17. Business Enterprise

Statistics in this section relate in general to the place and the behavior of the business firm and business initiative in the American economy. More specifically, the data show measures of and changes in business population, corporate assets and liabilities, certain types of business income and expenditure, patents and designs, and research expenditures.

Business population and turnover.—These estimates of the Office of Business Economics (see tables 560-562) are based on data from a number of sources, particularly Bureau of the Census, Internal Revenue Service, and Bureau of Old-Age and Survivors Insurance. A firm is defined here as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is counted only in that industry accounting for the highest proportion of its total employment. A self-employed person is considered a firm only if he has either one or more employees or has an established place of business. This count of business population differs from that of the Bureau of the Census which ordinarily represents a count of establishments, i. e., manufacturing plants or retail stores.

The number of new and discontinued businesses is estimated from tabulations prepared by the Bureau of Old-Age and Survivors Insurance, which show the number of employer identification numbers issued and canceled each quarter.

Business transfers represent purchases of going businesses, acquisitions of businesses through inheritance, transfers of businesses to a trustee or executor as well as changes in the form of business organization.

Information on new incorporations is collected by Dun & Bradstreet and is available monthly, by States, beginning in July 1945. The statistics include both completely new businesses which are incorporated, and changes in existing businesses from the noncorporate to the corporate form of organization, the transfer of an existing corporation to a new State, etc.

Corporate assets and liabilities.—These data are from the Internal Revenue Service and the Securities and Exchange Commission. In its annual report, *Statistics of Income*, Part 2, the Internal Revenue Service presents abbreviated balance sheet and income account data for all United States corporations. In a quarterly release entitled *Net Working Capital of U. S. Corporations*, the Securities and Exchange Commission publishes data on the net working capital position of all United States corporations, exclusive of banks and insurance companies, showing the principal components of current assets and liabilities.

Corporate income, profits, dividends, and taxes.—The Internal Revenue Service, the Office of Business Economics of the Department of Commerce, and the Board of Governors of the Federal Reserve System are the principal sources of statistics on these subjects. The statistics of these agencies overlap in many respects but are not comparable because of differing purposes of compilation.

Corporation statistics based on income tax returns are published by the Internal Revenue Service in the annual *Statistics of Income*, Part 2.

Corporation data of the Office of Business Economics are from statistics on national income and product which may be found in its *Survey of Current Business*. In particular, see regular February and July monthly issues, and the 1951 *National Income Supplement*. These data are defined as required for purposes of national income estimation.

The primary sources of data for the Office of Business Economics estimates of profits, taxes, dividends, and undistributed profits are the original corporate tax returns sub-

Note.—This section presents data for the most recent year or period available on April 12, 1954, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

mitted to the Internal Revenue Service, and summarized in the annual report on *Statistics of Income*, Part 2. Various adjustments of the *Statistics of Income* data have been required by the national income treatment, particularly with respect to depletion, capital gain or loss, and intercorporate dividends, and because the original corporate income statements do not represent the final stage of information. For details of these adjustments, see table 38 of the reports on national income and product in the *National Income Supplement* cited above. That table provides a reconciliation between the national income profit series and those reported in *Statistics of Income*.

Unincorporated enterprises.—These data also are from the national income and product statistics of the Office of Business Economics. Net income of these enterprises is a composite income share. It includes return on proprietors' investment and risk, as well as return from proprietors' own labor and any labor contributed by proprietors' families to the business.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and the manner in which they are financed. Sources of funds should be equal to their uses. Certain discrepancies, however, apart from errors in estimation, interfere with this equality. These discrepancies are not particularly significant and are due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment (2) transactions in securities held as permanent investments except public offerings, and (3) the fact that net new issues omit entrepreneurial capital for new corporations where no offering or sales of securities are made to the public or to institutions. Liquidation of such corporations is similarly not reflected.

Business sales and inventories.—These data include all companies, both corporate and noncorporate, major activities of which are in manufacturing or trade. Farm and other nonfarm businesses are not included. The manufacturing figures are the sum of (1) totals for corporations from Internal Revenue Service *Statistics of Income* data for 1939-50 and projections of 1950 figures by means of a representative sample of manufacturing corporations for 1951-53, and (2) estimates for unincorporated enterprises projected, by means of sample data, back to 1939 and forward to 1953 from benchmarks on sole proprietorships and partnerships from Internal Revenue Service for the years 1939, 1945, 1947, and 1949.

Retail and wholesale trade estimates are based on figures in 1939 and 1948 Censuses of Business, interpolated and carried forward by means of sample data, Internal Revenue Service compilations, and other information.

Net change in business inventories.—To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios of current prices to base year prices. No inventory valuation adjustment is shown for farm inventories because change in farm inventories is estimated (by Department of Agriculture) from physical quantity data.

Plant and equipment expenditures of U. S. business.—A joint survey by the Securities and Exchange Commission and the Department of Commerce presents quarterly data on actual expenditures of U. S. business, other than agriculture, and anticipated expenditure for the next two quarters. In addition, a survey is made at the beginning of each year of plans of business as regards expansion during that year. The data are based on reports submitted by corporations registered with the Securities and Exchange Commission and by a large sample of nonregistered manufacturing companies, unincorporated as well as corporate, reporting to the Department of Commerce.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 176-187") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Fig. XXXVIII.—BUSINESS EXPENDITURES FOR NEW PLANT AND EQUIPMENT:
1945 TO 1954

[Excludes agriculture. See table 575]

*Anticipated by business.

No. 560.—AVERAGE NUMBER OF FIRMS IN OPERATION, 1929 TO 1953, AND NEW AND DISCONTINUED BUSINESSES, 1940 TO 1953

[In thousands. Data are for continental United States. Excludes firms in agriculture and the professional services. New businesses include only firms which have been newly established; going concerns which have been purchased are considered business transfers. Discontinued businesses include closures of all kinds without reference to reason for discontinuing—e. g., failure, retirement, illness of proprietor, etc.]

¹ Excludes returns with fragmentary balance sheet data.² Adjustments are made in tabulating data as follows: (1) Reserves for depreciation, depletion, amortization, and bad debts, when reported under liabilities are used to reduce corresponding asset account, and "Total assets" and "Total liabilities" are decreased by amount of such reserves; and (2) a deficit in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by amount of deficit.³ Cash in till and deposits in banks.⁴ Less reserve for bad debts. Includes loans and discounts of banks.⁵ Consists of obligations of United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof, District of Columbia, and United States possessions.⁶ Less depreciation and depletion reserves. Includes land.⁷ For balance sheets in which common and preferred stock are not reported separately, combined amount is tabulated as "Common stock."⁸ Consists of sum of positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."⁹ Consists of negative amounts for "Earned surplus and undivided profits."Source: Treasury Department, Internal Revenue Service; *Statistics of Income*, Part 2.

No. 564.—CURRENT ASSETS AND LIABILITIES OF U. S. CORPORATIONS: 1943 TO 1953

[In billions of dollars. Covers all U. S. corporations excluding banks and insurance companies. 1942-1949 based on Bureau of Internal Revenue Statistics of Income, covering virtually all corporations in United States; for 1950-53 estimated (subject to revision), based on data compiled from many different sources, including data on corporations registered with Securities and Exchange Commission. Figures as of end of specified years]

Net working capital.....	42.1	45.6	51.6	56.2	62.1	68.6	72.4	81.6	86.1	89.9	92.7

¹ Receivables from and payables to U. S. Government exclude amounts offset against each other on corporation's books or amounts arising from subcontracting which are not directly due from or to U. S. Government.² Includes marketable securities other than U. S. Government.³ Includes provisions for renegotiation other than those combined with income tax liabilities.Source: Securities and Exchange Commission; Statistical Series, *Net Working Capital of U. S. Corporation*. Data are published quarterly.

No. 565.—CORPORATION RECEIPTS, DEDUCTIONS, PROFITS, AND TAX: 1925 TO 1950

[Includes data for Alaska, District of Columbia, and Hawaii; based on income tax returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade-corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. Data represent combined totals for returns reporting net income and those reporting no net income. For number of returns, see table 414, p. 382]

[In millions of dollars]

Stock	544	414	136	140	334	1,025	684	1,292

¹ Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude non-taxable income other than tax-exempt interest received on certain Government obligations.

² Not available.

³ Beginning 1936, "Dividends from domestic corporations" are taxable income, tabulated with "Other receipts."

⁴ Beginning 1934, includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "Other receipts" for 1941-50.

⁵ Beginning 1936, includes contributions or gifts (limited to 5 percent of net income before this deduction).

⁶ Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession, and gift taxes; (3) income taxes paid to a foreign country or possession of United States, if any portion is claimed as a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

⁷ Tabulated with "Other deductions."

⁸ Includes amortization of emergency facilities for 1940 and later years.

⁹ Compiled receipts less compiled deductions.

¹⁰ Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940-50, amount shown is before deduction due to net operating loss of prior years.

¹¹ Deducted by corporations reporting net income.

¹² In addition to income tax, includes: declared value excess-profits tax, 1933-45; defense tax, 1940; and excess profits tax under (1) provisions of Second Revenue Act of 1940, 1940-46, and (2) Excess Profits Tax Act of 1950, beginning July 1, 1950.

No. 568.—INCOME OF UNINCORPORATED ENTERPRISES, BY INDUSTRY: 1946 TO 1952

[In millions of dollars. Income of unincorporated enterprises measures monetary earnings and income in kind of sole proprietorships, partnerships, and producers' cooperatives from their current business operations—other than supplementary income of individuals derived from renting property. Income equals business receipts (exclusive of capital gains and expenses) less business expenses (exclusive of capital losses and depletion allowances)]

No. 569.—CORPORATE INCOME BEFORE FEDERAL AND STATE INCOME AND EXCESS PROFITS TAXES, BY INDUSTRY: 1946 TO 1952

[In millions of dollars. Corporate income before taxes, as included in national income statistics, represents earnings of corporations organized for profit which accrue to residents of the Nation, measured before Federal and State profit taxes, without deduction of depletion charges and exclusive of capital gains and losses. Profits accruing to residents are measured by eliminating intercorporate dividends from profits of domestic corporations and by adding net receipts of dividends and branch profits from abroad. In other respects, definition of profits is in accordance with Federal income tax regulations. Corporate income before taxes is measured net of capital gains and losses, dividends received, renegotiation refunds, and accelerated emergency amortization charges, but before deduction of depletion charges. Definition with respect to depletion charges has an important effect on data for mining industries]

No. 570.—CORPORATE PROFITS, TAXES AND DIVIDENDS: 1942 TO 1953

[In billions of dollars. See headnote table 569. Corporate profits are given both before and after Federal and State taxes on corporate earnings. Disbursements of tax refunds have been deducted from tax liability in year in which tax liability was incurred. Dividends represent amount of cash dividends disbursed to residents of the Nation, and therefore are measured after elimination of intercorporate dividends. Undistributed profits comprise difference between corporate profits after taxes and net dividend payments. Quarterly data are seasonally adjusted at annual rates]

No. 579.—BUSINESS SALES AND INVENTORIES: 1940 TO 1953

[In billions of dollars. Data include all companies, both corporate and noncorporate, major activities of which are in manufacturing or trade. Farm and other nonfarm businesses not included. Manufacturing figures are the sum of (1) totals for corporations from Internal Revenue Service *Statistics of Income* data for 1939-50 and projections of 1950 figures by means of a representative sample of manufacturing corporations for 1951-53, and (2) estimates for unincorporated enterprises projected, by means of sample data, back to 1939 and forward to 1953 from benchmarks on sole proprietorships and partnerships from Internal Revenue Service for 1939, 1945, 1947, and 1949. Wholesale trade estimates based on figures in 1939 and 1948 Censuses of Business interpolated and carried forward by means of sample data, Internal Revenue Service compilations, and other information. Retail trade estimates through 1950 based on the same general procedures described above. Beginning in 1951, retail trade estimates based on a new method of estimation adopted by Bureau of the Census]

No. 580.—NET CHANGE IN BUSINESS INVENTORIES: 1929 TO 1952

[In millions of dollars. Net change in business inventories measures change in physical inventories, valued at average prices current during year. Difference between change in business inventories as thus measured and change in book value of inventories constitutes inventory valuation adjustment]

No. 581.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES: 1857 TO 1953

[Excludes all railroad failures. Series revised beginning 1933 to exclude real estate and financial companies. These revisions bring failure record more nearly in accordance with type of concerns covered by "Total number of concerns in business," in which no changes were made. Beginning 1939, new series includes voluntary discontinuances with loss to creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series]

YEAR OR YEARLY AVERAGE	Total number of concerns in business ¹	Number of failures	Current liabilities (1,000 dollars)	Average liability	YEAR	Total number of concerns in business ¹	Number of failures	Current liabilities (1,000 dollars)	Average liability

¹ Figures include patents for inventions, designs, and reissues of patents. Includes applications without fees from 1918 to date.

² Data are for the year 1925.

³ Figures for 1940 are for the six-months period ended June 30, 1940. On July 1, 1940, jurisdiction of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization. (See table 606.)

⁴ Excludes 150 trade-mark republishings (under Trade-Mark Act of 1946) of trade-marks registered under prior acts for 1947; 19,730 for 1948; 12,983 for 1949; 2,053 for 1950; 1,297 for 1951; 1,182 for 1952; and 1,392 for 1953.

⁵ Due to change in reporting base, 1953 figures include applications received from Dec. 24, 1952, through Dec. 31, 1953.

Source: Department of Commerce, United States Patent Office; records (not published elsewhere). Fiscal year figures published in *Annual Report of the Secretary*.

18. Communications

This section includes financial and operating data for telephone, wire-telegraph, ocean-cable, and radiotelegraph carriers, data on newspapers, periodicals, and books, and data on the postal service. Also included are financial and statistical data relating to authorized standard (AM), FM and television radio broadcast stations and networks. Additional data on communications (e. g., number of telephones on farms, radios in occupied dwelling units, and the manufacture of communication equipment) appear in other sections of this *Abstract*.

Telephone and telegraph systems.—Since the establishment of the Federal Communications Commission in 1934, statistical coverage of communications has been concentrated in that agency. The Commission issues annually *Statistics of the Communications Industry in the United States*, which contains most of the data shown here. Additional data may be obtained from the annual reports of the American Telephone & Telegraph Co., and the Western Union Telegraph Co. Beginning in 1902, reports on the telephone and telegraph industries covering all systems and lines were compiled at 5-year intervals by the Bureau of the Census in the Census of Electrical Industries. The last Census was taken for the year 1937.

According to the Communications Act of 1934, as amended, only common carriers engaged in interstate, or foreign, communication service are subject to the full jurisdiction of the Commission, and are required to file annual and monthly reports. The companies controlling these carriers are also required to file annual reports. Practically all the wire-telegraph, ocean-cable, and radiotelegraph carriers are subject to the full jurisdiction of the Commission. A large number of telephone carriers engaged only in intrastate service are not fully subject to the Act. However, it is estimated that the gross operating revenues of the telephone carriers reporting annually cover over 90 percent of the revenues of all telephone carriers in the United States.

The term "system" in general is used for aggregations of lines operated by the larger companies. "Bell System" as referred to in this section, consists of the American Telephone & Telegraph Co., and its principal telephone subsidiaries.

Broadcasting.—Data are from the Federal Communications Commission. The number of broadcast stations refers to the number licensed or holding construction permits. Total broadcast revenues are defined as total time sales of all networks and stations, less commissions to agencies and plus incidental revenues, such as sale of talent, program material, etc. Reports filed with the Federal Communications Commission by radio broadcast stations and networks cover substantially all units in the industry which operate in the United States and its possessions or between the United States and foreign countries.

United States Postal Service.—Data on the postal service are obtained from the *Annual Report of the Postmaster General*. The postal statistics, unless otherwise noted, include data for outlying Territories, possessions, etc., except the Canal Zone; the Philippine Islands are excluded for all years.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 170-175") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on April 12, 1954, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

No. 589.—AMERICAN TELEPHONE & TELEGRAPH CO. AND PRINCIPAL TELEPHONE SUBSIDIARIES (BELL TELEPHONE SYSTEM)—SUMMARY: 1925 TO 1953

[Figures are as of December 31]

¹ Partly estimated.

² Includes county, municipal and other taxing-district taxes. Excludes excise taxes collected by telephone carriers from users of telephone services.

³ Includes \$517,000 not distributed by States.

⁴ Less than 500.

No. 592.—TELEPHONE SYSTEMS—SUMMARY, CLASS A CARRIERS: 1926 TO 1952

[All money figures in thousands. Excludes intercompany duplications. Covers class A telephone carriers filing annual reports with F. C. C. Class A carriers are those whose annual operating revenues exceeded \$100,000 for years prior to 1951, and \$250,000 thereafter; comparability of data relatively unaffected by change in coverage. Gross operating revenues of class A carriers (excluding intercompany duplications of Bell System) reporting in 1937 represented approximately 84 percent of revenues of all telephone carriers as reported for Census of Electrical Industries for that year. Figures include data for carriers consolidated and merged for which annual data are available]

¹ Number on Dec. 31 prior to 1943; end of October, thereafter.

² Data for 1926 through 1930 include estimates.

³ In comparing figures in this table, consideration should be given to the minor effect of revisions of Uniform System of Accounts, effective Jan. 1, 1933, and Jan. 1, 1937, resulting in certain changes in and rearrangements of both balance sheet and income statement.

⁴ Ratio of operating expenses to operating revenues.

No. 605.—BOOKS—NEW BOOKS AND NEW EDITIONS PUBLISHED, BY SUBJECT: 1950 TO 1953

[Data based on reports from publishers, numbering 800 or more. To assure as complete a coverage as possible, reports are checked against book reviews and notices and against card index of the Library of Congress. New books are new titles; new editions are revisions of trade or textbook, and cheaper editions of original trade books. Data exclude pamphlets, theses, reports, and reprints (containing no change whatsoever from original publication)]

19. Power

Statistics on the various sources of energy are compiled by numerous agencies but only a few of the series are reasonably complete or arranged to avoid duplication in a manner that permits ready computation of total energy requirements. Oil, coal, natural gas, and wood yield many products as well as power and, consequently, enter into many statistical series.

Data on coal, oil, and natural gas production, utilization, and related subjects are compiled annually by the Bureau of Mines and are published in the *Minerals Yearbook*. For summaries of statistical material from this source, see section 28, Mining and Mineral Products. Data on natural gas utilization and the production of manufactured gas from coal, oil, and related products, its utilization, and related statistics are published by the American Gas Association in its monthly bulletins and annual statistical numbers. Annual summary data are included in this section.

Data on the production of electric energy by type of prime mover and showing the quantities of basic fuels—coal, oil, natural gas, and others—used in production, and the capacity of all generating plants by type of prime mover and related statistics are compiled and published annually by the Federal Power Commission. These data cover both generation for public use by electric utilities and for use by the producer where generated by non-utility establishments. Data on sales, revenues, and customers by classes of service, on rates and typical bills, and related matters are also published by the Commission. Monthly statistics on production, fuels used in production, sales by classes of service, salaries and wages, taxes, and other costs are also published and distributed by the Federal Power Commission in a loose-leaf current data series known as *Electric Power Statistics*. Statistics on the distribution of electric energy by utilities for public use are presented monthly and annually by the Edison Electric Institute in its *Statistical Bulletin*. Summaries of these statistics appear in the following tables.

Data on the use of power by manufacturing, extracting, and related industries are issued from time to time by the Bureau of the Census in its Censuses of Manufactures and Mineral Industries. Statistics based on these studies appear in the sections on manufacturing and mineral industries in this *Abstract*.

Over-all statistics on water as an actual and potential source of power are compiled by the Federal Power Commission and are shown in table 632.

The Bureau of the Census in the Census of Electrical Industries compiled at five-year intervals beginning in 1902 a report on the Electric Light and Power Industry. The last survey made was for the year 1937. Summary statistics from this report are shown in table 620.

Data in this section relate to continental United States except as indicated.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series G 159-170") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1946*. See preface.

Note.—This section presents data for the most recent year or period available on April 12, 1954, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

NO. 615.—ENERGY FROM MINERAL FUELS AND WATER POWER—ANNUAL SUPPLY: 1889 TO 1952

[In trillions of British thermal units. Unit heat values employed are: Anthracite, 12,700 B. t. u. per pound; bituminous coal and lignite, 13,100 B. t. u. per pound; petroleum, 5,800,000 B. t. u. per barrel; natural gas, 1,075 B. t. u. per cubic foot. Water power includes installations owned by manufacturing plants and mines, as well as Government- and privately-owned public utilities. Fuel equivalent of water power calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise, fuel equivalent calculated from reported horsepower of installed water wheels, assuming capacity factor of 20 percent for factories and mines and of 40 percent for public utilities. See also *Historical Statistics*, series G 159-170]

YEAR	Total energy	Water power ¹	MINERAL FUELS							
			Total	Coal			Petroleum and natural gas

¹ Assuming average central-station practice for each year; declined from about 7.05 pounds of coal per kilowatt-hour in 1899 to 1.10 pounds in 1952.

² Not available.

³ Beginning 1948, includes crude, residual, and distillate.

Source: Department of Interior, Bureau of Mines; *Minerals Yearbook*. Preliminary data published in annual report, *Bituminous Coal and Lignite*.

NO. 616.—ELECTRIC UTILITIES—NUMBER OF ELECTRIC UTILITY SUPPLY SYSTEMS AND GENERATING PLANTS, BY CLASS OF OWNERSHIP: 1922 TO 1952

[Duplications of establishments operating in two or more States have been eliminated. Each type of prime mover in combination generating plants counted separately; nonutility generating plants, approximately 4,600 in 1949, producing primarily for industrial use, are not included]

Hydro as percent of total					7.7	7.2	7.0	6.6

¹ Noncentral stations distributed to other publicly owned classes on the basis of actual ownership.

² Industrial classification comprises production and capacity of approximately 3,217 industrial electric power plants of 100 kilowatts and over in 1952, including amounts for stationary electric power plants of railroads and railways.

³ Each prime mover type in combination plants counted separately.

⁴ Based on capacity in service at end of year.

No. 620.—ELECTRIC LIGHT AND POWER INDUSTRY—SUMMARY: 1902 TO 1937

[Figures cover all establishments engaged either in generation and distribution of electric energy, or distribution or transmission of electric energy, to public or private consumers. Excludes establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in nature of public utilities, unless a portion of generated output was sold commercially. Plants operated by Federal Government or by States excluded unless energy sold commercially.]

¹ The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. ² Not available.

³ Comprises 1,112 stations operated by steam; 1,283 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover).

⁴ Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated."

⁵ Includes "Estimated value of free service."

⁶ Includes cost of fuel purchased and interchanged power, maintenance and other operating expenses.

⁷ Reported by commercial establishments only. No data for municipal establishments.

⁸ Includes value of plant and equipment, \$902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.

⁹ Not comparable with other years; includes only salaries and wages chargeable to electric operating service.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Electric Light and Power Industry. Survey discontinued.

No. 621.—ELECTRIC LIGHT AND POWER INDUSTRY—ENERGY GENERATED, SALES, REVENUE, AND CUSTOMERS: 1930 TO 1953

[Figures for energy generated obtained by Edison Electric Institute from Federal Power Commission. Figures for sales, revenue, and customers for 1930 and 1935 not strictly comparable with those for 1940 and subsequent years due to change in classification of sales. See also *Historical Statistics*, series G 225-233.]

¹ Beginning 1950, limited amounts of unclassified utility plant and reserves for depreciation have been assigned to electric and other utility departments on the basis of estimates.

² Included with utility plant.

³ Less reserves.

¹ Beginning 1950, data reflect change in Census definition of farm, which tends to decrease number of farms.

² Census figures; relate to Apr. 1 for 1930, 1940, and 1950 and Jan. 1 for 1945.

³ Represents cooperatives only and excludes customers of all other agencies (companies and municipals) financed in whole or in part by REA.

⁴ Customers served by municipal systems and various power districts not financed by REA.

⁵ "Eastern farms" are those located in the area not affected by heavy irrigation pumping and their statistics are a measure of use of electricity on the average farm. "Western farms" are those where irrigation may be involved. Possibly less than one-fifth of farms in irrigation States do actual pumping, but statistics are not available to make a more accurate separation. Figures for "Western farms," therefore, are more a reflection of fluctuation in the energy used than they are of the conventional farm requirements.

20. Roads and Motor Vehicles

Public roads.—Federal Government statistics on public roads are compiled and published by the Bureau of Public Roads of the Department of Commerce. Since 1945, such data have been published annually in *Highway Statistics*. For statistics prior to 1945, the same Bureau's publication, *Highway Statistics, Summary to 1945*, shows available public roads data carried back over periods ranging from 20 to 50 years.

The first road mileage survey was made in 1904. Data for 1904 and other road mileage surveys made in 1909, 1914, and 1921, appear in Department of Agriculture, Bulletin 1279, *Rural Highway Mileage, Income, and Expenditures, 1921-22*.

The term "rural" as used here may be roughly defined as the area which lies outside of communities having 2,500 inhabitants or more. "Urban extensions" are continuations of designated State-system roads in or through cities or towns of 2,500 inhabitants or more. "County and other local roads" are rural roads over which the State exercises no direct control.

Motor vehicles and fuel.—Motor-vehicle production data are compiled by the Automobile Manufacturers Association and published in the annual report, *Automobile Facts and Figures*. The Bureau of the Census compiles and publishes statistics on the motor-vehicles and equipment industry which are published in the *Census of Manufactures* reports and are also included in section 30, Manufactures, in this volume.

Motor-vehicle registration figures are based on reports and records of State motor-vehicle registration departments. The statistics are compiled and published by the Bureau of Public Roads in the annual report, *Highway Statistics*. The same report also includes statistics on motor fuel consumption.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series K 177-181") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on April 12, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

FIG. XL.—SPEED OF MOTOR VEHICLES: 1942 TO 1953

[See table 650]

No. 633.—RURAL ROADS IN THE UNITED STATES—APPROXIMATE MILEAGE: 1921 TO 1952

[In thousands of miles. Rural roads include roads outside of incorporated areas and certain of the more populous unincorporated areas. Figures cover continental U. S. and refer to existing mileage at end of calendar year. See also *Historical Statistics*, series K 177-181]

¹ Low type includes soil-surfaced; slag, gravel, or stone; bituminous surface-treated; and mixed bituminous and bituminous penetration (nonrigid base). High type includes mixed bituminous and bituminous penetration (rigid base); bituminous concrete and sheet asphalt; Portland cement concrete; brick; and block.

² Includes 8,680 miles of State park, forest, institutional, and other roads, rural and urban, that are not part of State or local highway systems.

³ Includes only mileage of roads not forming a part of State or local highway systems.

⁴ Includes mileage of county roads under State control in Alabama (3 counties), Delaware, North Carolina, Virginia (all but 3 counties), and West Virginia; 6,588 miles designated as farm-to-market system in Louisiana; State-aid system in Maine; and 19 miles of State-aid roads in Montana. Also in Virginia, includes mileage maintained by State in incorporated towns of less than 3,500 population.

⁵ Mileage previously reported here is now a part of State and local systems.

⁶ Includes mileage of county roads designated as State aid in Illinois, 13,347 miles; Minnesota, 15,489 miles; and Vermont, 2,569 miles.

¹ No segregation of secondary State highways from primary systems in 1930; figures shown include an undetermined amount of municipal street mileage on State systems or connecting these systems. Not strictly comparable with subsequent years, since county road mileage had not yet been taken over by State highway departments.

² Not available.

³ Mileage formerly shown as "Connecting streets not under State control," now included with "Urban extensions of State highway systems," with exception of mileage in Kentucky, Maryland, Mississippi, and District of Columbia. These mileages reclassified as local city streets.

⁴ Low type includes soil-surfaced; slag, gravel, or stone; bituminous surface-treated; and mixed bituminous surfaces. High type includes bituminous penetration; bituminous concrete and sheet asphalt; Portland cement concrete; brick; and block.

⁵ Beginning 1950, mixed bituminous and bituminous penetration on "nonrigid base" shown as low-type and surfacing on "rigid base" included as high-type mileage.

⁶ Beginning 1951, mileage of State park, forest, institutional, toll, and other roads under State control not previously included.

⁷ Prior to 1940, represents State-controlled only.

⁸ Includes funds transferred to or from local units and proceeds of highway-user imposts allotted by the State treasurer for (1) county and other local roads and streets, and for (2) nonhighway purposes.

⁹ Available funds include accumulated reserves.

¹⁰ Includes estimated highway transactions of Port of New York Authority.

No. 638.—DISBURSEMENTS OF STATE HIGHWAY FUNDS, BY STATES: 1921 TO 1952

[Includes disbursements, whether from current revenues or proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Beginning 1935 covers calendar years; figures for earlier years for many States represent fiscal years. Revised to include proceeds of highway-user imposts allotted, without passing through State highway departments, by State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes for all years]

[In thousands of dollars]

¹ Balances from 1951, totaling \$1,586,394,000, and miscellaneous revenues, totaling \$273,358,000.

² Includes disbursements not shown separately and not elsewhere included: For collection and administration of highway-user revenues, \$120,041,000; for nonhighway purposes, \$205,370,000.

³ Includes some administration, engineering, and miscellaneous disbursements.

⁴ Disbursements for administration, engineering, and miscellaneous; State highway police and safety; bond interest; and bond retirement.

⁵ Includes transactions of Port of New York Authority.

⁶ Expenditures on county roads under State control included with those for State-administered highways.

¹ Except business coupes.² Excludes station wagons on commercial vehicle chassis.³ Includes used passenger cars and trucks, trailers, parts for assembly, garage equipment.⁴ Government purchases not included. Estimates based on Federal excise tax receipts.⁵ Does not equal the sum of the various types because the estimates were generally made only to the nearest 10 deaths, and to the nearest 50 deaths for certain types.Source: Automobile Manufacturers Association, Detroit, Mich.; *Automobile Facts and Figures*.

No. 644.—MOTOR VEHICLES—FACTORY SALES AND REGISTRATIONS: 1900 TO 1953

[For 1924 and subsequent years includes data for motor vehicles assembled in foreign countries from parts made in United States. Excludes motorcycles. See also *Historical Statistics*, series K 225-232]

¹ Includes busses. A substantial part of the trucks and busses reported comprises chassis without body; hence value of bodies for these chassis not included. Includes military trucks; total sales for the period Sept. 1, 1939, through 1946, amounted to 2,875,000, valued at \$5,257,588,000. Production for the period Jan. 1, 1940, through 1946 was 2,601,000.

² Prior to 1925, busses included with passenger cars.

³ Partly estimated.

⁴ Beginning 1937, represents standard equipment.

⁵ Less than 500.

¹ "Families" consist of all persons living in the same dwelling and related by blood, marriage, or adoption. "Spending units" consist of all persons living in the same dwelling and related by blood, marriage, or adoption, who pooled their income for major items of expense. Many families contain 2 or more spending units.

² Based on spending units that bought cars during year and still owned them at end of year.

³ In the surveys for 1949 and later years, a question was asked specifically in regard to other borrowing. This question was not asked in previous surveys. ⁴ Less than one-half of 1 percent.

21. Transportation, Air and Land

Steam railways.—Because of the long period in which it has been subject to close Federal regulation and the degree of its consolidation, there is an extensive coverage of important statistical items relating to the railway industry. The *Statistics of Railways in the United States*, published annually by the Interstate Commerce Commission since 1888, is the most important source for steam railway statistics. Various other periodical reports are also issued by the Interstate Commerce Commission. The Association of American Railroads supplements official railway statistics with various releases.

The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission; (b) switching and terminal railroads, also reporting to the Commission; and (c) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Electric railways.—The Interstate Commerce Commission issues annually an abstract of the annual reports of electric railways, chiefly interurban, which report to it. The American Transit Association publishes street railway statistics in its annual *Transit Fact Book*. The Bureau of the Census published a quinquennial report on electric railways from 1902 to 1937. In the more recent years the report also covered affiliated trolley-bus and motor-bus operations. The last *Census of Electrical Industries* was for the year 1937.

Motor carriers.—Statistics of class I for-hire carriers (those with \$100,000 or more of gross annual operating revenues) are compiled by the Interstate Commerce Commission from annual and quarterly reports submitted to it by these carriers. Beginning with reports for the year 1950, the class I minimum became \$200,000. This series begins with 1939 data.

The annual review and statistical number of *Bus Transportation*, a McGraw-Hill publication, summarizes operations of common carriers and school busses.

Civil aeronautics.—Federal promotion and regulation of civil aviation are carried out by two bodies—the Civil Aeronautics Administration and the Civil Aeronautics Board. The Civil Aeronautics Board is an independent agency concerned primarily with the issuance of certificates of public necessity, economic regulation, the formula-

Note.—This section presents data for the most recent year or period available on April 12, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

tion of safety regulations and the investigation of accidents to civil aircraft. The Civil Aeronautics Administration is an operating agency of the Department of Commerce. Its principal activities are the building and operation of air navigation aids, the enforcement of safety regulations and promotion of a national airport system.

The *Statistical Handbook of Civil Aviation* is published by the Civil Aeronautics Administration. This *Handbook* brings together all official statistical data on the development of civil aviation in the United States, including summaries of statistics published by the Civil Aeronautics Board.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series K 28-33") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ Includes circular and unofficial companies. ² Includes lessors, proprietary, circular, and unofficial companies.³ For railways reporting track by class. Excludes circular and unofficial, figures for which cover road, first track only.⁴ Includes switching and terminal companies except as noted.⁵ Since 1916 represents steam locomotives and freight cars of class I railways, excluding switching and terminal companies.⁶ Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale, or abandonment, reclassification, etc. Includes lessor companies since 1921; for 1925 and subsequent years, also includes proprietary companies except those which are part of systems filing consolidated annual reports.⁷ Includes depreciation on "Miscellaneous physical property" for years prior to 1920. Amortization of defense projects included subsequent to 1940.⁸ Includes actually outstanding, nominally issued, and nominally outstanding securities, and equipment obligations. ⁹ Beginning 1952, includes partnership withdrawals.¹⁰ Average for 1908-1910.¹¹ Average for 1899 and 1900.Source: Interstate Commerce Commission; annual report, *Statistics of Railways in the United States*.

No. 656.—STEAM RAILWAYS—MILES OF ROAD OWNED, BY STATES AND TERRITORIES: 1870 TO 1952

[Data are for actual length of line in each State without duplication. Figures relate to June 30 prior to 1920 and Dec. 31 thereafter; they include reporting circular, and unofficial railways, but beginning with 1910 exclude switching and terminal roads. See also *Historical Statistics*, series K 1, 2, and 29 for annual U. S. totals]

NO. 657.—STEAM RAILWAYS (ALL REPORTING COMPANIES)—EQUIPMENT IN SERVICE: 1925 to 1952

["All reporting companies" include switching and terminal but not circular and unofficial lines. Data for tractive effort and capacity of cars exclude switching roads, also smaller roads during recent years; they would not be materially different if all carriers were included. Excludes the large number of cars owned by private carlines. See also *Historical Statistics*, series K 34-38]

¹ Includes proprietary companies. Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale or abandonment, reclassification, etc.

² Amortization of defense projects included subsequent to 1940. ³ Excludes returns for lessor companies.

⁴ Investment originally published is increased by \$170,000,000, estimated reserve for accrued depreciation, to make figures comparable with those of other years.

⁵ Figure not comparable on account of Federal control accounting requirements.

⁶ Excludes returns for class II and class III companies.

No. 675.—STEAM-RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1952

[For various reasons, including fact that returns were required under different acts, statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. From 1921 to 1947 they were considered as such when damage exceeded \$150 with or without a casualty; for 1948, accidents causing damages in excess of \$250, with or without a casualty, were classified as train accidents; for 1949 to 1950, train accidents were those causing damage of \$275 or more; in 1951, \$800 or more; and for 1952, \$325 or more. Where damage was less than the amounts specified and there was a reportable casualty it was classified as a train-service accident. Figures for years 1911-15 include industrial and other nontrain accidents to employees only, and for years 1908-10 exclude switching and terminal roads. Otherwise, data cover all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody. See also *Historical Statistics*, series K 84-93]

**No. 680.—MOTORBUS LINES—SUMMARY OF OPERATIONS OF COMMON CARRIERS
AND SCHOOL BUSES: 1949 TO 1953**

ITEM	1949	1950	1951	1952	1953 (prel.)
COMMON CARRIER BUS OPERATIONS					
Number of operating companies (Dec. 31):					
City and city suburban	1,740	1,638	1,676	1,626	1,550
Intercity	3,060	2,868	2,914	2,847	2,650
Number of busses (Dec. 31):					
City and city suburban	57,800	57,570	58,364	56,456	56,400
Intercity	30,200	28,711	29,266	28,563	28,500
Miles of highway covered (Dec. 31): ¹					
City and city suburban	54,000	53,310	59,680	54,229	60,300
Intercity	416,500	400,284	438,447	439,436	404,500
Total bus miles (1,000)					
City and city suburban	1,786,611	1,881,843	1,781,714	1,877,200	1,855,988
Intercity	1,598,033	1,500,420	1,437,549	1,480,283	1,456,183
Revenue passengers, line service (1,000):					
City and city suburban ²	8,502,055	7,750,000	7,550,000	7,138,000	6,687,000
Intercity	854,981	815,172	907,913	779,023	737,113
Operating revenue (\$1,000):					
City and city suburban	786,351	798,933	810,787	888,577	931,673
Intercity	537,575	510,815	541,853	575,676	603,610
Taxes assignable to operations (\$1,000): ³					
City and city suburban	56,556	62,025	58,914	76,684	77,515
Intercity	42,880	42,508	42,578	45,518	46,466
Net operating revenue (\$1,000):					
City and city suburban	-5,908	8,540	22,829	17,150	24,410
Intercity	39,912	37,962	41,409	56,564	62,518
Number of employees (Dec. 31): ⁴					
City and city suburban	125,696	129,043	128,850	124,425	122,750
Intercity	66,749	66,570	62,676	62,790	62,350
SCHOOL BUS OPERATIONS					
Number of schools using busses	45,300	43,813	43,649	41,208	45,480
Number of busses	97,600	104,179	105,594	110,347	130,508
Total bus-miles (1,000)			689,563	1,119,695	1,027,592
Children carried daily (1,000)	5,720	6,264	6,410	7,064	7,950
Cost of service annually (\$1,000)	177,532	180,183	207,718	239,385	267,578

¹ Includes duplication between carriers. ² Includes revenue transfer passengers. ³ Excludes income taxes.

⁴ Operating companies only.

**No. 681.—TROLLEY BUS AND STREET CAR LINES—SUMMARY OF OPERATIONS:
1949 TO 1953**

ITEM	1949	1950	1951	1952	1953 (prel.)
TROLLEY BUS LINES

Average fare per passenger, per carrier, intercity service.....	\$0.802	\$0.852	\$0.912	\$1.010	\$1.118
Passenger revenue per vehicle-mile, regular route intercity.....	\$0.338	\$0.341	\$0.339	\$0.346	\$0.367
Expense per vehicle-mile.....	\$0.296	\$0.310	\$0.324	\$0.328	\$0.341

¹ Regular route intercity and local revenue.

² Amortization represents a very small part of this total.

³ Excludes Federal or State income taxes.

⁴ Withdrawals, small in amount, of sole proprietors and partners.

⁵ Total vehicles owned at close of year.

⁶ Includes bus-miles of vehicles operated under "purchased transportation arrangements."

⁷ Averages for owned and leased vehicles.

Total accidents in non-air-carrier flying operations.....	1,491	3,471	4,652	4,505	3,657	3,221

1 Includes gliders. 2 Not available. 3 Includes 24,655,000 miles not classified.

4 Includes noncertificated irregular air carrier and noncertificated cargo-carrier operations (for which no comparable classification existed for 1934 and 1940), as well as contract, charter, and other revenue-producing operations.

5 Data include continental United States and Territories and possessions wherever applicable.

6 Public use and public services, public control.

7 Not strictly comparable due to changes in airport use types. See table 692 for current definitions.

8 Public use and public services, private control.

9 No public services, CAA control.

10 Includes military (no public services, military control); no public services, private control; no public services, Federal Government control (Forest Service, etc.).

¹ Airport type definitions: Municipal—public use, aircraft services generally available, public ownership and/or control. Commercial—public use, aircraft services generally available, nonpublic ownership and/or control. Limited—intended for private use but public not prohibited, aircraft services limited or not available, public or nonpublic ownership and/or control. Military—some civil use, military ownership and/or control. Private—authorized use only, public or nonpublic ownership and/or control.

22. Waterways, Water Traffic, and Shipping

Data in this section vary as to area coverage, the variation depending upon the source of compilation. The data from the Corps of Engineers, Department of the Army, are for continental United States and Territories, possessions, etc.; data from the Bureau of the Census and the Bureau of Customs are for the United States customs area which includes Alaska, Hawaii, and Puerto Rico and from 1935 through 1939, the Virgin Islands; data from the Maritime Administration are for continental United States.

Units of measurement.—Cargo tonnage represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). Other tonnage figures generally refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exceptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Shipping weight represents the gross weight of the shipments including the weight of containers, wrappings, crates, etc.

Types of vessel shipments.—Shipments by dry cargo vessels include shipments on all types of watercraft except tanker vessels, and shipments by tanker vessels include all types of cargo both liquid and dry carried by tanker vessels.

Vessel entrances and clearances.—The tables on vessel entrances and clearances show the number and net registered tonnage of American and foreign dry cargo and tanker vessels with cargo and in ballast entering and clearing the United States customs area in the foreign trade and indicate the customs districts at which these vessels first entered and from which they last cleared. With minor exceptions, all types of watercraft engaged in the foreign trade which are required to make formal entrance and clearance under United States customs regulations are included in the statistics. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures. The tons shown in tables 713-716 are net tons of 100 cubic feet carrying capacity of the vessels (as defined in Part 16 of Title 46, "Code of Federal Regulations, Measurements of Vessels") and do not represent the actual weight of cargo carried.

A vessel is reported as entered at the first port in the United States at which entry is made, regardless of whether any cargo is unladen at that port. A vessel is reported as cleared from the last port where outward cargo is completed or where the vessel cleared in ballast.

Vessels touching at a United States port in distress, or for other temporary causes without discharging cargo are not included in the figures.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series K 132-145") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on April 29, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

No. 693.—WATER-BORNE COMMERCE OF THE UNITED STATES—CARGO TONNAGE, FOREIGN AND DOMESTIC: 1947 TO 1952

[In thousands of short tons. See also *Historical Statistics*, series K 132-145]

No. 694.—UNITED STATES RECEIPTS AND PAYMENTS FOR INTERNATIONAL TRANSPORTATION: 1946 TO 1953

[In millions of dollars. Data are international transportation transactions recorded for balance of payments purposes (see table 1069). Receipts include freight on exports carried by U. S. operated carriers and foreign expenditures in U. S. ports. Payments include freight on imports carried by foreign carriers and United States port expenditures abroad. Freight on exports carried by foreign carriers is excluded since such payments are directly or indirectly for foreign account. Similarly, freight on U. S. imports carried by U. S. carriers is a domestic rather than an international transaction]

No. 700.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS: 1952

[In thousands of short tons. In addition to commerce here shown, many ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including, for New York and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic]

No. 706.—PANAMA CANAL COMPANY—REVENUE, EXPENSES, AND NET INCOME:
YEAR ENDING JUNE 30, 1952

[Under provisions of Public Law 841 effective July 1, 1951, maintenance and operation of the Panama Canal and its facilities and appurtenances were transferred to the Panama Canal Company. The Canal Zone Government, a separate entity under the new law, is charged now exclusively with the functions of civil government; however, the net cost of operations of this agency, including depreciation, must be repaid to the Treasury by the Panama Canal Company from its revenues. Because of material changes in financial, accounting, and administrative bases, the data shown here cannot be considered comparable with that heretofore shown for the Panama Canal agency. Furthermore, all data are subject to adjustments upon completion of the appraisal of assets transferred from the Panama Canal agency, since any substantial change in the valuation of depreciable assets (or in depreciation practices) will materially affect the operating expenses of the Company]

¹ Adjusted for overcharges and undercollections.

² Italics denote deficit.

³ After deduction of canal earnings repaid to appropriations.

⁴ No interest charge against the Canal is actually made by the Treasury. In order to present the net results of operation of the Canal, interest on capital invested is computed at a rate considered reasonable for Government borrowings over an indefinite period. Computed interest prior to July 12, 1920, is included in capital investment account.

⁵ Includes adjustment of \$15,000 in postal surplus.

⁶ Includes adjustment of \$44,000 in postal surplus.

⁷ Actual business profits of \$877,000 adjusted by \$669,000 for write-off of reimbursable capital expenditures, public works, Republic of Panama.

⁸ Includes \$23,000 for prior fiscal years.

⁹ Includes \$292,000 for judgments rendered by Court of Claims for overtime compensation in prior years.

¹⁰ Adjusted by a net reduction of \$162,000 for prior fiscal years.

¹¹ Actual business profits of \$638,000 have been adjusted by a net decrease in the amount of \$6,536,000 representing surplus adjustments applicable to prior fiscal years.

¹ Canal boats and barges included with sailing prior to 1868.² Includes iron, steel, composite, concrete, bronze, and aluminum.³ Includes whale fisheries and cod and mackerel fisheries. Beginning 1939, figures exclude mackerel.⁴ Decrease of tonnage arises principally from registered tonnage having been corrected in 1818, 1829, and 1830 by omitting all vessels with registers granted prior to 1815, which were presumed to have been lost at sea, captured, etc.^e Not available.^f Including Puerto Rico and Virgin Islands.^g Including Hawaii and Alaska.Source: Treasury Department, Bureau of Customs; annual report, *Merchant Marine Statistics*.

23. Irrigation, Drainage, and Soil Conservation

Irrigation.—The 17 Western States and Arkansas, Louisiana, and Florida are the States in which most of the irrigated land in the Nation is located. In these States a special Census of Irrigation was made as part of the 1950 Census of Agriculture conducted by the Bureau of the Census. Information on acres irrigated, irrigation works, capital investment, and a number of other items was obtained from the irrigation companies, districts, and other organizations, and from farms that operate their own irrigation supply works. For the remaining eastern, midwestern, and southern States information on irrigation was limited to that reported in the farm census.

The definition of irrigated land in the 1950 Census was the net acreage of farm land to which irrigation water was actually applied during 1949. It did not include land that could be irrigated or that usually is irrigated, but that was not irrigated during 1949. Land in irrigated farms that was used for purposes such as roads and farmsteads, to which irrigation water was not applied, was excluded. Also excluded was irrigated land used for purposes other than farming, such as that in rural residential areas, cemeteries, parks, and golf courses.

The Bureau of Reclamation has operated since 1902 as the principal Federal agency engaged in the development of irrigation projects. By Congressional directive its activities are confined to the 17 Western States and Alaska. However, Kansas does not appear in any of the Reclamation tables because work on developments in that State has not yet progressed to a point to warrant its inclusion. Actual operation of irrigation works is transferred to water users organizations as soon as the projects are fully developed and these organizations are willing and able to assume the responsibility of operating the works.

Reclamation crop data, compiled since 1906, are obtained from the annual crop census conducted by the Bureau. Information on reclamation project charges and rentals are obtained from the financial records of the Bureau. Data on reclamation hydroelectric plants have been compiled semi-annually by the Bureau since July 1944.

Drainage.—Drainage works for farm lands are constructed primarily for three purposes, namely, (1) the reclamation or improvement of the land, (2) protection of the land against overflow, and (3) to rid the land of seepage from irrigation ditches or for control or prevention of alkali formation. Ninety percent of all drainage enterprises were organized for reclamation and improvement of land.

The farmers in the Eastern United States need drainage to take surplus rainfall off some of their lands. Most of this is gravity drainage, although pumps are sometimes used. In the Western States drainage is mainly for the purpose of taking seepage water off irrigated lands and to carry off alkali salts.

In the 1950 National Census of Drainage, in general, only those organized enterprises with 500 acres or more of drained farm land were included in the enumeration. A few irrigation enterprises of smaller size which had their own drainage works were also included. In previous Censuses (1910-1940) all organized enterprises draining farm lands were included in the enumeration regardless of size. Privately drained lands of less than 500 acres have not been enumerated in any of the four Drainage Censuses. The change in census procedure for 1950 materially reduced the number of enterprises enumerated, but affected very little the amount of drained land enumerated.

In taking the 1950 Census, differences in form of organization and management of drainage enterprises made it necessary for the Bureau of the Census to divide somewhat arbitrarily the 40 States with drainage enterprises into two groups: the 10 "county-drain" States and the 30 "drainage-district" States. The eight States with no drainage enterprises are the six New England States, Pennsylvania, and West

Note.—This section presents data for the most recent year or period available on April 29, 1954, when the material was organized and sent to the printer.

Virginia. In the 10 "county-drain" States (Delaware, Indiana, Iowa, Kentucky, Michigan, Minnesota, North Dakota, Ohio, Oklahoma, South Dakota), statistics were gathered for the county as a unit, rather than for each separate enterprise as for the 30 "drainage-district" States. In most of the "county-drain" States, the management of drainage enterprises is under the county government. Generally, the maintenance work on existing ditches has been done by reorganizing the land of an earlier enterprise into a new project. Since the number of enterprises for "county-drain" States would be meaningless, the number was not obtained for these 10 States.

In the Western States most of the drained land is located in irrigation enterprises which were chartered to do both irrigation and drainage work under one organization. In the case of irrigation enterprises having their own drainage, the cost of construction and operation and maintenance of the irrigation works is usually far greater than that for drainage. Separate records are seldom kept for expenditures for drainage and irrigation. Data were not included in the 1950 Census of Drainage for cost, collections, and indebtedness of irrigation enterprises having their own drainage. Therefore, the data for 1950 are not fully comparable with those for earlier years.

Soil conservation.—Basic soil conservation district legislation has now been enacted in all of the 48 States and 4 of the Territories and possessions. Each of these laws contains an effective date after which soil conservation districts could be organized by local farmers and operators. A soil conservation district is a political subdivision of a State which is determined by petition and referendum of farmers residing in the area, and approved by the State Soil Conservation Committee. Districts, in most cases, have authority to solicit Federal, State, county, and private assistance in carrying on their soil and water conservation program within the area. On request of the local governing body of each soil conservation district, the Department of Agriculture provides technical and other assistance to districts, through its several agencies. These memorandums of understanding form the basis on which any departmental assistance is provided to a district for use on the farms and ranches within the district. After the basic memorandum with the Department has been signed, the Soil Conservation Service signs a supplemental memorandum with each district governing body requesting assistance, to cover activities which the Soil Conservation Service will help each district to carry out.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series F 56-59") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 727.—IRRIGATION ENTERPRISES—SUMMARY: 1910 TO 1950

[Data are for the 17 Western States, Arkansas, Louisiana, and, for 1940 and 1950, Florida. Tables 727, 729 and 730 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of management of enterprises. An enterprise is defined as "an independent irrigation establishment owning or operating works for supplying water to agricultural land." See also *Historical Statistics*, series F 56-59]

¹ Including irrigation enterprises having their own drainage. An interstate enterprise is counted in each State in which a part is located, but is counted only once in the total.

² Data for irrigation enterprises not included in 1950.

³ Not available.

⁴ Largely States with organized drainage districts and other corporate and private enterprises.

⁵ Largely county-drain States. See text, p. 616.

¹ Warren Act contracts are those which provide for sale of excess water to irrigation districts, i. e., water over and above project requirements. Lands served are usually located outside project proper. The act also provides for joint construction and financing of irrigation works by Federal Government and irrigation districts.

¹ Area for which Bureau is prepared to supply water.

² Acreage provided either a full or supplemental irrigation water supply under the Warren Act and other special service contracts.

³ Excludes 119,047 acres of irrigable leased or water rental lands with crop value \$13,458,000 (including value of crops from temporarily suspended lands).

⁴ Although there are 178,026 acres that can be irrigated within project limits, area for which there is considered to be a safe and reliable water supply is 155,000 acres.

¹ Includes 1,200,000 kilowatt capacity of 32 additional plants authorized but not under construction.

² Power plant units operated by power allottees under agency contract.

³ 27,000 kilowatts authorized; space provided in plant for additional generator.

⁴ Power marketed by Bonneville Power Administration.

⁵ Power plant constructed by Bureau of Reclamation with Salt River Valley Water Users' Association funds.

⁶ Three plants: (a) Spanish Fork (upper); (b) Spanish Fork (lower); (c) Payson.

⁷ Plant now idle.

⁸ Salt River Valley Water Users' Association's plant. ⁹ Imperial Irrigation District's plant.

¹⁰ Enterprise Irrigation District's plant. ¹¹ Power to be marketed by Bureau of Reclamation.

¹ For specific procedure on organization of soil conservation districts, see respective State soil conservation district law. By provision of most State district laws, State soil conservation committee has responsibility for organization of districts. Local district governing bodies administer affairs of each individual district.

² Soil Conservation Service furnishes technical and other assistance to practically all districts that have entered into memorandums of understanding with Department of Agriculture.

³ Includes all farmer-district cooperative agreements for initial, advanced and basic conservation plans (formerly shown as active conservation plans only, not including initial and advanced agreements). Cancellations caused by death, change in ownership, or mutual consent have been deducted. Data on plans and treated areas included only work done through farmer-district cooperative agreements since Aug. 1937 with assistance of Soil Conservation Service.

⁴ Includes Imperial Irrigation District.

⁵ Includes 20 State cooperative grazing districts.

⁶ Includes 4 wind-erosion districts.

24. Agriculture—General Statistics

Statistics on agriculture are for the most part prepared by the Bureau of the Census, Department of Commerce, which conducts the Federal Census of Agriculture, and by the Department of Agriculture which prepares current annual estimates.

Beginning with 1840 a Census of Agriculture has been taken every 10 years in conjunction with the Decennial Census of Population. In 1925, 1935, and 1945 a mid-decennial Census of Agriculture has also been taken. Information at each census has been obtained by a personal canvass of individual farms by census enumerators. The first Census of Agriculture was limited in scope. It included such items as an inventory of the principal classes of domestic animals, the production of wool, the value of poultry, the value of products of the dairy, and the production of the principal crops. The number of farms and the acreage and value of farm land were first included in the Census of 1850. In 1880 information was first secured as to the tenure under which the farms were operated. A detailed classification of farm land according to use was first obtained in 1925; in earlier censuses, farm land was classified only as improved land, woodland, and other unimproved land.

A farm as defined by the Bureau of the Census is all the land on which some agricultural operations are performed by a person, either by his own labor alone or with the assistance of members of his household, or hired employees. In 1950, places of 3 or more acres were counted as farms only if agricultural products, exclusive of a home garden, with a value of \$150 or more were produced in 1949. Also, in 1950, places of less than 3 acres were counted as farms only if the value of agricultural products sold in 1949 amounted to \$150 or more. In each census from 1925 to 1945, places of 3 or more acres were counted as farms if any agricultural products, other than a small home garden, were produced during the preceding year while places of less than 3 acres were counted as farms if the agricultural production was valued at \$250 or more. (For definitions used in earlier censuses, see *U. S. Census of Agriculture: 1950*, Vol. II, Introduction.)

Agricultural operations consist of the production of crops or plants, vines or trees (excluding forestry operations), or of the keeping, grazing, or feeding of livestock for animal products, animal increase, or value enhancement. Included as farms are such agricultural enterprises as nurseries, greenhouses, hothouses, fur farms, mushroom houses, apiaries, and cranberry bogs. Excluded are fish farms, fish hatcheries, oyster farms, frog farms, kennels, game preserves, parks, and the like. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm for census purposes. Thus, for a plantation, each cropper and tenant operation is considered a separate farm even though the entire plantation may be handled essentially as a single farm enterprise.

The land in farms includes considerable areas of land not actually under cultivation or used for pasture or grazing, but all such land must have been under the control of the operator and considered a part of his farm. Land used for grazing or pasture that was neither owned nor leased by the farm operator generally was not included under land in farms. Rent-free lands were included in an operator's farm only if he had sole use of such lands. Thus vast acreages of land used for grazing, such as national forests, Taylor grazing land, State lands, or other public lands, and some railroad and other privately owned lands, are not included as land in farms even though used for agricultural purposes.

Note.—This section presents data for the most recent year or period available on April 29, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

Information on prices received by farmers for products they sell and prices paid for articles they buy for production and family living are obtained by the Agricultural Marketing Service from about 33,000 voluntary reporters, which include farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month when a particular crop harvest begins.

The index numbers of prices received and of prices paid by farmers (see tables 760 and 761) are based on current midmonth prices for these commodities. For information concerning methods of construction of the indexes, see Supplement No. 1 to the January 1950 issue of *Agricultural Prices*, issued by the Agricultural Marketing Service. The ratio of the index of prices received to the index of prices paid by farmers measures the monthly variation in the average per unit exchange value of farm products in terms of commodities and services bought by farmers.

Cash income is the cash receipts from farm marketings and represents the quantities of crops, livestock, and livestock products sold by farmers multiplied by the prices received per unit of production at the local market. Gross farm income includes Government payments, value of farm products consumed on the farm, and rental value of farm homes, as well as cash receipts from farm marketings.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series E 1-16") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

FIG. XLII.—INCOME OF FARM OPERATORS: 1929 TO 1953

[See table 760]

*Including Government payments, beginning 1933.

No. 743.—NATIONAL FARM PRODUCT IN CONSTANT DOLLARS: 1910 TO 1950

[Millions of 1939 dollars. Gross national farm product differs in content and movement from measures of the total output of farm products. As a value-added concept, the gross farm product measures only production actually occurring on farms, without duplications. That is, the value of materials used up by farmers in the production process, such as feed, fertilizer, and motor fuel, is deducted from the value of total farm output to arrive at the gross farm product. It is termed "gross" only because depreciation and other capital consumption allowances are not deducted. Value of materials used up in production, technically known as "intermediate products," has risen greatly in recent decades relative to the value of total farm output. Thus, gross farm product has risen significantly less than total farm output over the period 1910-50]

ITEM	1910	1920	1930	1940	1945	1946	1947	1948	1949	1950
Value of farm output.....	7,080	7,571	8,409	9,994	11,419	11,809	11,700	12,284	12,154	12,720

¹ Includes imputed value of food and firewood consumed on farm where produced.

² Adjustment necessary to convert sales figures to a commodity output basis.

³ Includes current expenses for food and livestock, seed, fertilizer, operation of motor vehicles, irrigation, and other purchased items. Some intermediate products are direct purchases by one farmer from another. Bulk of purchased materials represents production, or value added, by nonfarm industries.

⁴ Counted as an expense to farmers, since only the rental value of farm-owned property is considered to originate in farm sector.

¹ Comprised largely of Indian land and State school and other land.

² Includes approximately 69 million acres of cropland used only for pasture.

³ Cropland used for pasture only. Not comparable to previous estimates of plowable pasture.

⁴ Includes idle grassland in first decades and arid woodland (pifion, juniper, chaparral).

⁵ Includes about 75 to 80 million acres of woodland and other brushland grazed.

⁶ Excludes considerable acreages of arid woodland, other woodland in pasture and grazing, and several million acres of valuable forests in parks, wildlife refuges, and military areas.

⁷ Includes 34 million acres of arid woodland and brushland.

⁸ Largely commercial forest land.

⁹ Estimated.

No. 749.—FARMS—NUMBER AND ACREAGE, 1920 to 1950, AND AVERAGE VALUE OF LAND AND BUILDINGS, 1950, BY SIZE OF FARM

[1950 data, except number of farms, based on reports for only a sample of farms. May not agree with other 1950 sample data, since size data were not adjusted to agree with total count of farms]

VALUE OF FARMS (LAND AND BUILDINGS) (\$1,000)						
United States, total:						
1910	34,801,126	17,310,639	5,056,295	1,450,950	10,977,232	
1920	66,310,003	30,710,721	9,153,602	2,665,216	6,012,819	17,773,744
1930	47,879,838	21,123,468	8,136,935	2,238,478	3,801,132	12,580,426
1940	33,641,739	15,297,274	6,112,411	1,442,057	2,227,608	8,561,788
1945	46,388,926	21,106,511	10,029,155	2,354,563	2,288,430	10,610,237
1950	75,260,606	(^e)	(^e)	(^e)	(^e)	(^e)

¹ For 1910, standing renters (renters paying a fixed quantity of products) were included with "Cash tenants" for all States; for 1920, those for northern and western States were included with "Cash tenants," and those for the South with "Other tenants."

² Of these acreages, operator owned 120,748,000 in 1930, 144,639,000 in 1940, and 102,259,000 in 1945.

³ Of these values, part owners owned property valued at \$3,564,202,000 in 1940 and \$5,898,871,000 in 1945.

⁴ Based on reports for only a sample of farms.

⁵ Averages only available. See table 763.

Farmer's share of consumer's dollar ⁴ (percent)....	18	19	18	17	17	18	18

¹ Retail costs of the market basket and commodity groups are calculated from retail prices collected by the Bureau of Labor Statistics.

² Farm value is calculated from official series showing prices received by farmers applied to quantities of farm products equivalent to retail purchases.

³ Marketing margin equals the difference between retail cost and farm value adjusted for Government processor taxes and payments during 1946.

⁴ The farmer's share of the consumer's dollar spent for farm food products is obtained by expressing the farm value as a percentage of retail cost (based on unrounded figures).

¹ Preliminary.

² Beginning 1945 includes taxes on gasoline used in farm tractors.

³ For 1925-30 includes companies with more than 65 percent of their insurance on farm property; for later years, 60 percent. About 88 percent of their total insurance is on farm property, for both periods.

⁴ Number of companies for which data were obtained; perhaps not entirely complete for any year.

⁵ Estimate based on sample of companies.

⁶ Excess of assets over liabilities. Most of farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves. Data not compiled prior to 1935.

¹ Many expense items excluded such as fertilizer and lime, maintenance of buildings, taxes, mortgage interest, insurance, rents, containers, veterinary fees, and others of varying degrees of importance. Specified expenditures, shown in this table, amounted to approximately 60 percent of all farm production costs for 1949 according to estimates of United States Department of Agriculture.

² For 1924 to 1949, cash payments for farm labor; for 1899 to 1949, housework specifically excluded; for 1939, 1944, and 1949, excludes expenditures for contract construction work, machine hire, or labor included in cost of machine hire; for 1869, 1899, 1909 and 1919, value of board included.

³ Not available.

⁴ Amount spent for repairing (both labor and parts) and amount spent for repair parts and other replacement parts; excludes motortruck and automobile repairs.

No. 769.—FERTILIZER CONSUMPTION: 1880 TO 1952

[In thousands of tons of 2,000 pounds. Based on tag sales, records of Government officials, or estimates. Beginning 1935, figures include tonnage distributed by Agricultural Adjustment Administration and by Tennessee Valley Authority, data for the latter representing fiscal years ending June 30. Data for phosphate rock used in Illinois and Florida, available only since 1939, have been excluded from annual comparisons. In addition to tonnage for consumption, fertilizers and fertilizer materials produced in continental U. S. are exported to island possessions]

¹ Adjusted for duplication. This figure approximately represents value at level at which farmer does business with his cooperative; excludes wholesale business of farm supply cooperatives with other cooperatives or terminal market sales performed for local associations.

² Excludes duplications caused by associations engaged in handling more than one commodity.

³ Charges for services in which no duplication occurs.

¹ Marketing season during which farm products are moved into channels of trade. Marketing seasons overlap.
² For years since about 1935, comprises members, contract members, and shareholders, but excludes patrons not in these categories.

³ Includes value of commodities sold or purchased for patrons and charges for rendering other essential services in marketing or purchasing.

⁴ Beginning 1950-51, includes Service Associations.

⁵ Beginning 1950-51, net figures; adjusted for duplication resulting from transactions between cooperatives.

Earlier figures included some duplication.

⁶ Preliminary. Covers operations of associations whose fiscal years ended during July 1, 1951, through June 30, 1952, with limited exceptions.

No. 776.—FARMS—NUMBER AND PERCENT DISTRIBUTION, BY TYPE: 1950

[Based on reports for only a sample of farms. Type of farm determined on basis of relationship of value of sales, from a particular source to total value of products sold for each farm. In general, value of sales from a particular source was 50% or more of total sales when a farm was classified as that type. Part-time farms include those with a value of products sold of \$250-\$1,199 and with operator either reporting 100 days or more of off-farm work or other income exceeding value of farm products sold. Residential farms include those with a value of farm products sold of less than \$250. Abnormal farms include public and private institutional farms, experiment stations, community projects, etc.]

25. Agriculture—Production and Related Subjects

The data in this section are, for the most part, from the Bureau of the Census, Department of Commerce, and from various agencies in the Department of Agriculture. In general, statistics for agriculture census years are from the Bureau of the Census. Estimates for intervening years, and adjustments, where necessary, to a January 1 basis are from the Agricultural Marketing Service, Department of Agriculture.

Annual agricultural statistics of a wide variety have been issued currently by the Department of Agriculture, for 90 years—the first being as of May 1, 1863. The 41 field offices design the samples and collect data from voluntary reporters. State estimates and other information are sent to the Crop Reporting Board of the Agricultural Marketing Service in Washington, where, after review, reports are issued containing State, regional, and United States data.

Statistics compiled by the Agricultural Marketing Service on crops, livestock, and livestock products, agricultural prices, farm employment, and other related subjects are based mainly on data obtained through mail questionnaires. The basic information is obtained from nearly three-quarters of a million reporters, located in every agricultural county in the United States, who report on one or more items during a year. These reporters, mostly farmers, report for their own and nearby farms on some 80 crops and scores of other items pertaining to agricultural production and farm family living.

The most extensive of the current survey data are gathered by the Agricultural Marketing Service from questionnaires handled in cooperation with the Post Office Department through its rural mail carriers. These surveys obtain livestock data in June and December and crop acreage data in October. For each survey the rural carrier distributes 10 to 20 cards to farmers on his route. The farmer is asked to complete his questionnaire for his own farm and return the card to his mail box.

In the data prepared by the Agricultural Marketing Service, estimates of crop acreage and production for the census years are set up currently on available information. Later, if necessary, these data are revised to a level based largely on the census enumerations. The estimates for intercensal years are based on sample data obtained each year from individual reporters. This information is supplemented by other data, such as State assessors' enumerations of agricultural information, crop meter frontage measurements, reports of carlot shipments, warehouse receipts, local surveys, personal observations by field statisticians as well as reports from other sources having a knowledge of farming, agricultural production, and processing. Cotton acreage and production are also based on sample data and, in large measure, on ginning information gathered by the Bureau of the Census.

For each decade from 1840 through 1900, the Census of Agriculture was taken as of June 1. The five decennial censuses since then have been taken as of April 15, 1910; January 1, 1920; and April 1, 1930, 1940, and 1950. The 1925, 1935, and 1945 quinquennial Censuses of Agriculture were taken as of January 1. Comparison of inventory numbers of livestock from census to census is seriously affected by a change in the date of enumeration. From January to April there are material changes in numbers on hand in most parts of the country due to births, marketings, farm slaughter,

Note.—This section presents data for the most recent year or period available on April 20, 1954, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

etc. In an effort to obtain as much comparability as possible the censuses taken in April either excluded recently born animals from the enumeration or provided for their enumeration in a separate age group. Volume II of *U. S. Census of Agriculture: 1950* shows a complete history of the enumeration of livestock and presents a discussion of the comparability from census to census.

For most kinds of domestic livestock, there are comparatively short, cyclic fluctuations in numbers, even though the trend over a long period of time may be definitely in one direction. A single census may be taken at a time when such a cycle is at the peak or at the trough of numbers and hence gives no true indication of the long-time trend.

Annual inventory numbers of livestock on farms prepared by the Department of Agriculture together with estimates of livestock, dairy, and poultry production are based on information furnished by individual farmers, supplemented by State assessors' data in a number of States, and by such records as brand inspections, rail and truck shipments, and inspected slaughter. The level for these inventories is based in large part on census enumerations for years when census data are available.

Data on imports and exports are now compiled by the Department of Commerce, Bureau of the Census. Annual statistics through 1946 have been published in *Foreign Commerce and Navigation of the United States*. Statistics for later years are from current corrected data. Monthly data are published in the *Summary of Foreign Commerce of the United States* (monthly and quarterly through April 1951, quarterly thereafter) and other monthly reports of the foreign trade series. (See also section 32, Foreign Commerce.) The official trade statistics based on the fiscal year are usually preferable to data presented on a calendar year basis, for use in comparing imports and exports with crop production since, for most crops, they coincide more nearly with the crop year.

For a historical summation of raw materials production, imports, exports, and consumption, which includes figures for agricultural materials, see table 1081.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series E 72-75") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ Measures calendar-year production of all crops and pasture consumed by all livestock, and the product added in conversion of feed and pasture into livestock and livestock products for human use and into farm-produced horse and mule power.

² Estimated value, at 1935-39 average prices, of all feed (including commercial feeds) and pasture consumed by each class of livestock subtracted from total value, at 1935-39 average prices, of livestock and livestock products.

³ Includes peanuts; excludes cottonseed.

⁴ Includes dry edible beans, dry field peas, mung beans, potatoes, and sweetpotatoes.

⁵ Excludes peanuts.

⁶ 52 crops only, for 1929 and 1930.

¹ Based on sum of the estimated acreage from which one or more crops were harvested plus acreages of crop failure and summer fallow.

² Average 1935-39 farm prices were used as weights in combining annual total production of each crop into an index of total crop production. The index of crop production was divided by the index of total cropland to derive the index of crop production per acre.

³ The numbers of various types of breeding units were combined into a total by weighting by constant-dollar value weights based on the contribution of each unit to gross livestock production in the 1935-39 period.

⁴ An index of livestock production was built up using average 1935-39 farm prices as weights. This index was divided by the index of animal units of breeding livestock to obtain production per unit.

1953 (prel.).....	2,817	18.6	75.6	4,304	39.5	1,911	2,393	906

¹ Excludes distilled liquor.

² Beginning Jan. 1, 1942, includes food exported for relief or charity; beginning Jan. 1, 1947, also includes exports under Army Civilian Supply Program. ³ Based on total exports of domestic merchandise.

⁴ Imports for consumption beginning 1934; general imports prior thereto.

⁵ Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

⁶ Average not computed; data not available prior to 1929.

¹ For Census of 1920, cropland harvested was obtained by adding the acres of individual crops harvested. See note 6.

² Not available.

³ Total acreage of crops harvested for which figures are available. Includes any acreage of alfalfa seed and clover and grass seeds enumerated, some of which was harvested from land also cut for hay.

⁴ Total for specified crops.

⁵ Irish and sweet potatoes included with "Field crops," not with "Vegetables."

⁶ Excludes corn cut for fodder (acreage, 14,503,000; value, \$206,935,000) probably duplicated in acreage of corn harvested for grain.

⁷ Only strawberries included in small fruits; other small fruits included in field crops.

⁸ Acreage represents vegetables harvested for sale only; acreage in farm gardens not available. Value includes both vegetables for home use and for sale, except as noted.

⁹ Vegetables harvested for sale.

¹⁰ Available data not comparable.

¹¹ Farm garden vegetables for home use only.

¹² Acreage in fruit orchards, vineyards, and planted nut trees not secured prior to 1930 Census.

¹³ Acreage of horticultural specialties not included.

¹⁴ Excludes acreage on farms reporting less than one-half acre in orchards, vineyards, and planted nut trees.

¹ Total acreage of crops harvested for which figures are available. Includes any acreage of alfalfa seed and clover and grass seeds enumerated, some of which was harvested from land also cut for hay.

² 1949 totals exclude crops for which data were not obtained in 1944.

³ Value of vegetables grown for home use not obtained in 1949.

⁴ Irish and sweetpotatoes included with "Field crops," not with "Vegetables."

⁵ Excludes sweet corn, popcorn, "Egyptian corn," kafir, and milo maize.

⁶ Totals are for States for which data are available.

⁷ Excludes flax and wheat mixtures.

⁸ Grown alone for all purposes.

⁹ Totals are for 8 States having separate inquiry on questionnaire.

¹⁰ Represents duplication of acreage shown elsewhere.

¹¹ Individual hay crops may include some duplication of acreage due to cutting of more than one crop during year.

¹² Includes wild hay and lespedeza in those States where separate inquiries were not on the questionnaire.

¹³ Silage crops other than corn and sorghums.

¹⁴ Does not include sorghum for sirup.

¹⁵ Excludes chufas hogged off: 12 acres, value \$356,000.

¹⁶ Does not include acreage for farms with less than 15 bushels harvested.

¹⁷ Excludes acreage on farms with less than ¼ acre of fruit orchards, groves, vineyards, and planted nut trees.

¹⁸ Acreage for horticultural specialties not included.

Source: Department of Commerce, Bureau of the Census; *U. S. Census of Agriculture: 1950, Vol. II.*

NO. 791.—PRINCIPAL CROPS—ACREAGE, PRODUCTION, AND VALUE: 1866 TO 1953

[Tons are of 2,000 pounds. For weights of units of measurement for principal products, see Appendix II. Approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 55; sorghums for grain, 56; clover seed, 60. Number of pounds to a bag of rice, 100. Prices and yields for periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for individual years. Acreage, production, and yield of all crops revised to census data. See also *Historical Statistics*, series E 181-230, for acreage harvested, production, and price data for corn, wheat, oats, barley, flaxseed, potatoes, sweetpotatoes, cotton, cottonseed, soybeans, and hay]

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Beginning 1903, prices are season average prices for the crop-marketing season; prior thereto, Dec. 1 prices. Prices for certain years include an allowance for unredeemed loan and purchase agreement deliveries.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Prices are season average prices as follows: Barley, buckwheat, and flaxseed, beginning 1908; rice, beginning 1909. Prices for prior years are as of Dec. 1. Prices for certain years for barley, rice, and flaxseed include an allowance for unredeemed loans and purchase agreement deliveries.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Beginning with 1903 for potatoes and cotton, 1909 for sweetpotatoes, and cottonseed, prices are season average prices. Figures for prior years are Dec. 1 prices. Prices for certain years for cotton and cottonseed include an allowance for unredeemed loans and purchase agreement deliveries.

³ Average for 8 years.

⁴ Average for 6 years.

⁵ Average for 7 years.

⁶ Average for 4 years.

⁷ Includes following quantities of commercial early potatoes not marketed and excluded in computing value (1,000 bushels): 1928, 7,462; 1931, 66; 1932, 2,175; 1939, 1,240; 1943, 440; 1950, 1,235; 1951, 1,093; 1952, none; 1953, 5,120.

⁸ Includes 1,804,000 bushels unharvested but purchased by the Government under price-support program.

⁹ State production figures, which conform with census annual ginning enumeration with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Baja California, ginned in California from 1913 to 1924, has been excluded.

¹⁰ Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.

¹¹ Data for 1909 and 1910.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

¹⁴ Received by farmers. Prices for certain years for grain sorghums, dry edible beans, soybeans, and red clover seed include an allowance for unredeemed loans and purchase agreement deliveries. See also notes on prices for each crop.

¹⁵ Based on the reported price of grain sorghums.

¹⁶ Prices are season average prices, prices of beans being for cleaned beans.

¹⁷ Average for 1929 and 1930.

¹⁸ Equivalent solid acreage.

¹⁹ Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than to the total production.

²⁰ Beginning 1930, clean seed; prior years, thrasher-run seed.

²¹ Average for 1924 and 1925.

²² Average for 1919 and 1920.

²³ Dec. 1 prices, 1916 to 1931; beginning 1932, season average prices.

²⁴ Includes 5,435,000 pounds in 1935, 4,365,000 pounds in 1937, 3,140,000 pounds in 1938, 2,813,000 pounds in 1939, not available for marketing because of economic conditions and the marketing agreement allotments. Saleable allotments under marketing agreement were 39,000,000 pounds in 1949, 50,000,000 pounds in 1950, 46,500,000 pounds in 1951, and 39,200,000 pounds in 1952. Prices and values are computed on the marketed crop. Marketing agreement terminated June 30, 1953.

¹ Value based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Prices as of Dec. 1 except as noted. ^{2a} Same hay only, prior to 1909.

³ Prices are season average prices beginning 1909; Dec. 1 prices theretofore. Beginning 1939, prices are for hay sold baled; prior years, for hay sold loose. Price for hay sold loose in 1948 was \$13.90 per ton.

^{3a} Prices are season average prices beginning 1919; Dec. 1 prices theretofore.

^{3b} Prior to 1942, data are for 7 States. Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped; they exclude fruit which ripened on trees but was destroyed prior to picking. Figures relate to crop produced from bloom of year shown. In California, picking season usually extends from about Oct. 1 to Dec. 31 of following year. In other States, season begins about Oct. 1 and ends in early summer.

^{3c} Prior to 1942, price of sweet sorghums for forage and hay. Dec. 1 price.

^{3d} Net content of boxes varies. In California and Arizona, approximate average is 77 lbs.; in other States, 90 lbs. Production includes following quantities donated to charity, unharvested, and/or eliminated on account of economic conditions (1,000 boxes): 1933, 977; 1934, 1,396; 1935, 614; 1936, 1,023; 1937, 1,204; 1938, 2,949; 1939, 1,236; 1940, 1,322; 1941, 702; 1942, 651; 1943, 830; 1944, 1,771; 1945, 731; 1946, 2,639; 1947, 1,503; 1948, 881; 1949, 894; 1950, 709; 1951, 1,003; 1952, 444. Price and value are computed on remaining crop.

^{3e} Season average returns to growers. Price and value apply to entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. (See note 32.) Prices are equivalent packing-house-door returns for all methods of sale and are weighted by production to obtain U. S. averages.

^{3f} Average for 1929 and 1930.

Source: Department of Agriculture, Agricultural Marketing Service; annual report, *Agricultural Statistics*, and annual summaries of crop statistics.

¹ Excluding reexports. Effective Jan. 1, 1947, includes shipments under various special programs.² Beginning January 1, 1953, includes paddy or rough rice in terms of milled.³ Imports for consumption beginning 1933; general imports prior thereto.Source: Department of Agriculture, Foreign Agricultural Service; compiled from official records of Bureau of the Census. Published currently in *Foreign Agricultural Trade*.

No. 803.—COTTON AND COTTONSEED—ACREAGE, PRODUCTION, AND VALUE, BY STATES: 1942 TO 1953

[Cotton production excludes linters. Values shown are for marketing season or crop year and should not be confused with calendar year income. Yields and prices for period are simple averages of figures for individual years. Tons are of 2,000 pounds. See also *Historical Statistics*, series E 217-224, for U. S. totals for acres harvested, production, and price]

VEGETABLE CROPS

693

No. 810.—VEGETABLE CROPS, COMMERCIAL—ACREAGE, PRODUCTION, AND VALUE, BY KIND, 1952 AND 1953, AND LEADING STATES, 1953
 [Production in equivalent tons of 2,000 pounds. Estimates relate to commercial production for fresh market and processing combined and include production in market-garden areas. Production for home use in farm and nonfarm gardens is not included. Value based on season-average prices received by growers. Value is for season or crop year and should not be confused with calendar year income]

¹ Acreage of crops for harvest for fresh market, including any partially harvested or not harvested, because of low prices or other economic factors, plus acreage harvested for processing.

² Includes some quantities not marketed and excluded in computing value.

³ Processing production shelled basis plus fresh market production in the shell. Equivalent shelled production: 1952, 102,400 tons; 1953, 117,350 tons.

⁴ Includes quantities for dehydration.

⁵ Processing production shelled basis plus fresh market production in the shell. Equivalent shelled basis: 1952, 443,560 tons; 1953, 469,580 tons.

¹ Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following season of growth.

² Prices exclude Government payments under the Sugar Act. Price support payments for 1943-45 included.

³ Raw value equals 96° raw sugar as defined in Sugar Act of 1948; prior to 1929, calculated by the Agricultural Adjustment Administration Method. (S. R. Series 1, No. 1.)

⁴ Calculated on basis that 100 pounds of raw sugar required to produce 93.46 pounds of refined sugar.

⁵ Converted to 86° Brix beginning with 1934. Data for previous years as reported.

⁶ Sirup production excluded. See table 814. ⁷ Not available.

1951.....	221,212	109,494	8,477	77	996	931	235	10.98
1952.....	221,090	108,089	8,694	80	1,020	954	235	10.97
1953.....	221,542	108,337	9,004	83	1,099	1,027	244	11.41

¹ Age of cane equals 18 to 24 months of growth.

² See note 3, table 815.

³ One ton of raw sugar 96° test is assumed to be equivalent to 0.9346 ton of refined.

⁴ Based on tonnage of cane used.

¹ Excludes Cuba. Includes Puerto Rico, Hawaii, Phil. Isls., and beginning 1910, Virgin Islands not shown separately.

² Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.

³ For 1900 to 1908, shipments to United States. Sugar 96° basis as computed by Puerto Rican mills.

⁴ Statistics for 1874 to 1880 represents exports. Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.

⁵ Exports 1871 to 1911, production 1912 and subsequently. Includes production of muscovado and panocha, low grades of sugar mostly for domestic consumption.

⁶ Less than 500 tons. ⁷ One year only.

⁸ Louisiana and Texas 1909 to 1923; Louisiana only 1924 to 1927; Louisiana and Florida beginning 1928.

⁹ Beginning 1930, includes centrifugal only. ¹⁰ Production for 1940; not available for 1941-44.

Source: Department of Agriculture; Agricultural Marketing Service (from official sources and International Institute of Agriculture); annual report, *Agricultural Statistics*, and *The World Sugar Situation*.

¹ Data from Sugar Division, Commodity Stabilization Service.

² Includes raws for processing held by importers other than refiners.

³ Includes sugar used in manufacture of other commodities. 1941, exports (Department of Commerce, *Foreign Commerce and Navigation*); beginning 1942, quantities delivered for export (Sugar Division, Commodity Stabilization Service).

⁴ Data based on allocation audits and records kept by armed forces.

⁵ Adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers. Civilian per capita consumption.

⁶ Includes shipments for civilian relief feeding.

Source: Department of Agriculture, Agricultural Marketing Service (except as noted); annual report, *Agricultural Statistics*. Also published in *The World Sugar Situation*.

No. 821.—COFFEE, TEA, COCOA AND CHOCOLATE—IMPORTS: 1830 TO 1953

[Coffee and tea imports represent imports from foreign countries and from Territories and possessions into continental United States. Reexports represent exports from continental United States to foreign countries and outlying Territories and possessions. Cocoa and chocolate figures represent general imports through 1932, imports for consumption, thereafter]

¹ Data for production and stocks held at crude oil mill locations collected by U. S. Department of Agriculture, October through December 1952.

² Data are on a commercial stocks basis and do not include figures for stockpiles of strategic oils.

³ Data on production collected by U. S. Department of Agriculture.

⁴ Excludes quantities used in refining.

⁵ Data from fish oil producers were collected by Fish and Wildlife Service, U. S. Department of the Interior.

⁶ Winterized-deodorized oil, hydrogenated-deodorized oil and cooking and salad oil not included.

⁷ Data not available.

⁸ Not shown to avoid disclosure of individual operations.

⁹ Includes data for synthetic glycerin.

¹ Includes inspected, noninspected, retail, and farm slaughter.

² Prices are for beef steers, all grades, excluding western.

³ Excludes animals slaughtered under government account.

⁴ Includes slaughter under Emergency Government Relief Purchase Program in 1934-1935.

⁵ Prices are for lambs only; (sheep represent smaller part of animals slaughtered).

No. 830.—MEATS AND LARD—PRODUCTION, FOREIGN TRADE, AND CONSUMPTION BY KIND: 1944 TO 1952

[All quantities, except per capita, in millions of pounds of carcass weight equivalent. Edible byproducts are excluded. Production of pork excluding lard comprises weight of dressed hog carcass less head bones and less all carcass fat rendered into lard. Lard production represents rendered weight of lard, and lard exports represent rendered lard, including neutral lard. Federally inspected production omits production in Hawaii and Virgin Islands. Uninspected production is made up of farm and retail slaughter and all wholesale slaughter that is not Federally inspected. Commercial exports include commercial shipments to territories; they do not include USDA exports and shipments for Lend-Lease, UNRRA or other claimants, nor do they include shipments for military civilian feeding or voluntary relief feeding. Civilian consumption is calculated from production and foreign trade, with an allowance for changes in stocks, and with deduction of military takings, and of deliveries to USDA through 1947. See also *Historical Statistics*, series E 133, 142, 146, and 150 for total production of beef, veal, lamb and mutton, and pork]

ITEM AND YEAR	PRODUCTION			Exports of U. S. production	Imports for con- sumption	CIVILIAN CONSUMPTION	
	Total	Federally inspected	Unin- spected			Total	Per capita (pounds)

Carpet wool, imports (1,000 lbs.) ²	160,634	86,621	166,755	85,987	105,275	99,900

¹ Price received by farmers. Weighted season average 1946 to date, weighted calendar average earlier years. Season April-March.

² Imports for consumption beginning 1934, general imports prior thereto. Apparel wool for all years includes item "not finer than 40's" both free and dutiable. Carpet wool includes only Donskoi, Smyrna, East Indian, Chinese, and similar wool without merino or English blood.

³ For the years 1936-35 the item "not finer than 40's" has been deducted from carpet wool totals reported by Department of Commerce and added to apparel wool, thus making entire series comparable.

⁴ Includes 222,222,220 lbs. in 1942; 275,476,308 lbs. in 1943; 2,725,929 lbs. in 1944; 5,372,698 lbs. in 1945; and 14,840 lbs. in 1946, imported free of duty as an act of international courtesy. Wool so imported consisted almost entirely of wool stored in this country for the British Government, and later re-exported. This wool was not available to domestic mills.

⁵ Includes hair of angora goat, alpaca, and other like animals. Includes a small amount of carpet wool beginning 1943.

⁶ Production, minus exports, plus imports; stocks not taken into consideration. ⁷ Scoured basis.

Source: Department of Agriculture, Agricultural Marketing Service; annual report, *Agricultural Statistics*. Exports and imports from Department of Commerce, Bureau of the Census.

¹ Scoured wool, plus greasy wool reduced to a scoured basis, assuming average yields varying with class, origin, grade, and whether shorn or pulled.

² Wool regarded as more or less suitable for apparel purposes; formerly "Combing and clothing."

³ Includes raw wool consumed on woollens and worsted systems only. Raw wool consumed on cotton and other systems and by felt and batting manufactures amounted to about 10 million pounds in 1946.

26. Forests and Forest Products

The Bureau of the Census, Department of Commerce, and the Forest Service, Department of Agriculture, are the principal Government agencies engaged in the collection and publication of statistics of forest land, forest industries, and forest products. The Forest Service, through its forest survey activities, makes an inventory of the forest resource and measures rates of forest growth and drain. A number of reports for surveyed areas have been published. A report based on a reappraisal of the Nation's forest situation made during 1945 and 1946 was published in 1948. Statistics from this report are shown in tables 844-847. Other publications of the Forest Service include data on stumpage and log prices, lumber consumption and distribution, lumber used in manufacture, and fire statistics. The *Statistical Supplement to the Annual Report of the Chief of the Forest Service* carries statistics of the administration of the national forests.

The Bureau of the Census, Department of Commerce, publishes information on forest industries and products in reports of the Census of Manufactures, in addition to current *Facts for Industry* reports. The Bureau of the Census also publishes statistics of foreign trade in forest products. Information on the domestic movement of forest products is reported by the Interstate Commerce Commission and the Association of American Railways.

The Agriculture Marketing Service of the Department of Agriculture publishes annual reports on the production of turpentine and rosin.

The Bureau of Labor Statistics of the Department of Labor publishes statistics of wholesale lumber prices monthly and annually.

A number of forest products trade associations and trade journals collect and publish statistics of forest products, production, markets, shipments, inventories, etc.

The completeness and reliability of published statistics of forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those areas which have not been covered. Forest fire statistics for federal lands are considered much better than for private lands, though too much reliance should not be placed in any estimates of fire damage or causes of fires.

In the field of forest products, data for lumber production and other manufactured products such as veneer and plywood, pulp and paper, cooperage, naval stores, etc., are much more complete than for the primary forest products such as poles and piling, fuelwood, and fence posts. The data for lumber production are subject to certain limitations because of incomplete coverage. Information for pulp and paper, and plywood, on the other hand, is believed to have practically complete coverage. Statistics relating to average value of lumber sawed may be subject to some special limitations due to incomplete representation of small mills.

For a historical summation of raw materials production, imports, exports, and consumption, which includes figures for forest products, see table 1081.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series F 69-73") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on April 29, 1954, when the material was organized and sent to the printer.

¹ In continental U. S.; includes National Forests, Interior, Soil Conservation Service, TVA, Public Domain, etc.

² In continental U. S. and Hawaii. Data reported to Forest Service by its field offices, cooperating agencies, other Government bureaus, and similar sources. Statistics on unprotected areas based on State estimates only.

³ Prior to 1939 forest area included total area needing protection. Beginning with 1939, this area included only forest area needing protection, which accounts for reduction in areas between 1938 and 1939.

No. 859.—LUMBER PRODUCTION, BY KIND OF WOOD, AND AVERAGE MILL VALUE:
1869 TO 1951

[Data not strictly comparable because of incomplete coverage of numerous small mills in the East prior to 1942 and exclusion of mills cutting less than 50 M ft. b. m. for all years prior to 1942 except 1869-1909, and 1919. Exclusion of under 50 M class of mills would affect totals less than 1 percent as reflected by 1942 survey. Data for 1943-46 and for 1949-51 are based on sample surveys and are subject to sampling errors; see source publications for evaluation of sampling reliability. See also *Historical Statistics*, series F 109-111 and F 120-122 for similar but not identical figures from Dept. of Agri. Forest Service]

¹ Reported in thousands for 1932 and prior years and converted on basis of 800 shingles to the square.² Included in "All other." ³ Includes figures for cedar lumber.⁴ Data not published to avoid disclosing operations of individual establishments.⁵ Not available. ⁶ Includes figures for birch. ⁷ Includes cottonwood and Douglas fir.Source: Department of Commerce, Bureau of the Census (in cooperation with Business and Defense Services Administration); reports of Census of Manufactures and annual report, *Lumber, Lath, and Shingle Production, Facts for Industry, Series M13C*.

No. 862.—LATH AND SHINGLES—PRODUCTION: 1899 TO 1953

[Lath in thousands and shingles in squares. Shingles reported in thousands prior to 1933 and converted to squares on basis of 800 shingles to square. See headnote, table 859 for explanation of lack of comparability of statistics. Data for shingles reasonably comparable over a period of years, because of complete enumeration of Red Cedar Shingle Industry, this industry's production comprising over 90 percent of total shingle production]

¹ Figures for turpentine and rosin from crude gum, beginning 1929-30, and from wood beginning 1933-34, relate to crop year ended Mar. 31. All other figures relate to calendar years.

² Figures compiled from data reported by establishments in turpentine and rosin industry.

³ Figures compiled from data reported by establishments in Wood-Distillation industry.

⁴ Not reported.

⁵ Includes, for 1909 and 1914, 366 barrels and 1,848 barrels respectively, of turpentine and, for 1914, 3,596 drums of rosin, reported by establishments engaged in manufacture of lumber and timber products.

⁶ Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1932-33, 26,720 drums; 1933-34, 28,048; 1934-35, 27,200.

⁷ Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.

⁸ Includes data for rosin produced from reclaimed gum: For 1935-36, 43,360 drums; 1936-37, 34,155; 1937-38, 21,017; 1938-39, 31,983; 1939-40, 31,414; 1940-41, 20,181; 1941-42, 19,766; 1942-43, 11,297; 1943-44, 9,824; 1944-45, 8,066; 1945-46, 8,538; 1946-47, 8,449; 1947-48, 4,345; 1948-49, 4,230; 1949-50, 2,230; 1950-51, 560.

⁹ Prior to 1951-52, figures do not include data for rosin produced from reclaimed gum. See note 8.

27. Fisheries

The first comprehensive statistical survey of the fisheries and fishery industries of the United States was made for the year 1880, although it did not include data for the Mississippi River and its tributaries. Periodic general surveys of a limited number of States or limited areas of the United States were made for various of the intervening years between 1880 and 1908 and from 1909 to 1928. A survey of the entire United States was made for 1908. The next general survey of the entire United States was not made until 1931, although complete data for all sections, excluding the Mississippi River and its tributaries, were collected for 1929 and 1930. Various sections were surveyed during the years from 1933 to 1949, inclusive. A complete survey of all sections of the country, including the manufacturing and wholesaling operations, was made for 1950.

The Fish and Wildlife Service, Branch of Commercial Fisheries, in the Department of the Interior, at present conducts these annual surveys for various statistical information on the fishery industries. Results from the surveys appear in greater detail in publications of the Service and include data on the volume of the catch of individual species of fish and shellfish and their value, employment in the fisheries, quantity of gear operated, the number of fishing and transporting craft employed in the capture and transporting of fishery products, employment in wholesale and manufacturing establishments, and volume and value of the production of manufactured fishery products. In addition to the basic statistics on employment, yield, and the production of manufactured fishery products for individual States and various geographical sections, the reports include data on imports and exports of fishery commodities; landings by fishing craft at Boston, Gloucester, New Bedford, and on Cape Cod, Massachusetts; at Maine ports; and Seattle, Washington; shad fisheries of the Hudson and Potomac Rivers; alewife fishery in the Potomac; seed oyster fisheries; a review of the Pacific Coast halibut fishery; a statement on whaling operations by United States firms; data on the sponge fishery; and lists of firms producing various manufactured fishery products.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series F 155") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on April 29, 1954, when the material was organized and sent to the printer.

No. 871.—FISHERIES—SUMMARY OF TOTAL CATCH AND VALUE: 1930 TO 1953

[Includes Alaska beginning with 1941, data partly estimated. See also *Historical Statistics*, series F 155]

YEAR	Quantity (1,000 lbs.)	Value to fishermen (\$1,000)	Average price per pound (cents)	YEAR	Quantity (1,000 lbs.)	Value to fishermen (\$1,000)	Average price per pound (cents)
1930.....	3,236,580	109,340	3.33	1946.....	4,450,000	310,000	6.96

No. 874.—FISHERIES—DISPOSITION OF DOMESTIC CATCH: 1946 TO 1953

[Round weight of catch in millions of pounds. Includes Alaska. A large portion of waste derived from canning, filleting, and dressing fish and shellfish is utilized in production of fish meal and oil in addition to whole fish used in manufacture of these products. About 600,000,000 pounds of waste were used in production of meal and oil each year shown. See also *Historical Statistics*, series F 155-159]

28. Mining and Mineral Products

This section summarizes the principal statistics relating to the mineral industries and mineral products. It includes not only crude minerals (such as coal, iron ore), but minerals which have gone through certain stages of preparation (such as refined copper, cement) and minerals such as magnesium whose extraction does not involve mining in the conventional sense. The latter two categories, while part of the mineral-raw-material sector of the economy, include the products of industries which are classified under the Standard Industrial Classification (Bureau of the Budget) as manufacturing.

The tables in this section are arranged in 4 groups which appear in the following sequence:

1. General summary statistics.
2. Fuels.
3. Nonmetals other than fuels.
4. Metals.

Most of the statistics are from the Bureau of Mines, with additional material from other Government agencies such as the Bureau of the Census, the Bureau of Labor Statistics, the Bureau of the Mint, the Federal Reserve Board, and the Interstate Commerce Commission and from non-Government sources such as the *Engineering and Mining Journal*, and *The Iron Age*.

Mineral statistics, with principal emphasis on commodity detail, have been collected annually or at more frequent intervals by the United States Geological Survey or by the Bureau of Mines since 1880. The principal statistics have been published annually through 1931 in *Mineral Resources of the United States* and thereafter in the *Minerals Yearbook*. Data available from Bureau of Mines publications include quantities and values of minerals produced, sold or used by producers, or shipped; quantities of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials. The Bureau of Mines also collects and publishes separate data on man-hours, active days, length of shift, and accidents.

Censuses of mineral industries have been taken approximately every 10 years since 1840. The most recent Census taken, however, is for 1939. Commodity statistics on many of the manufactured mineral products are also collected by the Bureau of the Census at monthly, quarterly, or annual intervals.

In general, figures shown in the individual commodity tables include data for Territories and possessions, and may therefore not agree with summary table 885.

Data in other sections.—Data on mining and mineral products will also be found in other sections of this *Abstract*. For example, a historical summation of production and consumption of raw materials appears in section 32, Foreign Commerce (see table 1081); data on iron and steel, aluminum and magnesium, copper products, clay products, and others appear in section 30, Manufactures; financial data on mining corporations appear both in section 14, Federal Government Finances and Employment, and section 17, Business Enterprise; summary data for the Territories and possessions appear in section 33; for specific page references, consult the index.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series G 1-5") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on May 21, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

Fig. XLV.—VALUE OF MINERAL PRODUCTION: 1930 TO 1952

[See table 883]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Department of the Interior, Bureau of Mines.

No. 883.—VALUE OF MINERAL PRODUCTION IN THE UNITED STATES: 1881 TO 1952

[All figures in millions of dollars. Principal differences between old basis and new basis are as follows: (1) Totals on the new basis represent continental U. S. only; on the old basis, production in Alaska, Hawaii, Philippine Islands and Puerto Rico was included, but no data were collected for other U. S. possessions now shown in table 1116; (2) U. S. totals on the new basis are a better representation than formerly of the production of primary minerals from domestic mines (or concentrating mills); on the old basis, totals include secondary products and mineral products made from foreign materials. However, value on new basis still includes some advanced products, like cement, lime, and natural gas liquids; also, mine value of nonferrous metals is based not on ore, but on value after refining of the recoverable metal content. Revised data for years prior to 1925 on new basis are not available. See also *Historical Statistics*, series G 1-5]

Undistributed ¹²		3, 876		10, 466		6, 671		10, 216		17, 755

¹ Includes small quantity of anthracite mined in States other than Pennsylvania.² Excludes sharpening stones, included with "Nonmetallic minerals, undistributed."³ Weight not recorded.⁴ Excludes clays sold or used for cement as follows: 1947, 5,336,000 short tons, \$2,987,000; 1948, 6,362,000 tons, \$4,320,000; 1949, 6,676,000 tons, \$4,573,000; 1950, 7,080,000 tons, \$5,574,000; 1951, 7,804,000 tons, \$8,052,000.⁵ Value included with "Nonmetallic minerals, undistributed."⁶ Excludes production from Wyoming, value for which is included with "Nonmetallic minerals, undistributed."⁷ Excludes abrasive stone, bituminous limestone, bituminous sandstone, and ground soapstone, all included elsewhere in table. Also excludes limestone for cement and lime.⁸ Comprises andalusite (1948-49), arlite, brucite, diatomite, dumortierite (1949), opson salts from serpentine (1947) and opsonite (1949-51), iodine, quartz crystal (1950), sharpening stones, sodic carbonate (Worming 1949-49), and minerals indicated by footnote 5.⁹ Value included with "Metals, undistributed."¹⁰ Columbite and tantalite production not differentiated and given under tantalum concentrate.¹¹ Less than 0.5 ton.¹² Comprises magnesium chloride for magnesium metal, zirconium concentrates, and minerals indicated by footnote 9.Source: Department of the Interior, Bureau of Mines, *Minerals Yearbook*.

Zinc.....	thousand short tons (Zn content).....										

¹ Deduction for net export has been prorated among other sources of supply. Where there is an over-all net import, but a net export to a particular country group, deduction for such net export is prorated among net imports from other country groups.

² From "old" scrap only, that is, from material previously in use.

³ Other countries outside U. S. R. bloc.

⁴ Deduction for net increase in stocks has been prorated among other sources of supply.

⁵ Less than 0.05 percent.

⁶ 60 percent WO₃ basis.

World total, bituminous coal, lignite and anthracite (1,000,000 metric tons)	1,166	1,319	1,414	1,799	1,356	1,814	1,923	1,932

¹ Data relate to mines having output of 1,000 tons a year or more, including lignite and small output of anthracite produced outside Pennsylvania. Includes Alaska. ² Average number of men working daily.³ Capacity of active mines with existing labor force, derived on basis of average output per day.⁴ Beginning 1945, production data include some bootleg coal purchased by anthracite industry for preparation and shipment to market. Data on employment, however, exclude such purchased coal as complete employment data on "bootleg" holes are not available. ⁵ Less than 500 tons. ⁶ For 1911.Source: Department of the Interior, Bureau of Mines; *Minerals Yearbook* and annual bulletins.

¹ Federal Power Commission. Represents consumption by public-utility power plants in power generation, including a small quantity of coke amounting to approximately 100,000 tons annually.

² U. S. Bureau of the Census.

³ Association of American Railroads. Represents consumption by class I railways for all uses, including locomotive, powerhouse, shop, and station fuel. The I. C. C. reports that in 1951 consumption for all uses by class I line-haul railways, plus purchases for class II and class III railways, plus purchases by all switching terminal companies combined, was 56,190,152 tons of bituminous coal and lignite; similar data not yet available for 1952.

⁴ Includes small amount of anthracite.

⁵ Estimates based upon reports collected from a selected list of representative manufacturing plants and retailers.

⁶ Included in "Other industries."

¹ Formerly designated "strikes and lockouts."

² Wages and hours were important issues also in some of these disputes.

³ Workers counted more than once if involved in more than 1 stoppage during the year. Thus in 1949, 365,000 to 400,000 coal miners were idle on 3 distinct occasions, accounting for 1,150,000 of a total of 3,030,000 workers.

⁴ Totals include 6 stoppages, involving 500 workers and 2,000 man-days, in which issues were not reported.

No. 900.—NATURAL GAS AND NATURAL GASOLINE—PRODUCTION, BY STATES

[Gas in millions of cubic feet; gasoline in thousands of barrels of 42 gallons. Production figures for gas (except as noted) refer only to that used by the ultimate consumer, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Consumption figures by States differ greatly from production figures by reason of interstate transportation]

No. 924.—COPPER—PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION: 1910 TO 1952

[In short tons. Production figures cover United States and Alaska. See also *Historical Statistics*, series G 112-113]

ITEM	1910	1920	1930	1940	1945	1950	1951	1952
Primary production:								
Mine production.....	544, 119	612, 275	705, 074	878, 086	772, 894	909, 343	928, 330	925, 377
Smelter production from domestic ores.....	540, 080	604, 530	697, 185	609, 084	782, 726	911, 352	930, 774	927, 305
Value (\$1,000).....	137, 180	222, 467	181, 271	205, 453	1 184, 723	379, 122	450, 495	448, 845
Refinery production, total.....	711, 019	763, 083	1, 078, 530	1, 313, 556	1, 108, 599	1, 239, 834	1, 206, 988	1, 177, 096
From domestic ores.....	535, 947	591, 212	695, 612	927, 239	775, 738	920, 748	951, 559	923, 192
From foreign ores, matte, and blister.....	175, 072	171, 871	382, 918	386, 317	332, 861	319, 086	255, 429	254, 504
Secondary production, total.....	94, 500	312, 460	467, 200	532, 046	1, 006, 516	977, 239	932, 282	903, 197
From new (purchased) scrap.....	30, 000	143, 500	125, 000	198, 156	509, 421	492, 028	474, 158	488, 562
From old scrap.....	64, 500	168, 960	342, 200	333, 890	497, 095	485, 211	458, 124	414, 635
Imports (unmanufactured) ¹.....	172, 218	242, 835	408, 577	491, 342	863, 196	690, 389	489, 135	618, 944
Refined.....	(²)	54, 372	43, 105	68, 437	531, 367	317, 363	238, 972	348, 960
Exports of metallic copper ⁴.....	311, 579	376, 557	427, 650	132, 555	192, 339	162, 339	106, 274	212, 390
Refined (ingots, bars, rods, etc.).....	354, 158	275, 613	334, 626	377, 108	48, 563	144, 561	133, 305	174, 135
Withdrawn on domestic account: ⁵								
New refined copper.....	366, 203	526, 019	632, 508	1, 008, 785	1, 415, 000	1, 447, 000	1, 304, 000	1, 360, 000
New and old copper.....	460, 700	839, 500	1, 099, 500	1, 541, 000	1, 912, 000	1, 692, 000	1, 762, 000	1, 775, 000
Stocks, producers, refined copper, Dec. 31.....	61, 402	329, 500	307, 500	91, 500	130, 000	26, 000	35, 000	26, 000
World smelter production, new copper.....	946, 000	1, 057, 000	1, 760, 000	2, 734, 000	2, 436, 000	2, 915, 000	3, 105, 000	3, 120, 000

¹ Excludes bonus payments of Office of Metal Reserve.

² Data are for "general imports," i. e., include copper imported for immediate consumption plus material entering country under bond. Comprises copper in ingots, plates, and bars, ores and concentrates, regulus, blister and scrap.

³ Not separately recorded.

⁴ Total exports of copper, exclusive of ore, concentrate, composition metal, and unrefined copper. Exclusive also of "other manufactures of copper," for which quantity figures are not recorded.

⁵ Includes unrefined copper.

⁶ Due to changes in classifications 1952 data not strictly comparable with earlier years.

⁷ Includes small exports of unrefined black blister and converter copper (bars, pigs, etc.)

⁸ Excludes rods.

⁹ Apparent consumption; consumers' inventories not taken into account.

¹⁰ New copper and old scrap only.

No. 926.—COPPER—EXPORTS AND IMPORTS: 1891 TO 1953

[Quantities in short tons; values in thousands of dollars. Exports are those classed as "domestic" in foreign trade statistics but include copper smelted or refined in United States from imported ore or unrefined metal. Values include all forms of copper; quantities represent all copper except the small item, "Other manufactures." Copper content of exports of ore for years 1891-1915 and of imports for years 1894-1903 was estimated]

[See table 934]

Source: Department of Commerce. Chart prepared by Bureau of the Census; data are from Business and Defense Services Administration.

29. Construction and Housing

Construction.—Monthly estimates of the value of work put in place are probably the most widely used of the current Federal statistics on construction. These estimates are prepared jointly by the Business and Defense Services Administration of the Department of Commerce and the Bureau of Labor Statistics of the Department of Labor.

Estimates of privately financed nonresidential construction are primarily the responsibility of the Department of Commerce. Construction estimates for buildings such as stores, warehouses, and factories are based on F. W. Dodge Corporation reports of construction contracts awarded, supplemented by building permit data and information from secondary sources for States which the Dodge Corp. does not cover. Public utility construction estimates are derived from data reported by the Interstate Commerce Commission and other Federal regulatory agencies, and by private associations such as the American Gas Association and the American Transit Association.

Estimates of publicly financed construction of all types and housing construction activity are primarily the responsibilities of the Bureau of Labor Statistics. A considerable number of Federal agencies administer construction programs or award contracts for construction; some of them engage in construction themselves. In this field, construction activity data are derived by the Bureau of Labor Statistics from the reports of the respective Federal agencies; data on State and local governmental construction activity are derived from F. W. Dodge Corporation and *Engineering News-Record* reports. Estimates of residential construction activity, including number of housing units started by type of structure and source of funds, and average construction costs, are based primarily upon reports of building permits granted which are received from nearly 7,000 permit-granting authorities. Field surveys on a sample basis are used to obtain data on housing activity in nonpermit areas. Statistics on housing starts in certain metropolitan areas are available from the Bureau of Labor Statistics for 1946 through the first quarter of 1951. The current program of the Bureau of Labor Statistics provides monthly estimates of the number of housing starts in the nation as a whole, and, beginning with January 1954, monthly statistics for four broad geographic divisions, and by class of area (metropolitan-nonmetropolitan).

The Bureau of the Census conducted a Census of Construction for 1929, 1935, and 1939. The last census covered all persons or establishments whose principal business in 1939 was utilizing construction materials and labor in construction work for others, or for themselves for speculative and investment purposes on projects located within the limits of continental United States. Because the census excluded force account work, its coverage was substantially less than current estimates of value of work put in place.

Housing.—The first Census of Housing was taken in 1940 as part of the Sixteenth Decennial Census, although some housing data were collected by the Bureau of the Census in earlier years in conjunction with Censuses of Population and Agriculture. Housing data, in less detail but roughly comparable to those obtained in the 1940 Census, were collected in sample surveys by the Bureau of the Census in October 1944, November 1945, and April 1947 as part of the Current Population Surveys; also, sample data on selected characteristics were collected in May 1948. The 1950 Census

Note.—This section presents data for the most recent year or period available on May 21, 1954, when the material was organized and sent to the printer.

of Housing was the second Census of Housing; this Census was authorized by the Housing Act of 1949, which provided also that a Census of Housing be taken decennially thereafter.

Urban and rural, farm and nonfarm residence.—A new definition was adopted for use in the 1950 Census in response to requests from many users of census data for a more realistic classification by urban and rural residence. For this definition and additional explanation, see page 2. In the 1950 Census, the enumerators in rural areas were specifically instructed to base the farm-nonfarm classification of a dwelling unit on the respondent's answer to the question, "Is this house on a farm?" Farm residence is therefore determined without regard to the occupation of the members of the household.

In rural areas, dwelling units are classified into rural-farm units which comprise all dwelling units on farms, and rural-nonfarm units which are the remaining rural units. In the 1950 Census of Housing, as in 1940 and earlier, farm housing was defined to include all housing on farms. However, in the 1940 and previous censuses, there was no specific exclusion of dwelling units for which cash rent was paid for the house and yard only, nor of institutions, summer camps, and tourist courts; these were excluded in 1950.

Dwelling unit.—In general, a dwelling unit is a group of rooms or a single room occupied, or intended for occupancy, as separate living quarters by a family or other group of persons living together or by a person living alone. Living quarters of the following types are not included in the dwelling-unit inventory: Rooming houses with five lodgers or more, transient accommodations (tourist courts, hotels, etc., predominantly for transients), and barracks for workers (railroad, construction, etc.).

The count of dwelling units in the 1950 Census may be considered comparable with the count in the 1940 Census. The enumeration of vacant units in the 1950 Census of Housing was not entirely comparable with the procedure used in the 1940 Census. However, counts of total vacant units in 1950 are considered more inclusive than in 1940. In 1940, vacant units were enumerated only if they were habitable; vacant units which were uninhabitable and beyond repair were omitted. In 1950, all vacant units, whether or not dilapidated, were included if they were intended for occupancy as living quarters.

Residential financing.—Statistics on residential financing were collected on a sample basis as part of the 1950 Census of Housing. The survey covered nonfarm residential mortgaged properties, both owner and rental. The data are expressed in terms of mortgaged properties, number of mortgages, and outstanding mortgage debt. Construction mortgages were excluded.

Data on home mortgages and foreclosures, based largely on reports from major holders, are provided by the Home Loan Bank Board. The Federal Housing Administration compiles, from its records, data on its real estate financial operations, such as volume of mortgages insured, type of lending institution, etc. The Veterans' Administration also compiles, from its records, data on amounts and types of loans. For explanation of the relationship between the data obtained in the 1950 Census of Housing and those compiled from other sources, see Department of Commerce, Bureau of the Census, 1950 Census of Housing, Volume IV, *Residential Financing*.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series H 1-26") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 934.—CONSTRUCTION IN THE UNITED STATES—ESTIMATED EXPENDITURES
FOR PRIVATE AND PUBLIC CONSTRUCTION: 1915 TO 1953

[In millions of dollars. Represents value of work put-in-place during year; consequently differs from building permit and construction contract data which measure value of work started. In addition, coverage generally broader than permit and contract data. Includes value and cost of installation of equipment which is integral part of structure, but not that of machinery, shipbuilding, or land costs. See also *Historical Statistics*, series H 1-26]

¹ American Appraisal Co. Average for 30 cities of 4 types of buildings: Wood frame, brick-wood frame, brick-steel frame, reinforced concrete. Mechanicals not included. Based on actual appraisal costs. Available for individual cities.

² Associated General Contractors of America. Wages and materials for 12 cities combined in 40-60 ratio. Wages, prevailing rates for hod carriers and common labor. Materials, weighted: Sand, gravel and crushed stone, 1; cement, 1; lumber, 1; hollow tile, 1/2; structural and reinforcing steel, 1/2.

³ Engineering News-Record construction cost index has 4 components: (1) Structural steel shapes, base price; (2) cement, which is 20-cities average but prior to July, 1948, was Chicago price only; (3) lumber, which until 1935 was 12 x 12 long leaf yellow pine wholesale at New York, and since 1935 is 2 x 4 S&S pine and fir in carload lots, ENR 20-cities average; (4) common labor, ENR 20-cities average of wage rates in force. ENR Building Cost Index provides a more representative measure of building cost movement, the skilled labor trend having been substituted for the common labor trend in the ENR Construction Cost index, and the ENR Building Cost index computed.

⁴ E. H. Boeckh & Assoc., Inc. Individual series for 10 types of buildings for 20 areas. Weights based on studies of actual building costs—vary with different type of structures. Material prices are those paid by contractors to material dealers. Prevailing skilled and common wage rates from contractors. Base: United States average, 1920-29=100. Series given here is commercial and factory buildings, U. S. average converted to 1913=100 base.

⁵ Aberthaw. Until Mar. 31, 1940, New England, 7-story and basement (62' 4" x 202' 4"), reinforced concrete building built in 1914, repriced quarterly as a construction bid to duplicate original building; labor costs based on current experience with similar construction. Since Mar. 31, 1940, New England, composite of 36 major cost items in 8 multi-story and 2 one-story industrial buildings, including all mechanical trades, repriced using actual and estimated labor and material costs.

⁶ George A. Fuller Company. Composite of 36 major cost elements, in 3 commercial type buildings, including mechanical, elevators, wiring, heating and ventilating, repriced.

⁷ Turner Construction Co. Eastern Cities. Own building cost experience applied to these factors: Labor rates, material prices, productivity of labor, efficiency of plant and management, competitive conditions.

⁸ Marshall and Stevens. Averages for 4 types of building: Fireproof protected steel, fireproof reinforced concrete, masonry, and frame. Designed to reflect normal costs in line with recognized or published prices of building materials, equipment, and labor. Base: U. S. average, 1920=100, converted to 1913=100 base.

⁹ Smith, Hinchman, and Grylls, Inc. Actual in-place costs, using building material costs, freight rates, skilled and unskilled labor rates and including labor efficiency and premiums, bidding competition, contractor profit margins and overhead. Figured with the contractor overhead are taxes, duration of projects, material expediting and labor procurement. This index is reported monthly on a 1920=100 base, converted to 1913=100 base.

No. 937.—NEW PERMANENT DWELING UNITS STARTED IN NONFARM AREAS, BY TYPE: 1920 TO 1953

[Figures are estimates covering construction of all new permanent family dwelling units in nonfarm area of United States, based upon building-permit reports, and from 1946, on building-permit information, supplemented by data from field surveys in non-permit-issuing places. This area consists of all urban and rural nonfarm places. Urban designation is applied to all incorporated places with a population of 2,500 or more in 1940, and, by special rule, to a small number of unincorporated civil divisions. Rural nonfarm construction includes all construction for nonagricultural use in unincorporated areas and incorporated places of less than 2,500 population. See also *Historical Statistics*, series H 40-45; data for 1941-1945 in historical volume include temporary units]

No. 938.—NUMBER AND AVERAGE CONSTRUCTION COST OF NEW PERMANENT PRIVATELY OWNED ONE-FAMILY DWELLING UNITS STARTED: 1940 TO 1953

[Average cost of all such dwelling units started nationally. Data do not represent construction cost of a typical house. These averages are affected by changes in cost of materials and labor, variations in size and design of the houses, type of projects started, differences in construction methods, and other variables. Construction costs cover only labor, materials, and subcontracted work, and that part of the builders' overhead and profit chargeable directly to the construction projects. Cost data based primarily on builders' estimates of construction cost made at the start of construction, and from 1946, also on reports of construction cost by individual construction contractors in a representative group of localities not issuing permits]

No. 940.—FEDERAL CONTRACT AWARDS FOR NEW CONSTRUCTION (VALUE), BY TYPE OF PROJECT: 1935 TO 1953

[In thousands of dollars. Includes force-account construction started, which is work done directly by Federal agency (not through contractor), using separate work force to perform nonmaintenance work on agency's own property. For Federal-aid programs, includes funds to be contributed by owner as well as Federal Government. Major additions and alterations considered new construction. Secret projects sometimes excluded]

No. 942.—CONSTRUCTION CONTRACTS AWARDED IN 37 STATES—VALUE OF CONSTRUCTION AND FLOOR SPACE OF BUILDINGS, BY CLASS OF CONSTRUCTION: 1925 TO 1953

[Values in millions of dollars; floor space in thousands of square feet. Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varying number of States for earlier years have been published in the 1932 and previous issues of the *Statistical Abstract*. Figures for individual States and districts in table 943 represent value of construction contracts awarded in States and districts where work was actually done. See also *Historical Statistics*, series H 51-57.]

No. 944.—CONSTRUCTION CONTRACTS AWARDED—INDEXES OF VALUE: 1920 TO 1953

[1947-49=100. Indexes are derived from monthly figures of construction contracts awarded reported by F. W. Dodge Corporation. Reports covered 37 States beginning with May 1924 and a varying number for earlier years. In order to obtain comparable figures from 1919 to date, total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments computed separately for "residential" and "all other" types of construction and the two series combined. Indexes based on a 3-month moving average, centered at middle month. More detailed description of indexes obtainable from the Division of Research and Statistics, Board of Governors of the Federal Reserve System]

No. 945.—ENGINEERING CONSTRUCTION CONTRACTS AWARDED AND BACKLOG OF PROPOSED CONSTRUCTION—VOLUME, BY TYPE: 1934 TO 1953

[In millions of dollars. Covers continental U. S. construction projects of following minimum costs: For 1934-35, waterworks, excavation, drainage, and irrigation, \$10,500; other public works, \$17,500; industrial buildings, \$28,000; other buildings, \$105,000. For 1936-45, minimums used were \$15,000, \$25,000, \$40,000, and \$150,000. For 1946-47, these minimums were raised to \$22,500, \$40,000, \$55,000, and \$205,000, respectively, to account for rise in construction costs. For 1948-50, minimums used were \$28,000, \$50,000, \$68,000, and \$250,000. For 1951-53, minimums used were \$34,000, \$60,000, \$82,000, and \$300,000]

**No. 947.—BUILDING CONSTRUCTION IN CITIES OF 50,000 OR MORE INHABITANTS—
VALUE OF ALL CONSTRUCTION AND NUMBER OF NEW DWELLING UNITS: 1949
TO 1953**

[Valuation figures are derived from estimates of construction costs made by prospective builders when applying for permits to build and value of contracts awarded by Federal Government. No land costs are included. For type of building covered see table 936. Cities shown had a population of 50,000 and over in 1950]

¹ Includes PWA, subsistence homestead and Greenbelt town projects.

² Includes 50 PWA units completed in 1934.

³ Includes 60,489 units completed as war housing of which all but 2,698 units have been returned to low-rent use.

⁴ 16,761 permanent family war housing dwelling units have since been conveyed to local authorities for low-rent use under Public Law 475.

⁵ Units completed for emergency flood projects in Portland-Vancouver area.

⁶ Defense housing.

Source: Housing and Home Finance Agency, Public Housing Administration.

No. 949.—NUMBER OF DWELLING UNITS OWNED OR SUPERVISED BY THE PUBLIC HOUSING ADMINISTRATION, BY PROGRAM, AS OF DEC. 31, 1953

[Excludes units which have been sold to mutual housing associations, limited dividend corporations (PWA) and homesteads associations on which PHA holds mortgages for collection]

¹ "Occupied dwelling units" for 1940 and 1950 is not exactly same as "Families" for earlier years, but differences are so small as to be negligible. Count of families for 1900 and 1930 represents private families only; that for 1890, 1910, and 1920, includes small number of quasi-family groups which were counted as families in those years.

² Since population in private families was not tabulated separately for all years, population per occupied dwelling unit (or family) is based on total population (including population in quasi-households). See table 11, p. 16.

³ Not available.

⁴ For 1890 to 1920, "Farm" contains a small proportion of urban-farm families in addition to the rural-farm families. For changes in definition of "Farm," see "Farm and Nonfarm Residence," p. 3.

No. 962.—DWELLING UNITS—MORTGAGE STATUS OF NONFARM OWNER-OCCUPIED UNITS: 1890 TO 1950

[For 1940 and 1950, mortgage statistics are for owner-occupied dwelling units in 1- to 4-dwelling unit structures without business. An owner-occupied dwelling unit was reported as mortgaged if property on which it was located had an indebtedness in form of a mortgage or deed of trust, or if occupants had contract to purchase property. For 1920 and earlier, mortgage data are for owner-occupied units in all types of structures. Although types of units for which mortgage data were reported are not the same for all censuses, differences are not large enough to invalidate comparisons]

CENSUS YEAR	Total owner-occupied dwelling units	Reporting mortgage status	MORTGAGED		Not mortgaged
			Number	Percent	
1890.....	2,923,671	2,923,671	809,933	27.7	2,113,738

No. 963.—DWELLING UNITS—CONTRACT AND GROSS MONTHLY RENT OF NONFARM RENTER-OCCUPIED UNITS: 1940 AND 1950

[In thousands of dwelling units. Contract monthly rent is rent contracted for, regardless of whether it includes furniture, heating fuel, electricity, cooking fuel, water, or other services sometimes supplied. Gross monthly rent is contract monthly rent plus reported average monthly cost of utilities (water, electricity, gas) and fuels such as wood, coal, and oil; if furniture was included in contract rent, reported estimated rent of dwelling unit without furniture was used in computation rather than contract rent]

30. Manufactures

Census of Manufactures.—The basic source of comprehensive data on manufacturing production is the Census of Manufactures conducted by the Bureau of the Census. The first Census of Manufactures covered the year 1809 and a census was taken at 10-year intervals in connection with the Decennial Census of Population up to and including 1899, with the exception of 1829. It was conducted at 5-year intervals from 1904 through 1919, and every other year from 1921 through 1939, but was suspended during the war period. The 1947 Census of Manufactures was the first to be taken since 1939. Present legislation provides for a Census of Manufactures to cover the year 1953 and every fifth year thereafter. However, the census scheduled to be conducted in 1954 covering the year 1953 was not taken.

The 1947 Census of Manufactures covered all establishments primarily engaged in manufacturing, as defined in the 1945 revision of the Standard Industrial Classification sponsored by the Bureau of the Budget. This Census, as well as the *Annual Survey of Manufactures*, which is described below, covered operating manufacturing establishments only, omitting separate administrative offices and auxiliary units of operating establishments. Operating establishments, however, account for approximately 98 percent of total manufacturing employment. To the extent possible, this Census was conducted on an establishment basis. As a rule, the term "establishment" signifies a single plant or factory and is not necessarily identical with the business unit or company which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a report for each location; also, companies engaged in distinctly different lines of activity at one location are required to submit separate reports if separate payroll and inventory records are kept for each activity. Census figures differ, therefore, from those prepared on a company basis. They also differ to some extent from other tabulations based on establishment reports, where the definition of an establishment as to location and line of activity is not so rigidly applied.

In the 1947 Census, reports were required from all establishments employing one or more persons at any time during the census year. In other recent censuses, establishments having less than \$5,000 value of products were designated as outside the scope of the census. The change in the minimum size limit in 1947 as compared with 1939 has not appreciably affected the comparability of the figures for these two years, except for data on number of establishments for a few industries.

Each of the establishments covered in the census was classified in one of 458 manufacturing industries in accordance with the industry definitions embodied in the Standard Industrial Classification system. Under this system of classification, an industry is generally defined as a group of establishments producing a single product or a more or less closely related group of products. This product or group of products is in turn said to be "primary" to that industry. Accordingly, an establishment is classified in a particular industry if its production of the primary products of that industry exceeds in value its production of any other group of products. In a few instances, however, the industry classification of an establishment is determined not only by the products it makes but also by the processes employed in making those products.

While some establishments produce only the primary products of the industry in which they are classified, it rarely happens that all the establishments in an industry specialize to this extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect not only the primary activities of the

Note.—This section presents data for the most recent year or period available on May 21, 1954, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

establishments in that industry but also their activities of a secondary nature. For this reason the industry statistics usually cannot be directly related to statistics on the total shipments of commodities.

The Bureau of the Census is prohibited by law from publishing any statistics that disclose information reported by individual companies. Figures are, therefore, not shown for an industry or a geographic unit which is represented by only one or two companies, or by more companies when one or two companies produce a very large proportion of the combined output of all the companies. This restriction has no effect upon statistics by industry for the entire United States, or statistics for all industries within States and standard metropolitan areas. There are many instances, however, where this restriction makes it necessary to withhold figures for counties and cities, and for industries within States and areas.

Annual Survey of Manufactures.—This survey, which was conducted for the first time in 1949, carries forward, for the intercensal years, the key measures of manufacturing activity covered in detail by the quinquennial Census of Manufactures. It is designed to yield estimates of general statistics (employment, payrolls, value added by manufacture, inventories, and capital expenditures) for industry groups, important individual industries, geographic divisions, States, and important cross-tabulations of major industry groups by division and by State.

The annual survey is based on a sample of approximately 45,000 out of a total of almost 250,000 manufacturing establishments. Included are all large plants and a representative sample of the much more numerous small plants. The large plants in the survey account for approximately two-thirds of total manufacturing employment in the United States. Government-owned and -operated establishments are excluded. Employment data shown for administrative and auxiliary units are obtained from employer reports for mid-March to the Bureau of Old-Age and Survivors Insurance. Figures shown for employment in administrative and auxiliary units in 1952 actually represent 1951 data; the Bureau of Old-Age and Survivors Insurance did not tabulate 1952 figures for these units.

The annual survey estimates vary from the totals that would have been obtained from a comparable complete canvass of all manufacturing establishments. The relative magnitude of this sampling variation, expressed in percentage form, is given in the table column captioned "Standard error." The standard error should be interpreted to mean that the sample estimates will differ from complete canvass totals by *less than*: (a) the percentage shown in approximately 2 cases out of 3; (b) twice the percentage shown in approximately 19 cases out of 20; and (c) three times the percentage shown in almost every case. It should be noted that standard errors are shown only for selected items. The standard errors of other measures are shown in the source report cited.

In making any study of the trend since 1947, it is important to take account of the effect of the sampling variation on the apparent increase or decrease shown between years. In addition to sampling errors, individual figures may be subject to biases arising from undetected response or procedural errors which are not reflected in the "standard errors." In general, figures are withheld from publication in the original source volumes if (a) the standard error of the estimate exceeds 15 percent, or (b) survey estimates are inconsistent with other census series and related data. It must be noted that any estimate which can be derived by subtraction of one published figure from another may have a standard error considerably in excess of 15 percent.

The basic statistical measures of manufacturing activity, such as employment, payrolls, value added, etc., are defined in essentially the same way for the annual surveys as for the quinquennial census. Consequently, historical series shown in the following tables may be considered to be generally comparable. However, it should be pointed out that beginning with 1949, average employment was calculated from the figures reported for the pay periods ending nearest the fifteenth of March, May, August, and November, whereas for 1947 such averages were based on twelve monthly employ-

ment figures. Further, 1947 figures exclude data for central administrative offices and auxiliary establishments of manufacturing concerns, which are included in the summary statistics for later years.

Other current statistics.—Monthly, quarterly, and annual commodity surveys are also conducted by the Bureau of the Census. These data are published currently in the *Facts for Industry* series. This series also includes releases of information collected by or for the War Production Board and successor agencies during the war and reconversion periods.

Reports on current activities of industries, or current movements of individual commodities, are also compiled by trade associations and trade journals, commercial agencies, and by such governmental agencies as Bureau of Labor Statistics, Agricultural Marketing Service, Business and Defense Services Administration, Fish and Wildlife Service, Tariff Commission, and Internal Revenue Service, in addition to the Census Bureau previously mentioned.

Abbreviated balance sheet and income account data on all United States manufacturing corporations are compiled and published annually by the Internal Revenue Service from corporation income and profits tax returns and holding company returns.

Data on financial operations and intercorporate relations of manufacturing corporations are collected from time to time by the Securities and Exchange Commission, the Tariff Commission, the Federal Trade Commission, and special investigating agencies. Financial statistics for certain manufacturing industries in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, types and amounts of security issues, and selected data on the salaries paid to officers and directors, are summarized and published for the leading corporations that are registered with the Securities and Exchange Commission. The Tariff Commission publishes commodity surveys which cover economic and competitive aspects of production, distribution, and international trade in selected important industries. Each survey deals with several products which are related because of the raw materials consumed, or competitive uses. The Federal Trade Commission has made several comprehensive studies of individual industries.

Material in other sections.—In addition to the statistics presented in this section, statistics on the output and activities of manufacturers will be found in various other sections of the *Statistical Abstract*. For example, a historical summation of production and consumption of raw materials appears in section 32, Foreign Commerce (see table 1081); data on wages and hours appear in section 8, Labor Force, Employment, and Earnings; statistics on manufacturing corporations compiled from corporation income tax returns appear in section 14, Federal Government Finances and Employment, and in section 17, Business Enterprise; and statistics on lumber production in section 26, Forests and Forest Products. For page references to the commodity or industry, consult the index. For references to the important sources of statistics on manufacturing and related activities, see the listings under the appropriate subjects in the "Bibliography of Sources of Statistical Data," page 981.

Geographic coverage.—Statistics in this section relate to continental United States except as noted.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series J 1-12") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 970.—MANUFACTURES—SUMMARY: 1849 TO 1952

[Figures for 1849 to 1919 include establishments whose products were valued at \$500 or more; for 1921 to 1939, establishments whose products were valued at \$5,000 or more; for 1947, figures cover all establishments employing 1 or more persons at any time during year. See also *Historical Statistics*, series J 1-12]

¹ Beginning 1939 includes data for employees of manufacturing establishments engaged in distribution and construction work. Extent to which data for such employees were included in figures for earlier years is not known.

² Data for 1949-52 based on pay periods ending nearest 15th of Mar., May, Aug., and Nov. For 1947, data represent average of 12 monthly figures; for earlier years, sum of average number of production workers for year and number of nonproduction workers reported for 1 payroll period (usually in October).

³ Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1849-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.

⁴ Not available. ⁵ Reduced to gold basis. ⁶ Excludes data for salaried officers of corporations.

⁷ Revised on basis of retabulation of returns to exclude data for establishments classified as nonmanufacturing in 1947. Value added by manufacture on a basis comparable with 1937 and previous years, was \$24.7 billion.

⁸ Number of proprietors and firm members not revised. Figures for "All employees" revised on basis of estimates rather than by retabulation of 1939 reports. (See footnote 7.)

⁹ Estimates based on sample survey; see text, p. 808. For standard errors of estimates, see subsequent tables.

¹⁰ Includes data for plants idle throughout year, administrative offices, and units auxiliary to manufacturing.

No. 973.—CONCENTRATION OF EMPLOYMENT IN MANUFACTURING COMPANIES, BY INDUSTRY: 1950 AND 1951

[Represents industries having employment of 60,000 or more in 1951; ranked in order of 1951 employment. Figures are based on sample and subject to sampling variation (see standard error columns). Tabulations from which data were taken were limited to those companies considered large in terms of employment as shown by 1947 Census of Manufactures. Where evidence indicated that the sample did not include companies which, in 1947, were among the largest 4 or largest 8 in an industry, the concentration ratio has been noted as not available. Moreover, there were certain companies which subsequently (1948 to 1951) qualified as large and may rank among the first 8 companies, which may have been omitted from the sample.]

INDUSTRY ¹	1950				1951

¹ Represents only the "4-digit" (Standard Industrial Classification) industries appearing in the 1950 and 1951 Annual Survey of Manufactures; excludes "residual" (usually referred to as "not elsewhere classified") industries.

² Employment of 4 largest companies (or 8 largest companies) divided by total employment of the industry.

³ Employment data originally collected on the basis of "establishments" have been summarized into company totals. Company affiliations of the "establishments" are based on Census records. Largest company ranking is determined by each company's total number of employees in the specified industry.

⁴ See text, p. 808, for explanation of standard error. ⁵ Not available.

¹ Value added by manufacture; value of shipments not used for concentration ratios because of excessive duplication in these industries owing to the fact that the products of some establishments of this industry are used as materials by other establishments also classified in this industry. Rank determined by value of shipments, however.

¹ Value of products shipped less cost of materials, supplies, fuels, electric energy, and contract work.² Excludes logging industry and small sawmills for 1947.³ Includes privately owned and/or operated establishments classified in "Ordnance and accessories."⁴ See text, p. 803, for explanation of standard error. Refers to columns "All employees—Number (average for the year)"; standard errors for other columns usually of same magnitude.Source: Department of Commerce, Bureau of the Census; *Census of Manufactures: 1947*, Vol. II, and *Annual Survey of Manufactures*.

**NO. 978.—MANUFACTURES—SELECTED STATISTICS, BY SIZE OF ESTABLISHMENT, FOR
MAJOR INDUSTRY GROUPS: 1952**

[Value added figures in thousands of dollars. See text, p. 808. Figures are based on sample and subject to sampling variation (see standard error columns). Figures for value added by manufacture derived by subtracting from total value of products the cost of materials, supplies, containers, fuel, purchased electric energy and contract work. Each manufacturing establishment is classified in this table according to its employment size, irrespective of size of company owning it. Each company covered in *Annual Survey of Manufactures* is required to submit a separate report for each of its manufacturing establishments. For purposes of the *Annual Survey* (as well as the Census of Manufactures), an establishment is defined as a single physical location where industrial operations are performed; for example, a factory, mill, or plant. Where a single physical location comprises 2 or more units engaged in separate industrial activities (and for which separate reports can be prepared), each unit is usually reported as a separate establishment]

All employees.....	328,372	99,322	51,819	65,201	67,790	44,240	-----	-----	-----	

¹ See text, p. 808, for explanation of standard error. Standard errors for column D are: 5 percent or less for food and kindred products, textile mill products, apparel and related products, chemicals and allied products, primary metal industries, fabricated metal products, machinery (except electrical); and from 5 to 15 percent for furniture and fixtures, leather and leather products, instruments and related products, miscellaneous manufactures. Other estimates in columns D, E, and F, unless otherwise indicated, are based on reports from all establishments known to be in appropriate size classification.

² Standard error 1 percent.

³ Standard error 3 percent for "Number of establishments" and "Value added," and 2 percent for "All employees."

⁴ Withheld because estimate did not meet publication standards. See text, p. 808.

⁵ Data for any size class which cannot be shown without disclosing information for individual companies have been combined with figures for adjacent size class.

⁶ Standard error 4 percent for "Number of establishments" and "All employees," and 5 percent for "Value added."

⁷ Standard error 20 percent for "Number of establishments," 15 percent for "All employees," and 30 percent for "Value added."

⁸ Standard error 6 percent for "Number of establishments," 5 percent for "All employees," and 4 percent for "Value added."

⁹ Standard error 2 percent for "Number of establishments" and 1 percent for "All employees," and "Value added."

¹⁰ Includes privately owned and/or operated establishments engaged primarily in manufacture of ordnance and accessories.

¹ Value of products shipped less cost of materials, supplies, fuels, electric energy, and contract work.

² See text, p. 808, for explanation of standard error. Refers to column "All employees—Number (average for the year)". Standard errors for other columns usually of same magnitude.

³ 1952 totals include industries not shown separately.

⁴ Withheld because estimates did not meet publication standards; such estimates, when derived by subtraction, are generally unreliable.

⁵ Not available.

⁶ Data for 1952 not strictly comparable with 1947.

⁷ Includes privately owned and/or operated establishments classified in "Ordnance and accessories."

¹ Value of products shipped less cost of materials, supplies, fuel, electric energy, and contract work.

² See text, p. 808, for explanation of standard error. Refers to column "All employees—Number"; standard errors for other columns usually of same magnitude.

³ Data for logging industry and for sawmills producing less than 200,000 board feet of lumber included in estimates for 1952, but excluded from figures for 1947.

⁴ Includes privately owned and/or operated establishments classified in "Ordnance and accessories."

⁵ Withheld because estimate did not meet publication standards. See text, p. 808.

Source: Department of Commerce, Bureau of the Census; *Annual Survey of Manufactures*.

¹ Value of products shipped less cost of materials, supplies, fuel, electric energy, and contract work.² See text, p. 808, for explanation of standard error. Refers to column "All employees—Number"; standard errors for other columns usually of same magnitude.Source: Department of Commerce, Bureau of the Census; *Census of Manufactures: 1947*, Vol. II, and *Annual Survey of Manufactures*.

No. 982.—MANUFACTURES—EXPENDITURES FOR NEW PLANT AND EQUIPMENT, BY INDUSTRY GROUPS: 1947, 1950, AND 1952

(Dollar figures in thousands. 1950 and 1952 figures based on sample and subject to sampling variation. See text, p. 807. 1947 and 1950 figures exclude expenditures: (1) for plant under construction but not in operation; (2) for plants idle throughout year; (3) for nonmanufacturing establishments of manufacturing companies; (4) for plants and equipment leased to manufacturers by owners; and (5) for used plant and equipment acquired from others. 1952 figures include expenditures for plants under construction but not in operation.)

¹ Smaller establishments submitting "short" form reports were not requested to include data on capital expenditures. Resulting understatement is negligible (see Ch. VI of Vol. I, "General Summary," *Census of Manufactures, 1947*).

² See text, p. 808, for explanation of standard error. Refers to total expenditures columns. Standard errors for new machinery columns approximately same as those for total expenditures; for new structures columns, vary, usually between 1 and 3 times the standard errors shown for total expenditures, up to a maximum of 20 percent.

³ Not fully represented in sample; capital expenditures understated by approximately 1 to 10 percent; corresponding understatement of "All industries" total is less than 0.5 percent.

⁴ Withheld because estimate did not meet publication standards. See text, p. 808.

⁵ Includes privately owned and/or operated establishments classified in "Ordnance and accessories."

¹ Separate accounts for alcohol produced at industrial alcohol plants required commencing May 1, 1920.² Through 1940, represents *withdrawals* of all products for denaturation, that is, domestic ethyl alcohol, spirits produced by registered distilleries (redesignated upon receipt at denaturing plants as alcohol), and rum. Beginning 1944, represents all products (except rum) *used* for denaturation, that is, domestic ethyl alcohol, imported ethyl alcohol, and spirits. Rum is included for 1935 and 1940 because denatured rum is included with specially denatured alcohol for those years.³ Prior to 1944 includes denatured rum.⁴ Represents gross production. Net production (gross production minus products used in redistillation) for 1945, 650,089,874.Source: Treasury Department, Internal Revenue Service; *Annual Report of the Commissioner*.

¹ Barrels of 31 wine gallons.² Excludes ethyl alcohol.³ A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon. For spirits of less than 100 proof the tax gallon is equivalent to the wine gallon.⁴ Includes ethyl alcohol.⁵ Excludes vermouth and other aperitif wines.⁶ Production represents total amount removed from fermenters, including distilling material (substandard wines produced with excessive water or residue materials). In 1953, 282,237,600 gallons of distilling materials were produced.⁷ Standard United States gallon.⁸ Excludes distilling materials.⁹ Includes champagne, other sparkling wines, and artificially carbonated wines.¹⁰ Tax is payable on each ½ pint or fraction thereof in each bottle or container.Source: Treasury Department, Internal Revenue Service; *Annual Report of the Commissioner*.

No. 990.—TOBACCO PRODUCTS—PRODUCTION, BY KIND: 1901 TO 1952

[Compiled from monthly returns of manufacturers. Data relate to products manufactured in continental United States, excluding those manufactured in customs bonded manufacturing warehouses, class 6. There were 189,876,850 large cigars manufactured in these warehouses in 1952. Large cigars are those weighing more than 3 pounds per thousand. See also *Historical Statistics*, series J 174 for data on cigarettes.]

¹ Includes scrap chewing tobacco.

² Number of factories on Jan. 1, 1953: Tobacco and snuff (excluding 157 "quasi" manufacturers), 259; cigars, 1,303; cigarettes, 46.

Source: Treasury Department, Internal Revenue Service; *Annual Report of the Commissioner*.

No. 991.—TOBACCO, LEAF—AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF: 1896 TO 1952

[All figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely, "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses. See also *Historical Statistics*, series J 171, for annual total consumption.]

No. 994.—COTTON-SYSTEM SPINDLES, COTTON CONSUMPTION, AND STOCKS: 1840 TO 1953.

[Statistics for 1915 to 1949 relate to 12 months ending July 31 and those for prior years to 12 months ending Aug. 31. For 1940-53, spindles in place include all cotton-system spindles in place regardless of fiber spun. Prior to 1940, "in place" figure represents all spindles in place used exclusively for spinning cotton. Consumption and stocks are expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton for all years are in equivalent 500-pound bales. See also *Historical Statistics*, series J 179-180 for data on active cotton-system spindles in the U. S. and total cotton consumed including linters]

¹ For 1945 and earlier years data represent sum of greatest number of cotton spindles reported by each mill as active at any time during year, regardless of length of time operated. Beginning with 1946, active figure includes all cotton-system spindles active last day of year, regardless of type of fiber spun. On Aug. 1, 1953, there were 20,052,000 spindles active on cotton, 1,169,000 on synthetics, 202,000 on other fibers and blends, and 1,480,000 idle.

² Includes linters for 1840 to 1908. Figures for all years include foreign and domestic cotton.

³ Not available. ⁴ Cotton mills only.

⁵ Includes stocks held in public storage and at compresses beginning 1938.

⁶ Includes linters for 1906 to 1908. ⁷ Average, 1909 and 1910.

⁸ "Upland" includes "American-Egyptian" beginning 1912 (first year produced).

No. 1006.—CHEMICALS—PRODUCTION, BY KIND: 1947 TO 1953

[Data for chemicals shown are restricted to a selected group comprised for the most part of inorganic chemicals and related products which are sufficiently important economically to justify publication. Data for production by Government-owned arsenals, ordnance works, and certain plants operated for Government by private industry are excluded, except that data for chemicals manufactured by Tennessee Valley Authority are included.]

CHEMICAL AND BASIS	Unit	1947	1950	1951	1952	1953 ¹
Ammonia, synthetic anhydrous.....	Short tons.....	1, 114, 000	1, 565, 569	1, 767, 043	2, 052, 114	2, 286, 454
Ammonium nitrate, original solution (100%NH ₄ NO ₃).....	do.....	1, 086, 869	1, 213, 911	1, 346, 443	1, 467, 341	1, 561, 434
Ammonium sulfate, synthetic (technical) ²	do.....	195, 848	1, 137, 721	622, 084	812, 795	544, 578
Calcium carbide (commercial).....	do.....	607, 113	671, 492	775, 284	703, 241	793, 335

Silver nitrate (100%AgNO ₃).....	M ounces.....	38, 336	55, 549	60, 452	59, 020	63, 151
Soda ash (commercial sodium carbonate): Ammonia soda process.....						
Total wet and dry (98-100%Na ₂ CO ₃) ⁷	Short tons.....	4, 524, 668	3, 991, 190	5, 093, 927	4, 442, 450	4, 879, 408
Finished light (98-100%Na ₂ CO ₃) ⁸	do.....	2, 206, 580	2, 049, 896	2, 575, 677	2, 310, 508	2, 571, 651
Finished dense (98-100%Na ₂ CO ₃).....	do.....	1, 629, 406	1, 410, 110	1, 802, 022	1, 591, 177	1, 770, 589
Natural (Na ₂ CO ₃ equivalent) ⁹	do.....	276, 428	338, 379	393, 951	321, 131	423, 708
Sodium bicarbonate (refined) (56%Na ₂ O).....	do.....	124, 611	101, 365	110, 121	95, 605	107, 322
Sodium bichromate and chromate.....	do.....	90, 285	99, 829	127, 634	89, 905	108, 245
Sodium hydroxide (caustic soda): ¹⁰ Liquid (100%NaOH).....	do.....	2, 103, 150	2, 510, 720	3, 106, 307	3, 031, 430	3, 261, 869
Solid (100%NaOH).....	do.....	493, 357	438, 378	650, 023	498, 893	423, 151
Sodium phosphate: Monobasic (100%NaH ₂ PO ₄).....	do.....	14, 690	15, 703	18, 478	19, 365	20, 670
Dibasic (100%Na ₂ HPO ₄).....	do.....	78, 806	158, 756	182, 649	175, 871	(11)
Tribasic (100%Na ₃ PO ₄).....	do.....	58, 568	66, 801	67, 607	50, 954	50, 483
Meta (100%Na ₂ P ₂ O ₇).....	do.....	30, 460	39, 412	52, 308	49, 742	52, 040
Tetra (100%Na ₄ P ₂ O ₇).....	do.....	66, 641	85, 657	86, 384	84, 824	95, 236
Sodium silicate (soluble silicate glass, liquid and solid) (anhydrous).....	do.....	492, 837	486, 203	547, 387	519, 039	584, 192
Sodium sulfate: Anhydrous (refined) (100%Na ₂ SO ₄).....	do.....	134, 069	184, 254	233, 666	202, 813	219, 937
Glauber's salt (100%Na ₂ SO ₄ ·10H ₂ O) ¹¹	do.....	202, 285	188, 626	219, 942	177, 920	204, 159
Salt cake (crude) (commercial) ¹²	do.....	693, 517	561, 395	707, 388	662, 373	734, 024
Sulfuric acid, gross (100% H ₂ SO ₄) ¹³	do.....	10, 780, 193	13, 029, 359	13, 372, 300	13, 308, 558	14, 187, 830
Zinc yellow (zinc chromate) (C. P.).....	do.....	3, 476	4, 665	8, 143	7, 894	6, 842

¹ Preliminary.

² Excludes byproduct coke-oven production. Data for 1950-1953 include synthetic ammonium sulfate produced in coke plants.

³ Includes data for deodorizing, decolorizing, and water purification grades. Data for gas-mask and solvent recovery grades excluded.

⁴ Liquid and gas excludes quantities produced and consumed in the same plants manufacturing soda ash.

⁵ Total production including quantities liquefied for use, storage or shipment.

⁶ Excludes quantities produced and consumed in manufacture of methanol and ammonia but includes an unspecified amount of hydrogen produced for sale or interplant transfer to plants consuming this gas in production of ammonia.

⁷ Includes quantities diverted to manufacture of caustic soda and sodium bicarbonate and quantities processed to finished light and finished dense soda ash.

⁸ Excludes quantities converted to finished dense soda ash.

⁹ Collected in cooperation with Bureau of Mines.

¹⁰ Liquid production figures represent total production for each process, including quantities later evaporated to solid caustic and reported as such.

¹¹ Not available.

¹² Includes sulfuric acid of oleum grades.

¹ Represents type of high explosives approved by Bureau of Mines as suitable for safe use in coal mines provided specifications of use are followed.

² Includes 10,562,000 liquid oxygen explosive in 1947, 15,620,000 in 1948, 13,922,000 in 1949, 13,804,000 in 1950, 20,341,000 in 1951, and 21,915,000 in 1952.

³ Includes 20,268,000 liquid oxygen explosive in 1951, and 21,841,000 in 1952.

⁴ Includes 73,000 liquid oxygen explosive in 1951, and 74,000 in 1952.

¹ Annual capacity as of Jan. 1, 1953, was 117,547,470 tons.

² Includes all other grades not shown separately, as follows: 1890, 4,248 tons; 1900, 5,445 tons. Beginning 1935, figures include only that part of steel for castings which was made in foundries producing steel ingots.

³ Not available.

⁴ A average annual capacity as of Jan. 1 and July 1.

⁵ Included with electric steel.

Source: American Iron and Steel Institute, annual report.

No. 1018.—BLAST FURNACES AND STEEL WORKS AND ROLLING MILLS—SUMMARY: 1889 TO 1952

¹ Value of products less cost of materials, supplies, fuel, electric energy, and contract work. For 1889-1933, cost of contract work was not deducted.

² Not available.

³ Includes data for 5 establishments in 1937 and 2 in 1939 engaged in production of sintered ore and flue dust and operated independently of blast furnaces.

No. 1021.—IRON AND STEEL—AGGREGATE EXPORTS: 1890 TO 1953

[Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars. Covers products listed in table 1022; excludes data for highly elaborated products of iron and steel. Value figures through 1920 exclude, and those beginning 1923 include data for small items for which quantity figures are not available. Ferromanganese data included for all years. Data for steam and hot-water heating boilers and radiators, formerly classified as heavy iron and steel products, excluded beginning with 1923]

31. Distribution and Services

Including Advertising

The major source of distribution and services data is the Census of Business taken by the Bureau of the Census of the Department of Commerce. The first Census of Business was taken for 1929. Although the next census was scheduled by law to cover 1939, two special censuses covering 1933 and 1935 were taken before the census for 1939. Under the provisions of a law passed in 1948, the Census of Business is to be conducted at 5-year intervals. The first census under this act was taken in 1949 covering the year 1948. The Census scheduled to be conducted in 1954 covering the year 1953 was not taken.

The business establishments covered in the fields included in the Census of Business may be generally described as follows:

Retail trade.—Places of business primarily engaged in selling merchandise for personal, household, or farm consumption;

Wholesale trade.—Establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business uses; and

Service.—Establishments engaged primarily in the sale of services as contrasted with the sale of merchandise.

Certain types of businesses, broadly defined, are not included in any Census of Business. Outstanding in this group are the business activities of doctors, lawyers, dentists, and others performing a professional or scientific service, educational institutions, religious or charitable institutions, hospitals and infirmaries, public utilities, and government-operated enterprises. These types of economic activity are omitted largely because of problems in obtaining information or because reasonably adequate data are available from other sources.

Many of the tables shown in this section contain comparative data from the various Censuses of Business. Adjustments have been made in the figures to make allowances for the changes in scope among the various years compared.

Retail trade.—Annual data on retail trade are compiled and published by the Bureau of the Census in the *Annual Retail Trade Report*. This report includes figures showing sales, inventories, and receivables for retail stores classified by kind of business. The same agency compiles and publishes the *Monthly Retail Trade Report* which presents dollar volume estimates of monthly retail sales classified by kind of business. Monthly estimates of dollar volume of retail sales for the United States are also published in the *Survey of Current Business*, issued by the Office of Business Economics of the Department of Commerce. The *Advance Retail Sales Report* issued jointly by the Bureau of the Census and the Office of Business Economics within 10 days after the end of each report month also presents "flash" estimates of the previous month's retail sales classified by major kind-of-business groups. All of the data shown in these various reports are derived from information collected from a sample of retail stores.

Note.—This section presents data for the most recent year or period available on May 28, 1954, when the material was organized and sent to the printer.

Indexes of department store sales and stocks are compiled by the Board of Governors of the Federal Reserve System and by each of the 12 Federal Reserve Banks for its district. These indexes are published monthly in the *Federal Reserve Bulletin* and also in the *Survey of Current Business*. Monthly and annual statistics on consumer credit are compiled by the Board of Governors of the Federal Reserve System and published currently in the *Federal Reserve Bulletin*. Financial data for corporations engaged in retail trade and filing income tax returns are published by the Internal Revenue Service in its annual report, *Statistics of Income*. Financial statistics on corporations engaged in retail trade whose securities are listed on the national securities exchanges are available from the Securities and Exchange Commission.

Wholesale trade.—Monthly statistics on trends in sales and inventories of merchant wholesalers, by kinds of business and by geographic divisions, are compiled and published by the Bureau of the Census. These data are based on the reports of approximately 4,000 establishments. Using these survey data as a basis, monthly estimates of aggregate sales of wholesalers raised to national totals are prepared by the Office of Business Economics and published in the *Survey of Current Business*.

Financial statistics relating to corporations in wholesale trade are available from the annual report, *Statistics of Income*, published by the Internal Revenue Service.

Current data on the production, movement, stocks, carry-over, receipts, and disappearances at principal markets, etc., for major agricultural commodities are available from the Agricultural Marketing Service, Department of Agriculture.

As part of its investigations, the Federal Trade Commission has collected operating statistics on wholesalers as well as on the wholesale business of chains in various lines. Financial statistics on corporations engaged in wholesale trade whose securities are listed on the national securities exchanges are available from the Securities and Exchange Commission.

Service trades.—Typical of the numerous current statistical reports on personal and business services compiled by private agencies are the *Horwath Hotel Accountant*, *Printers' Ink*, and *National Advertising Records*. Financial statistics of service businesses derived from corporation income tax returns are compiled and published annually by the Internal Revenue Service in its annual report, *Statistics of Income*. Current data on service trades are provided by the Office of Business Economics in its quarterly and annual estimates of consumption expenditures published in the *Survey of Current Business*.

Advertising.—Statistics shown here on advertising expenditures are compiled by private organizations. McCann-Erickson, Inc., which compiles certain of the data shown on advertising expenditures, defines national advertising as that advertising done for companies whose products are distributed nationally, and for which national media rates are paid. Local advertising is defined as advertising done for companies which market their products locally and may pay special "local" media rates. Monthly figures are published regularly in *Printers' Ink*, in *Tide Magazine*, and also in the Department of Commerce *Survey of Current Business*.

¹ New series not comparable to prior years due to change in methodology used to compute retail store sales and inventory estimates; see *Survey of Current Business*, September and November 1952.

² Sales of other durable goods stores, other food stores, and other nondurable goods stores not shown separately but included in totals.

³ Includes sales of certain milk dealers in the amount of \$130,000,000, not included in tables 1044 and 1048. Data for these concerns were received too late for inclusion in summary tables for 1929.

⁴ Not available.

⁵ Much of increase in sales from 1929 to 1939 results from change in classification. Garages primarily selling gasoline and oil were classified separately as garages in 1929 Census of Retail Trade and included in filling station category in 1939 Census of Retail Trade.

Source: Department of Commerce, Office of Business Economics and Bureau of the Census; published currently in *Survey of Current Business*.

No. 1060.—POWER LAUNDRIES, CLEANING AND DYEING ESTABLISHMENTS, AND RUG CLEANING ESTABLISHMENTS—SUMMARY: 1919 TO 1948

[All money figures in thousands of dollars. Statistics for 1948 cover establishments reporting receipts of \$500 or more; statistics for 1939 cover establishments reporting receipts of \$100 or more; for preceding specified census years statistics cover establishments reporting receipts of \$5,000 or more. The Business Censuses of 1948 and 1939 classified establishments shown in this table as service establishments. (See also table 1056.) Statistics for 1935 and earlier years were compiled in connection with the Census of Manufactures. Rug cleaning was treated, in general, as an activity of the power laundry industry for 1929 and earlier years.]

YEAR	Number of establishments	Proprietors and firm members	Salaried employees	Wage earners ¹ (average for year)	Salaries ¹	Wages ¹	Cost of supplies, fuel, and purchased electric energy	Cost of contract work	Receipts for work done

32. Foreign Commerce

Including International Accounts and Aid

Balance of payments.—The statistics shown for international balance of payments and the international investment position are compiled in the Balance of Payments Division, Office of Business Economics of the Department of Commerce.

The international accounts of the United States comprise the international balance of payments (tables 1069 and 1071-1073) and the international investment position (table 1070). The balance of payments shows for given time periods, e. g., one year, the transfers of assets and the form of compensation for these transfers between this country and the rest of the world; the international investment position indicates for specific dates the value of United States investments abroad and of foreign investments in the United States. The two types of accounts, however, are not strictly comparable; the transfers of assets between countries as shown in the balance of payments is only one of the factors affecting the value of foreign investments. Other factors not shown in the balance of payments are changes in security values and revaluation of assets, and reinvested earnings and losses. For a detailed discussion and analysis of these accounts, see the Department of Commerce publications, *International Transactions of the United States During the War, 1940-45, Economic Series No. 65*, 1948, *The Balance of International Payments of the United States, 1946-48, 1949*, and *Balance of Payments of the United States, 1949-51*, a supplement to the *Survey of Current Business*, published in 1952. For current data and revisions, see the monthly *Survey of Current Business*.

Foreign assistance.—Statistics on United States Government grants to and credits utilized by foreign countries and reverse grants and credit repayments received by the Government from abroad are prepared by the Balance of Payments Division, Office of Business Economics. These data are obtained from Federal agencies. For detailed information on the statistics provided in tables 1074 and 1075, and on other foreign activities of the Government, see the Department of Commerce publication, *Foreign Aid by the United States Government, 1940-51*, a supplement to the *Survey of Current Business*, published in 1952. For current data and revisions, see the regular quarterly reports on *Foreign Grants and Credits by the United States Government*.

Foreign aid is defined to comprise two categories—grants and credits. Grants are largely outright gifts for which no payment is expected, or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. Credits are loans or other agreements which give rise to specific obligations to repay or return, over a period of years, usually with interest. In some instances assistance has been given with the understanding that a decision as to repayment will be made at a later date; such assistance is included in grants. At such time as an agreement is reached for repayment over a period of years, a credit is established. Such credits cannot, as a rule, be deducted from specific grants recorded in previous periods; an adjustment for grants converted into credits is made at the time of the agreement. All known returns to the United States Government stemming from grants and credits are also taken into account in net grants and net credits. The Government's capital investments in the International Bank (\$635 million) and International Monetary Fund (\$2,750 million) are not included in these data although they constitute an additional measure taken by this Government to promote foreign economic recovery. Payments to these international financial institutions do not result in immediate equivalent aid to foreign countries. Use of available dollar funds is largely determined by the managements of the two institutions, subject to certain restraints which can be exercised by the United States Government.

Note.—This section presents data for the most recent year or period available on May 28, 1954, when the material was organized and sent to the printer.

The major activities of the Foreign Operations Administration are summarized in tables 1076-1079, prepared by the Division of Statistics and Reports of that agency. In these tables, colonies and overseas territories of European countries are reported with mother countries; the Saar is shown with France. Commodity groups shown are based on the Foreign Operations Administration commodity classification. In determining the various reporting groups, an attempt has been made to align the coverage of the summary groups shown in these tables as closely as possible with that of reports on United States exports originating in the Bureau of the Census.

These and other data are published in more detail in the several monthly publications of the Division of Statistics and Reports of the Foreign Operations Administration.

Foreign trade.—Statistics on foreign trade are compiled by the Bureau of the Census of the Department of Commerce. Annual and cumulative quarterly data are published in the *Summary of Foreign Commerce of the United States*, issued quarterly; and in *Foreign Commerce and Navigation of the United States*, published annually through 1946. Monthly statistics are also published in other reports of the foreign trade series. For a complete list of these reports see *Catalog of United States Foreign Trade Statistical Publications* issued by the Bureau of the Census.

Statistics covering shipments made after World War II under the Department of the Army Civilian Supply Program are included in the export statistics for 1948 and subsequent years but not for earlier years. In addition, export data include United States exports under the Lend-Lease, United Nations Relief and Rehabilitation Administration, Economic Cooperation Administration, Mutual Defense Assistance, and other foreign aid programs. Shipments to United States armed forces for their own use are not included in export statistics for any period.

Certain commodity classifications in the export statistics were grouped for security reasons into special categories beginning with May 1949 and data for the individual commodities withheld from publication. The special category list of commodities was amended in July 1949, July 1950, and January 1951 to include additional commodities. With the adoption of new security regulations, effective July 1950, the publication of the country of destination and Customs District detail for the special category commodities and groups were discontinued. Data for special commodities are included, however, in all total export statistics issued by the Bureau of the Census.

Effective with the statistics for July 1953, values for export shipments individually valued from \$100 to \$499 (about 4 to 6 percent of the total export value) are estimated on the basis of a 10 percent sample of such shipments. The variability in the 1953 export totals shown in this volume due to sampling is less than 5 percent of the individual totals, or less than \$3,300 except where noted. Explanations of the sampling procedures are given in the *Quarterly Summary of Foreign Commerce of the United States*, beginning with the third quarter of 1953.

Except as noted (as, for example, in table 1100) the values stated are in United States dollars without reference to changes in the gold content of the dollar. (The statutory price of gold—\$20.67 per ounce—in effect prior to Jan. 31, 1934, was changed on that date by Executive Order to \$35 per ounce. Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of the restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and from Jan. 1, 1935, through Dec. 31, 1939, the Virgin Islands. Other explanations of the trade tables are given in the introduction to *Foreign Commerce and Navigation of the United States*.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series M 14-41") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 1074.—U. S. GOVERNMENT FOREIGN GRANTS AND CREDITS, BY PROGRAM, POSTWAR TO 1953

[In millions of dollars. The measure of foreign grants and credits generally is in terms of goods delivered or shipped by the United States Government, services rendered by the United States Government, or funds disbursed by the United States Government to or for the account of a foreign government or other foreign entity. "Reverse grants and returns" and "Principal collected on credits" are comprised of goods, services, and funds received by the United States Government. "Funds" includes foreign currency which, with goods and services, is measured in dollar equivalents]

PROGRAM	Total post-war period ¹	July 1945-Dec. 1946	1947	1948	1949	1950	1951	1952	1953

¹ July 1, 1945, through Dec. 31, 1953. All lend-lease and credit-agreement offsets to grants are from V-J Day (Sept. 2, 1945). ² Negative entry of less than \$500,000 results from refunds of cash aid. ³ Less than \$500,000.

These "loans" are essentially transfers on an indeterminate basis, generally requiring only the return of the identical item, if available. In essence, this was the requirement pertaining to wartime lend-lease transfers of watercraft, which were included as grant transfers in these data.

⁴ Outstanding credits on Dec. 31, 1953, totaled \$11,904 million, representing net credits extended since organization of Export-Import Bank, Feb. 12, 1934, and excluding World War I debts and U. S. Government investment in International Bank for Reconstruction and Development and International Monetary Fund.

⁵ Negative entry results from excess of Bank repurchases from agent banks over agent-bank disbursements.

¹ Excludes \$2,566 thousand authorized and \$2,565 thousand expended under Joint U. S. Military Assistance Group (JUSMAG).

² For United States Public Health Service and Emergency Procurement Service, not assignable by country.

³ Includes \$228 thousand authorized and \$8 thousand expended for Regional Accounts.

⁴ Includes \$7,042 thousand authorized and \$3,700 thousand expended under the Technical Cooperation Program for Burma and Indonesian Republic (GSA) not available by individual country.

⁵ FOA expenditures supplemented by movement reports from U. S. Government agencies. Total paid shipments are less than actual movements because of the time required for receipt and processing of documents requesting payment.

¹ Includes beverages.

² Corrected figures. These figures have been erroneously identified as for 1821 in earlier issues of *Statistical Abstract* and in source publications.

³ Period July 1, 1916, to Dec. 31, 1920.

⁴ For security reasons, a small amount of semimanufactures included with finished manufactures for 1950 and subsequent years.

⁵ "General imports" through 1932, "imports for consumption" thereafter.

Source: Department of Commerce, Bureau of the Census; *Foreign Commerce and Navigation of the United States*, and records.

No. 1090.—EXPORTS OF U. S. MERCHANDISE AND IMPORTS—INDEXES OF QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE: 1913 TO 1953

[1923-25 average=100. Quantity and unit value indexes have been constructed by so-called "ideal formula," essential feature of which is use of quantities of several articles as weighting factors of their unit values for each pair of years compared. About 265 commodities were included in direct calculations for both exports and imports. It was then assumed that prices of articles in each economic class not directly covered had moved in parallel with those of articles covered and their value, adjusted by computed price index, was included in aggregative totals from which quantity index for each class was calculated. Index of quantity and unit value of total exports and imports was based on aggregate of adjusted totals of classes. In constructing indexes, data for 1919 were linked directly to 1913, and each subsequent year was compared with that preceding. Resulting year-to-year percentages were made into a series by chain method]

¹ Includes margarine of vegetable origin through 1948. Excludes inedible fish oils. Excludes "lard compounds" beginning 1921; now classified as "vegetable cooking fats." ² Includes fruit and nut preparations.

³ Natural and synthetic rubber. ⁴ Average for period July 1, 1915, to Dec. 31, 1920.

⁵ Includes semimanufactures. ⁶ Average for 1906-10.

⁷ Box, crate and package shooks (except fruit and vegetable) included with "Other wood manufactures" beginning 1949; classified as "Sawmill products" in prior years.

⁸ Exclusive of machinery and vehicles manufactured to military specifications beginning July 1949.

⁹ Includes a small amount of nonferrous metal articles.

Source: Department of Commerce, Bureau of the Census; *Foreign Commerce and Navigation of the United States*, and records.

No. 1094.—IMPORTS—VALUE OF SELECTED COMMODITIES: 1821 TO 1953

[In thousands of dollars. For basis of dollar values, see text, p. 893. Figures represent "general imports" through 1932, "imports for consumption" thereafter. Figures cover fiscal years ending Sept. 30 through 1840, and June 30, 1850 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately]

No. 1095.—EXPORTS AND IMPORTS OF MERCHANDISE, PER CAPITA: 1791 TO 1953

[Export figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only. Import figures for 1791 to 1820 are based on general imports; for 1821 to 1870, total imports less reexports; and for 1871 to date, imports for consumption. (See tables 1082 and 1101)]

No. 1097.—EXPORTS (INCLUDING REEXPORTS) AND GENERAL IMPORTS OF MERCHANDISE, BY CONTINENTS: 1821 TO 1953

[In thousands of dollars. For basis of dollar values, see text, p. 893. Figures cover fiscal years to and including 1915; calendar years thereafter, except as noted. Philippine Islands included with Asia for all years; Turkey in Europe is with Asia from 1926 through 1951 and with Europe thereafter; U. S. S. R. in Asia is with Europe beginning 1924; and Hawaiian Island with Oceania prior to 1901. See also *Historical Statistics*, series M 87-102]

¹ Customs district data exclude certain commodity shipments under security regulations.

² As reported to Treasury Department by collectors of customs, subject in certain cases to subsequent refund as well as drawback. These figures are somewhat higher than duties as calculated on basis of imports for consumption (see table 1101).

³ Includes \$7,434,703,000 in 1950, \$1,556,192,000 in 1951, and \$2,003,458,000 in 1952, not shown by districts.

⁴ Data not individually reported.

⁵ Less than \$600.

⁶ Excluded from totals; not part of U. S. customs area, assessed under tariff law of Virgin Islands.

⁷ Export shipments individually valued under \$100.

No. 1100.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE,
BY PRINCIPAL CUSTOMS DISTRICTS: 1860 TO 1953

[In thousands of dollars. For basis of dollar values, except export figures for 1870-78, see text, p. 893. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1915; thereafter, calendar years. Import data are "general imports" through 1933; "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively]

No. 1101.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON: 1821 TO 1953

[For basis of dollar values, see text, p. 893. From 1821 to 1866, inclusive, figures of import values represent total imports less reexports, and for 1867 and later years imports entered for consumption. "Ratio of duties to total" is based upon values of imports shown in table. Figures cover fiscal years ending Sept. 30, 1821 to 1842, and June 30, 1843 to 1915; calendar years thereafter. See also *Historical Statistics*, series M 65-74]

No. 1103.—IMPORTS OF MERCHANDISE, FREE AND DUTIABLE, AND PERCENT FREE, BY ECONOMIC CLASSES: 1821 TO 1953

[In thousands of dollars. For basis of dollar values, see text, p. 803. Figures cover fiscal years ending Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter, except as noted. Data are "general imports" through 1933; "imports for consumption" beginning 1934. Percentage free in general imports is normally slightly lower than in imports for consumption because relatively more of dutiable general imports are reported as reexported than of free general imports. Moreover, in the period 1922-1933, there is an understatement of free goods in general imports because, for 1922 to 1933, carpet wool used for making carpets and, for 1922 to 1928, wheat imported for milling in bond for exports were reported as dutiable when entered, although no duty was ultimately paid on these products. For adjusted figures see table 402 of 1935 issue of *Statistical Abstract*. See also *Historical Statistics*, series M 75-86]

33. Territories, Possessions, and Other Areas Under the Jurisdiction of the United States

Statistics in this section are presented for the two territories, Alaska and Hawaii; the four principal possessions, Puerto Rico (a commonwealth), Virgin Islands, Guam, and American Samoa; and the Canal Zone. The circumstances under which the Territories, possessions, and other areas were acquired by or came under the jurisdiction of the United States are as follows:

Alaska.—Alaska was acquired by purchase from Russia in 1867 and was organized as a Territory in 1912.

Hawaii.—Hawaii, by voluntary action of its people, ceded its sovereignty to the United States in 1898 and was organized as a Territory on June 14, 1900.

Puerto Rico.—The island of Puerto Rico was formally surrendered by Spain to the United States in October 1898, and was ceded to the United States, together with a few adjacent islands, by the Treaty of Paris, signed December 10, 1898, and ratified in the following year. Puerto Rico acquired the status of a commonwealth on July 25, 1952.

Virgin Islands of the United States.—The Virgin Islands, formerly known as the Danish West Indies, were acquired by the United States by purchase from Denmark in 1917, the formal transfer of possession having taken place on March 31 of that year.

Guam.—The island of Guam was ceded by Spain to the United States under the terms of the Treaty of Paris, signed December 10, 1898, and ratified in the following year.

American Samoa.—American Samoa was acquired by the United States in accordance with a convention between the United States, Great Britain, and Germany, signed December 2, 1899, ratified February 16, 1900, and proclaimed by the President of the United States on the latter date.

Canal Zone.—The use, occupation, and control of the Canal Zone were granted to the United States under the terms of a treaty with the Republic of Panama, signed November 18, 1903, and ratified in the following year.

Trust Territory of the Pacific Islands.—The United States became the administering authority over the Trust Territory of the Pacific Islands (which comprises the Caroline, Marshall, and Marianas Islands except Guam) under an agreement approved by the Security Council of the United Nations on April 2, 1947, and by the United States Government on July 18, 1947.

For a brief summary of the territorial development of the United States, see tables 1 and 3, in section 1.

Material in other sections.—In addition to the statistics presented in this section there are a number of tables on Territories and possessions appearing in other sections of this volume. Thus, statistics on the Alaska Railroad are presented in section 21, Transportation, Air and Land; statistics on cane sugar production in Hawaii and Puerto Rico are given in section 25, Agriculture—Production and Related Subjects; lumber and shingle production for Alaska are given in section 26, Forests and Forest Products; and data on the Panama Canal are presented in section 22, Waterways, Water Traffic, and Shipping. In addition, other data are included as integral parts of several State tables in various sections of the volume.

Note.—This section presents data for the most recent year or period available on May 28, 1954, when the material was organized and sent to the printer.

Population, Housing, and Agriculture.—Due to the difference in the population and housing characteristics and the variation in agriculture products between the Territories and possessions, the collection and presentation of data from the 1950 Censuses varies slightly between areas. The tables in this section attempt to take into account these differences and give, as nearly as possible, comparable data between the areas. For definition and explanation of terms see section 1, Area and Population; section 29, Construction and Housing; section 24, Agriculture—General Statistics; and section 25, Agriculture—Production and Related Subjects. However, for detailed treatment of the Territories and possessions, see the original sources.

Commerce.—Statistics on commerce are published by the Bureau of the Census in the *Quarterly Summary of Foreign Commerce of the United States*. The tables in this section present the total foreign trade of each of the U. S. Territories and possessions; figures on trade with the United States separately are also presented for certain of the possessions. The trade with foreign countries represents exports and imports through the respective territorial Customs Districts and does not necessarily represent exports of commodities originating within the designated territory nor imports for direct consumption within the territory. For basis of dollar values, see text, p. 894.

In section 32, Foreign Commerce, the Virgin Islands is treated as a foreign country prior to 1935. On the other hand, Alaska, Hawaii, and Puerto Rico, and for 1935-39, the Virgin Islands, are treated as integral parts of the United States. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and the United States are included in the general tables on foreign trade.

No. 1105.—POPULATION AND CHARACTERISTICS—SUMMARY FOR ALASKA, HAWAII, PUERTO RICO, VIRGIN ISLANDS, GUAM, AMERICAN SAMOA, AND CANAL ZONE: 1930 TO 1950—Continued

ITEM	Alaska	Hawaii	Puerto Rico	Virgin Islands	Guam	American Samoa	Canal Zone
SCHOOL ENROLLMENT, 1950							
Persons enrolled in school, 5 to 29 years old.....	18,617	100,970	416,206	7,034	(7)	(7)	(7)
5 and 6 years.....	1,260	8,170	10,435	959	238	380	733
7 to 13 years.....	11,122	59,185	279,019	4,288	5,779	3,065	5,094
14 to 17 years.....	4,531	20,500	84,685	1,485	2,567	1,388	1,998
18 and 19 years.....	760	7,050	18,051	201	4	448	617
20 to 24 years.....	598	4,310	13,373	61	0	376	280
25 to 29 years.....	247	1,755	10,643	40	(7)	(7)	(7)
YEARS OF SCHOOL COMPLETED BY PERSONS 25 YEARS OLD AND OVER, 1950							
Total persons, 25 years old and over.....	66,576	247,480	842,266	12,296	24,853	6,383	26,893
Years of school completed:							
None: Male.....	2,293	16,460	120,340	378	966	504	351
Female.....	1,989	9,725	160,345	353	850	874	186
1 to 4 years:							
Male.....	2,681	20,940	140,332	1,286	3,102	613	1,113
Female.....	1,632	11,945	125,439	1,416	2,378	831	823
5 to 8 years:							
Male.....	11,023	38,595	106,502	2,832	4,387	1,684	5,297
Female.....	4,637	33,210	88,558	3,465	1,502	1,207	3,955
High school: ¹⁴							
Male.....	16,099	47,845	42,082	808	6,248	185	5,197
Female.....	10,687	37,065	27,757	788	1,893	65	4,154
College or more: ¹⁴							
Male.....	7,526	14,270	15,405	348	2,172	101	2,849
Female.....	5,541	13,515	13,198	248	1,084	48	2,053
Median school years completed.....	11.3	8.7	3.7	6.2	8.4	5.3	9.9

¹ Data for married couples, income of families and unrelated individuals, school enrollment and years of school completed based on 20-percent sample.

² Censuses taken in 1929 and 1939.

³ Includes population (36 in 1930; 560 in 1949) for areas enumerated with, but which do not form part of Territory of Hawaii. ⁴ Per 100 square miles.

⁵ Urban population is that living in cities, towns, or villages of 2,500 or more. The remainder is classified as rural.

⁶ Includes consensually married. ⁷ Not available.

⁸ Worked as civilians in 1949.

⁹ For Hawaii, income is for families and unrelated individuals.

¹⁰ Includes 17,989 persons with no income.

¹¹ Includes 641,508 persons with no income.

¹² Includes 6,257 persons with no income.

¹³ Median computed on basis of those persons reporting income greater than zero, excludes those reporting no income.

¹⁴ Represents persons completing 1 or more years.

¹ Retabulated to provide industry statistics comparable with those for 1949.

² Computed by subtracting costs of materials and supplies, fuels, electric energy, and contract work from value of products.

³ Includes data for industry groups not shown separately (to avoid disclosing operations of individual companies) as follows: Rubber, primary metal industries, electrical machinery, and transportation equipment, 1 establishment each; and for instruments and related products, 2 establishments.

⁴ Comparable statistics for 1939 not available. Figures for 1949 include statistics for activities of (1) coffee roasting and grinding and (2) tobacco stemming and redrying, which were classified as manufacturing in 1949 but considered nonmanufacturing in 1939.

⁵ This figure may include an undetermined amount of excise taxes.

⁶ Also includes shortening, cooking oils, and flavorings.

⁷ Also includes fabric and combination dress and work gloves.

⁸ Also includes sporting and athletic goods, hand stamps and stencils, needles, pins, and fasteners, plastic products, brooms and brushes, matches, and hair work.

⁹ Withheld to avoid disclosing figures for individual companies.

No. 1117.—ALASKA AND HAWAII—SUMMARY OF MANUFACTURES: 1899 TO 1939

[Figures for 1939 do not include data for plants reporting products valued at less than \$2,000; those for earlier years cover all plants having products valued at \$500 or more. This increase in minimum value-of-products limit resulted in some reduction in "Number of establishments" reported as compared with what it would have been had minimum of \$500 been retained, but did not seriously impair comparability of figures for 1939 with those for earlier years]

INDUSTRY	Census year	Number of establishments	Wage earners (average for the year)	Wages	Cost of materials, etc., fuel, electric energy	Value of products	Value added by manufacture ¹
Alaska, all industries -----	1899	48	2,260	\$1,374,680	\$1,762,583	\$4,194,421	\$2,431,838
	1909	162	3,099	1,948,026	5,119,613	11,340,105	6,220,492

	1939	474	17,002	11,458,311	75,651,675	134,005,264	58,353,689

¹ Value of products less cost of materials, etc., fuel, and purchased electric energy.

² Figures for 1939 cover the 12-month period ended Sept. 30, 1939.

³ Includes data for coffee roasting and spice grinding which are no longer treated as manufacturing activities.

34. Comparative International Statistics

The statistics of the various individual nations may be found primarily in the official publications or compendia, generally in the form of Yearbooks, issued by most of the nations at various intervals in their own national languages, expressed in their customary national units of measurement. For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles and issues a number of international summary publications, generally in English and French. Among these, the *Statistical Yearbook*, the *Demographic Yearbook*, and the *Monthly Bulletin of Statistics* may be most helpful for both general and special users. The Statistical Office of the United Nations also publishes a *Yearbook of International Trade Statistics* and the *National Income Statistics of Various Countries*. For international agricultural statistics, the outstanding source is the *Yearbook of Food and Agricultural Statistics* which is published by the Food and Agriculture Organization of the United Nations. These publications usually present data covering an extensive period of time, frequently up to 20 years.

The information shown in this section was obtained almost entirely from the *Statistical Yearbook, 1953*, a United Nations publication, prepared by the Statistical Office of the United Nations. To facilitate comparison in terms of familiar units, items shown in metric units in the source have been converted to U. S. equivalents by means of the conversion factors given in the *Statistical Yearbook* (see table of conversion factors, p. 954).

Countries and items shown.—Problems of space and availability (or nonavailability) of data are restrictive factors in this presentation of statistics for the various nations.

In particular, the space problem makes it necessary to limit the number of countries for which statistics are shown on a somewhat arbitrary basis. The list of countries included is based on the membership rosters of the United Nations and of the larger specialized agencies affiliated with the United Nations (see table 1133). In a few instances, such member countries were omitted because of an almost complete lack of data. Data for the Union of Soviet Socialist Republics have been included for those few items for which they were available. For the most part, however, official data for the U. S. S. R. have not been released since the prewar period.

Statistics are shown for a standardized list of countries. No attempt was made to vary the list according to the relative standing or significance of each country with respect to each specific subject item shown. In consequence, there may be instances, with respect to certain subject items shown, in which one or more of the countries omitted from the list are more important, statistically, than some of the countries included. However, cases of this kind are not believed to be numerous.

A high degree of selection also was necessary with respect to subject items included. The items shown here are believed to be among those more significant in reflecting the demography and the agricultural, industrial, and social structure of a country.

Certain subject materials of basic import, such as those on national income, are omitted because of the inability to convert the available statistics, stated in terms of the national currencies, to meaningful consistency in United States measures. Finally, items for which figures are available for a large number of countries were favored over items for which information is scanty in order to broaden the scope of comparison as much as possible.

Note.—This section presents data for the most recent year or period available on June 3, 1954, when the material was organized and sent to the printer.

Quality and comparability of the data.—The quality and the comparability of the data presented here are affected by a number of factors which should be kept in mind:

(1) The data shown are for the latest year available for each country; the latest year, however, may vary from item to item for a particular country and within items for different countries. All such variations have been noted (see table headnotes) and should be taken into account. In most instances, the data shown are for calendar years. In a number of instances, however, the 12-month totals shown do not correspond with the calendar year. Problems of space unfortunately made it impracticable to present the data for a series of years except for the figures on population and agriculture.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary from item to item within a particular country and within items for different countries. Footnotes and headnotes to the tables give some measure of the qualifications and differences attached to the figures. Again, the compelling limits of space made necessary some condensation and editing of the more detailed notes appearing in the source. The user is, therefore, cautioned to proceed with care in analysis and comparison, since, at best, many of the measures shown are merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Such differences may be attributable to the use of differing original sources, a difference in the definition of geographic limits (continental United States only, or including certain territories and possessions), or to possible adjustments made in the United States figures by the United Nations in order to improve their comparability with figures from other countries.

Because of the many difficult problems inherent in bringing together summary statistics in this fashion, those readers who are interested in detailed comparisons should consult the publications of the United Nations mentioned above.

CONVERSION FACTORS

<i>Metric units</i>	<i>U. S. equivalents</i>
1 km.....	0.621370 mile

No. 1123.—POPULATION AND AREA

[For many countries, figures are provisional. Basis and level of reliability of population estimates range from use of a continuous population register (Scandinavian countries) and census enumerations for a recent date (most countries) to "counting procedures not comparable with a census" (China, Lebanon, Syria) and "conjectural estimates derived by other means than counting" (Ethiopia, Afghanistan). Data, in general, refer to midyear present-in-area population of the present territory. Area generally includes inland waters. See text p. 954, for general comments concerning quality of the data]

No. 1124.—VITAL STATISTICS AND NET FOOD SUPPLY

[Crude birth rates, infant mortality rates, and death rates derived from data having complete or virtually complete coverage for many countries and incomplete coverage for others. Crude birth rate: Number of live births per 1,000 persons. Crude death rate: Number of deaths, exclusive of stillbirths, per 1,000 persons. Infant mortality rate: Deaths of infants under 1 year of age per 1,000 live births. Data exclude stillbirths. Expectation of life: Average future lifetime (in years) of persons at birth, if subject to mortality conditions of period indicated. Net food supply: Net supply of foodstuffs, other than alcoholic beverages, at retail level, available within the country for human consumption. See text, p. 954, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are not for the year shown in the "Year" column are prefixed by a letter to indicate the year represented as follows: a represents 1951; b, 1950; c, 1949; d, 1948; e, 1947; f, 1946; g, 1945; h, 1944; i, 1943; j, 1942; k, 1941; l, 1940]

Uruguay	1949	^h 20.7	7.8	^h 65.7				1951	3,070
Venezuela	1952	²⁸ 43.7	²⁸ 10.8	²⁸ 79.4				1951	2,240
Yugoslavia	1952	29.7	11.8	105.3					

¹ Diagonal indicates 12-month period beginning in one calendar year, ending in the following.

² Excludes armed forces outside country.

³ White population only. Data for nonwhite population are as follows: 1949, male 58.6 years, female 62.9 years; 1950, male 59.2 years, female 63.2 years.

⁴ Excludes deaths in area of war operations.

⁵ Excludes infants dying before registration of birth.

⁶ Excludes aborigines.

⁷ Luxembourg included with Belgium.

⁸ Data refer to Federal District and 13 cities.

⁹ Excludes Southern Dobruja.

¹⁰ Excludes Yukon, Northwest Territories, and (prior to 1950) Newfoundland.

¹¹ Taiwan (Formosa).

¹² Excludes tribal aborigines and resident foreigners.

¹³ Data represent baptism records.

¹⁴ Statistics of burial permits.

¹⁵ Excludes live-born infants dying within 24 hours of birth.

¹⁶ Excludes Faeroe Islands.

¹⁷ Data relate to Finnish nationals in Finland.

¹⁸ Excludes war losses.

¹⁹ Department of Guatemala only.

²⁰ Registration area.

²¹ Pre-partition India; includes Burma.

²² Indonesian population; Java and Madura only.

²³ Europeans only.

²⁴ Jewish population only.

²⁵ Japanese nationals only.

²⁶ April 1949 to March 1950.

²⁷ Excludes Maoris.

²⁸ Excludes tribal Indians.

²⁹ Excludes jungle population.

³⁰ European part only; probably territory as of period specified.

³¹ England and Wales only.

Yugoslavia	1952			128	121	97	77			387
World total	1952			119	128					

¹ Computed by U. N. Food and Agriculture Organization. 1934-1938=100, except as follows: Western Germany and Greece, 1935-1938; Spain, 1931-1935; Australia, 1936-1939; and Canada, New Zealand, Union of South Africa, the United States, and the South American countries, 1935-1939. Refers to crop year, beginning in year indicated, except as noted.

² Refers, in general, to wage earners in manufacturing (excluding public utilities, building, and other construction).

³ In many instances, represents index only for principal city (or cities) of particular country.

⁴ General wholesale price index numbers usually weighted by gross value of sales on wholesale markets.

⁵ Indexes based primarily on common shares traded on leading exchange or exchanges of each country, intended to cover representative sample of companies in manufacturing, mining, and construction fields, excluding wherever possible companies in public utilities, transportation, distribution, and finance fields.

⁶ Beginning 1951, base 1951=100.

⁷ Calendar year.

⁸ Includes salaried employees.

⁹ Includes manufacture of gas and electricity.

¹⁰ Home consumption of food, farm products, and industrial raw materials.

¹¹ Excludes magnesite.

¹² Excludes rent.

¹³ Luxembourg included with Belgium.

¹⁴ General industrial index; includes mining, electricity, and manufactured gas.

¹⁵ June.

¹⁶ December.

¹⁷ January-August.

¹⁸ Farm products.

¹⁹ Includes manufactured gas.

²⁰ Average, March, June, September.

²¹ Home consumed goods.

²² Taiwan (Formosa) only.

²³ Base: 1949=100.

²⁴ Base: June 15, 1949=100.

²⁵ Base: Sept. 1949=100.

²⁶ Retail price index of food.

²⁷ Includes public utilities.

²⁸ January-September.

²⁹ Includes direct taxes.

³⁰ Base: Aug. 1950-July 1951=100.

³¹ Weighted by value of exports.

³² Retail sales of cooperative societies only.

³³ Groceries only.

³⁴ Includes persons on strike or temporarily laid off.

³⁵ Industrial products only.

³⁶ Excludes lignite mining.

³⁷ General industrial index; includes electricity and manufactured gas.

³⁸ Base: 1950=100.

³⁹ Less than 12-month period.

⁴⁰ General industrial index; includes mining and manufactured gas.

⁴¹ Java and Madura.

⁴² Food only.

⁴³ Unweighted index of 44 imported items.

⁴⁴ General industrial index; includes mining.

⁴⁵ Includes working proprietors.

⁴⁶ Base: Dec. 1951=100.

⁴⁷ Base: Sept. 1951=100.

⁴⁸ Base: July 1950=100.

⁴⁹ Base: 1951=100.

⁵⁰ Department stores only.

⁵¹ Includes nonferrous metallurgy.

⁵² Food, clothing, coal, and soap.

⁵³ Coal mining only.

⁵⁴ January-May.

⁵⁵ Base: 1947=100.

⁵⁶ Includes mining.

⁵⁷ Food, beverages, and tobacco.

⁵⁸ Food, soap, kerosene, and cigarettes.

⁵⁹ Raw materials only.

⁶⁰ General industrial index; includes building, electricity, and manufactured gas.

⁶¹ Includes building.

⁶² Europeans only.

⁶³ Excludes open-cast mining.

⁶⁴ Excludes Northern Ireland.

⁶⁵ Base: Jan. 1952=100.

⁶⁶ Food, coal, and soap.

⁶⁷ Includes metallurgy.

⁶⁸ Base: Jan. 1951=100.

⁶⁹ Excludes U. S. S. R., Bulgaria, China, Czechoslovakia, Hungary, Poland, Romania, and Eastern Germany.

No. 1126.—NET GEOGRAPHICAL PRODUCT BY INDUSTRIAL ORIGIN (PERCENT DISTRIBUTION)

[Net geographical product relates to the product of all industry within a nation's boundaries; it is given in this table at factor cost, and therefore equals the sum of factor incomes (wages, rent, profits, interest) paid by industry. Exceptions are listed in the footnotes. Estimates are not fully uniform from country to country in items of income covered and industrial classifications used. Some of the major differences are indicated in footnotes below. In general, "Agriculture" includes also forestry, hunting and fishing; "Manufacturing and construction" includes mining; "Trade" covers wholesale and retail distribution; "Transport and communications" includes public utilities; "Government" includes administration, defense and public services, but not public enterprises, which are classified under relevant industry; category "All others" comprises finance, insurance, ownership of dwellings, and personal and other nongovernment services. See text, p. 954, for general comments concerning quality of the data]

No. 1128.—ENERGY, MANUFACTURING, IMPORTS, EXPORTS, AND GOLD HOLDINGS—
Continued

[See text, p. 954, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are not for the year shown in the "year" column are prefixed by a letter to indicate the year represented as follows: a represents 1951; b, 1950; c, 1949; d, 1948; e, 1947; f, 1946; g, 1945; h, 1944; i, 1943; j, 1942; k, 1941]

COUNTRY	Year	Production of electric energy ¹	Consumption of sources of energy (in terms of coal equivalent) ²	MANUFACTURING ³		Imports ⁴	Exports ⁶	Gold holdings ⁷
				Establishments ⁴	Persons employed, total ⁵			
		Million kwh	1,000 short tons	Number	Thousands	Million dollars	Million dollars	Million dollars
Turkey.....	1952	1,018	6,788	b ⁴⁵ 98,828	b ⁴⁶ 228	556	363	143
Union of South Africa.....	1952	12,533	33,231	b ⁴⁷ 12,890	b ⁴⁸ 777	1,170	941	170
United Kingdom.....	1952	63,895	200,045	b ⁴⁹ 55,143	b ⁵⁰ 6,883	9,346	7,228	1,846

Venezuela.....	1952	11 63 722	4,883			66 723	1,552	873
Yugoslavia.....	1952	2,700	7,009	c ⁵¹ 1,792	c ⁵² 378	373	247	
World total.....	1952	1,022,400	2,802,736			70 78,900	70 72,600	

¹ Includes utilities (publicly and privately owned) generating primarily for public use, plus industrial establishments generating primarily for own use. Data relate to production at generating centers and therefore include transmission losses.

² Refers to gross inland consumption of commercial fuels and water power. Fuel wood and other vegetal fuels and peat omitted for want of adequate data although believed to provide a major share of energy supply in all but a few countries.

³ Manufacturing relates to production (including repair work) in factories, and excludes mining, building and construction, and public utilities (gas, electricity and water supply).

⁴ In general, single plants or factories.

⁵ Includes wage earners and salaried employees and represents average number engaged on production (excluding sales and distribution staff). Salaried employees include working proprietors and directing, managing, clerical, and technical staff.

⁶ Figures expressed in United States dollars of gold content fixed on Jan. 31, 1934, and refer to merchandise, including silver, (except current silver coin), excluding gold and issued paper currency. Imports are generally valued c. i. f.; exports, f. o. b. Postal and governmental trade are generally included; war reparations and restitutions are generally excluded. Figures shown are not distinguished here as to "general trade" or "special trade." Roughly half the countries fall into each category; see source publication for distinction as to categories. Comparability between countries is undoubtedly affected by this distinction.

⁷ Refers to gross holdings of gold of central banks, treasuries, exchange stabilization funds, and other official institutions as of end of period indicated. Gold used in payment of subscriptions to International Monetary Fund or International Bank for Reconstruction and Development are not included. Gold holdings reported at 35 dollars per *sine troy* ounce. U. S. data refer to holdings of treasury, and gold in active portion of stabilization fund.

⁸ Includes distribution and construction employees on payrolls of manufacturing establishments; 4-month average. ⁹ Imports valued f. o. b.

¹⁰ Includes Alaska, Hawaii, and Puerto Rico.

¹¹ Public utility plants only.

¹² Establishments employing 4 or more persons or using mechanical power. ¹³ Excludes working proprietors.

¹⁴ Luxembourg included with Belgium.

¹⁵ Represents consumption in cities of Rio de Janeiro and São Paulo.

¹⁶ Establishments in 22 State capitals having annual sales of not less than 200,000 cruzeiros.

¹⁷ Factories employing 20 or more wage earners.

¹⁸ Includes Newfoundland.

¹⁹ Excludes small mint holdings.

²⁰ Plants under Government control only.

²¹ Establishments having a capital of 100,000 pesos or more or production exceeding 250,000 pesos.

²² Taiwan (Formosa) only. ²³ Includes foreign aid imports.

²⁴ Production by 3 principal enterprises.

²⁵ Establishments employing 6 or more wage earners and with products valued at 6,000 pesos or more during year.

²⁶ Establishments employing 6 or more wage earners. Excludes dairies and bacon factories, but includes their preserving and canning plants. Excludes home workers. ²⁷ June data. ²⁸ Includes Saar.

²⁹ Establishments employing 10 or more persons. Includes mining.

³⁰ Establishments employing 5 or more persons.

³¹ Consumption in main cities except Jaenel.

³² Establishments with 80.2 percent of all insured working weeks in manufacturing.

³³ Establishments employing 20 or more wage earners and using power.

³⁴ Excludes land trade. ³⁵ Represents consumption.

³⁶ Establishments employing 3 or more wage earners; excludes outside piece-workers. ³⁷ Represents sales.

³⁸ Includes British-U. S. Zone of Trieste.

³⁹ Privately owned establishments employing 4 or more persons. ⁴⁰ Includes public utilities.

⁴¹ Syria included with Lebanon. ⁴² Man-years.

⁴³ Establishments employing 2 or more persons or using mechanical power.

⁴⁴ Establishments whose wage earners were employed a total of 12,000 hours or more during the year.

⁴⁵ Cities of Panama and Colon.

⁴⁶ Excludes Canal Zone and national exports to the Zone. ⁴⁷ City of Asuncion.

⁴⁸ Represents consumption in cities of Lima and Callao. ⁴⁹ Establishments employing 8 or more persons.

⁵⁰ Establishments employing 5 or more wage earners; includes mining. ⁵¹ Excludes wheat milling industry.

⁵² Excludes wheat milling, cork, ceramic, and paper industries.

⁵³ Establishments employing 11 or more wage earners or having an installed capacity of more than 20 hp.

⁵⁴ Bangkok only.

⁵⁵ Excludes establishments in villages with 500 or less population.

⁵⁶ Includes Basutoland, Bechuanaland, Swaziland and South-West Africa.

⁵⁷ Establishments employing 3 or more persons, using any form of mechanical power or steam boilers.

⁵⁸ Authorized undertakings plus railway and transit authorities; excludes industrial generation for own use.

⁵⁹ Great Britain only.

⁶⁰ Establishments employing 11 or more persons covering approximately 90 percent of employment in all factory trades. Excludes Northern Ireland.

⁶¹ Includes sales and distribution staff.

⁶² Excludes silver; excludes reexports.

⁶³ Includes U. S. and Canadian dollar holdings of the Exchange Equalization Account.

⁶⁴ Represents distribution.

⁶⁵ State of Miranda and 24 principal enterprises in rest of country. ⁶⁶ Excludes parcel post and air trade.

⁶⁷ Establishments employing 20 or more wage earners or having an installed capacity of 20 hp. or more.

⁶⁸ Excludes U. S. S. R., China Mainland, and some small producers. ⁶⁹ Excludes U. S. S. R., China and Korea.

⁷⁰ Excludes Albania, Bulgaria, China Mainland, Czechoslovakia, Eastern Germany, Hungary, Poland, Romania, and the U. S. S. R.

¹ Excludes lignite and brown coal.

² Excludes natural gasoline and shale oil.

³ Covers, as far as possible, both natural and artificial (portland, etc.) cements.

⁴ Including manganiferous iron ores but excluding pyrites. Data are sometimes only rough estimates obtained by applying a fixed percentage to figures for production of crude ores.

⁵ Data expressed in terms of pure (monohydrate) sulfuric acid and include sulfuric acid equivalent of oleum or "fuming" sulfuric acid.

⁶ Total production of crude steel, both ingots and steel for castings.

⁷ Data represent apparent consumption (i. e., production plus imports minus exports) and do not take into account changes in stocks.

⁸ Excludes manganiferous iron ores.

⁹ Strength of acid not reported.

¹⁰ Ingots only.

¹¹ Luxembourg included with Belgium.

¹² Sold or used by producers.

¹³ Shipments. Includes Newfoundland.

¹⁴ Includes lignite.

¹⁵ Excludes Taiwan and Manchuria.

¹⁶ Taiwan (Formosa) only.

¹⁷ Represents estimated iron content of iron ore imports into Japan from China and of the small production of mines under Chinese control. Excludes Manchuria.

¹⁸ Includes Manchuria and Taiwan.

¹⁹ Partial production only; coal transported by rail.

²⁰ Includes wrought (puddled) iron.

²¹ Excludes Saar (17,896,000 tons).

²² Excludes Saar (262,000 tons).

²³ Excludes Saar (3,112,000 tons).

²⁴ Includes Saar.

²⁵ Represents production of National Iranian Oil Co.

²⁶ Represents about 90 percent of total production.

²⁷ Lebanon included with Syria.

²⁸ Norwegian-operated mines only.

²⁹ Includes ferro-titanium.

³⁰ Ingots and finished castings.

³¹ Excludes Sakhalin.

³² Great Britain only. Excludes coal produced at quarries but includes open-cast coal.

³³ Production in States of Guárico and Táchira.

³⁴ Excludes U. S. S. R. and China.

³⁵ Excludes U. S. S. R.

³⁶ Excludes Argentina, Chile, Czechoslovakia, Eastern Germany, Puerto Rico, and U. S. S. R.

World total.....	1952	90,180		727,525	727,525		1,491,121		

¹ Figures relate to merchant fleets on June 30. They are given in gross registered tons (see text, p. 593) and represent total volume of all permanently enclosed spaces of vessels to which figures refer. Only vessels of 100 gross tons and over are included. Excludes vessels without mechanical means of propulsion, but includes sailing vessels with auxiliary power. Excludes the following classes of ships, not entered in Lloyd's Register: Ships trading on Caspian Sea; wooden or composite ships trading on Great Lakes of North America.

² In general, represents sum of net registered tonnages (see text, p. 593) of seagoing foreign and domestic merchant vessels (power and sailing) entered with cargo from a foreign port and refer to only one entrance for each foreign voyage. Excludes, if possible, "in ballast," i. e. entering without unloading goods.

³ Represents weight of all goods (including their packing) in external trade loaded to and unloaded from seagoing vessels of all flags at ports of country in question. Excludes bunkers, ships' stores, ballast, and transshipment (goods transhipped from an importing vessel to an exporting vessel). Includes goods unloaded into or loaded from bonded warehouse.

⁴ Relates to domestic and international traffic on all railway lines within each country shown except railways entirely within an urban unit, and plantations, industrial, mining, funicular and cable railways. Passenger miles include all passengers except military, government and railway personnel when carried without revenue; ton miles relate to freight net ton miles and include all goods whether carried by fast or ordinary trains except service traffic, mail, baggage and nonrevenue government stores.

⁵ Covers both domestic and international scheduled services operated by companies registered in each country. Includes supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for new scheduled services.

⁶ For years in which a census or registration took place, census or registration figure is shown; for other years officially estimated number of vehicles in use is shown. Includes passenger cars and commercial vehicles. Excludes trams, trolley-buses, special and government service vehicles, motorcycles, trailers, farm and road tractors. ⁷ Includes Great Lakes.

⁸ Includes Great Lakes international traffic; includes Alaska, Hawaii, Puerto Rico.

⁹ Excludes goods in transit and Department of Defense controlled imports and exports and commodities classified as "special category."

¹⁰ Includes vessels in ballast.

¹¹ Government railways.

¹² Joint United Kingdom-Australia service of QEA includes some duplication.

¹³ State railways. ¹⁴ Carload lots.

¹⁵ Operations of Sabena in Belgian Congo included.

¹⁶ Includes government vehicles.

¹⁷ All entrances counted.

¹⁸ Excludes goods to and from bonded warehouse.

¹⁹ 13 railways only (60 percent of total traffic). Includes nonrevenue traffic.

²⁰ Excludes livestock.

²¹ Includes service traffic. ²² Includes vessels trading on Great Lakes (785,371 gross tons).

²³ Includes Great Lakes and St. Lawrence international traffic.

²⁴ Includes Newfoundland. ²⁵ Gross ton miles.

²⁶ Linea Aerea Nacional only.

²⁷ Taiwan (Formosa) only.

²⁸ Includes nonscheduled operations of Civil Air Transport.

²⁹ Includes nonrevenue traffic and nonscheduled flights.

³⁰ Represents total imports and exports.

³¹ Includes Danish portion of Scandinavian Airways System.

³² Includes bunkers and ships' stores.

³³ Traffic of Air France only.

³⁴ Excludes occupation traffic.

³⁵ Port of Piraeus only (80 percent of total traffic).

³⁶ Domestic traffic of Hungarian line and foreign lines on Budapest route; foreign traffic of associated foreign lines.

³⁷ Includes non-scheduled services.

³⁸ Federal area only.

³⁹ Includes Caspian Sea traffic.

⁴⁰ Two principal railways, including some lines in Northern Ireland.

⁴¹ Excludes petroleum. ⁴² Includes Trieste.

⁴³ Excludes wooden or composite ships with auxiliary power under 300 tons.

⁴⁴ Goods carried by steel vessels, excl. military goods.

⁴⁵ Excludes civilian aid (1,062 tons).

⁴⁶ Port of Beirut only. Coastwise shipping included.

⁴⁷ Includes floating appliances when delivered without being loaded on ships.

⁴⁸ Special service vehicles included.

⁴⁹ Excludes suburban traffic.

⁵⁰ Includes Norwegian portion of Scandinavian Airways System.

⁵¹ Includes coastwise shipping.

⁵² Excludes Canal Zone.

⁵³ Includes bunkers; excludes livestock.

⁵⁴ Standard and broad gauge.

⁵⁵ Goods carried by Portuguese vessels only: 31 percent (57 percent) of total loadings (unloadings).

⁵⁶ Includes nonrevenue traffic. ⁵⁷ Broad gauge only.

⁵⁸ Includes Swedish portion of Scandinavian Airways System. ⁵⁹ Bangkok only.

⁶⁰ Foreign vessels only.

⁶¹ Includes British Colonies (except Hong Kong) and British dependencies, which accounted for 66 percent of gross tonnage.

⁶² Includes South-West Africa and Vryburg-Bulawayo line of Rhodesia railways.

⁶³ Excludes packing. Includes goods carried by air, road and rail between Ireland (Rep.) and Northern Ireland.

⁶⁴ Excludes Northern Ireland.

⁶⁵ Includes service traffic on revenue-earning trains.

¹ Figures relate to number of public and private telephones (including extension instruments) connected to a central exchange.

² Figures cover, in general, all types of telegrams including cablegrams and radiograms, but exclude messages in transit.

³ Letters mailed for distribution within national territories. Figures cover letters (airmail, ordinary mail and registered), postcards, printed matter, business papers, small merchandise samples, small packets, and phonopost packets. Includes mail carried without charge, but excludes ordinary packages, and letters and packages with a declared value.

⁴ Publications containing general news and appearing at least four times a week; may range in size from a single sheet to 50 or more pages.

⁵ Refers to number of copies sold both inside and outside the country.

⁶ No adjustment made for copies sold outside the country.

⁷ Relates only to stations broadcasting to the public; excludes television and service stations (e.g., aeronautical and naval stations). Each station counted for as many units as it possesses different transmitting frequencies (wavelengths).

⁸ Figures shown for most countries relate to number of licenses issued for receiving sets; figures which are estimates of number of sets actually in use are footnoted. In general, figures should be used with considerable caution as number of licenses falls, in varying degree from country to country, to represent full number in use. Data apply to all types of receivers for radio broadcasts to the public, including loudspeakers connected to a "radio redistribution system" but excluding television sets. Total number of sets in use in the world in 1953 estimated to be 230,000,000.

⁹ Includes messages to Canada, Mexico, St. Pierre, and Miquelon.

¹⁰ Domestic and foreign, including ordinary packages, and letters and packages with a declared value.

¹¹ Includes Alaska, Guam, Hawaii, and Puerto Rico.

¹² Estimates of number of sets actually in use.

¹³ Of these, about 25 million are in motor cars.

¹⁴ All telegrams sent and received by land are counted as domestic. Letters sent include foreign.

¹⁵ Taiwan (Formosa) only.

¹⁶ Includes Faeroe Islands and Greenland.

¹⁷ Less than 500.

¹⁸ Federation of Ethiopia; includes Eritrea.

¹⁹ Includes Algeria, Guadeloupe, Martinique, French Guiana, and Reunion.

²⁰ Excluding Saar.

²¹ Includes Algeria.

²² Includes Canal Zone.

²³ Includes the Azores and Madeira.

²⁴ Includes 2,316,600 combined sound-television licenses.

No. 1182.—EDUCATION AND HEALTH

[Education: Figures usually refer to both official (public) and independent (private) schools, to school year beginning in year stated, and generally exclude adult education, evening classes, apprenticeship courses and correspondence schools; intercountry comparisons are subject to caution owing to variations in definitions employed and in scope of data; usually excludes (unless otherwise stated) nursery schools, kindergarten and other pre-school education. Health: Data do not allow of a close comparison between countries which present a similar standard, whether high or low, in respect of strength and character of their medical facilities. However, they may be used to judge approximate difference in standard between advanced and underdeveloped countries. Data for hospital beds usually refer to both private and public hospitals, nursing homes, infirmaries and dispensaries, but are not always quite complete. See text, p. 964, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are not for the year shown in the "year" column are prefixed by a letter to indicate the year represented, as follows: a represents 1951; b, 1950; c, 1949; d, 1948; e, 1947; f, 1946; g, 1945]

¹ Schools providing basic training and education to children within compulsory or customary ages of full-time education; may vary from 4-8 years from country to country.

² Middle schools, secondary schools, high schools, providing general instruction.

³ Includes technical schools.

⁴ Secondary schools included with primary schools.

⁵ Includes hospices, orphanages, etc.

⁶ Public schools only.

⁷ Excludes convalescence homes and other institutions with 2,500 beds.

⁸ Includes kindergartens.

⁹ Excluding primary departments attached to secondary private schools.

¹⁰ Excludes Taiwan (Formosa).

¹¹ Government personnel only.

¹² Data refer to reporting institutions only.

¹³ Includes technical and teacher-training schools.

¹⁴ Personnel in government civil service only.

¹⁵ Includes Arabic education

¹⁶ Includes evening schools.

¹⁷ Civil personnel.

¹⁸ Excluding 5,347 beds in infirmaries and sections for chronic diseases.

¹⁹ England and Wales only.

²⁰ Based on 1951 Census, 1-percent sample.

²¹ Personnel of health institutions only.

1 Unofficial percentages, calculated from official scale of unit assessments.

2 Includes contributions from the following countries not shown separately: Byelorussian S. R., Cambodia, Jordan, Kazakhstan, S. Korea, Viet Nam, and Saudi Arabia, S. S. R. of Russia, and the United States S. R. of China. Total, \$1,441,750 adjustment in the 1953 budget and miscellaneous income, less \$1,308,560 savings in 1953 and 1952 accounts.

3 1954 budget less an estimated miscellaneous income of \$74,500.

4 1954 budget less \$468,680 (Canadian) casual revenue and \$300,000 (Canadian) working capital fund surplus.

5 1954 budget less supplementary receipts of \$87,000. Gross assessments, against which credits in respect of the 1948, 1950/1951, and 1952 balances (\$210,680), and of the working capital fund (\$245,717) are to be deducted for certain members.

6 1952 budget less \$233,666 estimated miscellaneous income.

7 1954 budget less: Transfer of assets from "Office" of \$24,000, miscellaneous income of

\$285,102 and \$665,908 in adjustments.

8 Inactive members. The scale of assessments included the inactive members, even though these States have announced that they no longer consider themselves members of the U. N.

9 Austria is assessed a token contribution of \$1,000 (Canadian) for 1954.

10 Gross assessment. Due to credit of \$358,000 as result of adjustment of advances to working capital fund on basis of 1954 scale of assessments, U. S. net assessment is \$15,407,-290.

11 Gross assessment. Due to credit of \$172,565 from working capital fund, U. S. net assessment is \$1,605,085.

12 Gross assessment. Due to a credit of \$48,325 in respect of the 1952 balance, and a credit of \$63,420 in respect of the working capital fund, the U. S. net assessment is \$1,527,-477.

¹ Average of daily rates for part of year during which quotations were certified (see previous Abstracts for exact periods).² Based on quotations beginning Nov. 30, 1953.³ Prior to Nov. 1, 1942, official designation for Brazilian cruzeiro was milreis.⁴ Based on quotations through Oct. 9, 1953. Effective Oct. 12, 1953, the Brazilian authorities introduced new exchange ratios for Brazilian exports. Under the new system premiums of 5 and 10 cruzeiros, depending upon type of merchandise, were added to former official rate of 5.4466 cents, thus establishing two rates—4.2805 and 3.5261 cents, respectively. For the period Oct. 13-Dec. 31, 1953, averages of these two rates were 4.2808 and 3.5261, respectively.⁵ Based on quotations beginning Feb. 25 through Oct. 9, 1953.⁶ Excludes Pakistan, beginning April 1948.⁷ Beginning October 1948, rate applied (except free rate) depends upon type of merchandise.⁸ Based on quotations through Dec. 4, 1953.⁹ Based on quotations beginning May 8 through Dec. 4, 1953.¹⁰ Free rate, based on quotations beginning Feb. 10 through Dec. 4, 1953.Source: Board of Governors of the Federal Reserve System; annual and monthly figures published in *Federal Reserve Bulletin*.

APPENDIX I

HISTORICAL APPENDIX: INDEX OF HISTORICAL STATISTICS SERIES AND STATISTICAL ABSTRACT TABLES IN WHICH THOSE SERIES APPEAR

[Comprises statistical time series (identified by number) shown in the historical supplement entitled *Historical Statistics of the United States, 1789-1945*. Historical series are listed only: (1) available for a year or years later than 1945; (2) where data are included in a tabular complete listing of series for which data are available for the years 1946 to 1951, 1951, and 1952 editions of the *Statistical Abstract*]

Castor beans.....	50	22.68

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	WEIGHT OF UNITED STATES GALLON		WEIGHT OF BARREL OF 42 GALLONS	
	Pounds	Kilograms	Pounds	Kilograms
Crude petroleum.....	7.3	3.311	306.6	139.07
Lubricating oils.....	7.0	3.175	294.0	133.35
Illuminating oils (kerosene).....	6.6	2.994	277.2	125.74
Gasoline and related products (motor spirit, benzine, etc.).....	6.1	2.767	256.2	116.21

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1952. A compact presentation of 128 items of statistical data for each county and standard metropolitan area in the United States, and 133 items of statistical data for each of 484 cities having 25,000 or more inhabitants in 1950. Items included based largely on results of 1950 Censuses of Agriculture, Population and Housing. Includes 51 maps, explanatory and definitive text, and source notes. 608 pages. Issued 1953. Second printing. Price \$4.25 (Buckram).

Historical Statistics of the United States, 1789-1945. A supplement to the *Statistical Abstract*, prepared with the cooperation of the Social Science Research Council. A compilation of about 3,000 statistical time series, largely annual, extending back through time to the earliest year for which figures are available. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 363 pages. Issued 1949. Fourth printing. Price \$3.25 (Buckram).

Continuation to 1952 of Historical Statistics of the United States, 1789-1945. Carries forward and presents revisions of the statistical time series contained in *Historical Statistics of the United States, 1789-1945*. Designed especially for use in conjunction with the *Historical Statistics* volume. 79 pages. Issued 1954. Price 55 cents.

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

This bibliography contains under the various subject headings references to the important primary sources of statistical information for the United States. Secondary sources have been referred to if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. Non-recurrent studies presenting compilations or estimates for several years or new types of data not available in regular series are included.

Much valuable information will also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right-hand side of each page indicate where data from the report cited appear in the *Statistical Abstract*. Where current reports and a summary volume are both cited in the bibliography the section reference will often appear opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. However, it should not be assumed that all of the subjects from that source are summarized in the *Abstract*.

The location of the publisher of the report is given except for Federal governmental agencies located in Washington. Major reports, such as the Census of Population which consists of many volumes, are listed by their general, all-inclusive titles rather than their specific volume numbers and subtitles. The final reports of the 1950 Censuses which include those on the Censuses of Agriculture, Population, and Housing, are listed at the end of the bibliography together with the final reports of the 1948 Census of Business and the 1947 Census of Manufactures.

Retail Prices. Releases and periodic bulletins on monthly and annual average prices and indexes. Monthly releases, "Consumer Price Index," "Retail Food Prices by Cities," and "Retail Prices and Indexes of Fuels and Electricity"	12
Wholesale Prices. Monthly releases, "Prices and Price Relatives for Individual Commodities," and "Wholesale (and Primary Market) Price Index." Annual bulletin	12, 28, 30
U. S. Council of Economic Advisers:	
Economic Report of the President. Annual	11, 17
U. S. Office of Business Economics:	
Advance Reports on Retail Trade.	
Industry Survey Reports. Monthly statistics on manufacturer's sales, inventories, and new and unfilled orders.	
Survey of Current Business. Monthly statistics and special articles. Biennial Supplement	11, 12, 14, 16, 17, 22, 24, 26, 29-32
U. S. Securities and Exchange Commission:	
Survey of American Listed Corporations. (Individual industry reports and statistical studies covering periods from 1936-47.)	
Wholesale Prices—see Commodity Prices.	
Workmen's Compensation—see Social Security.	
Work Relief—see Social Security.	
Work Stoppages—see Labor.	

PUBLICATIONS OF MAJOR CENSUSES

[Each part of a volume in this list is a separate book or pamphlet. Preliminary bulletins, which were issued in advance of final reports, are not included in the list. A detailed catalog of Census publications is available upon request]

17th DECENNIAL CENSUS, 1950

Agriculture:

- Vol. I: Counties and State Economic Areas. Detailed statistics by counties and economic areas. Economic areas within each State comprise groups of counties having similar agricultural, demographic, and other characteristics. A series of 34 separately published parts.
- Vol. II: General Report. Summary data and analyses by subjects for States, for geographic divisions, and for the United States. Subject matter chapters also issued as separate bulletins.
- Vol. III: Irrigation of Agricultural Lands. State reports with statistics for counties and drainage basins, and a summary for the United States. State reports also issued as separate bulletins.
- Vol. IV: Drainage of Agricultural Lands. Data for States, for counties, and for the United States; all in one part.

Agriculture—Continued

- Vol. V: Special Reports (10 parts).
 Part 1. Horticultural Specialties.
 Part 2. Multiple-Unit Operations.
 Part 3. Ranking Agricultural Counties.
 Part 4. Land Utilization—A Graphic Summary.
 Part 5. Farm Tenure—A Graphic Summary.
 Part 6. 1950 Census of Agriculture—A Graphic Summary.
 Part 7. Irrigation of Agricultural Lands—A Graphic Summary.
 Part 8. Farm Mortgage Debt.
 Part 9. Economic Class and Type of Farm—A Graphic Summary.
 Part 10. Farms and Farm Characteristics, by Subregions.

Housing:

- Vol. I: General Characteristics. A separate bulletin is also issued for the United States, each State and the District of Columbia, Alaska, Hawaii, Puerto Rico, and the Virgin Islands of the United States. Characteristics by States, counties, standard metropolitan areas, urban places, and other constituent areas.
 Vol. II: Nonfarm Housing Characteristics. Chapters also issued as separate bulletins for the United States and the 9 geographic divisions, and for each of the 152 standard metropolitan areas of 100,000 or more inhabitants including the 106 cities of 100,000 inhabitants or more in the United States.
 Vol. III: Farm Housing Characteristics. Analytical data for the rural-farm segment of the dwelling-unit inventory; for the United States and each of the 119 economic subregions. Subregions usually are combinations of two or more counties having relatively homogeneous agricultural conditions.
 Vol. IV: Residential Financing. Financial characteristics of nonfarm mortgaged residential properties, for the United States, the 4 geographic regions, and for the 25 largest standard metropolitan areas as measured by 1940 population figures (2 parts).
 Part 1. United States.
 Part 2. Large standard metropolitan areas and comparable data for the United States.
 Vol. V: Block Statistics. Separate reports for each of the 209 cities in the United States which had a population of 50,000 or more inhabitants in 1940, or in a subsequent special census prior to 1950. (These bulletins *not* bound in a single publication.)

Population:

- Vol. I: Number of Inhabitants. General characteristics of the population by States, counties, standard metropolitan areas, urban places, and other constituent areas. State chapters also issued as separate bulletins.
 Vol. II: Characteristics of the Population. A series of separately published parts, one for each State and the District of Columbia, a summary for the United States, and another part for the Territories and possessions. Each part comprises the following chapters: (A) Number of Inhabitants, (B) General Characteristics, and (C) Detailed Characteristics. Each of these chapters also issued separately as State bulletins.
 Vol. III: Census Tract Statistics. Selected population and housing data by census tracts. 64 separate bulletins for tracted cities. (These bulletins *not* bound in a single publication.)
 Vol. IV: Special Reports. Comprises Series P-E Bulletins including: Employment and Personal Characteristics; Institutional Population; Marital Status; Nativity and Parentage; Nonwhite Population by Race; Persons of Spanish Surname; Puerto Ricans in Continental U. S.; State of Birth; Characteristics by Size of Place; Education.

1948 CENSUS OF BUSINESS

Subject and area volumes: Subject volumes include a United States Summary chapter, a separate chapter for each subject, a miscellaneous chapter, and a chapter on Territories (Alaska and Hawaii). Area volumes contain statistics for standard metropolitan areas, cities, and counties as well as for the United States, geographic divisions, and States.

Retail Trade:

Vol. I: General Statistics, Part 1.

Vol. II: General Statistics, Part 2, and Merchandise Line Sales Statistics.

Vol. III: Area Statistics.

Wholesale Trade:

Vol. IV: General Statistics and Commodity Line Sales Statistics.

Vol. V: Area Statistics.

Service Trade:

Vol. VI: General Statistics.

Vol. VII: Area Statistics.

Trade bulletins (data for continental United States only):

The Grocery Trade.

Department Stores.

Variety Stores.

The Electrical Goods Trade.

The Automotive Trade.

The Drug Trade.

The Jewelry Trade.

The Apparel Trade.

The Furniture Trade.

The Lumber Trade.

The Hardware, Plumbing and Heating Equipment Trade.

Marketing by Producers of Basic Iron and Steel Products.

The Motion Picture Trade.

The Optical Goods Trade.

Census monograph: The Manufacturers' Agent as a Marketing Institution.

1947 CENSUS OF MANUFACTURES

Vol. I: General Summary. Detailed comparative statistics for industries and for geographic areas.

Vol. II: Reports for Industries. Also issued as 82 separate bulletins for approximately 460 industries.

Vol. III: Reports for States. Also issued as separate bulletins for each State and the District of Columbia.

Product Supplement. Data on shipments and/or production for more than 6,000 manufactured products.

Indexes of Production. Measures of the physical volume of 1947 production as compared with 1939 production for total manufacturing, for 20 major industry groups, and for approximately 200 individual industries.

Classes of Products, by State. Value of shipments by State for 890 classes of products.
