¹ Data represent number of names listed in July issue of *Dun & Bradstreet Reference Book*. See table 740 for class of industries covered.

² Includes concerns discontinuing following assignment, voluntary or involuntary petition in bankruptcy, attachment, execution, foreclosure, etc.; voluntary withdrawals from business with known loss to creditors; also enterprises involved in court action, such as receivership and reorganization or arrangement which may or may not lead to discontinuance; and businesses making voluntary compromise with creditors out of court.

³ Liabilities exclude long-term publicly held obligations; offsetting assets are not taken into account.

Section 18

Communications

This section presents statistics on usage, finances, and operations of the various communications media: Postal service, telephone, telegraph, radio, television, newspapers, and books. Data on the postal service are included in the *Annual Report of the Postmaster General*. Statistics on revenues, volume of mail, and distribution of expenditures are presented in the Post Office Department's annual *Revenue and Cost Analysis*. Principal sources of wire, radio, and television data are the Federal Communications Commission's *Annual Report*, its annual *Statistics of Communications Common Carriers*, and its annual releases of financial data reported by radio and television stations and networks. Statistics on number and circulation of newspapers and periodicals and on sales of books and pamphlets are issued by the Bureau of the Census in reports of the Census of Manufactures. Annual data on number and circulation of daily and Sunday newspapers appear in *International Yearbook Number*, issued by Editor and Publisher, New York. Monthly data on new books and new editions of books are presented by R. R. Bowker Company, New York, in *Publishers' Weekly*.

Postal service.—"Revenue and cost analysis" is the term used by the Post Office Department to describe its system of cost ascertainment. This system utilizes random sampling for observation of the time required to handle various classes of mail and services. The sample results are applied to accounting records to estimate cost by class of service. Incremental cost estimates are also obtained and are used as the basis for postal rate recommendations.

Telephone and telegraph systems.—Statistical coverage of wire and radio communications has been concentrated in the Federal Communications Commission since its establishment in 1934. According to the Communications Act of 1934, as amended, the Commission has jurisdiction over carriers engaged in interstate or foreign communications service by means of wire or radio. The Commission requires all except the smallest of these carriers to file annual and monthly reports and requires the companies controlling any but the smallest to file annual reports. Full jurisdiction applies to practically all domestic and overseas telegraph carriers and to the Communications Satellite Corporation but not to a large number of telephone carriers which are engaged in interstate or foreign service only by connection with the facilities of another unaffiliated carrier. However, the gross operating revenues of the telephone carriers reporting annually to the Commission are estimated to cover over 90 percent of the revenues of all telephone carriers in the United States.

Broadcasting.—The number of broadcast stations authorized refers to the number licensed or holding construction permits. Total broadcast revenues are defined as total time sales of all networks and stations, less commissions to agencies and plus incidental revenues, such as sale of talent, program material, etc. Reports filed with the Federal Communications Commission by broadcast stations and networks cover substantially all units operating in the United States and its outlying areas.

Nonbroadcast radio.—Most of the nonbroadcast radio services are grouped together in what is known as the safety and special radio services, which constitute the greatest number of radio stations licensed by the Federal Communications Commission (see table 757). Utilization of these services by individuals, industry, commerce, and State and local government covers broad fields of operations in connection with protection of life and property, industrial and agricultural production, transportation, disaster, and civil defense.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

NA Not available.

¹ After allowance for reimbursements, embossed envelope purchases, indemnity claims, and miscellaneous revenue and expenditure offsets. Revenues, expenditures, and deficits through 1950 include payments and receipts in a year applicable to prior years; beginning 1955, expenditures are shown in year in which obligation was incurred, and revenues in year which gave rise to the earnings, whether collected or accrued. During fiscal 1954, the Department began receiving reimbursement for penalty and franked mail, and discontinued payment of subsidies to airlines. Revenues for 1960 include \$37.4 million reimbursement from the Treasury General Fund for statutory public services. These and other changes affect comparability of figures.

² Includes capital expenditures for plant and equipment and cost of materials and supplies, but no provision for depreciation. Also includes costs of certain services rendered to other agencies without reimbursement but excludes costs of certain services rendered to the Post Office Department by other agencies. Beginning 1955, represents obligations incurred. Beginning 1964, represents accrued expense including depreciation on fixed assets, reimbursable work for others, and expenses paid by certain other agencies without reimbursement by the Department.

³ Based on Bureau of the Census estimated total population as of Jan. 1, including Armed Forces abroad.

⁴ Estimates. ⁵ Service not inaugurated. ⁶ Includes postal notes issued under act of Congress.

² Costs which, by analysis, can be demonstrated to vary in response to changes in volume of a particular class or category of service or, even though fixed, to result from providing one specific class or category of service.

³ Includes other direct and specific fixed costs not shown separately.

⁴ May be any mailable matter not exceeding 70 lb.; all matter wholly or partly in writing or typewritten must be sent 1st-class. Usually includes regular and airmail letters and postal and post cards; business reply mail; parcels sealed against inspection weighing 13 oz. or less; and air parcels and all priority parcels weighing over 13 oz.

⁵ Airmail, special delivery, and any other mail having priority over regular service mail.

⁶ Publications meeting specified issuance requirements. Covers in-county publications; out-of-county publications including ordinary commercial, nonprofit, and classroom publications; and those designated as science of agriculture; and controlled circulation publications. Includes transient mail, not shown separately.

⁷ Regularly issued trade magazines and certain "shoppers" of at least 24 pp. and 25 percent nonadvertising, circulated free. ⁸ Bulk rate circulars and books, nonprofit bulk, and miscellaneous advertising and small pieces, all weighing less than 16 oz.

⁹ Parcel post, catalogs, books, records, and all other mailable matter not included in 1st, 2d, or 3d class.

¹⁰ Includes free mail for the blind and handicapped, nonpostal services for other agencies, and unassignable revenues.

- Represents zero. NA Not available.

¹ Includes 457,400 service telephones (non-company telephones for which switching service is provided).² Households with service are sum of residence main, apartment house private branch exchange and residence service main telephones, and other residence private branch exchange systems. There tends to be a slight overstatement of the proportion of households with telephone service.³ Represents the number of completed local calls and completed and uncompleted toll calls originating from company and service telephones of the Bell companies. Partially estimated.Source: Federal Communications Commission; annual report, *Statistics of Communications Common Carriers*, and unpublished data. Data from American Telephone and Telegraph Company.

No. 754. INDEPENDENT TELEPHONE COMPANIES—SUMMARY: 1940 TO 1968

[Money figures in millions of dollars. As of December 31 or calendar year, as applicable. Includes Puerto Rico. Covers only those companies submitting operating information to the United States Independent Telephone Association. Companies reporting in 1968 represented 92 percent of the independent telephones in service. See also *Historical Statistics, Colonial Times to 1957*, series R 28-42]

NA Not available. S Does not meet publication standards.

X Not applicable. Z Less than \$500,000.

¹ Includes paid, free bulk, etc. "Issue" defined as the sum of all editions published on a given day. Figures are totals of average circulation per issue.

² Includes foreign language newspapers. ³ Includes amounts not specified by kind.

⁴ No Sunday editions. ⁵ Establishments with less than 10 employees were not required to file reports specifying source of receipts. Thus a substantial portion of "Not specified" is included in "Weekly and other."

⁶ Includes those issued on Sunday only. ⁷ Not shown because not reported by many small newspapers.

⁸ Includes newspapers issued more than one but less than 4 times a week, and those issued less frequently than once a week. ⁹ Partially estimated.

Books and pamphlets, not specified by kind	(X)	20.2	(X)	25.5	(X)	97.0

S Does not meet publication standards. X Not applicable.

¹ Includes receipts not specified by kind, as follows (in millions of dollars): Textbooks, 1963, 3.1; 1967, 14.7; technical, scientific and professional, 1963, 6.2; 1967, 11.6; religious, 1963, 2.6; 1967, 12.9; general, 1963, 7.3; 1967, 14.0.

² Includes private business and secretarial school, post high vocational schools, and institutes and training courses of college grade.

³ Objective tests, manuals, etc.; includes answer sheets.

⁴ Represents books sold direct to the consumer through agents or distributors, usually on installment plan of payment. Includes multivolume encyclopedias, children's literature, biblical sets, etc. Copies sold represent number of volumes rather than sets. ⁵ Includes nursing and dental subjects.

⁶ Includes missals and prayer books.

⁷ For adults and juveniles.

⁸ Digest size 4 1/4" x 6 1/2"; distributed 75 percent or more through magazine wholesalers in 1963, and 50 percent or more in 1967.

⁹ Sold primarily through booksellers or book dealers (retail and wholesale) at trade discounts. Juvenile books represent hardbound and paperbound books, excluding toy books. ¹⁰ Includes music.

FIG. XXXII. ELECTRIC ENERGY PRODUCTION AND INSTALLED CAPACITY OF ELECTRIC UTILITY GENERATING PLANTS: 1940 TO 1969

[See table 776]

¹ Preliminary.

Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Federal Power Commission.

Section 19

Power

This section presents statistics on various aspects of power and energy. The principal sources are the Federal Power Commission and the American Gas Association, Inc.

The Federal Power Commission, in its *Annual Report* and in periodic publications and surveys, issues information on the electric power and natural gas industries. Among annual reports are *Statistics of Privately Owned Electric Utilities in the United States*; *Statistics of Publicly Owned Electric Utilities in the United States*; *Sales of Firm Electric Power for Resale*; *Steam-Electric Plant Construction Cost and Annual Production Expenses*; *Hydroelectric Plant Construction Cost and Annual Production Expenses*; *Statistics for Interstate Natural Gas Pipeline Companies*; *Sales by Producers of Natural Gas to Natural Gas Pipeline Companies*; and *World Power Data*. Monthly reports include *Electric Power Statistics* and *Statistics of Major Interstate Natural Gas Pipeline Companies*. The principal survey is the *National Power Survey, 1964*. These various publications contain national and State data on production of electricity, capacity of generating plants, fuels used in energy production, energy sales and consumption, hydroelectric power, construction costs and production expenses of power plants, and depreciation practices of electric and interstate gas pipeline utilities.

The Commission also issues data on electric utility charges in its annual *All-Electric Homes* and *Typical Electric Bills*; projections for the future in its periodic *Electric Power Requirements and Supply of the United States, by Regions, Present and Future*; and maps showing principal natural gas pipelines and electric facilities.

The American Gas Association, Inc., in its monthly and quarterly bulletins and its yearbook, *Gas Facts*, presents data on gas utilities, including sales, revenues, customers, prices, and other financial and operating statistics. Other sources include the Bureau of Mines' *Minerals Yearbook*, containing data on coal, oil, and natural gas production and utilization; and the Edison Electric Institute's monthly and annual *Statistical Bulletin*, containing data on the distribution of electric energy by public utilities.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

NO. 773. TOTAL HORSEPOWER OF ALL PRIME MOVERS: 1940 TO 1969

[In millions. As of January, except as noted. Prior to 1960, excludes Alaska and Hawaii, except as noted. Prime movers are mechanical engines and turbines, and work animals, which originally convert fuels or force (as wind or falling water) into work and power. Electric motors, which obtain their power from prime movers, are excluded to avoid duplication. See also *Historical Statistics, Colonial Times to 1957*, series S 1-14]

ITEM	1940	1950	1955	1960	1965	1968	1969 (prel.)
Total horsepower	2, 773	4, 868	7, 158	11, 008	15, 096	17, 828	18, 781

No. 774. MINERAL ENERGY RESOURCES AND ELECTRICITY—PRODUCTION AND CONSUMPTION: 1930 to 1969

[In trillions of British thermal units, except percent. Prior to 1960, excludes Alaska and Hawaii, except data for bituminous coal include Alaska for all years. Unit heat values used are: Anthracite, 12,700 B.t.u. per pound; bituminous coal and lignite 13,100 B.t.u. per pound; petroleum, 5,800,000 B.t.u. per barrel; natural gas, total production multiplied by 1,075 B.t.u. minus repressuring vent and waste gas multiplied by 1,035 prior to 1965, and by 1,032 thereafter. For electricity series, hydropower and nuclear power converted to coal input equivalent at prevailing average pounds of coal per kilowatt hour each year at central electric plants, using 12,000 B.t.u. per pound. See also *Historical Statistics, Colonial Times to 1957*, series M 71-87]

NA. Not available. ¹ Preliminary, except loans approved.

² Net; i.e., excludes loans rescinded. For 1940, includes amounts not yet under loan contract.

³ Organizations, mainly cooperatives, to which loans for extending central station electric service in rural areas are made. ⁴ Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Dec. 31, 1969, there were 66 such borrowers, with 26,292 miles energized and 147,624 consumers served.

⁵ Rural electric distribution, generation, and transmission systems operated by REA borrowers.

⁶ Pole miles of electric distribution and transmission line in service. ⁷ Excludes energy sales and revenues of power sold by one REA borrower to another. ⁸ Includes rural-nonfarm and farm consumers.

Z Customers, less than 500; revenues, less than \$500,000.

¹ Averages for the year. ² For definition, see footnote 3, table 791.³ Excludes sales for resale.⁴ Includes "Other" service, not shown separately.⁵ Natural gas only.Source: American Gas Association, Inc., New York, N.Y.; yearbook, *Gas Facts*. (Copyright.)

Section 20

Science

This section presents statistics relating to various aspects of scientific and technical activity. Major topics are research and development, training and employment of scientists and engineers, atomic energy, space vehicles, and patents and trademarks. Principal sources of these data are the National Science Foundation, the Atomic Energy Commission, and the National Aeronautics and Space Administration.

The National Science Foundation gathers data chiefly through recurring statistical surveys and the National Register of Scientific and Technical Personnel (see below). Current Foundation publications containing data on funds for research and development and on scientific and engineering personnel include the bulletin series, *Reviews of Data on Science Resources*; the regular reports, *Federal Funds for Research, Development, and Other Scientific Activities*; *Research and Development in Industry*, and *American Science Manpower*; occasional reports relating to colleges and universities, and other nonprofit institutions; special reports such as *Scientific Manpower From Abroad*; and policy reports relating to national allocation of manpower and funds to science and technology. Statistical surveys in these areas pose particularly difficult problems of concept and definition and the data should, therefore, be regarded as broad estimates rather than precise quantitative statements. Detailed discussions of the scope and limitations of the data appear in the source publications.

Neither the National Aeronautics and Space Administration nor the Atomic Energy Commission publish any statistical reports as such. NASA's *Semiannual Report* contains current data on finances and its biweekly *Satellite Situation Report* presents information on artificial satellites, including both objects in orbit and decayed objects. The Atomic Energy Commission's *Annual Report to Congress* contains data on atomic energy, equipment, finances, and licenses.

Other sources of statistics on scientific and technical activities include *The Budget of the United States Government*, which contains summary financial data on all Federal research and development programs; the report series *Resources for Medical Research*, issued by the Public Health Service of the Department of Health, Education, and Welfare, and designed to present timely information on funds, manpower, facilities, and institutions devoted to medical and health-related research; and the *Annual Report of the Commissioner of Patents*, issued by the Department of Commerce's Patent Office and presenting data on patent applications and issuances and on trademark registrations and renewals.

Research and development.—The National Science Foundation defines research as a "systematic and intensive study directed toward a fuller knowledge of the subject studied" and development as "the systematic use of scientific knowledge directed toward the production of useful materials, devices, systems, methods, or processes." The data on funds are presented within the framework of a national economic structure composed of four sectors: (1) The *government sector*, made up primarily of Federal executive agencies; (2) the *industry sector*, consisting of manufacturing and nonmanufacturing firms and the Federally Funded Research and Development Centers they administer; (3) the *colleges and universities sector*, composed of colleges, universities, and their affiliated institutions, agricultural experiment stations and associated schools of agriculture, and Federally Funded Research and Development Centers administered by educational institutions; and (4) the *other nonprofit institutions sector*, consisting of such organizations as private philanthropic foundations, nonprofit research insti-

tutes, voluntary health agencies, and Federally Funded Research and Development Centers administered by nonprofit organizations. The federally funded centers are research and development organizations which are exclusively or substantially financed by the Federal government and which, in most instances, were originally established to meet a particular research and development need of the Government. They are administered on a contractual basis, by companies, educational institutions, or other nonprofit organizations. The research and development funds reported consist of current operating costs, including those for planning and administration, except as otherwise noted. They exclude funds for routine testing, mapping and surveying, collection of general-purpose data, dissemination of scientific information, and training of scientific manpower.

Scientists, engineers, and technicians.—Scientists and engineers are defined as persons engaged in scientific and engineering work at a level requiring a knowledge of sciences equivalent at least to that acquired through completion of a 4-year college course. They are generally classified according to the fields of their employment and not according to the discipline in which they received their major training. Technicians are defined as persons engaged in technical work at a level requiring knowledge acquired through a technical institute, junior college, or other type of training less extensive than 4-year college training. Craftsmen and skilled workers are excluded. The National Register of Scientific and Technical Personnel is a comprehensive program, conducted by the National Science Foundation, for the voluntary registration of scientists. Because it is voluntary, the Register does not include all scientists and engineers in the United States but it does provide valuable statistical information on demographic and other characteristics not available elsewhere.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XXXIII. NASA EXPENDITURES FOR RESEARCH AND DEVELOPMENT: 1961 TO 1970
(See table S19)

¹ Estimated.
Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Bureau of the Budget.

NO. 793. FUNDS FOR PERFORMANCE OF RESEARCH AND DEVELOPMENT AND BASIC RESEARCH, BY SECTOR, DISTRIBUTED BY SOURCE: 1955 to 1970

[In millions of dollars. Data primarily on calendar year basis—data for calendar year 1955 for industry and other nonprofit institutions combined with Federal and university data for fiscal 1955 (1954–55); same pattern followed for subsequent years. Data refer, in general, to natural sciences including engineering and to social sciences in all but industry sector. Major portion of funds excludes capital expenditures for research and development. Expenditures at associated Federally Funded Research and Development Centers administered by industry and other nonprofit institutions included in totals of respective sectors]

¹ Comprises basic research, applied research, and development. ² Includes State and local government funds received by these institutions and used for research and development.

³ Comprises estimates for independent nonprofit hospitals and voluntary health agencies.

NO. 794. RESEARCH AND DEVELOPMENT—DEFENSE, SPACE, AND OTHER RELATED OUTLAYS: 1955 to 1970

[Includes basic research, applied research, and development. Defense related outlays comprise all research and development spending by Dept. of Defense including space activities, and a portion of Atomic Energy Commission funds. Space related outlays are those of the National Aeronautics and Space Administration; they exclude space activities of other Federal agencies, estimated at less than 5 percent of all space research and development spending]

No. 815. SHIPMENTS OF ATOMIC ENERGY EQUIPMENT AND PRODUCTS: 1967 AND 1968

[In thousands of dollars. Excludes construction expenditures, engineering and design costs, research and development expenditures, and products used in atomic energy which are not uniquely designed for nuclear applications. Excludes radiation detection and monitoring devices and control and measuring devices containing radioactive isotopes]

Section 21

Transportation—Land

This section presents statistics relating to the mileage, control, and financing of public roads and to the transportation of persons and goods by land. The modes of transport included are passenger car, truck, railroad, bus and streetcar, and pipeline.

The principal compiler of data on public roads and on ownership and operation of motor vehicles is the Department of Transportation's Federal Highway Administration. The annual *Highway Statistics* and the historical *Highway Statistics, Summary to 1965*, are publications of the Bureau of Public Roads; *Accidents of Large Motor Carriers of Property* and *Accidents of Class I Motor Carriers of Passengers*, which present data on accidents involving intercity trucks and buses, respectively, are annual publications of the Bureau of Motor Carrier Safety. The department's Federal Railroad Administration presents data on accidents involving railroads in its annual *Accident Bulletin*.

Another major source of data on land transport is the Interstate Commerce Commission. Among its publications are the monthly *Transport Economics* and the *Annual Report*, containing operating data on all types of domestic transport, and the annual *Transport Statistics in the United States*, which is issued in separate parts. Part 1 is devoted to railroads, part 6 to oil pipelines, and part 7 to motor carriers. *Statistics of Railways in the United States*, published annually from 1887 through 1953, is a source of historical data.

Various censuses conducted by the Bureau of the Census also provide data relating to transportation. Data from the 1963 and 1967 censuses of transportation are presented in *Commodity Transportation Survey*, *National Travel Survey*, and *Truck Inventory and Use Survey*. The 1967 *Motor Carrier Survey* was conducted as part of the Census of Business; data from the corresponding 1963 survey were issued as part of the Census of Transportation. The *Annual Survey of Manufactures* and reports of the Census of Manufacturers and the Census of Business contain statistics on the motor-vehicle and equipment industry and on retail, wholesale, and services aspects of this industry. Additional data from those reports are included in sections 28 and 29.

Nongovernmental data can be found in the weekly and annual *Cars of Revenue Freight Loaded* and the annual *Yearbook of Railroad Facts*, both published by the Association of American Railroads, Washington, D.C.; *Bus Facts*, issued annually by the National Association of Motor Bus Owners, Washington; the *Transit Fact Book*, containing street railway and motorbus statistics, published annually by the American Transit Association, Washington; and *Transportation Facts and Trends*, issued by the Transportation Association of America, Washington. Useful annual handbooks in the field of motor-vehicle transport are *Automobile Facts and Figures* and *Motor Truck Facts*, both issued by the Automobile Manufacturers Association, Detroit; *American Trucking Trends*, issued by the American Trucking Association, Washington; and *Accident Facts*, issued by the National Safety Council, Chicago.

Highway systems.—The Federal-Aid Highway Act of 1916 provides for the sharing of highway construction costs between the States and the Federal Government with the initiative retained by each State for choosing projects and carrying them out. The planning and development of Federal-aid systems began in 1921. Federal funds share with State funds in costs of engineering, construction, and right-of-way acquisition on the designated systems while other charges, such as maintenance and policing, are borne entirely by the States and local agencies.

The Federal-aid primary system connects all of the principal cities, county seats, ports, manufacturing areas, and other traffic generating areas. In general, these are

the same as the State trunklines. The Federal-aid secondary system consists of important feeder roads linking the farms, factories, distribution outlets, and smaller communities with the primary system.

Motor carriers.—Prior to 1950, class I for-hire motor carriers were classified by the Interstate Commerce Commission as those with \$100,000 or more of gross annual operating revenue. Beginning 1950, the class I minimum became \$200,000. Beginning 1957, the class I minimum for motor carriers of property was increased to \$1,000,000; however, the minimum for class I motor carriers of passengers remained at \$200,000.

Railroads.—The total railroad mileage of the United States comprises companies reporting to the Interstate Commerce Commission, grouped as follows: (1) Regular interstate carriers (and their nonoperating subsidiaries); (2) switching and terminal railroads; and (3) private railroads (identified by the Commission as "circular" because they report on brief circulars, or as "unofficial" when their reports are received too late for tabulation). For the most part, circular and unofficial companies, and switching and terminal railroads, are not included in the statistics.

Nonoperating subsidiaries comprise proprietary companies, which are covered by the reports of operating carriers, and lessor companies, which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railroads are classified on the basis of operating revenues. Prior to 1956, the classification was as follows: Class I, those having more than \$1,000,000 gross annual operating revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. From 1956 to 1964, the following classification was in effect: Class I, \$3,000,000 or more; and class II, under \$3,000,000. Effective January 1965, the classification was changed to the following: Class I, \$5,000,000 or more; and class II, under \$5,000,000.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

NO. 822. OPERATING REVENUES, BY TYPE OF TRANSPORT: 1940 TO 1968

[Excludes Alaska and Hawaii, except as noted]

No. 823. VOLUME OF DOMESTIC INTERCITY FREIGHT TRAFFIC, BY TYPE OF TRANSPORT: 1940 TO 1968

[In millions of ton-miles, except percent. Motor vehicles and airways, prior to 1959, and other types of transportation, prior to 1960, exclude Alaska and Hawaii, except as noted. A ton-mile is the movement of 1 ton (2,000 pounds) of freight for the distance of 1 mile. Comprises public and private traffic, both revenue and nonrevenue. See also *Historical Statistics, Colonial Times to 1967*, series Q-1-11]

- Represents zero. Z Less than 0.5 mile.

¹ Excludes highway planning and research work financed with 1½ percent Federal-aid highway funds available pursuant to 23 U.S.C. 307(c)(2). (Completed, \$94.1 million total cost, \$69.2 million Federal funds; underway, \$204.6 million total cost, \$158.5 million Federal funds.)

² Full authorization 42,500 miles. The 40-mile difference between full authorization and miles reported includes routes for which final locations are not yet determined.

State Highway Funds

541

No. 835. DISBURSEMENTS OF STATE HIGHWAY FUNDS—TOTAL 1950 TO 1968, AND BY PURPOSE, 1968, STATES

[In millions of dollars. Comprises disbursements, whether from current revenues or proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous purposes. Includes transactions by State toll authorities. Beginning 1965, excludes amounts allocated for collection and nonhighway purposes, and bonds redeemed by refunding. See also *Historical Statistics, Colonial Times to 1957*, series Q 273-278]

¹ In effect Dec. 31.

² Weighted average, based on net gallons taxed. Prior to 1960, excludes Alaska and Hawaii.

³ No tax.

⁴ Tax on diesel fuel, and usually other special fuels for highway vehicles, is higher than gasoline tax shown.

⁵ State tax rate on liquefied petroleum gas per gallon is 6 cents in California and South Dakota, 8 cents in Mississippi, and 5 cents in Kansas.

⁶ State tax rate per gallon is 8 cents in Hawaii County and 5 cents in other counties.

⁷ Trucks or combinations with more than 2 axles pay motor-fuel tax rate of 9 cents per gallon in Kentucky and Virginia. (Prior to July 1960, the tax in Virginia was 8 cents.)

⁸ State tax rate is 6 cents per gallon. Since July 1966, all counties have had option of levying an additional 1 cent tax.

- Represents zero.

¹ Beginning 1965, excludes tactical vehicles.

² A substantial part of the trucks and buses reported comprises chassis without body; hence, excludes the value of bodies for these chassis.

³ Beginning 1940, includes value of standard equipment.

⁴ Averages do not indicate price changes since total values may reflect changes in number of makes, models, and/or body types from year to year.

⁵ Includes publicly owned vehicles. Excludes vehicles owned by military services.

⁶ Prior to 1930, buses included with passenger cars.

⁷ Total includes components exclude, Hawaii.

⁸ Estimate.

Taxes and fees ⁷	1,166	1,172	1,353	1.35	2.28	1.22	1.18	1.14	1.26

¹ For 1970, includes lubrication, washing, and waxing; replacement of spark plugs, points and condenser, wiper blades, fan belt, radiator hoses, etc.; starter, water pump, and brake overhaul; universal joint replacement, etc.; and major repair such as a complete "valve job."

² For 1970, covers 7 new regular tires and 4 new snow tires during life of car.

³ For 1970, includes a set of vinyl floor mats and seat covers.

⁴ For 1970, gasoline use set at 13.8 miles per gallon; oil use associated with gasoline at rate of 1 to 128.

⁵ For 1970, includes \$50,000 combined public liability, property damage, \$1,000 medical, and comprehensive for full 10 years; uninsured motorist coverage, and \$100 deductible collision insurance assumed for first 5 years.

⁶ For 1970, includes monthly charges of \$10 for garage rental or cost of owner's garaging facility, parking fee average of \$54 per year, and toll average of \$6.50 per year.

⁷ For 1970, includes Federal gasoline tax of 4 cents and Maryland gasoline tax of 7 cents per gallon; Maryland registration fee of \$20 and titling tax at 4 percent of retail price; and Federal excise taxes on motor vehicles, tires, and oil. Total taxes include property and oil taxes.

Z Less than 500. ¹ Includes range of operation and major use categories not shown separately. 1963 includes miscellaneous trucks not classified.

² Standard classification for all States in terms of gross vehicle weight (empty weight of vehicle plus load it was designed to carry): Light—10,000 lb. or less; Medium—10,001 to 20,000 lb.; Heavy—20,001 lb. or more.

³ Excludes pickup and panel trucks. Local—in or around city and suburbs, or within a short distance of farm, factory, mine, or place vehicle is stationed. Short range—beyond the local area, but usually not more than 200 miles one way to most distant stop from place vehicle is stationed. Long range—usually more than 200 miles one way to most distant stop from place vehicle is stationed.

No. 852. TRANSIT INDUSTRY—SUMMARY: 1940 TO 1968

[Money figures in millions of dollars, except as indicated. Prior to 1960, excludes Alaska and Hawaii. Comprises all privately and publicly owned organized local passenger transportation agencies except taxicabs, suburban railroads, and sightseeing and school buses. Covers (a) local motorbus lines, (b) electric street railways, (c) elevated and subway lines, (d) interurban electric railways and (e) trolley coach lines. Based on financial and statistical reports received by American Transit Association from transit companies representing more than 85 percent of the industry. See also *Historical Statistics, Colonial Times to 1957*, series Q 330-340]

Persons injured.....number..	29,606	33,255	19,577	25,789	25,552	24,523	24,608

¹ Includes unofficial companies and, through 1960, circular companies.

² Includes lessors, proprietary, unofficial and, through 1960, circular companies; excludes Alaska.

³ Includes mileage in Canada.

⁴ Includes switching and terminal companies, except average tractive effort and average capacity.

⁵ Through 1950, steam locomotives of class I railroads; beginning 1960, all locomotives of class I railroads.

⁶ Represents horsepower. ⁷ Excludes cabooses cars. ⁸ Class I railroads only. ⁹ Includes lessors.

¹⁰ Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale or abandonment, reclassification, etc. Also includes proprietary companies. ¹¹ Beginning 1950, includes amortization applicable to proprietary companies.

¹² Comprises common stock, preferred stock, and funded debt unmatured.

¹³ After extraordinary and prior period items. ¹⁴ Includes highway grade crossing casualties.

Section 22

Transportation—Air and Water

This section presents statistics on civil air transportation, both passenger and cargo, and on water transportation, including inland waterways, oceanborne commerce, the merchant marine, cargo and vessel tonnages, and shipbuilding. The principal sources of these data are the annual *FAA Statistical Handbook of Aviation*, issued by the Federal Aviation Administration; the annual *Waterborne Commerce of the United States* and the *Annual Report of the Chief of Engineers*, Part 2, issued by the Corps of Engineers of the Department of the Army; the monthly and annual *U.S. Waterborne Foreign Trade*, and *U.S. Airborne Foreign Trade*, issued by the Bureau of the Census; and the annual *Merchant Marine Statistics*, issued by the Bureau of Customs.

Data on air transportation are also presented in *Air Transport Facts and Figures*, published annually by the Air Transport Association of America, Washington, D.C. Additional sources of data on water transportation include *A Statistical Analysis of the World's Merchant Fleets*, issued periodically by the Maritime Administration of the Department of Commerce; *The Bulletin*, issued monthly by the American Bureau of Shipping, New York; and the *Annual Summary of Merchant Ships Launched in the World* and the *Register Book* published by Lloyd's Register of Shipping, London, England. The 1821 through 1946, the 1946-1963, and the 1964 issues of *Foreign Commerce and Navigation of the United States*, published by the Bureau of the Census, are basic sources of historical data. Data relating to merchandise exports and imports are in section 30 of this *Abstract*, Foreign Commerce and Aid.

Civil aviation.—Federal promotion and regulation of civil aviation are carried out by the Federal Aviation Administration and the Civil Aeronautics Board. The Board issues certificates permitting persons to engage in air transportation as a business, fixes air mail rates which they may charge, and may establish maximum and minimum rates for transportation of passengers and goods. It also has the duty of investigating accidents in air transportation.

The principal activities of the Federal Aviation Administration are: Controlling the use of navigable airspace; prescribing regulations dealing with the competency of airmen, airworthiness of aircraft, and air traffic control; operation of air route traffic control centers, airport traffic control towers, and flight service stations; the design, construction, maintenance, and inspection of navigation, traffic control, and communications equipment for the airways; and promotion of air safety.

These agencies publish annual operational data on the use of airway facilities; data related to the location of airmen, aircraft, and airports; the activity volume in the field of non-air carrier (general aviation) flying; and aircraft production and registration.

Air carriers and service.—The term *certificated route air carrier* refers to air carriers holding certificates of public convenience and necessity, issued by the Civil Aeronautics Board, authorizing the performance of scheduled air transportation over specified routes and a limited amount of nonscheduled operations. This general carrier grouping includes the all-purpose carrier (i.e., the so-called passenger/cargo carriers) and the all-cargo carriers, and comprises all of the airlines certificated by the board, except the supplemental air carriers. Certificated route air carriers are often referred to as "scheduled airlines," although they also perform nonscheduled service. *Nonscheduled service* comprises revenue flights that are not operated in regular scheduled service, such as charter flights, and all nonrevenue flights incident to such flights. *Scheduled service* is transport service operated over an air carrier's certificated routes, based on published flight schedules, including extra sections and related nonrevenue flights.

Vessel shipments, entrances, and clearances.—Shipments by dry cargo vessels comprise shipments on all types of watercraft except tanker vessels; shipments by tanker vessels comprise all types of cargo, liquid and dry, carried by tanker vessels.

A vessel is reported as entered only at the first port which it enters in the United States whether or not cargo is unloaded at that port. A vessel is reported as cleared only at the last port at which clearance is made to a foreign port, whether or not it takes on cargo. Army and Navy vessels entering or clearing without commercial cargo and vessels touching at a United States port in distress, or for other temporary causes without discharging cargo, are not included in the figures.

Units of measurement.—Cargo tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. However, shipping weight excludes lift and cargo vans and similar substantial outer containers. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

- Represents zero. NA Not available. Z Less than 0.05. ¹ Excludes all-cargo operators.

² For types of personnel, see table 877. ³ Not compiled for intra-Alaska.

⁴ As of Dec. 31, based on fourth quarter.

⁵ Represents aircraft of the certificated route air carriers; excludes those used for crew training and general utility purposes, or held for disposal. Beginning 1960, excludes aircraft operated by the scheduled all-cargo carriers. Includes helicopters, not shown separately.

⁶ Obtained by dividing passenger seat-miles by revenue-miles flown in passenger service.

⁷ Excludes freight flown by certificated all-cargo operators and irregular carriers.

⁸ Beginning 1960, includes military contract operations.

⁹ Includes 2 midair collisions nonfatal to air carrier occupants; excluded in computation of fatal accidents.

¹⁰ Includes crew members. ¹¹ Excludes passenger deaths occurring in dynamite accidents, as follows: Nov. 1, 1955, 39; Jan. 6, 1960, 29.

Source: Dept. of Transportation, Federal Aviation Administration; *FAA Statistical Handbook of Aviation*. Includes data from Civil Aeronautics Board.

No. 884. UNITED STATES RECEIPTS AND PAYMENTS FOR INTERNATIONAL TRANSPORTATION: 1950 TO 1969

[In millions of dollars. Data are international transportation transactions recorded for balance of payment purposes (see table 1205). Receipts include freight on exports carried by U.S. operated carriers and foreign carrier expenditures in U.S. ports. Payments include freight on imports carried by foreign carriers and U.S. carrier port expenditures abroad. Freight on exports carried by foreign carriers is excluded since such payments are directly or indirectly for foreign account. Similarly, freight on U.S. imports carried by U.S. carriers is a domestic rather than an international transaction. Minus sign (—) denotes decrease. See *Historical Statistics, Colonial Times to 1967*, series U 170 and U 177, for totals]

No. 888. WATERBORNE IMPORTS AND EXPORTS—CARGO TONNAGE, BY FLAG OF CARRIER VESSEL: 1950 TO 1968

[In thousands of short tons. Beginning July 1950, excludes commodities classified for security reasons as "Special Category." For 1955 and 1960, exports exclude shipments individually valued under \$500. For 1964 and later years, exports exclude shipments to Canada individually valued under \$2,000 and to other countries under \$500. Under \$100 shipments are excluded for all years. Beginning 1955, imports exclude shipments under 2,000 pounds shipping weight regardless of value, as well as shipments valued at less than \$100 regardless of shipping weight. For January 1960 through June 1965, imports exclude formal entry shipments valued at less than \$100 and informal entry shipments valued under \$251. For July–December 1965 and later years, imports exclude all shipments under \$251. For further coverage details, see report FT 985, *U.S. Waterborne Foreign Trade* published monthly by Bureau of the Census. See also *Historical Statistics, Colonial Times to 1957*, series Q 210–215]

¹ Estimates of personnel employed on U.S. merchant ships, 1,000 gross tons and over. Excludes vessels on inland waterways, Great Lakes, and those owned by, or operated for, the U.S. Army and Navy, and special types such as cable ships, tugs, etc. ² Employment affected by maritime strike, Atlantic, Gulf, and Pacific Coast ports.

³ Decrease due to seafaring strike.

⁴ Represents basic wage, over and above subsistence (board and room), paid to seamen having qualifying experience and employed on U.S. flag merchant vessels. Excludes overtime and fringe pay benefits.

⁵ Seamen on both coasts receive extra pay for Saturdays and Sundays at sea. Beginning November 1955, West Coast incorporated this extra pay into base wages but East Coast did not.

Source: Dept. of Commerce, Maritime Administration; *Seafaring Wage Rates*, and unpublished data. Beginning 1956, monthly employment data in *Maritime Manpower Report*.

No. 901. U.S. MERCHANT MARINE—SUMMARY: 1930 TO 1965

[As of June 30 through 1940; January 1, thereafter. Includes Puerto Rico, Guam, and Virgin Islands. Covers documented vessels of 5 net tons or more. See also *Historical Statistics, Colonial Times to 1967*, series Q 153-174]

¹ Vessels propelled wholly by sail. ² Vessels having no propelling power of their own.

³ Comprises iron, steel, composites, concrete, and aluminum. Beginning 1961, includes plastic (fiberglass). For 1963, 1964, and 1965, steel amounted to 24,336,000, 24,860,000, and 25,279,000 tons, respectively.

⁴ Excludes vessels engaged in whale, cod, and mackerel fisheries.

⁵ Estimates for 1967 and 1968, respectively: Commercial documented vessels, 48,700 and 49,545; gross tonnage, 27,250,946 and 27,841,752.

Section 23

Agriculture

This section presents statistics concerning the structure of our agricultural economy. Included are data on farms and farm population; land utilization and conservation; farm income, expenditures, and debt; farmer cooperatives; farm output and marketings; trade in agricultural products; and data on specific crops, livestock, poultry, and livestock and poultry products.

The principal sources of these data are reports issued by the Bureau of the Census, which conducts a census of agriculture every 5 years and censuses of irrigation and of drainage every 10 years; and three annual reports, *Agricultural Statistics*, *Crop Production*, and *Crop Values*, issued by the Statistical Reporting Service, Department of Agriculture. Other important sources include *The Balance Sheet of Agriculture*, *Changes in Farm Production and Efficiency*, *The Farm Income Situation*, and other *Situation* reports, issued by the Economic Research Service, Department of Agriculture. Sources of current data on agricultural exports and imports include *Foreign Agricultural Trade*, also published by the Economic Research Service, and the reports of the Bureau of the Census, particularly Report FT 135, *U.S. Imports, General and Consumption, Schedule A Commodity and Country*, and Report FT 410, *U.S. Exports, Schedule B Commodity and Country*.

A census of agriculture has been taken by personal enumeration of individual farms every 10 years since 1840 and every 5 years since 1920. The first census included such items as numbers of livestock, production of wool, value of poultry and dairy products, and production of principal crops. Data on number, acreage, and value of farms were first obtained in the 1850 census; on farm tenure, in 1880; and on a detailed classification of farmland by use, in 1925. The 1964 Census of Agriculture is the most recent one for which complete data are available. Publication of the 1969 census results is scheduled to begin in early 1971.

Annual agricultural statistics of a wide variety have been issued by the Department of Agriculture for over 100 years. The 44 field offices of the Statistical Reporting Service collect data from voluntary reporters. State estimates and other information are sent to the Crop Reporting Board of the Statistical Reporting Service, which issues reports containing State, regional, and national data.

Statistics compiled by the Statistical Reporting Service on crops, livestock and livestock products, agricultural prices, farm employment, and other related subjects are based mainly on data obtained through mail questionnaires. The basic information is obtained from nearly three-fourths of a million reporters, mostly farmers, who report for their own and nearby farms on some 80 crops and scores of other items pertaining to agricultural production and farm family living.

Farms and farmland.—In the course of its history, the Bureau of the Census has used varying definitions of a farm. In the 1959 and 1964 censuses, places of less than 10 acres were counted as farms if estimated sales of agricultural products for the year amounted to at least \$250, and places of 10 or more acres if such sales amounted to at least \$50. In the 1950 and 1954 censuses, places of 3 or more acres were counted as farms if the annual *value* of agricultural products, whether for home use or for sale, but exclusive of home-garden products, amounted to \$150 or more; places of less than 3 acres were counted as farms only if the annual sales amounted to \$150 or more. For definitions used in earlier censuses, see *U.S. Census of Agriculture: 1964*, Vol. II, Introduction.

Estimates based on evaluation studies of the 1959 and 1964 census results indicate an underenumeration of 341 thousand farms in 1959, 8.4 percent of the estimated total number, and of 401 thousand farms, or 11.3 percent, in 1964. In both censuses, the estimated underenumeration of land in farms amounted to 71.5 million acres, or 6 percent of the estimated total acreage. Except as noted, data from those censuses have not been adjusted for the estimated underenumeration. Additional details are given in *U.S. Census of Agriculture: 1959, and 1964*; Vol. II, Introduction.

Currently included as farms are such agricultural enterprises as nurseries, greenhouses, hothouses, mushroom houses, and cranberry bogs; excluded are fish farms, fish hatcheries, oyster farms, frog farms, fur farms, apiaries, kennels, game preserves, parks, and the like. In the case of landowners who had one or more tenants, renters, croppers, or managers, the land operated by each was counted as a separate farm.

In the 1964 census, farms classified as commercial were generally those with sales of \$2,500 or more, and also those with sales of \$50 to \$2,499 provided the operator was under 65 years of age and did not work off the farm 100 or more days during the year.

Farmland refers to all land under the control of a farm operator and considered as part of his farm, including land not actually under cultivation or used for pasture or grazing. Rent-free land was included as part of the farm only if the operator had sole use of it. Land used for pasture or grazing that was neither owned nor leased by the farm operator, such as national forests, Taylor grazing land, State or other public lands, and some railroad and other privately owned lands, is not included.

Irrigation and drainage.—Irrigated land as defined by the Bureau of the Census is the net acreage of farmland to which irrigation water was applied during the census year. It excludes land not irrigated during the year and also irrigated nonfarm land. In the 18 Western States (Alaska excluded) and Louisiana, the Bureau of the Census collects information on irrigation at 10-year intervals from irrigation companies, districts, and other organizations, and from farms that operate their own irrigation works. Irrigation information for other States is generally limited to the regular farm census. In the 1950 and 1960 drainage censuses, the Bureau of the Census enumerated, in general, only organized enterprises with 500 acres or more of drained farmland.

Soil conservation.—Soil conservation district legislation has been enacted in all 50 States, Puerto Rico, and the Virgin Islands. Soil conservation districts have broad responsibility and authority for conservation and development of soil, water, and related resources. In most cases, districts have authority to accept Federal, State, county, and private assistance for their soil and water conservation programs.

Farm income.—Cash income is the cash receipts from farm marketings and Government payments made directly to farmers for farm related activities. Farm marketings represent quantities of agricultural products sold by farmers multiplied by prices received per unit of production at the local market. Gross farm income includes cash income, value of farm products consumed in farm homes, and rental value of farm homes.

Information on prices received is obtained by the Statistical Reporting Service of the Department of Agriculture from about 33,000 voluntary reporters, including farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month in which a particular crop harvest begins.

Crop reporting.—Estimates by the Department of Agriculture's Statistical Reporting Service of crop acreage and production for the census years are set up currently from available information and, if necessary, are later revised to a level based largely

on the census enumerations. Estimates for intercensal years are based on sample data obtained each year from individual reporters, supplemented by such data as State assessors' enumerations of agricultural information, reports of carlot shipments, warehouse receipts, local surveys, personal observations by field statisticians, and reports from other sources. Cotton acreage and production are also based on sample data and on ginning information gathered by the Bureau of the Census.

Livestock.—Each census of agriculture from 1840 through 1900 was taken as of June 1. The various quinquennial and decennial censuses since then have been taken as of January, April, or the fall, as specified in the published results. Comparison of livestock inventories from census to census is seriously affected by changes in date of enumeration. From January to April, and from October and November to January, material changes occur in numbers on hand in most parts of the country, due to births, marketings, farm slaughter, etc. To obtain as much comparability as possible, the censuses taken in April either excluded recently born animals from the enumeration or provided for their enumeration in a separate age group. Volume II of *U.S. Census of Agriculture: 1964* shows a complete history of the enumeration of livestock and analyzes comparability from census to census.

Annual inventory numbers of livestock on farms and estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture are based on information from farmers, supplemented by State assessors' data and by records of brand inspections, rail and truck shipments, and slaughter. The level for these inventories is based largely on interpretations of quinquennial census enumerations.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 917. FARMS—NUMBER, BY TYPE, BY STATES: 1964

[Based on reports for a sample of farms. In general, a farm was classified as a particular type if its sales of a particular product or group of products amounted to 50 percent or more of total value of farm products sold. For definition of commercial farm, see text, p. 580. For composition of regions, see fig. 1, p. xii]

¹ Inventory valuations at beginning of year. Includes family automobiles.² Excludes garden tractors. ³ Includes picker-shellers. ⁴ For farm business use.Source: Dept. of Agriculture, Economic Research Service; annual report, *The Balance Sheet of Agriculture* and monthly report, *Farm Income Situation*, July issue. Also in *Agricultural Statistics*.

No. 924. IRRIGATION AND DRAINAGE—SUMMARY: 1920 TO 1959

[Data are for 17 Western States (Alaska and Hawaii excluded, except as noted) and Louisiana. Relates to multiple farm organizations only. Based on reports of management of organizations. An organization is defined as a group of two or more water users, a company, a corporation, or a governmental district or agency that operates facilities to supply water for irrigation of farm or ranch lands. It may be a formal legal arrangement or an informal cooperative arrangement]

¹ Measures annual volume of farm production available for eventual human use.

² Includes livestock products not shown separately, except horses and mules. Livestock production consists of 3 components: Constant-dollar value of pasture consumed, other feed consumed, and product-added in converting feed and pasture into livestock and products for human use.

³ Total constant dollar value of all crop production regardless of its final disposition.

NA. Not available.

¹ Values are based on season average prices; see footnote 2.

² Season average price received by farmers. State prices weighted by production to obtain U.S. price prior to 1958, but weighted by sales beginning 1958. For certain years, prices for wheat, rye, rice, corn for grain, grain sorghums, oats, barley, dry edible beans, soybeans, flaxseed, cotton, and cottonseed include an allowance for unredeemed loans and purchase agreement deliveries. See also notes on prices for each crop.

³ Based on reported price of grain sorghums.

⁴ State production figures, which conform with Bureau of the Census annual ginning enumeration with allowance for cross-State ginnings, rounded to thousands and added for U.S. totals.

⁵ Bales of 500 pounds, gross weight.

⁶ Average price to April 1, 1970.

⁷ Prices are for hay sold baled.

⁸ Cleaned basis.

⁹ Includes some quantities not harvested and/or not marketed on account of economic conditions.

¹ Sugar quotas govern the supply of sugar from all sources, foreign and domestic, available to the conterminous United States. The formulas for allocating the quotas among the supplying areas are established by Congress: the size of the quotas is determined by the Secretary of Agriculture.

² A adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers.

¹ Acreage of crops for harvest for fresh market, including any partially harvested or not harvested because of low prices or other economic factors, plus acreage harvested for processing.

² Includes some quantities not marketed and excluded in computing value.

³ Fresh market vegetables valued at f.o.b. shipping point, except garlic which is field run basis at packinghouse door. Processing vegetables are equivalent returns at packinghouse door.

⁴ Shelled basis; 2 pounds of lima beans in the shell produce approximately 1 pound of shelled beans.

⁵ Shelled basis; 2½ pounds of peas in the shell produce approximately 1 pound of shelled peas.

D Withheld to avoid disclosure of individual company data. NA Not available. X Not applicable.

¹ Includes hydrogenated fats and other fats and oils "in process"; includes crude oils used directly in products.

² Production includes once-refined only (alkali or caustic washed); stocks include hydrogenated oils and other "in process" oils.

³ Production is quantity rendered; consumption and stocks include both rendered and refined.

⁴ Includes data for menhaden, sardine, and fish oils other than cod and cod liver.

Section 24

Forests and Forest Products

This section presents basic statistics on the area and ownership of commercial forest land, and on the annual growth, cut, and volume of timber on this land; forestry statistics covering the national forests and Forest Service cooperative programs; product statistics for lumber, pulpwood, wood pulp, paper and board, turpentine, rosin, and veneer logs; and other similar data.

The principal sources of these data are *Timber Trends in the United States*, issued in 1965 by the Forest Service of the Department of Agriculture, and *The Demand and Price Situation for Forest Products, National Forest System*, and *Forest Fire Statistics*, issued annually by the Forest Service; and reports of the quinquennial Census of Manufactures and the monthly and quarterly *Current Industrial Reports*, issued by the Bureau of the Census. Additional information in this field is published in the *Annual Report* of the National Forest Reservation Commission, the *Annual Naval Stores Report* of the Department of Agriculture's Statistical Reporting Service, the monthly *Survey of Current Business* of the Office of Business Economics, and the monthly *Fingertip Facts and Figures* of the National Forest Products Association, Washington, D.C.

The Bureau of the Census also collects statistics on foreign trade of forest products. The Bureau of Labor Statistics publishes monthly and annual statistics of wholesale lumber prices. Information on the domestic movement of forest products is collected by the Interstate Commerce Commission and the Association of American Railroads.

The completeness and reliability of statistics on forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those which have not been surveyed. Estimates of fire damage or causes of fires are not completely reliable, although forest fire statistics for Federal lands are considered much better than those for private lands. In the field of forest products, much more data are available for lumber production and other manufactured products such as veneer and plywood, pulp and paper, naval stores, etc., than for the primary forest products such as poles and piling, fuelwood, and fence posts.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 983. FOREST LAND—TOTAL AND COMMERCIAL AREA AND VOLUME OF SAW-TIMBER: 1938 TO 1963

[Area in millions of acres; sawtimber in billions of board feet. As of January 1. Prior to 1963, excludes Alaska and Hawaii, except total forest land and all ownership in 1953. Net volume of sawtimber also includes Alaska for 1953. For composition of regions, see table 986]

- Represents zero. ¹ Comprises species which contain at least 1 saw log defined as follows: Softwoods must be at least 9.0 inches in diameter, breast height, except in Calif., Oreg., Wash., and coastal Alaska where the minimum diameter is 11.0 inches. Hardwoods must be 11.0 inches in all States. ² Comprises all live sawtimber trees, poletimber trees, saplings, and seedlings meeting specified standards of quality or vigor; excludes cull trees.

¹ Excludes Alaska and Hawaii, except as noted.² As reported by publishers accounting for about 75 percent of total newsprint consumption in 1969.³ Beginning 1965, includes Alaska and Hawaii.⁴ Based on reports of the Bureau of the Census. Includes Alaska, Hawaii, and Puerto Rico.⁵ Source: Dept. of Labor, Bureau of Labor Statistics. Standard newsprint, rolls, contract, delivered to principal ports. Annual averages.Source: Dept. of Commerce, Office of Business Economics (except as noted); based on data from the American Newspaper Publishers Association, New York, N.Y., and Newsprint Division, American Paper Institute, New York, N.Y. In *Survey of Current Business*.

Section 25

Fisheries

This section presents statistics relating to quantity, value, species, and disposition of fish caught for commercial purposes, and to fishery products. The principal sources of such data are the annual report, *Fishery Statistics of the United States*, and the monthly and annual bulletins in the *Current Fishery Statistics* series published by the Fish and Wildlife Service of the Department of the Interior.

The Fish and Wildlife Service conducts annual surveys of the fishery industries. Results from the surveys include data on the quantity and value of the catch of individual species of fish, employment in fisheries, gear operated, fishing and transporting craft used, employment in wholesale and manufacturing establishments, and the volume and value of production of manufactured fishery products. In addition, the reports include data on imports, exports, freezings, and cold storage holdings of fishery products; and monthly landings in most coastal States, and in Ohio, Michigan, and Wisconsin. Information is also collected covering shad fisheries of the Hudson and Potomac Rivers; alewife fisheries of the Potomac; seed oyster fisheries; Pacific Coast halibut fisheries; New England offshore fisheries; South Atlantic and Gulf shrimp fisheries; the fur seal industry of the Pribilof Islands; and the Pacific Coast whaling industry.

The first comprehensive survey of fisheries and fishery industries of the United States was made for the year 1880, although it did not include the Mississippi River and its tributaries. A complete survey of the United States was conducted in 1908 by the Bureau of the Census and again in 1931 by the Bureau of Fisheries. Various sections of the country have been surveyed from time to time. A complete survey of all sections, including manufacturing and wholesaling operations, was made for 1950. Beginning in 1954, complete data have been collected annually, except for a portion of the Mississippi River and its tributaries in 1961.

Reports of the 1963 and 1967 Censuses of Commercial Fisheries, conducted by the Bureau of the Census, present statistics on the number of commercial fishing operators, receipts from fishing activities, employment, vessels operated, value of catch, and fishing gear.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 1004. FISHERIES—QUANTITY AND VALUE OF CATCH: 1930 to 1969

Section 26

Mining and Mineral Products

This section presents statistics relating to the mineral industries and mineral products. The data are arranged in four broad groupings: General summary statistics, fuels, nonmetals other than fuels, and metals. Summary measures of production and employment are presented for mining and its products. More detailed data on value and quantity of production, prices, imports and exports, consumption, and distribution are shown for specific mineral industries and products.

The principal source of these data is the *Minerals Yearbook*, published by the Bureau of Mines, Department of the Interior. It consists of volume I-II, *Metals, Minerals, and Fuels*; volume III, *Area Reports—Domestic*; and volume IV, *Area Reports—International*. Other government sources are the Census of Mineral Industries, conducted every 5 years by the Bureau of the Census; *Statistics of Oil Pipe Line Companies*, issued annually by the Interstate Commerce Commission as Part 6 of *Transport Statistics*; and the Bureau of the Mint's *Annual Report of the Director*, which presents data on gold and silver. Non-government sources include the *Engineering and Mining Journal*, issued monthly by the McGraw-Hill Publishing Co., New York, and *The Iron Age*, issued weekly by the Chilton Co., Philadelphia.

Mineral statistics, with principal emphasis on commodity detail, have been collected by the United States Geological Survey or by the Bureau of Mines since 1880. Current data available from Bureau of Mines publications include quantity and value of minerals produced, sold or used by producers, or shipped; quantity of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials. The Bureau of Mines also collects and publishes data on man-hours, active days, length of shift, and accidents.

Decennial censuses of mineral industries were conducted by the Bureau of the Census from 1840 to 1940. Censuses were taken again for the years 1954, 1958, 1963, and 1967. The 1963 census is the most recent for which complete data are available. For scheduled release dates of 1967 census reports, see "Publications of Recent Censuses" in Appendix III of this book. The censuses provide, for the various types of mineral establishments, information on operating costs, capital expenditures, and labor, equipment, and energy requirements in relation to their value of shipments and other receipts. Commodity statistics on many of the manufactured mineral products are also collected by the Bureau at monthly, quarterly, or annual intervals and issued in its *Current Industrial Reports* series.

Data on mining and mineral products may also be found in other sections of this *Abstract*. For example, data on iron and steel, and on aluminum, magnesium, copper, clay, and other manufactured mineral products appear in section 28, *Manufactures*; summary data for outlying areas of the United States appear in section 31; and selected data on an international basis are presented in section 32.

In general, figures shown in the individual commodity tables include data for outlying areas, and may therefore not agree with summary table 1024. Except for crude petroleum, the export and import figures include foreign trade passing through the customs districts of Alaska, Hawaii, and Puerto Rico, but exclude shipments between conterminous United States and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 1021. VALUE OF MINERAL PRODUCTION: 1931 TO 1969

(In millions of dollars. Prior to 1953, excludes Alaska and Hawaii. Includes some products, as cement, lime, and natural gas liquids in all years, and, through 1946, heavy clay products; also, nonferrous metals are valued at the refined price. See also *Historical Statistics, Colonial Times to 1957*, series M 13-14, M 20, and M 30)

¹ Withheld to avoid disclosing individual company data.

NA Not available. X Not applicable.

² Includes small quantity of anthracite mined in States other than Pennsylvania.

³ Grindstones, pulvestones, millstones (weight not recorded), grinding pebbles, sharpening stones, and tube-mill liners.

⁴ Value included in "Nonmetallic minerals, undistributed."

⁵ Excludes abrasive stone, bituminous limestone and sandstone, and ground soapstone.

⁶ Included elsewhere in table. Includes calcareous marl and slate.

⁷ Comprises value of items that cannot be disclosed: Aplite, brucite (1965-68), calcite (optical grade, 1965), calcium-magnesium chloride (1960-1963), diatomite, graphite,

iodine, kyanite, lithium minerals, magnesite, greensand marl, olivine, stannolite, and wolastonite and values indicated by footnote 4.

⁸ Included with "Metals undistributed."

⁹ 1960, uranium ore.

¹⁰ Comprises value of items that cannot be disclosed: Cobalt, columbium-tantalum concentrate (1967), magnesium chloride for magnesium metal, manganiferous residuum, platinum-group metals (crude), rare-earth metal concentrates, titanium concentrate (rutile) (1965-1968), zirconium concentrate, and values indicated by footnote 7.

No. 1027. STRATEGIC AND CRITICAL MATERIALS INVENTORY: 1960, 1965, AND 1969

[In millions of dollars. As of December 31. Covers strategic and critical materials essential to military and industrial requirements in time of national emergency. Market values are estimated current trade values of similar materials and not necessarily amount that would be realized at time of sale]

INVENTORY	1960		1965		1969	
	Acquisition cost	Market value	Acquisition cost	Market value	Acquisition cost	Market value
Total	8,969	7,962	8,071	7,843	6,698	7,337
On order.....	428	413	38	39	84	114

51 Miscellaneous nonmetallic minerals ¹¹	481	24	63	453	5	28	78

² Less than 500, 500,000, or \$500,000.¹ Gross earnings paid to all employees on payroll.³ Computed by subtracting cost of supplies, minerals received for preparation, purchased fuel and electric energy, contract work, and purchased machinery from the value of shipments and capital expenditures.⁴ Excludes all single-unit establishments without paid employees, which, in 1963, accounted for approximately 3 percent of value added.⁵ Excludes proprietors and firm members of unincorporated concerns.⁶ Represents employees up through the working foreman level engaged in manual work. Includes development and exploration workers.

SUMMARY: 1958, 1963, AND 1967

"N.e.c." means not elsewhere classified. See also *Historical Statistics, Colonial Times to 1967*, series M 1-12

¹ Excludes paid vacations, holidays, and sick leave; includes actual overtime hours (not straight-time equivalent).

² Represents value of shipments of primary and secondary products of the industry and amount received for services performed for other establishments on a contract, fee, or other basis.

³ Not strictly comparable with data for earlier years because of change in reporting procedures for crude petroleum and natural gas companies. ⁴ Excludes Alaska and Hawaii.

⁵ Excludes data for dimension stone quarries operated in conjunction with dressing plants.

⁶ Excludes data for mining included in establishments classified in manufacturing industries.

Section 27

Construction and Housing

This section presents data on the construction industries and on various measures of construction activity and costs; housing units, values, facilities, and structural characteristics; residential financing; and urban renewal.

The principal source of these data is the Bureau of the Census, which issues the monthly *Construction Reports* series (see below); the *Current Housing Reports* series, which comprises the quarterly *Housing Vacancies* and the irregularly-issued *Housing Characteristics*; and various reports of the censuses of housing and of construction industries. It also provides many of the data published by the Business and Defense Services Administration in the monthly *Construction Review*, which brings together the major construction statistics series compiled by the Federal Government and also some series from private agencies. Other sources include the monthly *Dodge Construction Contract Statistics Services* of F. W. Dodge Division, McGraw Hill Information Systems Company, New York, N.Y., which presents State data on construction contracts; and the *Statistical Yearbook* of the Department of Housing and Urban Development.

Construction.—The 1967 Census of Construction Industries covered construction establishments as defined in the *Standard Industrial Classification Manual* issued by the Bureau of the Budget. A construction establishment was defined as a relatively permanent place of business where the usual business activities related to construction were conducted. Reports were required from all establishments with a payroll equivalent of 10 or more employees and all establishments operated by multi-establishment companies. Data for single unit companies with a payroll equivalent of less than 10 employees were estimated on the basis of a probability sample survey. In addition, limited data for more than 400,000 construction establishments without payroll were developed from Government administrative records.

Current construction statistics compiled by the Bureau of the Census appear in the *Construction Reports* series. Monthly statistics supplemented by additional quarterly or annual data are published in reports with the following subtitles: *Housing Starts*, presenting data on the start of construction by type of unit; *Sales of New One-Family Homes*, which includes data also on homes available for sale; *Value of New Construction Put in Place*, which also includes monthly composite construction cost indexes and an annual price index for new one-family homes sold; and *Housing Authorized by Building Permits and Public Contracts*, which covers approximately 13,000 permit-issuing jurisdictions in the United States. Statistics on expenditures by owners of residential properties are issued quarterly in *Expenditures on Residential Additions, Alterations, Maintenance and Repairs*, and *Replacements* and annually in *Residential Alterations and Repairs*. Historical data on housing starts and building permits appear in *Housing Construction Statistics, 1899 to 1964*.

Housing.—From 1850 through 1930, the Bureau of the Census collected some housing data in conjunction with censuses of population and agriculture. Beginning in 1940, censuses of housing have been taken at 10-year intervals. The 1960 census provided data on occupancy and structural characteristics, condition, plumbing facilities, equipment, fuels, financing, and components of inventory change. Data from the 1970 census were not available in time for inclusion in this book.

Estimates based on evaluation studies of the 1950 and 1960 censuses indicate a net undercount of about 2.3 percent for occupied housing units in 1950 and about 2.0 percent in 1960. The estimates for 1950 and 1960 are not strictly comparable due to differences in timing, procedures, and other factors. The data have not been adjusted to reflect the estimated undercount.

Housing units.—In general, a housing unit is a group of rooms or a single room occupied or intended for occupancy as separate living quarters, that is, the occupants do not live and eat with any other persons in the structure, and there is either (1) direct access from the outside or through a common hall, or (2) a kitchen or cooking equipment for the exclusive use of the occupants. Transient accommodations, barracks for workers, and institutional-type quarters are not counted as housing units.

Residential financing.—The Bureau of the Census began collection of detailed statistics on residential mortgages in 1890. In the 1920 and 1940 censuses, mortgage questions were asked of owners who occupied their own homes. In 1950, the census included a separate survey covering nonfarm residential mortgaged properties, both owner and renter. As part of the 1956 National Housing Inventory, data were collected on the financing of owner-occupied nonfarm properties. In 1960, the Residential Finance Survey covered financing of both home owner and rental properties and characteristics of nonmortgaged as well as mortgaged properties.

Data on home mortgages and foreclosures, based largely on reports from major holders, are provided by the Federal Home Loan Bank Board. The Federal Housing Administration and the Veterans Administration compile data from their records on various aspects of home financing.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

¹ Not available; estimate included in totals.

² Beginning 1965, new series, essentially comparable in level with old series. See *Construction Reports* C30-60S.

³ Excludes building by privately owned public utilities.

⁴ Includes construction with REA funds.

⁵ Through 1955, includes local transit.

⁶ Beginning 1965, new series for State and local component of public construction. New and old series essentially comparable in level for total but not for most individual categories. See *Construction Reports* C30-60S.

⁷ Prior to 1965, excludes military buildings.

Source: Dept. of Commerce, Bureau of the Census; *Construction Reports*, Series C30.

No. 1069. VALUE OF NEW CONSTRUCTION IN 1957-59 PRICES, AND INDEX OF PHYSICAL VOLUME: 1950 TO 1969

[In millions of dollars. Prior to 1960, excludes Alaska and Hawaii. For description and computation of the various indexes used in the derivation of constant values, see source. Represents value of construction put in place. For 1946 to 1961 see Department of Commerce, Bureau of the Census, *Construction Reports* C30-61 (Supplement). For 1915 to 1945, see *Historical Statistics, Colonial Times to 1967*, series N 29-54]

NA Not available. ¹ Includes value of site.

² Covers materials incorporated as integral part of a building or normally installed during construction and not readily removable. Excludes consumer durables, such as kitchen ranges, refrigerators, etc. Beginning 1965, applies to Alaska and Hawaii. Source: Dept. of Labor, Bureau of Labor Statistics, unpublished data.

³ Based on minimum wage rates agreed upon through collective bargaining; excludes overtime. As of July 1. Source: Dept. of Labor, Bureau of Labor Statistics. (Bulletin No. 1668, *Union Wages and Hours: Building Trades*, 1969.)

⁴ Covers both building and nonbuilding construction, excluding maintenance and repair. Represents a weighted average of various indexes used for different types of construction.

⁵ Based on average contract unit bid prices for composite mile (involving specific average amounts of excavation, paving, reinforcing steel, structural steel, and structural concrete).

⁶ Average for 30 cities of 4 types of buildings: Wood-frame, brick-wood frame, brick-steel frame, and reinforced concrete. Covers materials and labor costs in structural portion of buildings but excludes those for plumbing, heating, lighting, sprinklers, and elevators. Reflects employee-benefit costs, and allows for contractors' overhead and profit.

⁷ Covers building and nonbuilding construction. Wages and materials for 12 cities combined in 40-60 ratio. Wages are for hod carriers and common laborers only. Materials weighted: Sand, gravel, crushed stone, cement, common brick, lumber, hollow tile, and structural and reinforcing steel. Excludes taxes and employee-benefit costs.

⁸ Average of 20 cities for types shown. Weights based on surveys of building costs. Wage rates used for both common and skilled labor. Reflects payment of sales taxes and social security payroll taxes. Unweighted averages from Boeckh series prepared by Bureau of the Census.

⁹ Building construction index computed on basis of hypothetical unit of construction requiring 6 bbl. of portland cement, 1,088 M bd. ft. of 2" x 4" lumber, 2,500 lb. of structural steel, and 88.38 hours of skilled labor. General construction index based on same materials components combined with 200 hours of common labor.

¹⁰ Composite of 36 major cost elements in 3 commercial-type buildings including structural elements and elevators, wiring, plumbing, heating, and ventilating. Covers skilled and unskilled labor and reflects employee-benefit costs.

¹¹ Eastern cities. Based on firm's cost experience with respect to labor rates, materials prices, competitive conditions, efficiency of plant and management, and productivity. Reflects payment of sales taxes and employee-benefit costs.

¹² Based on data covering public utility construction costs for 95 items in 6 geographic regions. Covers skilled and common labor; does not reflect tax payments nor employee-benefit costs.

¹³ As derived by Bureau of the Census; covers steam production plants only; excludes hydraulic plants.

No. 1085. FIRST AND SECOND HOMES: 1967

[In thousands, except as indicated. As of April. Based on sample of households. A second home is a residence other than the one where the household usually lives, which was owned or rented by the household for the entire year. The home must have been reserved for the occasional use of the owner during the entire year. Includes homes shared with co-owners or co-renters. Excludes homes outside the United States, those used for income and investment purposes only, trailers, tents, etc]

ITEM	Total	Percent	ITEM	Total	Percent
Number of households	58,345	100.0	Second homes, total	1,547	100.0
First homes:			Owned	1,496	96.7

No. 1086. MOBILE HOMES AND TRAVEL TRAILERS—MANUFACTURERS' SHIPMENTS: 1960 TO 1970

[A mobile home, or housing-type trailer, is a vehicular portable structure built on a chassis and designed to be used without a permanent foundation as a year-round dwelling when connected to utilities. Mobile homes are defined as units 20 feet or longer and weighing over 4,500 pounds; travel trailers, as units less than 20 feet long, regardless of weight, or weighing less than 4,500 pounds, regardless of length. Excludes units designed for commercial uses, pickup cabs, folding campers, and amphibious units]

No. 1087. VACANCY RATES—INSIDE AND OUTSIDE STANDARD METROPOLITAN STATISTICAL AREAS, AND REGIONS: 1960 TO 1970

[In percent. Annual averages, except as indicated. Based on Current Population Survey; see text, p. 1. Rental rate is relationship between vacant housing for rent and the total rental supply, which comprises renter-occupied units, vacant units already rented and awaiting occupancy, and vacant units available for rent. Homeowner rate is relationship between vacant housing for sale and the total home-owner supply, which comprises owner-occupied units, vacant units already sold and awaiting occupancy, and vacant units available for sale. For composition of regions, see fig. I, p. xii; for definition of standard metropolitan statistical areas, see text, p. 2; covers 212 SMSA's as constituted in 1960]

					Rehabilitation:				
					With ⁸	23.7	12.4	2.9	8.4
					Without.....	55.1	36.3	(x)	18.8

X Not applicable. ¹ Occupied or available for occupancy.

² Comprises units to be constructed and units that will go directly into "under management" category because they need no rehabilitation. ³ Excludes units which have been sold to mutual housing associations, limited dividend corporations (PWA), and homestead associations on which HUD has mortgages for collection.

⁴ Covers units designed specifically for persons 62 years old or over, disabled, or handicapped.

⁵ New housing constructed on the Local Housing Authority (LHA) site pursuant to a contract let by the LHA.

⁶ New housing purchased by the LHA from a private developer upon completion of construction pursuant to an earlier agreement. ⁷ Existing housing acquired by the LHA, requiring substantial rehabilitation which can be done either by the LHA (conventional) or by the seller (turnkey). ⁸ Existing housing leased by the LHA from an owner under a contract permitting the LHA to sub-lease the units.

NA. Not available.

¹ Statistics on the number of occupied units are essentially comparable although identified by various terms—the term “family” applies to figures for 1930 and earlier; “occupied dwelling unit,” 1940 and 1950; and “occupied housing unit,” 1960. For 1890, 1910, and 1920, includes the small number of quasi-families; 1900 and 1930 represent private families only.

² Total population, which includes the population in group quarters and quasi-family groups, divided by the number of occupied units. This concept was used for consistency; population counts exclusive of persons in group quarters and quasi-family groups are not available for some of the census years.

³ Includes Alaska and Hawaii.

⁴ Not comparable with data for earlier censuses because of a basic change in definition of farm residence. See text, p. 2.

⁵ For 1890 to 1920, includes a small proportion of urban-farm families in addition to rural-farm.

Source: Dept. of Commerce, Bureau of the Census; *U.S. Census of Housing: 1960*, and unpublished data.

Section 28

Manufactures

This section presents measures of the manufacturing segment of the economy and its component inputs and outputs. The input data include figures for establishments; employment and wages; raw materials, fuels, and electricity consumed; plant and equipment expenditures; and water use. The output data include figures for value and quantity of production and shipments; and value added by manufacture. Both types of data are shown for manufacturing as a whole, for major product groups, and for specific selected products.

The principal sources of these data are the Bureau of the Census reports of the quinquennial Census of Manufactures; the *Annual Survey of Manufactures*; and the *Current Industrial Reports* series, which presents monthly, quarterly, or annual data on production, shipments, and stocks for particular commodities. Indexes of industrial production are presented monthly in the Federal Reserve Board's *Federal Reserve Bulletin*. Reports on current activities of industries, or current movements of individual commodities, are also compiled by such government agencies as Bureau of Labor Statistics, Statistical Reporting Service of the Department of Agriculture, Business and Defense Services Administration, Fish and Wildlife Service, Tariff Commission, and Internal Revenue Service; and by private research or trade associations such as the American Iron and Steel Institute, The National Cannery Association, and the National Association of Hosiery Manufacturers.

Data on financial operations and intercorporate relations of manufacturing corporations are collected from time to time by the Securities and Exchange Commission, the Tariff Commission, and the Federal Trade Commission. Financial statistics for certain manufacturing industries in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and amounts of security issues are summarized and published for the leading corporations registered with the Securities and Exchange Commission. The Tariff Commission publishes commodity surveys which cover economic and competitive aspects of production, distribution, and international trade in selected important industries. The Federal Trade Commission has made several comprehensive studies of individual industries.

Censuses and annual surveys.—The first Census of Manufactures covered the year 1809. Thereafter, a census was taken at 10-year intervals to 1899, with the exception of 1829. It was conducted at 5-year intervals from 1904 through 1919, and at 2-year intervals from 1921 through 1939. It was suspended during the World War II period until the 1947 census. Thereafter, censuses were taken covering 1954, 1958, 1963, and 1967.

The *Annual Survey of Manufactures*, conducted for the first time in 1949, carries forward, for the intercensal years, measures of manufacturing activity covered in detail by the quinquennial Census of Manufactures. It provides statistics on employment, payrolls, value added by manufacture, inventories, and new capital expenditures for industry groups, individual industries, geographic divisions, States, and large standard metropolitan statistical areas.

The most recent annual survey is based on a sample of about 65,000 of an approximate total of 300,000 manufacturing establishments. It comprises all large plants, which account for approximately two-thirds of total manufacturing employment in the United States, and a representative selection of the more numerous small plants. Government-owned and -operated establishments are excluded.

Establishments and classification.—The Census of Manufactures for 1947 through 1963 covered operating manufacturing establishments as defined in the *Standard*

Industrial Classification Manual issued by the Bureau of the Budget. The 1967 edition of the *Manual* was used for the 1967 census. Reports were required from all establishments employing one or more persons at any time during the census year. In the 1957 census, reports were required only from establishments with 10 or more employees and establishments operated by multi-establishment companies. Data for single unit companies with less than 10 employees were estimated on the basis of Government administrative records and industry averages. Each of the establishments tabulated was classified in one of the more than 400 manufacturing industries as defined by the Standard Industrial Classification system. This system defines an industry as a number of establishments producing a single product or a closely related group of products. An establishment is classified in a particular industry if its production of this product or product group exceeds in value its production of any other product group. In a few instances, the industry classification of an establishment is determined not only by its product group but also by the processes employed in making the products.

Final reports of the 1958 Census of Manufactures present data based on the classifications in the 1957 edition of the *Standard Industrial Classification Manual* and include 1954 data converted to the same basis. Selected industries were reclassified for the 1963 census. Wherever possible, the corresponding 1958 data were revised to a comparable basis. Because of the revisions in classification, 1954, 1958, 1963, and 1967 census data for some industries and industry groups are not comparable with figures for prior years.

While some establishments produce only the products of the industry in which they are classified, it rarely happens that all the establishments in an industry specialize to that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect not only the primary activities of the establishments in that industry but also activities of a secondary nature. For this reason the industry statistics usually cannot be directly related to statistics on the total shipments of products primary to the industry.

The censuses for 1947 through 1967 were conducted on an establishment basis. The term "establishment" signifies a single physical plant site or factory. It is not necessarily identical with the business unit or company, which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payroll and inventory records is also required to submit separate reports.

The basic statistical measures of manufacturing activity, such as employment, payrolls, value added, etc., are defined in essentially the same way for the annual surveys as for the Census of Manufactures. Consequently, these series may be considered comparable, except for the changes brought about by the revisions in the industry classification system noted above. However, beginning with 1949, average employment was calculated from the figures reported for the pay periods ending nearest the fifteenth of March, May, August, and November, whereas for 1947 such averages were based on 12 monthly employment figures. In 1967, the average employment calculation was revised to the pay periods which include the 12th of March, May, August, and November in order to provide data more comparable with other statistical series. The 1954 figures are an average of reported employment totals for the four specified months, except for highly seasonal industries, where a 12-month average was obtained. For 1958 and later censuses, averages of production workers for the four specified months plus the March figure for "all other employees" were used for all industries.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

Technical Note—Annual Survey of Manufactures

The annual survey estimates vary from the totals that would have been obtained from a complete canvass of all manufacturing establishments. The relative magnitude of this sampling variation, or "Standard error, is given in tables where applicable." It should be interpreted to mean that the sample estimates will differ from complete canvass totals by *less than*: (1) The percentage shown in approximately 2 cases out of 3; (2) twice the percentage shown in approximately 19 cases out of 20; and (3) three times the percentage shown in almost every case. It should be noted that standard errors are shown only for selected items. The standard errors of other measures are usually of the same general magnitude.

In making any study of the trend, it is important to take account of the effect of the sampling variation on the apparent increase or decrease shown between years. In addition to sampling errors, individual figures may be subject to biases arising from undetected response or procedural errors which are not reflected in the "standard errors." Figures are enclosed by parentheses in the original source volumes if (1) the standard error of the estimate exceeds 15 percent, or (2) survey estimates are inconsistent with other census series and related data. Any estimate which can be derived by subtraction of one published figure from another may have a standard error considerably in excess of 15 percent.

No. 1111. MANUFACTURES—SUMMARY: 1947 TO 1968

[Prior to 1958, excludes Alaska and Hawaii. Except as noted, figures are estimates based on sample; see text, pp. 692-695. Covers all establishments employing 1 or more persons at anytime during year. See also *Historical Statistics, Colonial Times to 1957*, series P 1-8]

NA. Not available. ¹ Census data. ² Includes administrative offices and auxiliary units.

³ Includes data for employees of manufacturing establishments engaged in distribution and construction work. Beginning 1950, includes administrative offices, and units auxiliary to manufacturing.

⁴ Data for all industries in 1950, and for most industries in 1954, are based on pay periods ending nearest 15th of March, May, August, and November. For 1947, and industries of a seasonal type in 1954, data represent average of 12 monthly figures.

⁵ Unadjusted through 1950; thereafter, adjusted. For definitions, see footnote 3, table 1122.

⁶ Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification.

⁷ Beginning 1954, includes expenditures for plants under construction and not yet in operation.

¹ Sum of State totals may not add to U.S. total because figures were independently derived.² Includes central administrative offices and auxiliary units.³ Includes employment and payroll at administrative offices and auxiliary units.⁴ "Production workers" represents the average of the employment for the payroll periods ended nearest the 15th of March, May, August, and November. "All employees" represents the average of "production workers" plus all other employees for the payroll period ended nearest the 15th of March.⁵ For definition, see footnote 2, table 1119.

Manufactures, by States

50 Costume jewelry and notions.....	396	56	194	338	1,929	63	214	415
51 Misc. manufactures (including ord- nance) ⁶	399	319	1,834	2,909	6,848	379	2,606	4,169
52 Administrative and auxiliary ^{7 10}	(X)	602	4,474	(X)	5,304	726	6,615	(X)

X Not applicable. ¹ Standard Industrial Classification code.² "All employees" represents the average of "production workers" plus all other employees for the payroll period ended nearest the 16th of March.³ Value of shipments less cost of materials, supplies, containers, fuels, purchased electricity, and contract work, plus net change in finished goods and work-in-process inventory, and value added in merchandising activities of manufacturing establishments. For 1958, breakdown does not add to total because of exclusion of selected industries for Alaska and Hawaii in order to avoid disclosure.⁴ Includes extensive duplication arising from shipments between establishments in the same industry classification.⁵ Includes expenditures for plants in operation and plants under construction but not yet in operation.

FOR INDUSTRY GROUPS: 1958, 1963, AND 1967—Continued

⁶ Value of production. The formula for computing adjusted value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

⁷ Beginning 1963, not strictly comparable with data for 1958 due to difference in coverage.

⁸ 1967 data not strictly comparable with data for earlier years due to difference in coverage.

⁹ Includes privately owned and/or operated establishments classified in "Ordnance and accessories." Excludes Government-owned and operated equipment.

¹⁰ Manufacturing concerns often reported separately for central offices or auxiliaries which serve the manufacturing establishments of a company, rather than the general public. Separate reports were obtained from such units if at a different location or if they serviced more than one establishment.

No. 1120. MANUFACTURERS' SHIPMENTS, INVENTORIES, AND ORDERS: 1954 TO 1969

[In billions of dollars, except ratios. Prior to 1960, excludes Alaska and Hawaii. As of December 31 or calendar year, as applicable. Data include manufacturing activities of all companies. See *Historical Statistics, Colonial Times to 1957*, series T 378-386, for related but not comparable data]

¹ Excludes administrative offices and auxiliary units.

² Preliminary 1967 data as follows: Establishments, 306; employees, 18,870; payroll, \$123,256; value added by manufacture, \$259,301; and capital expenditures, new, \$20,231. Breakdown not available.

³ Individual size-class data do not add to total because they were derived from separate tabulations.

⁴ For 1954, 1958, and 1963, represents adjusted value added and, for 1947, unadjusted value added. Unadjusted value added is obtained by subtracting cost of materials, supplies, containers, fuel, purchased electric energy, and contract work from value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year.

No. 1124. PERCENT OF SHIPMENTS ACCOUNTED FOR BY LARGE MANUFACTURING COMPANIES, SELECTED INDUSTRIES: 1947, 1958, AND 1966

[Prior to 1966, excludes Alaska and Hawaii. First 50 industries as determined by value of shipments in 1966. Industry codes and descriptions are based on the 1957 *Standard Industrial Classification Manual* (SIC) as modified in 1963. Determination of company affiliation of establishments is based on census reports and publicly available records. Value of shipment totals for establishments have been summarized into company totals in each manufacturing industry. "Largest" companies are determined by each company's value of shipments in the specified industry. Industries in the "not elsewhere classified" category are omitted, regardless of their value of shipments]

D. Withheld because of change in method of valuation of shipments.

NA. Not available. X. Not applicable.

¹ Standard Industrial Classification code. ² Comprises, for all manufacturing establishments classified in an industry, (a) value of products "primary" to the industry, (b) value of "secondary" products, which are primary to other industries, (c) "miscellaneous receipts" such as those for contract and commission work on materials owned by others, scrap and salable refuse, repair, etc., and (d) value of resales, i.e., products resold in the same condition as bought. ³ Value added by manufacture used as basis for computing percentages because value of shipments data (used for ranking) contain substantial duplication. For 1966, value added is adjusted; for prior years, unadjusted. ⁴ For 1947, based on combined figures for following industries: 3311, Blast Furnaces; 3312, Steelworks and Rolling Mills; 2831, Beehive Coke Ovens; and 2932, Byproduct Coke Ovens.

⁵ A number of small establishments was misclassified into this industry affecting the number of companies, but having no appreciable effect on value or percentage of shipments. ⁶ For 1963. ⁷ Value of production. Includes value of primary and secondary products made, miscellaneous receipts such as contract and commission work on materials owned by others, scrap and other salable refuse, and value of products bought and resold in same condition. For 1958, excludes resales. ⁸ Includes foundries producing gray-iron castings for other plants of the same company. Accordingly, percentages do not reflect market shares in industry as such. ⁹ For 1947 and 1958, value of production; does not affect significantly comparability with 1966.

² Less than 0.01 percent. ¹ Barrels of 31 wine gallons (see footnote 10).

³ Based on Bureau of the Census estimated population 18 years old and over, as of January 1, including Armed Forces abroad. Prior to 1960, excludes Alaska and Hawaii. Source: Dept. of Commerce, Business and Defense Services Administration.

⁴ Prior to 1960, represents registered distilleries, fruit distilleries, and industrial alcohol plants. In some instances a plant was operated at different times in more than one of these categories and was counted in each.

⁵ Prior to 1960, represents internal revenue bonded warehouses and industrial alcohol bonded warehouses.

⁶ Prior to 1960, net production obtained by deducting total products used in redistillation from gross production of neutral product (spirits); thereafter, each kind of distilled spirits used in redistillation was deducted from gross production of same kind. ⁸ Excludes alcohol produced for industrial use.

⁷ A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon; for spirits of less than 100 proof, to the wine gallon. (See footnotes 8 and 10.) ⁹ A proof gallon is the alcoholic equivalent of a U.S. gallon at 60° F, containing 50 percent of ethyl alcohol by volume. ¹⁰ Includes ethyl alcohol.

¹¹ A wine gallon is the U.S. gallon, equivalent to the volume of 231 cubic inches. ¹² Production represents total amount removed from fermenters, including distilling material, and beginning 1969, includes increase after fermentation (by amelioration, sweetening, and addition of wine spirits). In 1969, 368,067,164 gallons of distilling materials were produced.

¹³ Includes special natural wines. ¹⁴ Excludes distilling materials.

¹⁵ Includes champagne, other effervescent wines, and artificially carbonated wines.

Source: Treasury Dept., Internal Revenue Service (except as noted); annual report, *Alcohol and Tobacco Summary Statistics*.

No. 1130. DENATURED ALCOHOL: 1950 TO 1969

[For years ending June 30. Excludes Alaska; includes Puerto Rico]

ITEM	1950	1955	1960	1965	1968	1969
Alcohol produced ¹	313,535	411,840	518,724	658,641	670,071	730,647
Denaturing facilities operated.....	46	46	38	46	48	50
Specialty denatured alcohol:						
Dealers operating.....	35	35	43	43	47	44
Users operating.....	4,178	3,930	3,599	3,564	3,418	3,279
Ethyl alcohol used for denaturation ²	322,837	395,334	520,512	580,137	542,590	608,947
Denatured alcohol produced, total.....	174,674	213,229	279,726	311,778	292,926	320,842
Completely denatured.....	4,414	575	679	2,195	2,022	2,229
Specialty denatured.....	170,260	212,654	279,047	309,583	290,904	324,613

¹ Represents alcohol and spirits, 190 proof and over, produced at distilled spirits plants.

² Represents all products (except rum) used for denaturation, that is, domestic ethyl alcohol, imported ethyl alcohol, and spirits.

- Represents zero. Z Less than 0.05.

¹ Reported by Bureau of the Census. For American cotton, tare as reported by Crop Reporting Board deducted. For foreign cotton, 15 pounds deducted (20 pounds beginning August 1968).

² Reported by Bureau of the Census. Beginning 1950, excludes consumption in cotton and other spinning systems and consumption in batting and felt manufacture.

³ From *Textile Organon*. Represents domestic shipments plus imports for consumption. Includes textile glass-fiber. Beginning 1935, includes producers waste consumed at mills.

⁴ Through 1950, represents imports for consumption reported by Bureau of the Census plus estimated production reported by (a) Bureau of Plant Industry through 1945 and (b) Portland, Oreg., Office of Agricultural Marketing Service for 1950; beginning 1955, imports for consumption reported by Bureau of the Census.

⁵ Compiled from reports of Bureau of the Census. For 1930, general imports less reexports; beginning 1935, imports for consumption.

Source: Dept. of Agriculture, Economic Research Service; unpublished data. (Through 1950, in Dept. of Commerce, Business and Defense Services Administration; *Wool and Man-Made Fibers in the United States*.)

No. 1132. COTTON—SPINDLES, CONSUMPTION, AND STOCKS: 1930 TO 1969

[For years ending July 31. Excludes Alaska and Hawaii. Consumption and stocks are expressed in running bales, counting round as half bales, except foreign cotton for all years which is in equivalent 500-pound bales. See *Historical Statistics, Colonial Times to 1957*, series P 197, for total cotton consumed including linters]

YEAR	COTTON-SYSTEM SPINDLES (1,000)				Spindle hours consuming 100% cotton (billions)	COTTON CONSUMED, EXCLUDING LINTERS ³ (1,000 bales)			STOCKS AT END OF YEAR ⁴ (1,000 bales)

¹ Prior to 1950, represents all spindles in place used exclusively for spinning cotton; thereafter, represents all spindles in place regardless of fiber spun.

² Prior to 1950, represents sum of greatest number of cotton spindles reported by each mill as active at any time during year, regardless of length of time operated; thereafter, comprises cotton-system spindles active last day of year, regardless of type of fiber spun. On Aug. 2, 1969, there were 12,358,000 spindles active on cotton, 6,993,000 on synthetics and other fibers and blends, and 499,000 idle.

³ Includes foreign and domestic cotton.

⁴ Cotton stocks prior to 1940 and linters stocks for all years are stocks held by consuming establishments. Beginning 1940, cotton stocks include stocks at public storage and compresses.

Manmade fiber fabrics and silk ²	311	389	302	438	549	645	631

¹ Excludes finished fabrics not bleached, dyed, or printed at reporting establishment (flameproofed, sanforized, mildew-proofed, mercerized, embossed, flocked, moired, plisse, schreinerized, etc.) which were reported as 126 million finished linear yards of cotton fabric for 1967 and 126 million for 1968; 60 million finished linear yards of manmade fabrics for 1967 and 68 million for 1968.

² Comprises fabrics made of rayon, acetate, nylon, silk, glass, acrylic fibers, etc. ³ Separate data for bleached and plain dyed manmade fibers not collected. For 1965 through 1968, respectively, combined totals, in millions of linear yards, were 9,076, 9,015, 8,738, and 8,873, of which synthetics represented 2,840, 3,017, 3,138, and 3,638.

⁴ Includes roller, screen, and block printed fabrics; excludes printed towels, tablecloths, etc., flock, plisse, moire, or embossed.

Sulfuric acid, gross (100% H ₂ SO ₄) ¹⁴	1,000 sh. tons	13,029	17,853	25	29	29
Titanium dioxide (composite and pure) (100% TiO ₂)	1,000 sh. tons	299	456	577	624	654

NA Not available. ¹ Excludes quantities of acetylene produced and consumed by railroad shops, shipyards, and small establishments using portable generators.

² Excludes quantities produced and consumed by municipalities.

³ Excludes byproduct coke-oven production.

⁴ Includes data for decolorizing and water purification grades only.

⁵ Excludes quantities produced and consumed in plants manufacturing soda ash or urea.

⁶ Total production, including quantities liquefied for use, storage, or shipment.

⁷ Beginning 1960, excludes quantities produced and consumed in manufacture of methanol and ammonia, produced by ammonia dissociation process, or disposed of as waste, e.g., vented, used as fuel, etc. Beginning 1969, excludes amounts of hydrogen produced in petroleum refineries for captive use.

⁸ Ammonia soda and caustic carbonation processes.

⁹ Includes quantities used to manufacture caustic soda, sodium bicarbonate, and finished light and dense soda ash.

¹⁰ Excludes quantities converted to finished dense soda ash.

¹¹ Collected by or in cooperation with Bureau of Mines.

¹² Prior to 1960, includes amounts produced and consumed in making meta-, ortho-, and sesquisilicates; beginning 1960, excludes these amounts. ¹³ Includes Glauber's salt converted to 100% Na₂SO₄.

¹⁴ Includes sulfuric acid of oleum grades.

No. 1154. IRON AND STEEL—AGGREGATE EXPORTS OF SELECTED ITEMS: 1940 TO 1969

[Quantities in thousands of short tons; values in millions of dollars. Includes exports of Puerto Rico to foreign countries. Includes ferromanganese. Excludes steam and hot water heating boilers and radiators. Includes shipments under foreign aid programs; beginning 1950, also includes civilian supply shipments. Beginning 1952, quantity figures exclude, but value figures include, data for wire cloth and other items for which quantities were not reported]

YEAR	Quantity	Value	YEAR	Quantity	Value	YEAR	Quantity	Value
1940	11,876	524	1956	11,574	1,281	1963	9,208	1,046
1945	5,203	461	1957	13,657	1,623	1964	12,051	1,317

No. 1162. MACHINE TOOLS (METAL CUTTING AND METAL FORMING)—SHIPMENTS, BY MAJOR TYPES: 1955 TO 1968

[Value in millions of dollars. 1955 excludes Alaska and Hawaii. Includes light type machine tools, particularly in drilling machines, lathes, grinding and polishing machines, and milling machines. Excludes machine tools specifically designed for home workshops, model makers, garages, and service shops]

Section 29

Distribution and Services

This section presents statistics relating to retail, wholesale, and service trades. Data shown for the distribution trades, classified by kind of business, and for the various categories of services (personal, business, repair, amusement, hotel, etc.) cover sales or receipts, establishments, employees, payrolls, proprietors, and other items. Also included are several tables on advertising expenditures.

The principal sources of these data are the reports of the Census of Business and of annual and monthly surveys conducted by the Bureau of the Census. Data on retail sales, wholesale inventories and sales, consumer expenditures for services, etc. appear in the monthly *Survey of Current Business*, issued by the Office of Business Economics. Financial data for tax-filing and securities-listed corporations engaged in retail, wholesale, or service trades, and for sole proprietorships and partnerships similarly engaged, appear in the annual *Statistics of Income*, published by the Internal Revenue Service, and are also available from the Securities and Exchange Commission. The Federal Trade Commission, in the course of its investigations, collects operating statistics on firms and chains in various kinds of business.

Censuses and current surveys.—Censuses of business have been taken at intervals since 1929. Present legislation provides for a quinquennial census to be conducted for years ending in "2" and "7." Data from the 1967 census on establishments, sales or receipts, personnel, and payroll are available in a series of State reports.

Current sample surveys conducted by the Bureau of the Census cover various aspects of the retail, wholesale, and service trades. Estimates of weekly sales in retail stores are shown for the United States, by kind of business, in the Bureau's *Weekly Retail Sales Report*. Its *Monthly Retail Trade Report* contains monthly estimates of sales and end-of-month accounts receivable of all retail stores and of retail organizations operating 11 or more stores, United States, by kind of business. Also included are monthly retail sales data for census regions and divisions, 15 large States, and 20 large standard metropolitan statistical areas. Annual figures on sales, sales-stock ratios, and year-end inventories and accounts receivable data, classified by kind of business, are presented in the *Annual Retail Trade Report*.

Statistics from the Bureau's monthly wholesale trade survey include merchant wholesalers' sales and inventories and stock-sales ratios by kind of business, United States, as well as sales and inventory trends by kind of business and by geographic divisions. Monthly sales estimates are also shown by geographic divisions for the summary groups—durable goods trades, nondurable goods trades, and all trades combined. These data, based on reports submitted by a sample of firms representing merchant wholesalers in all kinds of business, appear in the *Monthly Wholesale Trade Report*. The monthly *Selected Services Receipts Report* provides monthly estimates of receipts for six major kinds of business groups for the United States as a whole. The monthly retail, wholesale, and service trades data are adjusted by the Bureau of the Census for seasonal variations and, in the case of sales, also for trading day differences. These data are also published in the *Survey of Current Business*.

The Bureau of the Census issues a quarterly report on green coffee inventories in the United States as well as total coffee roastings and roastings for soluble use. The Bureau's *Canned Food Report*, issued five times a year, provides canner and distributor stocks of various canned foods as well as canners' data on pack and shipments.

Estimates obtained from annual and monthly surveys are based on sample data and are not expected to agree exactly with results that would be obtained from a complete census of all establishments. Measures of sampling variability, shown in the source reports, exclude biases arising from differences of response or from nonreporting.

Establishments and coverage.—The business establishments covered in the Census of Business are classified into 3 groups as follows: (1) *Retail trade*, places of business primarily engaged in selling merchandise for personal, household, or farm consumption; (2) *Wholesale trade*, establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business uses; and (3) *Selected services*, establishments engaged primarily in the sale of services as contrasted with the sale of merchandise. Figures for establishments refer to those in business at the end of the year.

The Census of Business excludes the activities of doctors, dentists, and others performing a professional or scientific service except that law firms, architects, and engineers were covered in the 1967 census. Also excluded are educational institutions; religious or charitable institutions; hospitals and infirmaries; public utilities; and Government-operated enterprises, except wholesale and retail liquor operations.

Data from the 1958 census exclude retail and service nonemployer establishments which had receipts of less than \$2,500 and \$1,000, respectively. In the 1963 and 1967 censuses, nonemployer establishments which did not operate the entire year were included if, during the period they operated, their receipts were at a rate which would have reached the annual totals specified had they operated the entire year. Wholesale trade establishments with no paid employment are excluded.

Advertising.—The statistics on advertising expenditures are compiled by private organizations. McCann-Erickson, Inc., which compiles certain of the data shown, defines national advertising as the advertising done for companies whose products are distributed nationally, and for which national media rates are paid; and local advertising as the advertising done for companies which market their products locally and which may pay special "local" media rates. Monthly figures are published regularly in *Marketing/Communications* and in the *Survey of Current Business*. Total corporate expenditures for advertising, by industry, appear in *Statistics of Income*.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 1202. TELEVISION ADVERTISING—ESTIMATED TIME CHARGES FOR SPOT ADVERTISING: 1969

[In millions of dollars. Spot television advertising, as distinguished from network advertising in table 1203 is defined as any television activity (announcement, identification, participation, or program) sponsored by a national or regional advertiser, and selected and bought on a station-by-station basis. Includes announcements between both network and nonnetwork programs as well as complete programs. Each commercial is locally originated, whereas network programs and commercials are centrally originated. Data represent activity in the 75 markets monitored by Broadcast Advertisers Reports, Inc., covering approximately 260 stations. No attempt has been made to project to the total United States]

Section 30

Foreign Commerce and Aid

This section presents data on the flow of goods, services, and capital between the United States and other countries; changes in official gold reserves of the United States; international investments; foreign assistance programs; and import duties.

The Office of Business Economics publishes current figures on the U.S. balance of payments and international investment position in its monthly *Survey of Current Business*, and on total foreign aid by the Federal Government in its periodic *Foreign Grants and Credits by the United States Government*. Figures for earlier periods are presented in *Balance of Payments—Statistical Supplement*, 1963 revised edition, and in the June issues of the *Survey of Current Business*. Statistics for the foreign aid programs are presented by the Agency for International Development in its quarterly *Operations Report* and annual report, *U.S. Economic Assistance Programs Administered by the Agency for International Development and Predecessor Agencies*, and by the Department of Agriculture in its *Foreign Agricultural Trade of the United States*. Geographic data on foreign income received by U.S. corporations and foreign taxes paid on this income are presented by the Internal Revenue Service in its *Supplemental Statistics of Income* reports.

The principal sources of import and export data are publications of the Bureau of the Census. Current data are presented monthly in Report FT 135, *U.S. Imports, General and Consumption, Schedule A Commodity and Country*; Report FT 410, *U.S. Exports, Schedule B Commodity and Country*; and Report FT 990, *Highlights of U.S. Export and Import Trade*. Historical data appear in *Foreign Commerce and Navigation of the United States*, issued annually through 1946 and resumed, on an annual basis in 1965, with a volume covering the years 1946 to 1963. For a complete list of the Bureau's monthly and annual reports in this field, consult the *Bureau of the Census Catalog* and the *Guide to Foreign Trade Statistics* (issued annually since 1967) which contains sample illustrations of the content and general arrangement of data in individual reports and tabulations. In addition, the Bureau of International Commerce and the Office of Business Economics present summary and selected commodity and country data for U.S. foreign trade in the *Overseas Business Reports* and the *Survey of Current Business*, respectively. The Treasury Department's *Annual Report of the Secretary* contains information on import duties.

International accounts.—The balance of payments table (No. 1205) shows for given time periods the transfer of goods, services, grants, and financial assets and liabilities between the United States and the rest of the world.

The international investment position table (No. 1207) presents for specific dates the value of U.S. investments abroad and of foreign investments in the United States. The movement of foreign and U.S. capital as presented in the balance of payments is not the only factor affecting the total value of foreign investments. Among the other factors are: Changes in the valuation of assets or liabilities, including securities; defaults; expropriations; write-offs; and reinvested earnings of subsidiaries operating abroad and of foreign subsidiaries operating in the United States.

Foreign aid.—Foreign assistance is divided into three major categories—grants (military supplies and services, and other grants), credits, and other assistance (through net accumulation of foreign currency claims from the sale of agricultural commodities). The U.S. Government's capital investments in the international financial institutions constitute an additional measure taken by the Government to promote foreign economic recovery, development, and financial stability.

Grants are transfers for which no payment is expected (other than a limited percentage of the foreign currency "counterpart" funds generated by the grant), or

which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. *Credits* are loan disbursements or transfers under other agreements which give rise to specific obligations to repay, over a period of years, usually with interest. In some instances, assistance has been given with the understanding that a decision as to repayment will be made at a later date; such assistance is included in grants. At such time as an agreement is reached for repayment over a period of years, a credit is established. Such credits cannot, as a rule, be deducted from specific grants recorded in previous periods; an adjustment for grants converted into credits is made at the time of agreement. All known returns to the U.S. Government stemming from grants and credits (reverse grants, returns of grants, and payments of principal) are taken into account in net grants and net credits, but no allowance is made for interest or commissions. *Other assistance* represents the transfer of U.S. farm products in exchange for foreign currencies, (plus, since enactment of Public Law 87-128, currency claims from principal and interest collected on credits extended under the farm products program), less the Government's disbursements of the currencies as grants, credits, or for purchases. The net acquisition of currencies represents net transfers of resources to foreign countries under the agricultural programs, in addition to those classified as grants or credits.

Figures as published in *Foreign Grants and Credits by the United States Government* are not identical with figures shown for Government unilateral transfers and capital in the balance of payments, mainly because of differences in treatment of particular items by the two sets of accounts. Such items include: Contributions to the multilateral construction program of the North Atlantic Treaty Organization; Government investments in certain productive enterprises abroad; Government receipts on funded claims; and net changes in foreign currency holdings resulting from transactions other than those under the farm products program, such as by collection of principal and interest and by purchase for dollars.

The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949. Prior to 1952, economic and technical aid was authorized in the Foreign Assistance Act of 1948, the 1950 Act for International Development, and other legislation which set up programs for specific countries. In 1952, these economic, technical, and military aid programs were combined under the Mutual Security Act, which in turn was followed by the Foreign Assistance Act passed in 1961. Figures on activity under the Foreign Assistance Act as reported in *Foreign Grants and Credits* differ from similar data published by the Agency for International Development or its immediate predecessors due largely to differences in method of reporting, timing, and treatment of particular items.

Exports.—Export data are compiled by the Bureau of the Census from Shipper's Export Declarations which exporters are required to file with customs officials for shipments leaving the United States. Export data include shipments made after World War II under the Department of the Army Civilian Supply Program for 1948 and subsequent years and, in addition, U.S. exports under mutual security programs. They exclude shipments to U.S. Armed Forces for their own use.

Export values are based on the selling price (or on the cost, if not sold) of the commodity shipped and include inland freight, insurance, and other charges to place of export. They exclude transportation and other costs beyond the U.S. port of exportation. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured. In the event the exporter does not have definite information as to the country of ultimate destination for a shipment, it is credited (for statistical purposes) to the country to which it is consigned.

Certain export commodity classifications were grouped for security reasons into special categories beginning with May 1949, with periodic amendments to include additional commodities or to remove commodities from the special category list. With

the adoption of new security regulations, effective July 1950, the publication of the country of destination and customs district detail for the special category commodities and groups was discontinued. Data for special category commodities are included, however, in all total export statistics and, effective January 1967, are also included in totals for individual countries except a few for which security regulations still restrict the release of such information.

The export statistics include estimated data for certain low-valued shipments. From July 1953 through December 1959, a 10-percent sample was used to estimate data for shipments individually valued \$100 to \$499 except for January through June 1956 when shipments valued \$100 to \$999 were sampled. Beginning January 1960, the sample ratio for shipments valued \$100 to \$499 was increased to 50 percent for all countries except Canada. The 10-percent sample for Canada was applied to shipments valued \$100 to \$1,999 from January 1963 through September 1969. For October through December 1969, shipments to Canada valued \$251 to \$1,999 were estimated from a 10-percent sample while shipments to other countries valued \$251 to \$499 were estimated from a 50-percent sample. The statistics also include estimates for shipments valued under \$100 prior to October 1969 and shipments valued under \$251 for October through December 1969, not classified by commodity.

Imports.—Import data are compiled by the Bureau of the Census from import entries (various customs forms) which importers are required to file with customs officials for each shipment arriving. Import values are, in general, based on market or selling price excluding import duties and are f.o.b. the exporting country. The country of origin is defined as the country in which the merchandise was grown, mined, or manufactured. If the importer cannot obtain information as to the country of origin, the merchandise is credited (for statistical purposes) to the country of shipment.

Imports are classified either as general imports or imports for consumption. General imports represent total arrivals of imported goods (except for in-transit shipments), that is, merchandise entered for immediate consumption ("duty free" merchandise, merchandise on which duty is paid on arrival, and merchandise entered into bonded customs manufacturing warehouses for processing and subsequent export of the main product) plus merchandise entered into bonded customs storage warehouses and into bonded customs smelting and refining warehouses. Imports for consumption are the total of entries for immediate consumption plus merchandise withdrawn from bonded storage warehouses for consumption, withdrawn from bonded smelting and refining warehouses, and transferred from bonded storage warehouses to bonded manufacturing warehouses for manufacturing and export.

Beginning 1954, estimates of imports valued under \$251 are based on a 5-percent sample; and beginning 1958, estimates of imports valued under \$100 reported on formal consumption entries and imports reported on informal entries (generally containing items valued under \$251) are based on a 1-percent sample. For the period July 1965–December 1966, formal entry shipments valued under \$251 are also estimated from a 1-percent sample. This was increased to a 5-percent sample for all shipments valued under \$251 during 1967, but reverted to a 1-percent sample effective January 1968. These estimated low-value shipments are included in commodity and country imports with "other transactions." The total value of the estimated low-value shipments generally amounts to about 1 percent of the monthly import total.

Data relating to U.S. airborne and waterborne foreign commerce are presented in section 22 of this *Abstract*, Transportation—Air and Water.

Area coverage.—The geographic area covered by these statistics, except as noted, is the United States customs area, which includes the 50 States, the District of Columbia, and Puerto Rico, and, for 1935 through 1939, the Virgin Islands.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1967*. See preface.

No. 1211. U.S. RESERVE ASSETS AND SHORT-TERM LIABILITIES TO FOREIGNERS: 1955 TO 1970

[In millions of dollars. As of end of year or month. Covers U.S. gold stock, including gold in Exchange Stabilization Fund; holdings of convertible foreign currencies by U.S. monetary authorities; and liabilities maturing in 1 year or less as reported by U.S. banks. For changes in types of liabilities and holders, see table 1212. "Foreigners" refers to international and regional organizations, foreign governments, central banks, and other official institutions, as well as banks, organizations, and individuals domiciled abroad and the foreign subsidiaries and offices of U.S. banks and commercial firms]

- Represents zero. ¹ International Monetary Fund (IMF). ² Excludes holdings of dollars by IMF derived from payments of U.S. subscription and from exchange transactions and other separations of the IMF. (Liabilities representing "gold investment" of IMF continue to be included.) Also, excludes holdings of U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes by other international and regional organizations. Excludes Bank for International Settlements and European Fund; see footnote 3.

³ Represents liabilities to foreign central banks, foreign central governments and their agencies, Bank for International Settlements, and European Fund.

No. 1214. U.S. GOVERNMENT FOREIGN GRANTS AND CREDITS: 1945 TO 1969—Con.

[In millions of dollars. "P.L." means Public Law. See text, pp. 761-762]

PROGRAM	Post World War II period ¹	July 1945- Dec. 1962	1963	1964	1965	1966	1967	1968	1969 (prel.)
Other assistance (through net accumulation of foreign currency claims) ²	2,879	3,114	285	-30	-27	194	-278	-179	-201
Currency claims acquired	15,300	8,554	1,284	1,394	1,079	953	851	700	486
Sales of farm products	14,468	8,474	1,216	1,312	981	844	740	558	334
Second stage operations ¹⁰	842	81	63	82	98	109	111	142	162
Less: Currencies disbursed	12,422	5,440	999	1,424	1,106	758	1,128	879	687
Economic grants and credits to purchasing country	9,708	4,145	812	1,178	908	619	897	689	459
Other uses	2,714	1,295	187	246	197	139	231	190	228

- Represents zero. ² Less than \$500,000.¹ July 1, 1945 through Dec. 31, 1969. All lend-lease and conversions of prior grants to credits are from V-J Day (Sept. 2, 1945). ² For details, see table 1215.³ Net new grants have not been adjusted for settlements for postwar relief and other grants under agreements, and net new credits exclude prior grants converted into credits. Prior grants converted into credits were as follows: July 1945-December 1956, \$2,257 million; 1962, \$490 million. Repayments on these settlements included in net new credits. Technically, prior grants recorded into credits amounting to \$273 million are so recorded for convenience, as settlements are still to be reached with governments in question.⁴ Foreign Assistance Act of 1961 (P.L. 87-195), as amended. Also includes predecessor and related programs.⁵ Beginning 1964, Defense Dept. transactions estimated. ⁶ Agricultural Trade Development and Assistance Act.⁷ Outstanding credits on Dec. 31, 1969, totaled \$26,370 million representing net credits extended since organization of Export-Import Bank, Feb. 12, 1964, less chargeoffs, and net adjustments due to exchange rates (\$903 million), and excluding World War I debts. The amount repayable in dollars at U.S. Government option was \$20,131 million; the remainder was repayable in foreign currencies, commodities, or services, at the option of the borrowers.⁸ Commodity Credit Corporation Charter Act.⁹ Equivalent value of currencies still available to be used, including some funds advanced from foreign governments and after loss by exchange rate fluctuations (\$1,309 million), was \$1,571 million on Dec. 31, 1969.¹⁰ Includes foreign currencies acquired from triangular trade operations and principal and interest collections on credits, originally extended under Public Law 83-480, which—since enactment of Public Law 87-128—are available for the same purposes as Public Law 83-480 currencies.Source: Dept. of Commerce, Office of Business Economics; periodic report, *Foreign Grants and Credits by the United States Government*.

- Represents zero. ¹ Military assistance programs chargeable to appropriations; totals exclude grants from stocks excess to requirements of U.S. military. Annual data for military assistance and excess stocks are deliveries; cumulative totals represent total amounts programmed for 1950-1969. The difference between the sum of the data by years and the cumulative total is the value of goods programmed but not yet delivered.

¹ Beginning May 1949, exports of certain commodities were grouped into special categories for security reasons. Data for 1949-1964 and for 1958-1968 reflect relaxation of security restrictions made in 1965 and 1968, respectively.

² Average 1949-1950. ³ Began in October 1949. Data represent only shipments from United States and differ from Dept. of Defense figures because of differences in statistical definitions.

⁴ For July-December 1950 only. ⁵ 1947-1959, data from Bureau of Customs. Based on reports of imports of merchandise entered directly for consumption or withdrawn from bonded customs warehouses.

¹ Indexes exclude military grant-aid.² Beginning 1965, indexes represent general imports. Earlier indexes are based on imports for consumption.³ Excludes silver ore and bullion.Source: Dept. of Commerce, Bureau of International Commerce; *Overseas Business Reports*.

No. 1223. EXPORTS OF MANUFACTURES—ESTIMATED VALUE, BY STATES, 1963 AND 1966, AND BY SELECTED PRODUCT GROUPS, 1966

[In millions of dollars, f.o.b., factor prices. State distribution estimated by Bureau of the Census on results of a 1963 and 1966 survey. The survey provided geographic distributions for two-thirds of the \$16.3 billion total in 1963 and 71 percent of the \$21.3 billion total in 1966. Product groups represent two-digit Standard Industrial Classification groups. For further details, including relation to official U.S. export figures, see source]

Other transactions.....	401	518	591	730	866	1,065	1,208	1,331
U.S. goods returned.....	253	310	368	453	503	605	667	756
Low-value shipments, estimate ⁵	130	174	181	233	261	284	322	304

NA Not available. ¹ Value on a cost, insurance, and freight basis; Cost (to the U.S. importer) of commodities at port of exportation plus insurance and freight to U.S. customs port of entry.

² Beginning 1965, not comparable with data for earlier years due to change in valuation, initiated May 1964, increasing the average price per pound. ³ Includes parts for tractors. ⁴ Excludes parts for tractors.

⁵ Excludes furniture. ⁶ Excludes narrow or special fabrics.

⁷ Formal entries valued at \$1 to \$100 and informal entries under \$250 through June 1965, and both formal and informal entries under \$250 thereafter.

B Not calculated because of extensive duplication in output. NA Not available. X Not applicable.

¹ Commodities shown are mainly complementary (see source) and represent part of 4-digit SIC commodity classifications. ² Substantial volume also exported. ³ Includes manganiferous iron ore (less than 10 percent manganese). ⁴ Percents based on estimated output values.

⁵ Excludes refined anhydrous sulfate and salt cake (crude) technical. ⁶ Based on output which contains substantial duplication. ⁷ Excludes distillers' grains and solubles. ⁸ Mainly jute bagging, burlaps, etc.

⁹ Excludes paper-machine coated paper. ¹⁰ Includes pharmaceuticals. ¹¹ Probably includes significant amounts of plastic footwear. ¹² Imports are for gloves in chief value of leather; percents based on output of all-leather gloves. ¹³ Excludes a significant amount of toll production. ¹⁴ Mainly platinum metals and tin.

¹⁵ Based on new supply which contains significant amount of duplication. ¹⁶ Mainly cut diamonds; output excludes captive value of lapidary work.

X Not applicable. Z Less than \$500,000.

¹ For 1955 and 1960, reflects declassification of special category commodities as authorized July 28, 1965, and January 5, 1968, respectively; area and country totals reflect relaxation of security restrictions as authorized July 17, 1969.

² Includes estimates for low-valued shipments from countries which could not be identified because of illegible reporting on import entries.

³ Developed countries include Canada, Western Europe, Japan, Australia, New Zealand, and Republic of South Africa; developing countries include rest of the world excluding Communist areas in Europe and Asia. Assignment of countries generally follows that made by United Nations.

⁴ Finland included in Other Western Europe for 1955 and 1960 and in European Free Trade Association (EFTA) and Organisation for Economic Co-operation and Development (OECD) thereafter.

⁵ Excludes Special Category exports, if any, for 1955 and 1960; includes Special Category exports, if any, thereafter. See footnote 6.

⁶ For security reasons, exports of Special Category commodities are excluded from totals for certain countries. See the 1966-1963 and 1964 issues of *Foreign Commerce and Navigation of the United States*; October 1969 issue of Report No. FT 900; and January 1970 issue of Report No. FT 410 for further explanation and lists of Special Category commodities.

No. 1292. U.S. EXPORTS AND IMPORTS OF MERCHANDISE, BY CONTINENT, AREA, AND COUNTRY: 1955 TO 1969—Continued
 [in millions of dollars. Beginning 1965, includes uranium, thorium, and related products; beginning 1968, includes silver ore and bullion. See *Historical Statistics, Colonial Times to 1957*, series U 116-178, for selected countries]

Section 31

Outlying Areas Under the Jurisdiction of the United States

This section presents summary statistics on the industrial, social, and agricultural organization of the Commonwealth of Puerto Rico, the principal possessions of the United States (Virgin Islands, Guam, and American Samoa), and the Canal Zone. Population estimates of the Trust Territory of the Pacific Islands are also presented.

Primary sources of these data are the decennial censuses of population, housing, and agriculture, and the quinquennial censuses of business and manufactures conducted by the Bureau of the Census; the annual *Vital Statistics of the United States* issued by the Public Health Service; the biennial *Statistics of State School Systems* published by the Office of Education; the *Minerals Yearbook* of the Bureau of Mines; and the annual *Agricultural Statistics* of the Department of Agriculture.

Jurisdiction.—The circumstances under which the United States gained jurisdiction over these areas are as follows:

The islands of Puerto Rico and Guam, surrendered by Spain to the United States in October 1898, were ceded to the United States by the Treaty of Paris, signed December 10, 1898, and ratified in 1899. Puerto Rico acquired the status of a commonwealth on July 25, 1952.

The Virgin Islands, formerly known as the Danish West Indies, were purchased by the United States from Denmark in 1917.

American Samoa was acquired by the United States in accordance with a convention among the United States, Great Britain, and Germany, signed December 2, 1899, and ratified February 16, 1900.

The use, occupation, and control of the Canal Zone were granted to the United States under the terms of a treaty with the Republic of Panama, signed November 18, 1903, and ratified in 1904.

The Trust Territory of the Pacific Islands is comprised of 2,141 atolls and islands, 96 of which are inhabited. This territory, formerly under Japanese mandate, was placed under the United Nations trusteeship system by an agreement approved by the Security Council on April 27, 1947, and by the United States on July 18, 1947.

For a brief summary of the territorial development of the United States, see tables 10 and 252 in sections 1 and 6, respectively.

Censuses.—Because of differences in the population and housing characteristics and the varieties of agricultural products among the outlying areas, the presentation of census data is not uniform for all areas. However, the tables in this section give, as nearly as possible, comparable data for the areas. The 1960 Census of Population covered all of the places listed above except the Trust Territory of the Pacific Islands (the census of which was conducted in April 1958 by the Office of the High Commissioner), whereas the 1960 Census of Housing covered only Puerto Rico, Guam, and the Virgin Islands. The 1959 Census of Agriculture covered Puerto Rico, American Samoa, Guam, and the Virgin Islands; the 1964 Census covered the same areas except American Samoa. Censuses of Business and Manufactures were conducted in Puerto Rico for 1954, 1958, 1963, and 1967, and in Guam and the Virgin Islands for 1958, 1963, and 1967.

For definition and explanation of terms used, see section 1, Population; section 23, Agriculture; section 27, Construction and Housing; section 28, Manufactures; and section 29, Distribution and Services.

Information in other sections.—In addition to the specialized statistics presented in this section, other data are included as integral parts of many tables showing distribution by States in various sections of the *Abstract*.

D Withheld to avoid disclosing operations of individual companies.

¹ Value of shipments less cost of materials, supplies, fuels, electric energy, and contract work plus net change in finished goods and work-in-process inventory and value added in merchandising activities.² Represents net selling value, f.o.b. plant, after discounts and allowances, of all shipments of products from manufacturing establishments, plus receipts for miscellaneous activities of such plants. Excludes freight charges and excise taxes. Includes extensive duplication arising from shipments between establishments in the same industry.

Section 32

Comparative International Statistics

This section presents summary statistics on the industrial, social, and agricultural organization of the various nations and on finances of international agencies.

The principal source for the data presented in this section is the United Nations *Statistical Yearbook*. Statistics of the individual nations may be found primarily in official publications, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages, expressed in their own or customary units of measure. For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook*, the *Demographic Yearbook*, the *Yearbook of International Trade Statistics*, the *Yearbook of National Accounts Statistics*, *Population and Vital Statistics Reports* (quarterly), the *Monthly Bulletin of Statistics*, and *The Growth of World Industry: Vol. I, General Industrial Statistics, 1953-1966*, and Vol. II, *Commodity Production Data, 1958-1967*.

For foreign agricultural, labor, and education statistics, the outstanding sources are publications of specialized agencies of the United Nations, such as the *Production Yearbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* issued by the International Labour Office, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organization. These publications usually present data covering an extensive period of time, frequently up to 20 years. The *International Population Statistics Reports*, Series P-90 and P-91, issued by the Bureau of the Census, also present population figures for many foreign countries.

Statistical coverage.—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown here. The list of countries included is based on, but not limited to, the membership rosters of the United Nations and of the larger specialized agencies of the United Nations (see table 1277). In a few instances, member countries were omitted because of an almost complete lack of data.

OECD, EEC, and EFTA.—The Organisation for European Economic Co-operation (OECE), a regional grouping of Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organisation for Economic Co-operation and Development (OECD). The OECD consists of the member nations of the former OECE—Austria, Belgium, Denmark, France, Germany (Federal Republic), Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom—and also Canada, the United States, and Japan, plus Finland and Yugoslavia in a special status category.

The European Economic Community (EEC), or "Common Market," consisting of Belgium, France, Germany (Federal Republic), Italy, Luxembourg, and the Netherlands, was formed in 1958 for the purpose of promoting European economic integration. It is based on agreement among the member nations to stimulate their economic growth, primarily through the gradual elimination of trade barriers among

themselves, the establishment of a common external tariff, the coordination of monetary, fiscal, and agricultural policies, and the removal of restrictions on movement of services, labor, capital, and business enterprises within the community.

The European Free Trade Association (EFTA), established in late 1959, consists of Austria, Denmark, Norway, Portugal, Sweden, Switzerland, the United Kingdom, and, as an associate member, Finland. It represents an agreement among the member nations to promote free trade and economic cooperation in Europe through gradual elimination of tariffs and quotas among themselves but without establishment of a common external tariff.

Quality and comparability of the data.—The quality and the comparability of the data presented here are affected by a number of factors:

(1) The year for which data are presented may not be the same for all subjects for a particular country, or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise stated in headnotes or footnotes. Space considerations made it impracticable to present the data for a series of years except for a limited number of subjects.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-period and coverage qualifications attached to the figures; considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 States, conterminous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the United States figures by the United Nations in order to improve their comparability with figures from other countries.

Conversion factors.—To facilitate comparison in terms of familiar units, items shown in metric units in the source have been converted to U.S. equivalents by means of the abbreviated conversion factors shown below. Additional conversion factors appear in Appendix I, Weights and Measures, pages 905 and 906.

CONVERSION FACTORS

<i>Metric units</i>	<i>U.S. equivalents</i>
1 kilometer	0.6214 mile
1 square kilometer	0.3861 sq. mile
1 kilogram	2.2046 pounds
1 metric ton (1,000 kilograms)	1.1023 short tons
1 metric ton-kilometer	0.6849 short ton-mile
1 hectolitre	26.4172 U.S. gallons
1 cubic meter	35.3147 cubic feet

No. 1251. POPULATION AND AREA, BY COUNTRY

[Population data generally are present-in-area estimates for the present territory. For some countries, however, estimates include national armed forces and diplomats stationed outside the country and exclude alien armed forces, foreign diplomats, and enemy prisoners of war stationed within the country. Except as noted, area data include inland waters. See text, p. 804, for general comments concerning the data. For details of methodology, coverage, and reliability, see source.]

No. 1254. PER CAPITA GROSS NATIONAL PRODUCT, BY COUNTRY: 1958, 1963, AND 1968

[In dollars. For most countries, estimates prepared by converting official figures at prevailing dollar exchange rates with minimum of adjustment. Estimates are in terms of current market prices and current exchange rates and thus reflect slight depreciation of U.S. dollar during period shown. Year-to-year comparisons of per capita product in real terms should, therefore, not be made on basis of these estimates. They should be considered as indicators of per capita production of goods and services of countries shown and not as measures of standard of living of their inhabitants. Small differences between any 2 countries may be due to margin of error inherent in method of estimation. Population figures used are generally mid-year estimates. See text, p. 804, for general comments concerning the data; for exchange rates used and notes on quality of estimates, see source.]

1968.....	3.6	4.8	3.5	0.7	3.1	3.9	1.3	2.2

NA Not available. ¹ Beginning 1967, data not entirely comparable with prior years because of revision in survey design. 1967 data, based on old survey design: Civilian labor force, 48,650,000; unemployed persons, 520,000; percent unemployed, 1.1. ² Preliminary estimates based on incomplete data.

Source: Dept. of Labor, Bureau of Labor Statistics. Estimates based on national and international publications.

No. 1257. INDUSTRIAL ORIGIN OF DOMESTIC PRODUCT—PERCENT DISTRIBUTION

[Based on gross domestic product at current factor cost, except as noted. Estimates not fully comparable from country to country in coverage and classification. Some of the major differences are indicated in footnotes below; for additional details, see source. In general, "Total industrial activity" covers mining, quarrying, manufacturing, electricity, gas, and water; "Other" comprises banking, insurance, real estate, ownership of dwellings, public administration, defense, and personal and other services. See text, p. 804, for general comments concerning the data]

NA. Not available.

¹ Refers to calendar year in which all or most of the harvest took place, generally 1968. All commodities index relates to food, fibers, tobacco, industrial oil seeds, rubber, tea, and coffee; food index relates to crops and livestock products for human consumption. Deduction made for feed and seed used in production process.

² Components of these indexes vary considerably among countries; for details, see source.

³ Refers, in general, to salaried employees and wage earners in manufacturing. Includes workers on holiday or vacation; excludes employers, self-employed, and workers on strike, on temporary military leave, or temporarily laid off.

⁴ In many instances, represents index only for principal city (or cities) of particular country.

⁵ General wholesale price index numbers usually weighted by gross value of sales on wholesale markets.

⁶ As of 3d quarter of 1969, except as noted. Indexes based primarily on common shares traded on leading exchange and construction fields. In some cases, where an index of industrial shares is not available, a general index, including shares of companies in transportation, distribution, and finance fields, is reported.

⁷ For year beginning July 1. ⁸ Basic materials. ⁹ For year ending June 30.

¹⁰ Includes mining and quarrying. ¹¹ 1964=100. ¹² General index. ¹³ Luxembourg included with Belgium.

¹⁴ Data for one month. ¹⁵ For 1966. ¹⁶ For 1967. ¹⁷ For 1964. ¹⁸ Average of less than 12 months.

¹⁹ Farm products only. ²⁰ Oct. 1962–Sept. 1963=100. For year ending Sept. 1967. ²¹ Wage earners only.

²² 2d quarter. ²³ 1965=100. ²⁴ 1967=100. ²⁵ For 1965. ²⁶ Area of San Salvador.

²⁷ Includes mining. ²⁸ Guatemala City only. ²⁹ For year beginning Mar. 21.

³⁰ Includes working proprietors. ³¹ For 1962. ³² Covers commercial retail and wholesale establishments.

³³ For year beginning Apr. 1. ³⁴ July 1962–June 1963=100. ³⁵ 1966=100. ³⁶ 1961=100.

³⁷ Includes sea fishing. ³⁸ For year ending before July 1, 1968. ³⁹ 4th quarter 1968.

⁴⁰ For food, 1967. ⁴¹ 1966–67=100. ⁴² None or negligible quantity.

NA Not available.

¹ Beef and veal (incl. buffalo meat), pork (incl. bacon and ham), and mutton and lamb (incl. goat meat). Except as noted, relates to commercial and farm slaughter and excludes lard, tallow, and offals.

² Beet and cane. Data generally in terms of raw sugar. ³ Includes estimate for China (mainland).

⁴ Excludes Alaska and Hawaii. ⁵ Year beginning July. ⁶ For 1965. ⁷ Meat includes slaughter fat.

⁸ None or negligible quantity. ⁹ Includes Luxembourg. ¹⁰ For meat, production from indigenous animals only, including, where applicable, meat equivalent of exported live animals. ¹¹ Polarisation or grade unknown.

¹² Based on trade estimates. ¹³ Includes processing of imported raws. ¹⁴ FAO estimate.

¹⁵ Includes edible offals. ¹⁶ Commercial production. ¹⁷ Crop year. ¹⁸ For 1956.

¹⁹ Inspected production. ²⁰ Includes Ryukyu Islands. ²¹ Average of less than 5 years.

²² Year ending Sept. For Rhodesia, on farms and estates. ²³ Year beginning March. ²⁴ Includes lard.

²⁵ Azores and Madeira only. ²⁶ Year ending June 30. ²⁷ Includes Swaziland. ²⁸ Slaughter weight.

NA Not available. ¹ Except as noted, data are for a specified date in 1960 or 1961; includes unemployed.² Comprises utilities generating primarily for public use, plus industrial establishments generating primarily for own use. Relates to production at generating centers, including station use and transmission losses.³ Based on apparent consumption of coal, lignite, petroleum products, natural gas, and hydro-electricity.⁴ Relates to production, including repair work in factories; generally excludes mining, building and construction, and public utilities. For 1957, except as indicated.⁵ Coverage varies widely. For most countries, refers to single plants or factories with more than a specified number of employees, as noted. For additional or alternative qualifications, see source.⁶ Comprises average number of paid employees, working proprietors, unpaid family workers, and homeworkers, except as noted.⁷ Covers merchandise including silver (except current coin); excludes gold and issued paper currency. Imports generally valued c.i.f.; exports, f.o.b. Generally includes government trade (including foreign aid, war reparations, and military goods), trade of foreign concessionaires, and postal trade. See source for "general trade" or "special trade" distinctions. Roughly half the countries shown fall into each category, thus affecting comparability.⁸ Excludes trade of China (mainland), Mongolia, North Korea, and North Vietnam with one another.⁹ Imports and exports include Puerto Rico. ¹⁰ Excludes Armed Forces abroad.¹¹ Net production (excluding station use). ¹² Source: 1967 Census of Manufactures.¹³ Establishments with 1 or more employees. ¹⁴ F.o.b. ¹⁵ Includes foreign aid. ¹⁶ For 1964.¹⁷ All establishments with installed power equipment of 0.5 or more horsepower. ¹⁸ Year ending June 30.¹⁹ Establishments with 4 or more engaged. ²⁰ Establishments with 6 or more employees.²¹ Paid employees; United Kingdom excludes Northern Ireland. ²² Luxembourg included with Belgium.²³ For 1960. ²⁴ Establishments with 5 or more engaged.²⁵ All enterprises in socialist sector except publishing. ²⁶ For 1963. ²⁷ Year ending Sept. 30.²⁸ Establishments with 10 or more employees. ²⁹ For 1967.³⁰ Establishments with 5 or more persons engaged or specified gross value of production or assets.³¹ For 1962. ³² Excludes armed forces and unpaid family workers. ³³ For 1965.³⁴ Registered establishments. ³⁵ Establishments with 5 or more employees.³⁶ Establishments with 5 or more engaged, or equivalent in installed power equipment.³⁷ Establishments with 10 or more engaged. ³⁸ Excludes trade with Federal Republic of Germany.³⁹ Establishments with 30 or more engaged. ⁴⁰ Year beginning Apr. 1.⁴¹ Establishments with 10 or more persons engaged using power or with 20 or more persons engaged not using power. ⁴² Public utility plants only. ⁴³ Consumption. ⁴⁴ Includes peat. ⁴⁵ Establishments with 3 or more engaged. ⁴⁶ Man-years.⁴⁷ Includes small net purchases from private plants. ⁴⁸ Establishments with 2 or more engaged.⁴⁹ Establishments with annual value of production exceeding 12,000 cordobas. ⁵⁰ Excludes one-man establishments.⁵¹ Excludes persons in institutions and armed forces.⁵² State enterprises under direction of central government.⁵³ Excludes Canary Islands and possessions in North Africa. ⁵⁴ Includes Canary Islands and Ceuta.⁵⁵ Private establishments with 10 or more engaged and all public establishments.Source: Statistical Office of the United Nations, New York, N.Y.; *Statistical Yearbook and Demographic Yearbook*. NA. Not available.

¹ Excludes lignite and brown coal, except as noted.² Source presents data in metric tons. Conversion to barrels allows for differences in specific gravity of petroleum. Figures refer to crude petroleum including shale oil, but excluding natural gasoline.³ Covers, as far as possible, all hydraulic cements used for construction (portland, metallurgic, aluminous, natural, etc.).⁴ Refers generally to iron content of marketable ores mined, including manganiferous iron ores but excluding pyrites. Some data are rough estimates obtained by applying a fixed percentage to figures for crude ore production.⁵ Data expressed in terms of pure (monohydrate) sulfuric acid and include sulfuric acid equivalent of oleum or "fuming" acid.⁶ Total production of crude steel, both ingots and steel for castings. Excludes wrought (puddled) iron.⁷ Data represent apparent consumption (i.e., production plus imports minus exports) and do not take into account changes in stocks. ⁸ Excludes manganiferous iron ores containing 5 percent or more of manganese.⁹ Excludes steel for castings made in foundries operated by companies not producing ingots. ¹⁰ For 1967.¹¹ Includes wastes. ¹² Year ending June 30. ¹³ Excludes natural cement.¹⁴ Luxembourg included with Belgium. ¹⁵ Strength of acid not reported.¹⁶ Represents about 90 percent of the total national output. ¹⁷ Excludes alloy steels.¹⁸ Shipment from mines. ¹⁹ Ingots only. ²⁰ Includes lignite; for Japan, also includes a small amount of brown coal. ²¹ For 1959. ²² For 1960. ²³ For 1965. ²⁴ For 1961.²⁵ Includes regenerated sulfuric acid. ²⁶ Year beginning in March.²⁷ Includes iron content of iron sand and pyrites.²⁸ Production in "Neutral Zone" shared by Kuwait and Saudi Arabia amounted to 156,717 barrels.²⁹ Sarawak only. ³⁰ West Malaysia only. ³¹ Svalbard; Norwegian-operated mines only.³² None or negligible. ³³ Shale oil. ³⁴ Refers to Sheikdom of Abu Dhabi. ³⁵ Includes gas condensates.³⁶ Great Britain only. Excludes production at quarries. ³⁷ For 1964.Source: Statistical Office of the United Nations, New York, N.Y.; *Statistical Yearbook*. (Copyright.)

¹ Refers to production of milk (cow, sheep, goat, and buffalo) for consumption fresh or for conversion into butter, cheese, condensed milk, etc. Excludes milk sucked by, but includes milk fed to, young animals. Data include estimates of Food and Agriculture Organization.² Covers malt liquors (beer, ale, stout, porter, etc.) of varying specific gravity or alcoholic strength. Excludes tax-free malt beverages of very low alcoholic content.³ Covers both sea and inland fisheries, in terms of live weight. Includes shellfish; excludes whales, dolphins, etc. Except as noted, includes landings by domestic craft in foreign ports, and excludes landings by foreign craft in domestic ports.⁴ In place as of Dec. 31, except as noted. Relates to 3 and 4 cylinder cotton system spinning spindles installed in cotton mills, including a number spinning rayon staple all or part of the time. Includes ring spindles only. Data are for 1967, except as indicated.⁵ Excludes tire cord yarn, except as noted. ⁶ Refers to carded and combed (worsted) yarn.⁷ Refers to rayon and acetate continuous filament yarn plus monofilaments, except as noted.⁸ Excludes China (mainland) and North Korea. ⁹ Year ending June 30. ¹⁰ Includes tire cord yarn.¹¹ Year beginning July 1. ¹² Includes cigars. ¹³ As of June 30. ¹⁴ Includes milk sucked by young animals.¹⁵ For 1967. ¹⁶ For 1965. ¹⁷ Production in São Paulo only. ¹⁸ For 1958.¹⁹ Includes landings by foreign craft in domestic ports. ²⁰ Factory production only.²¹ Government production only. ²² Year beginning Apr. 1.²³ Excludes landings by domestic craft in foreign ports. ²⁴ For 1963. ²⁵ For 1960. ²⁶ For 1966.²⁷ For 1957. ²⁸ Year ending in September. ²⁹ For 1964. ³⁰ Excludes cigarillos.³¹ Excludes yarn made from waste. ³² Includes West Berlin. ³³ As of Sept. 20.³⁴ United Nations estimate. ³⁵ Marine catches of motor vessels only. ³⁶ Year ending July 31.³⁷ Excludes milk fed to livestock. ³⁸ On farms and estates. ³⁹ For 1959. ⁴⁰ For 1962.⁴¹ Includes some carbonated drinks. ⁴² Year ending in May. ⁴³ For 1961. ⁴⁴ Commercial production.⁴⁵ Excludes Walvis Bay. ⁴⁶ Includes Ceuta, Melilla, and Balearic and Canary Islands.⁴⁷ Inland fisheries. ⁴⁸ Year beginning Mar. 1. ⁴⁹ Includes acetate spun yarn.Source: Statistical Office of the United Nations, New York, N.Y.; *Statistical Yearbook*. (Copyright.)

NA Not available.

¹ Excludes gold used in payment of a country's subscriptions to International Monetary Fund or International Bank for Reconstruction and Development. Reported in U.S. dollars at \$35 per fine troy ounce.

² Foreign exchange holdings ordinarily include foreign currencies, bank deposits abroad, payment and clearing agreement balances, and short-term foreign bills and securities (generally those with an original maturity of 1 year or less) and, in those instances where information is available, foreign investments held by official institutions. Excludes subscriptions to International Monetary Fund, drawing rights in the European Payments Union or the European Fund, undrawn portions of foreign loans, and similar rights to incur foreign debts. Holdings have been converted into U.S. dollar equivalents at par value or, in absence of a par value, at official exchange rate.

³ Less than half of unit employed, nil, or negligible.

⁴ For 1961.

No. 1272. FOREIGN EXCHANGE RATES, BY COUNTRY: 1968

[National currency units per U.S. dollar. As of December 31. Except as indicated, represents mid-point rates, which are averages of selling and buying rates. Selling rates are rates at which monetary authorities and authorized banks sell foreign exchange against payment in national currency. Buying rates are rates at which the authorities and banks buy foreign exchange from those obtaining it. Free market rates are rates which fluctuate in response to purchases and sales of foreign exchange by private individuals]

NA Not available.

¹ As of June 30. Represents gross registered tons (see text, p. 562) for vessels of 100 gross tons and over. Excludes vessels without mechanical means of propulsion; includes sailing vessels with auxiliary power. Excludes ships trading on Caspian Sea.

² In general, represents sum of net registered tonnages (see text, p. 562) of seagoing foreign and domestic merchant vessels (power and sailing) entered with cargo from a foreign port and refers to only one entrance for each foreign voyage. Except as noted, excludes vessels "in ballast," i.e., entering without unloading goods.

³ Represents weight of all goods (including their packing) in external trade loaded to and unloaded from seagoing vessels of all flags at ports of country specified. For most countries, excludes bunkers, ships' stores, ballast, and transshipment (goods transhipped from an importing vessel to an exporting vessel).

⁴ Relates to domestic and international traffic on all railway lines within each country shown, excluding railways entirely within an urban unit and plantation, industrial mining, funicular and cable railways. In general, passenger miles include all passengers except military, government, and railway personnel when carried without revenue; ton-miles relate to freight net ton-miles and include all goods whether carried by fast or ordinary trains except service traffic, mail, baggage, and nonrevenue governmental stores.

⁵ Covers both domestic and international scheduled services operated by companies registered in each country. Includes supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for new scheduled services.

⁶ Represents officially estimated number of vehicles in use. Includes passenger cars and commercial vehicles. For most countries shown, excludes 2- and 3-wheeled cycles and motorcycles, trams, trolley buses, ambulances, hearses, military vehicles, police and special purpose or government security vehicles, trailers, and farm tractors.

⁷ Includes Great Lakes. ⁸ After time adjustment, loaded approximately same as unloaded.

⁹ Excludes China (mainland), U.S.S.R., and other nonmembers of International Civil Aviation Organization as of Dec. 31, 1968.

¹⁰ Excludes China (mainland), North Korea, and North Vietnam. ¹¹ Includes Great Lakes international traffic.

¹² Includes vessels in ballast. ¹³ Year ending June 30. ¹⁴ For 1957. ¹⁵ All entrances counted.

¹⁶ Includes service traffic. ¹⁷ For 1967. ¹⁸ Year ending Sept. 30. ¹⁹ For 1963. ²⁰ For 1966.

²¹ Includes Great Lakes and St. Lawrence international traffic. ²² For 1963. ²³ For 1966.

²⁴ For 1961. ²⁵ For 1965. ²⁶ Year beginning Apr. 1. ²⁷ Passenger cars only.

²⁸ Year beginning Mar. 21. ²⁹ International scheduled services. ³⁰ For 1964. ³¹ Year beginning July 1.

³² Excludes Azores and Madeira Islands. ³³ Buses and trucks only. ³⁴ Namibia (formerly South West Africa).

³⁵ Includes the Balearic Islands, Ceuta, and Melilla. ³⁶ Excludes Northern Ireland.

NA. Not available.

¹ Comprises public and private telephones installed which can be connected to a central exchange. World total in 1968 estimated at 238.8 million.

² Comprises generally all types of telegrams including cablegrams and radiograms, but excludes messages in transit.

³ Items mailed for distribution within national territories. Comprises letters, postcards, printed matter, merchandise samples, small packets, and phonopost packets. Includes mail carried without charge, but excludes ordinary packages, and insured letters and boxes.

⁴ Publications containing general news and appearing at least 4 times a week; may range in size from a single sheet to 50 or more pages. Circulation data include copies sold outside the country.

⁵ Data cover estimated number of receivers in use, except as noted, and apply to all types of receivers for radio broadcasts to the public, including loudspeakers connected to a radio "redistribution system" but excluding television sets. World total in 1967 estimated at 634 million sets in use; 1968 data not available.

⁶ Estimated number of sets in use, except as noted. World total in 1967 estimated at 214 million sets in use.

⁷ Excludes Hawaii. Includes messages to and from Canada, Mexico, St. Pierre, and Miquelon.

⁸ For 1967. ⁹ Domestic and foreign, including ordinary packages and mail with a declared value.

¹⁰ Years ending June 30. ¹¹ English dailies only. ¹² Number of licenses issued. ¹³ For 1966.

¹⁴ For 130 dailies only. ¹⁵ For 1965. ¹⁶ For 1964. ¹⁷ For 12 dailies only. ¹⁸ For 1962.

¹⁹ Includes foreign, received and sent. ²⁰ English and French language dailies only.

²¹ Years ending Sept. 30. ²² Year beginning Apr. 1. ²³ For 1963. ²⁴ For 43 dailies only.

²⁵ For 3 dailies only. ²⁶ For 1961. ²⁷ For 4 dailies only. ²⁸ For 5 dailies only.

²⁹ Not indicated whether data are for number of licenses issued or for estimated receivers in use.

³⁰ Number excludes 700 regional editions; circulation includes them. ³¹ Includes foreign sent.

³² For 162 dailies only. ³³ For 60 dailies only. ³⁴ For 20 dailies only. ³⁵ For 81 dailies only.

³⁶ For 8 dailies only. ³⁷ Includes Liechtenstein. ³⁸ For 1969.

No. 1275. HOUSING AND HEALTH, BY COUNTRY

[Housing: Data generally intended to refer to conventional (permanent) dwellings only. For some countries, however, data include nonpermanent structures, improvised shelters, and mobile trailers, or, as noted, refer to housing units and to household accommodation (the space occupied by a private household) rather than to dwellings. Health: Hospital data refer to hospitals and other medical establishments with beds but exclude old people's homes and establishments for custodial or preventive care only; personnel data refer to persons fully qualified from medical or dental schools and working within the country. See text, p. 804, for general comments concerning the data. For additional qualifications of data for individual countries, see source.]

NA. Not available. ¹ Computed on basis of occupied dwellings where available; otherwise on total dwellings.

² Either inside or outside, except as noted.

³ Housing data refer to housing units.

⁴ Personnel data are for 1967.

⁵ Housing data exclude units occupied solely by full-blooded aborigines.

⁶ Personnel data are for 1966.

⁷ Stomatologists and odontologists included with physicians.

⁸ All living quarters except semipermanent.

⁹ Inside dwelling.

¹⁰ Personnel data are for 1967/68.

¹¹ Personnel in government service.

¹² Registered personnel.

¹³ Total dwellings.

¹⁴ Excludes subdivided flats and single rooms.

¹⁵ Personnel data are for 1965.

¹⁶ Excludes housing units in nonresidential constructions.

¹⁷ Personnel data are for 1968.

¹⁸ Housing data exclude dwellings in basements and attics.

¹⁹ For 1965.

²⁰ Refers to households living in housing units.

²¹ Personnel in hospitals only.

²² For 1961.

²³ Housing data refer to all households.

²⁴ Dentists included with physicians.

²⁵ Excludes dwellings in tenement houses and hotels.

²⁶ Government establishments only.

²⁷ Excludes nomads and river boatmen of East Pakistan and frontier regions.

²⁸ Housing data exclude tribal Indians.

²⁹ For 1966.

³⁰ Housing data exclude Bantu population.

³¹ In kitchens.

³² Urban areas only.

³³ Refers to residential buildings.

³⁴ England and Wales.

³⁵ Personnel data are for 1964.

No. 1276. EDUCATION, BY COUNTRY

[Teachers and students: Data cover both public and private schools for school year beginning in year stated and generally exclude adult education, apprenticeship courses, and correspondence schools. Expenditures: Include both capital and current expenditures converted to U.S. dollars at par values of exchange rates then in effect. Illiteracy: Defined as inability both to read and to write in any, or a specified, language; for most countries, relates to population 15 years old and over. For all items, intercountry comparisons subject to caution owing to variations in definition and coverage. See text, p. 804, for general comments concerning the data. For additional qualifications for individual countries, see source.]

Section 33

Metropolitan Area Statistics

Statistics from various Federal Government and private sources are presented here for areas officially defined as standard metropolitan statistical areas (SMSA's) by the U.S. Bureau of the Budget in *Standard Metropolitan Statistical Areas*, 1967. As of July 1, 1970, there were 233 SMSA's. The three SMSA's in Puerto Rico are not included here because data for many of the items shown are not available for them. Area titles and definitions appear on pages 901-904.

Two tables form the basic framework of this section: Table 1 presents 173 items of information for the 110 SMSA's of 250,000 inhabitants or more in 1960; table 2 shows 128 items for the remaining SMSA's of fewer than 250,000 inhabitants in 1960. Population estimates for 1966 show that, from 1960 to 1966, the number of areas with more than 250,000 inhabitants increased to 125. During that period, 14 SMSA's rose above the 250,000 level, 1 fell below. In addition, 2 New England SMSA's, which were well below the 250,000 mark in 1960, were ranked among those above it because they were ranked as SEA's in 1966 (see below). Area population rankings shown in both tables are based on 1966 estimates.

For New England, data are shown for both metropolitan State economic areas (SEA's) and SMSA's wherever it was possible to do so. SEA's consist of single counties or groups of counties; SMSA's in New England, of towns and cities. SEA data are included here for New England because, for a large number of items shown, only county data are available to serve as a basis for metropolitan area figures.

The Bureau of the Budget first issued standard definitions of metropolitan statistical areas in 1949. Generally conceived, a metropolitan area is an integrated economic and social unit with a large population nucleus. Each SMSA contains at least:

- (a) One central city with 50,000 inhabitants or more, or
- (b) Two cities having contiguous boundaries and constituting, for general economic and social purposes, a single community with a combined population of at least 50,000, the smaller of which must have a population of at least 15,000.

The SMSA includes the county in which the central city is located, and adjacent counties that are found to be metropolitan in character and economically and socially integrated with the county of the central city. In New England, the requirement with regard to a central city as a nucleus still holds, but, as noted above, the units comprising the area are towns rather than counties. The county (or town in New England) is the basic statistical unit. An SMSA may contain more than one city of 50,000 inhabitants. The largest city is always included in the title of the area; however, the title may include the names of one or two additional cities. An SMSA may cross State lines.

Reprints of this section of the *Statistical Abstract* may be obtained from the Superintendent of Documents, Washington, D.C. 20402. The price per copy is 35 cents; a 25-percent discount is allowed on orders of 100 copies or more sent to the same address.

APPENDIX I

Weights and Measures

AVOIRDUPOIS AND TROY WEIGHTS

U.S. equivalents			Metric equivalent
Avoirdupois weight: ¹			
1 grain.....			64.799 milligrams.
437.5 grains.....	1 ounce, avoirdupois.....	0.911 ounce, troy.....	28.35 grams.
16 ounces, avoirdupois.....	1 pound, avoirdupois.....	1.215 pounds, troy.....	453.59237 grams.
100 pounds, avoirdupois.....	1 short hundredweight.....		45,359.2 kilograms.
2,000 pounds.....	1 short ton.....		0.907 metric ton.
20 short hundredweights.....	1 long hundredweight.....		50.802 kilograms.
112 pounds, avoirdupois.....	1 long ton.....		1.016 metric tons.
2,240 pounds.....			
20 long hundredweights.....			
Troy weight: ²			
1 grain.....			64.799 milligrams.
24 grains.....	1 pennyweight.....		1.555 grams.
20 pennyweights.....	1 ounce, troy.....	1.097 ounces, avoirdupois.....	31.103 grams.
12 ounces, troy.....	1 pound, troy.....	0.823 pound, avoirdupois.....	373.242 grams.

¹ The system used in weighing all commodities except precious stones, precious metals, and drugs.

² The system used in weighing precious stones and precious metals such as silver and gold.

APPROXIMATE WEIGHTS PER BUSHEL FOR SPECIFIED COMMODITIES

ITEM	Pounds	Kilograms
Wheat, dry beans, dry peas, potatoes (Irish or white), soybeans.....	60	27.22
Rye, shelled corn (maize), linseed (flaxseed), sorghum grain.....	56	25.40
Barley, buckwheat.....	48	21.77
Castor beans.....	46	20.87
Rough rice.....	45	20.41
Malt.....	34	15.42
Oats, cottonseed.....	32	14.51
Peanuts, green, in shell.....	22	9.88

APPROXIMATE WEIGHTS PER BARREL OF NONLIQUID PRODUCTS

ITEM	Pounds	Kilograms
Wheat flour, barley flour, rye flour, and corn meal (net).....	196	88.90
Rosin, tar and pitch (gross).....	500	226.80
Fish, pickled (net).....	200	90.72
Lime (net).....	200	90.72
Cement (4 bags counted as 1 barrel) (net) ¹	375	170.55

¹ Except as noted in the tables.

CAPACITIES OR VOLUMES

U.S. equivalents

1 barrel (liquid) ¹	31 to 42 gallons.....	105 dry quarts.....	3.281 bushels (struck measure). ³
1 barrel (dry) ²	7,056 cubic inches.....		

¹ There are various "barrels" established by law or usage. Federal law recognizes a 31- and a 40-gallon barrel, depending on the type of liquor. In addition, the number of gallons recognized as making up a barrel differs among various States.

² Standard for fruits and vegetables and other dry commodities, except cranberries, recognized by the Dept. of Agriculture.

³ Standard bushel as measured by U.S. Government.

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

[In the United States, petroleum and its products are measured by bulk, not weight. Quantities are customarily reduced to the equivalent of barrels of 42 U.S. gallons (158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages, the Dept. of Commerce uses the following factors for converting foreign weight statistics to gallons or to barrels of 42 gallons]

ITEM	U.S. GALLON		BARREL OF 42 GALLONS	
	U.S. equivalent	Metric equivalent	U.S. equivalent	Metric equivalent
Crude petroleum.....	7.3 pounds.....	3.311 kilograms.....	306.6 pounds..	139.07 kilograms.
Lubricating oils.....	7.0 pounds.....	3.175 kilograms.....	294.0 pounds..	133.36 kilograms.
Illuminating oils (kerosene).....	6.6 pounds.....	2.994 kilograms.....	277.2 pounds..	125.74 kilograms.
Gasoline and related products (motor spirit, benzine, etc.).....	6.1 pounds.....	2.767 kilograms.....	256.2 pounds..	116.21 kilograms.
Fuel and gas oils.....	7.7 pounds.....	3.493 kilograms.....	323.4 pounds..	146.69 kilograms.

LIQUID MEASURES

U.S. equivalents		Metric equivalent
1 fluid dram.....		3.697 milliliters.
8 fluid drams.....	1 fluid ounce.....	29.573 milliliters.
4 fluid ounces.....	1 gill.....	0.118 liter.
4 gills.....	1 pint.....	0.473 liter.
2 pints.....	1 quart.....	0.9464 liter.
4 quarts.....	1 gallon.....	3.785 liters.

DRY MEASURES

U.S. equivalents		Metric equivalent
1 pint.....		33.600 cubic inches.....
2 pints.....	1 quart.....	67.2006 cubic inches.....
8 quarts.....	1 peck.....	537.605 cubic inches.....
4 pecks.....	1 bushel (struck measure) ¹	2,150.42 cubic inches.....
		0.551 liter.
		1.101 liters.
		8.810 liters.
		35.239 liters.

¹ Standard bushel as measured by U.S. Government.

LENGTH MEASURES

U.S. equivalents		Metric equivalent
1 inch.....		2.540 centimeters.
12 inches.....	1 foot.....	0.3048 meter.
3 feet.....	1 yard.....	0.9144 meter.
5½ yards.....	1 rod.....	5.020 meters.
5,280 feet.....	1 statute (land) mile.....	1,600 kilometers.
6076.11549 feet.....	1 international nautical mile.....	1.852 meters.

AREA MEASURES

U.S. equivalents		Metric equivalent
1 square inch.....		6.452 square centimeters.
144 square inches.....	1 square foot.....	929.030 square centimeters.
9 square feet.....	1 square yard.....	0.8361 square meter.
30¼ square yards.....	1 square rod.....	25.293 square meters.
160 square rods.....	1 acre.....	0.4047 hectare.
4,840 square yards.....		
640 acres.....	1 square mile.....	258,999 hectares.

CUBIC MEASURES

U.S. equivalents		Metric equivalent
1 cubic inch.....		16.387 cubic centimeters.
1,728 cubic inches.....	1 cubic foot.....	28.317 cubic decimeters.
27 cubic feet.....	1 cubic yard.....	0.7646 cubic meter.

APPENDIX II

Historical Series—Index to Tables in Which *Historical Statistics* Series Appear

[Listed below are those statistical time series (identified by number) appearing in *Historical Statistics of the United States, Colonial Times to 1957*, and its companion volume, *Historical Statistics... Continuation to 1962 and Revisions*, for which tables in the *Statistical Abstract* present comparable figures. Historical series are listed only where comparable data are available for one or more years later than 1957. In a few instances, it may be necessary to combine figures shown in the *Abstract* to obtain totals comparable to the series shown in *Historical Statistics*]

APPENDIX III

Guide to Sources of Statistics

Alphabetically arranged by subject, this guide contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained in them is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for years later than 1960 or types of data not available in regular series are also included.

Much valuable information may also be found in State reports (see pp. 961-964) and in reports for particular commodities, industries, or similar segments of our economic and social structure. Because of the large number of such references, they are not included here.

An asterisk (*) preceding the title of publications listed signifies that data from the publications appear in the *Statistical Abstract*. It should not be assumed that all of the subjects from the original sources are summarized in the *Abstract*.

Publications listed under each subject are divided into two main groups: "U.S. Government" and "Other." The location of the publisher of each report is given except for Federal agencies located in Washington, D.C. Mailing addresses of non-government agencies and of international organizations are given on pp. 968-970. Most Federal publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. In some cases, Federal publications may be obtained from the issuing agency.

Major reports, such as the *Census of Population*, which consist of many volumes, are listed by their general, all-inclusive titles. Specific volume numbers and subtitles of the major census publications are listed on pp. 955-960.

Accidents—see also Health; Insurance; and Vital Statistics

U.S. Government

Bureau of Labor Statistics

* Injury Rates by Industry. Annual.

Bureau of Mines

Coal Mine Injuries and Employment. Monthly.

Publications of Recent Censuses

Listed below are major reports of the most recent censuses. In most cases separate reports are available for each State, subject, industry, etc. Preliminary reports which have been issued are not included in the list.

Complete information on publications of all the censuses appears in the *Bureau of the Census Catalog*, which is published quarterly and cumulated to the annual issue. A list of data files (computer tapes and punchcards) and unpublished materials is also included, beginning with the 1964 issues. A sample copy of the *Catalog* is available from the Bureau of the Census on request. The annual subscription price is \$3.00 for 4 quarterly issues and 12 monthly supplements (75¢ additional for foreign mailing).

1970 CENSUS OF POPULATION

Reports scheduled for issuance during 1970 and early 1971:

Final Population Counts, Series PC(VI). One report for each State, the District of Columbia, and the United States. Data for States, counties, minor civil divisions, all incorporated places, and unincorporated places of 1,000 or more inhabitants.

General Population Characteristics, Series PC(V2). One report for each State, the District of Columbia, and the United States. Selected data on age, sex, race, and relationship to head of household for States, standard metropolitan statistical areas (SMSA's), counties, and places of 10,000 or more inhabitants.

Vol. I. Characteristics of the Population. Separate reports for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, American Samoa, Canal Zone, and Trust Territory of the Pacific. First to be issued in four separate paper-bound chapters, then assembled and issued in hard-cover:

Number of Inhabitants, Series PC(1)-A. For States, counties, SMSA's, urbanized areas, minor civil divisions, census county divisions, all incorporated places, and unincorporated places of 1,000 inhabitants or more.

General Population Characteristics, Series PC(1)-B. Statistics on age, sex, race, marital status, and relationship to head of household for States, counties, SMSA's, urbanized areas, minor civil divisions, census county divisions, and places of 1,000 or more inhabitants.

General Social and Economic Characteristics, Series PC(1)-C. Sample data for some or all of the following areas: States, counties, SMSA's, urbanized areas, and places of 2,500 or more inhabitants.

* Source of data included in this edition.

1970 CENSUS OF POPULATION—Continued

Detailed Characteristics, Series PC(1)-D. Detailed sample data cross-classified by age, race, etc.
Each subject shown for some or all of the following areas: States, SMSA's, and large cities.

Census Tract Reports. Series PHC(1). Population and housing information for each SMSA.

1960 CENSUS OF POPULATION

Vol. I. Characteristics of the Population.

Census Tract Reports.

1970 CENSUS OF HOUSING

Reports scheduled for issuance during 1970 and early 1971:

General Housing Characteristics, Series HC(V1). One report for each State, and the District of Columbia, and the United States. Selected data for States, standard metropolitan statistical areas (SMSA's), counties, and places of 10,000 or more inhabitants.

Vol. I. Characteristics for States, Cities, and Counties. Separate reports for the United States, each State, the District of Columbia, Puerto Rico, and each outlying area. First to be issued in two separate paper-bound chapters, then assembled and issued in hardcover:

General Characteristics for States, Cities, and Counties, Series HC(1)-A. Data for States, counties, SMSA's urbanized areas, and places of 1,000 or more inhabitants.

Detailed Characteristics for States, Cities, and Counties, Series HC(1)-B. Sample data for some or all of the following areas: States, counties, SMSA's, urbanized areas, and places of 2,500 or more inhabitants.

Vol. II. Metropolitan Housing Characteristics, Series HC(2). Detailed and cross-classified data. One report for each SMSA and a national summary report.

Vol. III. Block Statistics. Series HC(2). One report for each urbanized area showing data for individual blocks on selected housing and population subjects. Also includes reports for certain communities outside urbanized areas.

1960 CENSUS OF HOUSING

Vol. I. States and Small Areas.

Vol. II. Metropolitan Housing.

Vol. III. City Blocks.

Vol. IV. Components of Inventory Change.

Part 1A. 1950 to 1959 Components.

Part 1B. Inventory Characteristics.

Part 2. 1957 to 1959 Components. 10 reports. For the United States and 9 metropolitan areas.

Vol. V. Residential Finance.

Part 1. Homeowner Properties.

Part 1 Supplement. Homeowner Properties—Nonwhite Families.

Part 2. Rental and Vacant Properties.

Vol. VI. Rural Housing.

Vol. VII. Housing of Senior Citizens.

1969 CENSUS OF AGRICULTURE

Final reports to be issued in 1971:

Farms, Farm Characteristics, Farm Products, Series AC69-State and county number. A separate report for each county and State.

1964 CENSUS OF AGRICULTURE

- Vol. I. Counties.** 53 reports. For each State, Puerto Rico, Guam, and Virgin Islands. Data by counties and the State on number and characteristics of farms and farm operators. For subjects covered, see Vol. II below.
- Vol. II. General Report—Statistics by Subjects.** 11 reports. Data for the United States, regions, divisions, and States on such subjects as farms, farmland, livestock and poultry, crops, characteristics of farm operators, farm facilities, farm expenditures, farm labor, and land improvement practices.
- Vol. III. Special Reports.** Include data on farm labor, farm debt, and the sample survey of agriculture, and a series of agricultural maps.

1967 CENSUS OF BUSINESS

Retail Trade

- BC67-RA.** 54 Area reports. For each State, the District of Columbia, the Virgin Islands, Guam, and the United States, Data by kind of business on number of establishments, sales, payroll, employment, and number of proprietors of unincorporated businesses, for the State, standard metropolitan statistical areas, counties, and cities. Reports for the Virgin Islands and Guam also include data on mining, manufacturing, wholesale trade, and selected services.
- BC67-RS.** 3 Subject reports. Sales size, employment size, and single units and multi-units. Data by kind of business on number of establishments, sales, payroll, and employment for the United States, States, and selected standard metropolitan statistical areas.
- BC67-MRC.** 49 Major Retail Center reports. Data for major retail centers in each standard metropolitan statistical area in the United States and for central business districts in cities with 100,000 inhabitants or more on number of establishments, sales, payroll, and employment for detailed kinds of retail business.
- BC67-MLS.** 52 Retail Merchandise Line Sales reports. For each State, the District of Columbia, and the United States. Data on number and sales of establishments in a specified kind of business and number and sales by 25 broad merchandise lines. For the United States, geographic divisions, States, standard metropolitan statistical areas, and nonmetropolitan areas.

Wholesale Trade

- BC67-WA.** 52 Area reports. For each State, the District of Columbia, and the United States. Data on number of establishments, sales, payroll, employment, and number of proprietors of unincorporated businesses for total wholesale trade, and number of establishments and sales for merchant wholesalers and all other wholesale types combined. For the State, standard metropolitan statistical areas, counties, and cities.
- BC67-WS.** 7 Subject reports. Sales size, employment size, and single units and multiunits; credit sales, receivables, and bad debt losses; sales by customer classes; commodity-line sales; petroleum bulk stations and terminals; warehouse space and equipment, and delivery equipment; and value added and capital expenditures of merchant wholesalers. Data by kind of business and type of operation, for the United States, geographic divisions, States, and standard metropolitan statistical areas. (A separate report gives data on space, revenue, employment and payroll of public warehouses for the United States, States, and large metropolitan areas.)

Selected Services

- BC67-SA.** 52 Area reports. For each State, the District of Columbia, and the United States. Data on number of establishments, receipts, payroll, employment and number of proprietors of unincorporated businesses in the personal, business, and repair service trades, selected amusement and recreation service trades, and hotels, motels, and tourist courts for standard metropolitan statistical areas, counties, and cities.
- BC67-SS.** 7 Subject reports. Laundry, cleaning, and related services; hotels, motels, and tourist courts; motion pictures; law firms; architects and engineers; travel agencies. Data on number of establishments, receipts, payroll, employment, and specialized items of information, for the United States, States, and selected standard metropolitan statistical areas.

Construction Industry

- CC67-I.** Industry reports. Data by kind of business on number of construction establishments; receipts; employment; payrolls; payments to subcontractors; payments for materials; rental of equipment; and capital expenditures.

1967 CENSUS OF BUSINESS—Continued

Construction Industry—Continued

CC67-A. Area report. For the United States, States, and the District of Columbia.

1967 CENSUS OF MANUFACTURES

Reports scheduled for issuance during 1970:

MC67(1)-1 to 12. Subject reports. Data on size of establishments, inventories, capital expenditures, assets, rents, fuels and electric energy, water consumption, and distribution of sales of manufactured products.

MC67(2)-20A to 39E. 80 Industry reports. Data for each of 425 manufacturing industries on quantity and value of products shipped and materials consumed, cost of fuels and electric energy, capital expenditures, assets, rents, inventories, employment, payrolls, payroll supplements, man-hours, value added by manufacture, number of establishments and number of companies. Selected data for each industry shown by geographic region and State, employment-size class of establishment, and degree of primary product specialization.

MC67(3)-1-51. Area reports. A separate report for each State and the District of Columbia. Data for industries and industry groups on value of shipments, value added by manufacture, employment, payrolls, payroll supplements, man-hours, new capital expenditures, inventories, assets, rents, and number of manufacturing establishments. Similar totals for all manufacturing industries and some detailed data shown also for counties, standard metropolitan statistical areas, and selected cities.

MC67(S)-5. Concentration Ratios in Manufacturing. Percent of value of shipments accounted for by the 4, 8, 20, and 50 largest companies in each industry and product group.

MC67-PR. Statistics for Puerto Rico. Data on number of establishments, employment, payrolls, value of shipments, value added by manufacture, inventories, capital expenditures, products, and employment of production workers, by industry, geographic area, and tax status of establishments.

1963 CENSUS OF MANUFACTURES

Vol. I. Summary and Subject Statistics.

Vol. II. Industry Statistics.

Vol. III. Area Statistics.

MC63-PR. Statistics for Puerto Rico.

1967 CENSUS OF MINERAL INDUSTRIES

Reports scheduled for issuance during 1970:

MIC67(1)-1 to 6. Subject reports. Data on size of establishments, type of operation, fuels, electric energy, supplies, and capital expenditures.

MIC67(1)-10A to 14F. 14 Industry reports. Data for each of 49 mineral industries and 10 subindustries on quantity and value of products shipped and supplies used, quantity and cost of fuels and electric energy, capital expenditures, assets, rents, employment, payrolls, man-hours, cost of contract work, cost of purchased machinery, value added in mining, mineral development and exploration costs, number of establishments, and number of companies. Detailed data shown by geographic region and State and by type of operation.

MIC67(2)-1 to 49. 49 Area reports. A separate report for each State, (Delaware, Maryland, and District of Columbia combined in a single binding). Data shown for each of 49 mining industries for industry groups by type of operation and county, and for number of establishments by size and county. Data also shown for value of shipments, value added by mining, employment, payrolls, man-hours, capital expenditures, assets, rents, costs of supplies, and purchased machinery installed.

1963 CENSUS OF MINERAL INDUSTRIES

Vol. I. Summary and Industry Statistics.

Vol. II. Area Statistics.

1967 CENSUS OF TRANSPORTATION

TC67-N1. National Travel Survey. Data for each quarter of 1967 and a summary for the year. Trips, travelers, traveler nights, and traveler miles by such characteristics as means of transportation; purpose, duration, origin, destination, and distance of trip; size of party; and lodgings used. Also, travel frequency of households and persons by socioeconomic factors and travel characteristics.

TC67(A)-T1 to T61. Truck Inventory and Use Survey. 61 reports. A separate report for each State, the District of Columbia, each of 9 geographic divisions, and the United States. Primarily, percent distribution of number of vehicles for such characteristics as major use, annual vehicle miles, year model, body type and vehicle size-class, single unit or combination and axle arrangement, type of fuel, range of operation, acquisition, and maintenance responsibility.

Commodity Transportation Survey:

TC67C1-1 to C1-24. 24 Shipper Group reports. Data on manufacturing establishments grouped by shipper classes and on tons and ton-miles, by means of transport, length of haul, origin, destination, and weight of shipment.

TC67C2-1 to C2-30. 30 Area reports. Data on flow of commodities from manufacturing plants in each of 25 production areas, 9 census divisions, and selected States. Data shown for tons and ton-miles of commodities shipped, by means of transport, length of haul, and area of destination.

TC67C3-1 and C3-2. Commodity Group reports. Data on flow of commodities at various transportation commodity classification levels showing tons and ton-miles of shipments, by means of transport, length of haul, weight of shipment, origin, and destination.

1963 CENSUS OF TRANSPORTATION

Vol. I. Passenger Transportation Survey.

Vol. II. Truck Inventory and Use Survey.

Vol. III. Commodity Transportation Survey.

Parts 1 and 2. Commodity Groups.

Parts 3 and 4. Shipper Groups and Production Areas.

Vol. IV. Motor Carrier Survey.

Guide to State Statistical Abstracts

This bibliography includes the most recent State statistical abstracts (including one for Puerto Rico) published since 1962 plus those that will be issued in late 1970 or early 1971. When a statistical abstract does not exist for a particular State, a near equivalent has been listed wherever possible. All sources contain, under one cover, statistical tables on a variety of subjects for the State as a whole, its component parts, or both. The page counts given for publications cited as "in process" are approximate.

Alabama

University of Alabama, University, Center for Business and Economic Research (formerly Bureau of Business Research)

Economic Abstract of Alabama. 1966. 200 pp.

Alaska

Department of Economic Development, Juneau

Alaska, Statistical Review, 1968. 1969. 225 pp.

Arizona

University of Arizona, Tucson, Division of Economic and Business Research (formerly Bureau of Business and Public Research)

Arizona County Base Book. 4th ed. 1962. 59 pp.

Valley National Bank, Phoenix

Arizona Statistical Review. 26th ed. 1970.

Arkansas

Arkansas Almanac, Incorporated, Little Rock

Arkansas Almanac 1969. 11th ed. 320 pp.

California

Department of Finance, Sacramento, Budget Division

California Statistical Abstract. 10th ed. 1969. 228 pp.

Colorado

State Planning Division, Denver (Currently available from Division of Accounts and Control, Department of Administration)

Colorado Year Book, 1962-1964. 26th ed. 1965. 1072 pp.

Connecticut

Connecticut Development Commission, Hartford, Research and Information Division

Connecticut Market Data. 1970. 96 pp.

Delaware

Delaware State Planning Office, Dover

A Statistical Abstract of the State of Delaware. 1968. 7 pp.

Florida

University of Florida, Gainesville, Bureau of Economic and Business Research

Florida Statistical Abstract, 1970. 4th ed. 1970.

Georgia

University of Georgia, Athens, Division of Research, College of Business Administration

Georgia Statistical Abstract, 1970. 1970. 408 pp.

Hawaii

Department of Planning and Economic Development, Honolulu

The State of Hawaii Data Book: A Statistical Abstract. 4th ed. 1970. 136 pp.

Idaho

University of Idaho, Moscow, Bureau of Business and Economic Research

Idaho Statistical Abstract. 1966. 286 pp.

Illinois

Department of Business and Economic Development, Springfield

Illinois Regional Economic Data Book-1970. 1970. 350 pp.

Indiana

Indiana State Chamber of Commerce, Indianapolis

Statistical Abstract of Indiana Counties. 1963.

Iowa

Iowa Development Commission, Des Moines, Research Division
Statistical Abstract of Iowa. 1969. 48 pp.

Kansas

University of Kansas, Lawrence, Center for Regional Studies
Kansas Statistical Abstract, 1969. 5th ed. 1970. 100 pp.

Kentucky

Department of Commerce, Frankfort
Deskbook of Kentucky Economic Statistics. 8th ed. 1970. 25 pp.

Louisiana

Louisiana State University, New Orleans, Division of Business and Economic Research
Statistical Abstract of Louisiana. 4th ed. 1971.

Maine

Department of Economic Development, Augusta
Maine Pocket Data Book—A Statistical Abstract. 2d ed. 1970. 252 pp.

Maryland

Department of Economic Development, Annapolis
Maryland Economic Atlas. 1967. 64 pp.
Statistical Abstract. 1970. (In process.)

Massachusetts

Department of Commerce and Development, Boston
Fact Book. 1970. unpag. (Limited distribution.)

Michigan

Michigan State University, East Lansing, Bureau of Business and Economic Research
Michigan Statistical Abstract. 8th ed. 1970. 475 pp.

Minnesota

Department of Economic Development (formerly Department of Business Development), Saint Paul, Division of Research
A Statistical Profile of the State of Minnesota. 4th ed. 1966. 43 pp.

Mississippi

Mississippi State University, State College, College of Business and Industry, Division of Research
Mississippi Statistical Abstract. 1970.

Missouri

University of Missouri, Columbia, Extension Division
Data for Missouri Counties. 1970. (Loose leaf; updated periodically.)

Montana

Montana State Department of Planning and Economic Development, Helena
Montana Statistical Review. 1968. 46 pp.

Nebraska

Department of Economic Development, Lincoln, Division of Industrial and Information Service
Nebraska Statistical Handbook. (Updated periodically.)

Nevada

Department of Economic Development, Carson City
Nevada Community Profiles. 1970.

New Jersey

Department of Conservation and Economic Development, Trenton
County Data Summaries. (Not dated.) Includes data for counties for 1950-58; 1958-60; 1960-62; 1962-64.
Supplements. 1960-64; 1965; 1966; 1967; 1968. Single sheets.
The New Jersey Almanac, Inc., Cedar Grove
The New Jersey Almanac. 1966-67. 2d ed. 768 pp.

New Mexico

University of New Mexico, Albuquerque, Bureau of Business Research
New Mexico Statistical Abstract, Vol. 1. 1970. 100 pp.

New York

Division of Budget, Albany, Office of Statistical Coordination
New York State Statistical Yearbook. 3d ed. 1970. 268 pp.

North Carolina

Department of Administration, Raleigh, in cooperation with Association for Coordinating
Interagency Statistics
North Carolina Statistical Abstract. 1970. (In process.)

North Dakota

Business and Industrial Development Department, Bismarck
North Dakota Growth Indicators. 7th ed. 1970. 59 pp.

Ohio

Development Department, Columbus, Economic Research Division
Statistical Abstract of Ohio: 1969. 2d ed. 1969. 409 pp.

Oklahoma

University of Oklahoma, Norman, Bureau for Business and Economic Research
Oklahoma Data Book, 1968. 1968. 172 pp.

Oregon

University of Oregon, Eugene, Bureau of Business and Economic Research
Oregon Economic Statistics, 1970. 1970. 92 pp.

Pennsylvania

Department of Commerce, Harrisburg, Bureau of Statistics
Pennsylvania Statistical Abstract, 1970. 12th ed. 1970. 326 pp.

Rhode Island

Rhode Island Development Council, Providence
Rhode Island Basic Economic Statistics. 1970. 180 pp.

South Carolina

University of South Carolina, Columbia, Bureau of Business and Economic Research
Selected South Carolina Economic Data. 1969. 114 pp.

South Dakota

University of South Dakota, Vermillion, Business Research Bureau
South Dakota Economic and Business Abstract, 1939-1962. 1963. 263 pp. (Bulletin No. 79.)
(Out of print.)

Tennessee

University of Tennessee, Knoxville, Center for Business and Economic Research
Tennessee Statistical Abstract, 1969. 1st ed. 1968. 707 pp. (Illustrated.)

Texas

Dallas Morning News, Dallas
Texas Almanac, 1970-71. 1969. 704 pp.

Utah

University of Utah, Salt Lake City, Bureau of Economic and Business Research
1969 Statistical Abstract of Utah. 1969. 244 pp.

Vermont

Central Planning Office, Montpelier
An Audit of Vermont; A Statistical Summary of Selected Recent Economic Changes. 1963. 11
pp. (Out of print.)

Virginia

University of Virginia, Charlottesville, Thomas Jefferson Center for Political Economy
Statistical Abstract of Virginia: 1966. Vol. I. 1967. 313 pp.
Statistical Abstract of Virginia. Vol. II. 1970. 524 pp.

Washington

Washington State Research Council, Olympia
The Research Council's Handbook. 3d ed. 1968. 647 pp.

West Virginia

Agricultural Experiment Station and Office of Research and Development, Morgantown
County Study Data Book: Measures of Social Change in West Virginia, 1940-1965. 1967.
105 pp.

West Virginia University, Morgantown, Bureau of Business Research
West Virginia Statistical Handbook, 1965. 1964. 165 pp. (Business and Economic Studies, V. 9,
No. 1.)

Wisconsin

Department of Administration, Madison, Bureau of State Planning, Management and Information
Sciences Section
Wisconsin Statistical Abstract. 1969. 148 pp.

Wyoming

Agricultural Experiment Station, Laramie
Wyoming Agriculture; Economic Statistics of Wyoming's Agricultural Industry. 1965. 84 pp.
(Mimeo Circular No. 211; revised edition in process.)
University of Wyoming, Laramie, Division of Business and Economic Research
Wyoming Data Book. 1970. (In process.)

Puerto Rico

Planning Board, San Juan, Bureau of Economic and Social Analysis
Statistical Yearbook 1969. 200 pp. (In process.)

Source Agencies and Table Numbers

This listing presents the names of all government and nongovernment agencies supplying the data comprising this volume, together with the numbers of the tables in which each agency's data appear. Table numbers followed by "co-op." indicate that the statistics were compiled by the agency listed, in cooperation with another agency; those followed by "part" indicate that statistics from another source appear in the same table.

GOVERNMENT AGENCIES

Administrative Office of the U.S. Courts:

233-238, 400, 741, 742

Agriculture:

Agricultural Stabilization and Conservation Service:

934, 965-966 (co-op.)

Economic Research Service:

118, 119, 286, 352, 526, 908, 914, 921, 923, 927-933, 935, 939, 940, 941 (co-op.), 942, 944, 946, 948, 949, 953 (co-op.), 955, 959, 963, 967 (co-op.), 974, 981 (co-op.), 1128 (part), 1131

Farmer Cooperative Service:

709 (part), 920

Food and Nutrition Service:

121, 122, 125, 126, 1128 (part)

Foreign Agricultural Service:

945

Forest Service:

295, 983, 984 (part), 985-987, 988 (part), 989, 993-995

Rural Electrification Administration:

709 (part), 755, 788

Soil Conservation Service:

926

Statistical Reporting Service:

124 (part), 351, 353, 909, 922, 941 (co-op.), 951, 952, 953 (co-op.), 954, 956-958, 960, 961 (co-op.), 962, 964, 965-967 (co-op.), 968-970, 972 (co-op.), 973 (part) 975 (part), 976, 977, 979, 980, 981 (co-op.), 998, 1134 (part)

Appalachian Regional Commission:

506

Atomic Energy Commission:

816 (part), 817

Board of Governors, Federal Reserve System:

638-650, 652, 654, 658, 664, 666 (part), 668, 669, 670 (part), 671 (co-op.), 672 (part), 673, 675, 676 (part), 677, 679 (part), 680, 683, 725 (co-op.), 732, 1023, 1103, 1113-1115, 1211

Civil Aeronautics Board:

872-873 (co-op.), 876-878 (co-op.)

Civil Service Commission:

375 (co-op.), 440, 591-600, 804 (co-op.)

Commerce:

718 (co-op.), 838 (co-op.)

Bureau of the Census:

711, 712, 838 (co-op.), 1226, 1227, 1263

Agriculture Division:

911-913, 915-919, 924, 936, 937, 950, 973 (part), 975 (part), 978, 1246

Commerce—Continued

Bureau of the Census—Continued

Business Division:

241, 840 (part), 1169, 1171-1182, 1183 (co-op.), 1184-1187, 1190-1194, 1247 (co-op.), 1249 (co-op.)

Construction Statistics Division:

827, 1067-1073, 1076 (part), 1080-1083, 1084 (co-op.), 1188, 1189

Foreign Trade Division:

215 (part), 816 (part), 842 (co-op.), 883, 886-889, 898, 899, 947, 1003 (part), 1018-1019 (co-op.), 1029, 1134 (part), 1154, 1220, 1224-1225 (co-op.), 1228-1229, (co-op.), 1230 (part), 1231-1233, 1241

General Reports Division:

474, 475, 537 (part), 542 (co-op.), 548 (co-op.), 704 (part)

Geography Division:

19 (part), 252, 255

Governments Division:

227-230, 441, 442, 601-608, 610-637

Housing Division:

760, 1085, 1087-1089, 1091, 1092, 1093 (co-op.), 1094-1097, 1099, 1100 (part)

Industry Division:

381, 382, 767, 768, 815, 840 (part), 880-881 (co-op.), 882, 961 (co-op.), 982, 990, 991, 997 (co-op.), 999, 1000 (co-op.), 1001, 1002, 1007, 1008, 1032, 1111, 1117-1120, 1122-1125, 1127, 1132, 1133, 1135-1140, 1142, 1146-1151, 1157, 1158, 1159 (part), 1160-1166, 1223, 1247-1248 (co-op.)

Population Division:

1-17, 18 (co-op.), 19 (part), 20-45, 47, 48, 61 (part), 62-64, 75 (part), 124 (part), 128 (part), 148, 151-162, 165 (co-op.), 200, 243, 254, 330-331 (part), 334 (part), 336 (part), 337, 347, 422 (part), 486-489, 491-505, 547, 548 (co-op.), 553 (part), 554 (part), 555, 557 (part), 558, 752, 845, 910, 1234-1237

Transportation Division:

311, 851

Bureau of International Commerce:

522, 1116, 1221, 1222, 1224-1225 (co-op.), 1228-1229 (co-op.)

Business and Defense Services Administration:

261, 262, 764, 997 (co-op.), 1086, 1129 (part), 1144, 1159 (part), 1230 (part)

GOVERNMENT AGENCIES—Continued

Commerce—Continued

Environmental Science Services Administration:

253, 260, 271-283

Maritime Administration:

900, 902, 903 (part), 907

Office of Business Economics:

181 (part), 307, 313-315, 470-472, 476-483, 484 (co-op.), 590, 679 (part), 706, 715, 724, 725 (co-op.), 726-728, 730, 731, 842 (co-op.), 884, 938, 1003 (part), 1112, 1121, 1168, 1170, 1183 (co-op.), 1200, 1205-1210, 1212, 1214, 1215, 1258 (co-op.)

Patent Office:

814

Congress:

Clerk of the House:

535 (part), 536, 537-538 (part), 544, 545 (part), 549 (part), 550 (part), 553 (part), 557 (part), 560 (part)

House Committee on Government Operations:

572, 573

Joint Committee on Printing:

540, 541, 542-543 (co-op.)

Joint Committee on Internal Revenue Taxation:

576

Joint Economic Committee:
