuel, light, water, etc.

[6] Total maintenance expenditures divided by average daily resident patient population of institutions reporting expenditures.

[7] Full-time equivalents of full-time, part-time, and trainee personnel; excludes trainees of VA clinics.

– Represents zero.
D Withheld to avoid disclosing figures for individual producers.
[1] Excludes alicyclic and heterocyclic compounds for 1960; beginning 1964, excludes methionine.
[2] Excludes benzenoid compounds. [3] Includes some sales which were inadvertently reported as bulk sales through 1965. [4] Excludes small amounts of benzenoid barbiturates.
[5] Includes most, but not all, choline salts. [6] Choline chloride only.
[7] For human or veterinary use only through 1960. Sales of mixture and dosage-form products included through 1964; excluded thereafter.
[8] Excludes derivatives. [9] Excludes derivatives other than salts.
[10] Includes benzenoid skeletal muscle relaxants; excludes small amounts of nonbenzenoid tranquilizers.
[11] Excludes K vitamins through 1960.

[1] A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days.
[2] A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.
[3] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.
[4] A day when a child lost the entire school day because of illness or injury. Computed for children 6 to 16 years of age.
[5] Excludes all conditions involving neither restricted activity nor medical attention. Contains some duplication, since time lost because of several concurrent conditions is counted under each contributing condition.

No. 115. Cigarette Smoking and Death Rates, by Age and Sex

Item	35 to 44 years	45 to 54 years	55 to 64 years	65 to 74 years	75 to 84 years
MALE VETERANS (Dorn Study) 1954–1962 [1]					
Total deaths	383	366	13,840	17,550	1,932
Death rate per 100,000 for current cigarette smokers (A)	232	728	1,819	4,032	8,471
Death rate per 100,000 for smokers who never smoked regularly (B)	127	264	1,056	2,411	6,214
Mortality ratio (A÷B)	1.83	2.76	1.72	1.67	1.36
Difference in death rates per 100,000 (A−B)	+105	+464	+763	+1,621	+2,257
Excess deaths as percent of total [2]	33	43	21	17	8
MALE (Hammond Study) 1959/60–1963 [3]					
Total deaths	631	5,297	8,427	8,125	3,968
Deaths rate per 100,000 for current cigarette smokers (A)	397	925	2,202	4,788	9,674
Death rate per 100,000 for smokers who never smoked regularly (B)	210	406	1,202	3,168	7,863
Mortality ratio (A÷B)	1.89	2.28	1.83	1.51	1.23
Difference in death rates per 100,000 (A−B)	+187	+519	+1,000	+1,620	+1,811
Excess deaths as percent of total [2]	33	38	25	13	4
FEMALE (Hammond Study) 1959/60–1963 [3]					
Total deaths	727	2,826	3,915	5,115	4,188
Death rate per 100,000 for current cigarette smokers (A)	186	384	838	2,229	5,846
Death rate per 100,000 for smokers who never smoked regularly (B)	165	304	698	1,913	5,914
Mortality ratio (A÷B)	1.13	1.26	1.20	1.17	0.99
Difference in death rates per 100,000 (A−B)	+21	+80	+140	+316	−68
Excess deaths as percent of total [2]	5	9	4	2	(X)

X Not applicable. [1] An 8½-year followup of 294,000 persons holding U.S. Government life insurance policies. [2] "Excess" defined as deaths among current cigarette smokers above those for smokers who never smoked regularly. [3] A 4-year study of 441,000 men and 563,000 women.

No. 116. Persons Injured—Class of Accident, and Sex: 1967

[For year ending June 30. Data refer to civilian noninstitutional population. Excludes all conditions involving neither restricted activity nor medical attention. Sum of estimates may be greater than total because the classes of accidents are not mutually exclusive. Based on a sample and subject to sampling variability; see source for explanation]

CLASS OF ACCIDENT	PERSONS INJURED (millions)			RATE PER 100 POPULATION		
	Both sexes	Male	Female	Both sexes	Male	Female
All classes	**51.8**	**30.5**	**21.3**	**26.9**	**32.9**	**21.4**
While at work	10.3	9.2	1.1	5.4	9.9	1.1
Home	22.6	11.0	11.7	11.8	11.8	11.7
Other (includes motor vehicle)	21.0	12.3	8.7	10.9	13.2	8.7

Source: Dept. of Health, Education, and Welfare, Public Health Service; *Vital and Health Statistics*, Series 10–No. 43.

No. 117. Persons Injured and Rate Per Year, by Type of Accident: 1959–61

[Annual average for July 1959–June 1961. Includes only persons with injuries involving 1 or more days of restricted *activity or medical attention*]

TYPE OF ACCIDENT	Persons injured (1,000)	Rate per 1,000 population	TYPE OF ACCIDENT	Persons injured (1,000)	Rate per 1,000 population
Total	**44,995**	**255.2**	All other falls	7,762	44.0
Moving motor vehicle	2,890	16.4	Bumped into object or person	3,482	19.8
Other	42,105	238.8	Struck by moving object	4,108	23.3
Uncontrolled fire, explosion, or discharge of a firearm	380	2.2	Handled or stepped on rough objects	2,515	14.3
Nonmotor vehicle, in motion	880	5.0	Caught in, pinched, or crushed between two objects	1,883	10.7
Machinery, in operation	1,309	7.4	*Came in contact with hot object or open flame*	1,331	7.5
Cutting or piercing instrument	*2,688*	*15.2*	One-time lifting or exertion	2,207	12.5
Foreign body in eye, windpipe, or other orifice	1,184	6.7	Twisted or stumbled	1,794	10.2
Injury caused by animal or insect	1,838	10.4	Therapeutic misadventure	1,368	7.8
Falls on stairs, steps, or from a height	4,305	24.4	All other types of accidents	3,072	17.4

No. 118. Nutrition—Nutrients Available for Civilian Consumption Per Capita Per Day: 1940 to 1967

[Prior to 1960, excludes Alaska and Hawaii. Based on Bureau of the Census *estimated population as of July 1*. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data include quantities of iron, thiamine, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A value added to margarine and milk of all types; quantities of ascorbic acid added to fruit juices and drinks. See also *Historical Statistics, Colonial Times to 1957*, series G 546–551]

Indemnity plan [2] (school lunch program):							
Children participating—1,000	7,840	10,972	12,839	16,004	17,024	18,040	18,457
Cost [3]—$1,000	64,537	69,142	93,814	120,810	130,435	141,090	149,685
Special milk program: [4]							
Quantity reimbursed—mil. ½ pt	(X)	450	2,385	2,929	2,967	3,059	3,027
Cost—$1,000	(X)	17,150	80,480	99,250	97,417	96,523	99,170

X Not applicable.
[1] Represents cost to the Federal Government of the commodity as delivered to the State distributing agency.
[2] Comprises elementary and secondary schools. See also headnote, table 122.
[3] Refers to subsidy payments by the Federal Government; excludes administrative costs.
[4] Initiated in September 1954 to increase the consumption of fluid milk in schools and child-care institutions.

Source: Dept. of Agriculture, Consumer and Marketing Service. In annual report, *Agricultural Statistics*.

No. 122. School Lunch Program (Indemnity Plan)—Schools and Children Participating, States and Other Areas: 1967

[Comprises elementary and secondary schools. The indemnity plan is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Federal Government for local purchases of food on a basis of quality and quantity of meals served]

Section 3
Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report* of the Immigration and Naturalization Service. Immigration statistics are prepared from entry documents. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compiled from alien address report cards.

The continuous record of immigration into the United States began in 1819, under the Act of March 2. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Information on immigration and naturalization has been included in annual reports issued by the Office of Immigration from 1892 to 1932, the Secretary of Labor from 1933 to 1940, the Attorney General for 1941, and the Immigration and Naturalization Service since then.

Immigration.—Since 1820 the official immigration statistics (see table 125) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904. Prior to 1868, arriving alien passengers were recorded; thereafter, aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895–1897 when the reporting of arrivals was resumed.

Immigrant.—An immigrant is defined as an alien, other than a returning resident alien, admitted for permanent residence. Quotas limit immigration from countries other than those of the Western Hemisphere. Until 1920 there was only a qualitative limitation into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population. In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that, beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas. The Immigration and Nationality Act of 1952 simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. Quotas revised by Presidential proclamation now total 158,261.

Act of 1965.—Effective December 1, 1965, quotas established under the 1952 Act continue but are subject to a new preference system. Moreover, at the end of each fiscal year the numbers allocated to each country which are not used are transferred to an immigration pool and made available to preference immigrants who cannot obtain visas because the quota for their country is exhausted. The allocations from the pool and from existing numbers may not exceed 170,000.

Also effective December 1, 1965, the "quota immigrant" of the 1952 Act is called "immigrant" and the "nonquota immigrant" is called "immediate relative" or "special immigrant." Immediate relatives of United States citizens are parents (if the citizen is over age 21), spouses, and children under age 21. They are exempted from the numerical ceilings.

Special immigrants include returning resident aliens (although these are often classed as nonimmigrants for statistical purposes), certain former citizens, and certain other specified groups. The spouses and children under age 21 of the following groups are included if they are accompanying or following to join such immigrants: Western Hemisphere natives, retired employees of our government abroad, and ministers of religion. Special immigrants are also exempt from the numerical ceilings.

Effective July 1, 1968, a limit of 170,000 is set for immigrants who are natives of countries outside the Western Hemisphere, with a 20,000 maximum on natives of any one country. Selection is made on the basis of preferences favoring family reunification and persons with skills and talents needed here. Also effective then, unless Congress decides otherwise, is a ceiling of 120,000 on Western Hemisphere natives on a first-come first-served basis with no limitation on the number from any one country. "Immediate relatives" and "special immigrants" other than those in the latter category because of Western Hemisphere birth continue to be exempt from numerical ceilings.

Nonimmigrant.—Nonimmigrants are aliens who enter the United States for temporary periods. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants, and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; students; and others. Resident aliens returning from a temporary stay abroad are often classed as nonimmigrants, although they are legally special immigrants. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Displaced persons and refugees.—The Displaced Persons Act of 1948 was the first of eight special acts passed between 1948 and 1960 that provided for the admission of refugees from Communist-dominated countries, victims of natural calamities, and orphan children without regard to the usual numerical ceilings.

Status of Cubans.—Effective November 2, 1966, Cubans admitted or paroled into the United States after January 1, 1959, and present in the United States for at least 2 years may obtain permanent resident status. A record of the alien's admission for permanent residence will be created as of 30 months prior to filing of an application or the date of his last arrival in the United States, whichever is later. Cuban immigrants who have been admitted for permanent residence may also have the date of admission adjusted to a date 30 months prior to the date of this Act.

Alien registration.—The Immigration and Nationality Act provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address to the Attorney General during the month of January. Alien address report cards are distributed through the post offices of the United States or the local offices of the Immigration and Naturalization Service.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Section 4

Education

This section presents data concerning the enrollment, personnel, level, extent, and finances of formal education in the United States. The chief sources of these data are the decennial Census of Population and the Current Population Survey, both conducted by the Bureau of the Census (see text, p. 1), and a number of annual, biennial, and other periodic surveys conducted by the Office of Education. The Census of Population has included data on school enrollment since the Census of 1840 and on educational attainment since the Census of 1940. The Current Population Survey has reported on school enrollment annually beginning in 1945 and on educational attainment and illiteracy periodically beginning in 1947. The Office of Education has collected statistical information on American education since 1870. In the early years, the data were published in the *Annual Report* of the Commissioner of Education. From 1916–18 to 1956–58, they appeared in *Biennial Survey of Education in the United States.* Currently they are summarized in *Digest of Educational Statistics,* an annual publication issued for the first time in 1962. The *Digest* includes data on pupils, staff, finances, and organization at elementary, secondary, and college levels. Projections of enrollment, graduates, teachers, and expenditures appear in *Projections of Educational Statistics,* issued annually since 1964.

Other regular sources of education data include special studies of the Office of Education, publications of the National Education Association, and annual or biennial reports of education agencies in individual States. The Office of Education's reports, *Federal Funds for Education,* contain detailed data on Federal expenditures for education. Administrative statistics on programs concerned with the distribution of Federal funds are issued by the agencies responsible. The quinquennial Census of Governments, conducted by the Bureau of the Census, provides data on school district finances. Reports published by the Bureau of Labor Statistics contain data relating employment experience to educational attainment. Special studies by the National Science Foundation present statistics on scientists and technicians. Similar studies by the National Institutes of Health cover medical fields. Data on vocational training are available in *Vocational and Technical Education,* issued annually by the Office of Education.

Types of data.—The statistics in this section are of two general types. One type, exemplified by data from the Bureau of the Census, is based on direct questioning of individuals to obtain information about their own and their families' education. Tabulations of this type of data relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population.

The second type, exemplified by data from the Office of Education and the National Education Association, is based on reports obtained from administrators of educational institutions and of local and State agencies having jurisdiction over education. This type of data relates to school enrollment, attendance, staff, and finances for the United States, individual States, and local areas, according to institutional characteristics.

State laws.—Although all States except Mississippi and South Carolina have requirements that children attend school, State laws vary as to the ages and circumstances of compulsory attendance. In the majority of States, the laws require that formal schooling begin by age 7 and continue to age 16.

Schools.—The Office of Education defines a "school" as "A division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

The basic Office of Education statistics for elementary and secondary schools are concerned primarily with the local school systems serving the general population. Data from other types of schools are secured from time to time. School enrollment statistics of the Bureau of the Census are based on attendance or enrollment in any regular school within a given period; educational attainment statistics are based on the highest grade completed by an individual. "Regular" schools include public and private kindergartens, graded schools, colleges, universities, and professional schools. "Public" schools are defined as schools controlled and supported by local, State, or Federal governmental agencies; "private" or "nonpublic" schools are those controlled and supported mainly by religious organizations or by private persons or organizations. Neither the Office of Education nor the Bureau of the Census regularly includes specialized vocational, trade, or business schools, residential schools for exceptional children, and correspondence schools. Office of Education enrollment data include kindergartens and those nursery schools which are publicly financed; Census enrollment data include kindergartens but exclude nursery schools. At the higher education level, the basic Office of Education statistics and the Bureau of the Census enrollment statistics are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges. Statistics for certain other types of institutions beyond the high school, such as those offering organized occupational curriculums of nondegree character, are also collected by the Office of Education.

With respect to school levels, the Bureau of the Census defines "elementary" schools as including grades 1 through 8; "high" schools as including grades 9 through 12; and "colleges" as including junior or community colleges, regular 4-year colleges, and graduate or professional schools. Statistics reported by the Office of Education and the National Education Association by type of organization, as elementary level and secondary level, may not be strictly comparable with those from the Bureau of the Census because the grades included at the two levels vary, depending on the organization of junior high schools. The trend is for the enrollment in grades seven and eight to shift from an elementary to a secondary organization, with resultant changes in grade distribution.

School year.—Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year which generally begins in September of the preceding year and ends in June of the year stated. Statistics concerning school finances are for a 12-month period, usually July 1 to June 30.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 145. Public and Private Schools—Number, by Level: 1930 to 1966

[Prior to 1960, excludes Alaska and Hawaii. Schools classified by type of organization, rather than by grade-group; elementary excludes kindergarten and secondary includes junior high schools]

No. 149. School Enrollment, by Sex and by Level—Estimates, 1950 to 1966, and Projections, 1970 to 1985

[**In thousands, except as indicated.** As of fall of year. Prior to 1960, excludes Alaska and Hawaii. Elementary includes kindergarten and grades 1–8; high school, grades 9–12 and postgraduates; and colleges 1–4 year college and graduate and professional school. Series shown represent projections based on different combinations of assumptions about population and enrollment rates. For basis of population projections, see headnote, table 7. Enrollment Series 1 and 2 are both based on the assumption that age-specific enrollment rates will continue to increase. Series 1 assumes a relatively rapid increase in the rates following the experience of the period 1950–52 to 1963–65; the projected rates are adjusted to tie in with the estimates for 1965. Series 2 assumes a more moderate increase based on an average of the projected rates in Series 1 and rates in 1965. More detailed methodology is given in source]

No. 155. Years of School Completed, by Sex: 1957–59, 1964–66, and Projections to 1985

[In thousands of persons 25 years old and over. As of March 1. Excludes Armed Forces in barracks. Projections are based on the age-grade specific attainment ratios from the 1964, 1965, and 1966 Current Population Survey. The projections assume declines in the proportions of the population aged 25 to 29 terminating their education at a given level, some further attainment by ages 30 to 34, and a continuation of past attainment ratios for older age cohorts. Series A assumes lower rates of termination than indicated by the trends from 1958 to 1965; Series B assumes higher rates of termination. For basis of population projections, see headnote, table 7]

Year, series, and sex	Persons 25 years old and over	Years of school completed							
		None	Elementary school			High school		College	
			1 to 4 years	5 to 7 years	8 years	1 to 3 years	4 years	1 to 3 years	4 years or more

No. 159. Lifetime and Mean Income in 1949 to 1966 of Males 25 Years Old and Over, by Years of School Completed

[Prior to 1961, excludes Alaska and Hawaii. Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Figures for lifetime income based on application of appropriate life tables to arithmetic mean income, by age, as obtained for a cross section of population in each year shown. Figures for mean income for 1949 based on Census of Population data; thereafter, on Current Population Survey; see text, p. 1]

Years of school completed	Lifetime income ($1,000)					Annual mean income				
	1949	1956	1961	1965	1966	1949	1956	1961	1965	1966
Elementary:										
Less than 8 years	91	122	142	159	174	$2,062	$2,574	$2,998	$3,283	$3,520
8 years	123	166	192	216	228	2,829	3,631	4,206	4,663	4,867
High school:										
1 to 3 years	142	189	223	252	270	3,226	4,367	5,161	5,905	6,294
4 years	175	228	257	297	320	3,784	5,183	5,946	6,899	7,494
College:										
1 to 3 years	202	268	325	353	381	4,423	5,997	7,348	8,133	8,783

– Represents zero. NA Not available.

[1] For 1900, enumerated population as of June 1; for 1960, enumerated population as of Apr. 1; for all other years, estimated population as of July 1 of preceding year (1919, 1939, etc.). Excludes Armed Forces abroad.

[2] Includes librarians and other nonsupervisory instructional staff. Prior to 1940, figures represent number of persons employed rather than number of positions. [3] Beginning 1960, estimated.

[4] Through 1950, includes community services. Beginning 1960, not comparable with prior years.

[5] Comprises summer schools, community colleges, adult education, and, beginning 1960, community services.

[6] Excludes capital outlay by nonschool agencies.

[7] Based on current expenditure allocable to pupil costs, capital outlay, and interest.

[8] Excludes current expenditures not allocable to pupil costs. [9] Includes interest.

1967	27,381	16,506	1,040	815	57	34	26.3	20.3	(NA)	(NA)	1,709

NA Not available.
[1] Due to changes in school plant inventories, number of instruction rooms at beginning of a particular school year does not always represent number of rooms available at beginning of previous year, plus rooms completed, minus rooms abandoned.

Dept. of Health, Education, and Welfare, Office of Education; annual report, *Statistics of Public Schools*.

No. 166. Public Elementary and Secondary Schools—Enrollment, Teachers, and Schoolrooms, States: Fall 1967

[Fall enrollment data are not directly comparable with enrollment figures given for an entire school year in other tables. Except as noted, schools are classified by type of organization, rather than by grade-group; elementary includes kindergarten; secondary includes junior high schools]

State	Pupils enrolled (1,000)		Classroom teachers				Pupil-teacher ratio (all schools)	Instruction rooms		
			Total		Teaching under substandard credentials			Completed, 1966–67	Abandoned, 1966–67	Available and in use, 1967–68
	Elementary	Secondary	Elementary	Secondary	Elementary	Secondary

No. 174. Achievement Tests—Median Scores for Students in Grades 1 and 12, by Race or Ethnic Group: 1965

[As of fall. For definition of median, see headnote, table 8. Estimates based on survey of public elementary and secondary schools. Represents results of standard achievement tests of such skills as reading, writing, calculating, and problem solving. Scores on each test were standardized so that the average over the national sample equaled 50 and the standard deviation equaled 10. This means that about 16 percent of all students would score below 40 and about 16 percent above 60]

Grade and type of test	White	Negro	Puerto Ricans	Indian Americans	Mexican Americans	Oriental Americans
GRADE 1						
Nonverbal	54.1	43.4	45.8	53.0	50.1	56.6
Verbal	53.2	45.4	44.9	47.8	46.5	51.6
GRADE 12						
Nonverbal	52.0	40.9	43.3	47.1	45.0	51.6
Verbal	52.1	40.9	43.1	43.7	43.8	49.6
Reading	51.9	42.2	42.6	44.3	44.2	48.8
Mathematics	51.8	41.8	43.7	45.9	45.5	51.3
General information	52.2	40.6	41.7	44.7	43.3	49.0
Five tests, average	52.0	41.1	43.1	45.1	44.4	50.1

– Represents zero. NA Not available.

[1] Includes other nonsupervisory instructional staff in Georgia, Idaho, Louisiana, South Dakota, Virginia, and Wisconsin.

[2] Includes guidance counselors.

[3] Estimated by the NEA Research Division.

[4] Amount shown should be reduced by about one-fourth to make its purchsing power comparable to figures reported for other States.

[5] Salary figures include extra compensation for coaching, supervision of intern teachers, etc.

[6] Excludes kindergarten teachers.

[7] Excludes instructional staff in vocational and vocational-technical schools not operated as part of the regular public school system.

[8] Number of teachers supplied by the Montana Education Association, and NEA Research Division estimates of salaries confirmed by the Association.

[1] Represents institutions reporting staff and enrollment. Institutions reporting income and expenditure numbered 1,609. [2] Includes administrative, extension service, correspondence, and organized research staff in addition to regular staff; beginning 1960, represents total number of different persons (not reduced to full-time basis). 1940 and 1950 data are for academic year; 1960, 1962, and 1964, for first term 1959-60, 1961-62, and 1963-64, respectively. [3] Includes nondegree-credit extension and correspondence enrollment.
[4] Grounds, buildings, equipment, and unexpended plant funds.
[5] All funds other than national defense and student loan funds.

[1] Includes opportunities for persons referred to institutional and on-the-job training from experimental and demonstration projects and funds authorized for their training; excludes opportunities for persons who received special services only or funds authorized to provide special services. [2] Includes opportunities for other-than-skill training, not shown separately, as follows: August 1962–June 1967, 50,000; 1966, 23,000; and 1967, 27,000. [3] Beginning 1967, Public Law 87-415 provides for non-Federal contributions of not less than 10 percent of the total cost for training in institutional projects. [4] Includes Federal funds authorized for other-than-skill training, not shown separately, as follows: August 1962–June 1967, $23 million; 1966, $11 million; and 1967, $12 million.
[5] Employed at time of last contact.

Section 5

Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, Federal court cases, the legal profession, Federal and State prisoners, and the use of the death penalty. The chief sources of data on these subjects are: *Uniform Crime Reports for the United States,* issued annually by the Federal Bureau of Investigation; the *Annual Report of the Director* and *Special Reports on Federal Offenders and Persons Under the Supervision of the Federal Probation System,* issued by the Administrative Office of the U.S. Courts; and *Statistical Tables,* an annual statistical review of the Federal prison system, and *National Prisoner Statistics,* a series of periodical bulletins and reports, both issued by the Bureau of Prisons.

In addition, limited information concerning juvenile delinquency and the operation of juvenile courts is collected by the Children's Bureau of the Department of Health, Education, and Welfare. Statistics on lawyers and their characteristics are compiled by the American Bar Foundation, Chicago, Illinois. Data on prosecution and disposition of persons charged with misdemeanors and other minor offenses may be found for some of the larger cities in the annual reports of their municipal courts or governments.

In 1967, the President's Commission on Law Enforcement and Administration of Justice issued *The Challenge of Crime in a Free Society,* a comprehensive survey of crime and criminal justice in the United States. This report presents data based upon published and unpublished information from official agencies, the results of a national survey of 10,000 households concerning the experience of the general public as victims of crime, and a special national survey of correctional agencies and facilities.

Law enforcement and legal jurisdiction.—Law enforcement is for the most part a function of State and local officers and agencies. The U.S. Constitution reserves general police powers to the States. By act of Congress, Federal offenses include only offenses against the U.S. Government and against its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. Excluding the military, there are 52 separate criminal law jurisdictions in the United States, 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State, although there are often substantial differences among the States in the penalties provided for like offenses.

Law enforcement can be divided into three parts. The first covers the activities of the police agencies, namely, the investigation of crimes and the arrest of persons suspected of committing them. This function involves municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State, and Federal grand juries, and prosecuting court officers. The third division of administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the penalty is enforced by the prison, reformatory, or jail, or by probation or parole officials.

Crime.—The Federal Bureau of Investigation, through its Uniform Crime Reporting Program, receives monthly and annual reports on a voluntary basis from law enforcement agencies throughout the country. Each month, city police, sheriffs, and State police file reports on the number of offenses that become known to them in the following crime categories—murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny ($50 and over in value), and auto theft. These seven categories are the basis of the FBI's Crime Index, a measure of the extent, fluctuation, and distribution of serious crime in the United States. The monthly reports also contain data on the number of these crimes cleared by arrest and certain other analytical data pertaining to specific crime categories. Annual reports provide summaries of data concerning persons arrested for all criminal offenses, by age, sex, and race of the offender, as well as an accounting of the number of persons formally charged and their disposition. The law enforcement agencies currently reporting to the FBI represent 92 percent of the national population.

In summarizing and publishing crime data, the FBI does not vouch for the validity of the reports it receives, but presents the data as information useful to persons concerned with the problem of crime and criminal-law enforcement.

Courts.—Court statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole although data are available for many States individually. The only national compilations of such statistics were made by the Bureau of the Census which, from 1932 to 1945, obtained reports from a number of States on defendants prosecuted, convicted, and sentenced in courts of general trial jurisdiction. At no time, however, were there more than 32 States involved in the reporting system.

Comprehensive information on the business of the Federal courts is collected by the Administrative Office of the U.S. Courts and is published in the *Annual Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. Whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine. Generally, the Federal courts have jurisdiction over the following types of cases:

(1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every State and one each in Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11, known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Prisoners.—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950 when this work was transferred to the Bureau of Prisons. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority are now published periodically by the Bureau of Prisons in *National Prisoner Statistics* and in its annual statistical report, *Statistical Tables*. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 206. Crimes and Crime Rates, by Type: 1960 to 1966

[**In thousands, except as indicated.** Offenses known to the police per 100,000 population. Based on Bureau of the Census population data, excluding Armed Forces abroad, enumerated Apr. 1, 1960 and estimated as of July 1 thereafter]

Item and year	Total	Murder and nonnegligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny $50 and over	Auto theft
Number of offenses:								
1960	2,001	9	17	105	152	887	506	326
1961	2,068	9	17	104	154	923	529	334
1962	2,199	8	17	108	162	966	573	364
1963	2,420	9	17	113	172	1,056	649	405

Over 1,000,000	17	1	3	13

– Represents zero.
[1] Characterized by many fires, intensive looting, sniping, violence lasting more than 2 days, sizable crowds, and use of National Guard or Federal forces and other control forces.
[2] Characterized by isolated looting, some fires, some rock throwing, violence lasting between 1 and 2 days, only 1 sizable crowd or many small groups, and use of State police.
[3] Characterized by a few fires and broken windows, violence lasting generally less than 1 day, participation by only small numbers of people, and use, in most cases, only of local police or police from a neighboring community.
[4] Data not available for 4 communities.

Source: The National Advisory Commission on Civil Disorders; *Report*, March 1968.

No. 209. Grievances in Cities Where Civil Disorders Occurred, by Level of Intensity: 1967

[Based on surveys made in 20 cities where civil disorders occurred. Grievances evaluated as to significance in each city and rank and points assigned to the 4 most serious, as follows: 4 points for 1st place, 3 for 2d, 2 for 3d, and 1 for 4th. Total points for each grievance category represents number of cities in which it was ranked among the top 4 multiplied by the number of points. Thus, a 4-point grievance assigned to 2 cities amounted to 8 points. Judgments of severity based on frequency of mention of a particular grievance, relative intensity with which it was discussed, references to incidents exemplifying it, and estimates of severity]

GRIEVANCE CATEGORY	Cities [1]	Points [2]
Police practices	14	45.5
Unemployment and underemployment	17	42.0
Inadequate housing	14	36.0
Inadequate education	9	21.0
Poor recreation facilities and programs	8	21.0
Ineffective political structure and grievance mechanisms	5	14.0
Disrespectful white attitudes	4	6.5
Discriminatory administration of justice	3	4.5
Inadequate Federal programs	1	2.5
Inadequate municipal services	1	2.0
Discriminatory consumer and credit practices	2	2.0
Inadequate welfare programs	–	–

– Represents zero.
[1] Where grievances were mentioned as significant.
[2] Where 2 grievances were judged equally serious, points for the 2 rankings were divided equally.

No. 220. Summary of Government Expenditure and Employment for Police Protection and Correction: 1962

[Employment data as of October, except as noted. Police employment includes uniformed policemen, law enforcement agents, and clerical, administrative, and custodial personnel concerned with police protection activities. Federal police employment is in the Federal Bureau of Investigation, the Immigration and Naturalization Service, the Bureau of Narcotics, and the Secret Service. Correction includes employment in prison systems, and probation and parole activities for convicted offenders; preconviction detention, as in city jails, is included under police protection]

No. 228. Juvenile Court—Cases Handled and Child Population: 1940 to 1966

[Prior to 1960, excludes Alaska and Hawaii. Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously antisocial conduct. Dependency and neglect cases are all cases referred to the court for some form of neglect or inadequate care on the part of parents or guardians]

ITEM	1940	1945	1950	1955	1960	1964	1965	1966
Population 10 to 17 years old [1]....1,000..	19,138	17,512	17,397	20,111	25,364	29,189	29,479	30,008
Delinquency cases:								
Including traffic [2]....1,000..	200	344	280	431	813	1,128	1,157	1,268
Excluding traffic [2]....1,000..	(NA)	(NA)	(NA)	(NA)	510	686	697	745
Per 1,000 population 10 to 17 years old:								
Including traffic....	10.5	19.6	16.1	21.4	32.1	38.6	39.2	42.3
Excluding traffic....	(NA)	(NA)	(NA)	(NA)	20.1	23.5	23.6	24.8
Population under 18 years old [1]....1,000..	40,365	41,313	47,017	55,568	64,553	70,228	70,431	70,665
Dependency and neglect cases:								
Total [2]....1,000..	(NA)	(NA)	93	106	131	150	157	161
Per 1,000 population under 18 years old..	(NA)	(NA)	2.0	1.9	2.0	2.1	2.2	2.3

NA Not available. [1] Bureau of the Census estimates of civilian population as of July 1.
[2] 1950 and earlier years, estimated by Children's Bureau on basis of reports from a comparable group of courts. Beginning 1955, delinquency cases based on data from a national sample of juvenile courts; dependency and neglect cases based on reports from courts serving about two-thirds of the child population under 18 years of age.

[1] Includes lawyers not reporting and an estimated adjustment (subtraction) to account for duplications.
[2] Based on Bureau of the Census estimates of resident population including Armed Forces stationed in area as of July 1, 1966.
[3] Includes 6,787 duplications.
[4] In some cases, if more than one subentry was applicable the individual was tabulated in each.

NA Not available. [1] Not included in State figures.
[2] Beginning 1960, excludes male misdemeanant prisoners in adult correctional institutions. Beginning 1965, excludes female misdemeanants.
[3] Beginning 1960, prisoners present include prisoners out of the institution on temporary absences.
[4] Through 1955, covers only the New Castle County workhouse; thereafter, also includes the Kent and Sussex County workhouses which were united with it to form a State correctional system.
[5] Includes all felony prisoners regardless of age.
[6] Beginning 1960, excludes misdemeanant prisoners received from court.

No. 241. Prisoners Executed Under Civil Authority: 1930 to 1967

[Includes 3 Federal executions in Alaska, 1 each in 1939, 1948, and 1950. Excludes executions by military authorities. The Army (including the Air Force) carried out 160 (148 between 1942 and 1950, 3 each in 1954, 1955, and 1957, and 1 each in 1958, 1959, and 1961). Of the total, 106 were executed for murder (including 21 involving rape), 53 for rape, and 1 for desertion. The Navy carried out no executions during the period. See also *Historical Statistics, Colonial Times to 1957*, series H 432-444]

Section 6

Area, Geography, and Climate

This section relates to area, climatologic, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements (issued infrequently by the Bureau of the Census), which present area and geography statistics of national scope. However, many data are compiled for particular regions or for internal administrative purposes by such Federal agencies as the Geological Survey and the Environmental Science Services Administration.

Area.—Area measurements in the United States began with the country as a whole and developed, as mapping progressed, to measurements for the States. The annual report of the U.S. General Land Office for 1850 contained the first reference to the areas of the States and Territories, although there was no indication of the method used in obtaining the measurements. Until 1881, the General Land Office was practically the sole source of information on areas of the States and Territories.

In 1881, as part of the 1880 Census of Population, the Bureau of the Census laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement. As part of the 1940 census, the Bureau published *Areas of the United States: 1940*, presenting data on the total land and water areas of the States, counties, cities, and minor civil divisions. For reports of the 1950 and 1960 censuses, adjustments in selected area figures were made for three principal reasons: Changes in boundaries, the development of water reservoirs, or improvement in maps from which area measurements are made. In 1964, the Bureau undertook measurement of the areas of cities, minor civil divisions, and census county divisions of the 1960 census. The results are published in *Area Measurement Reports, Series GE-20*, the series consisting of one report for each State and a United States summary. These reports include the same kinds of data as the 1940 report plus statistics on the population (total and per square mile) for each area.

Geography.—The Geological Survey, cooperating with State and local agencies, is responsible for topographic, geologic, and hydrologic maps; basic data on the quantity, quality, and movement of surface and ground water; and classification of Federal lands for mineral and water-power potential.

The Bureau of Land Management conducts surveys and maintains records of the public domain and other public lands.

The Coast and Geodetic Survey, a component of the Environmental Science Services Administration, was authorized in 1807 and is responsible for coastal and geodetic surveys and measurement of certain physical phenomena. Its original function was to survey and chart the coast of the United States and the outlying islands and fishing banks. Currently, its primary functions are to provide charts for marine and air navigation, a basic network of geodetic control, and other basic data for engineering, scientific, commercial, industrial, and defense needs.

A civil mapping activity of the Corps of Engineers, the U.S. Lake Survey, was established in 1841. Its primary function is to furnish Great Lakes navigators with reliable charts and information on harbor facilities. It also maintains records of the fluctuating levels of the Great Lakes, the precipitation over them, and the flow through connecting rivers, and issues reports on all hydraulic problems relating to the Great Lakes.

Air pollution.—The Public Health Service first established an air sampling network in 1953. The Federal Air Pollution Research and Technical Assistance Act (PL 159, 84th Congress), under the provisions of which the present National Air Sampling Network was created, became effective in 1955. The Network's objectives are to determine the extent and nature of air pollution, to study trends in levels of atmospheric contaminants, and to investigate relationships between air pollution and socio-economic, geographic, topographic, and other factors. Currently there are 250 sampling stations in the Network, 215 urban and 35 nonurban.

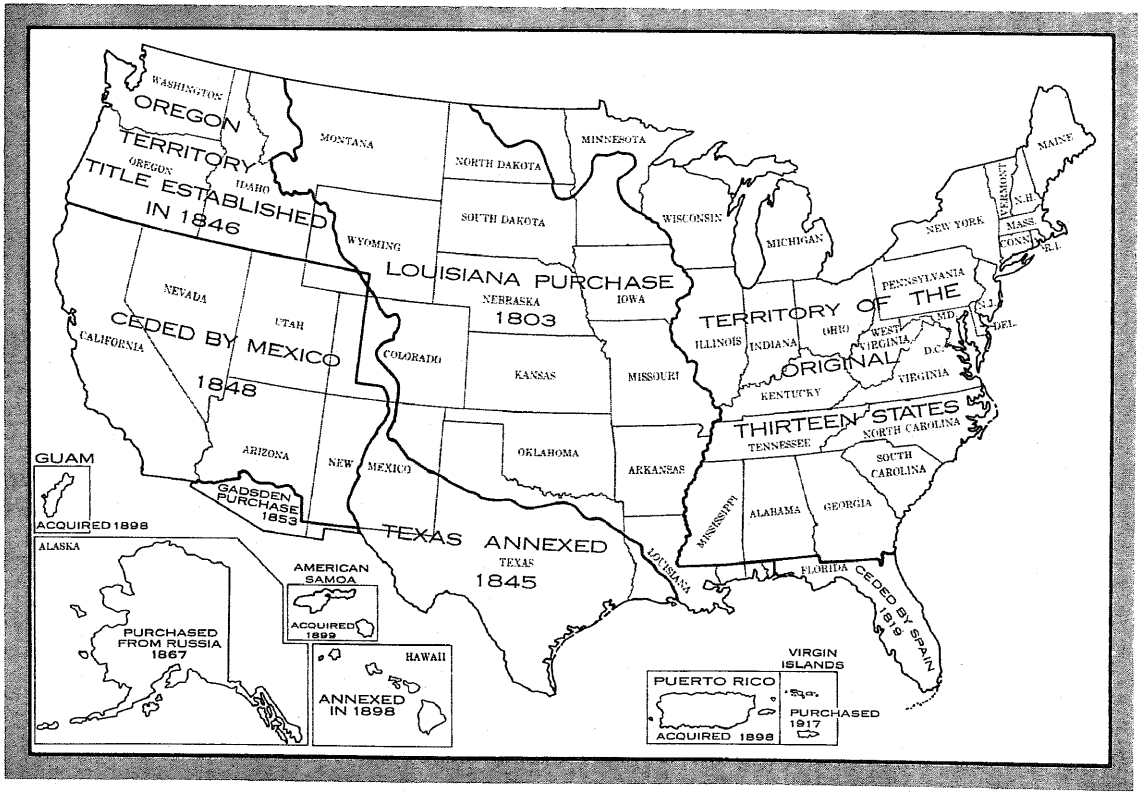
Radioactivity in air.—The Radiation Alert Network, a cooperative air sampling program consisting of 73 collection stations, is operated by the National Center for Radiological Health in conjunction with State health departments. Its primary objective is to alert Federal, State, and local health agencies to significant increases in atmospheric concentrations and depositions of radioactive materials.

Climate.—The Environmental Science Services Administration, through the Weather Bureau and the Environmental Data Service, is responsible for collecting, processing, and publishing data on climate. It maintains about 11,000 weather stations, of which nearly 3,000 produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day.

Nearly all weather stations have been moved several times in their history. Consequently, the Weather Bureau uses "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1931 to 1960. For stations having records for the entire 30 years from the same instrument site, monthly precipitation and temperature normals are the means of the monthly values for the 30 years; for temperature, the normal maximum and normal minimum values were used to obtain monthly normals. The annual normal temperature is obtained by dividing by 2 the sum of the annual normal maximum value and the annual normal minimum value of temperature.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1931 to 1960, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining the resultant adjustment factors. Normals were thereafter obtained as outlined above.



This system of normals has three characteristics: (1) The 30-year period (1931 to 1960) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated.

The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and computed from the standard base 65° F. The degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

FIG. IX. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER PRINCIPAL AREAS

[See table 243]

Source: Dept. of Commerce, Bureau of the Census.

No. 243. Territorial Expansion of the United States and Acquisitions of Other Areas

[Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession, which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1960. See also *Historical Statistics, Colonial Times to 1957*, series J 1–2]

Accession	Date	Gross area (land and water)	Accession	Date	Gross area (land and water)

[1] Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

[2] Not included in total. Ceded by Spain in 1898, the Philippines constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

[3] Ceded by Spain in 1898 and became Commonwealth of Puerto Rico by Act of Congress on July 25, 1952. See table 10.

[4] Acquired 1898; ratified 1899.

[5] Acquired 1899; ratified 1900.

[6] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[7] Leased (1914) from Republic of Nicaragua for 99 years.

[8] Under trusteeship. See table 10, footnote 15.

[9] Comprises following islands with gross areas as indicated: Midway (2), Wake (3), Palmyra (4), Canton and Enderbury (combined area, 27), Swan (1), Navassa (2), Baker, Howland, and Jarvis (combined area, 3), Johnston and Sand (combined area, less than 0.5). Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrano Bank (each less than 0.5), and other islands specified in table 10, footnote 8, for which area figures are not available.

– Represents zero.

[1] Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1: 1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

[2] Figures obtained in 1939-1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

No. 246. Distances Between Extreme Points and Geographic Centers of the United States

[The geographic center of an area may be defined as the center of gravity of the surface, or that point on which the surface of the area would balance if it were a plane of uniform thickness. Because many factors such as curvature of the earth, large bodies of water, and irregular surfaces affect the determination of centers of gravity, the following positions should be considered as approximations only]

Extreme point	Direction from geographic center	Latitude (North)	Longitude (West)	Distance from geographic centers (miles)

No. 249. Lengths of Principal Rivers

[Comprises rivers 400 miles or more in length. Length represents distance to designated outflow from (*a*) original headwater of named river where name applies to entire length of channel, or (*b*) upper limit of channel so named, usually the junction of 2 tributaries or headwater streams]

RIVER	Outflow	Length (miles)	RIVER	Outflow	Length (miles)
Apalachicola-Chattahoochee	Gulf of Mexico	550	Neosho	Arkansas River	450
Arkansas	Mississippi River	1,450	Niobrara	Missouri River	431
Belle Fourche	Cheyenne River	416	North Canadian	Canadian River	784
Big Sioux	Missouri River	420	North Platte	Platte River	680
Brazos	Gulf of Mexico	1,210	Ohio	Mississippi River	981
Canadian	Arkansas River	906	Ohio-Allegheny	Mississippi River	1,306
Cimarron	Arkansas River	698	Ouachita	Red River	605
Clark Fork-Pend Oreille	Columbia River	505	Pearl	Gulf of Mexico	490
Colorado (U.S.-Mex.)	Gulf of California	1,450	Pecos	Rio Grande	926
Colorado (Texas)	Matagorda Bay	894	Pee Dee-Yadkin	Winyah Bay	435
Columbia	Pacific Ocean	1,214	Porcupine	Yukon River	555
Columbia, Upper	To mouth of Snake River	890	Powder	Yellowstone River	486
Colville	Beaufort Sea	428	Red (Okla.-Tex.-La.)	Mississippi River	1,222
Connecticut	Long Island Sound	407	Red River of the North	Lake Winnipeg	545
Cumberland	Ohio River	687	Republican	Kansas River	422
Gila	Colorado River	630	Rio Grande	Gulf of Mexico	1,885
Green (Utah-Wyo.)	Colorado River	730	St. John	Bay of Fundy	400
Innoko	Yukon River	463	Salmon (Idaho)	Snake River	402
James (N. Dak.-S. Dak.)	Missouri River	710	Santee-Wateree-Catawba	Atlantic Ocean	438
Kootenai	Columbia River	485	Smoky Hill	Kansas River	560
Koyukuk	Yukon River	554	Snake	Columbia River	1,000
Kuskokwim	Kuskokwim Bay	800	South Platte	Platte River	442
Little Missouri	Missouri River	560	Susquehanna	Chesapeake Bay	458
Marais des Cygnes—Osage	Missouri River	496	Tanana	Yukon River	531
Milk	Missouri River	625	Tennessee	Ohio River	652
Mississippi	Mouth of SW Pass	2,348	Tennessee-French Broad	Ohio River	869
Mississippi, Upper	To mouth of Missouri River	1,171	Tombigbee	Mobile River	409
Mississippi-Missouri-Red Rock	Mouth of SW Pass	3,741	Trinity	Trinity Bay	715
Missouri	Mississippi River	2,315	Wabash	Ohio River	475
Missouri-Red Rock	Mississippi River	2,564	Washita	Red River	626
Mobile-Alabama-Coosa	Mobile Bay	639	White (Ark.-Mo.)	Mississippi River	685
			White	Missouri River	507
			Wisconsin	Mississippi River	430
			Yellowstone	Missouri River	671
			Yukon	Bering Sea	1,875

No. 262. Air Pollution—National Air Sampling Levels, Selected Cities: 1966

[Air pollution is defined as the presence in the air of substances put there by the activities of man, in concentrations sufficient to interfere with comfort, safety, or health or with use and enjoyment of property. Data represent values of samples taken nationally on a biweekly basis by the National Center for Air Pollution Control. See text, p. 164]

– Represents zero. [1] Period ending in 1966, except as otherwise noted.
[2] Period ending in 1961. [3] Period of record 1931–60.
[4] When the frequency of occurrence in either spring or fall is 1 year in 10, or less, mean dates are not given.
[5] 32° F. has never been recorded.

Section 7

Public Lands, Parks, Recreation, and Travel

Statistics in this section relate to the Federal public domain and other federally owned and leased real property, Indian lands, national parks and forests, State and municipal parks, domestic and foreign travel, and other forms of recreation.

Data on public lands are published primarily by the Department of the Interior, Bureau of Land Management, in *Public Land Statistics*. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*. The Economic Research Service of the Department of Agriculture also issues statistics on land use and land ownership.

The Department of the Interior issues various reports relating to recreation, as follows: The National Park Service publishes information on national parks in its monthly report, *Public Use of National Parks*, and its annual report, *National Parks and Landmarks*, which also covers sites eligible for registry as natural or national historic landmarks and non-federally owned national historic sites. The Bureau of Outdoor Recreation, established in 1962, has not published statistical data on a regular basis. It is responsible for maintaining a continuing inventory of public and private recreation resources and for the preparation of a nationwide outdoor recreation plan that will provide data on the extent and availability of such resources in relation to public needs. The first plan is due for publication in 1968 and will be updated at 5-year intervals. The Fish and Wildlife Service compiles and releases data on sport fishing and hunting and on number and acreage of national wildlife refuges and fish hatcheries. Data for municipal parks and playgrounds, as well as for other outdoor recreational activities, are compiled by the National Recreation and Park Association, Washington, D.C., which issues its *Recreation and Park Yearbook* at 5-year intervals. The Department of Agriculture's Forest Service, in its *Annual Report of the Chief*, issues data on recreational uses of the national forests.

Figures on expenditures for recreation and on domestic and foreign travel, compiled by the Department of Commerce's Office of Business Economics, appear periodically in the monthly *Survey of Current Business*. Domestic travel data by volume and type were collected by the Bureau of the Census in its 1963 Census of Transportation and published in the *Passenger Transportation Survey*, Vol. I, *National Travel* and *Home-to-Work Travel*. Comparable data from the 1967 Census of Transportation, first issued in a series of preliminary reports, are scheduled for final publication in *National Travel Survey*, Vol. I. Foreign travel data based on analysis of passports (see table 137, p. 97 of this book) are published in the annual *Summary of Passport Statistics*, issued by the Department of State's Passport Office.

Few statistical series are available on activities of a cultural nature—art, music, theater, etc.—and those are generally based on infrequent and incomplete one-time studies by private agencies. The only continuing series in this field covers symphony orchestras, compiled by the American Symphony Orchestra League, Inc., Vienna, Va.

Other sources of data relating to individual sports and recreational activities appear in footnotes to table 302 and in the Guide to Sources in appendix III of this book.

Public-domain and acquired lands.—The U.S. Government acquired sovereignty over its present land area through a series of international agreements and treaties. At the time of acquisition of sovereignty over the areas involved (now 2,271 million acres) title to about 463 million acres rested in individual States and their political subdivisions or in private owners, and was not relinquished to the U.S. Government.

Title to the remaining land area passed to the U.S. Government. This area, except for lands in the District of Columbia, is known as the original public domain.

Public-domain lands or public lands are those Federally owned lands to which the public land laws apply. In general, these lands include that portion of the original public domain not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be public lands. In addition to the original public domain, the U.S. Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands.

Indian lands.—Indian lands are the private landholdings of individual Indians or Indian tribes that are subject to special restrictive provisions of Federal law administered by the Bureau of Indian Affairs. They have been set aside for Indian use by treaties, congressional acts, and executive orders. Although most of these lands are in reservations for specific tribes, there are groups of scattered off-reservation allotments in individual ownership and other small tracts of land occupied by Indian groups. Recreational facilities are increasingly being located and operated by Indians on Indian reservations.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

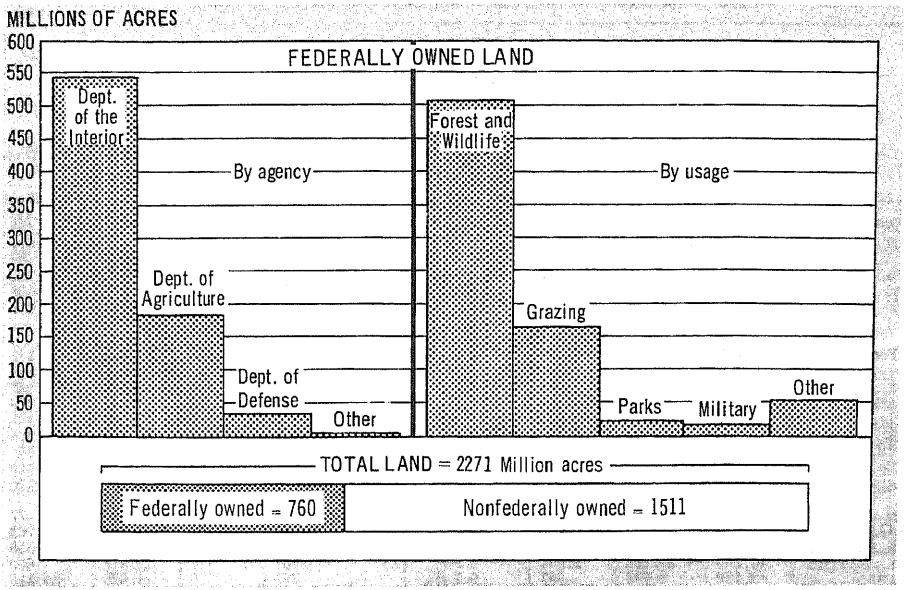
No. 276. Area and Acquisition of the Public Domain: 1781 to 1966

[**In thousands of acres.** Areas of acquisitions are as computed in 1912; hence do not agree with figures in square miles shown in table 243, which includes later adjustments and reflects subsequent remeasurement. See also *Historical Statistics, Colonial Times to 1957*, series J 3–9]

YEAR	Estimated area [1]	YEAR	Estimated area [1]	YEAR AND ACQUISITION	Total	Land	Inland water
1802	200,000	1959	771,000	**Aggregate**	1,837,763	1,807,682	30,081
1850	1,200,000	1960	772,000				
1880	900,000	1961	768,000	1781–1802 (State Cessions)	236,826	233,416	3,410
				1803, Louisiana Purchase [2]	529,912	523,446	6,465
1912	600,000	1962	771,000	1819, Cession from Spain	46,145	43,343	[3] 2,802
1946	413,000	1963	770,000	Red River Basin [4]	29,602	29,067	535
1950	412,000	1964	771,000	1846, Oregon Compromise	183,386	180,644	2,742
				1848, Mexican Cession [2]	338,681	334,479	4,202
1955	411,000	1965	766,000	1850, Purchase from Texas	78,927	78,843	84
1958	410,000	1966	765,000	1853, Gadsden Purchase	18,989	18,962	27
				1867, Alaska Purchase	375,296	365,482	9,814

[1] Comprises original public domain plus acquired lands. Estimated from imperfect data available for indicated years. Prior to 1959, excludes Alaska.

[2] Data for Louisiana Purchase exclude areas eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.



[3] Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public-domain State.

[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase; others maintain it was acquired from Great Britain.

No. 284. Public Lands—Homestead Entries, 1941 to 1967, and Vacant Lands, 1940 to 1967, by States

[Homestead entries for years ending June 30; vacant lands as of June 30. Excludes States with less than 500 acres in years specified. See text, p. 192. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry; the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See *Historical Statistics, Colonial Times to 1957*, series J 10, for vacant lands excluding Alaska and J 17-18 for homestead entries]

No. 300. Participation in Selected Outdoor Activities—Persons 12 Years Old and Over: 1965

[Data pertain to the 1965 summer season only, with the exception of hunting and the three winter activities. The data for these activities are for the period September 1964 through May 1965. Based on a nationwide survey of outdoor recreation interests and participation of persons 12 years old and over, conducted by the Bureau of the Census, consisting of one sample involving approximately 7,200 interviews]

Outdoor activity	Participants		Average number of days per participant [1]	Number of days of participation, total (millions)	Outdoor activity	Participants		Average number of days per participant [1]	Number of days of participation, total (millions)
	Number (millions)	Rank				Number (millions)	Rank

Section 8
Labor Force, Employment, and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the Decennial Census of Population conducted by the Bureau of the Census (see text, p. 1); *Employment and Earnings and Monthly Report on the Labor Force* and *Monthly Labor Review*, issued by the Bureau of Labor Statistics; and *Farm Labor*, issued monthly by the Statistical Reporting Service, Department of Agriculture.

Types of data.—Statistics shown in this section are of two types. One type is obtained by the "population approach" used by the Bureau of the Census in the Census of Population and the Current Population Survey (see below). This approach involves enumeration and interrogation either by interview or by mail to obtain information on employment activity from workers or members of workers' households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period.

The second type of data is obtained by the "establishment approach," represented by the industry surveys of the Bureau of Labor Statistics and the surveys of the Department of Agriculture's Statistical Reporting Service. These data are based on reports from employers, i.e., farms, businesses, or industrial establishments. Such data as wages, hours worked, labor turnover, and industry affiliation of employees can be more accurately obtained from employers' records than from inquiries directed to a worker or a member of his household. Workers appearing on more than one payroll for the same time period are counted more than once in establishment statistics.

The Census of Population provides detailed data for the United States and for each State, city, and other area. It includes personal characteristics (sex, age, race, etc.) of the numbers employed and unemployed, the numbers reported in each occupation and industry, and other items. The labor force survey provides current data published in *Employment and Earnings and Monthly Report on the Labor Force* and in related publications series of the Bureau of Labor Statistics. Data presented include national totals, by sex, color, and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industries and in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and broad occupation groups of those employed, duration of unemployment of the unemployed, and work experience and job-seeking intentions of those not in the labor force.

In addition, the Bureau of Labor Statistics, in *Employment and Earnings and Monthly Report on the Labor Force*, provides detailed monthly data from establishment surveys on nonagricultural employment, unemployment, labor turnover, earnings, and hours worked. These data are shown for broad groupings in the *Monthly Labor Review*, which also presents statistics on wage rates, industrial relations, and output per man-hour. Certain of these data are shown for States and large cities. Historical statistics are shown in the Bureau of Labor Statistics Bulletin No. 1312–4, *Employment and Earnings Statistics for the United States, 1909–66*, and in No. 1370–3, *Employment and Earnings Statistics for States and Areas, 1939–65*.

Current Population Survey.—Monthly data on the labor force are collected and compiled for the Bureau of Labor Statistics as a part of the Current Population Survey, a nationwide sample survey conducted by the Bureau of the Census. (See text, p. 1.) According to current computations, the relative sampling error for summary estimates

such as civilian labor force, total employment, and nonagricultural employment is about 0.3 percent; for agricultural employment and for unemployment, it is roughly 2 to 4 percent. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than 2½ times the percentage. This sampling variability is illustrative of the variability of data based on the Current Population Survey. For further details, see the original releases of the Bureau of the Census and explanatory notes in the Bureau of Labor Statistics *Employment and Earnings and Monthly Report on the Labor Force.*

Statistics obtained from the Current Population Survey may differ from decennial census data because of sampling variability as well as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U.S. Census of Population: 1960*, Vol. I.

Labor force.—Effective in January 1967, the lower limit for official statistics on the labor force was raised from 14 to 16 years of age. Data on employment status, collected in the Current Population Survey, relate to activity or status during the calendar week which includes the 12th of the month. Employed persons comprise all persons who, during that week, did any work for pay or profit, worked 15 hours or more as unpaid workers in a family enterprise, or did not work but had jobs or businesses from which they were temporarily absent. Unemployed persons comprise all persons not working during the survey week who had made specific efforts to find a job within the past 4 weeks and who were available for work, and persons who were on layoff from a job or waiting to report to a new job within 30 days. A detailed discussion of the survey and its methodology appears in *Concepts and Methods Used in Manpower Statistics From the Current Population Survey* (Report No. 313), available on request from the Bureau of Labor Statistics.

Labor force data collected in the 1960 Census relate to the first or second week of April for the majority of the population. "Experienced civilian labor force" refers to employed workers and unemployed workers with previous work experience.

Employment and earnings.—The monthly estimates of nonagricultural employment prepared by the Bureau of Labor Statistics are based on voluntary reports from establishments which, in March 1966, employed 12 million manufacturing workers (63 percent of total manufacturing employment at that time), 9 million workers in nonmanufacturing industries except government (27 percent of the total in nonmanufacturing industries), and 7 million Federal, State, and local government employees (62 percent of the total in government). These reports are supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports under government social insurance programs. The monthly estimates exclude persons not normally on establishment payrolls, such as proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and persons in the Armed Forces. The employment data are for all employees, whether full- or part-time, who received pay for any part of the period reported.

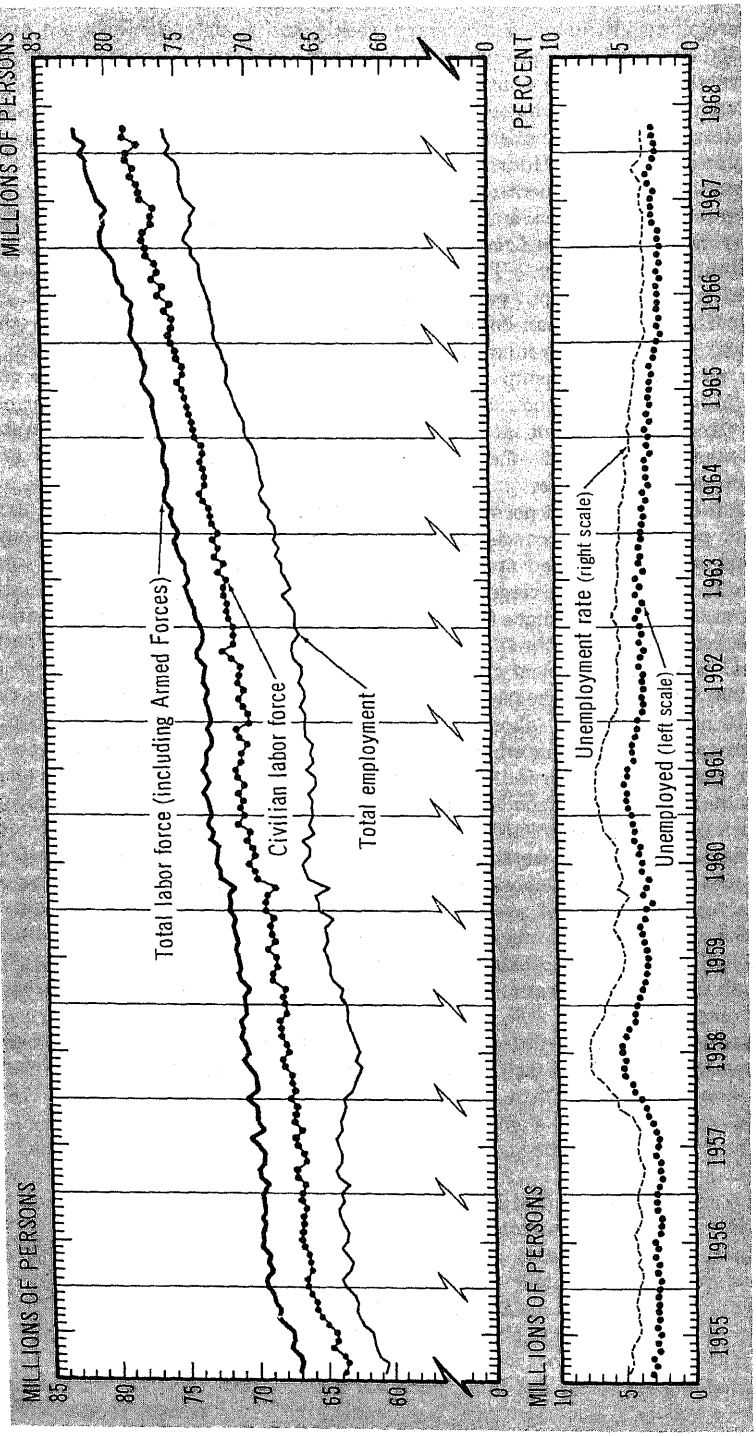
Estimates are available on a continuous basis from 1919 for total nonfarm payroll employment and the 8 major industry divisions. Estimates for other periods are available for several hundred selected industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 250 manufacturing subgroups, and 11 mining industries. Also, estimates for nonsupervisory workers are published for individual wholesale trade, retail trade, public utility, and some finance and service industries; estimates for construction workers are published for the contract construction industries; and 363 series are published for the employment of women.

Average weekly hours and average weekly and hourly earnings are available for over 350 series covering production and related workers in manufacturing and mining, construction workers in contract construction, and nonsupervisory workers in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*.

Output per man-hour.—The Bureau of Labor Statistics prepares and publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production; the second, net output per man-hour, with the relationship between value added (at fixed prices) and man-hours. Both indexes measure the relationship between production and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor do they measure increased efficiency resulting from technological changes or changes in production procedures.

The indexes of output per man-hour for selected industries are based on the physical output per man-hour concept; measurements relating to the total economy and various sectors are based on the net output per man-hour concept. These indexes are influenced by the divergent movements of various industries which make up the total, as well as by changes in the relative importance of these components.



Labor turnover.—Labor turnover rates are published monthly in the *Monthly Labor Review* and in *Employment and Earnings and Monthly Report on the Labor Force* for over 220 industries on the basis of reports from cooperating establishments employing over 10 million workers (about 60 percent of the universe surveyed). Labor turnover data are available on a monthly basis from January 1930 for manufacturing as a whole. Labor turnover rates for individual industries and industry groups are available on a continuous basis only from January 1958.

Work stoppages.—Statistics on strikes are compiled by the Bureau of Labor Statistics and include stoppages, workers involved, and man-days of idleness. Basic data are obtained from the employers and unions involved in strikes. Knowledge of strikes comes from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau prepares annual reports published in the *Monthly Labor Review* and, later, in bulletin form, giving total figures for each month of the year and analyses of strikes by industry, State, city, causes, and other classifications.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XII. TRENDS IN THE LABOR FORCE: 1955 TO 1968

[See table 310]

No. 311. Labor Force—Total, and Participation Rates, by Color, Sex, and Age: 1960, 1965, and Projections, 1970 to 1980

[**In thousands of persons 16 years old and over, except percent.** Annual averages. Rate is based on total population as of July 1 and represents the proportion of each age group in the labor force (employed, unemployed, or in the Armed Forces). Projections based on trends in labor force participation rates between 1947 and 1964]

NA Not available. X Not applicable. [1] Percent of civilian labor force in specified group. [2] *Persons* who work less than 35 hours during survey week for economic reasons, such as slack work, material shortages or repairs, new job started, job terminated, or only part-time work found. Excludes persons with a job but not at work because of vacation, illness, bad weather, or industrial dispute. [3] State programs only; excludes programs for Federal employees and for ex-servicemen; includes unemployment compensation for State and local government employees where covered by State law. [4] Beginning 1965, includes Puerto Rican sugarcane workers' program. [5] Workers reporting completion of at least 1 week of unemployment. [6] Notices filed by workers to indicate they are starting periods of unemployment. Excludes transitional claims. [7] Includes temporary extended benefit exhaustions.

No. 321. Marital Status of Women in the Civilian Labor Force: 1940 to 1967

[**Persons 14 years old and over, except as indicated.** As of March, except as indicated. Prior to 1960, excludes Alaska and Hawaii. Includes institutional population. Figures for 1940 based on complete census revised for comparability with intercensal series. Data for 1944–1967 based on Current Population Survey; see text, p. 1. Beginning 1954, figures not strictly comparable with previous years as a result of introduction into estimating procedure of 1950 Census data through 1961, and of 1960 Census data beginning March 1962. See table 35. See also *Historical Statistics, Colonial Times to 1957*, series D 33–35]

YEAR	FEMALE LABOR FORCE (1,000)					PERCENT DISTRIBUTION OF FEMALE LABOR FORCE			FEMALE LABOR FORCE AS PERCENT OF FEMALE POPULATION, 14 AND OVER				
	Total	Single	Married		Widowed or divorced	Single	Married	Widowed or divorced	Total	Single	Married		Widowed or divorced

No. 327. Experienced Civilian Labor Force, by Sex, Occupation, and Color: 1960

[**Persons 14 years old and over.** For definition, see text, p. 212. "N.e.c." means not elsewhere classified]

SEX AND OCCUPATION	Number (1,000)	Percent nonwhite
Male	45,686	9.6
Prof., tech., and kindred wkrs.	4,543	3.5
Accountants and auditors	396	1.4
Architects	30	2.3
Artists and art teachers	68	3.2
Authors, editors, and reporters	86	1.4
Chemists	77	3.4
Clergymen	197	7.7
College presidents, professors, and instructors (n.e.c.)	140	4.0
Dentists	81	3.5
Designers and draftsmen	262	2.4
Engineers	552	1.7
Aeronautical	52	2.1
Civil	157	2.1
Electrical	184	1.7
Mechanical	160	1.2
Other technical engineers	312	0.8
Lawyers and judges	206	1.3
Musicians and music teachers	86	7.9
Natural scientists (n.e.c.)	59	2.8
Pharmacists	85	2.6
Physicians and surgeons	214	4.0
Social scientists	43	2.4
Social, welfare, and recreation wkrs.[1]	58	11.1
Teachers	420	7.3
Elementary school	144	10.2
Secondary school	276	5.8
Teachers (n.e.c.)	58	5.4
Technicians	142	5.7
Medical and dental	53	10.0
Electrical and electronic	89	3.0
Other prof., technical, and kindred	971	3.5
Farmers and farm managers	2,406	7.4
Managers, officials, and proprietors except farm	4,695	2.0
Officials and inspectors, State and local admin.	136	2.0
Other specified managers and officials	604	2.2
Managers, officials, and proprietors (n.e.c.)—salaried [2]	2,252	1.3
Manufacturing	610	0.5
Wholesale and retail trade	709	1.6
Finance, ins., and real estate	295	1.4
Managers, officials, and proprietors (n.e.c.)—self-employed [2]	1,703	2.8
Construction	228	2.2
Manufacturing	160	1.2
Wholesale trade	129	2.8
Eating and drinking places	146	5.6
Retail trade, except eating and drinking places	681	2.3
Clerical and kindred workers	3,120	6.8
Bookkeepers	153	2.0
Mail carriers	197	11.0
Other clerical and kindred workers	2,770	6.8
Salesworkers	3,055	2.1
Insurance agents, brokers, etc.	333	1.9
Real estate agents and brokers	149	2.1
Other specified salesworkers	276	3.9
Male—Continued **Salesworkers**—Continued		
Salesmen and sales clerks (n.e.c.) [2]	2,297	1.9
Manufacturing	424	0.6
Wholesale trade	483	0.9
Retail trade	1,253	2.8
Craftsmen, foremen, kindred workers	8,973	4.9
Bakers	94	8.6
Blacksmiths, forgemen, and hammermen	33	5.1
Boilermakers	27	3.1
Cabinetmakers and patternmakers	108	2.5
Carpenters	921	5.3
Compositors and typesetters	167	2.7
Cranemen, derrickmen, and hoistmen	131	10.0
Electricians	353	2.2
Foremen (n.e.c.)	1,117	1.9
Manufacturing:		
Durable goods	433	1.1
Nondurable goods (incl. not specified)	263	1.7
Nonmanufacturing, not reported	421	2.8
Linemen, servicemen, telegraph, telephone, and power	273	1.7
Locomotive engineers	58	0.5
Locomotive firemen	39	2.4
Machinists and jobsetters	549	2.8
Masons, tilesetters, and stonecutters	213	12.3
Mechanics and repairmen	922	6.8
Airplane	117	4.6
Automobile	701	7.4
Radio and TV	104	5.1
Other mechanics, repairmen, etc.	1,375	5.6
Millwrights	68	1.9
Molders, metal	51	23.5
Painters (const.), paperhangers, etc.	433	7.7
Plasterers and cement finishers	100	22.8
Plumbers and pipefitters	330	3.8
Printing craftsmen [3]	127	2.6
Shoemakers and repairers, exc. factory	34	13.0
Stationary engineers	274	2.3
Structural metal workers	66	5.0
Tailors and furriers	37	7.4
Tinsmiths, coppersmiths, etc.	144	2.4
Toolmakers, die makers, and setters	185	1.0
Other craftsmen and kindred workers	744	5.6
Operatives and kindred workers	9,234	11.1
Apprentices	85	3.1
Assemblers	376	7.7
Attendants, auto service, and parking	370	10.0
Brakemen and switchmen, railroad	124	3.0
Bus drivers	166	10.8
Checkers, examiners, and insp., mfg.	278	3.6
Filers, grinders, etc., metal	150	8.3
Furnacemen, smeltermen, and pourers	56	23.8
Laundry and dry cleaning operatives	116	38.3
Meat cutters, exc. slaughter, etc.	180	5.0
Mine operatives and laborers (n.e.c.)	329	5.2
Packers and wrappers (n.e.c.)	191	16.5
Painters, exc. construction and maint.	134	11.1
Power station operators	26	1.7
Sailors and deckhands	40	13.5
Sawyers	92	18.3
Spinners and weavers, textile	49	1.2
Stationary firemen	92	13.0
Cab drivers and chauffeurs	166	19.1

See footnotes at end of table.

No. 327. Experienced Civilian Labor Force, by Sex, Occupation, and Color: 1960—Continued

[Persons 14 years old and over]

SEX AND OCCUPATION	Number (1,000)	Percent nonwhite
Male—Continued		
Operatives and kindred workers—Continued		
Truck drivers [4]	2,081	13.4
Welders and flame-cutters	368	6.7
Other specified operatives and workers	256	8.3
Operatives and kindred wkrs. (n.e.c.)	3,507	11.1
Manufacturing	2,934	10.2
Durable goods	1,611	10.4
Nondurable goods	1,317	9.9
Not specified manufacturing indus.	6	20.5
Nonmanufacturing (incl. not reptd.) [2]	573	15.9
Trans., comm., and other pub. util.	138	12.6
Wholesale and retail trade	160	18.4
Private household workers	65	48.4
Service wkrs., exc., priv. hhld	2,745	21.5
Barbers	175	9.6
Charwomen and janitors [5]	754	38.5
Cooks	216	27.4
Elevator operators	52	22.1
Firemen, fire protection	139	2.5
Guards and watchmen	250	5.9
Policemen and sheriffs [6]	277	3.9
Waiters, bartenders, and counter wkrs.	331	14.8
Other service workers	551	24.5
Farm laborers and foremen	1,290	24.0
Unpaid family workers	159	13.8
Except unpaid, and farm foremen	1,131	25.4
Laborers, except farm and mine	3,405	26.1
Fishermen and oystermen	40	12.9
Longshoremen and stevedores	60	38.0
Lumbermen, raftsmen, and woodchoppers	135	30.1
Other specified laborers	520	25.4
Laborers (n.e.c.)	2,649	25.9
Manufacturing	898	24.3
Nonmanufacturing (incl. not reptd.)	1,750	26.7
Occupation not reported	2,156	17.5
Female	22,304	12.8
Prof., tech., kindred workers	2,793	7.2
Accountants and auditors	80	2.5
Actors, dancers, etc. (n.e.c.)	25	4.3
Artists and art teachers	37	2.7
Authors, editors, and reporters	46	1.2
College pres., prof., and inst. (n.e.c.)	39	5.7
Designers and draftsmen	25	3.4
Dietitians and nutritionists	25	16.0
Lawyers and judges	8	2.6
Librarians	72	5.1
Musicians and music teachers	111	3.8
Natural scientists	15	6.2
Nurses, professional	577	6.5
Nurses, student professional	57	3.8
Physicians and surgeons	16	10.1
Social scientists	14	3.5
Social, welfare, and rec. workers [1]	78	12.4
Teachers	1,112	9.1
Elementary school	867	9.5
Secondary school	245	8.0
Teachers (n.e.c.)	94	7.4
Technicians, medical and dental	88	7.8
Therapists and healers (n.e.c.)	20	5.9
Other	254	4.8
Female—Continued		
Farmers and farm managers	120	15.1
Managers, officials, and proprietors, except farm	794	3.9
Specified managers and officials	163	2.6
Managers, officials, and proprietors (n.e.c.)—salaried	341	3.1
Managers, officials, and proprietors (n.e.c.)—self-employed	290	5.6
Clerical and kindred workers	6,497	3.6
Bookkeepers	783	1.4
Cashiers	387	3.7
Office-machine operators	236	5.0
Secretaries	1,452	2.0
Stenographers	264	2.8
Telephone operators	356	2.6
Typists	517	6.7
Other clerical and kindred workers	2,502	4.8
Sales workers	1,746	2.8
Insurance and real estate agents [7]	83	4.4
Other specified sales workers	72	3.2
Salesmen, sales clerks (n.e.c.):		
Retail trade	1,472	2.7
Except retail trade	120	3.2
Craftsmen, foremen, kindred workers	268	7.3
Foremen (n.e.c.)	82	4.1
Other craftsmen and kindred workers	187	8.7
Operatives and kindred workers	3,612	10.6
Assemblers	311	5.6
Checkers, examiners, and insp., mfg.	237	4.4
Dressmakers, etc., exc. factory	120	9.2
Laundry and dry cleaning operatives	296	37.8
Spinners and weavers, textile	69	0.7
Other	1,095	7.3
Operatives and kindred wkrs. (n.e.c.)	1,486	10.2
Manufacturing	1,371	9.5
Nonmanufacturing (incl. not reptd.)	115	19.5
Private household workers	1,760	54.5
Living in	160	26.4
Living out [8]	1,600	57.3
Service wkrs., exc. priv. hhld	3,020	19.5
Attendants, hospital, etc.	301	24.3
Charwomen, janitors [5]	213	26.6
Cooks	381	23.5
Hairdressers and cosmetologists	272	12.7
Housekeepers, etc., exc. priv. hhld.	122	10.5
Practical nurses and midwives	208	17.2
Waiters, bartenders, and counter wkrs.	917	7.6
Other service workers	606	35.9
Farm laborers and foremen	270	33.9
Unpaid family workers	125	12.7
Exc. unpaid family wkrs, farm foremen	144	52.3
Laborers, exc. farm and mine	125	24.0
Occupation not reported	1,298	18.4

[1] Includes group workers. [2] Includes other industries not shown separately. [3] Excludes compositors and typesetters. [4] Includes deliverymen and tractor drivers. [5] Includes porters and sextons. [6] Includes marshals, constables, detectives, and bailiffs. [7] Includes brokers and underwriters. [8] Includes all babysitters, whether living in or living out.

No. 328. Indexes of Output Per Man-Hour, Hourly Compensation, and Unit Labor Costs in the Private Economy: 1947 to 1967

[1957–59=100. Prior to 1960, excludes Alaska and Hawaii. Employee compensation includes wages and salaries, and employer contributions to social security, private insurance and pension funds, compensation for injuries and other minor items of labor income. All person compensation includes, in addition, estimates of wages, salaries, and supplemental benefits for the self-employed. Nonlabor payments are the difference between labor payments and gross product in current dollars]

ITEM	1947	1950	1955	1960	1965	1966	1967
Output per man-hour:							
Total private economy:							
Output per man-hour—all persons	69.0	80.3	93.9	105.0	126.3	130.2	132.0
Output per man-hour—employees	74.5	85.1	95.3	103.8	121.1	123.3	124.5
Private nonfarm sector:							
Output per man-hour—all persons	74.1	84.4	95.7	104.4	123.3	126.4	127.6
Output per man-hour—employees	74.7	85.3	95.4	104.2	121.4	123.6	124.4
Manufacturing:							
Output per man-hour—all persons	72.3	85.0	97.2	105.5	129.5	132.3	133.5
Output per man-hour—employees	72.9	85.4	97.4	105.3	129.0	131.7	132.9
Compensation per man-hour:							
Total private economy:							
Compensation per man-hour—all persons	54.8	64.7	84.5	108.5	133.6	142.8	151.3
Real compensation per man-hour—all persons	70.4	77.2	90.6	105.2	121.6	126.3	130.1

No. 331. Production Workers, Manufacturing Industries—Number, Earnings, and Hours: 1940 to 1968

[Prior to 1960, excludes Alaska and Hawaii. Workers include all full- and part-time employees who worked during, or received pay for, any part of pay period including 12th of month. Net spendable average weekly earnings represent average gross earnings less social security and Federal income taxes. Overtime defined as work in excess of either straight-time workday or workweek and paid for at time and one-half. See *Historical Statistics, Colonial Times to 1957*, series D 626–628, for related but not comparable data]

Year	Workers, annual average (1,000)	Gross average weekly earnings	Net spendable average weekly earnings				Average weekly hours	Average hourly earnings	
			Worker with no dependents		Worker with 3 dependents			Gross	Excluding overtime
			Current dollars	1957–59 dollars	Current dollars	1957–59 dollars

No. 336. Percent Increase in Average Salaries for Selected Occupations in Private Industry: 1961 to 1967

[For 1967, covers establishments employing 50 workers or more in the finance, insurance, and real estate division; 100 workers or more in transportation; communications; electric, gas and sanitary services; wholesale trade; engineering and architectural services; and research, development, and testing laboratories operated on a commercial basis; and 250 workers or more in the manufacturing and retail trade divisions. For 1965, covers establishments employing 250 workers or more in all above industries. Based on sample and subject to sampling variability. Refers to United States excluding Alaska and Hawaii; for years prior to 1965 only standard metropolitan statistical areas as defined by the Bureau of the Budget were included. See text, p. 2]

No. 337. Indexes of Union Wage Rates and Weekly Hours in Selected Trades: 1945 to 1967

[1957–59=100. Prior to 1964, excludes Alaska. As of July 1. Indexes of rates reflect changes in minimum hourly wage scales; indexes of hours reflect changes in the negotiated straight-time weekly hours. Year-to-year changes in union scales are based on comparable quotations for each individual trade weighted by membership for current year. See *Historical Statistics, Colonial Times to 1957*, series D 642–653, for printing on 1948–49 base and other trades on 1947–49 base]

No. 338. Percent of Workers Employed in Establishments Having Formal Provisions for Selected Supplementary Wage Benefits, 221 SMSA's: 1967

[Surveys relate geographically to the 221 standard metropolitan statistical areas in the United States, as established by the Bureau of the Budget through March 1965. Data for a majority of the workers relate to late 1965 and early 1966; for the remainder, to late 1964 and early 1965. Data obtained from sample of establishments which employ 50 workers or more, except in 12 of the largest areas where the minimum size was 100 employees for manufacturing, public utilities, and retail trade; see source. Excludes data for government institutions, and construction and extractive industries. Excludes administrative, executive, and professional employees]

No. 343. Monthly Labor Turnover Rates in Manufacturing Industries: 1955 to 1967

[**Rates per 100 employees.** Prior to 1960, excludes Alaska and Hawaii. Data refer to wage and salary workers. Beginning 1960, transfers between establishments of the same firm are included in total accessions and total separations; therefore, rates for these items are not strictly comparable with prior data. See *Historical Statistics, Colonial Times to 1957*, series D 779–784, for related but not comparable data]

Type and year	Annual average	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Total accessions: [1]													
1955	4.5	3.8	3.7	4.2	4.2	4.5	5.3	4.5	5.8	5.5	5.0	4.0	2.9

No. 344. Workers Commuting—Distance, Transportation, and Travel Time to Work: 1963

[**Workers in millions.** As of October. Covers employed members of households who commute ¼ mile or more to work and who report to a definite work location at the beginning of the work day. Based on a nationwide probability sample of households and subject to sampling variability]

Item	Workers	Percent	Item	Workers	Percent
Total	50	100	**Travel time to work:**		
Distance from home to work:			Under 15 minutes	13	25
¼ to 1 mile	7	15	15 to 35 minutes	26	52
2 miles	6	13	36 minutes and over	9	18
3 miles	5	10	Time not reported	2	5
4 miles	4	7	**Distance from home to public transportation:**		
5 miles	4	7	Less than ¼ mile	18	35
6 to 10 miles	12	24	¼ to ½ mile	7	13
11 miles or more	12	24	Over ½ but less than 1 mile	2	4
Means of transportation:			1 mile or more	2	5
Automobile, with others	13	26	Public transportation not available or not reported	21	43
Automobile, driver alone	28	56			
Public transportation [1]	7	14			
Walking or other	2	4			

[1] Includes buses or streetcars, subways, elevated trains or other rapid transit, and suburban or intercity commuter trains.

No. 345. Injury-Frequency Rates, 1960 to 1965, and Severity Measures, 1964 and 1965, for Selected Industries

[Frequency rate is average number of disabling work injuries, and severity rate is average number of days disability, per 1 million employee-hours worked. Data are on basis of Standard Industrial Classification as revised in 1957. See also *Historical Statistics, Colonial Times to 1957*, series D 785, for injury-frequency rates for manufacturing on old basis]

Industry	Injury-frequency rates				Severity measure			
	1960	1963	1964	1965	Average days of disability per case		Severity rate	
					1964	1965	1964	1965
Manufacturing	12.0	11.9	12.3	12.8	54	54	702	713
Ordnance and accessories	2.4	2.4	2.7	2.8	159	266	614	731

No. 350. Labor Unions—Financial Data, by Type of Union: 1963 and 1966

[**Money figures in millions of dollars.** For fiscal years ending during calendar year. Data from annual financial reports of labor organizations filed with Department of Labor under provisions of Labor-Management Reporting and Disclosure Act of 1959 which covers substantially all labor unions in the United States, except those not engaged in an industry affecting commerce, those composed entirely of public employees, and those which are State or local central bodies. Classification by type is based mainly on union's self-classification in reports filed with Department of Labor]

ITEM	1963			1966		
	National unions	Intermediate bodies	Local unions	National unions	Intermediate bodies	Local unions
Number of unions	208	2,855	[1] 48,000	207	2,729	[1] 48,000
Assets	**854**	**135**	**894**	**995**	**147**	**1,015**

Other investment assets	202	28	103	277	31	117
Other assets	206	29	227	238	28	235
Liabilities	**45**	**17**	**64**	**47**	**21**	**75**
Accounts payable	6	2	14	8	3	17
Loans payable	8	7	13	8	8	16
Mortgages payable	10	1	15	11	1	19
Other liabilities	21	8	23	21	10	23
Receipts [2]	**635**	**164**	**1,146**	**728**	**190**	**1,298**
Dues or per capita tax	351	101	865	409	116	956
Fees, fines, assessments, and work permits	44	14	124	50	16	155
Other receipts	240	49	157	269	58	188
Disbursements [2]	**608**	**158**	**1,114**	**695**	**184**	**1,250**
Per capita tax and assessments	62	17	402	80	20	444
Payments to officers and employees	133	49	301	148	54	351
Office and administrative expenses	24	13	117	36	15	137
Loans made	4	1	6	6	2	6
Payments for benefits	151	6	74	137	6	78
Other disbursements	234	73	215	288	85	234

[1] Financial data adjusted to represent a constant universe of 48,000 local unions because financial detail could not be tabulated for all. Actual number of reporting local unions: 49,260 in 1963 and 49,336 in 1966.
[2] Receipts and disbursements for national, intermediate, and local unions should not be added; such a total would contain duplication due to transfer of certain monies from one type of union to another, with each type reporting the transaction.

No. 352. Work Stoppages: 1940 to 1967

[Prior to 1960, excludes Alaska and Hawaii. Excludes work stoppages involving fewer than 6 workers or lasting less than 1 day. Information obtained directly from companies and unions involved as well as from various Government labor boards, conciliation services, and other neutral parties. See also *Historical Statistics, Colonial Times to 1957*, series D 764-769 and D 774]

Year	Work stoppages beginning in year		Workers involved		Man-days idle during year		
	Number	Average duration (calendar days)	Number [1] (1,000)	Percent of total employed [2]	Number (1,000)	Percent of estimated working time [3]	Per worker involved
1940	2,508	20.9	577	2.3	6,700	0.10	11.6
1945	4,750	9.9	3,470	12.2	38,000	0.47	11.0
1950	4,843	19.2	2,410	6.9	38,800	0.44	16.1
1955	4,320	18.5	2,650	6.2	28,200	0.26	10.7
1960	3,333	23.4	1,320	3.0	19,100	0.17	14.5
1961	3,367	23.7	1,450	3.2	16,300	0.14	11.2
1962	3,614	24.6	1,230	2.7	18,600	0.16	15.0
1963	3,362	23.0	941	2.0	16,100	0.13	17.1
1964	3,655	22.9	1,640	3.4	22,900	0.18	14.0
1965	3,963	25.0	1,550	3.1	23,300	0.18	15.1
1966	4,405	22.2	1,960	3.7	25,400	0.19	12.9
1967	4,595	22.8	2,870	5.3	42,100	0.30	14.7

[1] Workers counted more than once if involved in more than 1 stoppage during year.
[2] Total employed workers for 1940-1950 refers to all workers except those in occupations and professions in which there is little if any union organization or in which stoppages rarely if ever occur. In 1951, concept was changed to coincide with the Bureau of Labor Statistics figures for nonagricultural employment, excluding Government but including workers in all occupational groups. Tests show that percentage of total idleness computed on basis of these new figures usually differs by less than one-tenth of a point, while percentage of workers idle differs by about 0.5 or 0.6 of a point.
[3] Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

Section 9

National Defense and Veterans Affairs

This section presents statistics on national defense and its human and financial costs; military personnel, ships, and aircraft; Selective Service operations; and various federally sponsored programs and benefits for veterans. The principal sources of these data are the annual *Selected Manpower Statistics* and other reports issued by the Office of the Secretary of Defense; annual reports of the Departments of the Army, Navy, and Air Force, the Office of Civil Defense, and the National Guard Bureau; the Selective Service System; *Annual Report of Administrator of Veterans Affairs,* Veterans Administration; and *Budget of the United States Government,* Bureau of the Budget. Data on veterans also appear in reports of the Census of Population, conducted by the Bureau of the Census.

Department of Defense.—Until 1947, the Army, Navy, and Air Force operated under independent jurisdiction, answering only to the Commander-in-Chief, the President of the United States. In 1947, the National Security Act set up the National Military Establishment, which provided for the coordination of the Army, Navy, and Air Force under a civilian Secretary of Defense. The three services remained separately administered, however, and each retained its Department status. Amendments to the Act in 1949 established the Department of Defense.

Selective Service.—The Selective Service System is responsible for the registration, classification, selection, forwarding for examination, and delivery for induction into the Armed Forces of all men required to register under the Military Selective Service Act of 1967. The act requires all men in the United States between the ages of 18 and 26 to register, and makes those between 18½ and 26 years old liable for service in the Armed Forces. It also provides exemptions from service or deferments for reasons of previous service, essential occupation, etc. Deferred persons remain liable for service until they reach 35 years of age. Selective Service is also authorized to determine availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency.

Reserve components.—The reserve components of the Armed Forces are the Army National Guard, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. The purpose of the reserve components is to provide trained personnel available for active duty in the Armed Forces in time of war or national emergency and at such other times as required by the national security. Whenever Congress determines that more personnel are needed for the national security than are in the regular ground, sea, and air forces, units of the reserve components are ordered to active duty and retained as long as needed.

The National Guard has dual Federal-State responsibilities and uses jointly provided equipment, facilities, and budget support. In peace time, the National Guard is State-administered, under command of the State Governors. The State mission is to provide units organized, trained, and equipped to protect life and property and to preserve peace, order, and public safety. The Federal mission is to provide units capable and ready for mobilization in time of war or national emergency to support the Army and Air Forces. The President is also empowered to federalize the National Guard and to use such of the Armed Forces as he considers necessary to quell insurrection in any State against its government, to enforce Federal authority in any State, and to suppress interference with the execution of State and Federal law in a State by insurrection, violence, or conspiracy.

Veterans Administration.—The Veterans Administration administers laws authorizing benefits for eligible former and present members of the Armed Forces, and for the beneficiaries of deceased former members. Veterans benefits available under vari-

ous acts of Congress include: Compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; U.S. Government and National Service Life Insurance; hospitalization; domiciliary care; nursing home care; out-patient medical and dental care for service-connected disability; prosthetic and other appliances; special housing and automobiles or other conveyances for certain disabled veterans; burial allowances; and educational assistance to sons and daughters of deceased or totally disabled veterans.

Estimates of veterans in civil life as published by the Veterans Administration generally cover all persons with war service or service after January 31, 1955 and include those living outside the United States. Similar data from the Bureau of the Census relate to civilian males, 14 years old and over, who live in the United States and who have served in the Armed Forces, whether in war or peacetime.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 356. Federal Budget Outlays for National Defense and Veterans Benefits and Services: 1958 to 1969

[**In millions of dollars, except percent.** For years ending June 30. Includes expenditures of Department of Defense, Veterans Administration, and other agencies for activities *primarily* related to national defense and veterans programs. See *Historical Statistics, Colonial Times to 1957*, series Y 357-358 and Y 360, for related data]

Educational and nonprofit institutions	380	618	688	738	672	756	233	150

X Not applicable. [1] Beginning 1963, includes other defense agencies.
[2] Includes awards since Jan. 1, 1962, for certain common supplies for which procurement responsibility was transferred from the military departments.
[3] Includes Puerto Rico and outlying areas.
[4] Covers firms not dominant in their fields of operation and generally employing fewer than 500 persons; in some cases, firms with less than 750 employees, or with less than 1,000. For certain types of firms, other criteria are used, such as yearly gross sales.
[5] Covers all awards for work to be performed in foreign countries.
[6] 1960 includes interservice purchases; thereafter, covers only purchases from other Federal agencies.

Administratively disqualified	147	1.3	20	1.2	10	8	2	1.5	1.3	2.4

[1] 1950 data are for July through December only.
[2] Examinees who failed minimum requirements on Armed Forces Qualification Test (AFQT) or its equivalent (ECFA) administered to Spanish-speaking examinees in Puerto Rico.
[3] Examinees classified as mental group IV on basis of AFQT but who failed to meet additional aptitude requirements effective in August 1958 and called Army Classification Battery (ACB) tests until mid-September 1961 and Army Qualification Battery (AQB) since then. Also includes examinees in Puerto Rico tested with ECFA who failed the required additional aptitude tests and the English Fluency Battery (EFB) tests. The AQB requirements were raised in May 1963 and lowered in November 1965; April 1966; October 1966; and December 1966.

1967	155	1,325	58	194	6,914	9

[1] Excludes transfers from appropriations to insurance trust funds from which the actual payments are made. Expenditures from VA Revolving Supply Fund also excluded to avoid duplication. Beginning 1956, total differs from supporting detail by the net of overpayments collected and written off as uncollectable under the readjustment benefits appropriation.

[2] Includes direct payments to beneficiaries from insurance appropriations, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Some noncash transactions, e.g., interest credited to dividends left on deposit also included.

[3] Includes education and training allowances under Public Laws 346 and 550, and educational assistance for sons and daughters of deceased or totally disabled veterans under Public Laws 634, 86-785 and 88-361.

[4] Includes subsistence allowances, tuition, supplies, and equipment of veterans training under Public Laws 16 and 894, and vocational rehabilitation allowances for World War I veterans.

[5] Includes unemployment and self employment allowances: statutory burial allowances; automobiles and other conveyances for disabled veterans; homes for paraplegics; payments to participants in yellow fever experiments; military and naval family allowances of World War I veterans; marine and seamen's insurance in World War I; adjusted compensation (World War I bonus); withdrawals of the personal funds of patients held by VA as banker and funds due incompetent beneficiaries; soldiers' and sailors' civil relief; vocational rehabilitation revolving fund, and other miscellaneous expenditures.

[6] Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

[7] Comprises construction and related costs which include expenditures from funds allotted under NRA of 1933, PWA Act of 1938, grants to Republic of Philippines for construction and equipping of a hospital, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

[8] Includes expenses for vocational counseling, travel for certain programs, reporting allowances paid schools for certifying attendance of veteran trainees, private laws for relief, and all administrative salaries and expenses.

– Represents zero.

[1] Excludes $806,516,458 shown in table 393 for expenditures not distributed by State, including $150,449,931 for servicemen's group life insurance.

[2] Includes subsistence allowances, tuition, and supplies and equipment of veterans training under Public Laws 16 and 894.

[3] Educational assistance for sons and daughters of deceased or totally disabled veterans.

[4] Excludes interest paid to U.S. Treasury and miscellaneous expenses; therefore, total differs from that shown in table 393 which includes these items.

No. 396. U.S. Government Life Insurance and National Service Life Insurance Policies in Force, by Plan: 1967

[**Money figures in millions of dollars.** As of June 30. Veterans Administration operates two insurance programs: (*a*) U.S. Government life insurance for veterans of World War I; and (*b*) national service life insurance for veterans of World War II and later. These two programs are separate in all particulars. See also *Historical Statistics, Colonial Times to 1957*, series Y 851–852]

X Not applicable. Z Less than $500,000.

[1] Administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from it for death claims, dividends, and other benefits. The Government bears the cost of administration of this fund in addition to expenses for certain types of losses.

[2] Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between Oct. 8, 1940, and Sept. 2, 1945.

[3] For veterans discharged on or after Apr. 25, 1951, with service-connected disability which would be compensable if 10 percent or more in degree, but who are otherwise insurable.

[4] Veterans entitled to indemnity protection under Servicemen's Indemnity Act of 1951 and separated from active service without a service-connected disability between Apr. 5, 1951 and Jan. 1, 1957, were granted nonparticipating NSLI on 5-year renewable nonconvertible term plan without medical examination. Effective Jan. 1, 1959, this insurance made convertible to any one of 6 permanent plans (ordinary life, 20-payment life, 30-payment life, 20-year endowment, endowment at age 60, and endowment at age 65) or exchangeable for 5-year limited convertible term, which is not renewable after age 50.

[5] In 1964, Congress enacted legislation which provided for a limited reopening of National Service Life Insurance for a period of 1 year beginning May 1, 1965 to veterans who qualify as stipulated in the law. Program is nonparticipating and self-supporting. [6] Modified life, a new form of NSLI, became available May 1, 1965.

FIG. XV. SOCIAL WELFARE EXPENDITURES UNDER SELECTED PUBLIC PROGRAMS: 1940 TO 1967

[Fiscal-year data. See table 401]

Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Dept. of Health, Education, and Welfare, Social Security Administration.

Section 10

Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, disability, and health insurance (OASDHI); public and railroad employee retirement; unemployment and temporary disability insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected data on private pension plans and financial data on corporate pension funds, the American Red Cross, United Fund campaigns, and philanthropic trusts and foundations.

There are several principal sources for these data. *Social Security Bulletin* and *Welfare in Review*, monthly publications of the Department of Health, Education, and Welfare, present current data on many of the programs and summarize annual data in statistical supplements published each year. Current data on employment security activities are published monthly in the Department of Labor's *Unemployment Insurance Review, Employment Service Review*, and their statistical supplements. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *Monthly Review* and *Annual Report.*

Social insurance under the Social Security Act.—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment and, since July 1966, protection against the cost of medical care in old age.

The old-age, survivors, disability, and health insurance (OASDHI) program provides monthly cash benefits to retired or disabled insured workers and their dependents and to the survivors of an insured worker. Within the specifications of the law, retirement benefits are payable to an aged insured worker; to his aged spouse or his spouse at any age caring for his child who is under age 18 or totally disabled; and to his child who is under age 18, totally disabled, or a full-time student, age 18 to 21. An aged worker becomes eligible for full benefits at age 65, although he may elect reduced benefits up to 3 years earlier; his spouse is under the same limitations. Special benefits are also provided the aged 72 and over who do not meet the insured status requirements. Under certain conditions, survivor benefits are payable to some dependents of an insured worker, including his aged or disabled widow or his widow at any age caring for his child who is under age 18 or totally disabled; his child who is under age 18, totally disabled, or a full-time student, age 18 to 21; and aged parents. Disability benefits are payable to an insured worker under age 65 with a prolonged disability that meets the definition in the Act and to his dependents on the same basis as dependents of retired workers. A lump sum benefit is also payable on the death of an insured worker.

Beginning July 1966, medical insurance has been provided under two coordinated plans for nearly all people age 65 and over: A hospital insurance plan which covers hospital and related services and a voluntary supplementary medical insurance plan which covers physicians' services and related medical services.

Retirement, survivors, disability, and hospital insurance benefits are paid for by the contributions of workers, employers, and the self-employed on earnings up to $7,800. Currently workers and their employers each pay 3.8 percent, and the self-employed pay 5.8 percent of covered wages for retirement, survivors, and disability insurance. The special benefits for noninsured persons age 72 and over are financed from general funds. For hospital insurance, workers, employers, and the self-employed each pay 0.6 percent (see table 420). The rates are scheduled to increase gradually. For persons 65 and over currently not insured under social security the hospital benefits will be financed out of Federal general revenues. The voluntary medical insurance

plan is financed by a $4 a month premium paid by persons age 65 and over who choose to enroll in the plan, and by an equal contribution by the Federal Government from general revenues. The money collected is deposited in Federal trust funds.

Both unemployment insurance and the public employment (placement) service are administered through the Bureau of Employment Security of the Department of Labor and each State's employment security agency. Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees, and direct aid in the form of training and related cash allowances to persons being trained under the Manpower Development and Training Act and the Trade Expansion Act.

State unemployment insurance laws pay benefits to unemployed covered workers meeting the qualifications in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 22 to 39 weeks among the States; maximum weekly benefits without dependents' allowances range from $30 to $68. Ten States and the District of Columbia augment their allowances for dependents. Maximum augmented weekly benefits range from $50 to $90. Massachusetts pays $6 for each dependent up to the individual's average weekly wage. In Puerto Rico, benefits are payable for a maximum of 12 weeks; the maximum weekly benefit is $31 for nonagricultural workers and $20 for agricultural workers.

A 3.1-percent Federal tax is levied on the payroll of employers of 4 or more workers in industries covered by the Act and is used to finance the Federal-State program. Employers subject to the Federal law are allowed a credit of 2.7 percent of taxable payrolls for contributions paid to State agencies under State unemployment insurance laws; the Federal Government retains 0.4 percent of the tax out of which the Congress appropriates funds each year to cover employment security administrative costs.

Principal industries excluded from coverage are domestic service, nonprofit organizations, and railroads (see below). A limited number of agricultural and State and local government workers are covered.

The standard rate of contributions payable by employers in all but 8 States is 2.7 percent of the taxable payroll. However, employers with favorable unemployment experience may be assigned a lower rate (except in Puerto Rico); in 1967 the average employer contribution rate under State laws was 1.6 percent of the taxable payroll. In most States, the contribution is based on the first $3,000 paid to a worker during the year. In 22 States, the rate applies to wages ranging from $3,300 to $7,200. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

Social insurance for railroad workers.—The social insurance programs administered by the Railroad Retirement Board cover employees of railroads or companies and organizations affiliated with railroad transportation. The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. Supplemental annuities are also provided for certain retired employees under a 5-year plan established in November 1966. Also, Federal health insurance protection is available to railroad workers on the same basis as workers covered by social security. Funds for the regular railroad retirement and survivor benefit program come primarily from a tax on the first $650 of each month's earnings. The tax, which is payable under the Railroad Retirement Tax Act, is divided equally between employer and employee. The combined rate for 1968 is 17.8 percent, including 1.2 percent for hospital insurance benefits. The supplemental annuity program is financed by a special tax on railroad employers of 2 cents for each hour for which compensation is paid.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness, including maternity. The unemployment insurance program is financed

by contributions from covered employers, paid directly to the Board. The contribution rate at the start of 1968 was 4 percent (applicable to earnings not in excess of $400 a month).

Social insurance for Federal Government employees.—One contributory retirement system for Federal civilian employees and two small noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed services (supplementing OASDHI under which they are covered on a contributory basis) and for special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, deferred retirement, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the U.S. Government and in the District of Columbia government if not subject to another retirement system or excluded by statute or by administrative order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate is 6.5 percent, computed on base pay. Employing agencies pay amounts equal to employee contributions.

Workmen's compensation.—All States have programs providing protection against work-connected injuries and deaths. Federal workmen's compensation laws cover Federal Government employees, private employees in the District of Columbia, and longshoremen and harbor workers. Most State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in almost one-fourth of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

Public assistance.—Six programs, all administered by the States and localities, provide public assistance. Payments to four groups—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The States may also receive grants for medical assistance to persons not able to take care of their medical bills themselves. The Social and Rehabilitation Service handles the Federal aspects of these programs. Aid to other needy persons is furnished mainly through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any Social Security Act program, a State must have a plan approved as meeting the requirements of the Act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

Health and welfare services.—Programs providing health and welfare services are aided through Federal grants to States for maternal and child health services, services for crippled children, maternity and infant care projects, projects for comprehensive health services for children of pre-school and school age, child welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, community health centers, and control of specific diseases). The Children's Bureau, a part of the Social and Rehabilitation Service, administers the first five of these programs; the others are administered by the Rehabilitation Services Administration and the Public Health Service.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 401. Social Welfare Expenditures Under Public Programs: 1935 to 1967

[**In millions of dollars, except percent.** For Federal Government, most States, and some localities, years ending June 30. Represents expenditures under public law and from trust accounts. Includes administrative expenditures and capital outlay; also includes some expenditures and payments outside the United States. See table 402 for program detail. See *Historical Statistics, Colonial Times to 1957*, series H 1-45, for related but not comparable data]

– Represents zero. X Not applicable.

[1] Benefit payments began July 1, 1966; 1965 and 1966 data represent administrative expenses only.

[2] Excludes refunds to those leaving service. Federal data include military retirement.

[3] Includes compensation for Federal employees and ex-servicemen, and cash training allowances.

[4] Programs operate in 4 States only: Calif., N.J., N.Y., and R.I. [5] Benefits by private insurance carriers, State funds, and self-insurers. [6] Work relief, other emergency aid, surplus food for the needy, food stamps, and Job Corps, Neighborhood Youth Corps, and Work-Experience programs under the Economic Opportunity Act.

[7] Excludes domiciliary care in institutions other than mental or tuberculosis, and services included with other programs in social welfare series. [8] Includes cost of medical care for military dependent families.

[9] Includes services for crippled children. [10] Excludes water supply and sanitation services.

[11] Includes burial awards. [12] Excludes servicemen's group life insurance. [13] Federal expenditures for administrative costs (Office of Education) and research not shown separately but included in total.

[14] Construction costs of vocational and adult education programs included under elementary-secondary expenditures.

[15] Includes surplus food for nonprofit institutions. [16] Represents primarily child welfare services under title V of the Social Security Act. [17] Includes community action, migrant workers, and VISTA programs and all administrative expenses of the Office of Economic Opportunity.

[18] Includes administrative expenses of the Secretary of Health, Education, and Welfare; Indian Welfare; certain manpower activities; and other items.

NA Not available. X Not applicable. Z Less than $500,000.

[1] For old-age, survivors, disability, and health insurance (OASDHI), average monthly number; for railroad retirement program, public employee retirement systems, and veterans programs, number on rolls June 30; State unemployment and temporary disability insurance and veterans unemployment allowances, average weekly number; railroad unemployment and temporary disability insurance, average number during 14-day registration period; Area Redevelopment Act and Manpower Development and Training Act programs, number on rolls December 31.

[2] Includes benefits to dependents where applicable.

[3] Excludes payments for medical care.

[4] Program initiated in 1957.

[5] Benefits first payable in 1943. Payable in Calif., N.J., N.Y., and R.I. Includes maternity data for R.I. and private-plan beneficiaries in Calif., and N.Y.; data for beneficiaries in N.J. not available.

[6] Benefits first payable in July 1947.

[7] Number represents families for Federal programs under the Uniformed Services Contingency Option Act of 1953 and for State and local government retirement systems.

[8] Lump sums are for burial of deceased veterans.

[9] Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1958, and payments under the temporary extended unemployment insurance programs. Beginning 1961, includes Puerto Rico.

[10] Under the Servicemen's Readjustment Act of 1944 (terminated July 1949), and the Veterans' Readjustment Assistance Act of 1952 (terminated January 1960).

[11] Area Redevelopment Act of 1961 (November 1961–June 1966) and Manpower Development Training Act of 1962.

[1] Data from Dept. of Commerce, Office of Business Economics. Total earnings include earnings of self-employed; all wages and salaries represent disbursements for civilian and military pay in cash and in kind. [2] Beginning 1953, adjusted for duplication of payrolls covered by both old-age, survivors, disability, and health insurance and State and local retirement systems. [3] Taxable plus estimated nontaxable wages and salaries. [4] Beginning 1950, includes railroad temporary disability insurance. [5] Excludes voluntary contributions and service credits. [6] Effective beginning 1951. [7] Beginning 1955, includes pay of Federal civilian personnel. [8] Payrolls of employers insured with private carriers, State funds, or self-insured, and pay covered by Federal programs in all areas. [9] Beginning 1957, represents percent of all wages and salaries to reflect inclusion of Armed Forces pay.

No. 409. Old-Age, Survivors, Disability, and Health Insurance—Estimated Paid Employment and Coverage Status: 1940 to 1966

[**In millions, except percent.** Prior to 1960, excludes Alaska and Hawaii. Represents civilian noninstitutional population aged 14 and over and Armed Forces. Averages based on calendar week in March, June, September, and December for which Current Population Survey was taken; see text, p. 1. Coverage status generally determined on basis of job with greatest number of hours worked during survey week. Disability benefits added to program in 1956; health insurance provisions in 1965]

COVERAGE STATUS	1940	1950	1955	1960	1963	1964	1965	1966
Paid employment (including self-employment)	46.4	60.0	64.5	67.5	70.2	71.7	73.6	76.0
Eligible for coverage	26.8	38.7	58.7	62.0	64.6	66.0	68.0	70.3
Percent of paid employment	57.7	64.5	91.0	91.9	92.0	92.1	92.4	92.5
Coverage in effect [1]	26.8	38.7	55.0	59.4	61.9	63.3	65.6	68.0
Wage and salary	26.8	38.7	48.3	52.6	55.6	57.1	59.4	62.0
Self-employment	(X)	(X)	6.7	6.8	6.3	6.2	6.2	6.0
Coverage not in effect [2]	(X)	(X)	3.7	2.6	2.7	2.7	2.4	2.3
Not eligible for coverage [3]	19.6	21.3	5.8	5.5	5.7	5.8	5.6	5.7
Agriculture	8.0	5.9	0.9	0.5	0.5	0.5	0.4	0.4
Wage and salary	2.5	1.6	0.3	0.4	0.4	0.4	0.3	0.3
Self-employment	5.5	4.4	0.6	0.1	0.1	0.1	0.1	0.1
Federal, State, and local governments	3.7	5.8	2.1	2.2	2.4	2.4	2.4	2.6
Domestic services	2.3	2.0	0.8	0.9	0.9	1.0	0.9	0.9
Other [4]	5.6	7.5	2.0	1.9	1.9	2.0	1.8	1.8

X Not applicable. [1] Includes railroad employees, all members of the Armed Forces, and workers who were not reported with taxable earnings although they were in covered employment.
[2] Persons whose coverage was authorized under the Social Security Act on an elective basis (for example, employees of State and local governments) and self-employed farmers who were eligible to report, on an optional basis, a percentage of gross earnings rather than net earnings.
[3] Beginning 1951, some persons in these groups became eligible for coverage; others were still not eligible, such as employees of the Federal Government with civil service retirement coverage, or where coverage depends on having minimum earnings (for example, farm and domestic employment and self-employment).
[4] Consists chiefly of nonagricultural self-employment and employees of nonprofit organizations.

X Not applicable. Z Less than $500,000.

[1] Benefit payment actually being made at a specified time with no deductions or with deductions amounting to less than a month's benefit, i.e., the benefits actually being received.

[2] Persons aged 65 and over (and aged 62 to 64, beginning 1956 for women and 1961 for men).

[3] July 1957–October 1960, disabled workers aged 50 to 64; thereafter, disabled workers under age 65.

[4] Beginning 1950, includes wife beneficiaries under age 65 with entitled children in their care and, beginning September 1965, entitled divorced wives.

[5] Beginning 1957, includes disabled persons aged 18 and over whose disability began before age 18 and, beginning September 1965, entitled full-time students aged 18 to 21.

[6] Beginning 1950, includes surviving divorced mothers with entitled children in their care.

[7] Beginning September 1965, includes widows aged 60 to 61 and surviving divorced wives aged 60 and over.

[8] Represents benefits for persons aged 72 and over who are not insured under the regular or transitional provisions of the Social Security Act.

Source: Dept. of Health, Education, and Welfare, Social Security Administration. Periodically in *Social Security Bulletin*.

No. 412. Old-Age, Survivors, Disability, and Health Insurance—Amount of Cash Benefit Payments: 1940 to 1967

[**In millions of dollars.** Payments under 1939 and later amendments, except as noted. Represents total disbursements of benefit checks by the Treasury Department during the years specified. See headnote, table 410, and also *Historical Statistics, Colonial Times to 1957*, series H 123]

– Represents zero. X Not applicable. Z Less than $500,000.
[1] January 1937–June 1940, equals appropriations transferred; July 1940–December 1950, taxes collected; beginning 1951, amounts appropriated. Beginning 1951, includes deposits by States and deductions for refund of estimated amount of employee-tax overpayment. SMI represents voluntary premium payments from and in behalf of insured persons. [2] For 1947–51 and from 1966 on, represents transfers for military wages credits and for cost of hospital benefits for persons not insured for OASDHI or railroad retirement cash benefits. SMI represents Federal Government transfers from appropriations to match aggregate premiums paid.
[3] Includes interest and profit on investments after transfers of interest on administrative expense adjustments among the 4 trust funds. [4] Transfers to trust funds represented by negative figures.
[5] Represents net expenditures for administration subject to subsequent adjustments among all 4 trust funds for allocated cost of each operation. [6] Book value.

X Not applicable. Z Less than 500. [1] Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year.

[2] For pay period ending nearest 15th of month. [3] Wages subject to unemployment insurance tax. Includes State and local government coverage as well as private industry coverage; see text, p. 274.

[4] Number of weeks compensated divided by first payments.

[5] Beginning 1960, based on first payments for 12-month period ended June 30; 1950 based on 12-month period ended Sept. 30. [6] Includes contributions from employers; also employee contributions in States which tax workers. [7] Includes payments under State (not Federal) temporary extended unemployment insurance provisions. [8] Sum of balances in State clearing accounts, benefit-payment accounts, and State accounts in Federal unemployment trust fund. [9] 1966 data. [10] And wages over $100 in any quarter.

[11] Or 4 in 8 weeks and payroll over $6,000 in any quarter. [12] And wages of $150 in any quarter.

TO 1967, AND STATES AND PUERTO RICO, 1967

employees where covered by State law after 1955; excludes unemployment compensation for Federal employees

[1] Net cash and medical benefits paid under standard workmen's compensation policies.
[2] Net cash and medical benefits paid by competitive and exclusive State funds and by Federal workmen's compensation system.
[3] Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workmen's compensation policies that exclude standard medical coverage.
[4] Premiums written by private carriers and State funds and benefits paid by self-insurers increased by 5 to 10 percent to allow for administrative costs. Also includes benefits paid and administrative costs of Federal workmen's compensation system.

No. 432. Workmen's Compensation Payments, by States: 1940 to 1966

[**In thousands of dollars.** Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator* (*Insurance by States . . . of Casualty Lines*) and from published and unpublished reports of State insurance commissions); net disbursements of State funds (from the *Spectator* and from State reports, published and unpublished), estimated for some States; and self-insurance payments, estimated from available State data. Calendar-year data, except fiscal-year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Bases Compensation Act for States in which such payments are made]

No. 433. Public Assistance—Payments and Recipients: 1950 to 1967

[Beginning October 1950, includes Puerto Rico and Virgin Islands, and beginning 1960, Guam. Number of recipients and average monthly payments exclude vendor payments for medical care (i.e., payments made directly to suppliers of medical care) and cases receiving only such payments. Total payments for year include vendor payments for medical care. See also *Historical Statistics, Colonial Times to 1957*, series H 186–198, for related data]

[1] Includes the children and 1 or both parents, or 1 caretaker other than a parent, in families where the needs of such adults were considered in determining the amount of assistance.

[2] Includes 3,700 recipients under 65 in Colorado.

[3] Includes 150 recipients of payments made without Federal participation in California and 540 in Missouri; excludes an estimated 7,700 such recipients in Pennsylvania.

[4] Partly estimated; total not as large as sum of State figures because of adjustment. See footnote 5.

[5] Includes unknown number of cases receiving medical care, hospitalization, or burial only.

No. 442. Boy Scouts and Girl Scouts—Membership and Units: 1940 to 1967

[In thousands. Boy Scout data as of December 31; Girl Scout data as of September 30. Includes Puerto Rico and outlying areas]

ITEM	1940	1950	1955	1960	1965	1966	1967
BOY SCOUTS OF AMERICA							
Total membership	1,449	2,795	4,166	5,165	5,733	5,831	6,058
Boys	1,106	2,072	3,056	3,783	4,231	4,289	4,461
Cub Scouts (8 to 10 years old)	195	828	1,475	1,865	2,064	2,125	2,243
Boy Scouts (11 to 18 years old)	911	1,122	1,398	1,647	1,850	1,853	1,908
Explorers (14 years and over)		122	182	271	317	311	310
Adults	343	724	1,110	1,382	1,502	1,542	1,597
Total units (packs, troops, and posts)	48	79	104	130	145	147	149
GIRL SCOUTS OF THE U.S.A.							
Total membership [1]	632	1,646	2,643	3,419	3,647	3,594	3,652
Girls	509	1,268	2,025	2,646	3,030	2,968	3,023
Brownies (7 and 8 years old)	(2)	(2)	(2)	(2)	1,072	1,079	1,126
Juniors (9 to 11 years old)	(2)	(2)	(2)	(2)	1,416	1,380	1,413
Cadettes (12 to 14 years old)	(2)	(2)	(2)	(2)	443	419	397
Seniors (15 to 17 years old)	(2)	(2)	(2)	(2)	99	91	87
Adults	123	378	618	773	617	626	629
Total units (troops)	27	76	125	164	153	152	153

[1] Includes members abroad. [2] Comparable figures are not available because of a change in program from three age levels to four, effective September 1963.

No. 445. Funds Raised by United Fund Campaigns: 1925 to 1967

[Includes outlying areas and Canada. Includes all campaigns for which data are on file with United Community Funds and Councils of America, Incorporated. Reports of campaign results are based on the total raised in the federated campaign. In cases where an agency such as the Red Cross was included in the joint campaign for only part of its goal, only the amount raised for the agency through the joint campaign is reported]

No. 449. Foundations—Number and Finances, States

[**Money figures in thousands of dollars.** Figures are for latest year reported by foundations, usually 1964 or 1965. A foundation may be defined as a nongovernmental, nonprofit organization having a principal fund of its own, managed by its own trustees or directors, and established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, or which are captive trusts, within colleges, churches, or other organizations, or are very small—defined as having neither assets of $200,000 nor making grants of at least $10,000 in the latest year of record. See table 450]

STATE	Number	Assets	Expenditures	Grants	STATE	Number	Assets	Expenditures	Grants

Section 11

Income, Expenditures, and Wealth

This section presents statistics on two different aspects of income and expenditures: One aspect relates to the national income and product system (a summation reflecting the entire complex of the Nation's economic activities and the interaction of its major components) and the other to the distribution of income to families and individuals. Statistics on national wealth are also included in this section. Figures from the flow-of-funds accounts, a financial view of the economy, appear in section 16.

The primary source for national income and product information is *Survey of Current Business*, published monthly by the Department of Commerce, Office of Business Economics. The complete set of national income and product tables for the 1963–66 period is published in the July 1967 *Survey*. Corresponding information for earlier years, with data starting in 1929 in most cases, is published in *The National Income and Product Accounts of the United States, 1929–1965, Statistical Tables*, a supplement to the *Survey*. Summary estimates for current periods appear in the most recent issue of the *Survey*. The basic reference sources for concepts and methodology are *National Income, 1954 Edition, U.S. Income and Output, 1958*, and the August 1965 issue of the *Survey*.

The major sources of data on income size distributions for families are the Bureau of the Census (Census of Population and Current Population Survey) and the Bureau of Labor Statistics (Survey of Consumer Expenditures). The differences between these series are described in *Family Income Distribution Statistics Published by Federal Agencies*, Statistical Evaluation Report No. 5, Bureau of the Budget, December 1964. Annual data on income distribution by size-class, compiled by the Bureau of the Census, appear in *Current Population Reports—Consumer Income*, Series P–60. A brief description of the Current Population Survey, which is the basis for the data in that report, is given on page 1 of this edition of the *Statistical Abstract*.

Another primary source of information on income distribution is the national Survey of Consumer Finances conducted annually since 1946 by the Survey Research Center of The University of Michigan. From 1946 through 1960, this survey consisted of a sample of approximately 2,700 family units or 3,000 spending units located in 66 sampling areas; from 1961 to 1963, it consisted of approximately 1,850 family units or 2,000 spending units. In 1964 and 1965, it consisted of 1,300–1,600 family units; in 1966, 2,400 families were interviewed. The results of these surveys are published in a monograph series, *Survey of Consumer Finances*.

National income and product.—A general view of the economy is provided by a summary of the Nation's income, expenditure, and saving, shown in the form of a balancing set of accounts for the major economic categories—persons, business, international, and government. (See table 454.) An explanation of the items included in this summation may be found in the 1967 *Historical and Descriptive Supplement to Economic Indicators*, 90th Congress, 1st Session.

Gross national product.—Gross national product (GNP) is the total national output of goods and services valued at market prices. It can be viewed in terms of expenditure categories. These categories comprise purchases of goods and services by consumers and government, gross private domestic investment by business, and net exports of goods and services. The goods and services included in GNP are largely

those bought for final use (excluding illegal transactions) in the market economy. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP measures the output attributable to the factors of production—labor and property—supplied by residents of the United States. GNP differs from "national income," described below, mainly in that GNP includes allowances for depreciation and for indirect taxes (such as sales and excise taxes).

National income.—National income is the aggregate earnings of labor and property which arise in the current production of goods and services by the Nation's economy. It is the sum of compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of direct taxes on those earnings.

Personal income.—Personal income is the current income received by persons from all sources net of personal contributions for social insurance. Not only individuals (including owners of unincorporated enterprises), but nonprofit institutions, private trust funds, and private health and welfare funds are classed as "persons." Personal income includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms.

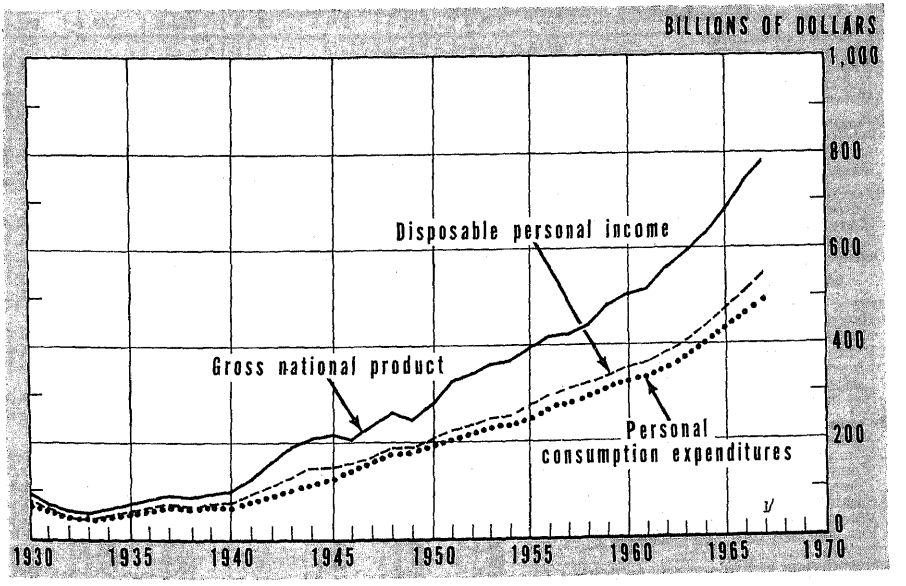
Disposable personal income is the income remaining to persons after deducting personal tax and nontax payments to general government. It is the income of persons available for spending or saving.

Distribution of income by size-class.—Money income statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social-security taxes unless otherwise specified in individual tables. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is "personal income."

Individuals' savings and assets.—The Securities and Exchange Commission issues detailed estimates of individuals' savings showing the increase in financial assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. A continuous series starting with 1946 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 469.) A reconciliation of the annual SEC estimates with the Department of Commerce estimates of personal savings appears in the Office of Business Economics publication, *The National Income and Product Accounts of the United States, 1929–1965*.

The Survey Research Center of The University of Michigan also collects annual data (except for 1961) covering the distribution of liquid assets and occasional data covering positive, negative, and net savings of families, by income groups. In 1962 and 1963, the Survey Research Center collected data on the gross worth and net worth of spending units. The data on net worth are comparable to those for 1953 published in the *Federal Reserve Bulletin* for September 1953. Detailed comparisons and an explanation of methods are published in the monograph *1962 Survey of Consumer Finances*,

chapter 6. The 1964 and 1965 surveys contain material on attitudes toward saving and statistics on liquid assets. These surveys are now conducted on a family rather than a spending unit basis.



National wealth.—The national wealth data shown here (tables 493 to 497) are drawn from a series of articles published in the January 1967 issue of *Finance* magazine. They are, in large part, based on data from R. W. Goldsmith, *A Study of Saving in the United States* and *The National Wealth of the United States in the Post-war Period*. As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth of wealth over long periods. Definitions and analytical details are presented in the source publication.

Current and constant dollars.—Several of the series in this section are expressed both in current dollars and in constant dollars. Data shown in current dollars are unadjusted for comparability over a period of time; that is, the dollars shown are in terms of the level of prices prevailing for each of the years specified. Data shown in constant dollars are computed values which eliminate the effect of price changes. Constant dollars are derived by dividing current-dollar figures by their corresponding price indexes based on a year specified as 100.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XVI. GROSS NATIONAL PRODUCT, DISPOSABLE PERSONAL INCOME, AND PERSONAL CONSUMPTION EXPENDITURES: 1930 TO 1967

[See table 455]

[1] Includes producers' and consumers' cooperatives; nonprofit organizations, such as trade associations furnishing services to business; individually owned property including owner-occupied homes; and miscellaneous forms of business organization.

[2] Estimated patronage refunds and stock dividends paid by farmers' cooperatives.

[3] Includes private households, social and athletic clubs, labor organizations, nonprofit schools and hospitals, religious, charitable, and welfare organizations, and all other nonprofit organizations serving individuals.

Source of tables 462 and 463: Dept. of Commerce, Office of Business Economics; *The National Income and Product Accounts of the United States, 1929–1965*, and *Survey of Current Business*, July 1967 and February 1968.

No. 464. National Income, by Industrial Origin: 1950 to 1967

[**In billions of dollars.** Prior to 1960, excludes Alaska and Hawaii. National income (for definition, see text, p. 310) originating in each industry is the sum of factor costs incurred by the industry in production. Hence, it is net value added to production by industry, measured at factor costs. See also *Historical Statistics, Colonial Times to 1957*, series F 22-33]

Section 12

Prices

This section presents indexes of wholesale, retail, and consumer prices, as well as prices for selected commodities. The primary sources of these data are publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review; Consumer Price Index* (monthly); *Estimated Retail Food Prices by Cities* (monthly); *Retail Prices and Indexes of Fuels and Electricity* (monthly); and *Wholesale Prices and Price Indexes* (monthly). The Statistical Reporting Service of the Department of Agriculture prepares indexes of prices received and prices paid by farmers.

The Bureau of Labor Statistics prepares monthly indexes of wholesale prices; a daily index of spot market prices of 22 commodities; and indexes of consumer prices for urban wage earners and clerical workers for the average of U.S. cities and individually for selected large cities, as well as component indexes for food and other groups.

Wholesale price index.—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of commodities sold in primary markets in the United States.

The index has undergone several revisions (see *Monthly Labor Review*, February 1962). It is now based on approximately 2,300 commodity price series instead of the approximately 1,900 included in the 1947–60 period and the 900 included for the period prior to 1947. Prices used in constructing the index are collected directly from sellers, if possible, and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price, the importer's selling price, or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value including value of sales for export, f.o.b. production point, less interplant transfers, but plus value of imports for consumption, for the producing and processing sector of the economy. For the 1947–54 period these values were based primarily on dollar value of transactions reported in the 1947 industrial censuses. For 1955–57, weights were computed from values of primary market transactions in 1952 and 1953. For 1958–60, the weights were the net selling value of commodities in 1954. For 1961–66, the weights were the net selling value of commodities in 1958. Effective January 1967, the weights are values of net shipments of commodities in 1963.

Consumer price index.—This index as constructed through December 1963 measures the average change in prices of goods and services purchased by city wage-earner and clerical-worker families. Beginning January 1964, the coverage of the index was broadened to include single persons living alone. The weights used in calculating the index are based on studies of actual expenditures by wage earners and clerical workers. The quantities and qualities of the items in the "market basket" remain the same between consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living of these families. The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917–19 provided the weights used for 1913 to 1935. Since then, this index has undergone four major revisions, which involved bringing the "market basket" of goods and services up to date and improving the sample and methodology. From 1935 through 1949, time-to-time changes in retail prices were weighted by 1934–36 average expenditures except for certain temporary wartime adjustments. Weights used for 1950 through 1952 represented estimated 1949–50

spending patterns. Beginning 1953, the weights represented average purchases of urban wage-earner and clerical-worker families in fiscal year 1952. The most recent revision, incorporated in a new series beginning in 1964, introduced expenditure weights relating to 1960–61. The description which follows and the tables in this section refer to the new series.

The list of items currently priced for the index includes approximately 400 goods and services. For some items, several different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable.

Prior to 1953, indexes were based on food prices in 56 cities monthly, and prices of other commodities in 34 cities quarterly or monthly; from 1953 to 1964, they were based on prices of food monthly and other goods and services monthly or quarterly in 46 cities. In 1964 and 1965, prices were obtained in a sample of 50 areas. These include the urban portions of 31 Standard Metropolitan Statistical Areas (SMSA), the more extensive Standard Consolidated Areas for Chicago and New York; and 17 nonmetropolitan urban places. Area definitions are those established for the 1960 Census and do not include any subsequent revisions. Foods, fuels, and a few other items are priced monthly in all areas. Prices of most other goods and services are obtained monthly in the 5 largest areas and every 3 months in other areas. Rents are surveyed bimonthly in the 5 largest areas and every 3 months in other areas. Estimates are made for unpriced areas each month. Price changes for the 50 areas are combined for the United States with weights based on 1960 population of areas represented by each sample area. Area indexes are compiled for 17 of the 50 areas. Beginning 1966, the national index is based on 56 areas and separate indexes are published for 23 areas.

Retail food price index.—Retail food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. The indexes were computed from prices of 54 foods for January 1935 to March 1943, 61 foods for March 1943 to June 1947, 50 foods for June 1947 to January 1950, 60 foods for January 1950 to December 1952, 90 foods from January 1953 to December 1963, and 96 foods beginning January 1964.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 501. Indexes of Spot Primary Market Prices: 1950 to 1968

[1957–59=100. Index computed daily; represents unweighted geometric average of daily price quotations of 22 commodities, traded on organized exchanges. This index is much more sensitive to changes in market conditions than is a monthly or weekly wholesale price index]

DATE	All commodities	Foodstuffs	Raw industrials	Livestock and products	Metals	Textiles and fibers	Fats and oils
Number of commodities	22	9	13	5	5	4	4
1950—June 20	101.9	102.6	101.5	103.1	103.1	121.1	93.0
1955—June 14	104.2	105.8	103.1	93.9	111.7	105.3	104.2
1958—June 17	98.5	109.6	91.4	106.3	87.6	95.6	104.7
1959—June 16	101.7	99.3	103.5	103.5	99.4	100.8	95.1
1960—June 14	98.5	92.6	102.8	91.0	96.6	101.4	86.2
1961—June 13	96.6	90.8	100.9	91.1	99.9	100.0	95.6

No. 502. Wholesale Price Indexes, by Stage of Processing and Durability of Product: 1950 to 1968

[1957–59=100. 1960 and earlier years exclude Alaska and Hawaii. These indexes are a regrouping of the regular Wholesale Price Index series to show price movements at various levels of production and in the various sectors of the economy. The new series comprise three major categories: (*a*) raw or crude materials; (*b*) intermediate materials, components, and supplies for further processing; (*c*) finished goods. Each of these three is further divided in accordance with end-use and durability. See *Historical Statistics, Colonial Times to 1957*, series E 42–64, for indexes on 1947–49 base]

ITEM	1950	1955	1960	1964	1965	1966	1967	1968, April
All commodities	86.8	93.2	100.7	100.5	102.5	105.9	106.1	108.3
STAGE OF PROCESSING								
Crude materials for further processing	104.2	96.7	96.6	94.1	98.9	105.3	99.6	101.4
Foodstuffs and feedstuffs	108.9	96.2	96.2	91.9	98.3	107.2	101.2	102.9
Nonfood materials, except fuel	100.0	99.1	96.8	97.8	99.8	101.9	95.5	97.6
For manufacturing	101.4	100.0	96.2	97.4	99.5	101.8	94.6	96.6
For construction	77.1	90.2	102.7	102.8	103.2	103.9	105.8	109.2
Fuel	86.1	87.1	102.5	102.5	103.3	106.4	110.3	112.3
For manufacturing industries	86.4	87.1	102.4	102.4	103.2	106.3	110.1	112.0
For nonmanufacturing industries	85.8	87.3	102.6	102.8	103.5	106.6	110.7	112.9
Intermediate materials, supplies, and components	83.0	93.0	101.0	100.9	102.2	104.8	105.6	107.9
Materials and components for manufacturing	81.8	92.6	101.0	100.4	102.0	104.0	104.7	107.2
Materials for—								
Food manufacturing	94.7	97.5	99.5	104.0	106.6	111.3	109.2	109.7
Nondurable manufacturing	95.2	97.3	100.8	97.8	98.7	99.5	99.0	100.0

No. 504. Average Prices (Unit Values)—Selected Articles Imported and Exported: 1950 to 1967

[**In dollars per unit.** Includes trade of Puerto Rico with foreign countries. Unit values obtained by dividing annual values of imports or domestic exports by annual quantities. Values of goods imported represent market values in foreign country from which imported. Values of goods exported represent values at port of exportation. Unit values may show actual price movements only roughly for commodities subject to considerable price variations among different grades, methods of packing, etc., and to year-to-year variations in proportions of grades, etc. Unit values of agricultural exports also include effects of CCC sales for exports, at prices well below U.S. market quotations, and of other Government programs]

No. 505. Consumer Price Indexes, by Commodity Groups: 1915 to 1967

[1957-59=100. Prior to 1964, excludes Alaska and Hawaii. Beginning 1964, index structure revised to reflect buying patterns of urban wage earners and clerical workers in the 1960's, including single workers living alone as well as families of two or more persons; indexes for prior years apply only to families of two persons or more. See *Historical Statistics, Colonial Times to 1957*, Series E 113–139, for indexes on 1947–49 base]

[1] Includes personal income and social security taxes, occupational expenses, gifts and contributions, and basic life insurance, not shown separately. [2] Includes items not shown separately.
[3] Shelter, housefurnishings, and household operations. [4] Average contract rent plus cost of heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.
[5] Interest and principal payments plus taxes, insurance on house and contents, and cost of refuse disposal, heating fuel, gas, electricity, water, specified equipment, and home repair and maintenance. [6] Places with 2,500 to 50,000 population in 1960. [7] For area components, see Executive Office of the President, Bureau of the Budget, *Standard Metropolitan Statistical Areas*, 1967.

No. 509. Average Retail Prices of Selected Foods: 1940 to 1968

[**In cents per pound, except as indicated.** Prior to 1964, excludes Alaska and Hawaii, and represents averages of prices reported by retail dealers in cities included in the Retail Food Index. Beginning 1964, data are estimated averages of prices reported by retail dealers. For explanation, see *Monthly Labor Review*, January 1965, pp. 61-66. Number of cities varies according to the number of cities in which an item was priced and the availability of prices within the cities. Excludes sales taxes after 1940. Prices for individual cities combined on basis of population weights. See also *Historical Statistics, Colonial Times to 1957*, series E 161-176]

No. 510. Retail Price Indexes of Food—Selected Areas for Urban Wage Earners and Clerical Workers: 1940 to 1967

[1957–59=100, **except as indicated.** Prior to 1964, excludes Alaska and Hawaii. See text, p. 340, and headnote, table 505. Through 1960, the indexes applied only to families of 2 persons or more in the urbanized area. Beginning 1964, area indexes represent the entire urban portion of the standard metropolitan statistical area, except that the standard consolidated area is used for Chicago and New York. (For definition, see text, p. 2.) See *Historical Statistics, Colonial Times to 1957*, series E 114–120, for indexes on a 1947–49 base]

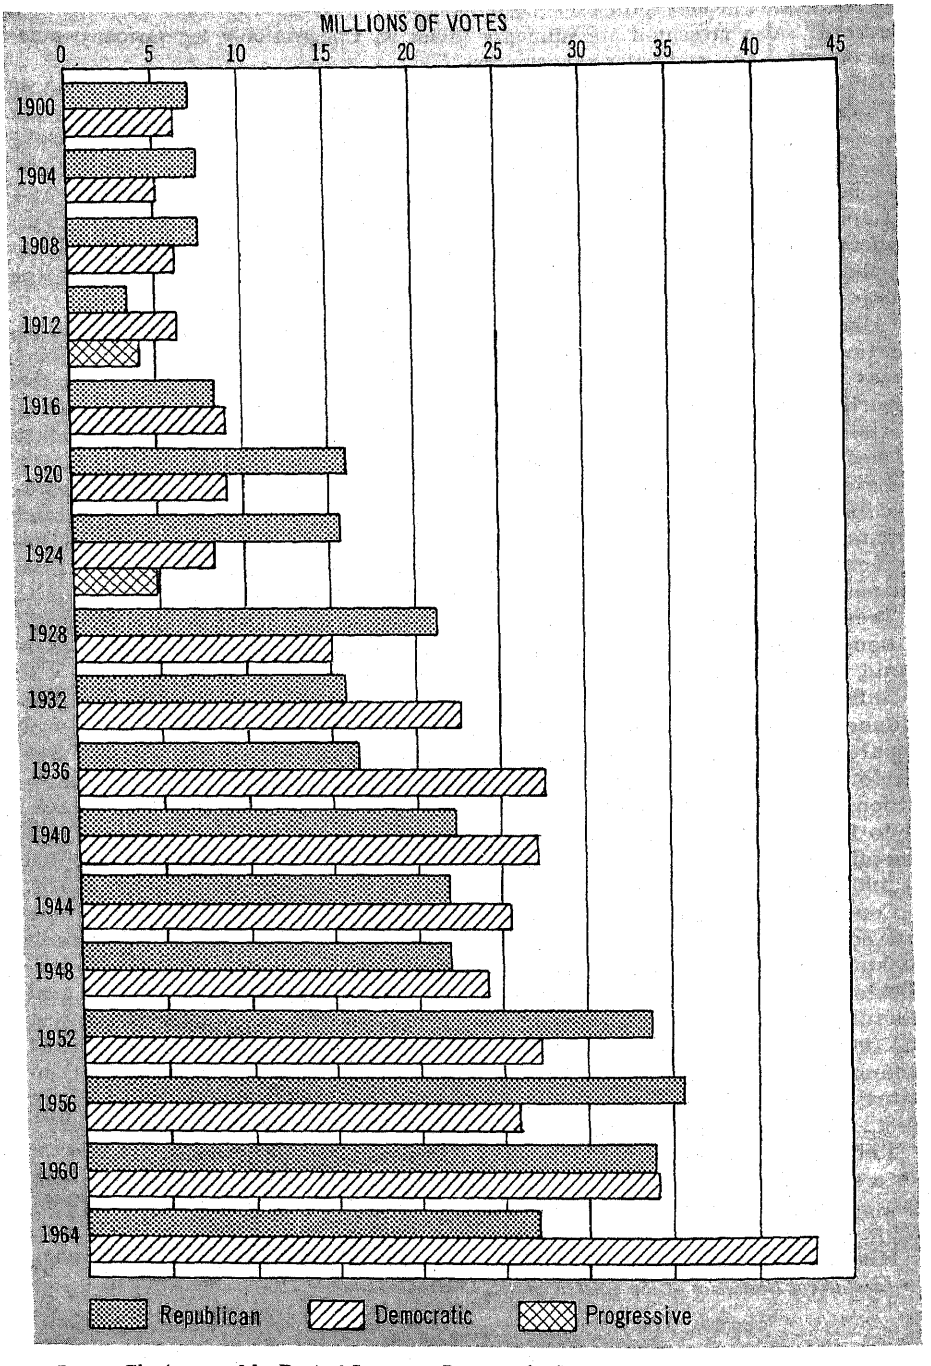
Section 13
Elections

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on Congressional legislation, population of voting age, and voter participation.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Congressional Quarterly Inc., Washington, D.C., publishes a special report, *Complete Returns of the 19— Elections by Congressional District*, in March or April of each odd-numbered year, presenting the results of presidential, congressional, and gubernatorial elections. Details of both Federal and State election statistics appear also in *America Votes*, issued biennially by the Governmental Affairs Institute. Data on Federal elections also appear in the *Congressional Directory*, United States Congress, and in official State documents.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices and, in most States, for State offices. The conduct of elections is regulated by State laws or, in some cities and counties, by local charter. An exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States, and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. The 24th Amendment to the Constitution, adopted in 1964, gave citizens the right to vote in any election for Federal office without npaymet of tax.

Presidential election.—The election of the President is provided for in the Constitution, article II, section 1, through establishment of an electoral college in each State, for each presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States. The 22d Amendment to the Constitution, adopted in 1951, limits presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years. The 23d Amendment, adopted in 1961, grants the District of Columbia electors for President and Vice President.



Congressional election.—The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912, it has remained constant at 435. However, the legislation granting statehood to Alaska and Hawaii allotted 1 Representative to each of those States and, during 1960 to 1962, increased the total of members to 437. The total reverted to 435 after reapportionment following the 1960 Census. The Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers . . . ." The Constitution also requires that each State have at least 1 Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the State legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XX. POPULAR VOTE CAST FOR PRESIDENT, BY MAJOR PARTIES: 1900 TO 1964

– Represents zero.
[1] Includes votes for minor party candidates, independents, unpledged electors, and scattered write-in votes.
[2] Includes District of Columbia.
[3] Mainly Progressive in 1912 and 1924, States Rights and Progressive in 1948.
[4] Socialist Labor only.
[5] Includes 4,831,289 votes cast for La Follette, official candidate for the Progressive Party.
[6] Workers Party.
[7] See also table 523.
[8] Includes minor party votes.
[9] Includes Hawaii figures for July 1959.

Source: 1900–1936, Edgar Eugene Robinson, *The Presidential Vote* and *They Voted for Roosevelt*, Stanford University Press, Stanford, 1934 and 1947, respectively. Later data, Governmental Affairs Institute, Washington, D.C., *America At the Polls* (copyright); U.S. Congress, Clerk of the House, *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. (For some years, figures have been revised by Governmental Affairs Institute.)

No. 517. Popular Vote Cast for Presidential Electors, and Percent of Vote for Majority Party, by States: 1940 to 1956

[**In thousands, except percent.** Excludes Alaska and Hawaii. D=Democratic, R=Republican. Majority party vote refers to the party vote representing either a majority or a plurality for the victorious party. See also table 516; for current figures, see table 518. See also *Historical Statistics, Colonial Times to 1957*, series Y 80-128]

[1] The 11-man Democratic elector slate consisted of 6 "unpledged" electors who subsequently voted for Harry F. Byrd, and 5 "loyalist" electors, who subsequently voted for John F. Kennedy.

[2] Democratic electors were not pledged to Johnson; therefore, vote appears in "Other parties."

[3] Vote cast for States' Rights Democratic Party.

[4] Vote cast for unpledged Democratic electors who subsequently supported Harry F. Byrd for President.

[5] Includes 406,176 Liberal Party votes cast for Democratic candidate for 1960, and 342,432 for 1964.

Source: U.S. Congress, Clerk of the House; *Statistics of the Presidential and Congressional Election of Nov. 8, 1960*, and *Statistics of the Presidential and Congressional Election of Nov. 3, 1964*. (In some cases, figures have been revised by Governmental Affairs Institute, Washington, D.C.)

X Not applicable.
[1] Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 5.
[2] Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 5.
[3] Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192).
[4] Includes one member each assigned to Alaska and Hawaii after apportionment.
[5] Assigned after apportionment. [6] Members seated in 1959.
[7] Included in apportionment act in anticipation of statehood.
[8] Included in the 20 members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 523. Vote Cast for United States Representatives, by Major Political Parties, by States: 1962, 1964, and 1966

[**In thousands, except percent.** In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Alaska, Delaware, Nevada, Vermont, and Wyoming, only 1 Representative is elected from the State at large. In Hawaii, New Mexico, and North Dakota, 2 Representatives are elected from the State at large. In Connecticut (1962), Maryland (1962 and 1964), Ohio (1962 and 1964), and Texas (1962 and 1964), Representatives are elected by district, except 1 who was elected at large; these at-large votes are not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party as such are cast in endorsement of a candidate of another party, votes are counted as for the endorsing party. See also notes below]

– Represents zero. [1] Includes vote cast for minor parties.
[2] Represents vote cast for the candidate receiving the greatest number of votes.
[3] 1962 and 1966 data for 3d and 4th Districts; 1964 for 3d District only. Arkansas law does not require tabulation of votes for unopposed candidates.
[4] A person may be candidate of one or more parties for same office, so party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party. [5] Voters entitled to vote for any 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party.
[6] 2 at-large positions filled separately. Voters have 1 vote for each position. State totals represent largest number of votes cast for either position. Therefore, total shown for each party does not necessarily add to overall State total. [7] Includes votes cast by minor parties for Democratic-endorsed and Republican-endorsed candidates.
[8] Actual figures, Republican 124,453; Democratic 123,959. [9] Vote for the 6th District not available.

No. 528. Composition of State Legislatures, by Political Party Affiliations: 1962, 1964, and 1966

[Dates shown refer to election years in most States, to odd-year elections a year previously in a few; figures reflect immediate results of elections, including holdover members in partial renewal situations. Dem.=Democratic; Rep.=Republican. In general, Lower House refers to body consisting of State Representatives; Upper House, of State Senators. In some States, legislature membership has been changed in recent years; data do not reflect special elections held in 1965 as a result of legislative reapportionment]

No. 534. Participation in National Elections, by Sex, Color, and Region: 1964 and 1966

[**Persons in thousands.** As of November 1. Covers civilian noninstitutional population 18 years old and over in Georgia and Kentucky, 19 and over in Alaska, 20 and over in Hawaii, and 21 and over elsewhere. Includes aliens. Figures are based on a population sample (see text, p 1) and differ from those in tables 531 and 533 based on population estimates and official vote counts. Differences in percentages may also be due to overreporting of voting by persons in the sample. Excludes persons who did not report whether or not they had voted or registered]

Section 14

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, receipts, expenditures, and debt. The personnel data relate to civil staffing and payrolls for the various public functions and agencies, to employee characteristics, and to civil service status.

Principal sources of the fiscal data are *The Budget of the United States Government,* published annually by the Bureau of the Budget, and the Treasury Department's annual *Combined Statement of Receipts, Expenditures, and Balances,* the official report relating to the receipts, appropriations, expenditures, and fund accounts. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields. Figures prior to 1968 in the reports of the Treasury Department are on the basis of budget concepts prevailing at the time.

The day-to-day cash operations of the Federal Government clearing through the accounts of the Treasurer of the United States are reported in the *Daily Statement of the United States Treasury.* The issue for the last day of the month contains information as to the public debt receipts and expenditures for the month, the public debt outstanding, and related data.

Receipts and expenditures of the Government classified as to budget and other transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Expenditures of the United States Government.* Effective January 1968, the figures in this statement are on the basis of the new budget concepts, described below. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities, including financial statements of Government corporations and business-type enterprises. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Statement of United States Currency and Coin.*

Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by regions, districts, and States. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns, respectively. The report on business tax returns presents financial data for sole proprietorships and partnerships along with summary statistics for corporations. Periodic *Statistics of Income* publications present data from fiduciary income tax, estate tax, and gift tax returns, and data on sales of capital assets by individuals, foreign income and tax reported by corporations, depletion and related expenditures, and estate tax wealth.

Federal employment and payroll figures are compiled primarily by the Civil Service Commission and published in its regular *Annual Report* and its *Monthly Report of Federal Employment.* The Commission also publishes annual reports on the pay of Federal employees, entitled *Pay Structure of the Federal Civil Service,* and on occupations of both white-collar and blue-collar Federal workers. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings and Monthly Report on the Labor Force.*

Major budget concepts.—A new unified, comprehensive budget concept was introduced in the fiscal year 1969 budget. At present, historical data are available only back to 1958 for this concept. Continuity with several past concepts is being maintained transitionally. When not otherwise qualified, references to the "Federal budget" relate to the new concept.

289 - 977 O - 68 - 25

The *Federal budget* totals now embrace both the funds which are considered to be federally owned and the trust funds administered by the Government, such as the funds for social security, medicare, and highways. Within the totals, an *expenditure account* and a *loan account* are distinguished to highlight the difference in economic impact between the two types of transactions. The loan account reflects net lending except for certain nonrecourse domestic loans and the foreign loans which are made on noncommercial terms. Receipts of the Government arising from its sovereign or compulsory powers are reported as receipts; all other receipts, i.e., from business-type or market-oriented activities, are now offset against expenditures. Outlays (expenditures and net lending) are reported on a checks-issued basis. The issuance and redemption of certificates of participation in pools of Government loans are now treated as borrowing and repayment of borrowing, respectively, whereas they were treated as expenditure offsets and expenditures, respectively, under the older concepts.

The old "administrative budget" (see table 544) related solely to transactions of the federally owned funds—the general fund, special funds, public enterprise (revolving) funds, and intragovernmental revolving and management funds. Receipts of the latter two fund groups were netted against expenditures; in the general and special fund groups only incidental receipts permitted by law to be merged with appropriations were netted against expenditures. For many years the administrative budget concept was regarded as the principal basis for reporting the financial affairs of the Government, but in recent years the emphasis upon it has declined.

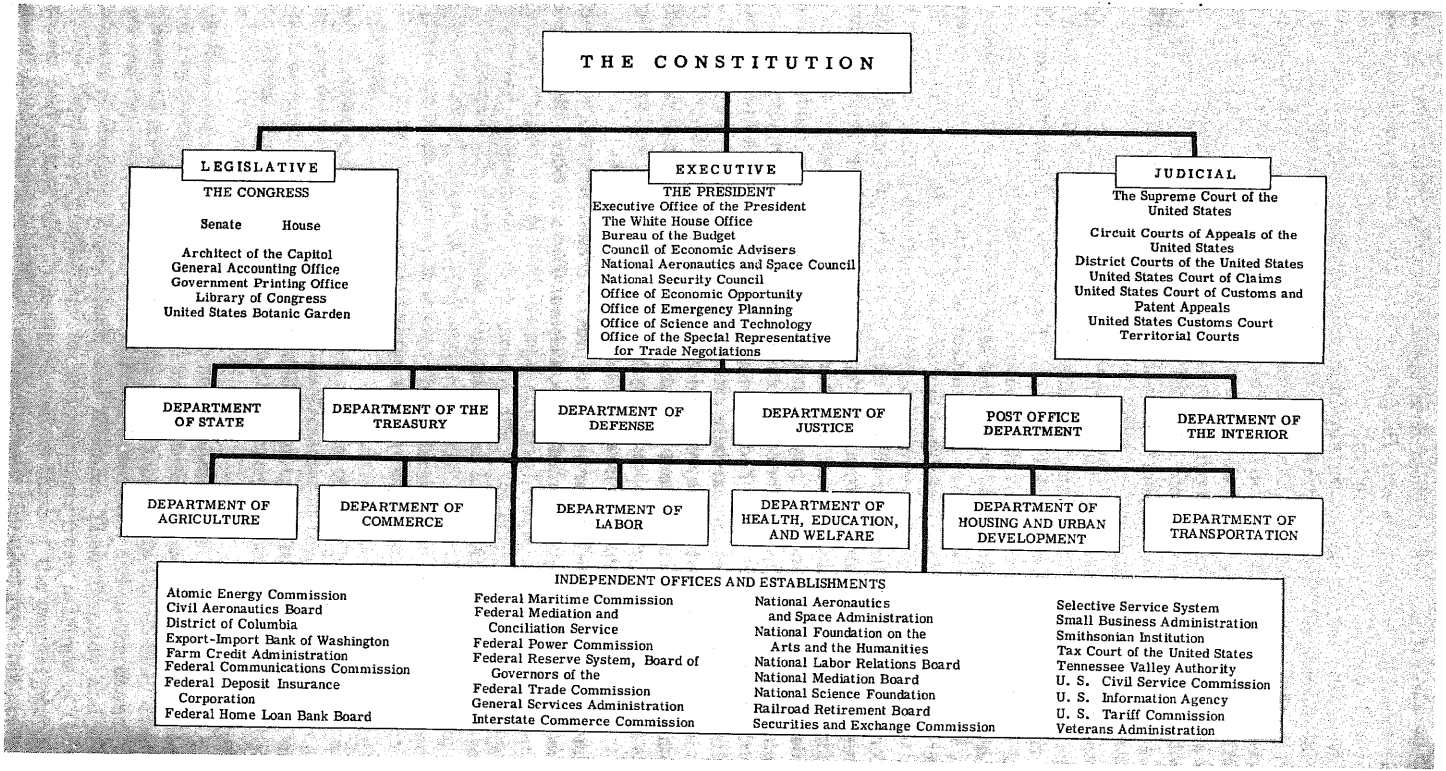
The old "consolidated cash" statement of Federal receipts and payments covered all funds administered by the Government, including the trust funds (see table 545). Unlike the other concepts it also included two privately owned enterprises sponsored by the Government—the Federal land banks and the Federal home loan banks—and the municipal funds of the District of Columbia. In contrast to both the new budget and the old administrative budget, the consolidated cash statement was on the basis of checks paid rather than issued. The netting of receipts in this statement was similar to the practice in the administrative budget. However, debt issues in lieu of checks was acknowledged only when the debt was redeemed.

The Federal sector of the *national income and product accounts* focuses attention upon the Federal transactions entering into national income, the gross national product, and other portions of the national economic accounts (see table 543). The figures include transactions of both Federal and trust funds. However, they include only receipts and expenditures which directly affect the current flow of income and output, and therefore exclude such transactions as loans. Also, the Federal sector account records many taxes as they accrue, instead of as they are collected, and records purchases when delivery is made. The Federal sector account is designed to complement data on private expenditures and incomes contained in the national income accounts.

Treasury receipts and expenditures.—All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States, regardless of their ultimate disposition or availability for expenditure. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

Receipts such as taxes, customs duties, and miscellaneous budget receipts, which are collected by Government agencies, and expenditures represented by checks issued and cash payments made by disbursing officers are reported in the *Monthly Statement of Receipts and Expenditures of the United States Government* and in the annual *Combined Statement of Receipts, Expenditures, and Balances*. These monthly and annual reports include deposits and collections in, and payments from, accounts of Government agencies held outside the Treasury as well as those of the general account of the Treasurer of the United States and are on the basis of budget concepts prevailing through December 1967, and fiscal year 1967, respectively.

Public and private debt.—These data appear annually in the May or July issue of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the private area, those affiliated corporations which operate under a single management. In the noncorporate private area, data are gross throughout with no adjustments for duplications.



Employment and payrolls.—The Civil Service Commission collects employment and payroll data from all departments and agencies of the Federal Government but not from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last work day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month. Employment totals exclude persons serving without compensation, persons on leave without pay for scheduled periods longer than 30 days, persons in leave status after reduction-in-force, and persons hired informally "on the spot" without formal appointment procedures to cope with fire, flood, or other extreme emergencies.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months. Monthly payroll totals fluctuate in amount because the number of work days in each month varies from 20 to 23 days. Holidays may be disregarded since Federal employees are paid for the eight national holidays on which they do not work.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 547. Subsidy Programs of the Federal Government—Net Expenditures: 1955 to 1969

[**In millions of dollars.** For years ending June 30. Minus sign (−) indicates receipts exceeding expenditures. Excludes veterans programs, foreign aid, public assistance to the needy, grants to States to help finance low-priced school lunches, hospital operation and medical care administered by the Public Health Service, and various aids to Indians. Due to changes in classification, not all programs are strictly comparable for all years. Agency indications refer to status in fiscal year 1968]

– Represents zero. NA Not available.
[1] Net income. [2] Income and defense tax before credits for 1940; income tax after credits thereafter.
[3] Joint returns counted twice in computing percent.
[4] Exemptions 1940: Married $2,000, single $800, each dependent $400. Exemptions 1945: Married $1,000, single $500, each dependent $500. Exemptions 1950 and after: Joint return $1,200, single $600, each dependent $600, additional exemption for taxpayer, and his spouse on joint return, of $600 if blind and $600 if age 65 or over.
[5] Salaries after sick pay exclusion. [6] Gross salaries.
[7] Beginning 1955, dividends after exclusions. [8] Royalties included with rents.
[9] For 1950, business profit or loss after net operating loss deduction.
[10] Farm included with business or profession. [11] Estate and trust income and losses included in other sources.
[12] Comprises all income subject to income tax not elsewhere listed.

No. 559. Corporation Income Tax Returns—Summary: 1940 to 1965

[**Number of returns in thousands; money figures in billions of dollars.** Based on returns for periods ending between July 1 of year shown and July 1 of following year, as filed, prior to audit adjustments and other changes made after filing. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations. See source publications for changes in law affecting comparability of historical data. Beginning 1955, based on a probability sample. Corporate data based on income tax returns appear on pp. 473, 477, 479, and 481. See also *Historical Statistics, Colonial Times to 1957*, series Y 280–291]

Item	1940	1945	1950	1955	1960	1963	1964	1965
Returns with and without net income:								
Number of returns	473	421	629	807	1,141	1,323	1,374	1,424

Total receipts [1]	125	239	431	585	724	887	968	1,080
Net income [2]	11	22	44	50	50	61	69	81
Total tax liability [3]	3	11	17	22	22	25	27	30
Income tax [3]	2	4	16	22	22	25	27	30
Excess profits tax	(Z)	7	1	(X)	(X)	(X)	(X)	(X)
Distributions to stockholders other than in own stock	6	6	11	13	17	21	23	25
Returns without net income:								
Number of returns	252	118	203	294	470	515	515	509
Total receipts [1]	23	16	27	57	125	121	119	115
Deficit [2]	2	1	2	3	7	7	7	7
Distributions to stockholders other than in own stock	(Z)	(Z)	(Z)	(Z)	1	1	1	1
Inactive corporations, number of returns	44	33	37	35	47	58	64	66

X Not applicable. Z Less than $500 million. [1] Consists of business receipts, interest less amortizable bond premium, rents, royalties, net gain from capital assets (as defined by law) and other property, dividends, and other taxable income.

[2] Net income (less deficit) is a tax concept and therefore excludes wholly tax-exempt interest; beginning 1963, includes constructive taxable income from related foreign corporations.

[3] For 1940, includes defense tax. Beginning 1963, data are after adjustment for investment credit.

[4] Includes amounts from deficit returns reflecting investment credit payback and insurance company tax law provisions.

[1] Data through 1960 currently undergoing revisions; beginning 1962, data have been revised according to new concepts not completely comparable with data for earlier years.

[2] Net Federal Government debt is the outstanding debt held by the public, as defined in *The Budget of the United States Government*, fiscal year 1969. Gross Federal Government debt equals net Federal Government debt plus intragovernmental holdings. [3] Includes State loans to local units.

[4] Long-term debt, maturity of 1 year or more; short-term, less than 1 year.

[5] Debt of farmers and farm cooperatives to institutional lenders and Federal Government lending agencies, and farm mortgage debt owed to individuals and others; farmers' financial and consumer debt included under "nonfarm" category.

[6] Comprises debt incurred for commercial (nonfarm), financial, and consumer purposes, including debt owed by farmers for financial and consumer purposes. [7] Includes the debts of Federal Reserve Banks, Federal Home Loan Banks, and Federal Land Banks, other than currency and deposits, not shown separately.

Source: Dept. of Commerce, Office of Business Economics; *Survey of Current Business*, July 1960, July 1964, and May 1968. (Based on data from various governmental agencies.)

No. 567. Civilian Employment and Payrolls of the Federal Government, by Branch: 1940 to 1968

[Includes data for employees in outlying areas of the United States and in foreign countries. Monthly employment figures represent number in active-duty status as of last day of month, including intermittent employees who worked during month. Annual employment figures are averages of monthly figures. Payrolls are totals for calendar year or month, as indicated. Excludes employees of Central Intelligence Agency and, beginning August 1959, those of the National Security Agency, for security reasons. Employees of General Accounting Office and Government Printing Office included with legislative branch. See *Historical Statistics, Colonial Times to 1957*, series Y 241–250, for employment for years ending June 30]

Section 15

State and Local Government Finances and Employment

Nationwide statistics relating to State and local governments, their numbers, finances, and employment, are compiled primarily by the Bureau of the Census. Each five years, the Bureau conducts a Census of Governments involving collection of data for all governmental units in the United States. The most recent is the 1967 Census of Governments, conducted in 1968. Most reports for that Census will be issued late in 1968 and in 1969. The Bureau of the Census also conducts annual surveys which cover all the State governments and a sample of local governments. Publications issued annually by the Bureau of the Census include a report on governmental finances which presents figures for the Federal Government, nationwide totals for States and local governments, by type, and State-local data by States. Also issued annually are series of publications on State finances, city finances, and public employment and a descriptive leaflet *Recurrent Publications on Governments.* There are also two series of quarterly reports, one on tax revenue of State and local governments, the other on construction expenditures of State and local governments.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for some of the largest local governments are compiled from their official records and reports by Census Bureau personnel, and classified into uniform categories for statistical reporting.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections of this book (for example, Education, Social Insurance and Welfare Services, and Transportation—Land).

Governmental units.—The governmental structure of the United States includes, in addition to the Federal Government and the States, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of "special districts." As shown by table 578, more than 81,000 local governments were identified by the 1967 Census of Governments. The figures for governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

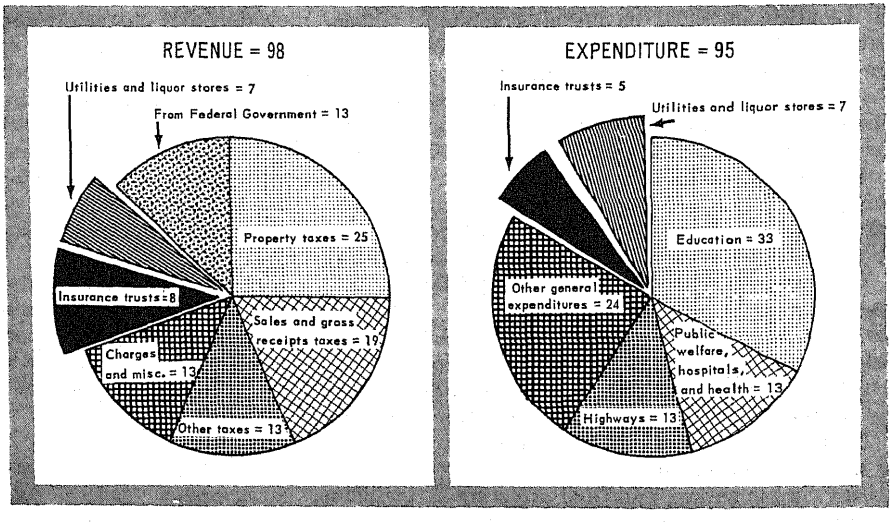
Finances.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending June 30, except for a few States with other closing dates in the calendar year specified. Beginning 1963, local government figures are for fiscal years which closed at various dates during the 12 months ended June 30 of the year specified; figures for 1962 and earlier years are for fiscal years ended December 31.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States, although based upon the

official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

The framework for these statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved and as to expenditure according to the purpose of the spending.

The general government sector comprises all activities other than those classified as utilities, liquor stores, and insurance trusts. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments. Liquor stores are operated by 16 States and by a few local governments. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.



In the basic framework of these statistics, revenue and expenditures reported for these sectors, individually and in total, represent only external transactions and exclude transfers among agencies and funds of the government concerned. Certain internal transactions are shown separately, however, in related tables.

Employment and payrolls.—Public employment and payroll data are primarily from Census Bureau reports based on mail canvassing of State and local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

X Not applicable.

[1] Includes amounts for types of taxes not shown separately. [2] For tobacco products, excludes North Carolina. [3] Combines State and local tax collected in jurisdictions which have imposed supplemental local sales taxes under State legislation. [4] Municipalities may impose local tax at same rate, with full credit given by State against State-imposed tax. [5] 40 percent of wholesale price. [6] State rate in one county is 8 cents; including county imposed rates, total tax collected by State ranges from 8.5 to 11 cents per gallon. [7] 30 percent of retail price. [8] Effective July 1, 1967, local sales tax repealed.

– Represents zero.

[1] 16 percent based on Federal income tax at rates in effect on December 31, 1963.

[2] Tax credit.

[3] Nonresidents; not general.

[4] Plus surtax of 2 percent on intangibles income over $5,000. Tax credit of one-half of 1 percent is applicable to the first $9,000 of net taxable income.

[5] Subject to specified limitations.

[6] Plus $10 filing fee for each return; tax credit of $10 for each personal exemption allowed.

[7] Interest and dividends taxed at 7.38 percent.

[8] Minimum allowance; on earned income, actual amount up to $4,000.

[9] Less fixed deductions ranging from $5 up to $135.

[10] Taxpayers are allowed credit of 5 percent of the tax, as computed.

[11] Income from interest and dividends taxed at 4.25 percent.

[12] Tax imposed on N.Y. resident individuals deriving income from N.J. sources and N.J. residents deriving income from N.Y. sources.

[13] Plus tax credit of $10 for single person and $25 for married persons or heads of households.

[14] Dividends and interest taxed at 6 percent; dividends from corporations with 75 percent of property taxable in State taxed at 4 percent.

[15] Income brackets reported are for individuals, and differ from those for married taxpayers filing joint returns and for heads of households.

X Not applicable.

[1] Federal civilian employment within the U.S. as of June 1966, including employees of the National Guard paid directly from the Federal Treasury. Total accordingly differs from Federal employment reported in table 606 which pertains to October 1966 and includes employees working outside United States.

[2] Subject to sampling variation.

[3] Based on estimated population as of July 1, 1966.

[4] Data for Federal employees in the District of Columbia are for Washington, D.C., Standard Metropolitan Statistical Area, and include substantial numbers of employees working in suburban locations in Maryland and Virginia.

Section 16

Banking, Finance, and Insurance

Flow of funds.—The flow of funds accounts of the Federal Reserve System (see tables 613 to 617) bring together statistics on all of the major forms of financial transactions and financial claims to present an economy-wide view of asset and liability relationships. In flow form, the accounts relate borrowing and lending to one another and to the nonfinancial activities that generate income and production. Each claim outstanding is included simultaneously as an asset of the lender and as a liability of the debtor. The accounts also indicate the balance between asset totals and liability totals over the economy as a whole. The tables included here present asset and liability positions in financial claims as of the end of the year rather than flows that occurred during the year. Quarterly data are available currently in the *Federal Reserve Bulletin*; a detailed discussion of the concepts and organization of the accounts appears in *Flow of Funds Accounts, 1968 Supplement* and in *Flow of Funds Accounts, 1945–1967*, both published by the Board of Governors of the Federal Reserve System.

Banking system.—Banks in this country are organized under the laws of both the States and the Federal Government. State-chartered banks are supervised by officials of the respective States. "National" banks are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected from national banks since 1863; summaries of these reports have been published in the Comptroller's *Annual Report* and, since 1897, in the *Abstract of Reports of National Banks*. The *Annual Report* also presents data on bank income and expenses and on the structure of the national banking system.

The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the U.S. Treasury. It includes national banks and such State banks as voluntarily join the System. Statements of State bank members are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the System. Balance sheet data for member banks are published in detail in the *Summary Report, Assets and Liabilities of Member Banks* twice a year, and, in condensed form, in the *Federal Reserve Bulletin*.

The Federal Deposit Insurance Corporation, established in 1933, insures each depositor up to $15,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund. Beginning with 1947, a detailed balance sheet for all banks in the country has been tabulated twice a year by the Corporation and a monthly series, comprising an abbreviated balance sheet for all banks (partly estimated), has been prepared and published by the Board of Governors of the Federal Reserve System.

Credit agencies.—Government corporations and credit agencies, operating under mandates and powers given them by the Congress, make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Statistics relating to the operations of Government credit agencies are available in reports of the individual agencies; statistics on their assets and liabilities are published quarterly in the *Treasury Bulletin*. In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Federal Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by The

Spectator. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare. Consumer credit data are published currently in the *Federal Reserve Bulletin.*

Currency.—Currency, including coin and paper money, represents about one-fifth of the total media of exchange in the United States, with most payments made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official Statement of United States Currency and Coin) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, except gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States, whether in current active use or held idle. It also includes some currency which, strictly speaking, is not a part of the money supply in the hands of the public, such as cash in vaults of commercial and savings banks, currency lost or destroyed and currency carried abroad by travelers. Historical data on the stock of money and money in circulation appear in the *Annual Report of the Secretary of the Treasury.*

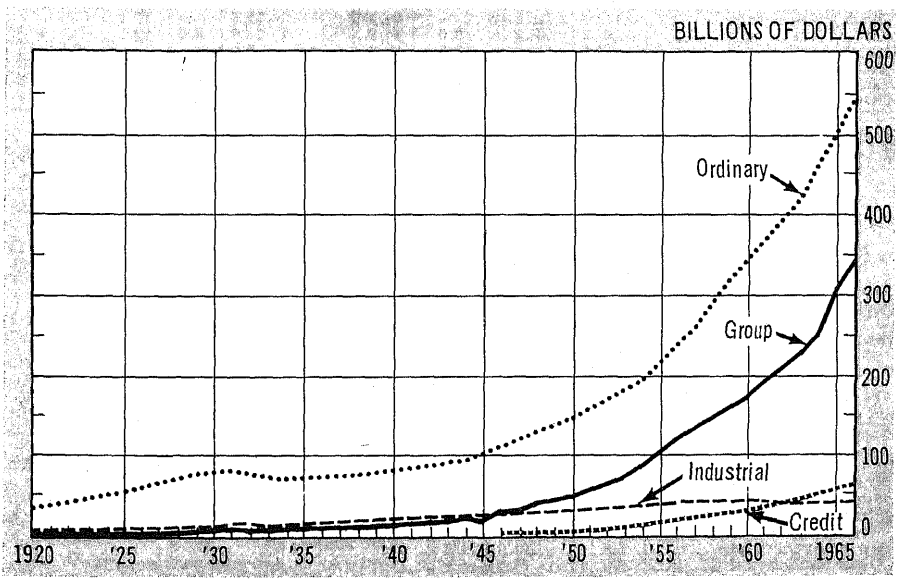
Securities.—A comprehensive series of new issues with detailed information on the intended uses of net and gross proceeds has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over $100,000 and with terms to maturity of more than one year. (See table 663.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin,* and the *Survey of Current Business.*

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin.*

Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, U.S. Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately. Since January 1965, the Commission has been publishing weekly purchases and sales by odd-lot customers of 75 selected New York Stock Exchange stocks.

Insurance.—Insuring companies are classified as either life or property. Companies which underwrite accident and health insurance only are included with life insurance companies; those which underwrite accident and health insurance in addition to one or more property lines are included with property insurance companies. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital and/or surplus.

Insurance is regulated by the various States and the District of Columbia, which collect a great deal of primary information on it. The Federal Government does not collect comprehensive statistics on insurance on a national basis.



There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Individual States collect data on all insurers operating within their respective jurisdictions, and many of the States publish an annual insurance report giving individual company data and aggregates of certain items for the companies operating within the State. Organizations representing certain classes of insurers collect data and publish many studies and reports for these classes. Among them are the *Life Insurance Fact Book,* published annually by the

Institute of Life Insurance, and the *Source Book of Health Insurance Data,* published annually by the Health Insurance Institute. Another source of insurance statistics is represented by the commercial publishers, such as The Spectator and the Alfred M. Best Company. The annual *Spectator Health Insurance Index* contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. The Spectator's annual publication, *Insurance by States of Property, Liability, Surety and Miscellaneous Lines,* gives detailed data for other classes of insurance. *Best's Life Insurance Reports* and *Best's Insurance Reports,* fire and casualty edition, both annual publications, give individual company data for all types of life and fire and casualty insurance companies.

Historical statistics.— Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

Currency and coin [4]	–	–	2,595	3,645	3,972	4,262	4,507

– Represents zero. [1] Includes industrial loans and acceptances, when held. [2] Includes Federal agency obligations. [3] Other than member bank reserves. [4] Beginning 1964, figures are estimates.

No. 620. Federal Reserve System—Member Bank Reserve Requirements: 1966 to 1968

[**Percent of deposits.** See also *Historical Statistics, Colonial Times to 1957*, series X 262–265]

EFFECTIVE DATE OF CHANGE [1]	NET DEMAND DEPOSITS [2]				TIME DEPOSITS [3] (all classes of banks)		
	Reserve city banks		Country banks		Savings deposits	Other time deposits	
	Under $5 million	$5 million and over	Under $5 million	$5 million and over		Under $5 million	$5 million and over
1966—July 14, 21	16½		12		4	4	5
Sept. 8, 15	16½		12		4	4	6
1967—Mar. 2	16½		12		3½	3½	6
Mar. 16	16½		12		3	3	6
1968—Jan. 11, 18	16½	17	12	12½	3	3	6
In effect Feb. 29, 1968	16½	17	12	12½	3	3	6
Present legal requirements:							
Minimum	10		7		3	3	3
Maximum	22		14		10	10	10

[1] When two dates are shown, the first applies to the change at reserve city banks and the second to the change at country banks.

[2] Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.

[3] Effective Jan. 5, 1967, time deposits such as Christmas and vacation club accounts became subject to same requirements as savings deposits.

No. 632. Bank Mergers Resulting in National Banks, by Assets of Acquiring and Acquired Banks: 1960–1966

[Covers period from effective date of Bank Merger Act (May 13, 1960) to December 31, 1966. Includes all forms of acquisition. The bank with the larger total assets in each transaction was considered to be the acquiring bank]

ASSETS OF ACQUIRING BANKS	Acquired banks	Under $10,000,000	$10,000,000 to $24,999,999	$25,000,000 to $49,999,999	$50,000,000 to $99,999,999	$100,000,000 or more
Total	[1] 585	395	124	42	15	9
Under $10,000,000	62	62	–	–	–	–
$10,000,000 to $24,999,999	84	77	7	–	–	–
$25,000,000 to $49,999,999	82	60	18	4	–	–
$50,000,000 to $99,999,999	98	65	22	10	1	–
$100,000,000 or more	259	131	77	28	14	9

– Represents zero. [1] Comprises 563 transactions, 7 involving 3 banks, 6 involving 4 banks, and 1 involving 5 banks.

Source: Treasury Dept., Comptroller of the Currency; unpublished data.

No. 633. Bank Suspensions—Number of Banks and Amount of Deposits: 1930 to 1967

[Prior to 1959, excludes Alaska and Hawaii. Banks closed either permanently or temporarily, on account of financial difficulties, by order of supervisory authorities or by directors of bank. "Member" refers to membership in Federal Reserve System. All national banks are Federal Reserve System members; all Federal Reserve System members are insured. See also *Historical Statistics, Colonial Times to 1957*, series X 165–178]

No. 640. Demand Deposit Accounts—Bank Debits and Deposit Turnover: 1955 to 1968

[Old series covers 344 reporting cities, except as noted. New series covers 233 standard metropolitan statistical areas (SMSA's) as defined May 1, 1967; for definition, see text, p. 2. Both series include only debits to demand deposit accounts of individuals, partnerships, corporations, States, and political subdivisions, and exclude debits to U.S. Government, interbank, and time deposit accounts. See *Historical Statistics, Colonial Times to 1957*, series X 216-225, for related but not comparable data]

1968, February 28	655.2	177.7	186.9	[5] 61.0	–	[5] 124.6	51.8	53.2

– Represents zero.
[1] Effective June 1966, excludes balances accumulated for payment of personal loans (about $1.1 billion).
[2] Excludes demand deposits held by mutual savings banks and savings and loan associations. Data are for last Wednesday of month.
[3] Excludes deposits due to domestic commercial banks and the U.S. Government. Data are for last Wednesday of month except December 31 call data used where available.
[4] Excludes holdings of Government agencies and trust funds, domestic commercial and mutual savings banks, Federal Reserve banks, and, beginning 1960, savings and loan associations.
[5] Reflects conversion of a savings and loan association with share capital of about $175 million to a mutual savings bank.

Source: Executive Office of the President, Council of Economic Advisers. In *Economic Report of the President*, February 1968. Data from Board of Governors of the Federal Reserve System.

No. 643. Money Stock and Money in Circulation: 1950 to 1967

[**In millions of dollars, except as indicated.** As of June 30, except as indicated. From records of Treasurer's Office supplemented by reports from Treasury offices and Federal Reserve banks. Covers all transactions through June 30, including those for which reports were received after that date. Therefore, figures may differ from similar figures prepared on basis of daily Treasury statements]

[1] For 1950, average yield on taxable bonds due or callable after 15 years; thereafter, on those due or callable in 10 years or more. Data from Board of Governors, Federal Reserve System.

[2] 1940 and 1950, estimated yields prevailing on highest grade issues in first quarter of year; thereafter, in February only. Through 1955, from National Bureau of Economic Research; thereafter, Scudder, Stevens and Clark.

[3] More than usually liable to error. [4] February 1967 data. [5] February 1968 data.

[6] Number of issues beginning September 1967; number varies for earlier years.

[7] Yields based on number of stocks and determined from average of median yields as follows: 1940, 15 stocks, 9 yields; 1950 to 1965 (Sept. 8), 14 stocks, 8 yields; beginning Sept. 9, 1965, 10 stocks, 8 yields. Issues converted to a price equivalent to $100 par and a 7 percent annual dividend before averaging.

[8] Yields are obtained by dividing the average per-share dividend by the average per-share price in each group.

[9] Includes also stocks for fire insurance companies and N.Y. banks, and 1 additional public utility, which is a continuous series composed of electric utilities (representing operating electric companies).

No. 654. Margin Requirements on Securities Credit: 1955 to 1968

[**Percent of market value.** Prescribed in accordance with Securities Exchange Act of 1934. Regulations limit amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at time of extension; margin requirement is difference between market value (100 percent) and maximum loan value. See also *Historical Statistics, Colonial Times to 1957*, series X 378-380]

Dividends to stockholders	18	90	115	160	245	237	266	263

NA Not available. [1] For 1955, includes $1,928 million group life insurance for Federal employees; for 1967, $8,500 million.
[2] Includes servicemen's group life insurance of $27 billion.
[3] The rate is the ratio of the number of policies lapsed or surrendered (for cash, extended term, or reduced paid-up insurance), less reinstatements, to the mean number of policies in force.
[4] Beginning 1950, total income and payments to policyholders include data on operations of accident and health departments of life insurance companies; since these data are not shown separately, components do not add to totals.
[5] Beginning 1955, accidental death benefits included with death payments.

No. 672. Major Medical Expense Insurance—Persons Covered: 1955 to 1966

[**In thousands.** As of December 31. For 1955, persons of all ages; thereafter, persons under 65 years of age only. Represents persons covered by insurance companies only. Excludes members of the Blue Cross-Blue Shield, medical-society sponsored, and all other independent plans. Major medical expense insurance provides protection against especially heavy medical bills resulting from "catastrophic" or prolonged illness, and is used as a supplement to basic medical care insurance or as a comprehensive integrated program providing both basic and major medical protection, including charges for private duty nursing, drugs, and medical appliances]

FIG. XXVIII. BUSINESS EXPENDITURES FOR NEW PLANT AND EQUIPMENT: 1945 TO 1968

[See table 710]

[1] Estimated; see footnote 1, table 710.

Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Securities and Exchange Commission and Dept. of Commerce, Office of Business Economics.

Section 17

Business Enterprise

This section relates in general to the place and behavior of the business firm and of business initiative in the American economy. It includes data on the number of businesses; assets and liabilities of corporations; types of business income and expenditures; business sales and inventories; employment and payrolls for businesses subject to the Federal Insurance Contributions Act; and consumer cooperatives.

The principal sources of these data are the *Survey of Current Business* and *The National Income and Product Accounts of the United States, 1929–1965*, published by the Office of Business Economics; *County Business Patterns* issued by the Bureau of the Census; the *Federal Reserve Bulletin* issued by the Board of Governors of the Federal Reserve System; the annual *Statistics of Income* reports of the Internal Revenue Service; and monthly statements issued by Dun & Bradstreet, Inc. Other sources are publications of the Securities and Exchange Commission, the Federal Trade Commission, and the Administrative Office of the United States Courts.

Business firms.—A business firm is generally defined as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. The Internal Revenue Service concept of business firm relates primarily to the legal entity used for tax reporting purposes. Its *Statistics of Income* reports present data separately for proprietorships, partnerships, and corporations. While a few corporations file consolidated tax returns (i.e., one return for the parent firm and all its subsidiaries), most corporate tax returns represent individual corporations, some of which are affiliated through common ownership or control with other corporations filing separate returns.

Employment and payrolls.—*County Business Patterns* provides information, by industry and by county, on employment, taxable payrolls, and number and employment-size of reporting units of private non-farm employers, and of non-profit membership organizations under compulsory coverage and of religious, charitable, educational, and other non-profit organizations covered under the elective provisions of the Federal Insurance Contributions Act (FICA).

The statistics in *County Business Patterns* are tabulated in terms of "reporting units." Each *manufacturing* location of a company is counted as a separate reporting unit. However, data for all *nonmanufacturing* locations of a given firm (i.e., separate legal entity) that are in the same kind of business and same county are consolidated into a single reporting unit, regardless of the number of locations operated.

Industrial and commercial failures.—These data, collected by Dun & Bradstreet, are available by years since 1857 and by months since 1900. The number of failures includes concerns involved in court proceedings or voluntary actions likely to end in loss to creditors; discontinuances with outside obligations paid in full are not included. Data cover manufacturers, wholesalers, retailers, building contractors, and certain types of commercial service, but do not encompass finance, insurance, and real estate companies; railroads and steamship lines; and amusement enterprises. Failures data are published monthly in *Dun's Review*.

Corporate assets and liabilities.—Data on corporate assets and liabilities are from the Internal Revenue Service and the Securities and Exchange Commission. In its annual report, *Statistics of Income, Corporation Income Tax Returns*, the Internal Revenue Service presents balance sheet and income account data for all active United States corporations. In a quarterly release entitled *Net Working Capital of U.S. Corporations*, the Securities and Exchange Commission publishes data on the net working

capital position of all United States corporations, exclusive of banks, savings and loan associations, insurance companies, and investment companies, showing the principal components of current assets and liabilities.

Corporate income, profits, dividends, and taxes.—Several agencies (the Internal Revenue Service, the Office of Business Economics, and the Federal Reserve Board) compile corporate income account data. These data, however, are not comparable because of differing methods of compilation.

The Internal Revenue Service publishes financial data for all business enterprises, both corporate and noncorporate, based on income tax returns filed by proprietorships, partnerships, and corporations. These data appear in *Statistics of Income—U.S. Business Tax Returns* and *Corporation Income Tax Returns.*

The corporate data issued by the Office of Business Economics are a part of its national income and product accounts and are defined as required for purposes of national income estimation. The primary sources of data for the estimates of profits, taxes, dividends, and undistributed profits are the original corporate tax returns submitted to the Internal Revenue Service. Various adjustments of the *Statistics of Income* data are required by the national income treatment, particularly with respect to depletion, capital gain or loss, and intercorporate dividends, and because the original corporate income statements do not represent the final stage of information.

Federal Reserve Board data relating to profits and dividends apply to particular industrial segments only, such as large manufacturing and public utility corporations.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and the manner in which they are financed. Sources of funds are equal to their uses. Certain discrepancies, however, interfere with this equality due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment, and (2) transactions in securities held as permanent investments except public offerings.

Business sales and inventories.—Business sales and inventories as defined by the Office of Business Economics are the sum of data for manufacturing, merchant wholesalers, and retail trade. Sales are estimated aggregate values and inventories are book values at the end of the period. Sales signifies sales or shipments for retail and wholesale trade and billings or shipments for manufacturing. Trade inventories are valued at cost of merchandise on hand, while manufacturers' inventories are valued at approximate current costs or at book values, as reported by the manufacturer. Inventories data for manufacturing (see table 707) are based on data from the *Census of Manufactures* and the *Annual Survey of Manufactures.*

Net change in business inventories.—To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios of current prices to base year prices. No inventory valuation adjustment is shown for farm inventories because change in farm inventories is estimated by the Department of Agriculture from physical quantity data.

Plant and equipment expenditures.—A joint survey by the Securities and Exchange Commission and the Department of Commerce presents quarterly data on actual plant and equipment expenditures, and on anticipated expenditures for the next two or three quarters. In addition, at the beginning of each year, a survey is made of plans of business as regards capital expenditures during that year. The data are based on reports submitted by corporations registered with the Securities and Exchange Commission, by transportation companies under Interstate Commerce Commission jurisdiction, and by a large sample of nonregistered companies, unincorporated as well as corporate, reporting to the Department of Commerce.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 681. Proprietorships, Partnerships, and Corporations—Number, Receipts, Deductions, and Profit: 1939 to 1965

[Number in thousands; money figures in millions of dollars. See headnote, table 682]

Construction	705	58	113	19,308	7,003	55,696	2,685	676	1,258
Manufacturing	186	37	186	7,267	5,596	502,982	774	589	40,248
Transp., comm., elec., gas [6]	297	18	60	5,527	1,315	86,439	826	147	10,699
Wholesale and retail trade [1]	1,854	235	440	97,190	34,373	358,173	6,624	2,216	7,621
Wholesale	265	32	147	17,934	10,879	171,414	1,483	548	3,517
Retail	1,554	202	288	77,760	23,244	183,925	5,019	1,654	4,052
Fin., ins., and real estate	539	249	388	7,022	6,845	61,371	2,151	983	10,844
Services	2,208	169	188	29,789	12,442	36,547	11,008	4,402	1,590

[1] Includes business not allocable to individual industries. [2] Individually owned businesses and farms.
[3] Receipts from sales and services less returns and allowances: (*a*) For proprietorships, excludes capital gains or losses and investment income not associated with the taxpayer's business; (*b*) For partnerships and corporations engaged in finance, insurance, and real estate, excludes a sizable part of income because reporting instructions prescribe separate entries for investment income.
[4] Net profit or net income less loss or deficit: (*a*) Proprietorships: Business receipts less total deductions, including cost of goods sold; (*b*) Partnerships: Total receipts less total deductions, including cost of goods sold; net profit includes investment and other income; (*c*) Corporation returns: Gross income subject to tax, less ordinary and necessary business deductions; includes constructive taxable income from related foreign corporations. [5] Net loss exceeds net profit. [6] Includes sanitary services.

No. 688. Reporting Units, Employment, and Payrolls Under Social Security, By Industry: 1962 and 1966

[Based on reports of employers under the Federal Insurance Contributions Act. A reporting unit is a single establishment except that, for nonmanufacturing industries, a group of similar establishments of an employer located in the same county is also considered one reporting unit. Excludes data for farm workers, domestic workers, self-employed persons, and Government employees. Also excludes railroad employment subject to the Railroad Retirement Act and employment on oceanborne vessels. Employment-size class refers to the number of employees in the mid-March pay period]

INDUSTRY	1962			1966		
	Total reporting units	Employees, mid-March (1,000)	Taxable payrolls, Jan.-Mar. (mil. dol.)	Total reporting units	Employees, mid-March (1,000)	Taxable payrolls, Jan.-Mar. (mil. dol.)

NA Not available.

[1] Dept. of Health, Education, and Welfare, Social Security Admin. "Business" refers to loans outstanding.

[2] Dept. of Agriculture, Rural Electrification Admin. Electric distribution cooperatives currently borrowing from REA, average number of consumers served, and total revenues.

[3] Dept. of Agriculture, Rural Electrification Admin. Cooperatives currently borrowing from REA, number of subscribers at end of year, annual revenues.

[4] Dept. of Health, Education, and Welfare, Social Security Admin. Estimated enrollees and annual income of plans.

[5] Dept. of Housing and Urban Development, Federal Housing Admin. Cooperative projects insured, housing units, and value of mortgages, cumulative from beginning of Section 213 program, in 1950, through Dec. 31.

[6] Dept. of Agriculture, Farmer Cooperative Service. Data cover fiscal years 1964-65 and 1965-66. 1965-66, preliminary. Since many cooperatives do more than one type of business, totals are less than would be obtained by adding number of cooperatives handling individual items or performing individual services. Figures for members refer to estimated number of memberships; some persons hold more than one.

No. 699. Corporate Profits, Taxes, and Dividends: 1940 to 1967

[**In millions of dollars.** Prior to 1960, excludes Alaska and Hawaii. Covers corporations organized for profit. Represents profits accruing to U.S. residents, without deduction of depletion charges and exclusive of capital gains and losses; intercorporate dividends from profits of domestic corporations are eliminated; net receipts of dividends and branch profits from abroad are added]

Item	1940	1950	1955	1960	1965	1966	1967
Profits before taxes [1]	10,013	42,634	48,607	49,712	76,560	83,832	80,200
Less: Income tax liability [1]	2,834	17,770	21,616	23,032	31,358	34,546	33,000
Equals: Profits after taxes [1]	7,179	24,864	26,991	26,680	45,202	49,286	47,200
Less: Cash dividends [2]	4,016	8,838	10,478	13,437	19,792	21,452	22,800
Equals: Undistributed profits	3,163	16,026	16,513	13,243	25,410	27,834	24,400
Capital consumption allowances [3]	3,831	8,800	17,403	24,908	36,467	38,986	41,400
Plus profits after tax	6,994	24,826	33,916	38,151	61,877	66,820	65,800

[1] Refers to Federal and State corporate income and excess profits taxes.
[2] Represents amounts disbursed to U.S. residents, measured after elimination of intercorporate dividends. Excludes capital gain dividends paid by investment companies.
[3] Includes depreciation and accidental damages.

No. 706. Average Annual Change in Stock of Fixed Capital Per Employed Person in the Private Economy: 1947 to 1966

[**In percent.** Refers to constant (1958) dollar private purchases of plant and equipment with an allowance for retirement. Covers all business capital but excludes religious, educational, hospital, and other institutional construction]

ITEM	1947–66	1947–57	1957–66
Total	2.2	2.3	1.8
Plant	1.1	0.6	1.0
Equipment	3.6	4.6	2.6

Source: Dept. of Labor and Dept. of Commerce; unpublished data.

No. 707. Net Change in Business Inventories: 1940 to 1967

[**In millions of dollars.** Prior to 1960, excludes Alaska and Hawaii. Measures change in physical inventories, valued at average prices current during year. Difference between change in business inventories as thus measured and change in book value of inventories constitutes inventory valuation adjustment]

No. 709. Gross Private Domestic Investment and Its Components: 1950 to 1967

[**In billions of dollars.** Prior to 1960, excludes Alaska and Hawaii. Consists of net acquisitions of fixed capital goods by private business and nonprofit institutions including commissions arising in sale and purchase of new and existing fixed assets, principally real estate, and value of change in volume of inventories held by business. Covers all private dwellings, including those acquired by persons for their own occupancy]

CLASS	1950	1955	1960	1962	1963	1964	1965	1966	1967 (prel.)
Gross private domestic investment	54.1	67.4	74.8	83.0	87.1	94.0	107.4	118.0	112.1
Nonfarm nonresidential structures and equipment [1]	24.2	34.8	45.2	48.0	50.0	56.8	66.3	75.0	77.4
Equipment [2]	15.7	21.2	27.7	29.4	31.2	36.3	41.9	47.8	51.4
Structures	8.5	13.6	17.4	18.5	18.8	20.5	24.4	27.2	26.1
Farm nonresidential structures and equipment [3]	3.7	3.3	3.3	3.7	4.3	4.3	4.8	5.2	5.1
Residential structures	19.4	23.3	22.8	25.3	27.0	27.1	27.0	24.4	24.4
Nonfarm	18.6	22.7	22.2	24.8	26.4	26.6	26.4	23.8	23.9
Farm	.8	.6	.6	.6	.6	.6	.5	.5	.6
Net change in business inventories [4]	6.8	6.0	3.6	6.0	5.9	5.8	9.4	13.4	5.2
Nonfarm	6.0	5.5	3.3	5.3	5.1	6.4	8.4	13.7	4.8
Farm	.8	.5	.2	.7	.8	−.6	1.0	−.3	.4

[1] Items for nonfarm producers' structures and equipment are not comparable with those shown in table 710 principally because the latter exclude investment by real estate industry, nonprofit organizations, and professional persons.
[2] Total producers' durable equipment less farmers' purchases of equipment, including business motor vehicles.
[3] Farm nonresidential structures plus farmers' purchases of equipment, including business motor vehicles. See footnote 2. [4] After inventory valuation adjustment.

[1] Annual data represent number of names listed in July issue of *Dun & Bradstreet Reference Book*; monthly data are listings in edition published in specified month. See table 719 for class of industries covered.

[2] Includes concerns discontinuing following assignment, voluntary or involuntary petition in bankruptcy, attachment, execution, foreclosure, etc.; voluntary withdrawals from business with known loss to creditors; also enterprises involved in court action, such as receivership, and, since June 1934, reorganization or arrangement which may or may not lead to discontinuance; and businesses making voluntary compromise with creditors out of court.

[3] Liabilities exclude long-term publicly held obligations; offsetting assets are not taken into account.

[4] Monthly data represent annual rate at which business concerns would fail if number of concerns and failures listed in that month prevailed for entire year. Adjustments have been made for seasonal fluctuations.

Section 18

Communications

This section presents statistics on usage, finances, and operations of the various communications media: Postal service, telephone, telegraph, radio, television, newspapers, and books. Data on the postal service are included in the *Financial Supplement to the Annual Report of the Postmaster General.* Statistics on revenues, volume of mail, and distribution of expenditures by classes of mail and services are presented in the Post Office Department's annual *Cost Ascertainment Report.* Principal sources of wire, radio, and television data are the Federal Communications Commission's *Annual Report,* its annual *Statistics of Communications Common Carriers,* and its annual releases of financial data reported by radio and television stations and networks. Statistics on number and circulation of newspapers and periodicals and on sales of books and pamphlets are issued by the Bureau of the Census in reports of the Census of Manufactures. Annual data on number and circulation of daily and Sunday newspapers appear in Editor and Publisher's *International Yearbook Number.* Monthly data on new books and new editions of books are presented by R. R. Bowker Company in *Publishers' Weekly.*

Postal Service.—"Cost ascertainment" is the term used by the Post Office Department to describe its system for developing data on revenues, expenses, volume, and average hauls fairly attributable to each class of mail handled by the Postal Service (first, second, third, fourth, foreign, penalty, franked, free for the blind, and air mail) and similar data for each of its special services (special delivery, money order, insurance, collect-on-delivery, registry, certified, and postal savings).

Telephone and telegraph systems.—Statistical coverage of wire and radio communications has been concentrated in the Federal Communications Commission since its establishment in 1934. According to the Communications Act of 1934, as amended, the Commission has full jurisdiction only over carriers engaged in interstate or foreign communications service by means of their own facilities or those of another carrier under direct or indirect common control. The Commission requires all except the smallest of these carriers to file annual and monthly reports and requires the companies controlling any but the smallest to file annual reports. Full jurisdiction applies to practically all domestic and overseas telegraph carriers and to the Communications Satellite Corporation but not to a large number of telephone carriers which are engaged in interstate or foreign service only by connection with the facilities of another unaffiliated carrier. However, the gross operating revenues of the telephone carriers reporting annually to the Commission are estimated to cover over 90 percent of the revenues of all telephone carriers in the United States.

Broadcasting.—The number of broadcast stations authorized refers to the number licensed or holding construction permits. Total broadcast revenues are defined as total time sales of all networks and stations, less commissions to agencies and plus incidental revenues, such as sale of talent, program material, etc. Reports filed with the Federal Communications Commission by broadcast stations and networks cover substantially all units operating in the United States and its outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 721. United States Postal Service—Summary: 1900 to 1967

NA Not available.

[1] After allowance for reimbursements, embossed envelope purchases, indemnity claims, and miscellaneous revenue and expenditure offsets. Revenues, expenditures, and deficits through 1950 include payments and receipts in a year applicable to prior years; beginning 1955, expenditures are shown in year in which obligation was incurred, and revenues in year which gave rise to the earnings, whether collected or accrued. During fiscal 1954, the Department began receiving reimbursement for penalty and franked mail, and discontinued payment of subsidies to airlines. Revenues include reimbursements from the Treasury General Fund for statutory public services as follows: 1960, $37.4 million; 1962, $62.7 million. These and other changes affect comparability of figures.

[2] Includes capital expenditures for plant and equipment and cost of materials and supplies, but no provision for depreciation. Also includes costs of certain services rendered to other agencies without reimbursement but excludes costs of certain services rendered to the Post Office Department by other agencies. Beginning 1955, represents obligations incurred. Beginning 1963, represents accrued expense including depreciation on fixed assets, reimbursable work for others, and expenses paid by certain other agencies without reimbursement by the Department.

[3] Based on Bureau of the Census estimated total population as of Jan. 1, including Armed Forces abroad.

[4] Estimates. [5] Service not inaugurated. [6] Includes postal notes issued under act of Congress.

No. 730. Telephone Systems—Summary: 1940 to 1966

[**In millions of dollars, except as indicated.** Includes Puerto Rico and, beginning 1964, Virgin Islands. Excludes intercompany duplications. Covers telephone carriers filing annual reports with FCC. Revisions in the Commission's rules regarding reporting requirements in 1951 and 1965 resulted in a smaller number of reporting carriers; comparability of data relatively unaffected by change in coverage. Gross operating revenues of carriers (excluding intercompany duplications of Bell System) reporting in 1966 represented approximately 90 percent of revenues of all telephone carriers as estimated by U.S. Independent Telephone Association]

- Represents zero. NA Not available.

[1] Households with service are the sum of residence main, apartment house PBX and residence service main telephones, and other residence PBX systems. There tends to be a slight overstatement of the proportion of households with telephone service.

[2] Represents the number of completed local calls and completed and uncompleted toll calls originating from company and service telephones of the Bell companies.

No. 732. Households With Telephones: 1958, 1960, and 1965

[As of March. 1958 excludes Alaska and Hawaii. Includes members of the Armed Forces living off post or with their families on post; excludes all other Armed Forces and inmates of institutions. Base includes households for which telephone availability was not reported: For 1958, 3.0 percent; for 1960 and 1965, 2.4 percent. Based on sample and subject to sampling variability. For definition of terms used, see pp. 2 and 3]

[1] Beginning Sept. 1, 1951, minimum charge for 15 text words or less; prior to that, for 10 text words or less.
[2] Prior to September 1966, telephone company rates for 3 minutes or less, 2-way; thereafter, for each minute or fraction thereof. Since 1959, the telegraph company has offered similar service called "Telex" with a different rate structure. [3] Beginning of service.
[4] Per plain language telegraph-word including address and signature.
[5] For person-to-person, 3-minute call. Station-to-station service available to Tokyo beginning June 18, 1964, and to London beginning Feb. 1, 1967 with 3-minute initial period rates of $7.50 and $9.00, respectively.
