SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States: 1954.* (Seventy-fifth edition.) Washington, D. C., 1954.

Inquiries concerning data presented in this volume should be directed to the agency indicated by the source noted at the end of the table in question.

Suggestions and comments should be addressed to the Director, Bureau of the Census, Washington 25, D. C.

THE SECRETARY OF COMMERCE
WASHINGTON 25

June 14, 1954

Dr. Robert W. Burgess, Director
Bureau of the Census
Department of Commerce

My dear Dr. Burgess:

I wish to convey my sincerest congratulations to the Bureau of the Census on this occasion which marks the seventy-fifth anniversary of the Statistical Abstract of the United States.

The business and governmental affairs of a democratic people can be conducted successfully only on the basis of a wide distribution of reliable information. In our country this necessity has long been recognized both by well informed citizens and by the Federal Government itself and many statistical activities have been carried through successfully for long periods. The Statistical Abstract is an outstanding example of such an activity carried through by a government agency. For the past 75 years this publication has brought together and made generally available in one volume the statistics which are most useful in answering the questions of our fellow citizens and helping them to solve their problems.

It is often noted that Americans take particular satisfaction in observing, recording, and quoting the figures which describe and measure the physical and economic world we live in. The size of our country, the magnitude of its resources, the variety of its products, and the wide extent of its needs result inevitably in much reliance on recorded quantitative facts. We have learned well that we must keep informed as to the facts and make use of them as fundamental guides in all that we do.

In this environment the Statistical Abstract over the years has performed an inestimable service. Its growth in size since the 1878 edition from a modest 157 pages to more than 1,000 pages parallels a growth in value both as one of the tools of our development and as a mirror of the vitality and the progress of the people in the United States.

Sincerely yours,

A handwritten signature in cursive script, reading "Cecilia Neely", is written in dark ink.

Secretary of Commerce

ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* has been published annually for the past 75 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date.

The *Statistical Abstract* is prepared in the office of Morris H. Hansen, Assistant Director for Statistical Standards. This issue was compiled by William Lerner under the direction of Edwin D. Goldfield, Acting Chief, Statistical Reports Section. Elma D. Beynon is editorial supervisor and Robert L. Rowland assisted in planning.

The cooperation of many persons acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. The list of tables by source (pp. XII-XV), as well as the source note following each table, indicates the various government and private agencies cooperating in furnishing information to the *Statistical Abstract*.

AUGUST 1954.

PREFACE

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the industrial, social, political, and economic organization of the United States. It includes a representative selection of data from most of the important statistical publications, both governmental and private. Emphasis is given primarily to national data. Data for regions and individual States are presented to a lesser extent. Data for cities or other small geographic units appear only in a small number of instances.

This book is designed to fulfill two functions: First, to serve as a convenient volume for statistical reference; and second, to serve as a guide to other statistical publications and sources. The source of each table presented is given at the foot of the table. The publications cited usually contain additional statistical detail relating to the subject matter shown, and a more complete discussion of relevant definitions and concepts than can be presented here. Also, they may supply data for smaller geographic units. Where contributing agencies are cited as sources, without mention of publications, more detailed information frequently is available from their unpublished tabulations and records.

1954 edition.—This edition is the seventy-fifth annual issue. The statistics shown are the latest which were available in the early part of the 1954 calendar year. The year, 1954, used to designate this edition, represents both the year during which compilation was made and the year of publication.

Each year several sections are subjected to intensive review. This review introduces new subject material of current interest and eliminates data that are less timely or appear in greater detail than seems currently warranted.

Among the new tables introduced in this issue are tables on the following subjects:

Projections of the population to 1975
Population and characteristics, by race

Children born per 1,000 women
Aliens reporting, by nationality
Illiterates, by selected characteristics
Women in manufacturing industries
Korean battle casualties

Social welfare expenditures
Characteristics of the aged
Characteristics of aged recipients of public assistance

Federal retirement systems
Community Chest campaigns
Average family expenditures for selected cities

National wealth estimates
Political Party composition of Congress, by States

Circulation of daily and Sunday newspapers

New books published, by subject
Postal revenues and expenditures, by class of mail

Natural gas reserves
Automobile ownership and financing
Motor vehicle travel mileage and speed

Wage scales for able-bodied seamen
Freight carried on the Great Lakes and Mississippi River

Farm-to-retail price spreads of farm food products

Concentration of employment in manufacturing companies, by industry

Shipments of steel products, by class

There are, in addition, new tables on a number of other subjects too numerous to list.

Major omissions of tables occurred in the Manufactures section and the Distribution and Services section. The information shown in the previous edition for these sections from the 1947 Census of Manufactures and the 1948 Census of Business has been condensed and rearranged. The basic summaries from these censuses, however, have been retained and will continue to be presented until more recent data become available.

Supplements to the Abstract.—The *Statistical Abstract*, as an annual one-volume publication, is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, market researchers, and others often require data for individual cities, counties, metropolitan areas, and other small areas as well as for States. Economists, teachers, social scientists, historians, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the *Abstract* has been issued.

The *County and City Data Book, 1952*, a small-area supplement, issued in May 1953, brings together 128 items of information for each county, standard metropolitan area, and State; and 133 items for each of 484 cities with 25,000 or more inhabitants in 1950. Most of the statistics in this volume were obtained from the results of the 1950 Censuses of Agriculture, Population, and Housing. Other subjects covered include 1950 data for births, deaths, and marriages; bank deposits and E Bond sales; city government finances and employment; city school systems; farm-operator family level-of-living index; and other items of social and economic importance. Final figures for a number of items from the 1948 Census of Business and the 1947 Census of Manufactures are also shown. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for \$4.25.

Historical Statistics of the United States, 1789-1945, a historical supplement, was published in July 1949. This volume presents, in compact form, approximately 3,000 statistical time series (mostly on an annual basis) which cover various periods from 1789 to 1945. These time series reflect economic, social, and political aspects of the development of the Nation since the Federal Government was formally established. In the preparation of this supplement the Bureau of the Census had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for \$3.25.

Continuation to 1952 of Historical Statistics of the United States, 1789-1945, issued in May 1954, presents data for 1946 to 1952 for the current series shown in *Historical Statistics*, mentioned above. It also contains the latest revisions for many of the series in *Historical Statistics*. This publication is also on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for 55 cents.

Responsibility.—As implied in the title, the contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material. (See pages XII-XV.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material for the general user and for proper presentation rests with the Bureau, even though carried out with the cooperation of many technicians who have given generously of their time and knowledge in order to assist the Bureau's staff in making the presentation as meaningful and useful as possible.

The cooperation of users of this volume must also be acknowledged. Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

CONTENTS

Section	Page
TABLES BY SOURCE -----	XII
<i>Figure I. Map of the United States, Showing Census Divisions and Regions</i> -----	xvi
1. AREA AND POPULATION -----	1
Area—Number and geographic distribution of inhabitants—Population estimates—Urban and rural population—Sex—Age—Race—Nativity and parentage—Citizenship—Mobility status—Fertility—Marital status—Households—Institutional population—Religious bodies.	
<i>Figs. II-VII. Population: Change by States; Density by Counties; Urban and Rural Trends; Composition by Age and Sex; Marital Status; Center of Population.</i>	
2. VITAL STATISTICS, HEALTH, AND NUTRITION -----	61
Registration area—Births—Completeness of birth registration—Reproduction rates—Life table values—Deaths—Marriage and divorce—Hospitals—Mental patients under institutional care—Morbidity—Physicians and dentists—Medical and dental schools—Nutrition—Federal food-distribution programs.	
<i>Fig. VIII. Vital Statistics Rates.</i>	
3. IMMIGRATION, EMIGRATION, AND NATURALIZATION -----	98
Immigration—Immigration quotas—Emigration—Movement and characteristics of aliens—Displaced persons and war brides—Arrivals and departures, aliens and citizens—Naturalization.	
<i>Figs. IX-X. Immigrants Admitted; Naturalization.</i>	
4. EDUCATION -----	114
School enrollment—Years of school completed—Illiteracy—Elementary and secondary schools—Institutions of higher education—Special schools—Vocational schools—Federal aid—Land grant institutions.	
<i>Fig. XI. Average Expenditure Per Pupil.</i>	
5. LAW ENFORCEMENT AND FEDERAL COURTS -----	146
Crime rates—Arrests—Federal courts—Prisoners in State and Federal prisons—Federal prisoners released—Prisoners executed.	
<i>Figs. XII-XIII. Federal Prisoners Received from Courts; Repeaters and First Offenders Among Federal Prisoners.</i>	
6. CLIMATE -----	162
Elevation of stations—Temperature—Precipitation—Snowfall—Sunshine—Wind velocity—Relative humidity—Degree days.	
<i>Fig. XIV. Average July Temperature.</i>	
7. PUBLIC LANDS AND NATIONAL PARK SYSTEM -----	177
Lands in Federal ownership—Public and Indian land—Land grants—National Park System—Visitors to National Parks—Lands under jurisdiction of Bureau of Indian Affairs.	
<i>Fig. XV. Acquisition of Territory of Continental United States.</i>	

Section	Page
8. LABOR FORCE, EMPLOYMENT, AND EARNINGS	188
Employment status—Industry—Farm employment and wage rates—Occupation—Output per man-hour—Production workers, average hours and earnings—Industrial injuries—Labor turnover—Labor-union membership—Work stoppages.	
<i>Figs. XVI-XVII. Change in Employment by Occupation Groups; Trends in the Labor Force.</i>	
9. MILITARY SERVICES AND VETERANS' AFFAIRS	238
Army—Air Force—Navy—Marine Corps—Expenditures for national security—War casualties—Ships—Airplanes—Selective service—Veterans, expenditures for veterans, other veterans' benefits.	
<i>Fig. XVIII. Federal Expenditures for the National Security and Veterans.</i>	
10. SOCIAL INSURANCE AND WELFARE SERVICES	253
Public expenditures for social security and related purposes—Old-age and survivors insurance—Unemployment insurance—Placements by public employment offices—Railroad retirement—Railroad unemployment and sickness benefits—Federal retirement systems—Workmen's compensation payments—Public assistance—Maternal and child health and welfare services—Vocational rehabilitation—Red Cross—Community Chest.	
<i>Fig. XIX. Social Security Operations.</i>	
11. INCOME, EXPENDITURES, AND WEALTH	293
The Nation's income, expenditure, and savings—Gross national product or expenditure—National income—Income payments to individuals—Distribution of families and individuals by income levels—Family income, expenditures, and saving—National wealth.	
<i>Figs. XX-XXIII. Per Capita Income for States; Median Income of Men and Women; Median Income of Whites and Nonwhites; Gross National Product.</i>	
12. PRICES	323
Wholesale prices—Purchasing power of the dollar—Indexes of consumers' prices—Retail prices—Electric bills and gas bills of residential consumers—Unit values of commodities exported and imported.	
<i>Figs. XXIV-XXV. Wholesale Price and Consumer Price Indexes.</i>	
13. ELECTIONS	341
Electoral and popular vote for President—Apportionment of congressional representation—Votes for U. S. Senators and Representatives and Governors—Registered voters—Citizens of voting age—Congressional activity and party affiliations—Lobbies.	
<i>Figs. XXVI-XXVII. Participation in National Elections; Composition of Congress by Party.</i>	
14. FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT	356
Receipts and expenditures—Appropriations—Internal revenue collections—Individual and corporation income tax returns—Public and private debt—Government securities—Assets and liabilities of Government corporations and credit agencies—Employees and payrolls.	
<i>Figs. XXVIII-XXX. Public and Private Debt; Federal Government Receipts; Federal Government Expenditures.</i>	

15. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT-----

408

Governmental units—Aid from Federal Government—Government revenue, expenditure, and debt—Public employment and payrolls—Retirement systems—State government finances—City government.

Figs. XXXI-XXXIV. Revenue, by Source; Expenditures; Employees; Payrolls.

16. BANKING AND FINANCE-----

439

Currency and gold—Bank clearings—Banks; principal assets, liabilities, and other information for all banks, Federal Reserve banks, National banks, mutual savings banks—Savings—Liquid assets—Bank suspensions—Savings and loan associations—Government credit agencies—Farm credit—Consumer credit—Credit unions—Money rates—Margin requirements—Commodity and stock exchanges—Securities markets—Share ownership—Insurance.

Figs. XXXV-XXXVII. Bank Deposits and Currency Outside Banks; Bank Assets; Stock Prices.

17. BUSINESS ENTERPRISE-----

499

Business population and turnover—Corporate assets and liabilities—Corporation income, profits, dividends, and taxes—Expenditures for advertising—Income of unincorporated enterprise—Sources and uses of corporate funds—Business expenditures for new plant and equipment—Gross private domestic investment—Research and development expenditures—Business sales and inventories—Industrial and commercial failures—Patents.

Fig. XXXVIII. New Plant and Equipment Expenditures.

18. COMMUNICATIONS-----

522

Telephone systems—Telegraph systems—Radio and television networks and broadcast stations—Newspapers, periodicals and books—Registration of copyrights—Postal service.

19. POWER-----

540

Supply of energy—Electric energy; capacity of generating plants and production—Financial and operating statistics of electric utility companies—Rural electrification—Gas utility industry—Natural gas reserves—Water power.

Fig. XXXIX. Capacity of Electric Generating Plants.

20. ROADS AND MOTOR VEHICLES-----

553

Rural roads—State highway systems—Public roads finances—Federal highway projects—Motor vehicle sales—Motor fuel consumption—State motor vehicle registrations and revenues—Automobile ownership and financing—Motor vehicle travel and speed—Motor vehicle accident fatalities.

Fig. XL. Speed of Motor Vehicles.

21. TRANSPORTATION, AIR AND LAND-----

567

Steam railways: Mileage; equipment; capitalization, investment, income, dividends, revenue, expenses; receiverships; freight and passenger service; employees; accidents—Express companies—Motorbus lines—Trolley-bus and street-car lines—Motor carriers of property and passengers—Civil aeronautics—Airports.

Fig. XLI. Revenue Freight Originated.

Section	Page
22. WATERWAYS, WATER TRAFFIC, AND SHIPPING	593
Water-borne commerce, foreign and domestic—Receipts and payments for international transportation—Ocean ports—Great Lakes ports—Rivers, canals, and connecting channels—Panama Canal traffic—Net tonnage of vessels entered and cleared in foreign trade—Merchant marine—Shipbuilding.	
23. IRRIGATION, DRAINAGE, AND SOIL CONSERVATION	616
Irrigation enterprises—Drainage on farms—Irrigation of agricultural lands—Drainage enterprises—Federal reclamation projects—Soil conservation.	
24. AGRICULTURE—GENERAL STATISTICS	631
Balance sheet of agriculture—National farm product—Number and acreage of farms—Land utilization—Value of farm property—Color and tenure of farm operators—Farm mortgage status and indebtedness—Indexes of farm prices—Farm income and expenditures—Farm-to-retail price spread—Farm labor—Farm facilities, electricity, etc.—Fertilizer consumption—Farmers' marketing and purchasing associations—Commodity Credit Corporation inventories and acquisitions. <i>Figs. XLII-XLIV. Farm Income; Prices Received and Paid by Farmers; Farm Assets.</i>	
25. AGRICULTURE—PRODUCTION AND RELATED SUBJECTS	666
Indexes of volume of farm production—Farm labor, land, and live-stock productivity—Agricultural products exported and imported—Acreage, production, and value of crops—Average prices of crops and livestock—Animal and vegetable fats and oils—Domestic animals and poultry on farms—Animal products—Stockyard receipts and shipments—Margarine—Cold storage holdings—Wool.	
26. FORESTS AND FOREST PRODUCTS	715
Commercial forest land—Stand and growth of saw timber—Annual drain—National forests—Forest tree distribution program—Forest fires—Lumber and lumber products.	
27. FISHERIES	732
Quantity and value of catch—Canned and frozen fishery products—Exports and imports of fishery products—Fish propagation.	
28. MINING AND MINERAL PRODUCTS	741
Mineral production—Prices—Consumption—Indexes of physical volume—Imports and exports—Employees—Injuries—Fuels—Other nonmetals—Metals. <i>Fig. XLV. Value of Mineral Production.</i>	
29. CONSTRUCTION AND HOUSING	772
Expenditures for private and public construction—Construction and building costs—Construction contracts—Wholesale price indexes of building materials—Public housing—Characteristics and occupants of dwelling units—Facilities and equipment—Rents and values—Nonfarm properties—Occupied farm dwelling units. <i>Fig. XLVI. New Construction Activity.</i>	

Section

FIG. I.—MAP OF THE UNITED STATES, SHOWING CENSUS DIVISIONS AND REGIONS

Source: Department of Commerce, Bureau of the Census.

1. Area and Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made once every ten years by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of members of the House of Representatives among the several States. From 1800 to 1900, the census was conducted by a temporary organization built up by the Superintendent of the Census appointed for each decennial census. In 1902, the Bureau of the Census was established as a permanent agency of the Government, known as the Census Office; it was charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, figures are supplied by a number of intercensal surveys and estimates in addition to the comprehensive decennial census enumeration.

The data shown here were selected chiefly from the 1940 and 1950 Censuses, and from special Census releases and reports. Most of the data presented apply to continental United States. Data for Territories and possessions are shown in section 33, although they are also included in certain tables here.

Related materials are presented in other sections of this volume. Thus, statistics of marriage and divorce are presented in section 2, Vital Statistics, Health, and Nutrition; statistics on family income are given in section 11, Income, Expenditures and Wealth; and Census data on employment and occupations are given in section 8, Labor Force, Employment, and Earnings. Data on the population in institutions are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 5, Law Enforcement and Federal Courts. Tables on nativity and citizenship are included in this section, but related data are included in section 3, Immigration, Emigration, and Naturalization.

Decennial censuses.—There are many difficulties involved in the process of obtaining a complete and unduplicated count of the population. Although great efforts are made to obtain such a count, the results fall short of this objective to some degree. These difficulties and their resultant shortcomings are present in all censuses. The magnitude of error, however, may vary from census to census.

In accordance with Census practice dating back to 1790, each person enumerated in the 1950 Census was counted as an inhabitant of his usual place of residence or usual place of abode, that is, the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile, although, in the vast majority of cases, the use of these different bases of classification would produce identical results.

Most of the data which are presented are based on complete counts. However, certain of the 1950 data are indicated as being obtained from a representative sample of 20 percent of the population, and some of the data are based on a sample of 3½ percent of the population. A separate line was provided on the population schedules for each person enumerated, with every fifth line designated as a sample line. The 20-percent sample data are based on the persons enumerated on these special lines. The 3½-percent sample data are based on a systematic selection of one-sixth of the persons on the same sample lines. Estimates of the number of persons with specified

Note.—This section presents data for the most recent year or period available on February 5, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

characteristics based on sample data have been obtained by multiplying the number of persons in the sample having these characteristics by five in the 20-percent sample, and by thirty in the 3½-percent sample. A few tables also include 1940 data obtained on a sample basis.

Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence when large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources. In addition, experience has shown that in mass operations two tabulations of a set of punch cards are not likely to yield precisely identical results. These differences are caused by occasional errors in the tabulation processes—machine failure, loss of punch cards, and other types.

Current Population Survey.—Several tables present statistics based on the Current Population Survey, conducted monthly by the Bureau of the Census. This survey covers a representative sample of about 25,000 households taken in selected areas throughout the United States. A statement indicating the sampling reliability of estimates based on this sample is given in the Sampling Note, p. 190.

The estimating procedures used to obtain the data for the Current Population Survey were changed beginning with the report for January 1953. Further information on this change is given in the Technical Note, p. 191.

Population estimates.—Population estimates for dates after April 1950, which are not the result of sample surveys, are based on data from the 1950 Census; statistics of births and deaths provided by the National Office of Vital Statistics, United States Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the armed forces provided by the Department of Defense. Estimates of State population are based on the same types of data and also make use of school statistics, State censuses, and for the intercensal years war ration book registrations.

Urban and rural areas.—In the course of its history, the Bureau of the Census has employed several definitions of urban area.

According to the new urban-rural definition adopted for the 1950 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, and villages, (b) incorporated towns of 2,500 inhabitants or more except in New England, New York, and Wisconsin, where "towns" are simply minor civil divisions of counties, (c) the densely settled urban fringe, including both incorporated and unincorporated areas, around cities of 50,000 or more, and (d) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining population is classified as rural.

According to the definition used in 1940, the urban population had been limited to all persons living in incorporated places of 2,500 inhabitants or more and in other areas classified as urban under special rules relating to population size and density. The remaining area of the country was classified as rural. The definition of urban area used in the 1940 Census was adopted substantially as stated above at the time of the 1910 Census.

In this edition, figures by urban and rural residence for all dates prior to the 1950 Census are in accordance with the old definition. Figures for 1950 and subsequent years are in accordance with the new definition unless otherwise stated.

Farm and nonfarm residence.—The rural population is subdivided into the rural-farm population, which comprises all rural residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. The method of determining farm and nonfarm residents used in the 1950 Census differs somewhat from that used in earlier surveys and censuses. Persons on "farms" who were paying cash rent for their house and yard only were classified as nonfarm; furthermore, persons in institutions, summer camps, motels, and tourist camps were classified as nonfarm.

Household.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers and employees, if any, who regularly live in the house. The number of households, thus defined, is the same as the number of "private households" or "families" as used in 1940 Census reports, and approximately the same as the number of "occupied dwelling units" as used in the 1950 Census of Housing. See section 29, Construction and Housing, for definition of dwelling unit. A person living alone or a group of unrelated persons sharing the same dwelling unit as partners is counted as a household.

A quasi household is a group of persons living in quarters not classified as a dwelling unit, for example, in a house with at least five lodgers, or in a hotel, institution, labor camp, or military barracks.

Family.—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers or resident employees and their relatives, living in a household or quasi household (other than the negligible number of such groups among inmates of institutions) and related to each other.

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is defined as a husband and his wife living together.

Unrelated individuals.—The term "unrelated individuals" as used here refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or a quasi household such as a guest, lodger or a resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or quasi household.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series B 24-25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

AREA AND POPULATION

No. 1.—TERRITORIAL EXPANSION OF CONTINENTAL UNITED STATES AND ACQUISITIONS OF PRINCIPAL TERRITORIES, POSSESSIONS, ETC.

[Boundaries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1940. See also *Historical Statistics*, series B 24-25]

¹ Includes estimated population of the Philippine Islands (1940: 16,356,000; 1930: 13,513,000), not shown separately. Ceded by Spain in 1898, the Philippine Islands constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

² Excludes inhabitants (36) of Midway Islands which were enumerated with Hawaii in 1930.

³ Excludes inhabitants (560) of Baker, Canton and Enderbury, Howland, Jarvis, Johnston and Sand, and Midway Islands which were enumerated with Hawaii in 1940.

⁴ Census taken as of Oct. 1 of preceding year.

⁵ Not enumerated.

⁶ Enderbury Island uninhabited at time of enumeration.

⁷ Less than 0.5 square miles.

⁸ Sand Island uninhabited at time of enumeration.

⁹ Little Swan Island uninhabited at time of enumeration.

¹⁰ Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukunono, Nurakita, Penrhyn, Quita Sueno Bank, Rakahanga, Rongador Cay, Serrana Bank, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands.

¹¹ Area figure is for Navassa (area, 2 square miles), and Baker, Howland, and Jarvis (combined area 3 square miles); excludes Kingman Reef, Quita Sueno Bank, Rongador Cay, and Serrana Bank (each less than 0.5 square mile). Area of other islands (listed in footnote 10) not available.

¹² Not enumerated or uninhabited at time of enumeration.

¹³ Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

¹⁴ Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

¹⁵ Leased (1914) from the Republic of Nicaragua for 99 years.

¹⁶ Figures are those of the 1930 and 1940 Censuses of the Republic of Nicaragua, May 1930 and 1940. Little Corn Island uninhabited at time of both enumerations.

¹⁷ Under trusteeship with the United States as administering authority. See *Trusteeship Agreement for the Former Japanese Mandated Islands* (Documentary Supplement No. 1) of the Security Council of the United Nations which became effective on July 18, 1947.

¹⁸ U. S. Department of the Navy. *Handbook on the Trust Territory of the Pacific Islands*. Washington, D. C., U. S. Government Printing Office, 1948.

¹⁹ Population 1930, 69,626; 1940, 131,258 (Censuses of Japan).

²⁰ U. S. Department of the Navy. *Report on the Administration of the Trust Territory of the Pacific Islands for the Period July 1, 1949 to June 30, 1950*. Washington, D. C., U. S. Government Printing Office, 1950.

²¹ Excludes United States citizens abroad on private business, travel, etc. Many of these were enumerated in the United States at their usual place of residence as absent members of households.

²² Based on 20-percent sample of reports received and consequently subject to sampling variability. Chances are about 2 out of 3 that the figure that would have been obtained from a complete count would have differed by less than 1,200 from figure shown here.

²³ Not available.

¹ Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

² Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

³ See table 3, note 14.

⁴ See table 3, note 17.

NO. 5.—POPULATION PER SQUARE MILE, BY STATES: 1800 TO 1950

[For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1800.]

No. 9.—ESTIMATES OF POPULATION BY STATES: JULY 1, 1944 TO 1953

[In thousands. Includes members of armed services stationed in continental United States, but excludes those overseas. Based on data from 1940 and 1950 Federal censuses, State censuses, school statistics, vital statistics, registrations for war ration books, immigration statistics, and data on armed forces. For enumerated population, 1790 to 1950, see table 11]

**No. 10.—PROJECTIONS OF THE POPULATION INCLUDING ARMED FORCES OVERSEAS,
BY AGE AND SEX, JULY 1, 1960 TO 1975, WITH ESTIMATES FOR JULY 1, 1950**

[In thousands. Series A, B, C, and D imply the following assumptions as to fertility: A.—1950-53 level continues to 1975; B.—1950-53 level continues to 1965, then declines to about the 1940 level by 1975; C.—1950-53 level declines from 1953 to about the 1940 level by 1975; D.—1950-53 level declines from 1953 to about the 1940 level by 1960 and continues at that level to 1975. Figures after the braces relate to persons born before July 1, 1950]

YEAR AND SEX	Total, all ages	Under 5 years	5 to 9 years	10 to 14 years	15 to 19 years	20 to 24 years	25 to 34 years	35 to 44 years	45 to 54 years	55 to 64 years	65 years and over

¹ Includes persons (5,318 in 1830 and 6,100 in 1840) on public ships in service of the United States, not credited to any region, division, or State.

² Population of Territory Northwest of River Ohio.

³ 1800 includes population (3,124) of those portions of Indiana Territory which were taken to form Michigan and Illinois Territories in 1805 and 1809, respectively, and that portion which was separated in 1816; 1810 includes population of area separated in 1816.

⁴ Population of Illinois Territory.

⁵ Population of Michigan Territory as then constituted; boundaries changed in 1816, 1818, 1834, and 1836.

⁶ Includes population of that part of Minnesota northeast of Mississippi River.

⁷ Includes population of area constituting that part of Minnesota lying west of Mississippi River and a line drawn from its source northwards to Canadian boundary.

⁸ Population of those parts of Mississippi Territory now in present State.

⁹ Population of those parts of present State included in Mississippi Territory as then constituted.

¹⁰ Censuses taken under direction of Spanish Government.

¹¹ Revised; unrevised figure is 38,558,371. Census of Southern States considered incomplete but there has been no revision of State figures, hence State and region figures do not add to total shown here.

¹² Includes population (325,464) of Indian Territory and Indian reservations, specially enumerated.

¹³ Population of Dakota Territory.

¹⁴ Includes population of area taken to form part of Arizona Territory in 1863.

¹⁵ Population of Utah Territory exclusive of that part of present State of Colorado taken to form Colorado Territory in 1861.

¹⁶ Population of Nevada Territory as organized in 1861.

No. 14.—POPULATION OF STANDARD METROPOLITAN AREAS: 1940 AND 1950

[Minus sign (—) denotes decrease. A standard metropolitan area is a county or group of contiguous counties (except in New England) which contains at least one city of 50,000 inhabitants or more in 1950 or subsequently. In addition to the county, or counties, containing such a city, or cities, contiguous counties are included in a standard metropolitan area if according to certain criteria they are essentially metropolitan in character and sufficiently integrated with the central city. In New England, standard metropolitan areas have been defined on a town rather than on a county basis. This list of areas is based on "Standard Metropolitan Area Definitions" issued by the Executive Office of the President, Bureau of the Budget, on October 17, 1950, and "Addendum to list . . ." issued December 22, 1953. For detailed explanation of standard metropolitan area concept and data for geographic components of each area, see source and *County and City Data Book, 1952*, a supplement to the *Statistical Abstract*]

STANDARD METROPOLITAN AREA	1940, Apr. 1	1950, Apr. 1	Per- cent in- crease 1940 to 1950	STANDARD METROPOLITAN AREA	1940, Apr. 1	1950, Apr. 1	Per- cent in- crease 1940 to 1950

¹ Bethlehem and South Bethlehem boroughs consolidated as Bethlehem city between 1910 and 1920. Combined population, 1890, 19,823; 1900, 23,099; 1910, 32,310.

² Population prior to incorporation.

³ Estimated.

⁴ Population shown is for New York city as now constituted.

⁵ Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1890, 148,514; 1900, 128,556; 1910, 150,355.

⁶ Allegheny city annexed to Pittsburgh in 1907. Combined population, 1890, 343,904; 1900, 451,512.

⁷ Corrected figure; exclusive of population (2,648) of certain territory outside city limits.

⁸ Union and West Hoboken towns consolidated as Union City in 1925. Combined population, 1900, 38,281; 1910, 56,426; 1920, 60,725.

⁹ Population shown for 1900 through 1950 is for District of Columbia, with which the city has been considered coextensive since 1895.

No. 20.—MEDIAN AGE OF URBAN AND RURAL POPULATION, BY COLOR AND SEX: 1940 AND 1950

[Definition of median.—The median is the value which divides the distribution into two equal parts—one-half of the cases falling below this value and one-half of the cases exceeding this value. For explanation of old and new urban definitions, see p. 2. See also *Historical Statistics*, series B 72-80]

No. 48.—HOUSEHOLDS, BY COLOR OF HEAD, WITH POPULATION PER HOUSEHOLD: 1890 to 1960

[Figures for 1890 to 1950 based on complete census. Figures for March 1950 to April 1953 based on Current Population Survey; see Sampling Note and Technical Note, p. 190. Figures for 1960 based on projections of past trends. Statistics for 1900, 1930, and subsequent years represent (private) households only; those for 1890, 1910, and 1920 include the small number of hotels, institutions, and other quasi households. For definition of households, see p. 3. See also *Historical Statistics*, series B 171-181]

DATE	HOUSEHOLDS				COLOR OF HEAD			
	Number	Annual increase over preceding date		Popu- lation per house- hold ²	White		Nonwhite ³	
		Number	Percent ¹		Number	Percent	Number	Percent
1890 (June 1).....	12,090,152	—	—	4.93	11,255,169	88.7	1,434,083	11.3
1900 (June 1).....	15,983,965	327,881	2.32	4.76	14,063,791	88.1	1,900,174	11.9
1910 (Apr. 15).....	20,255,555	434,371	2.44	4.54	—	—	—	—
1920 (Jan. 1).....	24,351,676	418,398	1.90	4.34	21,825,654	89.6	2,526,022	10.4
1930 (Apr. 1).....	29,904,663	541,755	2.02	4.11	26,982,994	90.2	2,921,669	9.8
1940 (Apr. 1).....	34,948,666	504,400	1.56	3.77	31,679,766	90.6	3,268,900	9.4
1950 (Apr. 1).....	42,857,335	790,867	2.06	3.53	38,420,035	91.0	3,822,380	9.0
CURRENT POPULATION SURVEY								
1950 (Mar. 15) ⁴	43,822,000	—	—	3.44	—	91.7	—	8.3
1951 (Apr. 15) ⁵	44,935,000	1,027,000	2.35	3.42	—	—	—	—
1952 (Apr. 15) ⁵	45,872,000	937,000	2.09	3.41	—	91.3	—	8.7
1953 (Apr. 15).....	46,828,000	956,000	2.08	3.40	—	—	—	—
PROJECTIONS								
1960 (July 1):								
High series ⁶	52,852,000	836,000	1.69	3.36	—	—	—	—
Medium series ⁶	51,272,000	617,000	1.27	3.44	—	—	—	—
Low series ⁶	48,435,000	223,000	.47	—	—	—	—	—

¹ Computed by compound interest formula.

² Obtained by dividing total population by number of households; hence, not strictly average size of household because about 2.5 percent of total population are members of quasi households.

³ The number of households with a Negro as head was 1,410,769 in 1890; 1,833,759 in 1900; 2,173,018 in 1910; 2,430,828 in 1920; 2,803,756 in 1930; 3,141,883 in 1940.

⁴ Based on 20-percent sample of 1950 Census returns.

⁵ Revised. See text of Series P-20, No. 48. The projections have been revised upward by 450,000.

⁶ Population base from Series P-25, No. 78. For high series, population series "A and B" was used as base, and for medium series, population series "C". If, for medium series, population series "D" had been used as base, population per household would have been 3.30. See headnote, table 10.

No. 55.—STATISTICS OF RELIGION—CHURCH MEMBERSHIP AND NUMBER OF CLERGY

[Represents latest information available from religious bodies; excludes a few groups giving no date, such as Church of Christ, Scientist, and Jehovah's Witnesses. Totals include, substantially, those religious bodies reporting to Bureau of Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed]

2. Vital Statistics, Health, and Nutrition

Vital statistics.—Vital statistics, including statistics of births, deaths, fetal deaths (stillbirths), marriages, divorces, and communicable diseases, are compiled and published by the National Office of Vital Statistics, Public Health Service. Reports in this field are also issued by the individual State bureaus of vital statistics.

Births, deaths, and fetal deaths.—The national collection of mortality statistics on an annual basis was begun in 1900. For that year, the death-registration States consisted of 10 States and the District of Columbia. In 1915, the national collection of birth statistics was begun with 10 States and the District of Columbia. Beginning with 1933, the birth and death registration areas have comprised the entire United States. National statistics on fetal deaths have been compiled for 1918 and annually since 1922.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence¹ of the mother or of the decedent. Unless otherwise indicated, data shown here are by place of residence.

Birth statistics include only live births. In 1951, for the first time, final figures were based on a systematic sample—50 percent—of all registered births. In prior years, they were based on a complete count of the records received in this office. Adjustments shown for underregistration of births are based, for the most part, on the results of nationwide tests of registration completeness in 1940 and 1950.

Death statistics include only deaths occurring in the continental United States; deaths among armed forces overseas are excluded. Fetal deaths (stillbirths) are excluded from death statistics.

Fetal death statistics are shown here beginning with 1942. These data include only fetal deaths for which the period of gestation was 20 weeks (or 5 months) or more, or was not stated, since many States do not require the registration of earlier fetal deaths. For years prior to 1942, available statistics on fetal deaths relate to the total group reported.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867–1906, 1916, 1922–32, 1937–40 and 1944–51. Estimates have been made for the intervening years as well as for years in which collections were not complete. At the present time, records of marriage are filed centrally in three-fourths of the States, and records of divorce in more than one-half of the States. Marriage and divorce data are shown here by place of occurrence.

Vital statistics rates.—Vital statistics rates are based upon population figures provided by the Bureau of the Census. The special situation created by the changes in size and disposition of the armed forces necessitated the use of different types of population bases during the war and postwar period.² Briefly, birth and divorce rates for 1941–46 for the United States are based on the total population including members of the armed forces overseas. Birth and divorce rates for 1947 to 1953 and death and marriage rates for 1940 to 1953 for the United States and States are based on total population present in the area, excluding armed forces overseas. For 1940 and 1950, rates are based on the enumerated population as of April 1; for other years, rates are based on estimated midyear populations.

Note.—This section presents data for the most recent year or period available on February 5, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

¹ For a discussion of methods of residence allocation and of significance of residence figures, see *Vital Statistics of the United States, 1950*.

² For a discussion of the interpretation of crude rates during wartime, see *Summary of Natality and Mortality Statistics, United States, 1948*, Vital Statistics—Special Reports, Vol. 21, No. 1, 1948; and *Marriage and Divorce in the United States, 1937 to 1946*, Vital Statistics—Special Reports, Vol. 23, No. 9, 1946.

Cause-of-death classification.—Causes of death are classified according to the *International List of Causes of Death*. The sixth and latest decennial revision was put into effect beginning with data for 1949.

Morbidity.—Statistics on morbidity are compiled and published by the Public Health Service. Each State health officer reports cases of selected diseases weekly and annually. The number of diseases reported to the State health officers depends on laws or regulations within the various States. However, most of the common communicable diseases are reportable in all States. In addition, data on illnesses are obtained by special surveys.

Medical care.—Annual statistics of medical care on a Nation-wide basis are obtained from the annual census of hospitals and institutions conducted by the American Medical Association. Such censuses include only hospitals, sanatoriums, and related institutions registered by that organization. Therefore, a relatively large number of institutions are not included in the survey. However, practically all of the large institutions in the country are canvassed with the result that most of the hospital bed facilities are usually included.

An index to one aspect of medical care is also provided by the numbers of births and deaths occurring in hospitals and institutions. These data may be found in the Public Health Service publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. Beginning with the 1947 report, the annual reports are issued by the National Institute of Mental Health, Public Health Service; from 1926-46, the data were collected annually by the Bureau of the Census.

Nutrition.—Statistics on the apparent consumption of food per capita by civilians are estimated by the Division of Agricultural Economics of the Department of Agriculture. On the basis of these estimates, statistics on the nutritive value of the per capita food supply are computed by the Division of Human Nutrition and Home Economics. These statistics are published quarterly by the Agricultural Marketing Service in the *National Food Situation*. Methodologies and detailed information back to 1909 are available in Agriculture Handbook No. 62, *Consumption of Food in the United States 1909-52*.

Statistics on Federal food distribution programs, and data on the quantity and costs of the food commodities distributed and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

Under the provisions of Federal laws, food commodities are distributed for school lunches and to institutions and welfare cases. Statistics on direct distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320 approved in 1935, as amended; Section 6 of the National School Lunch Act of 1946; Public Law 471, Eighty-first Congress; and commodities distributed under Section 416 of the Agricultural Act of 1949 on which the recipient paid the freight from point of storage, are presented in tables 104 and 105. Distribution to ultimate recipients is accomplished through cooperating distributing agencies in the States. Cost represents cost to the Federal government of the commodity as delivered to the State distributing agency and includes cost of purchase, handling, warehousing, and transportation charges, but excludes cost of administrative expenses, except that \$8.9 million expended for Section 416 commodities excludes transportation charges which were paid by recipients. Statistics on the indemnity plan, which is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs, are shown in tables 104 and 106. Sponsors of school-lunch programs are reimbursed by the government for local purchases of food on a basis of quality and quantity of meals served. This program was started in 1943.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series C 24, C 45, C 77-78) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 57.—BIRTHS, DEATHS, MARRIAGES AND DIVORCES AND RATES PER 1,000 POPULATION: 1900 TO 1953

[Births and deaths represent registered births and deaths only and for years prior to 1933 are for registration States; for births adjusted for underregistration, see table 59. For coverage of these areas, see table 58. For additional rates, see *Historical Statistics*, series C 24, C 45, C 77-78.]

¹ For 1940 and 1950 based on population enumerated as of April 1, for all other years estimated as of July 1. Birth and divorce rates for 1941-46 based on population including armed forces overseas; for 1940 and 1947-53 based on population excluding armed forces overseas. Death and marriage rates for 1940-53 based on population excluding armed forces overseas.

² Estimated, except 1925, 1930, and 1944-51.

³ Estimated, except for 1900, 1905, 1925, and 1930.

⁴ Based on a 50-percent sample.

⁵ Estimated.

⁶ Preliminary.

⁷ Not available.

No. 58.—BIRTH- AND DEATH-REGISTRATION STATES—POPULATION AND NUMBER OF STATES INCLUDED: 1900 TO 1933

[Beginning with 1933 both birth- and death-registration areas comprise all States. For midyear estimates of population for 1934 and subsequent years, see table 7, p. 13. See also *Historical Statistics*, series C 1-5.]

YEAR	BIRTH-REGISTRATION STATES			DEATH-REGISTRATION STATES		
	Population (midyear estimates)	Percent of U. S. total population	Number of States (incl. D. C.)	Population (midyear estimates)	Percent of U. S. total population	Number of States (incl. D. C.)

¹ Comprises those counties (except in New England) which are included in Standard Metropolitan Areas as defined by the Federal Committee on Metropolitan Areas. See headnote, table 14. For New England, the counties were classified according to the definition of State Economic Areas as established by the Bureau of the Census. See Bureau of the Census, *State Economic Areas: A Description of the Procedure used in Making a Functional Grouping of the Counties of the United States*, by Donald J. Bogue, 1950.

² No nonmetropolitan counties.

³ No metropolitan counties.

¹ It is assumed that all births in hospitals or institutions are attended by physicians.² Less than 0.05 percent.Source: Department of Health, Education, and Welfare, Public Health Service, National Office of Vital Statistics. Basic figures are published in annual report, *Vital Statistics of the United States*.

No. 67.—GROSS AND NET REPRODUCTION RATES, BY COLOR, URBAN AND RURAL RESIDENCE, AND REGIONS: 1905 TO 1910, 1930 TO 1935, 1935 TO 1940, 1942 TO 1947, AND 1944 TO 1949

[Statistics for 1905 to 1940 based on Census samples, see source; for 1942 to 1949 based on Current Population Survey, see Sampling Note, p. 190. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A net reproduction rate of 1,000 means that each generation would just replace itself if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improvement in mortality alone would prevent a potential decline in population.]

¹ Deaths from deliveries and complications of pregnancy, childbirth, and the puerperium. Beginning with 1949, deaths are classified according to sixth revision of *International Lists of Diseases and Causes of Death*. For deaths in United States as a whole, it is estimated that 9 percent fewer deaths were assigned to maternal causes under sixth revision than under fifth revision of *International List* (1939-48).

² Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more, or was not stated. ³ Not available.

⁴ Source: Department of Health, Education, and Welfare, Public Health Service, National Office of Vital Statistics; annual report, *Vital Statistics of the United States*.

¹ Comprises those counties (except in New England) which are included in Standard Metropolitan Areas as defined by the Federal Committee on Metropolitan Areas. See headnote, table 14. For New England, the counties were classified according to the definition of State Economic Areas as established by the Bureau of the Census. See Bureau of the Census, *State Economic Areas: A Description of the Procedure Used in Making a Functional Grouping of the Counties of the United States*, by Donald J. Bogue, 1950.

² No nonmetropolitan counties. ³ No metropolitan counties.

All other causes.....	320.2	206.4	133.9	184.6	94.8	64.4	68.2	62.6	63.6	97,604	

¹ In accordance with sixth revision.

² Rates based on population estimated as of July 1 for 1900-1930, 1949, and 1951; enumerated as of April 1 for 1940 and 1950. Population base excludes armed forces overseas, 1940-1951.

³ Excludes aneurysm of the aorta.

⁴ Includes paratyphoid fever.

⁵ Not available.

⁶ Includes all embolisms and thromboses, except puerperal.

⁷ Excludes diseases of coronary arteries.

⁸ Excludes capillary bronchitis.

⁹ Excludes ulcer of duodenum.

¹⁰ Includes ulcer of duodenum.

¹¹ Excludes automobile collision with trains and street cars, and motorcycle accidents.

¹² Includes legal executions and food poisoning.

¹³ Includes legal executions.

¹ Comprises those counties (except in New England) which are included in Standard Metropolitan Areas as defined by the Federal Committee on Metropolitan Areas. See headnote, table 14. For New England, the counties were classified according to the definition of State Economic Areas as established by the Bureau of the Census. See Bureau of the Census, *State Economic Areas: A Description of the Procedure Used in Making a Functional Grouping of the Counties of the United States*, by Donald J. Bogue, 1950.

² No nonmetropolitan counties. ³ No metropolitan counties.

No. 86.—MARRIAGE LICENSES ISSUED—UNITED STATES AND MAJOR CITIES (OR COUNTIES), BY MONTH: 1950 TO 1953

[Figures for United States represent marriage licenses and marriages reported. Figures for major-city areas represent licenses issued in 34 cities with populations of 100,000 or more according to the 1950 census, and in 69 counties containing the remaining 72 cities in that population-size group. These areas contain nearly two-fifths of the total population of the United States.]

¹ Includes reported annulments.

² Based on total population in each specified area (excluding armed forces overseas); population enumerated as of April 1 for 1940 and 1950, estimated as of July 1 for 1951.

³ Estimated.

⁴ Incomplete.

⁵ Marriage licenses.

⁶ No divorces permitted prior to 1949. Figures for annulments not available.

No. 99.—REPORTABLE DISEASES—NUMBER OF CASES REPORTED, BY MONTH: 1952

[Figures on number of reported cases of communicable diseases in this and following table should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete, with degree of completeness varying from State to State. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned.]

¹ Preliminary.

² Data not available.

³ Excludes canned food products containing small quantities of fish such as clam chowder, etc.

⁴ Excludes produce from rural and urban home gardens.

⁵ Average for 1937-39.

⁶ In terms of malt equivalent.

⁷ Comprises white, whole wheat, and semolina flour.

⁸ Green bean basis.

No. 103.—NUTRITION—NUTRIENTS AVAILABLE FOR CIVILIAN CONSUMPTION PER CAPITA PER DAY: 1935 TO 1953

[Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from rural and urban home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics*, series C 122-127]

[See table 116]

FIG. X.—DECLARATIONS OF INTENTION FILED AND PERSONS NATURALIZED: YEARS ENDING JUNE 30, 1946 TO 1953

[See table 122]

Source of figs. IX and X: Department of Justice, Immigration and Naturalization Service.

3. Immigration, Emigration, and Naturalization

Aliens or citizens arriving or departing by vessel or airplane at ports other than land border ports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these and other records by the Immigration and Naturalization Service.

Immigration.—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 107) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. *Pacific coast arrivals* were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; returning resident aliens; students; and others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota immigrants admitted comprise immigrants born in Canada, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South

Note.—This section presents data for the most recent year or period available on February 5, 1954, when the material was organized and sent to the printer.

America, and their spouses and children under age 21 if accompanying or following to join such immigrants; spouses and children of citizens of the United States; ministers of religious denominations, their spouses and children, if accompanying or following to join such ministers; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Until 1921 there was no numerical limitation of immigration into this country. The 1921 Act placed the first maximum ceiling upon immigration. Each country's quota was limited to 3 percent of the number of people born in that country who were reported in the United States Census of 1910. In 1924, a new basis was enacted for computing national quotas, based on 2 percent of the foreign-born resident in the United States as determined by the 1890 Census. The 1924 Act also provided that, beginning July 1, 1929, the quota of any nationality shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States in 1920 has to the total population in the United States in 1920. This Act established minimum quotas of 100 for all quota areas and thereby raised the total quota authorized to 153,714. By 1952, this figure had become 154,277 by virtue of minor changes. The most recent step in legislation was in the Immigration and Nationality Act of 1952, which simplified the national origins formula of the 1924 Act by basing the annual quota of any quota area on a flat one-sixth of 1 percent of the population in the 1920 Census. By Presidential Proclamation No. 2980, which became effective on January 1, 1953, new quotas were established for each quota area, totalling 154,657.

Displaced persons and refugees.—The Displaced Persons Act of 1948, as amended, authorized the entry of certain designated displaced persons and other refugees without regard to the current availability of quotas, but subject to charges made against future annual quotas. The Displaced Persons Commission was created to administer the Act. The major provisions of the Displaced Persons Program expired in December 1951, and the program was nearly completed by June 30, 1952.

The Refugee Relief Act of 1953 authorizes the issuance of 214,000 special nonquota visas until the end of 1956 to German, Italian, Greek, Far-Eastern and other refugees and expellees from the Soviet and other Communist-dominated countries.

Alien Address Report.—The Immigration and Nationality Act provides that each alien required to be registered under the Alien Registration Act of 1940, who is in the United States on January 1, must report to the Attorney General his current address during the month of January. Alien address report cards are distributed through the Post Offices of the United States or the local offices of the Immigration and Naturalization Service.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 108). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series B 304") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 107.—IMMIGRATION: 1820 TO 1953

[Data are for fiscal years ending June 30, except as noted; for periods they are totals, not annual averages. From 1819 to 1867 figures represent alien passengers arriving; for 1868 to 1891 inclusive and 1895 to 1897 inclusive, immigrant alien arrivals; for 1892 to 1894 and from 1898 to the present time, immigrant aliens admitted. See also *Historical Statistics*, series B 304]

¹ Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by Act of December 17, 1943 increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 60 to 100, thereby raising total quota to 153,979. Quota was increased to 154,206 on July 27, 1949, by establishment of separate quotas of 100 each for Israel, Syria, and Lebanon, and abolishment of combined quota of 123 established for Syria and Lebanon. Quota was increased to 154,277 on Oct. 31, 1950, when quota for Italy was reduced to 5,677, quota for Yugoslavia was increased to 938, and a separate quota of 100 was established for Trieste. Quota was changed to 154,657, effective January 1, 1953, in accordance with the Immigration and Nationality Act.

² Number of quota immigrants exceeds quota because 50 percent of quota for future years may be mortgaged where necessary under Displaced Persons Act of 1948.

³ For 1938 to 1945, Austrian quota included with German.

⁴ Philippines included in Asia in 1952 and 1953; previously included in Oceania (Pacific).

¹ Includes Serbia and Montenegro prior to 1920.

² Austria included with Germany 1938-45.

³ Includes Northern Ireland.

⁴ From 1899 to 1919 Poland is included with Austria-Hungary, Germany, and Russia.

⁵ Philippines included in "Other Asia" in 1952 (1,179) and 1953 (1,074); previously included in "All other countries."

⁶ Includes 32,897 persons returning to their homes in the United States. After 1906 such aliens have been included in immigration statistics as nonimmigrants; prior to that year, aliens were recorded by countries whence they came (see headnote).

Other nonimmigrants.....	130	273	32	5	50	44	114

¹ Under the Immigration Act of 1924, this class covered only women who had been U. S. citizens.

² New classes under the provisions of the Immigration and Nationality Act.

³ Professors admitted as nonquota immigrants under the Immigration Act of 1924. Professors are not included in the nonquota classes as defined in the Immigration and Nationality Act.

⁴ In 1953 the nonimmigrant figures exclude, with certain exceptions, Canadian citizens and British subjects resident in Canada who were admitted for six months or less. In prior years the nonimmigrant figures excluded entries over the Canadian border for 29 days or less.

⁵ Returning resident aliens who have once been counted as immigrants are included with nonimmigrants, although the immigration laws define such aliens as immigrants.

4. Education

Data on school enrollment and on educational attainment were obtained for individuals in the United States as part of the 1940 and 1950 Censuses of Population. Annually, beginning in 1945, the Bureau of the Census has reported on school enrollment (and in 1947 and 1952 on educational attainment and illiteracy) of the population, based on sample data obtained in the Current Population Survey. The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools. Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

Educational statistics for individuals.—The school enrollment statistics are based on the replies to the enumerator's inquiry as to whether the person had attended, or had been enrolled in, any regular school or college within a given period. Regular school enrollment does not include enrollment in kindergarten or nursery school or, generally, enrollment in vocational, trade, business, or correspondence schools.

The 1940 and 1950 Censuses included questions on the formal educational attainment of each person, that is, the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses.

The *median* year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the first year of college by 13, although there are some areas with only 7 years of elementary school.

Statistics for schools.—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics. Since about 1930, a similar movement has been in progress with institutions of higher education, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the *Abstract* from the Biennial Survey of Education include current national totals and summaries for a period of years. The national totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private commercial, trade and vocational schools, or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey of Education. Information on vocational education is compiled by the U. S. Office of Education.

Data in this section relate to continental United States except as noted.

Note.—This section presents data for the most recent year or period available on February 9, 1954, when the material was organized and sent to the printer.

SCHOOL ENROLLMENT

115

No. 126.—PERSONS ENROLLED IN SCHOOL BY SINGLE YEARS OF AGE FROM 5 TO 20,
BY SEX: 1920 TO 1950

[Statistics for 1940 and 1950 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 2 prior censuses, school enrollment question not restricted as to type of school or college. In 1950, question referred to period between Feb. 1 and Apr. 1, 1950; in 1940, to period between Mar. 1, and Apr. 1, 1940; in 1930, to period between Sept. 1, 1929, and Apr. 1, 1930; and in 1920, to period between preceding Sept. 1 and Jan. 1. Estimates for 1950 based on sample of 1950 census returns]

No. 138.—ILLITERACY IN THE CIVILIAN NONINSTITUTIONAL POPULATION 14 YEARS OLD AND OVER, BY AGE, COLOR, SEX, AND URBAN AND RURAL RESIDENCE: OCTOBER 1947 AND 1952

[Numbers in thousands. Statistics based on Current Population Survey; see Sampling Note, p. 100. Population base was 1940 extended to survey dates; data will differ from results obtained by revised estimating procedure; see Technical Note, p. 190. Persons unable to both read and write in any language were classified as illiterate. Information on illiteracy was obtained in 1952 only for persons completing less than 6 years of school, and in 1947 only for persons completing less than 5 years of school. Persons completing more than that amount were classified as being literate.]

¹ Census enumeration as of June 1, 1870 to 1900; Apr. 15, 1910; Jan. 1, 1920; Apr. 1, 1930 and 1940.

² Excluding population of Indian Territory which is not covered by public-school statistics, and also, for 1890, population of Indian reservations. These were not enumerated at censuses prior to 1890.

³ Current expense, capital outlays, and interest. ⁴ Census estimate; excludes armed forces overseas.

⁵ Beginning 1920, based on total number of teachers, supervisors, and principals.

⁶ Beginning 1920, excludes data for night, summer, part-time, and continuation schools separately reported.

¹ Average daily attendance divided by number of teachers. ² Excludes supervisors and principals.

³ Includes supervisors' and principals' salaries.

⁴ Excludes expenditures not allocable to public day-school pupils.

⁵ Per pupil in average daily attendance.

⁶ Totals include estimates for States not reporting.

⁷ Includes vocational personnel salaries (\$1,464,000).

⁸ Excludes vocational teachers.

⁹ Data for 1950.

¹⁰ No report.

¹¹ Includes salaries of clerical personnel assigned to instructional staff.

¹² Includes current obligations.

No. 164.—VOCATIONAL SCHOOLS AND VOCATIONAL TEACHER-TRAINING COURSES, FEDERALLY AIDED—NUMBER OF TEACHERS AND STUDENTS, BY CLASS OF SCHOOL OR COURSE AND BY SEX: YEARS ENDING JUNE 30, 1920 TO 1952

[Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, Puerto Rico, and Virgin Islands, and providing for further development of vocational education. These acts, administered by Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes data for Hawaii beginning 1930, for Puerto Rico beginning 1940, and for Virgin Islands beginning 1951]

¹ Includes \$97,049,000 of other Federal funds for education.

² Includes, in addition to Federally affected areas, funds for support of land-grant colleges, vocational education below college level, vocational rehabilitation, American Printing House for the Blind, school facilities survey, and surplus property transferred to educational institutions.

³ Includes those areas affected by Federal activity and employment.

⁴ Includes, in addition to school lunch program, funds for Agricultural Experiment Stations, and Cooperative Agricultural Extension Service. ⁵ Includes also vocational rehabilitation under Public Law 16.

⁶ Less than \$500. ⁷ Federal funds allotted to national programs which cannot be reported by States; includes \$72,000 of unallotted funds administered by Department of Agriculture.

5. Law Enforcement and Federal Courts

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers, and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws. There are fifty separate and distinct criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and Federal grand juries, and prosecuting court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried out by prison, reformatory, jail, probation and parole officials.

Crime.—Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semiannual bulletin, *Uniform Crime Reports*. The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover about three quarters of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested is shown by offense. No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its respective annual report.

Courts.—Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases disposed of in the trial courts. This information may be published by the State

Note.—This section presents data for the most recent year or period available on February 9, 1954, when the material was organized and sent to the printer.

Judicial Council or the Attorney General or some other State agency. The only national compilation of such information was that made by the Bureau of the Census which annually published statistical data on criminal cases disposed of in the general trial courts of from sixteen to thirty States including the District of Columbia. The latest data collected by the Census Bureau were those for 1945. No national collection is now made.

Comprehensive information is collected on the business of the Federal courts by the Administrative Office of the United States Courts, and is published in the *Annual Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts, and only when the United States Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine, but generally speaking the Federal courts have jurisdiction over the following types of cases:

(1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the United States District Courts, and one or more of these courts is established in every State, Territory, or possession. Appeals from the district courts are taken to intermediate appellate courts of which there are eleven. They are known as United States Courts of Appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Prisoners.—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. A national compilation of data on prisoners in Federal and State prisons and reformatories was made annually by the Bureau of the Census until after the 1947 data were compiled when this work was transferred to the Bureau of Prisons. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority, are now published periodically in *National Prisoner Statistics* bulletins of the Bureau of Prisons. The Federal Bureau of Prisons, in its annual review, *Federal Prisons*, also provides as complete statistical information on Federal prisoners as has been issued in this country. In addition, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Other.—Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the Children's Bureau, Social Security Administration, Department of Health, Education, and Welfare.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 and 1950 decennial censuses but there is at present no regular compilation covering this field.

No. 172.—ARRESTS, BY AGE GROUPS IN 232 CITIES OVER 25,000 IN POPULATION: 1952

[Total population of 232 cities covered was 23,334,306, based on 1950 census. Data compiled from annual returns of cities from which complete reports as to age, sex, and race of persons arrested were received for 1952, and thus cannot be compared with data compiled from fingerprint records as presented in previous issues of the *Statistical Abstract*. Fingerprint arrest records received during 1952 from all law enforcement agencies numbered only 847,938.]

No. 181.—FEDERAL PRISONERS RELEASED FOR FIRST TIME, BY OFFENSE AND TYPE OF RELEASE: YEAR ENDING JUNE 30, 1953

[Excludes the first releases of 237 juvenile delinquents with minority sentences; 104 Federal juveniles who served an average of 23.3 months, and 133 District of Columbia juveniles who served an average of 13.4 months. Also excludes 465 first releases other than by parole, conditional release, and expiration of sentence; and 999 second or subsequent releases of parole or conditional-release violators. Sentences to life and to more than 45 years were counted as 45 years in computing averages. Releases of 5 prisoners with life sentences are included; all were by parole and their average time served was 20.5 years]

FIG. XIV.—AVERAGE JULY TEMPERATURE

[See table 100]

Source: Department of Commerce, Weather Bureau.

6. Climate

Climatological data are gathered by the United States Weather Bureau at about 10,000 stations. Of this number nearly 3,000 stations have autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871, although some earlier and less detailed records began in the 18th century. Data shown in these tables include long-time averages and extremes of the several elements for the vicinities indicated. Where the station has moved, but not out of the general vicinity, the data represent combined values for both the previous and the new locations.

The following tables contain data from a list of cities selected to give a general representation of the climate over the United States. The averages represent the arithmetic means of the period of record at the station. The number of degree days as used in table 201 is the average monthly sum of the differences between 65° and the daily mean temperatures below 65°, i. e. (65°-T°). Experience has shown that, in order to heat buildings to a temperature of approximately 70°, the amount of fuel or heat used per day is proportional to the number of degrees the average outside temperature falls below 65°. The degree-day value is based on this assumption.

7. Public Lands and National Park System

Acquisition of original public domain.—Recognition of its sovereignty over its present continental land area was acquired by the United States Government through a series of international agreements and treaties. The United States, however, did not gain title to all of these lands by such agreements. At the time of acquisition of sovereignty over the areas involved, title to about 463 million acres rested in individual States and their political subdivisions or in private owners, which title was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the United States and, with the exception of lands in the District of Columbia, is known as the *original public domain*. Any of such lands which the Government has not disposed of under the public-land laws, are generally referred to as *public-domain lands* or *public lands*.

In addition to the public domain, the United States Government has from time to time acquired, by purchase, condemnation, and gift, *tracts of land needed for various public purposes*. Such lands are often referred to as *acquired lands*, to distinguish them from public-domain lands. Complete statistics are not available as to the extent of such acquisitions.

Public-domain lands.—*Public-domain lands* or *public lands*, as used here, refers to those Federally owned lands to which the general body of public land laws apply. (See title 43, Code of Federal Regulations.) In general, it includes that portion of the *original public domain* not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be *public lands*. As a general rule, it excludes *acquired lands*, as defined above. The term *Indian lands*, as used in tables 204–206, refers to that portion of the public domain lands that was ceded to the United States by Indian tribes on condition that part or all of the proceeds from their sale or other disposition would be covered into the Treasury in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public-land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, *original entries* and *selections* are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued.

Applications become *final entries* (perfected entries) upon issuance of a *final certificate* which is given to the applicant after he has complied fully with the requirements of the laws relating to his application. These requirements may include, in particular cases, settlement upon and improvement of the lands entered, or payment of statutory fees or purchase money. A *final certificate* passes equitable title to the land to the applicant. *Patents* are instruments which pass legal title to the lands to the applicant. *Certifications* are issued in lieu of patents in connection with certain State selections.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series F 1–7") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. See preface.

Note.—This section presents data for the most recent year or period available on February 9, 1954, when the material was organized and sent to the printer.

1781-1802 (State Cessions).....	236,825,600	233,415,680	3,409,920	-----

¹ Estimated from imperfect data available for indicated years.

² Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.

³ Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain State.

⁴ Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.

¹ Includes receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For period prior to 1861, receipts were \$177,230,000.

² As of June 30, 1953, process of legal adjudication had not yet been completed for all grants and small changes in data for certain years may occur. For period 1862-60, total land granted to States was 96,977,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands lost to States, for which States received indemnity in cash. Excludes data for Alaska and also 10,000 acres which is due to breakage and "less than" items.

³ Includes homesteads. ⁴ Includes some classes of final entries and patents prior to 1911.

⁵ Excludes commuted homesteads. ⁶ 1868-1870 only. ⁷ 1920 only.

Source: Department of Interior, Bureau of Land Management; annual report of the Director, and records.

No. 212.—VACANT PUBLIC LANDS—ACREAGE, BY STATES: JUNE 30, 1900 TO 1953

[Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry, the latter, lands not reserved for some public purpose, i. e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. Figures exclude vacant public lands in Alaska estimated at 270,000,000 acres on June 30, 1953. For U. S. totals, see *Historical Statistics*, series F 8.]

8. Labor Force, Employment, and Earnings

The labor statistics relating to the number of workers shown in this section are of two types which differ somewhat in concept and purpose. One type is obtained by the "population approach" represented by the Census of Population and the Current Population Survey of the Bureau of the Census. This approach involves direct enumeration and interrogation of individuals to obtain information on employment activity from workers or members of workers' households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. This approach encompasses direct enumeration of all employed and unemployed persons including the self-employed, unpaid family workers, domestic servants, and others who do not ordinarily appear on the payrolls of any establishment.

The second type of labor data is obtained by the "establishment approach" represented by the monthly series of the Bureau of Labor Statistics and the Agricultural Marketing Service. These data are similar to those provided by the Census of Manufactures in that they are based on reports from employers, i. e., farms, businesses, or industrial establishments. Any worker who works for two or more employers during a given payroll period will appear in each of the reports of his different employers and is therefore counted twice or more when the reports are summed. The establishment approach, however, permits a better analysis of such data as wages, hours worked, labor turnover, and industry affiliation of employees. Such information can be more accurately obtained from employers' records than in response to inquiries directed to a worker or a member of his household.

The two major primary sources of data in this field are the Bureau of the Census and the Bureau of Labor Statistics. The Decennial Census of Population provides detailed data for the United States as a whole and for each State, city, and other area, including personal characteristics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number reported in each occupation and in each industry, and other items. The Census Bureau's Current Population Survey, a monthly enumeration of approximately 25,000 households throughout the Nation, provides current data published in *Current Population Reports—Monthly Report on the Labor Force*. Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, during the calendar week containing the 8th of the month, the number employed in nonagricultural industries, the number employed in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupation group of those employed and duration of unemployment of those unemployed.

The Bureau of Labor Statistics in the *Monthly Labor Review* provides monthly data on employment, unemployment, and payrolls; labor turnover; earnings, hours, and wage rates; industrial relations; and output per man-hour. Although for the most part, these data are presented for the United States only, certain of these data are also shown for States and large cities.

Labor force.—The labor force as now commonly defined in surveys using the population approach includes persons 14 years old and over who were employed, unemployed, or in the Armed Forces during a specified week. Employed persons are those who did any work for pay or profit during the week, or who worked without pay for 15 hours or more in a family enterprise (farm or business); also included are persons who did not

Note.—This section presents data for the most recent year or period available on February 26, 1954, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

work or look for work but who had a job or business from which they were temporarily absent during the week. Unemployed persons comprise those who did not work at all during the week but were looking for work.

In the 1950 Census, the labor force data relate to the calendar week preceding the enumeration visit (i. e., during the first or second week of April for the majority of the population). The "experienced civilian labor force" consists of all employed workers and unemployed workers with previous work experience. Population censuses earlier than 1940 used instead a concept of "gainful workers." This differed from the present labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and in general, excluded new job seekers without previous experience in a gainful occupation.

Employment and earnings.—The monthly estimates of employment in nonagricultural establishments prepared by the Bureau of Labor Statistics are based on voluntary reports for about 44,000 establishments in manufacturing industries and for about 111,000 establishments in selected nonmanufacturing industries, supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Government social insurance programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, and persons in the Armed Forces. The employment data are for all full- and part-time employees who worked or received pay for any part of the period reported.

Estimates are available for total employment for 8 major industry divisions, and for selected nonmanufacturing industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 137 manufacturing subgroups, and for mining industries.

Average weekly hours and average weekly and hourly earnings are available for production and related workers for over 300 series in manufacturing; in mining, laundries, and cleaning and dyeing industries; and for nonsupervisory employees and working supervisors in other selected nonmanufacturing industries. The earnings data are gross, before payroll deductions and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those actually worked or paid for.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear each month in the Agricultural Marketing Service report, *Farm Labor*.

Output per man-hour.—The Bureau of Labor Statistics prepares annual measures of output per man-hour (or the reciprocal—unit man-hour requirements) by constructing industry-wide measures from secondary source material. Data under this program are published for 24 manufacturing industries, 5 mining industries, 4 public utilities, and agriculture. Output per man-hour refers to production, in physical units, per man-hour of work. The indexes measure the relationships between the volume of goods produced and one factor of input—labor time. The data do not measure the specific contribution of labor or capital nor do they reflect increased efficiency resulting from more economical use of fuels and materials, or more efficient integration of industries.

Labor turnover.—Labor turnover rates are published monthly in the *Monthly Labor Review* of the Bureau of Labor Statistics for approximately 100 industries on the basis of about 7,000 reports from cooperating establishments. Labor turn over data are available on a continuous monthly basis from January 1930 for manufacturing as a whole. Because of the adoption of the Standard Industrial Classification system beginning with data for January 1950, labor turnover rates for many industries and industry groups are available on a continuous basis only from that date.

Work stoppages.—Statistical data on work stoppages due to labor-management disputes cannot be collected in the same fashion as other labor information since such stoppages are sporadic and cannot be covered by a routine periodic reporting service. The basic measures of strike statistics as now compiled by the Bureau of Labor Statistics are the number of stoppages, the number of workers involved, and the number of unions involved. Basic statistical data are obtained from the employers and unions involved. Leads to where strikes have occurred are obtained from a variety of sources, including newspapers, State employment services, or State and Federal mediation services. From the data given on the schedules, the Bureau prepares annual reports (published in the May *Monthly Labor Review* and later in bulletin form) which give not only the complete and verified total figures for each month of the year but also analyses of strikes by industry, State, city, and by causes, labor organizations involved, and other pertinent classification. Preliminary monthly, semi-annual, and annual figures are issued in press releases.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series D 1-10") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

FIG. XVI.—PERCENT CHANGE, 1940 TO 1950, IN NUMBER OF EMPLOYED PERSONS, BY MAJOR OCCUPATION GROUP

[See table 237]

Source: Department of Commerce, Bureau of the Census.

Sampling Note—Current Population Survey

The sample used for the Current Population Survey (Monthly Report on the Labor Force) consists of approximately 25,000 households living in 125 counties and independent cities grouped in 68 areas. The chances are about 19 in 20 that the relative sampling variability of the estimated totals presented from the labor force survey are less than the following:

SEX	CIVILIAN LABOR FORCE			Not in the labor force
	Total	Employed	Unemployed	
	Percent	Percent	Percent	Percent
Both sexes.....	2	2	18	4
Male.....	2	2	18	4
Female.....	5	5	20	2

The percentages shown in this table represent the maximum differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same procedures. These percentages are themselves subject to variation in different time periods, particularly as the magnitudes being estimated change in level. Estimates of change from one month to the next are subject to somewhat smaller sampling variability for some of the items.

The sampling variability indicated above is illustrative of the variability that is to be expected for other subjects, such as urban-rural distributions, mobility, occupation, education, marital status, race, family relationships, income, etc. For specific evaluation of the sampling variability relating to these subjects, see the original releases of the Bureau of the Census.

Technical Note—Current Population Survey

Comparability with Decennial Population Census Data

Statistics obtained from the Current Population Survey may differ from Decennial Census data because of sampling variability, as described in the Sampling Note. In addition, comparability between the two sets of data may be affected by other factors, such as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U. S. Census of Population: 1960, Vol. II, Part 1*.

Comparability of 1953 Data with Pre-1953 Data

The estimating procedures used to obtain the data for the Current Population Survey (*Monthly Report on the Labor Force*) were changed beginning with the report for January 1953. As a result, the figures shown for 1953 are not entirely comparable with those shown here or in previous editions of the *Statistical Abstract* for earlier years.

The basic change introduced in 1953 was the use of figures from the 1950 Census in the derivation of current estimates of population characteristics from the Survey. For the years prior to 1953, data from the 1940 Census were used in deriving such estimates. This change was introduced gradually over the three-month period, January-March 1953. A further revision in the estimating procedure was made in September 1953. (For a detailed explanation of these changes, see the *Monthly Report on the Labor Force, Current Population Reports, Series P-57, Nos. 129 and 135*.)

In comparing the estimates for 1953 with those for prior years, the rough adjustment factors indicated in the table below could be applied to the 1953 figures. The adjustments have most effect on the figures for men; for women, only the total noninstitutional population and the number not in the labor force were affected. No adjustment of the unemployment statistics for either men or women is necessary.

ADJUSTMENTS TO BE MADE TO THE 1953 FIGURES FOR COMPARABILITY WITH PRE-1953 ESTIMATES

(Thousands of persons 14 years old and over)

PERIOD OF YEAR	MALE						FEMALE	
	Total noninstitutional population	Total labor force	Civilian labor force	Employed			Total noninstitutional population	Not in labor force
				Total	In agriculture	In non-agricultural industries		
January.....	-305	-280	-130	-130	-80	-50	-25	-45
February.....	-460	-410	-260	-260	-160	-100	-50	-90
March-August.....	-615	-550	-400	-400	-250	-150	-65	-135
September-December.....	-615	-550	-400	-400	-250	-150	-65	-135
1953 annual average.....	-585	-525	-375	-375	-300	-75	-60	-125

Similar problems in comparability are to be expected for other subjects in the *Current Population Survey*, such as urban-rural residence, mobility, occupation, education, marital status, race, and family relationship. For information concerning this problem for these subjects, see the various series of *Current Population Reports* of the Bureau of the Census.

¹ Data not adjusted for relatively minor differences in farm-nonfarm occupational classification between (a) 1820-1930 series, (b) figures for 1930 and 1940, and (c) figures for 1950.

² Figures estimated on basis of returns covering greater part of population.

³ Figures based on interpolation between 1820 and 1840.

⁴ Includes additions due to estimated under-enumeration in 13 Southern States.

⁵ Corrected figure; for explanation, see analysis of occupation returns for 1890 in Twelfth Census (1900) Special Reports, *Occupation*, pp. lxvi-lxxiii. Excludes persons in Indian Territory and on Indian reservations, areas specially enumerated at that census, but for which areas no occupation statistics are available.

⁶ Figures revised to deduct estimated over-reporting of farm workers.

⁷ Figures revised to add estimated under-reporting of gainful workers, partly due to change in census date to January 1.

⁸ Includes persons in experienced civilian labor force who did not report occupation.

¹ Figures for 1910 to 1930 represent gainful workers; those for 1940 and 1950 represent the total labor force. For differences in concepts, see text, p. 188.

² Including data for age unknown.

³ Based on 20-percent sample of 1950 Census returns. See source for explanation of sampling variability.

¹ Data are arithmetic means of monthly estimates of persons employed during last complete calendar week in each month ending at least one day before last of month.² Weighted averages of wage rates as reported quarterly by crop reporters. U. S. estimates affected by importance of rates in particular regions; see table 233.³ Includes farm operators doing one or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.⁴ Includes all persons doing one or more hours of farm work for pay during survey week. Members of operators' families doing any farm work for cash wages are counted as hired workers.⁵ New series of wage rates begun in 1948; for description of series, see *Farm Labor*, Dec. 1949.Source: Department of Agriculture, Agricultural Marketing Service; monthly report, *Farm Labor*.

No. 243.—INDEXES OF PRODUCTIVITY FOR SELECTED INDUSTRIES: 1929 TO 1952

[1939=100. Productivity refers to output in physical units per man-hour of work (or per worker in agriculture and telegraph). Indexes of output per man-hour obtained by dividing indexes of production by indexes of man-hours. For explanation of various indexes used, see *Handbook of Labor Statistics*, 1950, p. 166. See also *Historical Statistics*, series D 213-217]

INDUSTRY	1929	1933	1935	1937	1940	1945	1948	1949	1950	1951	1952 (prel.)
All manufacturing:											
Output per man-hour.....	78.1	81.9	90.8	90.0	-----	-----	-----	-----	-----	-----	-----
Mining: ¹											
Output per man-hour.....	69.9	73.8	84.9	88.0	102.1	106.1	110.9	108.6	117.4	-----	-----
Agriculture:											
Output per worker.....	91.6	89.2	87.5	105.3	102.5	120.1	130.1	133.9	131.0	-----	-----
Steam railroad transportation: ²											
Revenue traffic per man-hour.....	75.1	83.0	87.6	95.2	105.2	139.5	133.2	131.5	149.9	158.5	159.5
Electric light and power: ³											
Output per man-hour.....	54.1	68.1	82.5	89.6	108.6	182.5	171.0	-----	-----	-----	-----
Telephone: ⁴											
Output per man-hour.....	-----	-----	88.2	88.8	103.0	98.8	93.3	90.1	104.5	-----	-----
Telegraph: ⁵											
Output per employee.....	-----	-----	86.4	93.0	92.5	116.4	117.0	122.0	134.8	-----	-----

Rayon and other synthetic fibers.....	30.4	60.7	67.8	79.4	113.4	170.2	235.5	239.9	286.1	302.5	307.4
Tobacco products group.....	63.7	73.7	86.7	90.5	100.6	115.7	123.3	131.2	137.1	140.7	142.2

¹ For 1929 and 1933, covers almost all industries; for 1935 to 1950, represents 6 principal industries (bituminous coal; anthracite; crude petroleum, natural gas and natural gasoline; iron; copper; and lead and zinc).

² Refers to Class I steam line-haul railroads. ³ Refers to privately owned utilities.

⁴ Refers to Class A telephone carriers.

⁵ For principal wire-telephone and ocean-cable carriers. As satisfactory data on average weekly hours are not available before 1943, an index of output per man-hour is not presented.

No. 244.—GROSS AND NET SPENDABLE AVERAGE WEEKLY EARNINGS OF PRODUCTION WORKERS IN MANUFACTURING INDUSTRIES, IN CURRENT AND 1947-49 DOLLARS: 1939 TO 1953

[Net spendable average weekly earnings represent average gross earnings of production workers in manufacturing industries less social security and income taxes for which specified worker is liable. These net spendable average weekly earnings are then divided by the Bureau's consumers' price index adjusted to an average 1947-49 base, to obtain net spendable weekly earnings in 1947-49 dollars]

No. 250.—INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1944 TO 1953

[Data for 1953 were collected as of July 1 and cover 53 cities in printing and 52 in the other trades. In recent years, 77 cities were covered for July 1 data. From 1947 to 1952, however, data were collected as of October 1 for streetcar and bus operators; printing data for 1948 were collected as of January 2. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes, nor of overtime work. Year to year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. For indexes based on 1939=100, see also *Historical Statistics*, series D 152-163]

[1947-49 average=100, except for printing where 1948-49 average=100]

No. 252.—SELECTED INJURY-FREQUENCY AND SEVERITY RATES: 1947 TO 1952

[Frequency rate is average number of disabling injuries for each million employee-hours worked. Severity rate is average number of days lost for each thousand employee-hours worked. Standard time-loss ratings for fatalities and permanent disabilities are given in *Method of Compiling Industrial Injury Rates*, approved by American Standards Association, 1945]

No. 253.—MONTHLY LABOR TURNOVER RATES (PER 100 EMPLOYEES) IN MANUFACTURING INDUSTRIES: 1939 TO 1953

[Month-to-month employment changes as indicated by labor turnover rates are not precisely comparable to those in table 228, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. Labor turnover data, beginning in Jan. 1943, refer to wage and salary workers. The turnover sample is not so extensive as that of the employment survey—proportionately fewer small plants are included; printing and publishing (since April 1943), canning and preserving, and several other industries are not covered.]

CLASS OF TURN-OVER AND YEAR	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

¹ Workers counted more than once if involved in more than one stoppage during year.

² Total employed workers for 1933-1950 refers to all workers except those in occupations and professions in which there is little if any union organization or in which stoppages rarely if ever occur. In 1951, concept was changed to coincide with the Bureau's figures for nonagricultural employment, excluding Government but including workers in all occupational groups. Tests show that percentage of total idleness computed on basis of these new figures usually differs by less than one-tenth of a point while percentage of workers idle differs by about 0.5 or 0.6 of a point.

³ Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

Source: Department of Labor, Bureau of Labor Statistics; *Handbook of Labor Statistics* and other records. Basic data are currently published in May issues of *Monthly Labor Review*.

No. 256.—WORK STOPPAGES—MAJOR ISSUES INVOLVED AND DURATION: 1951, 1952, AND 1953

FIG. XVIII.—FEDERAL GOVERNMENT EXPENDITURES FOR NATIONAL SECURITY AND VETERANS' SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1939 TO 1954

[See table 259]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Bureau of the Budget.

9. Military Services and Veterans' Affairs

This section includes data on the Army, the Navy, the Air Force, Selective Service, and on the various aspects of government programs for veterans.

Military services.—Data on the activities and status of the military services are compiled from information supplied by the various branches of the Armed Forces, the Bureau of the Budget, and the Selective Service System. For additional figures showing Federal Government expenditures on military services by branch of service, see Section 14, Federal Government Finances and Employment.

Until 1947, the major branches of the Armed Forces (Army, Navy, and Air Force) operated under independent jurisdiction subject only to the Commander-in-Chief, the President of the United States. In 1947, as a result of the passage of the National Security Act, the National Military Establishment, a new executive department, was created which provided for the coordination and unified direction of these three military departments (which were not merged however) under a Secretary of Defense. Amendments to the National Security Act in 1949 added new powers to the Secretary of Defense which reinforced his position, and also redesignated the National Military Establishment as the Department of Defense.

Veterans' Administration.—The Veterans' Administration administers laws authorizing benefits for former members of the armed forces and for the dependents and other beneficiaries of deceased former members of such forces. The Veterans' Administration benefits available under various acts of Congress include: Compensation for service-connected disability or death; pension for non-service-connected disability or death; emergency officers' retirement pay; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans and, under certain conditions, direct home loans; readjustment allowances for unemployment or self-employment; U. S. Government and National Service Life Insurance; servicemen's indemnity in lieu of insurance; hospitalization; domiciliary care; outpatient medical and dental care for service-connected disability; prosthetic and other appliances; special housing for certain seriously disabled veterans; automobiles or other conveyances for certain disabled veterans; World War I adjusted service certificates; a guardianship program for the protection of estates derived from Veterans' Administration benefits paid to incompetent or minor beneficiaries; burial allowances; and burial flags.

Note.—This section presents data for the most recent year or period available on February 26, 1964, when the material was organized and sent to the printer.

No. 258.—MILITARY PERSONNEL ON ACTIVE DUTY: 1927 TO 1953

[Includes National Guard, Reserve, and retired Regular personnel on extended or continuous active duty. War-rant officers and flight officers are included under officers. Enlisted data include West Point cadets, Annapolis midshipmen and other officer candidates. Excludes Coast Guard]

¹ Includes Philippine Scouts; excludes contract surgeons. Data for 1927-47 include personnel in Army Air Forces and its predecessors (Air Service and Air Corps). For 1948 and 1949 includes Air Force personnel assigned to Army command; excludes Army personnel assigned to Air Force command. Beginning 1950, figures consist entirely of Army Department personnel, since Air Force Department personnel no longer assigned to U. S. Army organizations. ² Nurse Corps included with officers.

³ Includes 178 Navy medical officers on duty with Army.

⁴ Number of women in services 1925 to 1940 relatively small.

⁵ 1948 and 1949 include Army personnel assigned to Air Force command; exclude Air Force personnel assigned to Army command. No Air Force personnel assigned to Army command beginning 1950.

⁶ Included in Air Force. ⁷ Included in Army.

⁸ Includes 9,787 Army personnel in training for subsequent assignment to Air Force commands.

No. 259.—FEDERAL GOVERNMENT EXPENDITURES FOR NATIONAL SECURITY AND VETERANS' SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1915 TO 1954

Amounts in millions of dollars. For fiscal years ending June 30. Figures include expenditures of agencies, other than military and Veterans' Administration, for activities primarily related to National Security and veterans' programs. Figures exclude expenditures for programs which, though closely related to National Security or veterans' services, have a primary relationship to other categories of the functional classification (see table 399). Total budget expenditures have been revised to exclude payments to the railroad retirement trust account other than military service credits. Functional classification revisions for national security have been carried back through 1939 with the exception of defense aid and Reconstruction Finance Corporation, which have not been revised for years prior to 1940. For further detail as to classification of particular items in 1953 and 1954, see Special Analysis B of the *Budget of the United States, 1955*, pp. 1101-10.]

Army.....	(2)	1,950		4,000
Navy.....		265		439
Marines.....		45		66
Mexican War (1846-1848).....		1,733		4,152
Army.....	115,847	1,721	11,560	4,102
Navy.....		1		3
Marines.....		11		47
Civil War (1861-1865) ⁴		112,498	252,013	281,881
Army ⁵	2,325,000	110,238	249,290	280,040
Navy.....		2,112	2,411	1,710
Marines.....		148	312	131
Spanish-American War (1898).....		385	2,061	1,662
Army ⁶	306,760	280,564	369	1,594
Navy.....	22,875	10		47
Marines.....	3,321	6		21
World War I (Apr. 6, 1917-Nov. 11, 1918).....		53,407	76,734	204,002
Army ⁷	4,734,901	50,510	69,446	193,663
Navy.....	4,057,101	436	6,898	819
Marines.....	599,051	2,461	390	9,520
World War II (Dec. 7, 1941-Dec. 31, 1946) ⁸		293,986	113,842	670,846
Army ⁹	16,112,566	234,874	83,400	565,861
Navy ¹⁰	11,260,000	36,379	25,664	37,778
Marines.....	4,183,466	19,733	4,778	67,207
	669,100			

¹ Probably did not exceed 250,000.

² Based on available records; actual number was probably much greater.

³ Regular Army, militia, and volunteer force totaled about 530,000, but total number serving cannot be estimated because many served for short intervals at various times.

⁴ Union forces only.

⁵ Number serving is approximate. Dead and wounded believed to be understated because of incomplete records.

⁶ Dead and wounded are for period May 1-Aug. 31, 1898, although hostilities were actually terminated on Aug. 12, 1898.

⁷ Battle deaths and wounds not mortal include casualties suffered by American forces in Northern Russia and Siberia in 1919 and 1920.

⁸ Data are for period Dec. 1, 1941, through Dec. 31, 1946, when hostilities were officially terminated by Presidential Proclamation, but few battle deaths or wounds not mortal were incurred after Japanese acceptance of Allied peace terms on Aug. 14, 1945. Numbers serving from Dec. 1, 1941-Aug. 31, 1945, were: Army—10,420,000, Navy—3,883,520, and Marine Corps—599,693.

⁹ Includes Army Air Forces.

¹⁰ Battle deaths and wounds not mortal include casualties incurred in October 1941 due to hostile action.

¹ Under amendments of June 10, 1951, to Universal Military Training and Service Act, age of military liability was extended to 35 years for certain specified kinds of registrants.

² Legally exempted registrants; no longer liable for service because of age. See also note 1.

³ Cumulative since inception of Universal Military Training and Service Act, as amended, September 1948.

⁴ Includes enlistments and deferments between time of preinduction examination and notice of induction.

⁵ Cumulative net credits resulting from inductions plus home address reports minus separation reports, as reported by the Armed Forces September 1948 through June 1953. Each State is credited with its inductions as well as its enlistments and reserves called to active duty. Because of time lag in reporting to local boards, credits given for each State are not necessarily in complete accord with present strength of Armed Forces contributed by that State.

World War I ⁴	3,821	3,768	3,711	3,651	3,587	3,518	3,446	3,381	3,311
Other wars and Regular Establishment ⁵	208	200	190	180	174	172	167	150	152

¹ Excludes persons who served in the Armed Forces only in peacetime (Regular Establishment) unless they are receiving Veterans' Administration compensation for service-connected disability. A small but unknown number of persons with service in two or more periods prior to June 27, 1950, are included more than once. Veterans with service both in World War II and since June 27, 1950, are counted only once.

² Estimated cumulative returns to civil life since September 16, 1940, of all persons who served in the Armed Forces of the United States at any time through July 25, 1947, (including persons who served both in that period and since June 27, 1950), less estimated deaths out of service and less estimated returns to active duty from civil life.

³ Estimated cumulative returns to civil life since June 27, 1950, of all persons who served in the Armed Forces of the United States since that date (including persons who had also served in World War II), less estimated deaths out of service and less estimated returns to active duty from civil life.

⁴ Estimated by application of appropriate survival rates to the 1918 age distribution of World War I participants. Includes veterans of Civil War, Indian Wars, Spanish-American War. Only former members of Regular Establishment (peacetime service only) who are receiving Veterans' Administration compensation for service-connected disability are included. Spanish-American War totals estimated by application of appropriate survival rates to the 1902 age distribution of living Spanish-American War participants.

¹ Excludes any increased compensation for vocational rehabilitation subsistence allowance under Public Laws 16 and 894.

² For expenditures by wars, see table 270.

³ Averages calculated by dividing total annual value of benefits, as of June 30, by number on rolls.

⁴ Veterans with service on or after June 27, 1950.

¹ Fund is administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from the fund for death claims, dividends, and other benefits. Government, however, bears cost of administration of this fund in addition to expenses for certain types of losses.

² Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between October 8, 1940 and September 2, 1945.

³ For veterans discharged on or after April 25, 1951 with service-connected disability which would be compensable, if ten percent or more in degree.

⁴ For veterans who were entitled to indemnity protection under the Servicemen's Indemnity Act of 1951 and who were ordered to active service for a period in excess of 30 days; no medical examination required. Issued only on the 5-year renewable nonconvertible term plan.

No. 275.—VETERANS RECEIVING HOSPITAL OR DOMICILIARY CARE AUTHORIZED BY VETERANS' ADMINISTRATION: 1932 TO 1953

[During fiscal year 1953, 2,359,453 visits were made by veterans to staff or fee physicians for out-patient medical care. On June 30, 1953, 8,001 veterans were domiciled in State and Territorial homes. For each person, Federal Government reimbursed these States at rate of \$120 per year through August 1939, \$240 per year through December 17, 1943, \$300 per year through May 31, 1948, and \$500 per year thereafter]

10. Social Insurance and Welfare Services

Most of the data in this section refer to subject matter which have become familiarly established in the public mind as "social security." Broadly considered, "social security" includes (1) all public provisions for payments to individuals on an insurance or similar basis to compensate for part of the wage loss resulting from old age, sickness, disability, unemployment, or death (social insurance and related programs); (2) assistance, or payments on a needs basis, to persons with inadequate income (public aid); and (3) medical and hospital care and services to individuals to improve their health, earning power, and welfare (health and medical services and other welfare services).

The *Social Security Bulletin* carries current data on many of these programs, and summarizes annual data for them in an annual statistical supplement in each September issue. A large volume of byproduct statistics flows from employers' wage reports submitted under the Federal Insurance Contributions Act and used in the accounting operations of the Bureau of Old-Age and Survivors Insurance. Information on workers and beneficiaries and on establishments, employment, and payrolls covered by this Act is also published in detail in the Social Security Administration's *Handbook of Old-Age and Survivors Insurance Statistics*. Establishment data (showing employment and payrolls, by industry) for counties are also available in the cooperative report of the Bureau of the Census and the Social Security Administration, *County Business Patterns, First Quarter 1951*. Current data on employment security activities are published monthly in the *Labor Market and Employment Security* and its supplements.

Social insurance for industrial and commercial workers.—The two social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age or death (Federal old-age and survivors insurance) or unemployment (Federal-State unemployment insurance). In addition, three States—Rhode Island, California, and New Jersey—administer cash benefits for workers covered by the State unemployment insurance law who suffer a wage loss because of temporary disability; temporary disability benefits are also paid in New York under a law patterned on workmen's compensation and administered by the State workmen's compensation board. In general, these programs cover employment in industry and commerce. The major groups presently excluded under old-age and survivors insurance are the self-employed in certain professions, self-employed farmers, farm and domestic workers not "regularly" employed, and most Federal Government employees.

Old-age and survivors insurance provides monthly retirement benefits to fully insured workers (see table 296) at age 65 or over and supplementary monthly benefits to their wives, if they are aged 65 or have a child of the wage earner in their care, to dependent husbands, and to dependent children under age 18. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers. A lump-sum death payment is made in the case of all insured deaths.

Covered workers and their employers each pay contributions of 2 percent on the worker's wages, not counting amounts above the first \$3,600 in a year. The rate is scheduled to rise by steps until it reaches 3.25 percent each in 1970. Self-employed persons pay 1.5 times the employee rate. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid.

Note.—This section presents data for the most recent year or period available on February 26, 1954, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

Both unemployment insurance and the public employment service are administered through a Federal-State system, consisting of the Bureau of Employment Security in the Department of Labor and a State employment security agency in each State and Territory (unemployment insurance for railroad workers is administered by the Railroad Retirement Board). Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for veterans (having service on or after June 27, 1950) under the Servicemen's Readjustment Assistance Act of 1952.

State unemployment insurance laws pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 16 to 26 weeks among the States; maximum weekly benefits without dependents' allowances range from \$20 to \$35 under the several State laws. In 11 States maximum allowances for dependents ranging from \$3 to \$35 raise the range of maximum augmented benefits to \$26 to \$70.

Under the Federal Unemployment Tax Act, a 3 percent tax is levied on the payroll of employers of 8 or more workers in industries covered by the Act, although smaller employers are also covered by some State laws. Principal industries excluded from coverage are agriculture, government, domestic service, nonprofit organizations, and railroads. Employers subject to the Federal law are allowed a credit offset of 90 percent of the Federal tax, or 2.7 percent of taxable payrolls, for contributions paid to State agencies under State unemployment insurance laws. The Federal Government, therefore, collects only 0.3 percent. Congress appropriates funds each year to cover administrative costs of the employment security system.

The standard rate of contributions payable by employers in all States is 2.7 percent of the first \$3,000 a year paid to an employee. All States may adjust employer contribution rates according to individual employer experience with the risk of unemployment. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

Social insurance for railroad workers.—The social insurance programs under the Railroad Retirement Act and Railroad Unemployment Insurance Act cover employees of railroads or companies and organizations affiliated with railroad transportation (including the Railway Express Agency and the Pullman Company). These programs are administered by the Railroad Retirement Board, which publishes operations data in its *Monthly Review* and *Annual Report*.

The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and monthly and lump-sum benefits to survivors of deceased workers. The credits of employees who die or retire with less than 10 years of railroad service are transferred to old-age and survivors insurance under the Social Security Act, and any benefits which may be due (except a residual payment) are paid under that program.

Funds for the retirement and survivor system come from a tax on earnings up to \$300 a month under the Railroad Retirement Tax Act. The tax, divided equally between the employer and employee, is now at the maximum rate of 12½ percent.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness (including maternity). Benefits ranging from \$3.00 to \$7.50 per day are payable for each day over 7 in the first 14-day registration period, and over 4 in subsequent registration periods, up to a maximum of 130 days in a benefit year for each type of benefit.

The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for any year depends upon the balance in the unemployment insurance account and may vary from ½ to 3 percent of payrolls (exclusive of individual earnings in excess of \$300 a month). Since January 1, 1948, the minimum rate has been in effect.

Retirement systems for Federal Government employees.—One contributory retirement system for Federal civilian employees and two noncontributory systems (for special classes of employees) are administered by the Civil Service Commission. In addition, there are separate retirement systems, some contributory and others noncontributory, in operation for the armed forces and special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government and in the municipal government of the District of Columbia not subject to another retirement system, except those employees excluded by executive order because the tenure of employment is intermittent or of uncertain duration. It also provides annuities for the widows and minor children of deceased employees, and, under certain conditions, to the survivors of deceased annuitants. Approximately 1½ million employees were subject to this Act as of June 30, 1953. The employee contribution rate, computed on base pay, has been 6 percent since July 1948.

The Act does not require specific payments from the Government as employer, but implies that the Government will furnish the amounts necessary to finance the fund and to continue the Act in full force and effect. Appropriations have been made annually by the Congress to the fund since the fiscal year 1929.

Workmen's compensation.—All States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen's compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen's compensation laws exempt such employments as agriculture, domestic service and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States, total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-third of the laws, there are either duration or cost limitations—or both—on the amount of medical benefits provided.

Public assistance.—Public assistance is provided through five major programs, all administered by the States and localities. Payments to four groups of needy persons—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any of the four programs established by the Social Security Act, a State must have a plan approved as meeting the requirements of the Federal Act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

Health and welfare service.—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, and control of specific diseases). The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs; the others are administered by the Office of Vocational Rehabilitation and the Public Health Service, both units of the Department of Health, Education, and Welfare.

FIG. XIX.—SOCIAL SECURITY OPERATIONS: 1944 TO 1953

[Old-age and survivors insurance: Average monthly number and amount of monthly benefits (current payment status). Unemployment insurance: Average weekly number of beneficiaries and average monthly amount of benefits paid under all State laws. Public assistance: Average monthly number of recipients and average monthly amount of payments under all State programs]

INDIVIDUALS RECEIVING PAYMENTS

SOCIAL SECURITY PAYMENTS

¹ Receiving old-age, wife's or husband's, widow's or widower's, or parent's benefit. Beginning September 1950, includes a small proportion of wife beneficiaries under age 65 with child beneficiaries in their care.

² Children plus one adult per family when adults are included in assistance group; before October 1950, partly estimated.

³ Program initiated October 1950.

¹ Excludes refunds of employee contributions to those leaving service. Data for administrative expenditures not available for all programs.

² Cash benefits and hospitalization and medical benefits, including those under private plans in 3 States, and administrative expenditures of State agencies. Data on administrative expenditures of private plans not available.

³ Pensions, annuities, burial awards, readjustment allowances, and estimated administrative expenditures. Excludes expenditures from Government life insurance fund.

⁴ Payments by private insurance carriers, State funds, and self-insurers of benefits payable under State law and estimated State administrative costs.

⁵ Excludes all medical expenditures of Military Establishment and Atomic Energy Commission; health services in connection with primary and secondary public education; hospital and medical payments and services included under workmen's compensation, State temporary disability insurance, and vocational rehabilitation, and vendor payments for medical care included under public aid programs; professional education of nurses, physicians, and other medical personnel (other than teaching and training grants in special public health fields); and expenditures for medical services and research subordinate to performance of other functions.

⁶ Includes hospital and outpatient care in public institutions and expenditures for maintaining existing facilities. Excludes Veterans Administration expenditures for domiciliary care included under veterans' welfare services and institutions for chronic care (other than mental and tuberculosis) included under institutional care.

⁷ Federal are costs of hospital planning and surveys, new construction, and major repairs; State and local are new construction only. ⁸ Preliminary.

⁹ Federal are for maternal and child health services and services for crippled children. State and local represent required matching of Federal grants under these programs; expenditures above the required matching and State-local administrative expenditures included under State and local expenditures for other community and related health services.

¹⁰ Federal are those made by the U. S. Public Health Service for community health programs, medical research, and training and teaching grants in special public health fields and by the Food and Drug Administration. State and local represent estimated community health and sanitation operating expenditures of public agencies, including those for medical research and training but excluding those in connection with schools and public welfare, those classified as hospital and medical care.

¹¹ Federal are for Veterans Administration programs for vocational rehabilitation, automobiles for paraplegic veterans, domiciliary care, beneficiaries' travel, counseling, and loan guarantees. State and local represent State expenditures for bonus payments and veterans' services; local data not available.

¹² Federal are for education of the blind and the deaf, the U. S. Naval Home, the U. S. Soldiers' Home, and Federal funds for State soldiers' homes. State and local represent estimated costs of care in welfare institutions, institutions for the handicapped and for chronic care (other than mental and tuberculosis) and other public welfare expenditures; local data not fully available, so estimates may be understated.

¹³ Estimated for 1952; comparable data for 1951 not available. Includes expenditures for children in foster homes.

¹ Including expenditures from social insurance trust funds—built up through earmarked contributions made by insured persons or their employers—as well as regular budgetary expenditures from general revenues. Administrative expenditures included, with rare exceptions.

² Although social insurance expenditures include non-Federal workmen's compensation benefits payable under law by employers and private insurance carriers, such expenditures have been omitted in computing percentages relating to all government expenditures.

³ Includes hospital construction and medical research; excludes veterans' programs; excludes medical expenditures of the Military Establishment and the Atomic Energy Commission, and health and medical services provided in connection with public education, public assistance, workmen's compensation, and those subordinate to the performance of other functions such as those of the Civil Aeronautics Authority.

⁴ Represents vocational rehabilitation, child welfare services, school lunch program, and institutional care.

⁵ Preliminary estimates. Excludes Federal bonus payments, appropriations to Government life insurance trust fund, and accounts of several small revolving funds.

¹ Average monthly number, except otherwise noted.

² Includes benefits paid to dependents of retired-worker beneficiaries.

³ Includes a small but unknown number and amount of disability and survivor benefits.

⁴ Old-age retirement data include small but unknown amount of disability and survivor benefits and, for 1940, a significant amount of disability payments.

⁵ Benefits for fiscal year (usually ending June 30); beneficiaries for last month of year. Data for 1951 and 1952 preliminary.

⁶ Under Veterans' Administration. Old-age retirement data are for veterans of Spanish-American War, Boxer Rebellion, and Philippine Insurrection; beginning October 1951, all service pensions for this group included (no distinction between age and disability payments to these veterans). Disability data include pensions and compensation, and subsistence payments to disabled veterans undergoing training. Lump-sum payments are for burials of deceased veterans.

⁷ Not available.

⁸ Monthly survivor payments include a small but unknown amount of lump-sum death payments. Disability benefits exclude payments for medical care. Data for 1951 and 1952 preliminary.

⁹ Benefits payable in only four States—in Rhode Island beginning April 1943; in California, December 1946; in New Jersey, January 1949; and in New York, July 1950. Includes maternity data for Rhode Island. Excludes hospital benefits in California and hospital, surgical and medical care benefits paid in lieu of cash benefits in New York. Number represents average weekly number of beneficiaries; excludes private-plan beneficiaries in California and New Jersey.

¹⁰ Number represents average number of beneficiaries during 14-day registration period. Temporary disability benefits first payable July 1947; includes maternity data.

¹¹ Average weekly number.

¹² Less than \$50,000.

¹ Measured by employer's pay-period employment.

² An employer is a legal entity, such as corporation, partnership, or single ownership, for which a single tax return is filed.

³ Data comparable with those for previous years; do not reflect extended coverage effective in 1951.

⁴ Data for firm size "0" combined with size "1-3."

⁵ Total number of workers employed during pay period ending nearest to Mar. 15.

⁶ Wages paid by employers for covered employment during period, excluding wages over \$3,000 paid by any one employer to any worker in a calendar year prior to 1951, and over \$3,600 in 1951.

¹ Beneficiary's State of residence.

² Distribution by type of benefit estimated. Supplementary benefits paid to aged wives, wives under age 65 with child beneficiaries in their care, dependent aged husbands, and children of old-age beneficiaries. Survivor benefits paid to following survivors of deceased insured workers: aged widows, dependent aged widowers, children, widowed mothers or divorced wives with child beneficiaries in their care, or dependent aged parents.

³ Payable with respect to workers who died after December 1939 and before September 1950, if no survivor could be entitled to monthly benefits for month in which worker died, or with respect to all workers who died after August 1950.

⁴ Exceeds number of deceased workers with respect to whose wage records lump-sum payments were certified.

⁵ Less than \$500. ⁶ Less than \$50.

Sources: Department of Health, Education, and Welfare, Social Security Administration, Bureau of Old-Age and Survivors Insurance. Data appear periodically in *Social Security Bulletin*.

No. 296.—OLD-AGE AND SURVIVORS INSURANCE—SAMPLE (1 PERCENT) OF WORKERS WITH EARNINGS CREDITS AT SOME TIME IN 1937-51, BY CUMULATIVE EARNINGS CREDITS IN 1937-51, INSURANCE STATUS JANUARY 1, 1952, AND AGE GROUP

[1-percent sample (uninflated) of all workers with earnings credits identified for posting by July 1952, only partly adjusted for duplication of workers with more than 1 account. Age represents age at birthday in 1951. Since data are derived from a sample, they are subject to a sampling variation which may be relatively large where figures shown are small. Because of mechanical processes and extent of adjustments for delayed earnings records, data may differ slightly from corresponding data in other published tables. Data corrected to Dec. 31, 1953]

¹ Includes 6,763 workers of unknown age of whom 615 were fully insured, 5,782 were uninsured, and 66 were deceased with a benefit awarded.

² No workers in sample cell.

³ If a worker is fully insured as of a given date, certain of his survivors, in event of his death on or before that date, are eligible for survivors benefits. In addition, all fully insured workers who have attained age 65 are eligible for old-age benefits. An uninsured worker is one on basis of whose earnings record no benefits would be payable. Changes in insurance status resulting from earnings credits for military service and coordination with Railroad Retirement programs are only partially reflected.

¹ Until January 1946, represents covered employment on last payroll ending in month; thereafter, employment on payroll ending nearest fifteenth of month. Annual figures represent averages of 12 monthly figures.

² Total wages in covered employment for all pay periods ending within period.

³ Wages subject to contributions under State unemployment insurance laws.

⁴ Includes contributions, penalties, and interest from employers, and contributions from employees in 2 States.

⁵ Adjusted for refunds of contributions and for dishonored contribution checks.

⁶ Includes effect of war-risk contributions.

⁷ Not available.

⁸ Represents first payments.

⁹ Annual figures are adjusted, but quarterly figures are not adjusted, for voided benefit checks.

¹⁰ Sum of balances in State clearing account and benefit-payment account, and in State unemployment trust fund account in U. S. Treasury. State unemployment trust fund accounts include interest credited.

¹¹ Complete applications Feb. 1944–Dec. 1945.

¹² Includes \$1,019,000 for 1947, \$3,331,000 for 1948, \$1,287,000 for 1949, and \$312,000 for 1950 paid to seamen under the Reconversion Unemployment Benefits for Seamen program. Program expired June 30, 1950.

¹ Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown are in effect for 1951 and 1952.

² Average of 12 monthly figures, each of which is total number of workers in covered employment in pay periods ending nearest 15th of month. ³ Total wages in covered employment for all pay periods ending in year.

⁴ Wages subject to unemployment insurance tax; only the first \$3,000 of an employee's wages from a single employer in a calendar year are taxable. ⁵ And wages of \$100 in any calendar quarter.

⁶ 1951 coverage; for 1952, 8 in 20 weeks or 8 in 8 weeks and payroll in excess of \$12,000 in any quarter.

⁷ And wages of \$75 in a calendar quarter. ⁸ Or 25 in 1 week.

⁹ Or 4 in 8 quarters of preceding year with wages of at least \$50 to each of at least 4 workers during each of 3 calendar quarters. ¹⁰ But 8 in 20 weeks for employers located outside the corporate limits of a city, village or borough of 10,000 or more population. ¹¹ Or wages of \$500 in a calendar year.

¹² Or wages of \$10,000 in any calendar quarter. ¹³ And wages of \$225 in any calendar quarter.

¹⁴ Or 1 at any time and wages of \$450 in a calendar quarter. ¹⁵ And wages of \$500 in same calendar quarter.

¹⁶ 1951 coverage; for 1952, 8 in 20 weeks or \$24,000 in a year. ¹⁷ And wages of \$140 in any calendar quarter.

¹⁸ Or wages of \$6,000 in preceding calendar year. Includes employers with wages of \$10,000 in a calendar quarter toward which not more than \$1,000 per employee need be counted.

¹⁹ And wages of \$500 in a calendar year.

¹ Includes insured unemployment under: (1) State programs; (2) veterans' program exclusive of veterans filing at same time under State programs; and (3) railroad unemployment insurance program, not distributed by State.

² Excludes transitional initial claims; Puerto Rico and Virgin Islands take claims as agents for some States.

³ Represents number of first payments during year; Wisconsin figure represents first payments on "per employer" basis. ⁴ Adjusted for voided benefit checks and transfers under interstate combined wage plan.

⁵ For total unemployment.

⁶ Under provisions of Veterans' Readjustment Assistance Act of 1952, effective October 15, 1952.

⁷ Cumulative October 15, 1952 through December 31, 1953.

⁸ Includes payments to veterans supplementing railroad unemployment program, not distributed by State; (1) 700 beneficiaries, (2) 5,000 compensated weeks, and (3) \$32,000 paid in benefits.

⁹ Less than 500. ¹⁰ Not available.

¹ Industry titles from 1942 edition of *Social Security Board Industrial Classification Code* for nonmanufacturing industries and 1945 edition of *Standard Industrial Classification Manual* for manufacturing industries.

² Average of 12 monthly figures, each of which is total of numbers of workers in covered employment in pay periods ending nearest fifteenth of month.

³ Total wages in covered employment for all pay periods ending in year.

⁴ Excludes railroad and allied groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act.

⁵ Includes data for firms whose activities are not classifiable in any of above industries and data for firms not classified due to lack of sufficient information regarding nature of business.

¹ Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length of service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, certain employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 50,803 in 1953. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62. Prior to 1952, excludes annuities purchased by voluntary contributions.

² Data relate to refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or who, if eligible, elected to take a refund.

³ Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died while in service or after separation.

⁴ Data relate to refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

⁵ Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

¹ Includes children and 1 parent or other adult in families in which adult was considered in determining amount of assistance.

² Includes 3,926 recipients under 65 in Colorado.

³ Includes 407 recipients of payments made without Federal participation in California, 6 in Washington, 816 in Missouri, and 6,957 in Pennsylvania.

⁴ Partly estimated; total not as large as sum of State figures because of adjustment. See footnote 8.

⁵ Excludes some cases for program not administered by State agency. ⁶ Estimated.

⁷ Excludes cases receiving assistance in kind only and, for a few counties, cases receiving cash payments.

⁸ Includes unknown number of cases receiving medical care, hospitalization, or burial only.

⁹ Represents program administered without Federal participation.

¹ Total includes vendor payments for medical care from general assistance funds, from special medical funds, and, for 1 State, from funds for the special types of public assistance; data for such expenditures partly estimated for some States.

² Includes payments to recipients 60-64 years of age for whom payments are made without Federal participation.

³ Not computed; data estimated.

⁴ Not available.

⁵ Not computed; base too small.

⁶ Represents program administered without Federal participation.

⁷ Excludes vendor payments for medical care.

⁸ Represents data for November.

¹ Includes 35,292 children reported as living in institutions and 9,244 as living elsewhere. Children reported in institutions represent only those children served by workers attached to State or local public welfare agencies and not all children receiving institutional care.

² Includes a number of children for whom whereabouts are unknown. For total, this is less than 1 percent.

³ Not computed because of incomplete report.

¹ Estimated.

² Based on population estimates of Bureau of Census.

³ Data for chapter budgets not included; additional expenditures by chapters estimated at approximately \$45,668,900 for year ending June 30, 1953. Activities common to all services, such as stenographic section, files, etc., previously prorated to the various services, are included with "Operating facilities" beginning 1947. Beginning 1951, applicable proportion of cost of telecommunications, duplicating service, insurance and retirement charged directly to program services.

⁴ Beginning 1950 volunteer services combined with services and assistance to chapters.

No. 324.—FUNDS RAISED BY COMMUNITY CHEST AND UNITED FUND CAMPAIGNS: 1925 TO 1953

[Includes all campaigns for which data are on file with Community Chests and Councils of America, Incorporated. Reports of campaign results are based on the total raised in the federated campaign. In cases where an agency such as the Red Cross was included in the joint campaign for only part of its goal, only the amount raised for the agency through the joint campaign is reported. The campaigns of Canada are included]

11. Income, Expenditures, and Wealth

Statistics in this section are, for the most part, of two fundamental types: First, those which provide data in terms of national aggregates (national income, national product, personal income); and second, those which provide data on the distribution of families or persons by size of their income or expenditure. Statistics representing the former type are compiled primarily by the Office of Business Economics of the Department of Commerce and are based on a wide variety of data from government and private sources. Statistics representing the latter type are derived from sample surveys conducted by several different government agencies. These sample surveys may differ as to size of sample, time period covered, definitions of terms or units, and as to purpose (see below).

Nation's economic summation.—A synoptic picture of the economy is provided by the summary of the Nation's income, expenditure, and saving shown in the form of a balancing set of accounts for the major economic categories—consumers, business, and government. (See table 326.) These statistics assembled by the Council of Economic Advisers are based on the "national income and product" accounts of the Department of Commerce. An explanation of the items included in this summation may be found in the 1954 *Economic Report of the President* and in the *Historical and Descriptive Supplement to Economic Indicators*, 83d Congress, 1st Session.

National income and product.—The primary source for national income and product data is the Department of Commerce monthly *Survey of Current Business*. Each July issue of the *Survey* is identified as the *National Income Number* and contains the most recent and detailed data for this subject. Historical data for 1929–48 appear in the 1951 *National Income Supplement to the Survey*. A new supplement to the *Survey*, on size distribution of personal income, issued in 1953, entitled *Income Distribution in the United States, 1944–1950*, represents a further development of the general body of national income data published by the Office of Business Economics.

"Gross national product" (often called GNP) represents the total national output of goods and services at market prices. It measures this output in terms of the expenditures by which these goods are acquired. These expenditures comprise the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment. The goods and services included in GNP are, for the most part, those actually bought for final use in legal markets. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP, the *total national output*, measures the product attributable to the factors of production—labor and property—supplied by residents of continental United States. GNP differs from "national income" described below mainly in that the former includes allowances for depreciation and similar capital consumption and indirect taxes (such as sales and excise taxes).

"National income" is the aggregate of earnings by labor and property from the current production of goods and services by the Nation's economy. It is the sum represented by compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of taxes on those earnings.

Note.—This section presents data for the most recent year or period available on March 12, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

"Personal income" is the current income received by individuals, by unincorporated businesses, and by nonprofit institutions (including pension, trust, and welfare funds) from all sources. It includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons and government interest payments. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated rental value to owner-occupants of their homes and the value of food consumed on farms. "Disposable personal income" is equal to "personal income" less taxes on individuals (including income, property, and other taxes not deductible as business expense), customs receipts, and other general Government revenues received from individuals as individuals.

Distribution of income by size-class.—A primary source for data on distribution of income by size-class is the Bureau of the Census, Current Population Reports, *Consumer Income*, Series P-60. A brief discussion of the Current Population Survey which is the basis for the data in the above report appears as a Sampling Note on p. 191. Another primary source for information in this field is the national Survey of Consumer Finances conducted annually since 1946 for the Board of Governors of the Federal Reserve System by the Survey Research Center of the University of Michigan. This survey consists of a sample of about 2,500 to 3,000 family units or 2,800 to 3,500 spending units and is taken at 60 to 75 sampling points. Reports of survey findings are published in the *Federal Reserve Bulletin*.

Statistics on the size distribution of income are based on data collected in various field surveys of income conducted since 1936. The primary purpose of these field surveys is to show the distribution of families or persons by income levels. In each of these field surveys trained enumerators interview representative samples of the civilian noninstitutional population with respect to income received during the previous year.

The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is personal income.

Family expenditures and savings.—The most recent survey of family income, expenditures, and savings on a nationwide basis was made by the Bureau of Labor Statistics for 1950. This Survey of Consumer Expenditures was conducted in 91 cities and yielded 12,500 usable schedules from families and single consumers. For field methods and purposes see *Monthly Labor Review*, January 1951. For selection of cities for the survey, see *Monthly Labor Review*, April 1951. For this study a family is defined as a group of persons dependent on a common or pooled income for the major items of expense and usually living in the same household. Preliminary data for families of two or more persons, showing by cities the average income, family size, and other characteristics have been published in BLS Bulletin 1097 (Revised), *Family Income, Expenditures, and Savings in 1950*. (See tables 344 and 345 for selected data from this bulletin.)

From 1945 through 1949 the Bureau of Labor Statistics made similar surveys of family expenditures in selected cities each year to obtain data necessary to check the prices and weighting patterns used in the Consumer Price Index. These data for the period 1946 to 1949 have been published in Bulletin No. 1065, *Family Income, Expenditures, and Savings in 10 Cities*.

National wealth.—National wealth data are currently not compiled by any Federal government agency. The Bureau of the Census prepared estimates of national wealth for selected years from 1850 to 1922. Figures for various dates covering the period 1880 to 1922, based on the Census Bureau reports are shown in *Historical Statistics of the United States, 1789-1945*. For the same period, 1880-1922, estimates for certain components of wealth (land, real estate improvements, and equipment), also largely based

on Census Bureau figures, appear in *National Product Since 1869*, by Simon Kuznets, issued by the National Bureau of Economic Research in 1946. More recent data on wealth for the period 1922 to 1938, were compiled by the National Industrial Conference Board and published in *Enterprise and Social Progress*, and in the *Economic Record*. Both the Kuznets estimates and the NICB estimates also appear in *Historical Statistics*.

The wealth data shown here (tables 359 and 360) represent the most recent attempt to derive a consistent and comprehensive series in this field. They were compiled by Dr. Raymond W. Goldsmith and issued in earlier form under the auspices of the National Bureau of Economic Research. As is the case in all national wealth estimates, the figures should be regarded as approximative only. They are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth of wealth over long periods. Careful examination of the methods and sources of the estimates, as they are described in the source volume, *A Study of Saving in the United States*, is therefore advisable before use is made of the figures.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series A 101-116") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 335.—INCOME PAYMENTS TO INDIVIDUALS, BY STATES AND REGIONS: 1929 TO 1952

["Income payments to individuals" is a measure of income received from all sources during the calendar year by the residents of each State. For six States and the District of Columbia, however, totals shown below are not strictly measures of income received by residents. Totals for District of Columbia, New York, and Maine are too high—and those for Maryland, Virginia, New Jersey, and New Hampshire too low—in terms of measures of total income received by residents. Estimates shown here for D. C. include income paid out to residents of Maryland and Virginia employed in D. C., but exclude income of D. C. residents employed in these 2 States. Estimates for New York include income paid to residents of New Jersey employed in New York, but do not include income of New York residents employed in New Jersey. Similarly, estimates for Maine include income paid to residents of New Hampshire employed in Maine. In computation of per capita income for these 7 States, income totals shown here were first adjusted to a residence basis before division by population. Following are amounts (in millions) of adjustments for 1952: District of Columbia, -642; Maryland, +340; Virginia, +302; New York, -584; New Jersey, +584; Maine, -43; New Hampshire, +43. For definition of income payments to individuals, see text, p. 293.]

No. 338.—FAMILY UNITS, INCOME BEFORE TAXES, AND LIQUID ASSETS—PERCENT DISTRIBUTION BY INCOME GROUPS: 1952

[National estimate based on sample interview survey of 2,756 families, defined as all (one or more) persons living in same household and related by blood, marriage, or adoption. Universe covered is population of U. S. residing in private households during interview period, which was January through March 1953. Following groups are excluded: (1) Members of armed forces living at military reservations; (2) residents of hospitals and in religious, educational, and penal institutions; and (3) floating population, that is, people living in hotels, large boarding houses, and tourist camps. For liquid asset holdings of individuals and businesses, see table 602, p. 464]

ANNUAL 1952 MONEY INCOME BEFORE TAXES	Family units	Total money income	Liquid assets ¹
All income groups.....	100	100	100
Under \$1,000.....	10	1	5
\$1,000-\$1,999.....	12	4	6
\$2,000-\$2,999.....	14	7	7
\$3,000-\$3,999.....	16	12	10
\$4,000-\$4,999.....	15	15	9
\$5,000-\$7,499.....	21	28	23
\$7,500 and over.....	12	33	40

¹ Liquid assets include all U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions held at time of survey in early 1953. Currency is excluded.

¹ Ranking based on size of money income before or after tax.

² Estimated liability on Federal income tax, excluding tax on capital gains. Tax liability was not obtained directly from interviews or from tax returns, but from comprehensive data on family composition and income obtained in connection with Consumer Finances Surveys. For method of estimating, see *Federal Reserve Bulletin*, Aug. 1950, pp. 961-962.

¹ Average (mean) income has been computed for each income tenth (decile) as well as for whole population. Sampling error, which was approximately \$180 for whole population, is not yet available for individual tenths. It will be much larger than \$180 for the highest tenth and much smaller for the middle tenths.

² Negative incomes caused by farm or business losses included in upper line and excluded in lower line.

³ Not available.

No. 341.—MEAN AND MEDIAN INCOMES WITHIN OCCUPATIONAL GROUPS: 1947 TO 1952

[Data based on approximately 2,800 to 3,500 interviews taken in 60 to 75 sampling areas throughout country. Interview unit defined as all persons living in the same dwelling and belonging to the same family who pool their incomes to meet their major expenses. Mean income is the average obtained by dividing aggregate money income before taxes by number of spending units. Median income is that of middle spending unit when units are ranked by size of money income before taxes]

¹ Current dollars divided by consumers' price index on base 1948=100 to give a rough measure of changes in purchasing power of income.

Sources: 1935-36, National Resources Planning Board; 1941, Department of Labor; 1944, National Bureau of Economic Research; and 1948, Executive Office of the President, Council of Economic Advisers. Published in *Economic Report of the President*, January 1950 and July 1951.

No. 343.—INCOME SHARES OF UPPER AND LOWER GROUPS OF TOTAL POPULATION: 1919 TO 1948

Data are based on comparisons between Federal tax data and countrywide totals of income receipts by individuals. Individuals' incomes underlying the basic and economic income variants are defined as receipts for the participation of individuals or of their property in the production process; include employee compensation and other payments to labor, entrepreneurial income, rent, interest, dividends; exclude capital gains and other transfers and do not allow deductions except of business expenses. The basic variant is a first approximation to shares in income thus defined. The economic income variant represents an adjustment of the basic variant to take account of some items omitted from the tax data (compensation of nonfederal government employees and imputed rent on owner-occupied houses), to allow for a finer division of tax returns by distinguishing between head of family and nonhead returns, and to allow for the effect of classifying returns by net income, as defined for tax purposes, instead of by economic income. The disposable income variant measures shares in individuals' incomes after deducting Federal income taxes and including gains and losses from sales of assets. See also *Historical Statistics*, series A 195-197.

YEAR	PERCENTAGE OF INDIVIDUALS' INCOMES RECEIVED BY—								
	Top 1 percent	2d to 5th percent-age band	Lower 95 percent	Top 1 percent			Top 5 percent

No. 346.—NUMBER OF FAMILIES AND UNRELATED INDIVIDUALS BY INCOME LEVEL IN 1949, AND MEDIAN INCOME, BY STATES: 1950

[Based on 20-percent sample of 1950 Census returns. "Family" refers to a group of two or more related persons residing in same household. "Unrelated individual" refers to a person living alone or with persons not related to him. See source for explanation of sampling variability. Medians computed from \$500 intervals]

No. 347.—MONEY INCOME OF FAMILIES AND UNRELATED INDIVIDUALS—PERCENT DISTRIBUTION OF RECIPIENTS BY INCOME LEVEL, AND MEDIAN INCOME, URBAN AND RURAL: 1949 TO 1952

[Based on samples of population residing in households only. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Family" not used here with same meaning as in 1940 census. It refers to a group of two or more related persons residing in same household. "Unrelated individual" is used to refer to a person living alone or with persons not related to him. See source for evaluation of sampling reliability. For explanation of urban and rural areas, see p. 2.]

No. 348.—INCOME OF NONSALARIED PHYSICIANS, LAWYERS, AND DENTISTS: 1929 TO 1951

[Data are based on mail questionnaire surveys of the three professions, usually in cooperation with the professional associations. At intervals, large-scale surveys have been conducted to establish benchmark data, most recently in 1948 (lawyers), 1949 (dentists), and 1950 (physicians). For later years, smaller, interim surveys are conducted to obtain indexes for extending the benchmark data forward]

**No. 358.—NET WORTH OF SPENDING UNITS HAVING SPECIFIED CHARACTERISTICS—
PERCENT DISTRIBUTION OF SPENDING UNITS BY NET WORTH IN 1950 AND 1953,
AND MEDIAN NET WORTH IN 1953**

[Net worth is defined as difference between total selected assets and total debt reported in interviews during January-March 1950 and 1953. Selected assets include liquid assets (U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions), owner-occupied homes and farms, other real estate, farm machinery, crops and livestock, automobiles, interests in unincorporated nonfarm businesses and privately held corporations, and common and preferred stock in corporations open to investment by the general public. Liabilities include all forms of debt other than charge accounts. For method of computing net worth, see *Federal Reserve Bulletin*, September 1953, pp. 946-947. Net worth figures should be considered as minimum estimates because of omission of assets such as currency, corporate bonds, reserve value of life insurance policies, consumer durable goods other than automobiles, jewelry, etc., and because of under-reporting of assets covered.]

GROUP CHARACTERISTIC	Number of cases		PERCENT DISTRIBUTION BY AMOUNT OF NET WORTH														Median net worth

¹ Estimates obtained by multiplying the constant dollar figures shown in table 360 by the appropriate price index for current year. See also footnote 1 in that table.

² Estimates are based on book values.

³ Estimates for farm land are based on Census or similar data. For other private land, estimates are derived by application of rough ratios of land to structure values for different types of real estate.

¹ Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (1) Reducing each year's gross capital expenditures in current prices to 1929 price level by means of appropriate construction cost or wholesale price indices; (2) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1929 prices; (3) cumulating net capital expenditures for as many years backwards as corresponds to the assumed length of life of the type of asset involved.

² Estimates reflect book values reduced by means of wholesale price indices.

12. Prices

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 22 commodities; and indexes of consumer prices for urban wage earner and clerical worker families for the United States, based on 46 cities, and individually for 20 large cities, as well as component indexes for food and other groups.

Wholesale price index.—Since 1902, the official monthly wholesale price index has been prepared as an indicator of general price trends and average changes in commodity prices at primary market levels. The official series on the base, 1926=100, has been carried back to 1890; separate monthly indexes are available for major groups of commodities from January 1890, and for subgroups of commodities beginning with 1913. This index, based on 1926=100, is the official index for December 1951 and all earlier dates.

A newly-revised index, based on 1947-49=100, is the official index for January 1952 and all subsequent months. Weights used represent all sales at the primary market level during the calendar year 1947. Moreover, the new index has expanded the number of commodities covered to 2,000 instead of the 900 measured by the earlier index. For a detailed description of the new index, see the *Monthly Labor Review*, February 1952.

The index measures average changes in prices of commodities at the primary market level—usually the level at which the commodity is first sold commercially in substantial volume. The prices are ordinarily those charged by representative manufacturers or producers to the types of distributors or industrial consumers who are characteristic buyers of the product. Wherever feasible, the prices are f. o. b. point of production or sale. In the case of some commodities, prices quoted in organized commodity markets are used.

The index measures the price changes of only the commodities which are specifically defined for pricing both physically and in terms of market structure. It is not an over-all measure of the "general price level" or of "the purchasing power of the dollar" since it does not include all classes of commodities (real estate, securities, services, etc.) which are factors in the "general price level."

Consumer price index.—The Bureau of Labor Statistics index measures the average change in prices of goods and services purchased by city wage earner and clerical worker families. The weights used in calculating the index are based on studies of actual expenditures by families of wage earners and clerical workers. The quantities and qualities of the items in the "market basket" remain the same between consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living of these families. The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

At four different times it has been necessary to bring the "market basket" of goods and services up to date and to modernize the samples and methods of calculation. A study conducted in 1917-19 provided the weights used from 1913 to 1935. From 1935 to January 1950, time-to-time changes in retail prices were weighted by 1934-36 average expenditures except for certain temporary wartime adjustments. Weights used from January 1950 to December 1952 represented estimated 1949-50 spending

Note.—This section presents data for the most recent year or period available on March 12, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

patterns. Beginning January 1953, the weights represent average purchases of urban wage earner and clerical worker families in the year 1952, derived from a study of family expenditures in 1950 by estimating the effects of changes in income and prices between 1950 and 1952.

The list of items currently priced for the index includes approximately 300 goods and services. Among these items are all the important goods and services that wage earners buy. For some items, a number of different qualities or articles are priced. The items priced are described by detailed specifications to insure that as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable, but income taxes, social security deductions, and bond deductions are not included.

Beginning January 1953, prices are obtained in a sample of 46 cities representative of all cities in the United States. Foods, fuels, rents, and a few other items are priced monthly in all cities. Prices of most other goods and services are obtained on a regular rotating cycle—monthly in the 5 largest cities, every 3 months in 25 large and medium-size cities, and every 4 months in the 16 smallest cities. Estimates are made for unpriced cities each month. Prior to January 1953, indexes were based on food prices in 56 cities monthly, and prices of other commodities in 34 cities quarterly or monthly.

Price changes for the 46 cities are combined for the United States with weights based on 1950 population of cities represented by each sample city. City indexes are compiled for the 20 largest of the 46 cities.

Indexes currently computed on the 1947-49=100 base have been converted from previous indexes on the 1935-39=100 base, after regrouping into a new classification of components.

The *retail food price indexes* are one component of the consumer price index. Weights used at various times are consistent with those for the index as a whole. In March 1943, the weights for the food index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. In January 1950 and again in January 1953 the weights were revised as described for the total consumer price index.

The indexes were computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, 50 foods from June 1947 to January 1950, 60 foods from January 1950 to December 1952, and 90 foods beginning January 1953.

Other indexes.—The National Industrial Conference Board prepares a monthly Consumers' Price Index, based on January 1939=100, for a group of selected cities. This index is not comparable with the Bureau of Labor Statistics index.

The Agricultural Marketing Service prepares currently indexes of prices received for farm products and of prices paid by farmers. (See text, p. 632.)

In comparing the movement of the indexes of consumer prices and of the prices paid by farmers for commodities bought for family living (table 760), it should be noted that the consumer price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series L 41-47") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 361.—WHOLESALE PRICE INDEXES FOR ALL COMMODITIES, AND FOR ALL COMMODITIES OTHER THAN FARM PRODUCTS AND FOODS: 1926 TO 1953

[1947-49=100. This index is the official price index, beginning with January 1952. Although this index has been computed back to 1926, for comparison, the official index for December 1951 and all earlier dates is that based on 1926=100, shown in tables 325 and 326 of the 1952 *Abstract*]

No. 363.—INDEXES OF SPOT PRIMARY MARKET PRICES OF 22 COMMODITIES: 1939 to 1953

[1947-49=100. Figures in column heads represent number of commodities. Index is computed daily; represents unweighted geometric average of daily price quotations of 22 commodities, traded on organized exchanges. The index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

DATE	All commodities (22)	Foodstuffs (9)	Raw industrial (13)	Livestock and products (5)	Metals (5)	Textiles and fibers (4)	Fats and oils (4)
1939—Aug. 15.....	33.6	28.9	39.2	31.9	43.1	31.2	28.6
1941—Dec. 6.....	53.0	40.1	58.3	53.0	54.6	56.3	55.6

No. 367.—CONSUMER PRICE INDEX—ALL ITEMS AND COMMODITY GROUPS: 1913 TO 1953

[1947-49=100. The Consumer Price Index from 1913 to December 1952 is rebased according to new groupings from adjusted series indexes on 1935-39=100 formerly published. For detailed explanation, see text, p. 323. These indexes include a correction of new unit bias in the rent index from 1940 to December 1949 and adjusted population and commodity weights beginning with indexes for January 1950. These adjustments make a continuous comparable series. See also *Historical Statistics*, series L 41-47 for indexes based on 1935-39=100]

¹ Average of four quarterly indexes.

² Weighted average of two quarterly indexes and six monthly indexes.

³ 12-month average. Beginning March 1950: Price movements in 10 key cities measured monthly; for other cities (surveyed quarterly on a staggered schedule), preceding surveyed index used for each nonsurveyed month.

⁴ Discontinued.

⁵ Not available.

⁶ St. Paul combined with Minneapolis.

No. 370.—AVERAGE RETAIL PRICES OF SELECTED FOODS: 1913 TO 1953

[Mid-month prices in cents per pound except for milk (cents per quart), eggs and oranges (cents per dozen), and tomatoes (cents per No. 2 can). Data are averages of prices reported by retail dealers in cities included in the Retail Food Index. (See footnote 1, table 372.) Number of cities also varies slightly according to availability of prices for each item. Sales taxes not included after 1945. Prices for individual cities combined with use of population weights]

No. 378.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED:
1925 TO 1952

[Values required by law to represent values in foreign markets whence exported to United States. "Ton" signifies long ton of 2,240 pounds except where otherwise specified. Averages obtained by dividing total value of imports (for consumption) of specified article by total quantity. Where, as in some commodities considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

13. Elections

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 100 thousand governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of governments holding elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The election of the President of the United States is provided for in the Constitution, article II, section 1, through the establishment of an electoral college in each State, for each Presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States.

The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912 it has remained constant. The 14th Amendment to the Constitution, in effect at the present time, provides that "Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State . . ." The Constitution also requires that each State have at least one Representative.

Official statistics on elections for Federal offices are collected by the Clerk of the House of the United States Congress and published biennially in *Statistics of the Presidential and Congressional Election*. Data on Federal elections also appear in the United States Congress, *Congressional Directory*.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 27-31") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on March 12, 1954, when the material was organized and sent to the printer.

FIG. XXVI.—PARTICIPATION IN NATIONAL ELECTIONS: 1900 TO 1952

No. 381.—APPORTIONMENT OF CONGRESSIONAL REPRESENTATION, BY STATES, FROM ADOPTION OF CONSTITUTION TO 1950

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives; from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 70th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 6 below)]

No. 386.—VOTE FOR UNITED STATES REPRESENTATIVES, BY MAJOR POLITICAL PARTIES, BY STATES: 1950 AND 1952

[In thousands. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In New Mexico and North Dakota, no representatives were elected from districts, but more than one was elected from the State at large; in these States, each party total represents votes cast for that candidate of the party receiving highest vote. In Delaware, Nevada, Vermont, and Wyoming only one representative is elected at large. In Connecticut, Ohio (1950), Texas (1952), and Washington (1952), representatives are elected by district except one, who is elected at large; the at-large vote is not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are here counted as for the endorsing party. See also notes below]

¹ Less than 500.

² In California a person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.

³ Includes 87,673 blanks.

⁴ Democratic-Farmer-Labor party.

⁵ Voters entitled to vote for 2 candidates; total ascertained by adding vote of highest candidate in each party.

⁶ Included in Republican are 40,575 endorsing votes cast for Democrats; included in "Other" are 164,696 endorsing votes cast for Democrats and 25,355 for Republicans.

⁷ Included in Republican are 37,230 votes cast for Republican-endorsed Democrat in 18th District; included in "Other" are 269,180 votes cast for Democratic-endorsed, and 31,738 votes cast for Republican-endorsed, Liberal candidates.

14. Federal Government Finances and Employment

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for budget appropriations and other authorizations for the maintenance of the various departments and establishments. It includes estimates to carry out both existing laws and proposed legislation. Data from *The Budget of the United States Government* for the fiscal year ending June 30, 1955, are presented in tables 397-402. The Treasury Department publishes a *Digest of Appropriations* each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the *Combined Statement of Receipts, Expenditures and Balances*, an abstract of the Treasury books relating to all of the receipt accounts and appropriation accounts which report disbursements under the appropriations made by the Congress.

The day-to-day financial operations of the Federal Government are reported in the *Daily Statement of the United States Treasury*. The *Statement* contains a summary of Treasury assets and liabilities, cash receipts and withdrawals, and closing cash balances as they are recorded for the day in the account of the Treasurer of the United States. In addition, it discloses the effect of the day's operation on the public debt, but does not show budget surplus or deficit. Receipts and expenditures on a budgetary basis showing surplus or deficit are reported separately once a month in the mid-month issue of the *Daily Treasury Statement*; in addition, the report for the first working day of each month contains a statement of the public debt as of the last day of the month just ended. The *Treasury Bulletin*, a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains reports on the finances of the Federal Government and developments in Treasury operations. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by geographic area. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Circulation Statement of United States Money*.

Data from income tax returns are compiled by the Internal Revenue Service of the Treasury Department. This agency's annual report, *Statistics of Income*, Part 1, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. *Statistics of Income*, Part 2, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns.

Data on public and private debt are compiled by the Office of Business Economics of the Department of Commerce (table 422). These data are published annually in the *Survey of Current Business*. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following sectors of the economy: (1) Federal Government and its corporations and agencies generally; (2) State and local governments treated as a

Note.—This section presents data for the most recent year or period available on March 26, 1954, when the material was organized and sent to the printer.

single entity; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management, treated here as a unit. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

Federal employment figures are compiled primarily by the Civil Service Commission. The figures are issued by that agency in its regular *Annual Report* and in its *Monthly Report on Employment*. The Commission also publishes an annual report on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service*. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

TREASURY FUND STRUCTURE

All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States irrespective of their ultimate disposition or availability for expenditure. However, these receipts are recorded by the Treasury in accounts classified generally according to the source, and according to whether or not the receipts are earmarked in some degree for expenditure.

Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress. Disbursements of the Government are classified by accounts reflecting various types of authorizations or conditions under which they may be expended. A brief description of these various classes of accounts follows:

Budget accounts.—General fund receipts are those which are available to finance the general operations of the Government to the extent appropriations are made by the Congress. If expenditures out of these appropriations exceed budget receipts, the Secretary of the Treasury is authorized to borrow on the credit of the United States. The principal sources of general receipts are income taxes, excise taxes, employment taxes, customs duties, and miscellaneous receipts.

Special fund receipts (earmarked moneys) are received generally under Federal projects pursuant to special authorizations of law, which may be expended only for the particular purpose specified and not for general purposes. The Congress appropriates these receipts for the special purpose involved. Examples of some of the special fund receipts relate to the Reclamation Fund, the Mineral Leasing Act, and the National Forest Funds.

Expenditure (appropriation) accounts record the amounts authorized by the Congress, and expenditures therefrom, for the general support of the Government. They are classified according to the period of availability (i. e., 1-year, multiple year, no-year), as to amount (definite or indefinite), or whether or not requiring annual appropriation action by the Congress.

Revolving and management fund accounts are funds authorized by specific provisions of law to: (a) finance a continuing cycle of operations with receipts derived from such operations available without further action by Congress; or, (b) facilitate accounting for and administration of intragovernmental operations. Examples of such accounts are the General Supply Fund of the General Services Administration; the Working Capital Fund of the Public Buildings Service; and corporate operations such as those under the Reconstruction Finance Corporation and the Commodity Credit Corporation.

Nonbudget accounts.—Trust accounts are receipts and expenditures (appropriation) accounts maintained to record the receipt and expenditure of moneys held in trust by the Government for the benefit of individuals, or classes of individuals, which may be expended only in accordance with the terms of a trust agreement or statute. Examples are the Civil Service Retirement Fund, Federal Old-Age and Survivors Insurance Trust Fund, Unemployment Trust Fund, and National Service Life Insurance Fund. These moneys are not available for general purposes and do not enter into the budget surplus or deficit.

Deposit fund accounts are receipts that are either: (a) Held in suspense temporarily and later refunded or transferred into some other account of the Government; or, (b) held by the Government as banker or agent for others and paid out at the direction of the owners. These funds have no effect on the budget surplus or deficit. In Treasury reports these accounts are reported on a net basis (excess of expenditures, or excess of receipts for the period). Examples are employees' payroll allotment accounts for the purchase of U. S. savings bonds, and accounts for the accumulation of taxes withheld from employees' salaries.

BASES OF TABLES

Expenditures (disbursement basis).—Expenditures of the Government have been stated by the Treasury Department in its published reports on two bases:

1. Beginning in February 1954, every mid-month issue of the *Daily Treasury Statement* reports budget expenditures on a uniform basis of checks issued and payments made by disbursing officers. Heretofore, in the *Daily Treasury Statement*, expenditures were reported daily upon the basis of checks issued as furnished by teletype from Treasury disbursing offices; also, the checks-paid basis was used for the Department of Defense, some Government corporations, and a few other establishments having their own disbursing offices. Also included as expenditures are transfers from general appropriation accounts to trust funds.

2. In the annual *Combined Statement of Receipts, Expenditures and Balances*, expenditures are stated on the basis of checks issued during the fiscal year, as reported by Government disbursing offices; the Treasury holds its books open for this purpose until all such reports have been received.

Receipts.—The Treasury Department utilizes three bases for the reporting of receipts:

1. In order to state receipts of the Government as promptly as possible, revenues and miscellaneous receipts were reported in the *Daily Treasury Statement* on the basis of the latest available reports of deposits in Government depositories. Since February 1954, budget receipts are reported once each month in the mid-month issue of the *Daily Treasury Statement*. Budget receipts are on a collection basis, i.e., when money is received by collecting officers. Only cash receipts are shown daily in the *Statement*.

2. Certificates of deposit covering actual deposits in Treasury offices and depositories cannot reach the Treasury immediately and for that reason all receipts for a fiscal year cannot be covered by warrants (formally documented) immediately upon the close of each fiscal year. In the *Combined Statement of Receipts, Expenditures and Balances* receipts are compiled on a warrants-issued basis and include in-transit items in such a manner as to take into account all certificates of deposit applying to a particular fiscal year.

3. Collection basis—Statements showing receipts on this basis are compiled from reports of collectors in the field and from depositories for withheld taxes. These reports do not coincide with others because collecting officers make collections during the last few days of the fiscal year which are not deposited until after the close of the fiscal year and because many employers deposit withheld taxes directly in depository banks. The depository receipts are later submitted to collectors who report them in addition to the cash payments they have received.

Public debt accounts.—Tables on this basis indicate the status of the public debt after taking into consideration items in transit at the end of the period. The basis differs from that used in the *Daily Treasury Statement* since the Treasury believes that it is not practical to delay publication of that report in order to include all transactions for a particular day.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 89-98") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ Net receipts equal total receipts less (a) appropriations to Federal old-age and survivors insurance trust fund beginning 1937 and (b) refunds of receipts beginning 1931.

² Figures adjusted beginning 1931 on account of refunds of receipts and capital transfers.

³ Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in other receipts.

⁴ On basis of warrants issued 1789 through 1930; thereafter, on basis of checks issued.

⁵ Average for period Mar. 4, 1789, through Dec. 31, 1800.

⁶ Averages are for entire period though there were no amounts under these items for certain years.

⁷ Years ending Dec. 31, 1801 to 1842: average for 1841-50 is for period Jan. 1, 1841, through June 30, 1850.

⁸ Average for 1863-65.

⁹ Less than \$500.

¹⁰ Average for 1881 and 1884.

¹¹ One year only, 1895.

¹² One year only, 1910.

¹³ Sales of public lands included in other receipts.

¹ Excludes debt retirements and beginning 1931, refunds of receipts and capital transfers.² Excludes civil expenditures under War and Navy Depts. in Washington through 1915. Subsequent to 1915 includes all expenditures made by Depts. of Army (including rivers and harbors and Panama Canal), Navy, and, beginning 1949, Air Force, irrespective of original source of funds. Expenditures of Dept. of Air Force for 1949 were \$1,690,461,000; for 1950, \$3,020,633,000; for 1951, \$6,358,604,000; for 1952, \$12,851,619,000; and for 1953, \$16,009,329,000.³ On basis of warrants issued through 1930; thereafter, on basis of checks issued. Expenditures for Indians exclude interest accounts, which are included in trust fund expenditures beginning 1940. Veterans' pensions represent expenditures under appropriation "Army and Navy pensions," administered by Veterans' Administration.⁴ Includes civil expenditures under War and Navy Depts. in Washington through 1915, expenditures of Office of Secy. of Defense, unavailable funds charged off under Act of June 3, 1922, expenditures for "Govt. corporations (wholly owned), etc. (net)" beginning 1932, and expenditures for Indians and veterans' pensions beginning 1949.⁵ Represents gross debt as of end of each period; e.g., 1800, 1810, etc.⁶ Years ending Dec. 31 through 1842; average for 1789-1800 begins Mar. 4, 1789; average for 1841-50 is for Jan. 1, 1841-June 30, 1850. See note 5 concerning gross debt.⁷ Included in all other.⁸ For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to \$3,000,000,000) have been consolidated with budget expenditures.⁹ Beginning 1961, investments of wholly owned Government corporations in public debt securities are excluded from budget expenditures.¹⁰ Includes Department of Defense, not segregated as to respective departments.Source: Treasury Department, *Annual Report of the Secretary*; annual and current data published in *Daily Statement of the U. S. Treasury*.

No. 397.—FEDERAL GOVERNMENT EXPENDITURES BY ORGANIZATION UNIT: 1946 TO 1953

In millions of dollars. For years ending June 30. Expenditures reported on a checks-issued basis, adjusted in total to daily Treasury statement basis (which is partly checks issued and partly checks paid). "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Two important exceptions are appropriations from general fund to Federal old-age and survivors trust fund and refunds of receipts, both of which are excluded from expenditures and deducted from receipts. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly owned Government corporations and the United States Treasury, and debt transactions of Government enterprises (expenditures from public debt authorizations are included; see also table 400). Figures in early years have not been revised to reflect recent changes in organizational structure)

¹ Excludes transfer of \$3 billion of 1948 surplus to foreign economic cooperation trust fund for expenditure in 1949.

² Excludes \$11,036,000 representing net purchases of United States securities which is included in Treasury totals (see table 390). ³ Other expenditures are shown under various agencies to which funds are allocated.

⁴ For comparative purposes, mutual military program (\$3,954,000,000) included with funds appropriated to the President.

⁵ Deduct. ⁶ Less than \$500,000. ⁷ Included with Department of Commerce.

⁸ Includes "interservice activities."

⁹ Includes transactions of mixed-ownership corporations, which are shown separately in the *Daily Treasury Statement*.

¹⁰ Since 1950 sales and redemptions of obligations of wholly-owned Government corporations have been excluded from this table.

No. 398.—RECEIPTS FROM AND PAYMENTS TO THE PUBLIC BY THE FEDERAL GOVERNMENT: 1929 TO 1953

[In billions. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust accounts as well as budget accounts of Federal Government. This table therefore shows flow of money on cash basis between Federal Government as a whole and the public. Net borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government corporations, and also excludes certain types of public debt transactions like issuance and redemption of armed forces leave bonds. The public is defined to include individuals; banks (including Federal Reserve and Postal Savings System); businesses; private corporations; State, local and foreign governments; and international organizations. For additional explanation, see 1955 *Budget*, pp. 1098-99, headnote to table 397, and text, p. 357]

YEAR	Receipts from the public ¹	Payments to the public ¹	Excess of receipts from (+) or payments to (-) the public	Receipts from exercise of monetary authority ²	Excess of Treasury cash income (+) or outgo (-) ³	Decrease (+) or increase (-) in Treasury cash balance	Decrease (+) or increase (-) in Exchange Stabilization Fund balance	Net borrowing (-) or repayment of borrowing (+) from the public

No. 400.—BUDGET APPROPRIATIONS AND OTHER AUTHORIZATIONS FOR FEDERAL AGENCIES, BY ORGANIZATION UNIT: 1953

[In millions of dollars. For year ending June 30. The Budget total of "new obligational authority" represents total of new authorizations enacted for any fiscal year for Federal agencies to incur obligations. This total includes "net new appropriations," "reappropriations," "contract authorizations," and "authorizations to expend from public debt receipts." "Net new appropriations" represent total of all appropriations less appropriations enacted to liquidate prior year contract authorizations. "Reappropriations" continue available in the succeeding fiscal year the unused balance of an appropriation which would otherwise expire for obligation purposes. "Contract authorizations" permit placement of specific obligations or contracts but require subsequent appropriations to "liquidate" them (i. e., to authorize withdrawal of funds from Treasury in payment of obligations). "Authorizations to expend from public debt receipts" authorize use of proceeds of Treasury borrowing to finance certain types of Government programs. See also text, p. 357, and headnote to table 397]

¹ Actual tax liability on selected net incomes and necessary assumptions.

² Includes defense tax.

³ Tax liabilities for 1942 and 1943 unadjusted for transition to current payment basis.

⁴ Includes net Victory tax. Computed by assuming that deductions are 10 percent of Victory tax net income; i. e., that Victory tax net income is ten-ninths of selected net income.

⁵ Individual Income Tax Act of 1944.

⁶ Taking into account maximum effective rate limitation of 77 percent.

⁷ Excludes self-employment tax.

⁸ Tax liability divided by stated net income.

No. 407.—INDIVIDUAL AND TAXABLE FIDUCIARY INCOME TAX RETURNS—SUMMARY: 1925 TO 1950

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, the filing requirements applicable to individuals (citizens or residents of the United States), for the years shown, are as follows: (1) Single, or married and not living with husband or wife: for 1925 and 1930, net income of \$1,500 or over; 1935, \$1,000 or over; 1940, gross income of \$800 or over; (2) Married and living with husband or wife: for 1925 and 1930, combined net income of \$3,500 or over; 1935, \$2,500 or over; for 1940, combined gross income of \$2,000 or over; (3) For 1945, every individual with gross income of \$500 or over; and for 1948-50, \$600 or over; for refund purposes, returns are also required with respect to gross incomes under \$500 for 1945, or under \$600 for 1948-50, from which taxes have been withheld. (For 1925-35, returns are required to be filed by individuals having gross income of \$5,000 or over if single, or married and not living with husband or wife; or having combined gross income of \$5,000 or over if married and living with husband or wife; regardless of net income.) Data for returns showing no net income or no adjusted gross income, filed in accordance with these provisions, are not included in statistics given here. Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien and, beginning 1938, for every trust having net income of \$100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares. See also *Historical Statistics*, series P 144-147.]

¹ Taxable fiduciary returns included with individual returns through 1940, shown separately thereafter.

² Net income (shown for 1940 and prior years) is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. Adjusted gross income (shown for 1945-50) is defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales of property.

³ Tax tabulated for 1940 and prior years is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while tax for 1945-50 is after deduction of such credits.

⁴ Includes defense tax.

⁵ For individual returns only, 1945 and later years.

Total tax	16,281	18,249	15,618	14,682	18,684	18,375	200
Number of returns (thousands)	52,722	54,910	51,847	51,402	52,771	52,656	115

¹ See note 2, table 407.

² Salaries, wages, commissions, etc., include annuities, pensions, and retirement pay not reported in schedule for annuities and pensions, but exclude wages of not more than \$100 per return from which no tax is withheld, reported on Form W-2 for 1946-47, and on Form 1040A for 1948-50. (See note 12.)

³ Dividends received exclude amounts received through partnerships and fiduciaries; exclude amounts not exceeding \$100 per return reported on Form W-2 for 1946-47 and on Form 1040A for 1948-50. (See note 12.)

⁴ Interest received includes interest on notes, mortgages, bank deposits, corporation bonds before amortization of bond premium, and taxable and partially tax-exempt interest on Government obligations before amortization of bond premium; also includes, when received through partnerships and fiduciaries, partially tax-exempt interest on Government obligations and partially tax-exempt dividends on share accounts in Federal savings and loan associations. Excludes amounts not exceeding \$100 per return reported on Form W-2 for 1946-47 and on Form 1040A for 1948-50. (See note 12.)

⁵ Net profit from rents and royalties is excess of gross rents over depreciation, repairs, interest, taxes, and other rent expenses and excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is excess of expenses over gross receipts.

⁶ Net profit from business is excess of gross receipts over business expenses and net operating loss deduction due to net operating loss from business, partnership, and common trust funds for two preceding years. Conversely, net loss from business is excess of business expenses and net operating loss deduction over gross receipts from business.

⁷ Partnership profit or loss excludes partially tax-exempt interest on Government obligations, dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is the net operating loss deduction allowed.

⁸ Capital assets consist of all property held by taxpayer other than (1) stock in trade or other property held primarily for sale to customers, or (2) kinds of property specified in note 9. Net gain or loss reported is a combination of current year capital gains and losses to be taken into account (including those from partnerships or common trust funds in which taxpayer participates) and net capital loss carry-over from five preceding years but not prior to 1942. Allowable net loss is limited to amount of such loss, or to net income (adjusted gross income if taxed under Supplement T) computed without regard to gains and losses from sales of capital assets, or to \$1,000, whichever is smallest. For details as to portion of gains and losses taken into account, description of capital loss carry-over, and special treatment of certain gains and losses, see *Statistics of Income*, Part 1.

⁹ Sales of (1) property used in trade or business of a character which is subject to allowance for depreciation, (2) Government obligations issued on or after Mar. 1, 1941, on a discount basis and payable, without interest, within 1 year from issue, and (3) real property used in trade or business.

¹⁰ Income shown from annuities and pensions is only the taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income equals cost. Thereafter, entire amounts received are taxable and must be included in income. Annuities, pensions, and retirement pay from which tax is withheld may be reported as salaries and wages.

¹¹ Income from estates and trusts excludes partially tax-exempt interest on Government obligations and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Such income is reported in partially tax-exempt interest.

¹² Miscellaneous income includes all taxable income not accounted for elsewhere in this table; also includes wages not subject to withholding, dividends, and interest, not exceeding in total \$100 per return reported on Form W-2 for 1946-47 and on Form 1040A for 1948-50.

¹ An unequal number of returns of husbands and wives results from use of sampling in certain income areas, from the fact that some returns lack sufficient information to identify the family relationship, and from deferment of filing returns by certain members of the armed forces for 1945-1946 and 1950.

² Included in "Separate returns of husbands and wives."

³ See note 2, table 407.

¹ See note 2, table 407.

² Aggregates in this table differ somewhat from those in other tables for individual returns with net income, due to (a) the dual system of weighting, one series of weights uniformly applied to all districts for the national distributions and an independent series for each district for the State distributions, (b) use of rounded weighting factors, and (c) for 1948-49, a small number of returns are included in the State distributions which were not available for the national distributions.

³ Includes Alaska.

No. 414.—CORPORATION INCOME TAX RETURNS—SUMMARY: 1925 TO 1950

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. For other corporation data based on income tax returns, see pp. 505-508 and 512. See also *Historical Statistics*, series P 152-164]

[Money figures in millions of dollars]

Adjusted excess profits net income.....	-----	-----	-----	912	8,368	-----	-----	8,935

¹ Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

² Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940-50, amount shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 505, p. 506). Beginning 1936, dividends received on stock of domestic corporations are included in taxable income. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

³ Includes defense tax.

⁴ Number of returns with no net income, for 1925, includes returns of inactive corporations, not available separately.

⁵ For tax reported, see above.

¹ A corporation is classified industrially according to the business reported on the return. When diversified activities are reported, the classification is determined by the industry which accounts for the largest percentage of total receipts.

² For changes in classification affecting comparability of data, see *Statistics of Income*, Part 2, for 1938 and 1948.

³ Less than \$500,000.

¹ Returns filed in a State may not be a complete coverage of all corporations whose principal place of business is located therein. A corporation may file an income tax return either in the collection district in which it has its principal place of business or in the collection district in which it has its principal office or agency.

² Includes returns with net income, returns with no net income, and returns of inactive corporations.

¹ A return is required of every citizen or resident alien who transferred by gift during calendar year to any one donee property exceeding \$3,000 in value or who, regardless of value, made a gift of future interest in property. A nonresident alien is similarly required to file a return if gift consists of property situated in the United States.

² The Revenue Act of 1948 provides that gifts of husband or wife to third party after Apr. 2, 1948, may be considered made one-half by each.

³ An exclusion is allowed of the first \$3,000 of gifts, except gifts of future interest in property, made to any one donee during calendar year.

⁴ Deduction allowed citizens or residents for gifts made after Apr. 2, 1948, to the donor's spouse.

⁵ The specific exemption of \$30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

No. 419.—FEDERAL ESTATE TAX RETURNS—SUMMARY: 1936 TO 1950

[An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in period 5 p. m., June 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds \$50,000; (b) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds \$100,000; (c) in period Aug. 31, 1935, through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (d) on or after Oct. 22, 1942, the value of whose gross estate exceeds \$60,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds \$2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Internal Revenue Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax.]

¹ Net taxable estate is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940 through Sept. 20, 1941.

² Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

³ Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

⁴ No data compiled for 1946.

Source of tables 418 and 419: Treasury Department, Internal Revenue Service; *Statistics of Income*, Part 1.

No. 420.—ESTATE TAX RETURNS FOR ESTATES OF CITIZENS AND RESIDENT ALIENS, FILED DURING 1947 TO 1950

¹ Net estate classes are based on amount of net estate for additional tax plus specific exemption. (See note 2.)² The specific exemption tabulated (a) for estates subject to additional tax is \$50,000 under 1942 and 1948 acts; \$40,000 under 1941, 1940, and 1935 acts; \$50,000 under 1934 and 1932 acts; and (b) for estates subject to earlier acts is \$100,000 under 1926 act, and \$50,000 under 1924 and prior acts.³ Represents excess of total amount of funeral and administration expenses, debts of decedents, mortgages and liens, and support of dependents, over value of property includible in gross estate subject to claims.⁴ Excess of gross estate over allowable deductions, exclusive of specific exemption.⁵ Net estate after deducting specific exemption is \$50,000.⁶ Applies only to estates of individuals who died subsequent to June 6, 1932.⁷ Credits for (a) estate, inheritance, legacy, or succession taxes paid to States, etc.; (b) gift taxes paid to the Federal Government; and (c) death duties paid to foreign countries with which conventions are in effect.Source: Treasury Department, Internal Revenue Service; *Statistics of Income*, Part 1.

¹ Figures for 1800-1840 as of Jan. 1.

² Based on Bureau of Census estimated population for continental U. S. as of July 1 of each year beginning 1850.

³ Excludes bonds issued to Pacific railways and Navy pension fund.

⁴ Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

⁵ Less than \$500,000. ⁶ Bank eligible bonds and beginning 1942 also includes bank restricted bonds.

⁷ Consists of postal savings and Panama Canal bonds, and also conversion bonds prior to 1947.

⁸ Consists of depositary bonds, and adjusted service bonds until they matured on June 15, 1945. Also includes armed forces leave bonds for 1947-51.

¹ Holdings of commercial banks and mutual savings banks for 1930 and 1935 are reported book values, and holdings of residual investors therefore deviate from par values in these years. U. S. savings bonds, Series A-F and J, included at current redemption value.

² Includes all securities issued or guaranteed by U. S. Government, but excludes guaranteed securities held by the Treasury.

³ Includes Postal Savings System.

⁴ Includes holdings by banks in territories and insular possessions, which amounted to \$300,000,000 on June 30, 1953.

⁵ Not available separately. Combined totals of these items as follows: 1930, \$9,097,000,000; and 1935, \$11,511,000,000.

⁶ Includes savings and loan associations, dealers and brokers, foreign accounts, corporate pension funds, and nonprofit institutions.

No. 424.—INTEREST-BEARING SECURITIES ISSUED BY ALL GOVERNMENTAL UNITS IN THE UNITED STATES—ESTIMATED AMOUNTS OUTSTANDING, BY TAX STATUS AND ISSUER: 1913 TO 1953

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of *Daily Treasury Statement*. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of these issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former derived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers, with no allowance for any other public assets. Figures represent par values except in the case of data which include U. S. savings bonds, Series A to F and J, which are included on basis of current redemption values]

No. 426.—U. S. SAVINGS BONDS—SALES AND REDEMPTIONS (CUMULATIVE), WITH SELECTED CHARACTERISTICS, AS OF DECEMBER 31, 1953

[Money figures in millions of dollars except as indicated. On basis of *Daily Treasury Statement*. Series A to F and J sales shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K shown at face value. Series A to D sold from March 1935 through April 1941 and Series E, F, and G sold beginning May 1941. Beginning May 1, 1952, rate of interest accrual on Series E increased and Series F and G replaced by two new issues, Series J and K. A new current income bond, Series H, sold since June 1, 1952. Interest accrues semiannually until redemption or maturity for Series E, F, and J; is payable semiannually by Treasury check for Series G, H, and K.]

ITEM	Total, series A to K	Series A to D	Series E and H	Series F and G	Series J and K
Sales plus accrued discount	113,827	5,003	78,963	29,862	
Sales	104,599	3,949	71,463	29,188	
Accrued discount	9,228	1,054	7,500	674	
Redemptions ¹	55,893	4,921	42,300	8,672

¹ From geographic study which excluded temporary postal substitutes; distribution for June 1938 not available.² Represents peak of total employment. ³ Not available.⁴ Beginning 1950, Washington, D. C., metropolitan area includes Dist. of Columbia; Alexandria and Falls Church Cities, Arlington and Fairfax Counties, Virginia; and Montgomery and Prince Georges Counties, Maryland. In 1945, only parts of these counties were included. These areas excluded from data for 48 States.⁵ Relates to District of Columbia only.Source: Civil Service Commission; *Annual Report* and records.

No. 439.—PAID CIVILIAN EMPLOYMENT IN FULL-TIME POSITIONS IN SELECTED AGENCIES OF THE FEDERAL GOVERNMENT AND AVERAGE PAY, BY COMPENSATION AUTHORITY: 1951 to 1953

[Covers full-time employees in continental U. S. of executive agencies and the General Accounting Office and Government Printing Office; excludes other legislative and all judicial employees, and a relatively small number in executive agencies for whom rates were not specified. Employees of the Board of Governors of the Federal Reserve System are included in 1953; excluded in earlier years. Some agencies reported as of dates other than specified]

¹ Average age is 40.8 years for all employees, 41.5 years for men and 38.5 years for women. For employees under the Civil Service Retirement system, the averages are 42.7 years, 42.9 years and 42.0 years, respectively.

² Less than 0.05 percent.

³ Average length of service is 10.4 years for all employees, 11.3 years for men and 7.6 years for women. For employees under the Civil Service Retirement system, the averages are 12.7 years, 13.2 years and 10.6 years, respectively. Service represents all Federal employment, whether or not retirement deductions were taken from pay, and military service.

15. State and Local Government Finances and Employment

The governmental structure of the United States includes, in addition to the National Government and the 48 States, a total of nearly 117,000 distinct units of local government, created or authorized by the States. A majority of these—some 67,000—are local school districts, but there are large numbers also of county and township governments, municipalities, and numerous kinds of "special districts."

This section provides figures relating to State and local governments as such—their numbers, finances, and employment. Statistics regarding particular functions in which State and local governments have an important role are presented in other sections (for example, the sections on Education, Roads and Motor Vehicles, and Social Insurance and Welfare Services).

The primary official source of most of these tabulations is the current Census Bureau series on *State Finances*, *City Finances*, *Governmental Finances in the United States*, and *Public Employment*. (A descriptive leaflet, *Census Bureau Publications on Governments*, is issued annually by the Bureau.) Basic information for these series is obtained mainly by mail canvass from State and local officials; however, financial data for each of the 48 State governments and the 41 cities of over 250,000 are compiled from their official records and reports by Census personnel, and classified into uniform categories for statistical reporting. Data for finances of smaller cities (those having less than 25,000 inhabitants) and of counties, townships, school districts, and special districts are estimates based on a sample of approximately 1,800 local governments.

Number of governments.—The figures for governmental units shown in table 444 include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—lack this power but are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The figures exclude semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Financial data.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government amounts are for fiscal years ending on June 30 of the year specified, except for 6 States with earlier closing dates—3 in the same calendar year and 3 in the latter part of the preceding calendar year. Local government figures are for fiscal years ending in the calendar year specified, except for a few units which close their fiscal years in the succeeding January. Practically all school districts have fiscal years ending on June 30, but a majority of other local governments operate on a calendar fiscal year.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States and large cities, although based upon the official records and reports of these governments, will not agree directly with amounts appearing in such original sources except where particular segments of the official accounts conform explicitly to standard Census reporting categories.

Note.—This section presents data for the most recent year or period available on March 26, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

The framework for Census statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved, as to expenditure according to the purpose of the spending, and as to debt and related borrowing and debt redemption according to the purpose (general government or utility) for which the debt was incurred.

The utility sector involves only water supply, electric light and power, gas supply, and transit systems operated by local governments and liquor stores operated by 16 States and by a few local governments. The scattering of other kinds of semi-commercial activities carried on by some governments are included in the general government category.

Insurance trust amounts relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments. The general government sector comprises all activities and amounts other than those classified as utility or insurance trust in nature.

Revenue and expenditure reported for each of these sectors and in total, in the basic framework of Census statistics, represent only external transactions, and exclude transfers among agencies and funds of the government concerned. Some such internal transactions are shown separately, however, in related tables.

Some of these features of Census financial data represent a change from the framework which applied to reporting for 1950 and earlier years. Pending further recasting of prior data to the new structure, financial data appearing in this section cannot in all respects be directly related to government finance series included in the volume *Historical Statistics of the United States, 1789-1945*, or to the more detailed financial data for years up to 1946 which appear in the Census publication, *Historical Review of State and Local Government Finances*.

Employment statistics.—Figures in this section regarding public employment and payrolls are primarily based upon the Census Bureau's regular mail canvass survey covering all State governments and a scientific sample of local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during the pay period ending nearest the close of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, amounts shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 189-190") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ Includes Federal Government and the 48 States.

² Number of county governments; excludes areas corresponding to counties but having no organized county government.

³ Includes towns in the 6 New England States, New York, and Wisconsin.

⁴ Includes 15 special districts operating in more than one State. Each such district is counted only once in the tabulation—in the State in which its principal office is located.

⁵ Excludes local school systems operated as part of State, county, municipal, or township governments.

¹ Based on estimated population in continental United States as of July 1, 1953.² Subject to sampling variation.³ Data from Civil Service Commission, as of Sept. 30, 1953. Excludes employees working outside continental United States.⁴ Data for Federal employees in District of Columbia are for Washington, D. C., metropolitan area and include substantial numbers of employees working in suburban locations in Maryland and Virginia.⁵ Includes a small number of judicial employees and employees in executive agencies not allocable by State.⁶ Not computed; see footnote 4.Source: Department of Commerce, Bureau of the Census; annual report, *State Distribution of Public Employment in 1953*.

16. Banking and Finance

MONEY AND BANKING

Banking and monetary system.—Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to \$10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

Condition of banks.—The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1863 from these banks and has tabulated and published summaries of these reports in detail in the *Abstract of Reports of National Banks* (now usually four times a year). The call report data are also summarized in the annual reports of the Comptroller.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit their statements of condition at the same time and in substantially the same form as national banks. These are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and published in the *Member Bank Call Report* (usually four times a year) and in summary form in the *Federal Reserve Bulletin*. *Banking and Monetary Statistics*, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments.

Beginning with June 30, 1947, an all-bank series has been tabulated twice a year by the Federal Deposit Insurance Corporation. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based in part on the all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

Statistics of the Postal Savings System are available monthly in the *Federal Reserve Bulletin* and annually in the *Report of Operations of the Postal Savings System*.

Currency.—Currency, including coin and paper money, represents a relatively small part of the total media of exchange in the United States, as most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, with the exception of gold and silver coin known to have been exported and, beginning with January 31, 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which, strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks,

Note.—This section presents data for the most recent year or period available on March 26, 1954, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

currency lost or destroyed, and currency carried abroad by travelers. The Federal Reserve Board derives a monthly figure for "currency outside banks" by subtracting from the Treasury "circulation" figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true circulation. Historical data on the stock of money and money in circulation may be found in the *Annual Report of the Secretary of the Treasury*.

Government credit agencies.—Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. The purposes and activities of the more than 20 credit agencies reflect mandates and powers given them by Congress. Some of these agencies were created to meet financial problems precipitated by the Depression; others are geared to meeting certain broad social problems, particularly in the form of foreign aid and aid to housing.

Foreign loans of Government credit agencies include those of the Export-Import Bank and the Foreign Operations Administration. Credit for agricultural purposes is provided by the Rural Electrification Administration; the Commodity Credit Corporation, which makes price support loans on certain farm products; the Farmers Home Administration; and several cooperative credit agencies operating under the supervision of the Farm Credit Administration. (See table 429.) Loans for housing purposes represent largely purchases of insured and guaranteed home mortgages by the Federal National Mortgage Association from private lenders, but also include loans of the Federal Home Loan Banks to member institutions and the loans of the Public Housing Administration to local housing authorities to aid in the construction of low-cost housing. Most Federal guaranteeing and insurance operations are reflected in activities of the Veterans' Administration and the Federal Housing Administration. Outstanding loans of the Reconstruction Finance Corporation (in liquidation since September 1953) represent largely credit extended to businesses.

Statistics on the assets and liabilities of Government credit agencies are published quarterly in the *Treasury Bulletin*. Statistics relating to the operations of Government credit agencies are also available in reports of the individual agencies.

Private credit agencies other than banks.—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes statistics on other types of insurance. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare. Consumer credit statistics are published currently in the *Federal Reserve Bulletin*.

SAVINGS AND LIQUID ASSETS

Individuals' saving.—The Securities and Exchange Commission releases quarterly detailed estimates of individuals' saving showing the increase in liquid assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. In addition to total saving, these figures show the components contributing to it, such as changes in securities, cash, insurance, consumers' indebtedness, etc. A continuous series starting with 1940 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 501.) Annual estimates prior to 1940 were published in the *National Income Supplement to the Survey of Current Business*, July 1951, and in the issue of September 1949. The Home Loan Bank

Board compiles statistics on changes in selected types of individual long-term savings. (See table 500.) The Board of Governors of the Federal Reserve System also issues annual data covering the distribution of liquid assets and occasional data covering positive, negative, and net savings of families, by income groups. (See table 338.)

Liquid asset holdings of individuals and businesses.—The Board of Governors of the Federal Reserve System prepares annual estimates of the amount of currency, demand deposits, time deposits, shares in savings and loan associations, and U. S. Government securities held by individuals and businesses. This series, which begins in December 1939, is published annually in the *Federal Reserve Bulletin*. (See table 502.)

SECURITIES MARKETS

New issues and retirement of securities.—Statistical information on new security issues has been provided for many years by the *Journal of Commerce* (since 1906) and the *Commercial and Financial Chronicle* (since 1919). (See table 543.) The statistics of the *Commercial and Financial Chronicle*, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and of foreign governments and their subdivisions.

A more comprehensive series of new issues with detailed information on the intended uses of net proceeds has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over \$100,000 and with terms to maturity of more than one year. (See tables 541 and 544.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the *Federal Reserve Bulletin*. The Commission also publishes data from time to time on cost of flotation of securities registered under the Securities Act of 1933 and privately placed issues.

Trading in securities.—(See tables 533, 536, 537, 539.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings, cross transactions, and errors of omission, which ordinarily approximate from five to ten percent of total round-lot sales on the Exchange.

Security price averages.—Among the most widely known indexes of security prices are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided

into 30 industrial, 20 railroad, and 15 public utility stocks. Indexes of the Standard and Poor's Corporation, available since 1918, are now based on the Wednesday closing prices of nearly 500 stocks. (See table 532.) The Securities and Exchange Commission compiles an index of weekly closing prices of 265 stocks listed on the New York Stock Exchange, comprising 37 industry groups. These indexes are published in the Commission's *Statistical Bulletin* and in the Council of Economic Advisers' *Economic Indicators*. (See table 531.)

INSURANCE

Insurance statistics.—There are no complete statistics of insurance for the United States as a whole. Individual States collect statistics on insurers operating within their respective jurisdictions; organizations representing certain classes of insurers, or of insurance, collect statistics for those classes; insurance publishers gather the only statistics approaching comprehensiveness. This situation arises primarily from the fact that the regulation of insurance and the collection of primary information on insurance are in the hands of the various States, Territories, and the District of Columbia. While insurance is now largely subject to Federal regulation, the Federal Government has not taken any steps to collect comprehensive statistics of insurance on a national basis. Basic theory and practice are parallel throughout insurance, but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

Types of insurance.—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling in one of these three classes, though there is now a tendency in the direction of permitting insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses connected with transportation. *Fire insurance*, as such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Insurance and Welfare Services.)

Types of insurer.—The principal classes of insurer are stock companies and mutual companies or associations. Of less importance are fraternal insurers, reciprocal exchanges, Lloyds, State funds, and savings banks. *Stock companies* are corporations owned and controlled by stockholders, usually for the purpose of making profits. *Mutuals* are owned and controlled by insured members for the purpose of meeting their insurance needs at cost. *Fraternal insurers* emphasize social purposes as well as insurance; *reciprocal exchanges* are organizations of individual insureds operating through an attorney-in-fact; *Lloyds* are groups of individuals writing insurance in syndicates; *State funds* are insurers operated by individual States and are almost entirely devoted to writing workmen's compensation insurance; *savings banks* write life insurance in three States.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series N 172-178") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 474.—CONSOLIDATED CONDITION STATEMENT FOR BANKS AND THE MONETARY SYSTEM: 1929 TO 1953

[In millions of dollars. Figures partly estimated. Comprises all commercial and savings banks, Federal Reserve Banks, Postal Savings System, and Treasury currency funds. Treasury funds included are the gold account, Treasury currency account, and Exchange Stabilization Fund]

¹ Beginning 1870, excludes gold and silver certificates and Treasury notes of 1890 outside Treasury. Beginning 1934, excludes amount (gold certificates) held for Federal Reserve Banks and agents. These items are excluded since gold and silver held as security against them are included.

² Both items include also reserve against Treasury notes of 1890.

³ 1934 to date, gold certificates. Amount excluded from total since gold held as security against gold certificates is included in column "In trust against gold and silver certificates."

⁴ Includes total stock of silver dollars and subsidiary silver.

Federal Reserve Bank notes	3,208	81,470	22,378	527,001	273,788	220,684	200,054
National bank notes	650,779	704,268	165,155	120,012	86,488	77,364	73,403

¹ Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

² By proclamation of the president dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15 $\frac{5}{16}$ grains of gold, 0.9 fine. Hence, value of gold based on \$35 per fine ounce beginning June 1934; theretofore, based on \$20.67 per fine ounce.

³ Includes paper currency held outside continental United States.

⁴ Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

NO. 478.—DEMAND DEPOSIT ACCOUNTS—BANK DEBITS AND DEPOSIT TURNOVER: 1943 TO 1953

[Debits in millions of dollars. Data partly estimated. This revised debits series measures the extent to which depositors are using their checking accounts, and comprises only debits or charges to demand deposit accounts of individuals, partnerships, and corporations, and of State and local governments, and payments from trust funds on deposit in the banking department. Excludes debits to United States Government deposit accounts, debits to time deposit accounts, and payments of certified and officers' checks, payments in settlement of clearing house balances, charges to expense and miscellaneous accounts, corrections and similar charges, and debits to the accounts of banks, that is, to interbank accounts. Comparable data not available prior to 1943. For series including time deposits and United States Government accounts, see also *Historical Statistics*, series N 76-85]

No. 479.—BANK CLEARINGS AT PRINCIPAL CITIES: 1920 TO 1953

In millions of dollars. Comparability of figures for different years is affected by tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (table 478) are a better measure of volume of payment. Cities listed in order of importance according to clearings in 1953. See also *Historical Statistics*, series N 86-89)

¹ Coinage of domestic gold coin discontinued in 1933.

No. 482.—SILVER—PRICES, BULLION VALUE, AND RATIO TO GOLD: 1840 TO 1952

[All figures, except "Commercial ratio to gold," expressed in dollars. London price converted to basis of ounce 1.000 fine and converted to American money at par of exchange through 1930; from 1931 through 1944, at current rate of exchange; beginning 1945, reported on basis of ounce 0.999 fine and converted to American money at current rate of exchange. Commercial ratio computed on basis of London quotations through 1914; thereafter, on basis of New York average price. Beginning 1934, monetary value of gold is \$35.00 per fine ounce, as against \$20.67 in previous years. Value of fine silver (371.4 grains) in dollar computed on basis of London quotations through 1917; thereafter, on basis of New York average price. See also *Historical Statistics*, series N 183-184; for data on commercial ratio to gold and value of silver in dollar]

No. 483.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1834 TO 1952

[Money figures in millions of dollars. Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1941), and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam (except 1942-44), and American Samoa. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1887; statistics for private banks, except for 1935, cover only banks under State supervision and those voluntarily reporting; for 1935 they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933. See also *Historical Statistics*, series N 19-34, and N 43-45]

¹ Reciprocal interbank demand balances with banks in U. S. are reported net, beginning 1942.

² Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.

³ Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1920. Not reported separately for prior years.

⁴ Includes lawful reserve and exchanges for clearing house. Beginning 1936, excludes cash items not in process of collection.

⁵ Beginning 1934, includes capital notes and debentures for banks other than national.

⁶ Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.

⁷ Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.

⁸ Capital only.

⁹ U. S. Government securities only.

¹⁰ Includes State bank circulation outstanding.

¹¹ Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.

¹² Figures given under capital for 1935 include capital stock of one stock savings bank (see headnote).

¹³ Not available.

¹ Beginning with 1942, taxes on net income, previously included in expenses, are reported separately, and recurring depreciation on banking-house furniture and fixtures, previously included in losses and charge-offs, is included in expenses.

² Includes interest on capital notes and debentures beginning 1933, when first issued.

³ Prior to 1949, averages of amounts reported for every call date in year and final call date in preceding year. For 1949-1953 averages of amounts reported for call dates at beginning, middle, and end of year were used, plus the last Wednesday-of-the-month figures for the 10 intervening months.

⁴ Not available on the 13-month basis used for all member banks.

¹ Both direct and guaranteed obligations.

² Prior to Dec. 31, 1935, excludes balances with private banks to extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which then amounted to \$62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which on Dec. 31, 1942, aggregated \$513,000,000.

³ Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

⁴ Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

⁵ Central reserve city banks only.

¹ For rates for 1914 to 1921, see Statistical Abstract 1928, table 249; for 1922 to 1932, Statistical Abstract 1933, table 232; for 1933 to 1936, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by sec. 13b of Federal Reserve Act, which are not shown in this table, see source.

² Rediscounts of notes, drafts, and bills eligible for discount under Federal Reserve Act, and advances secured by such paper, by direct obligations of U. S., by certain obligations guaranteed as to principal and interest by U. S., and by obligations of Federal intermediate credit banks maturing within 6 months.

³ 1 percent on advances secured by Government obligations.

⁴ ½ percent on advances secured by Government obligations maturing or callable in 1 year or less. This preferential rate eliminated in April and May 1946.

⁵ Advances secured to satisfaction of Federal Reserve Bank.

⁶ Rate of 2½ percent to other lenders (than banks) in effect until Apr. 11, 1942.

⁷ Separate rate to banks eliminated.

¹ Excludes figures for banks, insurance companies, savings and loan associations, nonprofit associations, foreigners, and governmental bodies and agencies.

² Estimates of demand and deposit balances as they would appear on the records of depositors. They differ from figures based on bank records such as given in regular banking statistics. Depositor-record estimates are lower than bank-record estimates; for example, total demand deposits as of Dec. 31, 1952 on a holder-record basis (see table) amounted to 73.0 billion dollars while on a bank-record basis these deposits amount to 92.9 billion.

³ Private share capital in all operating savings and loan associations including private repurchasable shares, deposits, and investment certificates.

⁴ Includes outstanding amounts of excess profits tax refund bonds beginning December 1945, and armed forces leave bonds beginning December 1947.

⁵ Includes real estate companies, finance and credit companies, insurance agencies (not carriers), investment trusts, security brokers and dealers, holding companies not otherwise classified, etc.

⁶ Includes only amounts administered by corporate trustees.

⁷ Includes holdings of farmers and professional persons.

Source: Board of Governors of the Federal Reserve System. Published each year in *Federal Reserve Bulletin*, for July.

**No. 503.—BANK SUSPENSIONS—NUMBER OF BANKS AND AMOUNT OF DEPOSITS:
1864 TO 1953**

[Banks closed either permanently or temporarily, on account of financial difficulties, by order of supervisory authorities or by directors of bank. "Member" refers to membership in Federal Reserve System. All National banks in continental U. S. are Federal Reserve System members; all Federal Reserve System members are insured. See also, *Historical Statistics*, series N 135-147]

¹ Revised.

² Includes purchase-money mortgages and sales contracts in addition to regular mortgages.

³ Beginning 1935, includes insured commercial banks; prior to 1935, open State and national banks.

⁴ Not available.

⁵ Average of rates on mortgages recorded during month of March only.

⁶ Average contract rates, except for temporarily reduced rates on outstanding loans of Federal land banks, 1935 and 1940, and Federal Farm Mortgage Corporation, 1940 and 1945.

⁷ Payable during calendar year on outstanding loans. Excludes amounts paid by Secretary of Treasury to Federal land banks, 1935 and 1940, and Federal Farm Mortgage Corporation, 1940 and 1945, as reimbursement for interest reductions granted borrowers.

⁸ Preliminary.

No. 530.—MARGIN REQUIREMENTS ON SECURITIES CREDIT: 1934 TO 1953

[Prescribed by Board of Governors of the Federal Reserve System in accordance with Securities Exchange Act of 1934. Regulations limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of the extension; the margin requirement is the difference between the market value (100 percent) and the maximum loan value. Data shown here are for regular accounts]

EFFECTIVE DATE	MARGIN REQUIRED (percent of market value)			EFFECTIVE DATE	MARGIN REQUIRED (percent of market value)		
	For credit by brokers and dealers on listed securities	For short sales	For loans by banks on stocks		For credit by brokers and dealers on listed securities	For short sales	For loans by banks on stocks
Oct. 1, 1934.....	¹ 25-45	(²)	-----	Jan. 21, 1946.....	100	100	100
Feb. 1, 1936.....	¹ 25-55	(²)	-----	Feb. 1, 1947.....	75	75	75

¹ Straight average of market prices of all taxable marketable bonds due or callable in 15 years and over; beginning April 1952, in 12 years and over.

² Prices derived from average yields on basis of a 4 percent 20-year bond based on Wednesday closing prices.

³ Based on composite of data (including industrial, utility, and railroad) and are a conversion of yield indexes, based on yield to maturity of each bond and assuming a 4 percent coupon with 20 years to maturity. From April 1937 to date, prices are averages of weekly data for 17 A1+ bonds; from January 1929 to March 1937, data based on a varying group of A1+ bonds, one price monthly (first of month) being used.

⁴ Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend. Data from Board of Governors, Federal Reserve System.

⁵ Based on Wednesday's closing prices, or last preceding sale price; indexes weighted by number of shares of each stock outstanding in base period. Number of stocks represents number currently used; continuity of series not affected by change in number.

⁶ Averages of daily closing figures. Changes have been made in stocks used at various times. However, the number of stocks has remained constant except for public utilities (see note 7).

⁷ For 20 stocks prior to June 2, 1938.

⁸ Based on prices end of month. 200 stocks used represent for the most part, an identical list, except in public utility group, which is a continuous series composed of 24 electric utilities (representing combined holding and operating electric companies prior to 1942 and operating electric companies thereafter). Data for A. T. & T. Co., included in figures for 200 stocks; excluded from utilities in order to show more clearly the trend for electric operating companies.

⁹ Includes also 15 banks and 10 insurance stocks and 1 additional public utility stock (see note 8).

Source: Department of Commerce, Office of Business Economics; *Survey of Current Business*, except as noted. (For original sources see table stub.)

No. 541.—SECURITIES—NEW SECURITIES OFFERED FOR CASH SALE, BY TYPE AND ISSUER: 1934 TO 1953

[Estimated gross proceeds in millions of dollars. Gross proceeds are derived by multiplying principal amounts or number of units by offering prices, except for municipal issues where principal amount is used. Covers substantially all new issues of securities offered for cash sale in United States in amounts over \$100,000 and with terms of maturity of more than 1 year. Figures represent offerings, not actual sales. Includes issues privately placed, publicly offered, unregistered issues and those registered under Securities Act of 1933]

Source: Securities and Exchange Commission; monthly data published in *Statistical Bulletin*.

NO. 545.—SHAREHOLDINGS OF RECORD IN REPORTING CORPORATIONS, CLASSIFIED BY TYPE OF BUSINESS: 1951

[Covers 3,954 common and preferred stocks representing close to 25 percent of all publicly owned issues, including one or more issues of virtually all larger companies. Relates to share ownership held in the United States (including shares of companies incorporated in other countries) rather than to ownership of United States corporations. Canvass covered all publicly owned corporations with stocks listed on the several exchanges, together with a large number whose stock are not listed on any exchange. Only publicly owned corporations are included; family and closely held companies of all types are excluded, as are those whose shares are restricted by agreements or options affecting their resale. Cooperative associations are also excluded. A number of companies for which data are included are not corporations in a strict sense, but their shares are comparable to those of corporations in practically all respects. For most corporations, figures apply within period between Nov. 1, 1951, and Feb. 1, 1952; for a number of companies with fiscal years ending prior to Nov. 1, figures are for an earlier date in 1951]

Others.....	464.2	624,212.2	1,344.7	27,061.6	58,207

¹ Represents number of listings in stock transfer books (or other records). "Shareholder" thus differs from "share owner" (or stockholder) who may own shares in more than one corporation, or in more than one issue of the same corporation. See tables 547-549 for number of share owners.

² Includes holdings for buyers on margin, since they are not fully paid; and holdings of fully paid shares held mainly for convenience of the beneficial (or actual) owners who may be abroad or who for other reasons find it advantageous to have brokers retain their securities.

³ Nominees include all partnerships, individuals, and organizations created as a business convenience to appear as holders of record in behalf of the beneficial (or actual) owners. A very large portion of all nominee holdings is accounted for by fiduciaries or trust accounts.

⁴ Estimated to show how shareholdings would appear if all shareholdings were registered in the names of the actual owners rather than in the names of nominees or brokers (see notes 2 and 3). Each person with an interest in a common trust fund is counted as a separate beneficial holder.

⁵ Relates only to holdings for other brokers and dealers.

Source: The Brookings Institution, Washington, D. C.; *Share Ownership in the United States*.

No. 547.—INDIVIDUAL SHARE OWNERS OF PUBLICLY OWNED STOCKS DISTRIBUTED BY EDUCATIONAL LEVEL: 1952

[If an individual owns shares in five stocks he is counted as one share owner, but in tables 545 and 546 he is represented by five shareholdings. Fiduciaries, institutions and foundations, and other nonindividual holders are excluded. Analysis is based on data obtained through a nation-wide field survey conducted during Jan.-Feb. 1952. This survey embraces interviews pertaining to 15,552 persons represented in a cross section of 5,000 family spending units. For an explanation of sample design and probable variability, see source publication.]

No. 556.—FIRE LOSSES, TOTAL AND PER CAPITA: 1876 TO 1952

[Amounts, except per capita, in thousands of dollars. Continental United States only. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter. Estimated fire losses are based on paid losses]
