No. 658. Total Unemployed and Insured Unemployed—States: 1980 to 1991

[For civilian noninstitutional population 16 years old and over. Annual averages of monthly figures. Total unemployment estimates based on the Current Population Survey (CPS); see text, section 1, and Appendix III. U.S. totals derived by independent population controls; therefore State data may not add to U.S. totals. See table 626 for 1992 unemployment data]

[1] Total unemployment as percent of civilian labor force. [2] Source: U.S. Employment and Training Administration, *Unemployment Insurance, Financial Data*, annual updates. [3] Insured unemployment as percent of average covered employment in the previous year. [4] Includes 43,200 in Puerto Rico and the Virgin Islands in 1990 and 50,400 in 1991.

Source: Except as noted, U.S. Bureau of Labor Statistics, *Geographic Profile of Employment and Unemployment*, annual.

No. 659. U.S. Employment Service Job Openings and Placements, and Index of Help-Wanted Advertising: 1970 to 1991

[In thousands, except as indicated. Openings 1970-1984, for years ending Sept. 30; beginning 1985, for years ending June 30]

ITEM	1970	1980	1984	1985	1986	1987	1988	1989	1990	1991
Job openings: [1] Received	6,130	8,122	[2]5,144	7,529	6,950	6,968	7,240	6,998	5,651	5,635
Average per month	511	677	[2]572	627	579	581	603	583	471	470
Nonagricultural placements [1]	4,604	5,610	[2]2,297	3,270	4,856	4,516	4,503	4,284	3,714	3,507
Index of help-wanted advertising in newspapers [3] (1967=100)	93	128	130	138	138	153	157	150	129	94

[1] As reported by State employment agencies. Beginning 1985, all placements. Placements include duplication for individuals placed more than once. [2] Data for nine months from October 1, 1983 through June 30, 1984. [3] Source: The Conference Board, New York, NY, The Statistical Bulletin. Further reproduction prohibited without permission. Index based on number of advertisements in classified sections of 51 newspapers, each in a major employment area.

Source: Except as noted, U.S. Employment and Training Administration, unpublished data.

No. 660. Nonfarm Establishments, Employees, Hours, and Earnings, by Industry: 1960 to 1992

[Based on data from establishment reports. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, the self-employed, farm workers, unpaid family workers, private household workers, and Armed Forces. Establishment data shown here conform to industry definitions in the 1987 Standard Industrial Classification Manual and are adjusted to March 1991 employment benchmarks; consequently, may not be comparable with previously published data. Based on the Current Employment Statistics Program; see Appendix III. See also *Historical Statistics, Colonial Times to 1970*, series D 127-141 and D 803, 878, 881, 884, and 890]

No. 662. Nonfarm Industries—Number of Employees and Number and Earnings of Production Workers: 1980 to 1992

[Annual averages of monthly figures. Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for construction, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote table 660. See *Historical Statistics, Colonial Times to 1970*, series D 127-151, D 802-810, and D 877-892, for related data]

X Not applicable. [1] Applies to workers covered prior to 1961 Amendments and, after Sept. 1965, to workers covered by 1961 Amendments. Rates set by 1961 Amendments were: Sept. 1961, $1.00; Sept., 1964, $1.15; and Sept. 1965, $1.25. [2] Percent of gross average hourly earnings of production workers in manufacturing. [3] Applies to workers newly covered by Amendments of 1966, 1974, and 1977, and Title IX of Education Amendments of 1972. [4] Included in coverage as of 1966, 1974, and 1977 Amendments. [5] No change in rate. [6] Estimates based on average employment for the ten-month active season. [7] Estimates for educational services in private industry and government relate to October. [8] Federal, State, and local employees.

No. 679. Employee Benefits in Medium and Large Private Establishments, 1991 and Small Private Establishments, 1990

[Covers full-time employees in private industry. Medium and large establishments exclude establishments with fewer than 100 workers, executive and traveling operating employees, and Alaska and Hawaii. Small establishments include those with fewer than 100 employees. Covers only benefits for which the employer pays part or all of the premium or expenses involved, except unpaid parental leave and long-term care insurance. Based on a sample survey of establishments; for details, see sources. For data on employee benefits in State and local governments, see table 502]

Z Represents or rounds to zero. [1] Earnings-based formulas pay a percent of employee's annual earnings (usually earnings in the final years of employment) per year of service. [2] Account which is used throughout the year to pay for plan premiums or to reimburse the employee for benefit related expenses. Account may be financed by employer, employee, or both.

No. 681. Major Collective Bargaining Settlements—Average Percent Changes in Wage and Compensation Rates Negotiated: 1970 to 1992

[**In percent, except as indicated.** Data represent private nonfarm industry settlements affecting production and related workers in manufacturing and nonsupervisory workers in nonmanufacturing industries. Wage data cover units with 1,000 workers or more. Compensation data relate to units of 5,000 or more. Data relate to contracts negotiated in each calendar year but exclude possible changes in wage rates under cost-of-living adjustment (COLA) clauses, except increases guaranteed by the contract. Includes all settlements, whether wage and benefit rates were changed or not. Minus sign (-) indicates decrease]

No. 685. Occupational Injury and Illness Incidence Rates, by Selected Industries: 1990 and 1991

[Rates per 100 full-time employees. For nonfarm employment data, see table table 662. Rates refer to any occupational injury or illness resulting in (1) fatalities, (2) lost workday cases, or (3) nonfatal cases without lost workdays. Incidence rates were calculated as: Number of injuries and illnesses divided by total hours worked by all employees during year multiplied by 200,000 as base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks a year)]

[1] Beginning in year indicated. [2] Workers counted more than once if involved in more than one stoppage during the year. [3] Resulting from all stoppages in effect in a year, including those that began in an earlier year. [4] Agricultural and government employees are included in the total working time; private household and forestry and fishery employees are excluded. [5] Revised since originally published.

No. 687. U.S. Membership in AFL-CIO Affiliated Unions, by Selected Union: 1979 to 1991

[In thousands. Figures represent the labor organizations as constituted in 1989 and reflect past merger activity. Membership figures based on average per capita paid membership to the AFL-CIO for the 2-year period ending in June of the year shown and reflect only actively-employed members. Labor unions shown had a membership of 50,000 or more in 1991]

No. 688. U.S. Union Membership in Manufacturing, by State: 1984 to 1989

[Data represent annual average dues-paying full-time equivalent membership derived from financial records. Excludes unemployed members. In general, annual per capita revenues received by the parent organization were divided by the per capita rate to yield membership. For unions with multiple dues structures or other structures, other methods were used. See source for details. A right-to-work State has laws which prohibit collective bargaining contracts from including clauses requiring union membership as a condition of employment. Data for DC not available]

Income, Expenditures, and Wealth

This section presents data on gross domestic product (GDP), gross national product (GNP), national and personal income, saving and investment, money income, poverty, and national and personal wealth. The data on income and expenditures measure two aspects of the U.S. economy. One aspect relates to the national income and product accounts (NIPA's), a summation reflecting the entire complex of the Nation's economic income and output and the interaction of its major components; the other relates to the distribution of money income to families and individuals, or consumer income.

The primary source for data on GDP, GNP, national and personal income, gross saving and investment, and fixed reproducible tangible wealth is the *Survey of Current Business*, published monthly by the Bureau of Economic Analysis (BEA). A comprehensive revision to the NIPA's was completed in December 1991. A discussion of the revision appears in the August through October, 1991 and the December 1991 issues of *Survey of Current Business.* Detailed historical data appear in *The National Income and Product Accounts of the United States, volume 1, 1929-58* and *volume 2, 1959-88* and the July 1992 issue of *Survey of Current Business*; detailed data for the most recent years are normally published each July in the *Survey.*

Sources of income distribution data are the decennial censuses of population and the Current Population Survey (CPS), both products of the Bureau of the Census (see text, section 1). Annual data on income of families, individuals, and households are presented in *Current Population Reports-Consumer Income,* P60 series.

Data on individuals' saving and assets are published by the Board of Governors of the Federal Reserve System in the quarterly *Flow of Funds Accounts;* and detailed information on personal wealth

In Brief

Gross domestic product, constant (1987) dollars, annual percent change:

1989-90	0.8
1990-91	−1.2
1991-92	2.1

Median household income in 1991: $30,126

Poverty status of persons in 1991:

Number below poverty level: 35.7 million

Percent below poverty level: 14.2

is published periodically by the Internal Revenue Service (IRS) in *SOI Bulletin.*

National income and product.—*Gross domestic product* is the total output of goods and services produced by labor and property located in the United States, valued at market prices. GDP can be viewed in terms of expenditure categories that comprise purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production located in the United States. *Gross State product* (GSP) is the gross market value of the goods and services attributable to labor and property located in a State. It is the State counterpart of the Nation's gross domestic product.

Gross national product measures the output attributable to all labor and property supplied by United States residents. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect business taxes (sales and property taxes); see table 695.

In December 1991, the Bureau of Economic Analysis began featuring gross domestic product rather than gross national product as the primary measure of U.S. production. GDP is now the standard measure of growth because it is the appropriate measure for much of the short-term monitoring and analysis of the economy. In addition, the use of GDP facilitates comparisons of economic activity in the United States with that in other countries. GDP is the primary measure of production in the United Nation's System of National Accounts, the set of international guidelines for economic accounting that the U.S. economic accounts will be moving toward in the mid-1990's. Virtually all other countries already use GDP as their primary measure of production. The dollar levels of GDP and GNP differ little, but percentage changes often differ. The annual rates of growth of real GNP have been slightly less than the annual rates of growth of real GDP in most years of the 1980's. The quarterly differences are larger and they fluctuate more.

National income is the aggregate of labor and property earnings which arises in the current production of goods and services. It is the sum of employee compensation, proprietors' income, rental income of persons, corporate profits, and net interest. It measures the total factor costs of the goods and services produced by the economy. Income is measured before deduction of taxes.

Capital consumption adjustment for corporations, and for nonfarm sole proprietorships and partnerships is the difference between capital consumption based on income tax returns and capital consumption measured at straight-line depreciation, consistent service lives, and replacement cost. The tax return data are valued at historical costs and reflect changes over time in service lives and depreciation patterns as permitted by tax regulations. *Inventory valuation adjustment* represents the difference between the book value of inventories used up in production and the cost of replacing them.

Personal income is the current income received by persons from all sources minus their personal contributions for social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), nonprofit institutions that primarily serve individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from government and business such as Social Security benefits, public assistance, etc., but excludes transfers among persons. Also included are certain nonmonetary types of income—chiefly estimated net rental value to owner-occupants of their homes and the value of services furnished without payment by financial intermediaries.

Disposable personal income is personal income less personal tax and nontax payments. It is the income available to persons for spending or saving. Personal tax and nontax payments are tax payments (net of refunds) by persons (except personal contributions for social insurance) that are not chargeable to business expense, and certain personal payments to general government that are treated like taxes. Personal taxes include income, estate and gift, and personal property taxes and motor vehicle licenses. Nontax payments include passport fees, fines and forfeitures, and donations.

Consumer Expenditure Survey.—The Consumer Expenditure Survey program was begun in late 1979. The principal objective of the survey is to collect current consumer expenditure data which provide a continuous flow of data on the buying habits of American consumers. The data are necessary for future revisions of the Consumer Price Index.

The survey conducted by the Bureau of the Census for the Bureau of Labor Statistics, consists of two components: (1) An interview panel survey in which the expenditures of consumer units are obtained in five interviews conducted every 3 months; and (2) a diary or record-keeping survey completed by participating households for two consecutive 1-week periods.

Each component of the survey queries an independent sample of consumer units representative of the U.S. total population. Over 52 weeks of the year, 5,000 consumer units are sampled for the diary survey. Each consumer unit keeps a

diary for two 1-week periods yielding approximately 10,000 diaries a year. The interview sample is selected on a rotating panel basis, targeted at 5,000 consumer units per quarter. Data are collected in 88 urban and 16 rural areas of the country that are representative of the U.S. total population. The survey includes students in student housing.

The Diary survey is designed to obtain expenditures on small, frequently purchased items which are normally difficult for respondents to recall. Detailed records of expenses are kept for food and beverages, both at home and in eating places, tobacco, housekeeping supplies, nonprescription drugs, and personal care products and services.

The Interview survey is designed to obtain data on the types of expenditures which respondents can be expected to recall for a period of 3 months or longer. In general, these include relatively large expenditures, such as those for property, automobiles, and major appliances, or expenditures which occur on a fairly regular basis, such as rent, utilities, or insurance premiums. Including "global estimates" for food, it is estimated that about 95 percent of expenditures are covered in the interview. Excluded are nonprescription drugs, household supplies, and personal care items. The interview survey also provides data on expenditures incurred while on trips. Both surveys exclude all business related expenditures for which the family is reimbursed.

In contrast to previous publications from the survey which have presented data from the diary and quarterly interview surveys separately, the tables in the most recently published *Consumer Expenditure Survey* combine, or integrate, data from the two surveys. Integration is necessary to permit analysis of total family expenditures because neither the diary nor quarterly interview survey was designed to collect a complete account of consumer spending.

Distribution of money income to families and individuals.—Money income statistics are based on data collected in various field surveys of income conducted since 1936. Since 1947, the Bureau of the Census has collected the data on an annual basis and published them in *Current Population Reports,* P60 serie. In each of the surveys, field representatives interview samples of the population with respect to income received during the previous year. Money income as defined by the Bureau of the Census differs from the BEA concept of "personal income."

Data on consumer income collected in the CPS by the Bureau of the Census cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, Social Security, union dues, Medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits (see section 12) such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that noncash benefits are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. For data on noncash benefits, see section 12. None of the aggregate income concepts (GDP, national income, or personal income) is exactly comparable with money income, although personal income is the closest.

Several changes were made in the collection and presentation of data from the March 1980 CPS. The changes include (1) the use of a more detailed income questionnaire for all sample households, (2) the use of an expanded sample, (3) the implementation of the "householder" concept rather than the traditional "head" concept, (4) the exclusion of a small number of "secondary families" from the count of all families, (5) the use of more detailed income intervals in the upper range of the income distribution, (6) the introduction of the new farm definition, and (7) the restriction of the population with income to persons 15 years old and over. For more information on the impact and comparability, see the source.

Beginning in the March 1981 Current Population Survey, 1980 census population controls were used; for income years 1971 through 1979, 1970 census population controls had been used. This change had little impact on income summary measures (means and medians) and proportional measures (percent distributions and poverty rates); however, use of the controls may have significant impact on the absolute numbers.

Income and poverty data for 1986 are the first estimates based entirely on households selected from the 1980 census-based sample design. Estimates by type of residence categories such as metropolitan, nonmetropolitan, farm, and nonfarm reflect metropolitan areas defined as of June 1984. In addition, the March 1987 CPS income supplement was revised to allow for the coding of larger earnings amounts on the questionnaire. A description of this change and its effect on estimates in this report can be found in *Current Population Reports,* series P60-157.

A new computer processing system was introduced to the March 1989 CPS income supplement. The system in use before this year was first introduced in 1976 but was never fully updated to reflect questionnaire changes. In addition, the programs used to process the CPS file were written in a language which was phased out of Census. The March 1988 file was reprocessed based on the new procedures to better evaluate the new processing procedures and allow year to year comparisons to be made using a consistent processing system. A description of this change and its effect on estimates in this report can be found in *Current Population Reports,* series P60-166.

In October 1983, the Census Bureau began to collect data under the new Survey of Income and Program Participation (SIPP). The information supplied by this survey is expected to provide better measures of the status and changes in income distribution and poverty of households and persons in the United States. The data collected in SIPP will be used to study Federal and State aid programs (such as food stamps, welfare, Medicaid, and subsidized housing), to estimate program costs and coverage, and to assess the effects of proposed changes in program eligibility rules or benefit levels. The core questions are repeated at each interview and cover labor force activity, the types and amounts of income received, and participation status in various programs. The core also contains questions covering attendance in postsecondary schools and private health insurance coverage. Various supplements or topical modules covering areas such as educational attainment, assets and liabilities, and pension plan coverage are periodically included.

Poverty.—Families and unrelated individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980. The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food stamps, Medicaid, and public housing. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index. The following technical changes to the thresholds were made in 1981: (1) distinctions based on sex of householder have been eliminated; (2) separate thresholds for farm families have been dropped; and (3) the matrix has been expanded to families of nine or more persons from the old cutoff of seven or more persons. These changes have been incorporated in the calculation of poverty data beginning with 1981.

In the recent past, the Bureau of the Census has published a number of technical papers that presented experimental poverty estimates based on income definitions that counted the value of selected government noncash benefits. The Census Bureau has also published annual reports on after-tax income. The *Current Population Reports,* series P60-182RD brings together the benefit and tax data that previously appeared in the separate reports. This report shows the distribution of income among households and

the prevalence of poverty under the official definition of money income and under definitions that add or subtract income components. The types of income that are included in one or more of the definitions: (1) money income excluding capital gains or lump-sum payments before taxes, (2) capital gains, (3) government cash transfers, (4) Earned Income Tax Credit, (5) the value of employer contributions to health insurance plans, (6) the value of food stamps, (7) the subsidy value of school lunches, (8) the subsidy value of housing assistance, (9) the fungible values of Medicare and Medicaid coverage (that is, the benefits are counted as income to the extent that they free up resources that could have been spent on medical care), and (10) the imputed net return on equity in own home. The types of taxes accounted for are Federal and State income taxes and payroll taxes.

The poverty statistics presented by the Bureau of the Census and Congressional Budget Office reflect alternative adjustments for inflation. The study used a variation of the Consumer Price Index to adjust poverty thresholds for the effects of changing prices since 1967. The alternative measure of inflation uses estimates of the cost of renting equivalent housing to assess homeownership costs; this methodology has been used in the official Consumer Price Index since 1983. See text, section 15, and source for more details.

Personal wealth.—Personal wealth estimates, issued by the IRS, are based on a sample of Federal estate tax returns which must be filed for deceased persons. Estimates are weighted to adjust for age, sex, and "social class" (as determined by the IRS through insurance holdings). Gross estate is the gross value of all assets, including the full face value of life insurance (reduced by policy loans), before reduction by the amount of debts. The level of gross estate or gross assets required for filing estate tax returns increased from $60,000 in 1972 to $120,000 in 1976. Net worth is one's level of worth after all debts have been removed.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

Weighted Average Poverty Thresholds Based on Money Income for Families and Unrelated Individuals: 1980 to 1991

SIZE OF UNIT	1980[1]	1984	1985	1986	1987	1988	1989	1990	1991

No. 691. Gross National Product, by Industry, in Current and Constant (1982) Dollars: 1980 to 1989

[**In billions of dollars.** Based on the *1972 Standard Industrial Classification Manual;* see text, section 13. Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product; corporate profits and capital consumption allowances have been shifted from a company to an establishment basis. These data are not fully consistent with other gross domestic product tables because they do not yet reflect the results of the comprehensive National Income and Product Accounts revision; see text, section 14]

[1] Includes other expenditures not shown separately. [2] Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunch rooms. Includes meals and beverages consumed both on and off-premise. [3] Includes mattresses and bedsprings. [4] Consists largely of textile house furnishings including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes. [5] Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services. [6] Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes. [7] Consists of (1) premiums, less benefits and dividends, for health, hospitalization and accidental death and dismemberment insurance provided by commercial insurance carriers, and (2) administrative expenses (including consumption of fixed capital) of Blue Cross and Blue Shield plans and of other independent prepaid and self-insured health plans. [8] Consist of (1) operating expenses of life insurance carriers and private noninsured pension plans, and (2) premiums, less benefits and dividends of fraternal benefit societies. Excludes expenses allocated by commercial carriers to accident and health insurance. [9] For additional details, see table 398.

No. 703. Personal Income in Current and Constant (1987) Dollars—States: 1980 to 1992

[**In billions of dollars, except percent. 1992 data preliminary.** Represents a measure of income received from all sources during the calendar year by residents of each State. Data exclude Federal employees overseas and U.S. residents employed by private U.S. firms on temporary foreign assignment. Totals may differ from those in tables 695, 696, and 700. See text, section 14. Minus sign (-) indicates decrease]

[1] Income values derived from "complete income reporters" only. Represents the combined income of all consumer unit members 14 years old and over during the 12 months preceding the interview. A complete reporter is a consumer unit providing values for at least one of the major sources of income. [2] Includes items not shown separately. [3] Includes household equipment.

and Expenditures of All Consumer Units: 1991

14 for description. In interpreting the expenditure data, several factors should be considered. First the data are averages out-of-pocket expenditures]

HOUSING					Apparel and services	TRANSPORTATION			Health care	Personal insurance and pensions	Other expenditures [5]	Personal taxes	Line no.
Total	Shelter	Fuel, utilities, public services	Household operations, furnishings [3]	Housekeeping supplies		Vehicle purchases	Gasoline, motor oil	All other transportation [4]

No. 720. Money Income of Families—Percent Distribution by Income Level in Constant (1991) Dollars, by Race and Hispanic Origin of Householder: 1970 to 1991

[Constant dollars based on CPI-U-X1 deflator. Families as of **March** of following year. Beginning with 1980, based on householder concept and restricted to primary families. Based on Current Population Survey. See text, sections 1 and 14, and Appendix III. For definition of median, see Guide to Tabular Presentation. See also *Historical Statistics, Colonial Times to 1970*, series G 1-8, G 16-23, G 190-192, and G 197-199]

RACE AND HISPANIC ORIGIN OF HOUSEHOLDER AND YEAR	Number of families (1,000)	PERCENT DISTRIBUTION OF FAMILIES, BY INCOME LEVEL							Median income (dol.)
		Under $10,000	$10,000-$14,999	$15,000-$24,999	$25,000-$34,999	$35,000-$49,999	$50,000-$74,999	$75,000 and over

X Not applicable. [1] Includes other races not shown separately. [2] Persons of Hispanic origin may be of any race. [3] Official definition of income based on money income before taxes and includes government cash transfers. [4] Employer contributions to the health insurance plans of employees. [5] Earned Income Tax Credit. [6] Includes Social Security and Railroad Retirement, veterans payments, unemployment and workers' compensation, Black Lung payments, Pell Grants, and other government educational assistance. [7] Includes Medicare and subsidies from regular price school lunches. [8] Includes AFDC and other public assistance or welfare payments, Supplemental Security Income, and veterans payments. Households must meet certain eligibility requirements in order to qualify for these benefits. (See section 12.) [9] Includes Medicaid, food stamps, subsidies from free or reduced-price school lunches, and rent subsidies. [10] Estimated amount of income a household would receive if it chose to shift amount held as home equity into an interest bearing account.

No. 750. Money Income of Households—Percent Distribution, by Quintile, and Index of Income Concentration, by Definition of Income: 1991

[Based on 95,669,000 households as of **March 1992**. For explanation of income definitions, see text, section 14]

Definition number	DEFINITION OF INCOME	Total income (bil. dol.)	SHARE OF AGGREGATE INCOME BY QUINTILE					Index of income concentration [1]	Median income (dol.)
			Lowest quintile	Second quintile	Third quintile	Fourth quintile	Highest quintile		
	INCOME BEFORE TAXES								
1	Money income excluding capital gains (current) measure [2]	3,628	3.8	9.5	16.0	24.1	46.5	0.425	30,126

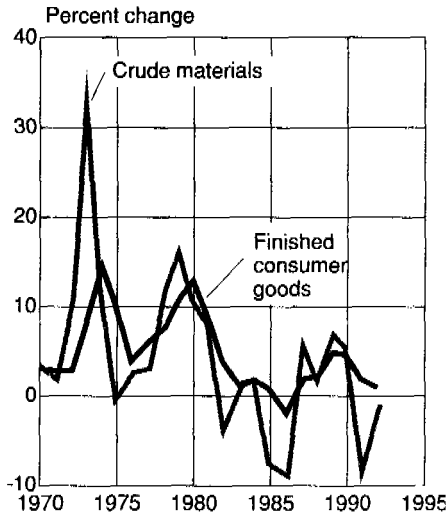
Prices

This section presents indexes of producer and consumer prices, actual prices for selected commodities, and energy prices. The primary sources of these data are monthly publications of the Department of Labor, Bureau of Labor Statistics (BLS), which include *Monthly Labor Review, Consumer Price Index, Detailed Report; Producer Price Indexes;* and *U.S. Import and Export Price Indexes.* The Department of Commerce, Bureau of Economic Analysis is the source for gross domestic product measures.

Producer price index (PPI).—This index, dating from 1890, is the oldest continuous statistical series published by BLS. It is designed to measure average changes in prices received by producers of all commodities, at all stages of processing, produced in the United States.

PPI—Stage of Processing: 1970 to 1992



Source: Chart prepared by U.S. Bureau of the Census. For data, see table 765.

The index has undergone several revisions (see *Monthly Labor Review,* February 1962, April 1978, and August 1988). It is now based on approximately 3,200 commodity price series and 80,800 quotations per month. Indexes for the net output of manufacturing and mining industries have been added in recent years. Prices

In Brief

Consumer price changes: 1990-91:

All items index up 3.0 percent
Medical care index up 7.4 percent
Fuel oil index down -4.8 percent

used in constructing the index are collected from sellers, and generally apply to the first significant large volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value of commodities produced or processed in this country. Values are f.o.b. (free-on-board) production point and are exclusive of excise taxes. Effective with the release of data for January 1988, many important producer price indexes were changed to a new reference base year, 1982=100, from 1967=100. The reference year of the PPI shipment weights has been taken primarily from the 1987 Census of Manufactures. For further detail regarding the PPI, see the *BLS Handbook of Methods, Bulletin 2414,* Chapter 16.

Consumer price indexes (CPI).—The CPI is a measure of the average change in prices over time in a fixed "market basket" of goods and services purchased either by urban wage earners and clerical workers or by all urban consumers.

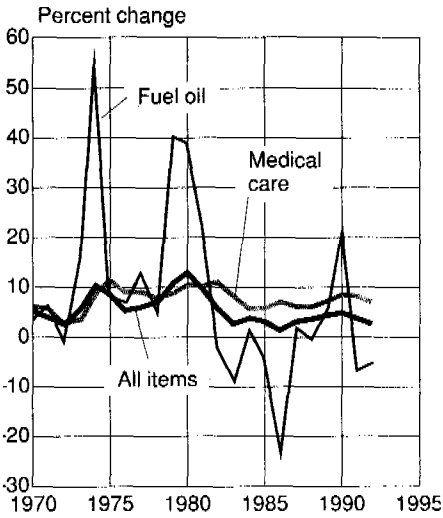
In 1919, BLS began to publish complete indexes at semiannual intervals, using a weighting structure based on data collected in the expenditure survey of wage-earner and clerical-worker families in 1917-19 (BLS Bulletin 357, 1924). The first major revision of the CPI occurred in 1940, with subsequent revisions in 1953, 1964, 1978, and 1987.

Beginning with the release of data for January 1988 in February 1988, most Consumer Price Indexes shifted to a new reference base year. All indexes previously expressed on a base of 1967=100, or any other base through December 1981, have been rebased to 1982-84=100. Selection

of the 1982-84 period was made to coincide with the updated expenditure weights, which are based upon data tabulated from the Consumer Expenditure Surveys for 1982, 1983, and 1984.

BLS publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

CPI—Selected Items: 1970 to 1992



Source: Chart prepared by U.S. Bureau of the Census. For data, see table 757.

The current CPI is based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors' and dentists' services, drugs, etc., purchased for day-to-day living. Prices are collected in 85 areas across the country from over 57,000 housing units and 19,000 establishments. Area selection was based on the 1980 census. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected monthly in the five largest geographic areas and every other month in other areas.

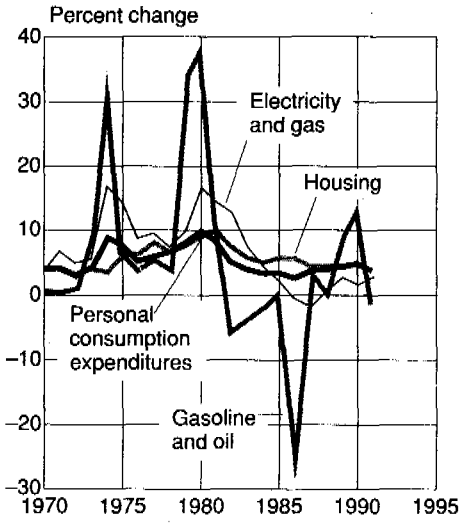
In calculating the index, each item is assigned a weight to account for its relative importance in consumers' budgets. Price changes for the various items in each location are then averaged. Local data are then combined to obtain a U.S. city average. Separate indexes are also published for regions, area size-classes, cross-classifications of regions and size-classes, and for 29 local areas, usually consisting of the Metropolitan Statistical Area (MSA); see Appendix II. Area definitions are those established by the Office of Management and Budget in 1983. Definitions do not include revisions made since 1983. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For further detail regarding the CPI, see the BLS *Handbook of Methods,* Bulletin 2414, Chapter 19; the Consumer Price Index, and Report 736, the CPI: 1987 Revision. In January 1983, the method of measuring homeownership costs in the CPI-U was changed to a rental equivalence approach. This treatment calculates homeowner costs of shelter based on the implicit rent owners would pay to rent the homes they own. The rental equivalence approach was introduced into the CPI-W in 1985. The CPI-U was used to prepare the consumer prices tables in this section.

Other price indexes.—The *fixed-weighted price index* is a weighted average of the detailed price indexes used in the deflation of goods and services that make up the gross domestic product (GDP). These price indexes are combined using weights that reflect the composition of GDP in 1987. Because the same weights are used for each period, changes in this index measure changes in prices over any period.

Measures of inflation.—Inflation is defined as a time of generally rising prices for goods and factors of production. The Bureau of Labor Statistics samples prices of items in a representative market basket and publishes the results as the CPI. The media invariably announce the inflation rate as the percent change in the CPI from month to month. A much more meaningful

indicator of inflation is the percent change from the same month of the prior year.

Selected Fixed-Weighted Price Indexes: 1970 to 1992



Source: Chart prepared by U.S. Bureau of the Census. For data, see table 751.

The Producer Price Index (PPI) measures prices at the producer/manufacturing level only. The PPI shows the same general pattern of inflation as does the CPI, but is more volatile. The PPI can be roughly viewed as a leading indicator. It often tends to foreshadow trends that later occur in the CPI.

Other measures of inflation include the index of industrial materials prices; the Dow Jones Commodity Spot Price Index; Futures Price Index, the Employment Cost Index, the Hourly Compensation Index, or the Unit Labor Cost Index as a measure of the change in cost of the labor factor of production, and changes in long-term interest rates that are often used to measure changes in the cost of the capital factor of production.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to the producer price index and the CPI, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

No. 755. Purchasing Power of the Dollar: 1950 to 1992

[**Indexes: PPI, 1982=$1.00; CPI, 1982–84=$1.00.** Producer prices prior to 1961, and consumer prices prior to 1964, exclude Alaska and Hawaii. Producer prices based on finished goods index. Obtained by dividing the average price index for the 1982=100, PPI; 1982–84=100, CPI base periods (100.0) by the price index for a given period and expressing the result in dollars and cents. Annual figures are based on average of monthly data]

No. 759. Consumer Price Indexes—Selected Areas: 1970 to 1992

[1982-84 = 100, except as indicated. Represents annual averages of monthly figures, except as noted. Local area CPI indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long- term trends are similar. Area definitions are those established by the Office of Management and Budget in 1983. For further detail see the U.S. Bureau of Labor Statistics Handbook of Methods, Bulletin 2285, Chapter 19, the Consumer Price Index, and Report 736, the CPI: 1987 Revision. See also text, section 15]

No. 763. Cost of Living Index—Selected Metropolitan Areas: Third Quarter 1992

[This cost of living index measures relative price levels for consumer goods and services in participating areas for a midmanagement standard of living. The national average equals 100, and each participant's index is read as a percentage of the national average. For example, the Albany-Schenectady-Troy, NY MSA's composite cost of living is 12.4 percent above the national average. The index does not measure inflation, but compares prices at a single point in time. Excludes taxes. Metropolitan areas defined as defined by the Office of Management and Budget. For definitions and components of MSA's, see Appendix II. See source for details. Selection based on 1990 MSA population]

METROPOLITAN AREAS	Composite index	Grocery items	Housing	Utilities	Transportation	Health care
Abilene TX MSA: Abilene	93.0	90.5	85.9	104.6	102.3	91.6
Albany Schenectady-Troy NY MSA: Albany	112.4	113.3	112.2	133.7	111.8	103.4
Albuquerque NM MSA: Albuquerque	99.3	93.3	96.6	97.6	103.7	108.5
Allentown-Bethlehem Easton PA-NJ MSA:						
Allentown-Bethlehem Easton PA	108.7	108.1	107.1	116.1	97.5	103.0

Paint materials	33.3	89.9	109.5	115.7	129.1	136.3	135.8	131.1
Medicinal and botanical chemicals	44.4	91.0	91.8	93.5	100.3	102.2	109.0	111.3
Fats and oils, inedible	49.7	111.6	110.6	110.9	95.5	88.1	86.8	92.9
Mixed fertilizers	35.2	90.0	96.1	104.8	105.9	103.3	105.2	102.5
Nitrogenates	32.7	90.0	96.3	93.3	94.9	92.3	98.5	95.4
Phosphates	27.5	93.0	91.6	103.3	105.6	96.5	98.1	92.4
Other agricultural chemicals	23.2	80.1	86.7	107.4	115.1	119.9	125.6	129.1
Plastic resins and materials	32.0	98.5	107.5	132.4	133.4	124.1	120.0	116.3
Synthetic rubber	34.0	85.3	96.8	108.9	108.5	111.9	106.1	103.8
Plastic construction products	65.5	103.9	108.6	121.1	120.1	117.2	115.1	112.7
Softwood lumber	35.2	107.3	107.4	120.0	127.1	123.8	125.7	148.4
Hardwood lumber	43.7	96.0	117.1	131.0	128.2	131.0	128.5	140.5
Millwork	41.5	93.2	111.7	121.9	127.3	130.4	135.5	143.2
Plywood	46.7	106.2	99.6	103.4	115.9	114.2	114.3	133.0
Woodpulp	28.9	100.3	91.4	136.7	157.4	151.3	119.2	119.8
Paper	38.8	89.7	106.0	123.2	129.6	128.8	126.9	123.1
Paperboard	39.7	92.0	107.7	133.2	140.1	135.7	130.2	134.4
Paper boxes and containers	43.3	89.4	108.8	123.5	129.8	129.9	128.6	130.7
Building paper and board	42.2	86.1	107.4	113.3	115.6	112.2	111.8	119.6
Commercial printing (June 1982=100)	(NA)	(NA)	111.6	119.5	124.9	128.0	130.0	131.1
Foundry and forge shop products	32.4	89.7	105.2	109.6	114.6	117.2	119.0	120.1
Steel mill products	32.7	86.6	104.7	110.7	114.5	112.1	109.5	106.4
Primary nonferrous metals	44.9	132.7	93.6	144.3	149.2	133.4	114.0	108.1
Aluminum mill shapes	36.7	89.3	107.8	130.9	135.4	127.9	123.2	121.9
Copper and brass mill shapes	63.4	112.6	106.9	162.7	182.0	174.6	160.5	166.6
Nonferrous wire and cable	62.6	107.5	100.9	129.6	146.1	142.6	139.2	136.7
Metal containers	34.3	90.9	109.0	110.2	111.5	114.0	115.5	113.9
Hardware	39.8	85.8	109.1	113.7	120.4	125.9	130.2	132.7
Plumbing fixtures and brass fittings	39.9	88.5	111.9	128.7	137.7	144.3	149.7	153.1
Heating equipment	46.6	87.0	109.5	119.2	125.1	131.6	134.1	137.3
Fabricated structural metal products	36.7	88.6	103.2	114.3	120.3	121.8	122.4	122.1
Mechanical power transmission equipment	36.9	84.5	108.2	116.0	121.1	125.3	129.1	132.1
Ball and roller bearings	33.1	80.0	105.9	114.0	124.1	130.6	136.7	139.0
Wiring devices	35.9	81.9	111.7	123.8	129.7	132.2	133.9	134.8
Motors, generators, motor generator sets	37.7	86.0	113.3	121.8	129.0	132.9	134.9	136.5
Switchgear, switchboard, etc., equipment	40.5	88.4	106.7	113.2	119.0	124.4	128.5	131.3
Electronic components and accessories	57.4	88.8	112.4	117.5	119.4	118.4	118.6	117.5
Internal combustion engines	34.5	81.7	104.9	111.4	114.7	120.2	126.0	128.5
Machine shop products	31.1	81.0	112.8	116.8	121.3	124.3	125.9	126.8
Flat glass	52.2	88.7	101.7	109.7	109.7	107.5	105.9	106.6
Concrete products	37.7	92.0	107.5	110.0	111.2	113.5	116.6	117.2
Asphalt felts and coatings	25.8	99.6	102.6	94.7	95.8	97.1	98.2	96.3
Gypsum products	38.9	100.1	132.3	112.9	110.0	105.2	99.3	100.3
Glass containers	33.9	82.3	106.8	112.3	115.2	120.4	125.4	125.1
Motor vehicle parts	32.9	72.9	102.5	107.2	109.7	111.2	112.5	113.0
Photographic supplies	41.0	97.2	107.4	113.1	123.0	127.6	125.8	125.9
Crude materials for further processing	**35.2**	**95.3**	**95.8**	**96.0**	**103.1**	**108.9**	**101.2**	**100.3**
Crude foodstuffs and feedstuffs	45.2	104.6	94.8	106.1	111.2	113.1	105.5	105.1
Wheat	39.7	108.3	87.6	93.7	109.5	87.6	79.4	98.5
Corn	54.5	119.2	105.9	97.1	102.4	100.9	97.0	96.0
Cattle	46.9	104.9	91.2	109.5	113.8	122.5	115.8	115.4
Hogs	45.5	74.5	80.7	81.8	80.5	94.1	82.7	70.7
Live chickens (broilers and fryers)	48.5	103.4	110.5	125.4	131.7	119.5	111.9	114.6
Live turkeys	59.9	112.2	144.6	108.4	119.1	116.9	109.5	106.6
Fluid milk	40.6	96.0	93.7	89.4	98.8	100.8	89.5	96.3
Soybeans	45.3	117.0	94.2	124.8	114.3	100.8	95.1	97.3
Cane sugar, raw	39.9	148.3	104.6	111.9	115.5	119.2	113.7	112.1
Crude nonfood materials	**23.8**	**84.6**	**96.9**	**85.5**	**93.4**	**101.5**	**94.6**	**93.4**
Raw cotton	43.6	135.7	97.7	95.5	105.6	118.2	116.2	89.8
Leaf tobacco	40.3	82.1	101.2	87.2	93.8	95.8	101.1	101.0
Cattle hides	30.4	104.6	126.1	205.8	213.1	217.8	173.4	171.4
Coal	28.1	87.4	102.2	95.4	95.5	97.5	97.2	95.0
Natural gas	7.9	63.3	102.9	77.4	82.0	80.4	79.1	80.2
Crude petroleum	14.5	75.9	84.5	46.2	56.3	71.0	61.9	58.1
Logs, timber, etc.	(NA)	(NA)	96.0	117.7	131.9	142.8	144.1	164.9
Wastepaper	103.2	172.2	122.9	183.6	157.1	138.9	121.4	116.1
Iron ore	35.9	87.8	97.5	82.8	82.8	83.3	83.6	83.7
Iron and steel scrap	59.6	140.9	112.6	177.1	173.7	166.0	147.6	138.8
Nonferrous metal ores (Dec. 1983=100)	(NA)	(NA)	73.2	108.1	109.6	98.3	82.6	75.7
Copper base scrap	100.9	138.9	95.4	157.9	179.8	181.3	170.0	162.7
Aluminum base scrap	34.4	183.9	123.4	219.5	204.4	172.6	143.1	138.3
Construction sand, gravel, and crushed stone	40.9	85.3	110.7	120.6	122.8	125.4	128.6	130.5

No. 767. Producer Price Indexes for the Net Output of Selected Industries: 1985 to 1992

[Indexes are based on selling prices reported by establishments of all sizes by probability sampling. Industries selected by value added. N.e.c.= not elsewhere classified. See text, section 27]

SIC code [1]	ITEM	Index base	1985	1988	1989	1990	1991	1992
2011	Meat packing plants	12/80	90.9	101.7	108.2	119.8	115.1	109.0
2013	Sausages and other prepared meats	12/82	95.7	99.2	102.4	112.7	113.0	108.7
2026	Fluid milk	12/82	102.6	106.0	112.8	121.4	119.0	121.5
2033	Canned fruits and vegetables	06/81	112.7	121.0	128.8	129.9	129.4	129.9
2038	Frozen specialties	12/82	110.8	118.4	123.5	127.3	130.4	131.0
2051	Bread, cake, and related products	06/80	127.1	142.8	153.6	159.4	165.0	173.3
2052	Cookies and crackers	06/83	112.0	126.3	134.6	141.9	148.5	151.2
2082	Malt beverages	06/82	110.0	113.2	115.4	115.2	121.3	123.7
2086	Bottled and canned soft drinks	06/81	112.5	119.5	122.5	127.2	130.3	131.1
2095	Coffee	06/81	111.5	117.8	120.4	120.0	116.5	110.0
2099	Food preparations, n.e.c.	12/85	(NA)	104.8	110.4	114.3	117.3	117.2
2111	Cigarettes	12/82	110.7	150.8	173.1	197.6	225.0	250.5
2221	Synthetic fiber and silk broadwoven fabric	06/81	101.2	110.1	112.3	115.6	115.2	115.9
2335	Women's, misses', and juniors' dresses	12/80	108.0	116.7	122.0	125.6	129.0	129.8
2411	Logging camps and logging contractors	12/81	94.8	112.8	128.0	135.6	135.0	151.3
2421	Sawmills and planing mills	12/80	97.3	107.1	111.6	109.9	111.5	127.7
2431	Millwork	06/83	103.2	113.5	118.9	120.4	125.8	134.4
2511	Wood household furniture, except upholstered	12/79	133.3	147.2	153.7	158.9	163.3	166.9
2621	Paper mill products except building paper	06/81	109.5	127.4	134.6	134.0	131.0	126.6
2631	Paperboard mills	12/82	112.0	141.6	149.9	146.0	140.7	142.8
2653	Corrugated and solid fiber boxes	03/80	119.7	140.2	143.6	139.6	134.5	137.4
2711	Newspaper publishing	12/79	164.0	193.9	206.9	220.4	235.7	248.6
2721	Periodical publishing	12/79	157.9	183.8	194.0	205.7	217.8	227.9
2731	Book publishing	12/80	134.1	155.1	165.4	175.2	183.4	189.5
2752	Commercial printing, lithographic	06/82	111.0	118.5	124.1	127.9	129.7	130.8
2759	Commercial printing, n.e.c.	06/82	112.9	128.2	133.7	136.1	140.8	143.8
2761	Manifold business forms	12/83	106.2	120.3	124.9	124.6	123.9	120.0
2819	Industrial inorganic chemicals, n.e.c	12/82	100.4	104.7	116.2	117.9	119.4	118.9
2821	Plastic materials and resins	12/80	113.6	144.0	147.3	139.5	137.9	131.8
2824	Noncellulosic manmade fibers	06/81	97.6	96.8	101.5	102.7	101.9	101.7
2834	Pharmaceutical preparations	06/81	141.3	175.6	190.2	203.5	217.3	231.2
2841	Soap and other detergents	06/83	104.2	110.5	115.5	115.2	116.0	118.5
2842	Specialty cleaning, polish. and sanitation preps.	06/83	103.9	110.2	115.6	118.6	121.5	123.1
2844	Toilet preparations	03/80	135.4	145.6	149.8	153.2	158.0	162.5
2851	Paints and allied products	06/83	104.9	111.7	119.5	125.0	130.3	132.3
2865	Cyclic (coal tar) crudes & intermediates	12/82	96.9	105.8	112.7	114.1	113.3	113.6
2869	Industrial organic chemicals, n.e.c	12/82	101.3	120.0	128.7	125.6	129.1	127.5
2899	Chemicals and chemical preparations, n.e.c	06/85	(NA)	104.3	111.3	112.5	115.7	117.2
2911	Petroleum refining	06/85	98.3	85.4	73.6	90.1	80.9	78.2
3011	Tires and inner tubes	06/81	96.8	99.5	102.9	103.0	105.0	106.1
3273	Ready-mixed concrete	06/81	108.6	109.7	111.5	114.3	116.9	117.3
3312	Blast furnaces and steel mills	06/82	104.9	109.4	113.0	110.8	108.4	105.9
3321	Gray iron foundries	12/80	115.6	118.3	120.9	123.4	125.6	126.9
3357	Nonferrous wire drawing and insulating	12/82	100.5	132.7	153.5	148.7	145.0	141.8
3411	Metal cans	06/81	110.4	111.2	113.7	116.6	118.1	117.0
3429	Hardware, n.e.c.	06/85	(NA)	100.7	106.5	110.6	113.3	114.9
3441	Fabricated structural metal	06/82	103.0	113.0	118.0	118.6	117.3	116.7
3443	Fabricated plate work	03/80	120.8	129.6	137.1	142.3	145.8	147.0
3444	Sheet metal work	12/82	107.2	121.4	128.4	129.4	128.2	126.6
3465	Automotive stampings	12/82	110.4	108.1	109.9	112.6	111.7	111.6
3469	Metal stampings, n.e.c.	06/84	101.4	111.5	118.8	121.1	122.5	123.2
3499	Fabricated metal products, n.e.c.	06/85	(NA)	109.6	114.6	117.6	119.0	119.2
3519	Internal combustion engines, n.e.c	12/82	103.4	106.7	110.6	115.7	120.7	123.4
3523	Farm machinery and equipment	12/82	105.3	108.1	113.0	116.8	120.5	124.0
3531	Construction machinery	12/80	119.5	125.8	132.4	137.6	142.0	146.9
3544	Special tools, dies, jigs, fixtures and indus. molds	06/81	113.5	118.2	121.1	124.5	129.3	131.0
3559	Special industry machinery, n.e.c	12/81	116.4	127.2	132.9	137.5	142.4	145.9
3585	Refrigeration and heating equipment	12/82	104.7	110.8	115.5	119.0	119.7	121.1
3599	Machinery, except electrical, n.e.c	06/84	102.0	106.0	110.8	113.9	114.4	114.3
3621	Electric motors and generators	06/83	108.2	116.4	123.3	127.5	129.7	131.5
3661	Telephone & telegraph apparatus	12/85	(NA)	108.3	110.2	112.0	112.8	112.4
3674	Semiconductors and related devices	06/81	106.6	108.3	107.5	105.0	102.8	98.5
3679	Electronic components, n.e.c.	06/82	108.6	112.5	113.9	115.1	115.2	117.7
3711	Motor vehicles and passenger car bodies	06/82	107.2	114.1	117.4	119.9	125.3	129.1
3714	Motor vehicle parts and accessories	12/82	100.6	105.3	107.4	108.9	110.3	111.0
3721	Aircraft	12/85	(NA)	101.5	110.2	116.0	120.4	124.3
3724	Aircraft engines and engine parts	12/85	(NA)	103.8	106.6	112.6	117.9	123.5
3728	Aircraft parts and auxiliary equipment, n.e.c	06/85	(NA)	109.6	113.1	116.3	120.3	124.9
3731	Ship building and repairing	12/85	(NA)	105.5	110.2	114.0	116.2	118.3
3861	Photographic equipment and supplies	12/83	101.5	105.3	109.3	112.2	111.9	112.0

No. 780. Export Price Indexes—Selected Commodities: 1985 to 1992

[1985=100, **except as noted. As of June quarter.** Indexes are weighted by 1980 export values according to the Schedule B classification system of the U.S. Bureau of the Census. Prices used in these indexes were collected from a sample of U.S. manufacturers of exports and are factory transaction prices, except as noted. F.a.s.=free alongside ship. N.e.s.=not elsewhere specified. F.o.b.=free on board]

COMMODITY	1985 [1]	1986	1987	1988	1989	1990	1991	1992

Banking, Finance, and Insurance

This section presents data on the Nation's finances, various types of financial institutions, money and credit, securities, and insurance. The primary sources of these data are publications of several departments of the Federal Government, especially the Treasury Department, and independent agencies such as the Federal Deposit Insurance Corporation, the Federal Reserve System, and the Securities and Exchange Commission. National data on insurance are available primarily from private organizations, such as the American Council of Life Insurance.

In Brief

Conventional new-home mortgage rates:	
1980	13.95%
1990	10.08%
1992	8.43%
Dow-Jones industrial average:	
1980	891.4
1990	2,678.9
1992	3,284.3

Flow of funds.—The flow of funds accounts of the Federal Reserve System (see tables 784 to 787) bring together statistics on all of the major forms of financial transactions and financial claims to present an economy-wide view of asset and liability relationships. In flow form, the accounts relate borrowing and lending to one another and to the nonfinancial activities that generate income and production. Each claim outstanding is included simultaneously as an asset of the lender and as a liability of the debtor. The accounts also indicate the balance between asset totals and liability totals over the economy as a whole. Several publications of the Board of Governors of the Federal Reserve System contain information on the flow of funds accounts: Summary data on flows and outstandings, in the *Federal Reserve Bulletin, Flow of Funds Accounts* (quarterly), and *Annual Statistical Digest;* and concepts and organization of the accounts, in *Introduction to Flow of Funds* (June 1980).

Banking system.—Banks in this country are organized under the laws of both the States and the Federal Government and are regulated by several bank supervisory agencies. National banks are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected from national banks since 1863. Summaries of these reports are published in the Comptroller's *Annual Report,* which also presents data on the structure of the national banking system.

The Federal Reserve System was established in 1913 to exercise central banking functions, some of which are shared with the U.S. Treasury. It includes national banks and such State banks that voluntarily join the System. Statements of State bank members are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the System. Balance sheet data for member banks and other commercial banks are published quarterly in the *Federal Reserve Bulletin.* The Federal Deposit Insurance Corporation (FDIC), established in 1933, insures each depositor up to $100,000 currently in banks that are members of the Federal Reserve System and in such nonmember banks that join the Bank Insurance Fund. Major item balance sheets for all commercial banks are published monthly in the *Federal Reserve Bulletin.*

The FDIC is the primary federal regulator of State-chartered banks that are not members of the Federal Reserve System and of most savings banks insured by the Bank Insurance Fund. The agency also has certain back–up supervisory authority, for safety and soundness purposes, over State-chartered banks that are members of the Federal Reserve System, national banks, and savings associations.

Savings institutions.—Savings institutions are primarily involved in credit extension in the form of mortgage loans. Statistics on savings institutions are collected by the U.S. Office of Thrift Supervision. The Financial Institutions Reform, Recovery,

and Enforcement Act of 1989 (FIRREA) authorized the establishment of the Resolution Trust Corporation (RTC). The RTC is responsible for the disposal of assets from failed savings institutions. FIRREA gave the FDIC the job of managing the federal deposit insurance fund for savings institutions (SAIF=Savings Association Insurance Fund).

Other credit agencies.—Insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies represent important sources of funds for the credit market. Statistics on loans, investments, cash, etc., of life insurance companies are published principally by the American Council of Life Insurance in its *Life Insurance Fact Book.* Consumer credit data are published currently in the *Federal Reserve Bulletin.*

Federally chartered credit unions are under the supervision of the National Credit Union Administration, established in 1970. State-chartered credit unions are supervised by the respective State supervisory authorities. The Administration publishes comprehensive program and statistical information on all Federal and federally insured State credit unions in the *Annual Report of the National Credit Union Administration.* Deposit insurance (up to $100,000 per account) is provided to members of all Federal and those State credit unions that are federally-insured by the National Credit Union Share Insurance Fund which was established in 1970. Deposit insurance for State chartered credit unions is also available in some States under private or State-administered insurance programs.

Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Data on operations of Government credit agencies, along with other Government corporations, are available in reports of individual agencies; data on their debt outstanding are published in the *Federal Reserve Bulletin.*

Currency.—Currency, including coin and paper money, represents about 30 percent of all media of exchange in the United States, with most payments made by check. All currency is now issued by the Federal Reserve Banks.

Securities.—The Securities and Exchange Commission (SEC) was established in 1934 to protect the interests of the public and investors against malpractices in the securities and financial markets and to provide the fullest possible disclosure of information regarding securities to the investing public. Statistical data are published in the *SEC Annual Report.*

Insurance.—Insuring companies, which are regulated by the various States or the District of Columbia, are classified as either life or property. Companies that underwrite accident and health insurance only and those that underwrite accident and health insurance in addition to one or more property lines are included with property insurance. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital or surplus.

There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Individual States collect data on all insurers operating within their respective jurisdictions, and many of the States publish an annual insurance report giving individual company data and aggregates of certain items for the companies operating within the State. Organizations representing certain classes of insurers publish reports for these classes. Among them are the annual commercial publishers, such as The National Underwriter Company whose *Argus Health Chart* (annual) contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. The American Council of Life Insurance publishes statistics on life insurance purchases, ownership, benefit payments, and assets in its biennial *Life Insurance Fact Book.*

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

No. 782. Gross National Product in Finance, Insurance, and Real Estate, in Current and Constant (1982) Dollars: 1980 to 1989

[**In billions of dollars, except percent.** For definition of gross national product, see text, section 14. These data are not fully consistent with other gross domestic product tables because they do not yet reflect the results of the comprehensive National Income and Product Accounts revision; see text, section 14. Based on 1972 Standard Industrial Classification]

- Represents or rounds to zero. [1] Includes personal trusts and nonprofit organizations. [2] Includes monetary authority, not shown separately. [3] Nonbank finance liability is redemption value of shares of open-end investment companies. [4] Assets shown at market value. No specific liability attributed to issuers of stocks other than open-end investment companies for amounts outstanding. [5] Includes "Other loans," not shown separately. [6] Includes savings bonds and other nonmarketable debt held by public. [7] Issues by agencies in the budget and by sponsored credit agencies in financial sectors, issues backed by mortgage pools, and loan participation certificates. [8] Asset is corporate only; noncorporate credit deducted in liability total to conform to quarterly flow tables.

B Base figure too small. [1] Includes other types of debt, not shown separately.

Source: Board of Governors of the Federal Reserve System, *Federal Reserve Bulletin*, January 1992.

No. 790. Use of Financial Services by Households, by Type of Financial Institution: 1989

[In percent, except as indicated. Use of a financial institution consists of use of one or more of the types of accounts shown in table 791. Savings institutions consist of savings and loan associations and savings banks. Other nondepository financial institutions include mortgage banks and insurance companies. An institution is local if the office or branch used by the household is located 30 miles or less from the household or workplace of the primary user. Based on the Survey of Consumer Finance, see headnote, table 788. For definition of mean, see Guide to Tabular Presentation]

ITEM	All financial institutions	DEPOSITORY				NONDEPOSITORY			
		Total	Commercial bank	Savings	Credit union	Total	Finance company	Brokerage firm	Other financial
Percentage of households using financial institutions, total [1]	90.3	88.6	77.6	39.4	26.5	42.8	21.3	14.0	18.1
Local	89.5	87.8	75.4	37.4	23.0	28.5	13.3	10.1	7.2
Nonlocal	17.8	11.7	6.8	3.5	4.4	17.5	9.0	4.6	10.9
Mean number of accounts used per household, total	4.73	3.92	2.40	0.91	0.61	0.81	0.29	0.30	0.22
Institutions identified by household as—									
Primary financial institution [2]	100.0	96.4	64.7	22.0	9.7	3.6	2.0	1.3	0.4
Main checking institution [3]	100.0	99.5	69.2	21.2	9.1	0.5	0.2	0.4	(Z)

Z Less than .05 percent. [1] Sum of local and nonlocal exceeds total because some households use both local and nonlocal institutions. [2] 84.7 percent of households designated a primary financial institution. [3] 81.3 percent of households designated a main checking institution.

No. 791. Percent of Households Using Financial Accounts, by Type of Account and Source: 1989

[See headnote, table 790]

No. 796. 500 Largest Banks in the World—Number and Deposits, by Location of Bank: 1980 to 1991

[**Deposits in billions of dollars, except percent.** Data cover U.S. commercial banks and foreign banks that conduct a commercial banking business; beginning 1983, includes U.S. and foreign savings banks. Beginning 1983, covers top 500 banks in assets available. Number of banks includes banks more than 50 percent owned by other banks. To avoid double-counting of deposits, banks more than 50 percent owned by other banks are excluded from deposit totals if their parent bank consolidates their deposits]

No. 802. Foreign Lending by U.S. Banks, by Type of Borrower and Country: 1992

[**In millions of dollars.** As of **December**. Covers 150 U.S. banking organizations which do nearly all of the foreign lending in the country. Data represent claims on foreign residents and institutions held at all domestic and foreign offices of covered banks. Data cover only cross-border and nonlocal currency lending. These result from a U.S. bank's office in one country lending to residents of another country or lending in a currency other than that of the borrower's country. Excludes local currency loans and other claims and local currency liabilities held by banks' foreign offices on residents of the country in which the office was located (e.g. Deutsche mark loans to German residents booked at the German branch of the reporting U.S. bank). Criteria for country selection is $2.1 billion or more]

No. 830. Foreign Purchases and Sales of U.S. Securities, by Type of Security, 1980 to 1992, and by Selected Country, 1992

[**In billions of dollars.** Covers transactions in all types of long-term domestic securities by foreigners as reported by banks, brokers, and other entities in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series). Data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. Includes transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. Data by country show the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The term "foreigner" covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries and other affiliates abroad of U.S. banks and businesses; the central governments, central banks, and other official institutions of foreign countries; and international and regional organizations. "Foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners. Minus sign (-) indicates net sales by foreigners or a net outflow of capital from the United States]

Source of tables 844-846: American Council of Life Insurance, Washington, DC, *Life Insurance Fact Book*, biennial.

Business Enterprise

This section relates to the place and behavior of the business firm and to business initiative in the American economy. It includes data on the number, type, and size of businesses; financial data of domestic and multinational U.S. corporations; business investment, expenditures, and profits; sales and inventories; and business failures. Additional business data may be found in other sections, particularly 27 and 28.

The principal sources of these data are the *Survey of Current Business,* published by the Bureau of Economic Analysis (BEA), the *Federal Reserve Bulletin,* issued by the Board of Governors of the Federal Reserve System, the annual *Statistics of Income* reports of the Internal Revenue Service (IRS), *The Business Failure Record* issued by The Dun & Bradstreet Corporation, New York, and *Fortune* and *The Fortune Directory,* issued by Time, Inc., New York.

Business firms.—A firm is generally defined as a business organization under a single management and may include one or more establishments (i.e., a single physical location at which business is conducted). The terms firm, business, company, and enterprise are used interchangeably throughout this section. Examples of series where the industrial distribution is based on data collected from establishments are those on capital stock (table 879), those on gross national product by industry (table 691), and those on employment and earnings (section 13). Examples of company-based series are those on business expenditures for new plant and equipment (table 878), those from IRS *Statistics of Income* (tables 856 and 857), and those on corporation profits by industry (tables 888 and 889). A firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. The industrial classification is based on the *Standard Industrial Classification (SIC) Manual* (see text, section 13). The IRS concept of a business firm relates primarily to the legal entity used for tax reporting purposes. The IRS *Statistics of Income* reports present data, based on a sample of tax returns before audit, separately for sole proprietorships, partnerships, and corporations. Data presented are for active enterprises only. A *sole proprietorship* is an unincorporated business owned by one person including large enterprises with many employees and hired managers and part-time operations in which the owner is the only person involved. A *partnership* is an unincorporated business owned by two or more persons, each of whom has a financial interest in the business. The "persons" could be individuals, estates, trusts, other partnerships, or corporations. A *corporation* is a business that is legally incorporated under State laws. The IRS recognizes many types of businesses as corporations, including joint-stock companies, insurance companies, and unincorporated associations such as business trusts, etc. While many corporations file consolidated tax returns, most corporate tax returns represent individual corporations, some of which are affiliated through common ownership or control with other corporations filing separate returns.

In Brief

Patents issued in 1991: 106,800
Percent issued to foreign country residents: 46%

Bankruptcies filed in 1992: 972,490
Business: 7%
Nonbusiness: 93%
Change from 1991 10%

Assets and liabilities.—In its annual report, *Statistics of Income, Corporation Income Tax Returns,* the IRS presents balance sheet and income estimates for all active U.S. corporations. The Bureau of the Census issues the *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations* (QFR), which presents quarterly income account and balance sheet data for manufacturing, mining, and trade industries. This report was prepared by the Federal Trade Commission until responsibilities for QFR were transferred to Census beginning with the fourth quarter 1982 report.

One of the most comprehensive measures of the investment position of the business sector (and the only measure adjusted to current replacement cost) is the BEA

capital stock series. See *Survey of Current Business,* January 1992.

Income, profits, dividends, and taxes.—Several agencies, among them IRS and BEA, compile corporate income account data. These data, however, are not comparable because of differing definitions and methods of compilation. A reconciliation of the two can be found in table 8.22 of *Survey of Current Business,* published by BEA. The IRS publishes financial data for all business enterprises. These data appear in *Statistics of Income, Corporation Income Tax Returns* and the *Statistics of Income Bulletin* (partnerships and sole proprietorships). Data on international income and taxes reported by U.S. corporations are also included in the *Statistics of Income Bulletin* and in the periodic *Compendium of Studies of International Income and Taxes.*

Corporate data issued by BEA are a part of its national income and product accounts (see text, section 14). The primary sources for BEA estimates of profits, taxes, dividends, and undistributed profits are the original corporate tax returns submitted to IRS. Various adjustments of IRS data are required by the national income treatment—particularly with respect to profits which would be disclosed if all tax returns were audited: depletion, capital gain or loss, treatment of bad debts, measurement of income received from abroad, and intercorporate dividends—to make the figures comparable with other entries in the national income accounts. For a discussion of two types of adjustments (inventory valuation and capital consumption), see text, section 14. The BEA's corporate profits data also include net earnings of Federal Reserve banks, credit unions, private noninsured pension funds, and several quasi-government credit agencies not included in IRS data.

Sources and uses of corporate funds.—These data (table 853, Federal Reserve Board) show capital requirements of corporations and the manner in which they are financed. Sources of funds should be equal to their uses. Certain discrepancies, however, interfere with this equality due to omission of (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment, (2) transactions in securities held as permanent investments except public offerings, and (3) net purchases of land. Also, the balance sheet data upon which many of the financial flow estimates are based are not fully comparable with the tax-return based estimates of internal sources or the establishment series underlying the figures on inventory change.

Fortune 500.—**Sales** include service and rental revenues but exclude dividends, interest, and other non-operating revenues. All companies must have derived more than 50 percent of their sales from manufacturing and/or mining. Sales of subsidiaries are included when they are consolidated. **Assets** are those shown at the company's year-end. **Net income** is shown after taxes and after extraordinary credits or charges when any are shown on the income statement. **Stockholder's equity** is the sum of capital stock, surplus, and retained earnings at the company's year-end. Redeemable preferred stock is excluded when its redemption is either mandatory or outside the control of the company, except in the case of cooperatives. **Total returns to investors** include both price appreciation and dividend yield. Returns are adjusted for stock splits, stock dividends, recapitalizations, and corporate reorganizations as they occur. For further discussion, see Time, Inc., New York, NY, *The Fortune Directories.*

Economic censuses.—The economic censuses constitute comprehensive and periodic canvasses of the Nation's industrial and business activities. The first economic census of the United States was conducted as part of the 1810 decennial census, when inquiries on manufacturing were included with the census of population. Minerals data were collected in 1840. The first censuses of construction and business were taken for 1929. An integrated economic census program was begun for 1954. In that year, the censuses covered the retail and wholesale trades, selected service industries, manufactures, and mineral industries. The economic censuses are taken at 5-year intervals covering years ending in "2" and "7." Special surveys are conducted every 5 years as part of the economic censuses to determine the extent of business ownership by specific minority groups and women.

No. 847. Number of Returns and Business Receipts, by Size of Receipts and Type of Business: 1970 to 1989

[Covers active enterprises only. Figures are estimates based on sample of unaudited tax returns; see Appendix III. The industrial distribution is based on data collected from companies; see text, section 17. See also *Historical Statistics, Colonial Times to 1970*, series V 1-12]

[1] Excludes investment income except for partnerships (through 1985) and corporations in finance, insurance, and real estate. [2] Includes firms with no receipts. [3] Number of businesses for 1970 and 1980. Number of nonfarm sole proprietorship returns is not available prior to 1981. However, the number of returns and the number of businesses are very closely related. Since 1970, the ratio of number of returns to the number of businesses has remained approximately 1 to 1.1.

Services	7,039	299	990	226	162	680	74	27	11

[1] Through 1980, includes both individually owned business and farm returns; thereafter, includes only nonfarm business returns. [2] Excludes investment income except for partnerships (through 1985) and corporations in finance, insurance, and real estate. For 1987, partnerships and S corporations exclude gross income from rental real estate and other rental activities and portfolio income distributed directly to partners or shareholders. S corporations have no more than 35 shareholders (10 prior to 1983) most of which are individuals, electing to be taxed at the shareholder level. [3] Net income (less loss) is defined differently by form of organization, basically as follows: (a) Proprietorships: Total taxable receipts less total deductions, including cost of sales and operations (except charitable contributions and owners' salary), investment and other income are excluded; (b) Partnerships: Total taxable receipts less total deductions, including cost of sales and operations (except foreign taxes and oil depletion), investment and other income (except capital gains); (c) Corporations: Total taxable receipts less total deductions, including cost of sales and operations; investment and other income, such as capital gains and income from foreign corporations considered received for tax purposes only; net income is before income tax. [4] Includes businesses not specifically allocated to industries below. [5] Represents agricultural services only. [6] Includes trade business not identified as wholesale or retail.

Income tax after credits [9]	62	45	51	62	61	72	84	92	96

[1] Represents corporations with no more than 35 shareholders (10 prior to 1983), most of which are individuals, electing to be taxed at the shareholder level. [2] Includes items not shown separately. [3] Payable in less than 1 year. [4] Payable in 1 year or more. [5] Appropriated and unappropriated. [6] Beginning 1987, receipts, deductions and net income of S corporations (footnote 1) limited to those from trade or business. Except for total receipts, excludes income and expenses related to certain investment activities. [7] Beginning 1987, includes sales and cost of sales of securities, commodities and real estate by exchanges, brokers or dealers selling on their own account. In 1989, excludes investment income for corporations in finance, insurance, and real estate. Such income is included in total receipts. [8] Includes tax-exempt interest on Government obligations issued by U.S., State, and local governments. [9] Consists of regular (and alternative tax); excludes minimum tax and adjustments for certain prior year credits.

NA Not available. [1] Data through 1983 represent number of names listed in July issue of *Dun & Bradstreet Reference Book*. Data for 1984-92 represent the number of establishments listed in the Dun's Census of American Business. The base has been changed due to expanded business failure coverage. [2] Source: U.S. Bureau of Economic Analysis, *Survey of Current Business*. [3] Includes concerns discontinued following assignment, voluntary or involuntary petition in bankruptcy, attachment, execution, foreclosure, etc.; voluntary withdrawals from business with known loss to creditors; also enterprises involved in court action, such as receivership and reorganization or arrangement which may or may not lead to discontinuance; and businesses making voluntary compromise with creditors out of court. [4] Liabilities exclude long-term publicly held obligations; offsetting assets are not taken into account.

Source: Except as noted, Dun & Bradstreet Corporation, New York, NY, *New Business Incorporations*, monthly; and *Monthly Failure Report*.

No. 869. Mergers and Acquisitions—Summary: 1980 to 1990

[Covers transactions valued at $1 million or more. Values based on transactions for which price data revealed. **All activity** includes mergers, acquisitions, acquisitions of interest, acquisitions of controlling interest, divestitures, and leveraged transactions that result in a change in ownership. **Divestiture:** sale of a business, division, or subsidiary by corporate owner to another party. **Leveraged buyout:** acquisition of a business in which buyers use mostly borrowed money to finance purchase price and incorporate debt into capital structure of business after change in ownership]

Z Less than 50. [1] Includes patents to foreign governments. [2] Includes patents for inventions, designs, botanical plants, and reissues. [3] Includes Defensive Publications, a practice which began in November 1968 and ended in July 1986; and Statutory Invention Registrations, the current practice, which began May 1985. These documents are patent applications, which are published to provide the defensive properties of a patent, but do not have the enforceable rights of a patent.

- Represents or rounds to zero. [1] Product introduced under completely or partly new brand name. [2] Product introduced in a category with an existing brand name which has not been used in the category before. [3] Introduction of a new variety, format, size or package of an existing product/brand name. [4] Product which offers consumers something significantly different from existing products. [5] Added or new ingredient which offers a benefit not previously provided by existing products in its category. [6] Special category for new products which do not compete with any existing category of products. [7] New product packaged in a way that makes it easier to store, handle, prepare, or dispense than others in its category. [8] New product presented for new users or uses compared to existing products in its category. [9] New product with added consumer benefits resulting from use of a new technology. [10] New products introduced in the United States by foreign companies. [11] New products introduced by U.S. and foreign companies outside the United States.

No. 877. Fixed Nonresidential Private Capital Valued in Current and Constant (1987) Dollars: 1980 to 1992

[**In billions of dollars.** Stocks as of **Dec. 31**; depreciation over entire calendar year. Data refer to privately owned assets and are based on the fixed capital formation components of the gross domestic product. Excludes residential capital and government enterprises; includes nonprofit institutions. Gross stocks allow for retirement; net stocks allow for retirement and depreciation. Net stock and depreciation estimates are based on the straight-line depreciation formula. For manufacturing industry, see table 1263]

No. 878. Business Expenditures for New Plant and Equipment: 1980 to 1993

[**In billions of dollars.** Based on sample and subject to sampling variability; see text, section 17. Represents expenditures for new facilities and for expansion or replacement of existing facilities that are chargeable to fixed asset accounts and for which depreciation or amortization accounts are ordinarily maintained. Excludes expenditures for land and mineral rights; maintenance and repair; used plant and equipment, including that purchased or acquired through mergers or acquisitions; assets located in foreign countries; residential structures; etc. They also differ from the nonresidential fixed investment data in type of detail, data sources, coverage, and timing. For further information, see the February 1985 *Survey of Current Business*]

No. 883. Manufacturing Corporations, Assets, and Profits, by Asset Size: 1970 to 1991

[Corporations and assets as of **end of 4th quarter;** profit for **entire year.** Through 1979, corporations under $10 million based on sample; $10 million and over based on complete canvass. The asset value for complete canvass was raised in 1980 to $25 million and again in 1988 to $50 million. Asset sizes less than these values continue to be sampled, except as noted. For details regarding methodology, see source for first quarter, 1988]

NS Not significant. X Not applicable. [1] Represents primary earnings per share before extraordinary item divided by common shareholders' equity per share. Common shareholders' equity is total shareholders' equity including the stated value of all preferred stock at the beginning of each year minus the involuntary liquidating value of nonconvertible preferred shares. [2] After-tax profits, the amount remaining if the interest paid on longterm debt was taxed, and minority interest divided by a firm's total capitalization. Total capitalization is long-term debt, common and preferred equity, deferred taxes, investment tax credits, and minority interest in consolidated subsidiaries. [3] Net sales plus other operating revenue.

No. 895. U.S. Multinational Companies—Assets, Sales, Employment, Employee Compensation, and U.S. Exports and Imports: 1990

[Preliminary. In billions of dollars, except as indicated. Consists of nonbank U.S. parent companies and their nonbank foreign affiliates. U.S. parent is a U.S. person that owns or controls directly or indirectly, 10 percent or more of the voting securities of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise. A U.S. person can be an incorporated business enterprise. A foreign affiliate is a foreign business enterprise owned or controlled by a U.S. parent company]

Communications

This section presents statistics on the usage, finances, and operations of the Postal Service and of the various communications media: telephone, telegraph, radio, television, newspapers, and periodicals. Expenditure data for advertising in the media are also included.

Postal Service.—The Postal Service provides mail processing and delivery services within the United States. The Postal Reorganization Act of 1970 created the Postal Service, effective July 1971, as an independent establishment of the Federal Executive Branch.

Revenue and cost analysis describes the Postal Service's system of attributing revenues and costs to classes of mail and service. This system draws primarily upon probability sampling techniques to develop estimates of revenues, volumes, and weights, as well as costs by class of mail and special service. The costs attributed to classes of mail and special services are primarily incremental costs which vary in response to changes in volume; they account for roughly 60 percent of the total costs of the Postal Service. The balance represents "institutional costs." Statistics on revenues, volume of mail, and distribution of expenditures are presented in the Postal Service's annual report, *Cost and Revenue Analysis,* and its *Annual Report of the Postmaster General.*

Communication media.—The Bureau of the Census *Annual Survey of Communication Services* (ASCS) covers all employer firms with one or more establishments that are primarily engaged in providing point-to-point communication services, whether by wire or radio, and whether intended to be received aurally or visually. This includes telephone communications, including cellular and other radiotelephone services; telegraph and other message communications, such as electronic mail services, facsimile transmission services, telex services, and so on; radio and television broadcasting stations and networks; cable and other pay television services; and other communication services, such as radar station operations, satellite earth stations, satellite or missile tracking stations, and so on. The report presents statistics that are summarized by kind-of- business classification based on the 1987 edition of the *Standard Industrial Classification Manual.*

In Brief

Households in 1992 with:	
Telephone service	*94%*
Radio sets	*99%*
Television	*98%*
Percent of TV households:	
Cable television	*60%*
VCR's	*73%*

The Federal Communications Commission (FCC), established in 1934, regulates wire and radio communications. Only the largest carriers and holding companies file annual or monthly financial reports. The FCC has jurisdiction over interstate and foreign communication services, but not over intrastate or local services. The gross operating revenues of the telephone carriers reporting annually to the FCC, however, are estimated to cover about 90 percent of the revenues of all U.S. telephone companies. Data are not comparable with Bureau of the Census *Annual Survey of Communication Services* because of coverage (*ASCS* includes all domestic long-distance telephone companies, all local exchange carriers, and all cellular telephone companies) and different accounting practices for those telephone companies which report to the FCC.

Reports filed by the broadcasting industry cover substantially all radio and television stations operating in the United States. The private radio services represent the largest and most diverse group of licensees regulated by the FCC. These services provide voice, data communications, point-to-point and point-to-multipoint radio communications for fixed and mobile communicators. Major users of these services are small businesses, the aviation industry, the maritime trades, the land transportation industry, manufacturing industries, State and local public safety and governmental authorities, emergency medical service provid-

ers, amateur radio operators, and personal radio operations (CB and the General Mobile Radio Service). The FCC also licenses entities as private and common carriers. Private and common carriers provide fixed and land mobile communications service on a for-profit basis. Principal sources of wire, radio, and television data are the FCC's *Annual Report* and its annual *Statistics of Communications Common Carriers.*

Statistics on the printed media are available from the U.S. Bureau of the Census, as well as from various private agencies. The censuses of manufactures (conducted by the Census Bureau every 5 years, for the years ending in "2" and "7") provide statistics on the number and circulation of newspapers and periodicals and on sales of books and pamphlets. Editor & Publisher Co. New York, NY presents annual data on the number and circulation of daily and Sunday newspapers in its *International Year Book.* Monthly data on new books and new editions appear in *Publishers Weekly,* issued by R. R. Bowker Company, New York. (See table 402 for annual data.)

Advertising.—Data on advertising expenditures are compiled primarily by McCann-Erickson, Inc., which compiles certain of the data shown (see tables 920-921). Monthly index figures of advertising in certain media are also published periodically by McCann-Erickson in *Advertising Age.*

The Broadcast Advertisers Reports distinguishes between spot and local advertising primarily on the basis of the type of advertiser to whom the time is sold, rather than how and by whom it is sold. In general, time purchased on behalf of retail or service establishments in the market is considered local, even though the establishments may be part of a national or regional chain. That is, spot advertising promotes a product, while local advertising promotes a given establishment. Network advertising, mutually exclusive of spot and local, is broadcast through the network system.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

No. 896. U.S. Postal Service—Summary: 1980 to 1991

[**Employees in thousands; revenue and expenditures in millions of dollars, except as indicated. For fiscal years;** see text, section 9. Includes Puerto Rico and all outlying areas except Canal Zone. See text, section 18. See also *Historical Statistics, Colonial Times to 1970*, series R 163-171]

NA Not available. [1] Items mailed at 1st-class rates and weighing 12 ounces or less. [2] Includes mobile unit employees. [3] Includes fringe benefits. [4] Net revenues after refunds of postage. Includes operating reimbursements, embossed envelope purchases, indemnity claims, and miscellaneous revenue and expenditure offsets. Shown in year which gave rise to the earnings. [5] Includes controlled circulation publications. [6] Items otherwise qualified as 1st-class or airmail that exceeds 12 ounces and 8 ounces, respectively. [7] Includes mail paid at other than bulk rates. Publishers' mail includes printed publications periodically issued and mailed at a known post office to paid subscribers, such as regular rate newspapers and magazines, and classroom and nonprofit rate publications. See source for further detail. [8] Items less than 16 ounces in weight not mailed at either 1st- or 2d-class rates. [9] Items not mailed at 1st-, 2d-, or 3d-class rates, except government and international mail. May include parcel post, catalogs weighing 16 ounces or more, books, films, and records. [10] Penalty and franked. Beginning in 1988 penalty and franked mail are included in their appropriate classes of mail. [11] Mail from United States to foreign countries paid at international mail rates. [12] Consists of unassignable revenues. [13] Shown in year in which obligation was incurred.

No. 906. Cellular Telephone Industry: 1984 to 1992

[**Calendar year data.** Based on a survey mailed to 1,506 cellular systems]

ITEM	Unit	1984	1985	1987	1988	1989	1990	1991	1992
Systems	Number	32	102	312	517	584	751	1,252	1,506
Subscribers	1,000	92	340	1,231	2,069	3,509	5,283	7,557	11,033
Cell sites [1]	Number	346	913	2,305	3,209	4,169	5,616	7,847	10,307
Employees	Number	1,404	2,727	7,147	11,400	15,927	21,382	26,327	34,348
Service revenue	Mil. dol.	178	482	1,152	1,960	3,341	4,549	5,709	7,853
Roamer revenue [2]	Mil. dol.	(NA)	(NA)	(NA)	89	295	456	704	973
Capital investment	Mil. dol.	355	556	798	1,039	1,206	1,801	2,390	2,590
Average monthly bill [3]	Dollars	(NA)	(NA)	96.83	98.02	89.30	80.90	72.74	68.68
Average call length [3]	Minutes	(NA)	(NA)	2.33	2.26	2.48	2.20	2.38	2.58

NA Not available. [1] The basic geographic unit of a cellular system. A city or county is divided into smaller "cells," each of which is equipped with a lowpowered radio transmitter/receiver. The cells can vary in size depending upon terrain, capacity demands, etc. By controlling the transmission power, the radio frequencies assigned to one cell can be limited to the boundaries of that cell. When a cellular phone moves from one cell toward another, a computer at the Switching Office monitors the movement and at the proper time, transfers or hands off the phone call to the new cell and another radio frequency. [2] Service revenue generated by subscribers' calls outside of their system areas. [3] As of December 31.

No. 914. Publishing Industry—Summary: 1982 to 1991

[In millions of dollars, except as noted. Number in parentheses represents Standard Industrial Classification code; see text, section 13. Based on the censuses of manufactures and the Annual Survey of Manufactures (ASM). For the 1990 ASM, a major change in the survey was introduced. This change resulted from a backlog of previously unclassified single-establishment companies, now classified as manufacturing; for details, see text, section 27, and Appendix III]

ITEM	NEWSPAPERS (2711)				PERIODICALS (2721)				BOOKS (2731)

NA Not available. [1] Represents the average number of production workers plus the number of other employees in mid-March. [2] By manufacture, derived by subtracting the cost of materials, supplies, containers, fuel, purchased electricity, and contract work from the value of shipments. This result is then adjusted by the addition of value added by merchandising operations, plus the net change in finished goods and work-in-process inventories between the beginning and the end of the year.

Energy

This section presents statistics on fuel resources, energy production and consumption, electric energy, hydroelectric power, nuclear power, solar energy, wood energy and the electric and gas utility industries. The principal sources are the U.S. Department of Energy's Energy Information Administration (EIA), the Edison Electric Institute, Washington, DC, and the American Gas Association, Arlington, VA. For additional data on transportation, see section 21; on fuels, see section 25; and on energy-related housing characteristics, see section 26.

The EIA, in its *Annual Energy Review,* provides statistics and trend data on energy supply, demand, and prices. Information is included on petroleum and natural gas, coal, electricity, hydroelectric power, nuclear power, solar, wood, and geothermal energy. Among its annual reports are *Annual Energy Review, Electric Power Annual, Natural Gas Annual, Petroleum Supply Annual, State Energy Data Report, State Energy Price and Expenditure Report, Financial Statistics of Selected Electric Utilities, Performance Profiles of Major Energy Producers, Annual Energy Outlook,* and *International Energy Annual.* These various publications contain State, national, and international data on production of electricity, net summer capability of generating plants, fuels used in energy production, energy sales and consumption, and hydroelectric power. The EIA also issues the *Monthly Energy Review,* which presents current supply, disposition, and price data, and monthly publications on petroleum, coal, natural gas, and electric power. Data on residential energy consumption, expenditures, and conservation activities are available from EIA's Residential Energy Consumption Survey and are published triennially in *Residential Energy Consumption Survey: Consumption and Expenditures,* and *Residential Energy Consumption Survey: Housing Characteristics,* and several other reports.

The Edison Electric Institute's monthly bulletin and annual *Statistical Year Book of the Electric Utility Industry for the Year* contain data on the distribution of electric energy by public utilities; information on the electric power supply, expansion of electric generating facilities, and the manufacture of heavy electric power equipment is presented in the annual *Year End Summary of the Electric Power Situation in the United States.* The American Gas Association, in its monthly and quarterly bulletins and its yearbook, *Gas Facts,* presents data on gas utilities, including sales, revenues, customers, prices, and other financial and operating statistics.

In Brief

Energy expenditures per person, 1990—$1,900

55% of all electric generation in 1991 was from coal.

Over 50 million residential gas customers in 1991.

Btu conversion factors.—Various energy sources are converted from original units (e.g., short tons, cubic feet, barrels, kilowatt-hours) to the thermal equivalent using British thermal units (Btu). A Btu is the amount of energy required to raise the temperature of 1 pound of water 1 degree Fahrenheit (F) at or near 39.2 degrees F. Factors are calculated annually from the latest final annual data available; some are revised as a result. The following list provides conversion factors used in 1991 for production and consumption, in that order, for various fuels: Petroleum, 5.800 and 5.387 mil. Btu per barrel; total coal, 21.690 and 21.169 mil. Btu per short ton; and natural gas (dry), 1,031 Btu per cubic foot for both. The factors for the production of nuclear power and geothermal power were 10,680 and 21,096 Btu per kilowatt-hour, respectively. The fossil fuel steam-electric power plant generation factor of 10,335 Btu per kilowatt-hour was used for hydroelectric power generation and for wood and waste, wind, photovoltaic, and solar thermal energy consumed at electric utilities.

No. 927. Total Horsepower of All Prime Movers: 1960 to 1991

[**In millions, except percent.** As of **January,** except as noted. Prime movers are mechanical engines and turbines, and work animals, which originally convert fuels or force (as wind or falling water) into work and power. Electric motors, which obtain their power from prime movers, are excluded to avoid duplication. See also *Historical Statistics, Colonial Times to 1970,* series S 1-14]

YEAR	Total horsepower	AUTOMOTIVE [1 2]		NONAUTOMOTIVE							
		Total	Percent of total	Total	Factories [3 4]	Mines [3 4]	Railroads [5]	Merchant ships and sailing vessels [4]	Farms	Electric central stations [2]	Aircraft [5 6]

1991	33,905	32,100	94.7	1,805	68	48	50	27	355	991	266

[1] Includes passenger cars, trucks, buses, and motorcycles. [2] As of July 1. [3] Beginning 1965, data are estimates. [4] This is an extension of trends, since government agencies suspended compilation of these power capacity statistics. [5] Beginning 1965, not strictly comparable with earlier years. [6] Includes private planes and commercial airlines. [7] Includes estimates of about 3.0 million hp in work animals and 30,000 in windmills.

Source: John A. Waring, Arlington, VA, unpublished estimates.

[1] Production includes crude oil and lease condensate. Consumption includes domestically produced crude oil, natural gas liquids, and lease condensate, plus imported crude oil and products. [2] Production includes natural gas liquids; consumption excludes natural gas liquids. [3] Comprised of hydropower, nuclear power, geothermal energy, and other. [4] Represents peak year for U.S. energy production. [5] Represents peak year for U.S. energy consumption.

- Represents zero. [1] Sources of energy includes geothermal, wood and waste, and net interstate sales of electricity, including losses, not shown separately. [2] Based on estimated resident population as of July 1. [3] Includes 4.8 trillion Btu of net imports of coal coke not allocated by State.

1991	-	-	568.51	63.8	35.2	86
1992	3.59	2.60	574.72	64.5	36.1	83

- Represents zero. Z Less than .005 million barrels. [1] Stocks do not include imported quantities in transit to Strategic Petroleum Reserve terminals, pipeline fill, and above ground storage. [2] Including lease condensate stocks. [3] Derived by dividing end-of-year strategic petroleum reserve stocks by annual average daily net imports of all petroleum. Calculated prior to rounding. [4] The quantity of domestic fuel oil which was in storage prior to injection of foreign crude oil.

NA Not available. Z Less than 0.5 million kW. [1] Change from immediate prior year except for 1970, change from 1960. For explanation of average annual percent change, see Guide to Tabular Presentation. [2] Net summer capability is the steady hourly output that generating equipment is expected to supply to system load, exclusive of auxiliary power as demonstrated by test at the time of summer peak demand. [3] Includes small percentage (.5 percent) from wood and waste, geothermal, and petroleum coke. [4] A prime mover is the engine, turbine, water wheel, or similar machine which drives an electric generator. [5] Fossil fuels only. [6] Includes wind, solar thermal, and photovoltaic, not shown separately. [7] Includes fossil steam, wood, and waste. [8] Each prime mover type in combination plants counted separately. Includes geothermal, wind, and solar, not shown separately. [9] Includes small amounts of wood, waste, wind, geothermal, solar thermal, and photovoltaic.

No. 956. Electric Utility Industry—Capability, Peak Load, and Capacity Margin: 1970 to 1991

[Excludes Alaska and Hawaii. Capability represents the maximum kilowatt output with all power sources available and with hydraulic equipment under actual water conditions, allowing for maintenance, emergency outages, and system operating requirements. Capacity margin is the difference between capability and peak load]

YEAR	CAPABILITY AT THE TIME OF—				NON-COINCIDENT PEAK LOAD		CAPACITY MARGIN			
	Summer peak load (1,000 kW)		Winter peak load[1] (1,000 kW)				Summer		Winter[1]

No. 960. Nuclear Power Plants—Number, Capacity, and Generation: 1965 to 1992

ITEM	1965	1970	1975	1980	1985	1986	1987	1988	1989	1990	1991	1992
Operable generating units[1]	6	18	54	70	95	100	107	108	110	111	111	109
Net summer capability[1] [2] (mil. kW)	0.8	7.0	37.3	51.8	79.4	85.2	93.6	94.7	98.2	99.6	99.6	99.0
Electricity generated (bil. kWh)	0.4	21.8	172.5	251.1	383.7	414.0	455.3	527.0	529.4	576.9	612.6	618.8
Percent of total electric utility generation	0.3	1.4	9.0	11.0	15.5	16.6	17.7	19.5	19.0	20.5	21.7	22.1
Capacity factor[3]	(NA)	(NA)	55.9	56.3	58.0	56.9	57.4	63.5	62.2	66.0	70.2	70.9

NA Not available. [1] As of yearend. [2] Net summer capability is the peak steady hourly output that generating equipment is expected to supply to system load, exclusive of auxiliary and other powerplant, as demonstrated by test at the time of summer peak demand. [3] Weighted average of monthly capacity factors. Monthly factors are derived by dividing actual monthly generation by the maximum possible generation for the month (hours in month times net maximum dependable capacity).

Science and Technology

This section presents statistics on scientific, engineering, and technological resources, with emphasis on patterns of research and development (R&D) funding and on scientific, engineering, and technical personnel, education, and employment. Also included are statistics on space program outlays and accomplishments. Principal sources of these data are the National Science Foundation (NSF) and the National Aeronautics and Space Administration (NASA).

In Brief

R&D expenditures in constant (1987) dollars:

1970	*74.7 bil.*
1980	*87.7 bil.*
1992	*130.4 bil.*

Nondefense R&D spending as percent of GNP: 1990

Japan	*3.0*
Former West Germany	*2.7*
United States	*1.9*
France	*1.8*
Italy	*1.3*

NSF gathers data chiefly through recurring surveys. Current NSF publications containing data on funds for research and development and on scientific and engineering personnel include the *Science Resources Studies Highlights* summaries series; Detailed Statistical Tables; and annual, biennial, triennial, and special reports. Titles or the areas of coverage of these reports include the following: *Science and Engineering Indicators; National Patterns of R&D Resources; Science and Engineering Personnel-A National Overview; Women and Minorities in Science and Engineering;* science and technology data presented in chart and tabular form in a pocket-size publication; *International Science and Technology Data Update;* profiles on human resources and funding in individual fields of science and engineering; *Federal Funds for Research and Development; Federal R&D Funding by Budget Function; Federal Support to Universities, Colleges, and Selected Nonprofit Institutions; Scientific and Engineering Facilities at Universities and Colleges; Geographic Distribution of Industrial R&D Expenditures; Research and Development in Industry;* R&D funds and graduate enrollment and support in academic science and engineering; characteristics of doctoral scientists and engineers and of recent graduates in the United States; *U.S. Scientists and Engineers;* and scientists, engineers, and technicians in manufacturing, nonmanufacturing, and trade and regulated industries. Statistical surveys in these areas pose problems of concept and definition and the data should, therefore, be regarded as broad estimates rather than precise quantitative statements. See sources for details.

The National Science Board's biennial *Science and Engineering Indicators* contains data and analyses of international and domestic science and technology, including measures of inputs and outputs. *The Budget of the United States Government,* published by the U.S. Office of Management and Budget, contains summary financial data on Federal R&D programs.

Research and development outlays.—NSF defines research as a "systematic and intensive study directed toward a fuller knowledge of the subject studied" and development as "the systematic use of scientific knowledge directed toward the production of useful materials, devices, systems, methods, or processes." National coverage of R&D expenditures is developed primarily from periodic surveys in four principal economic sectors: (1) *Government,* made up primarily of Federal executive agencies; (2) *industry,* consisting of manufacturing and nonmanufacturing firms and the federally funded research and development centers (FFRDC's) they administer; (3) *universities and colleges,* composed of universities, colleges, and their affiliated institutions, agricultural experiment stations, and associated schools of agriculture, and FFRDC's administered by educational institutions; and (4) *other nonprofit institutions,* consisting of such

organizations as private philanthropic foundations, nonprofit research institutes, voluntary health agencies, and FFRDC's administered by nonprofit organizations. The R&D funds reported consist of current operating costs, including planning and administration costs, except as otherwise noted. They exclude funds for routine testing, mapping and surveying, collection of general-purpose data, dissemination of scientific information, and training of scientific personnel.

Scientists, engineers, and technicians.—Scientists and engineers are defined as persons engaged in scientific and engineering work at a level requiring a knowledge of sciences equivalent at least to that acquired through completion of a 4-year college course. Technicians are defined as persons engaged in technical work at a level requiring knowledge acquired through a technical institute, junior college, or other type of training less extensive than 4-year college training. Craftsmen and skilled workers are excluded.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

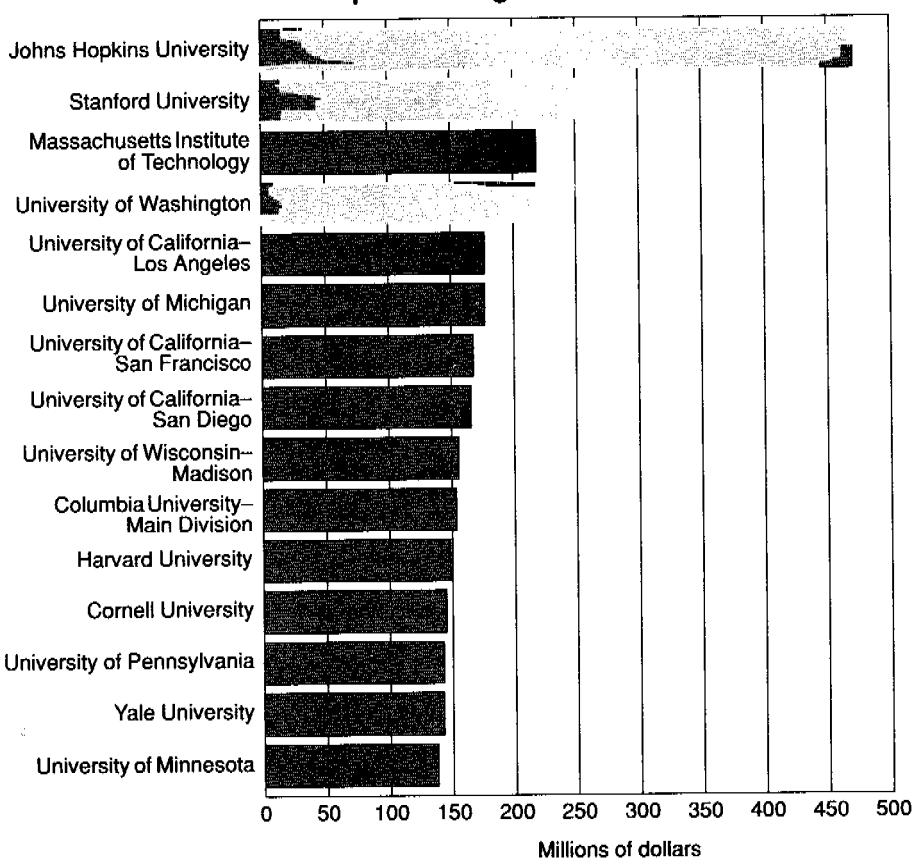
Top 15 Universities—Federal Research and Development Obligations: 1990



Source: Chart prepared by U.S. Bureau of the Census. For data, see table 982.

No. 973. Research and Development (R&D)—Expenditures: 1960 to 1992

[Includes basic research, applied research, and development. Defense-related outlays comprise all research and development spending by Dept. of Defense, including space activities, and a portion of Department of Energy funds. Space-related outlays are those of the National Aeronautics and Space Administration; they exclude space activities of other Federal agencies, estimated at less than 5 percent of all space research and development spending. Minus sign (-) indicates decrease]

No. 999. Space Shuttle System Expenditures, by NASA in Constant (1982) Dollars: 1973 to 1992

[In millions of dollars. For year ending Sept. 30. These data cannot be used alone to estimate the total shuttle cost. Only operating expenditures correspond to an annual cost in the economic sense, and even those estimates require adjustment for the 3-year period over which the cost of a shuttle flight is incurred and reimbursements are received. For details, see source]

Transportation—Land

This section presents statistics on revenues, passenger and freight traffic volume, and employment in various revenue-producing modes of the transportation industry, including motor vehicles, trains, and pipelines. Data are also presented on commuting travel, highway mileage and finances, motor vehicle travel, accidents, sales, and registrations, automobile operating costs, and characteristics of public transit, railroads, and pipelines.

In Brief

Transportation outlays reached $959 billion in 1991

State gasoline tax rates for 1991—
Lowest rate, 7.5 percent in Georgia
Highest rate, 28 percent in Connecticut

The principal compiler of data on public roads and on operation of motor vehicles is the U.S. Department of Transportation's (DOT) Federal Highway Administration (FHWA). These data appear in FHWA's annual *Highway Statistics* and other publications. The U.S. Interstate Commerce Commission (ICC) presents data on interstate land transport in its publications, the *Annual Report to Congress* and the *Transport Statistics in the United States,* which contain data on railroads and motor carriers subject to ICC regulations.

The U.S. National Highway Traffic Safety Administration issues data on traffic accident deaths and death rates in two annual reports: the *Fact Book* and the *Fatal Accident Reporting System Annual Report.* DOT's Federal Railroad Administration presents data on accidents involving railroads in its annual *Accident/Incident Bulletin,* and the *Rail-Highway Crossing Accident/Incident and Inventory Bulletin.*

Various censuses and surveys conducted by the U.S. Bureau of the Census also provide data. Results of the censuses of transportation are presented in the *Truck Inventory and Use Survey.* The *Annual Survey of Manufactures* and reports of the censuses of manufactures, wholesale and retail trade, and service industries contain statistics on the motor vehicle and equipment industry and on retail, wholesale, and services aspects of this industry. Data on persons commuting to work were collected as part of the 1980 census and are in various census reports.

Data are also presented in many nongovernment publications. Among them are the weekly and annual *Cars of Revenue Freight Loaded* and the annual *Yearbook of Railroad Facts,* both published by the Association of American Railroads, Washington, DC; and the *Transit Fact Book,* containing electric railway and motorbus statistics, published annually by the American Public Transit Association, Washington, DC. Useful annual handbooks in the field of transportation are *Motor Vehicle Facts and Figures* and *World Motor Vehicle Data,* issued by the American Automobile Manufacturers Association (AAMA), Detroit, MI; *Accident Facts,* issued by the National Safety Council, Chicago, IL; and *Transportation in America,* issued by the ENO Foundation for Transportation, Westport, Connecticut.

Urban and rural highway mileage.—Beginning 1980, mileage is classified in urban and rural categories, rather than municipal and rural. Urban denotes the Federal-aid legislation definition of an area. Such areas include, as a minimum, a census place with a population of 5,000 to 49,999 or a designated urbanized area with a population of 50,000 or more. These Federal-aid urban areas may extend beyond corporate and census boundaries, and thus are not necessarily coextensive with municipal boundaries. Rural in 1980 refers to non-Federal-aid urban area mileage. Prior to 1980, municipal referred to roads within incorporated places, densely populated New England towns, and certain of the

more populous unincorporated areas and rural to non-municipal roads.

Federal-aid highway systems.—Federal law provides that Federal funds be matched in varying proportions with State funds for the costs of planning, engineering, right-of-way acquisition, and construction of highways. Other costs, such as maintenance and policing, are borne entirely by the States and local agencies.

Effective July 1, 1976, a uniform road classification system was implemented which shortened the mileage of the highway system and redefined the three main systems of Federal-aid routes. The Federal-aid primary system is comprised of a network of main roads important to interstate, Statewide, and regional travel. The system consists of main rural roads and their extensions into or through urban areas. The Federal-aid secondary system consists of rural roads of a more local nature, such as those which connect county seats and the larger population centers not served by the primary system. The Federal-aid urban system is located in urban places of 5,000 or more persons and consists of major urban roads and streets, except those on the primary system.

Regulatory bodies.—The ICC, created by the U.S. Congress to regulate transportation in interstate commerce, has jurisdiction over railroads, trucking companies, bus lines, freight forwarders, water carriers, coal slurry pipelines, and transportation brokers. The Federal Energy Regulatory Commission is responsible for setting rates and charges for transportation and sale of natural gas and for establishing rates or charges for transportation.

Motor carriers.—For 1960-73, class I for-hire motor carriers of freight were classified by the ICC as those with $1 million or more of gross annual operating revenue; 1974-79, the class I minimum was $3 million. Effective January 1, 1980, class I carriers are those with $5 million or more in revenue. For 1960-68, class I motor carriers of passengers were classified by the ICC as those with $200,000 or more of gross annual operating revenue; for 1969-76, as those with revenues of $1 million or more; and since 1977, as those with $3 million or more. Effective January 1, 1988, class I motor carriers of passengers are those with $5 million or more in operating revenues; class II less than $5 million in operating revenues.

Railroads.—Railroad companies reporting to the ICC are divided into specific groups as follows: (1) Regular line-haul (interstate) railroads (and their non-operating subsidiaries); (2) switching and terminal railroads; (3) private railroads prior to 1964 (identified by ICC as "circular" because they reported on brief circulars); and (4) unofficial railroads, so designated when their reports are received too late for tabulation. For the most part, the last three groups are not included in the statistics shown here.

For years prior to 1978, class I railroads were those with annual revenues of $1 million or more for 1950-55; $3 million or more for 1956-64; $5 million or more for 1965-75; and $10 million or more for 1976-77. In 1978, the classification became class I, those having more than $50 million gross annual operating revenue; class II, from $10 million to $50 million; and class III, less than $10 million. Effective January 1, 1982, the ICC adopted a procedure to adjust the threshold for inflation by restating current revenues in constant 1978 dollars. In 1990, the criteria for class I and class II railroads were $94.4 million and $18.9 million, respectively. Also effective January 1, 1982, the ICC adopted a *Carrier Classification Index Survey Form* for carriers not filing annual report form R-1 with the commission. Class II and class III railroads are currently exempted from filing any financial report with the Commission. The form is used for reclassifying carriers.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

- Represents or rounds to zero. NA Not available. [1] Data on deaths are from U.S. National Highway Traffic Safety Administration and are based on 30 day definition; see table 1027. Other data are from National Safety Council. [2] Accidents which result in damages to railroad property. Grade crossing accidents are also included when classified as a train accident. Deaths exclude fatalities in railroad-highway grade crossing accidents. [3] Includes scheduled and nonscheduled (charter) air carriers. Represents serious injuries. [4] All scheduled service. Represents serious injuries. [5] All nonscheduled service. Represents serious injuries. [6] 1975 excludes commuter and on-demand air taxis. [7] Accidents resulting in death; injury or requiring medical treatment beyond first aid; damages exceeding $200; or a person's disappearance. [8] Pipeline accidents/incidents are credited to year of occurrence. Beginning 1985; prior data are credited to the year filed. Fatalities and injuries as reported in annual report. [9] Pipelines carrying hazardous materials, petroleum, and liquid petroleum products. [10] Covers accidents involving commercial vessels which must be reported to U.S. Coast Guard if there is property damage exceeding $1,500; material damage affecting the seaworthiness or efficiency of a vessel; stranding or grounding; loss of life; or injury causing a person's incapacity for more than 3 days. [11] Accidents, deaths, and injuries involving hazardous materials cover all types of transport.

Under Federal control	188	227	262	266	225	231	212	183	178	178	182
Fed.-aid highway system: [5]											
Primary (urban and rural)	272	266	300	300	301	303	302	304	304	305	305
Interstate	32	37	41	43	44	44	44	45	45	45	45
Urban	(X)	65	124	140	144	146	148	147	148	148	148
Secondary	647	643	398	398	398	398	398	400	400	400	400

X Not applicable. [1] Prior to 1980, includes public and nonpublic road mileage; beginning 1984, includes only public road mileage as defined 23 USC 402. [2] Includes 98,000 miles of nonpublic road mileage previously contained in other rural categories. [3] Prior to 1980, represents municipal mileage; see text, section 21. [4] Covers soil-surfaced roads and roads with slag, gravel, stone, bituminous, or concrete surfaces. [5] For definition, see text, section 21. Beginning 1980, data represent actual mileage open to traffic rather than total highway miles carrying interstate traffic.

- Represents zero. [1] Highway mileage open to traffic. [2] Although the interstate system is part of the Federal-aid primary system, its mileage is shown separately.

Source: U.S. Federal Highway Administration, *Highway Statistics*, annual.

No. 1011. Highway Pavement Condition, by Type of Road System: 1980 to 1991

[Highway pavement condition is classified by the Present Serviceability Rating (PSR) system (5.0 - 0.1). The reported ranges are defined as: PSR 5.0-3.5, pavements give a first class ride and exhibit few, if any, visible signs of surface wear. Of the quality of new or nearly new pavements. PSR 3.4-2.0, pavements have a riding quality somewhat inferior to that of new pavements or may even be barely tolerable at high speeds. Surfaces may show signs of cracking, substantial patching, and rutting. PSR 1.9-0.1, pavements show extensive wear to the point of needing resurfacing or may even need complete reconstruction]

No. 1029. Fatal Motor Vehicle Accidents—National Summary: 1980 to 1991

[Based on data from the Fatal Accident Reporting System (FARS). FARS gathers data on accidents that result in loss of human life. FARS is operated and maintained by National Highway Traffic Safety Administration's (NHTSA) National Center for Statistics and Analysis (NCSA). FARS data are gathered on motor vehicle accidents that occurred on a roadway customarily open to the public, resulting in the death of a person within 30 days of the accident; collection of these data depend on the use of police, hospital, medical examiner/coroner, and Emergency Medical Services reports, State vehicle registration, driver licensing, and highway department files, and vital statistics documents and death certificates. See source for further detail]

No. 1038. Household Motor Vehicle Transportation, by Vehicle Model Year: 1988

[Preliminary. Household vehicles include all motorized vehicles used for personal transportation, excluding motorcycles, mopeds, large trucks, and buses. The reporting unit for 1988 is all households which owned a vehicle at any time during 1988. Based on the Residential Transportation Energy Consumption Survey; subject to sampling variability. For composition of regions, see table 31]

REGION	Households with motor vehicles (mil.)	VEHICLES (millions)					MILES PER GALLON				
		Total	Model year				Average	Model year			
			1974 and earlier	1975 to 1980	1981 to 1985	1986 to 1989		1976 and earlier	1981 or 1982	1986	1988 or 1989
Total	81.3	147.5	13	29	35	23	18.3	12.3	20.7	21.9	22.1

No. 1040. Motor Vehicle Travel, by Type of Vehicle, and by Speed: 1970 to 1991

[**Travel in billions of vehicle-miles, except as indicated.** Travel estimates based on automatic traffic recorder data. Speed trend data for 1970-1975 were collected by several State highway agencies, normally during summer months; beginning Oct. 1975 all States have monitored speeds at locations on several highway systems as part of 55 mile per hour Speed Limit Monitoring Program. See also *Historical Statistics, Colonial Times to 1970*, series Q 199-207]

YEAR	VEHICLE-MILES OF TRAVEL (bil.)				AVG. MILES PER VEHICLE (1,000)			MOTOR VEHICLE SPEED [2]

1990	2,144	1,513	5.7	616	10.5	9.1	13.8	7,511	60.3	78	50	23
1991	2,172	1,534	5.7	624	10.7	9.1	13.9	7,594	59.6	75	48	22

[1] Includes motorcycles. [2] Represents speed on rural interstate highways. Beginning 1980, for year ending Sept. 30. [3] Citations issued for 55 mph violations.

Source: U.S. Federal Highway Administration, *Highway Statistics Summary, annual.*

No. 1041. Passenger Transit Industry—Summary: 1980 to 1991

[Includes Puerto Rico. Includes aggregate information for all transit systems in the United States. Except as noted, prior-to-1985 data exclude commuter railroad, automated guideway, urban ferry boat, and demand response, as well as most transit systems outside of urbanized areas. Nontransit services such as taxicab, school bus, unregulated jitney, sightseeing bus, intercity bus, and special application mass transportation systems (e.g., amusement parks, airports, island, and urban park ferries) are excluded. Beginning in 1985, only active vehicles are counted]

X Not applicable. [1] Also excludes minivans, utilities, and station wagons. [2] Includes forestry and lumbering. [3] Also includes multi-stop, minivans, station wagon, and utilities, and station wagon. [4] Includes livestock truck. [5] Includes multi-stop or walk-in. [6] Average vehicle weight (empty-weight of the vehicle plus the average weight of load carried). Light=10,000 lbs. or less; medium=10,001-19,500 lbs.; light-heavy=19,501-26,000 lbs.; and heavy-heavy=26,001 lbs. or more. [7] Includes not reported. [8] A fleet size of one truck was assumed when no response was obtained. [9] Area in which usually operated. Local=less than 50 miles; short-range=50 to 200 miles; long-range=more than 200 miles. [10] Detail does not add to totals because items were not applicable or multiple responses were possible.

No. 1050. Railroads, Class I—Summary: 1970 to 1991

[As of **Dec. 31**, or **calendar year** data, except as noted. Compiled from annual reports of class I railroads only, except where noted. Beginning 1983, financial data are not comparable with earlier years due to change in method of accounting for track and related structures. Minus sign (-) indicates deficit. See also *Historical Statistics, Colonial Times to 1970,* series Q 264-312, Q 319, Q 330, Q 356-378, and Q 400-401]

- Represents zero. NA Not available. [1] See text, section 21 for definition of Class I. [2] Average mid-month count. [3] Represents the aggregate length of roadway of all line-haul railroads. Excludes yard tracks, sidings, and parallel lines. (Includes estimate for class II and III railroads.) [4] Includes multiple main tracks, yard tracks, and sidings owned by both line-haul and switching and terminal. (Includes estimate for class II and III railroads.) [5] Includes cars owned by all railroads, private car companies, and shippers. [6] Class I railroads only. [7] Includes State income taxes beginning 1980. [8] Includes payroll, income, and other taxes. [9] Revenue and non-revenue freight. [10] Includes highway grade crossing casualties. 1970 not comparable with later years due to change in requirements for reporting injuries.

No. 1055. Major Interstate Natural Gas Pipeline Companies—Summary: 1983 to 1990

[In 1984, the reporting criteria were changed from that of prior years. The classification of A and B interstate natural gas pipeline companies was changed to major companies and nonmajor companies. Major natural gas pipleline companies are those whose combined sales for resale and natural gas transported or stored for a fee exceed 50 billion cubic feet. They account for more than 85 percent of all interstate natural gas]

Transportation—Air and Water

This section presents data on civil air transportation, both passenger and cargo, and on water transportation, including inland waterways, oceanborne commerce, the merchant marine, cargo and vessel tonnages, and shipbuilding. Comparative data on various types of transportation carriers are presented in section 21.

Principal sources of these data are the annual *FAA Statistical Handbook of Aviation* issued by the Federal Aviation Administration (FAA); the annual *Waterborne Commerce of the United States* issued by the Corps of Engineers of the Department of the Army; the monthly and annual issues of *U.S. Waterborne Exports and General Imports,* and the annual *Vessel Entrances and Clearances,* and the monthly *Highlights of U.S. Export and Import Trade,* issued by the Bureau of the Census. In addition, the Bureau of the Census in its commodity transportation survey (part of the census of transportation, taken every 5 years, for years ending in "2" and "7") provides data on the type, weight, and value of commodities shipped by manufacturing establishments in the United States, by means of transportation, origin, and destination.

Air transportation data are also presented annually by the Air Transport Association of America, Washington, DC in *Air Transport Facts and Figures.* Additional sources of data on water transportation include *Merchant Fleets of the World* issued periodically by the U.S. Maritime Administration; *The Bulletin,* issued monthly by the American Bureau of Shipping, New York, NY; and the *Annual Summary of Merchant Ships Completed in the World* and the *Register Book,* published by Lloyd's Register of Shipping, London, England.

Civil aviation.—Federal promotion and regulation of civil aviation have been carried out by the FAA and the Civil Aeronautics Board (CAB). The CAB promoted and regulated the civil air transportation industry within the United States and between the United States and foreign countries. The Board granted licenses to provide air transportation service, approved or disapproved proposed rates and fares, and approved or disapproved proposed agreements and corporate relationships involving air carriers. In December 1984, the CAB ceased to exist as an agency. Some of its functions were transferred to the Department of Transportation (DOT), as outlined below. The responsibility for investigation of aviation accidents resides with the National Transportation Safety Board.

In Brief

SCHEDULED AIR CARRIERS

Revenue passengers enplaned:

1983	*319 million*
1991	*452 million*

Net profit:

1983	*-$188 million*
1991	*-$1,870 million*

The Office of the Secretary, DOT aviation activities include the following: negotiation of international air transportation rights, selection of U.S. air carriers to serve capacity controlled international markets, oversight of international rates and fares, maintenance of essential air service to small communities, and consumer affairs. DOT's Research and Special Programs Administration (RSPA) handles aviation information functions formerly assigned to CAB.

The principal activities of the FAA include the promotion of air safety, controlling the use of navigable airspace, prescribing regulations dealing with the competency of airmen, airworthiness of aircraft, and air traffic control, operation of air route traffic control centers, airport traffic control towers, and flight service stations, the design, construction, maintenance, and inspection of navigation, traffic control,

and communications equipment, and the development of general aviation.

The CAB published monthly and quarterly financial and traffic statistical data for the certificated route air carriers. RSPA continues these publications, including both certificated and noncertificated (commuter) air carriers. The FAA publishes data annually on the use of airway facilities; data related to the location of airmen, aircraft, and airports; the volume of activity in the field of nonair carrier (general aviation) flying; and aircraft production and registration.

General aviation comprises all civil flying (including such commercial operations as small demand air taxis, agriculture application, powerline patrol, etc.) but excludes certificated route air carriers, supplemental operators, large-aircraft commercial operators and commuter airlines.

Air carriers and service.—The CAB previously issued "certificates of public convenience and necessity" under Section 401 of the Federal Aviation Act of 1958 for scheduled and nonscheduled (charter) passenger services and cargo services. It also issued certificates under Section 418 of the Act to cargo air carriers for domestic all-cargo service only. The DOT Office of the Secretary now issues the certificates under a "fit, willing, and able" test of air carrier operations. Carriers operating only 60 seat or less aircraft are given exemption authority to carry passengers, cargo, and mail in scheduled and nonscheduled service under Part 298 of the DOT (formerly CAB) regulations. Exemption authority carriers who offer scheduled passenger service to an essential air service point must meet the "fit, willing, and able" test.

Vessel shipments, entrances, and clearances.—Shipments by dry cargo vessels comprise shipments on all types of watercraft, except tanker vessels; shipments by tanker vessels comprise all types of cargo, liquid and dry, carried by tanker vessels.

A vessel is reported as entered only at the first port which it enters in the United States, whether or not cargo is unloaded at that port. A vessel is reported as cleared only at the last port at which clearance is made to a foreign port, whether or not it takes on cargo. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures.

Units of measurement.—Cargo (or freight) tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. However, shipping weight excludes lift and cargo vans and similar substantial outer containers. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. Substantially, it represents space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Deadweight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is, therefore, the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

No. 1056. U. S. Scheduled Airline Industry—Summary: 1983 to 1991

[**For calendar years or Dec. 31.** For domestic and international operations. Covers carriers certificated under Section 401 of the Federal Aviation Act. Minus sign (-) indicates loss]

No. 1064. On-Time Flight Arrivals and Departures at Major U.S. Airports: 1991 and 1992

[**In percent.** Quarterly, based on gate arrival and departure times for domestic scheduled operations in the 48 contigious states of major U.S. airlines, per DOT reporting rule effective September 1987. All U.S. airlines with one percent or more of total U.S. domestic scheduled airline passenger revenues are required to report on-time data. A flight is considered on time if it operated less than 15 minutes after the scheduled time shown in the carrier's computerized reservation system. Cancelled and diverted flights are considered late. Excludes flight operations delayed/cancelled due to aircraft mechanical problems reported on FAA maintenance records (4-5 percent of the reporting airlines' scheduled operations). See source for data on individual airlines]

No. 1066. Commuter/Regional Airline Operations—Summary: 1980 to 1991

[**Calendar year data.** Commuter/regional airlines operate primarily aircraft of predominately 75 passengers or less and 18,000 pounds of payload capacity serving short haul and small community markets. Represents operations within all North America by U.S. Regional Carriers. Averages are means. For definition of mean, see Guide to Tabular Presentation]

NA Not available. X Not applicable. [1] Existing airports, heliports, seaplane bases, etc. recorded with FAA. Includes military airports with joint civil and military use. Includes U.S. outlying areas. Airport-type definitions: Public—publicly owned and under control of a public agency; private—owned by a private individual or corporation. May or may not be open for public use. [2] Fiscal year data. Does not include System Planning Grants. Includes U.S. outlying areas. 1970-1980 data are obligated Federal funds for the Airport Development Aid Program. 1985-1991 data are appropriated Federal funds under the Airport and Airway Improvement Act of 1982. [3] Registered aircraft that flew one or more hours during the year. [4] Includes helicopters. [5] See text, section 22. [6] Includes autogyros; excludes air carrier helicopters. [7] Includes all active pilots. An active pilot is one with a pilot certificate and a valid medical certificate. Also includes pilots who hold only a helicopter, glider, or lighter than air certificate, not shown separately. [8] Includes dispatchers, flight navigators and engineers, and ground technicians—mechanics, parachute riggers, and ground instructors. [9] No medical examinations are required, therefore, data represent all certificates on record and include retired or otherwise inactive technicians. [10] Includes all air traffic control specialists (staff positions, managers, supervisors, and for 1970-1987 traffic management coordinators, not shown separately) and air traffic assistants. [11] Serving in-flight service stations, towers, and centers. [12] Prior to 1987, included in total air traffic control specialists. [13] Source: 1970, U.S. Bureau of Mines; thereafter, FAA General Aviation Activity and Avionics Survey. [14] Includes kerosene-type and naphtha-type jet fuels.

Source: Except as noted, U.S. Federal Aviation Administration, *FAA Statistical Handbook of Aviation*, annual; and unpublished data. Includes data from U.S. Department of Transportation, Research and Special Programs Administration.

[1] Preliminary. [2] Estimate. [3] Based on AIA's aerospace composite price deflator. [4] All civil sales of aircraft (domestic and export sales of jet transports, commuters, business and personal aircraft and helicopters). [5] Electronics, software, and ground support equipment, plus sales of non-aerospace products which are produced by aerospace-manufacturing use technology, processes, and materials derived from aerospace products. [6] Department of Defense. [7] National Aeronautics and Space Administration. [8] Includes civil aircraft sales (see footnote 4), commercial space sales, all exports of military aircraft and missiles and related propulsion and parts.

1992, prel.	[1]-1,836	-1.4	-1.2	-5.2	27,985	1.0	1.0	2.6

[1] Reflects unusually large nonoperating expenses totalling $3.4 billion in 1991 and $8.7 billion in 1992 due to the initial implementation of a change in accounting for future retirement benefit costs and defense-downsizing restructuring charges. Many large aerospace corporations chose to write off against first quarter earnings amounts required to comply with FSAB 106.

No. 1075. U.S. Receipts and Payments for International Transportation: 1980 to 1992

[**In millions of dollars.** Data are international transportation transactions recorded for balance of payment purposes (see table 1328). Receipts include freight on exports carried by U.S.-operated carriers and foreign carrier expenditures in U.S. ports. Payments include freight on imports carried by foreign carriers and U.S. carrier port expenditures abroad. Freight on exports carried by foreign carriers is excluded since such payments are directly or indirectly for foreign account. Similarly, freight on U.S. imports carried by U.S. carriers is a domestic rather than an international transaction. Minus sign (-) indicates excess of payments over receipts. See *Historical Statistics, Colonial Times to 1970*, series U 3 and U 10, for totals]

No. 1077. Federal Expenditures for Civil Functions of the Corps of Engineers, United States Army: 1965 to 1991

[**In millions of dollars. For fiscal years ending in year shown,** see text, section 9. These expenditures represent the work of the Corps of Engineers to plan, design, construct, operate, and maintain civil works projects and activities, particularly in the management and improvement of rivers, harbors, and waterways for navigation, flood control, and multiple purposes. The amounts listed below do not include the expenditure of funds contributed, advanced, or reimbursed by other government agencies or local interests. Includes Puerto Rico and outlying areas]

FISCAL YEAR	Total program [1]	Navigation	Flood control	Multiple purpose	FISCAL YEAR	Total program [1]	Navigation	Flood control	Multiple purpose
1965	1,169	426	447	283	1983	2,959	1,290	1,088	482
1970	1,128	398	379	331	1984	3,085	1,383	1,154	445
1975	2,070	694	904	439	1985	2,956	1,234	1,187	419

No. 1080. Waterborne Imports and Exports—Cargo Tonnage and Value, by Coastal District: 1980 to 1991

[Exports are free alongside ship (f.a.s.) value for all years; imports are f.a.s. value for 1980 and customs value for other years, see text, section 29. Includes commodities classified for security reasons as "Special Category" (exports only) and exports by Dept. of Defense (grant-aid shipments), and merchandise shipped in transit through the United States. See Appendix III]

Agriculture

This section presents statistics on farms and farm population; land use and irrigation; farm cooperatives; farm income, expenditures, and debt; farm output, productivity, and marketings; foreign trade in agricultural products; specific crops; and livestock, poultry, and their products.

In Brief

Number of farms, 1992: 2.1 million
Leading States—
Texas 183,000
Missouri 107,000
Iowa 102,000
Farm marketings cash receipts, 1991: $167 billion
Leading commodities—
Cattle, calves $40 billion
Dairy products $18 billion
Corn $14 billion

The principal sources are the reports issued by the U.S. Bureau of the Census and by the National Agricultural Statistics Service (NASS) and the Economic Research Service (ERS) of the U.S. Department of Agriculture. The Bureau of the Census has taken a census of agriculture every 10 years from 1840 to 1920 and every 5 years from 1925 through 1974. Two 4-year censuses, taken for 1978 and 1982, adjusted the data reference year to coincide with the economic censuses. The 1987 Census of Agriculture is the most recent census for which reports are presently available. The Department of Agriculture publishes annually *Agricultural Statistics,* a general reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The Economic Research Service publishes a series of annual reports, *Economic Indicators of the Farm Sector.* This series comprises five reports: *National Financial Summary, State Financial Summary, Production and Efficiency Statistics, Costs of Production—Livestock and Dairy,* and *Costs of Production—Major Field Crops.* Sources of current data on agricultural exports and imports include *Foreign Agricultural Trade of the United States,* published by the ERS, and the reports of the Bureau of the Census, particularly *U.S. Imports for Consumption and General Imports—HTSUSA Commodity by Country of Origin* (FT 247), *U.S. Exports, Harmonized Schedule B, Commodity by Country* (FT447), and *U.S. Merchandise Trade: Exports, General Imports, and Imports for Consumption* (FT925).

The 45 field offices of the NASS collect data on crops, livestock and products, agricultural prices, farm employment, and other related subjects mainly through sample surveys. Information is obtained on some 75 crops and 50 livestock items as well as scores of items pertaining to agricultural production and marketing. State estimates and supporting information are sent to the Agricultural Statistics Board of NASS which reviews the estimates and issues reports containing State and national data. Among these reports are annual summaries such as *Crop Production, Crop Values, Agricultural Prices,* and *Livestock Production, Disposition and Income.* For more information about concepts and methods underlying USDA's statistical series, see *Major Statistical Series of the U.S. Department of Agriculture* (Agricultural Handbook No. 671), a 12-volume set of publications.

Farms and farmland.—The Bureau of the Census has used varying definitions of a farm. Data from the census of agriculture reflect the definition of farm used for the census year. For the 1974, 1978, 1982, and 1987 Censuses of Agriculture, a farm was defined as any place from which $1,000 or more of agricultural products were produced and sold or normally would have been sold during the census year. Control may have been exercised through ownership or management, or through a lease, rental, or cropping arrangement. In the case of landowners who had one or more tenants or renters, the land operated by each was counted as a separate farm. The effect of the change in definition must be considered when comparing farms in the 1974, 1978, 1982, and

1987 censuses with those in previous censuses.

Unless otherwise stated in the specific tables of this section, the definition of a farm applicable to data originated by the Department of Agriculture is the one used by the Bureau of the Census for the agriculture census immediately preceding the year or years for which the data are shown. Farmland refers to all land under the control of a farm operator, including land not actually under cultivation or not used for pasture or grazing. Land used for pasture or grazing on a per head basis that was neither owned nor leased by a farm operator is not included except for grazing lands controlled by grazing associations leased on a per acre basis. Coverage estimates for 1978, 1982, and 1987 indicate about 3.4, 9.1, and 7.2 percent of all farms, respectively, were not included in census totals. Farms undercounted in these censuses were usually small and accounted for approximately 1 percent of the total value of agricultural products sold and approximately 2 percent of the land in farms. For more explanation about mail list compilation and census coverage, see Appendixes A and C, *1987 Census of Agriculture,* volume 1 reports, and *Coverage Evaluation, Volume 2, Part 2.*

Farm population.—Farm population consists of all persons living on farms in rural areas. Farm population data shown are based on the farm definition adopted for the 1974 Census of Agriculture.

Farm income.—Gross farm income comprises cash receipts from farm marketings of crops and livestock, Federal government payments made directly to farmers for farm-related activities, rental value of farm homes, value of farm products consumed in farm homes, and other farm-related income such as machine hire and custom work. Farm marketings represent quantities of agricultural products sold by farmers multiplied by prices received per unit of production at the local market. Information on prices received for farm products is generally obtained by the NASS Agricultural Statistics Board from surveys of firms (such as grain elevators, packers, and processors) purchasing agricultural commodities directly from producers. In some cases, the price information is obtained directly from the producers.

Crops.—Estimates of crop acreage and production by the NASS are based on current sample survey data obtained from individual producers and objective yield counts, reports of carlot shipments, market records, personal field observations by field statisticians, and reports from other sources. Prices received by farmers are marketing year averages. These averages are based on U.S. monthly prices weighted by monthly marketings during specific periods. U.S. monthly prices are State average prices weighted by marketings during the month. Marketing year average prices do not include allowances for outstanding loans, government purchases, deficiency payments or disaster payments.

All State prices are based on individual State marketing years, while U.S. marketing year averages are based on standard marketing years for each crop. For a listing of the crop marketing years and the participating States in the monthly program, see *Crop Values,* January 1992. Value of production is computed by multiplying State prices by each State's production. The U.S. value of production is the sum of State values for all States. Value of production figures shown in tables 1130-1132, 1134, and 1135 should not be confused with cash receipts from farm marketings which relate to sales during a calendar year, irrespective of the year of production.

Price supports.—Agricultural income is supplemented through two basic Government-support mechanisms available to producers of eligible commodities: (1) *a market price support* (loan rate) through which producers may place any portion of their production in approved storage and receive a loan at a specified rate. The farmer may repay the loan with interest and retain the commodity or, at the end of the loan period, forfeit the commodity as full payment of the loan; (2) *a farm income support* (target price) whose payments vary inversely with the market price of the specified commodity. "Deficiency payments" are made when market prices for a specified period are below the target prices. The payment rate is the difference between the target price and market price, or between the

target price and loan rate, whichever is smaller.

Livestock.—Annual inventory numbers of livestock and estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture are based on information from farmers and ranchers obtained by probability survey sampling methods.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau and Department of Agriculture data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

No. 1101. Farm Real Estate—Summary: 1980 to 1992

[**1980** and **1986-89**,, value data as of **Feb. 1; 1983-85**, as of **April 1; 1990-92**, as of **January 1**. Excludes Alaska and Hawaii. Total value of land and buildings is estimated by multiplying the number of acres of farmland by the average value per acre of land and buildings. Per acre values are based on data from the census of agriculture. For intercensal years, estimates are based on surveys conducted by the U.S. Dept. of Agriculture]

ITEM	Unit	1980	1983	1984	1985	1986	1987	1988	1989	1990	1991	1992
Total value	**Bil. dol**	**763.3**	**803.9**	**812.9**	**719.4**	**641.1**	**597.1**	**626.9**	**653.5**	**658.2**	**667.5**	**670.8**

No. 1103. Foreign Ownership of U.S. Agricultural Land: 1991

[**In thousands of acres, except percent**. Covers "foreign persons" reporting under the Agricultural Foreign Investment Disclosure Act of 1978. As defined in the Act, a "foreign person" is any person who is not a U.S. citizen and who is not a permanent resident alien of the U.S. Foreign governments and entities are also "foreign persons." Also, each successive link in a chain of U.S. entities containing foreign interests is considered a "foreign person." An entity is deemed a "foreign person" if it is 10 percent or more foreign owned by a single foreign person or foreign persons acting in concert, or 50 percent foreign owned by a group of foreign persons not acting in concert, none of whom individually holds a 10 percent or greater interest in the entity. Therefore, acreage figures reported do not necessarily mean that they are wholly owned by foreign investors. Covers reports received and accepted as of December 31, 1991]

No. 1105. Percent Distribution of Farms and Farm Debt, by Debt/Asset Ratio: 1987 to 1991

[Value of sales for calendar year shown; balance sheet data as of January 1 of the following year. A farm is a crop or livestock farm if 50 percent or more of its commodity receipts derive from the sale of crop or animal products, respectively. A crop or livestock farm is further categorized as a particular type if 50 percent of its crop or, if applicable, livestock receipts come from a specific commodity area. Based on Farm Costs and Returns Survey conducted in February-March of following year]

[1] Includes forest product sales. [2] Data for 1980 to 1983 are not comparable with later data. [3] Minus sign (-) indicates decrease in inventories. [4] Includes bulbs, plants, and trees. [5] Expenditures for repairs and maintenance of farm buildings, motor vehicles, and machinery. [6] Includes machine hire and customwork expenses; marketing, storage, and transportation expenses and miscellaneous expenses. [7] Includes Social Security payments and perquisites. [8] Data for years 1980-83, and 1984 and later are based on different sources, creating potential inconsistencies in estimates among these periods. [9] Depreciation and accidental damage.

No. 1110. Commodity Credit Corporation—Net Outlays, by Commodity and Function: 1980 to 1992

[**In millions of dollars. For fiscal year ending in year shown**; see text, section 9. Excludes value of commodity certificates which may also be issued to farmers in lieu of cash under certain programs. Minus sign (-) indicates a net receipt (excess of repayments or other receipts over gross outlays of funds)]

1988/89 disaster/livestock assistance	(X)	[3]161	121	1,054					
Other	−113	609	2	−149					

- Represents zero. X Not applicable. [1] Excludes CCC transfers to the general sales manager. [2] Covers the direct export credit sales program, the export guarantee program, and transfers to the general sales manager. [3] Approximately $1.5 billion in benefits to farmers under the Disaster Assistance Act of 1989 were paid in generic certificates and were not recorded directly as disaster assistance outlays. [4] Price support loans made less loans repaid. [5] Includes disaster payments; and, beginning 1990, dairy termination program. Cash payments only. For 1990-92 excludes generic certificates. [6] Purchases less sales proceeds.

[1] The difference between expenditures for domestic farm-originated food products and the farm value or payment farmers received for the equivalent farm products. [2] Food primarily purchased from retail food stores for use at home. [3] Covers employee wages and salaries, and their health and welfare benefits. Also includes imputed earnings of proprietors, partners, and family workers not receiving stated remuneration. [4] Excludes local hauling. [5] Represents advertising, rent, depreciation, interest on borrowed capital, taxes other than income, and other costs.

No. 1130. Principal Crops—Production, Supply, and Disappearance: 1988 to 1992

[Marketing year beginning May 1 for hay, June 1 for wheat, August 1 for cotton and rice, September 1 for soybeans, corn, and sorghum. Acreage, production, and yield of all crops periodically revised on basis of census data. See also *Historical Statistics, Colonial Times to 1970*, series K 506-563]

- Represents zero. NA Not available. [1] Acreage set aside under diversion, PIK (payment-in-kind) and acreage reduction programs. [2] Except as noted, marketing year average price. U.S. prices are computed by weighting U.S. monthly prices by estimated monthly marketings and do not include an allowance for outstanding loans and government purchases and payments. [3] Comprises production, imports, and beginning stocks. [4] Includes feed, residual, and other domestic uses not shown separately. [5] Prices are for hay sold baled. [6] Season average prices received by farmers. U.S. prices are computed by weighting State prices by estimated sales and include an allowance for outstanding loans and government purchases, if any, for crops under government programs. [7] Bales of 480 pounds, net weight. [8] State production figures, which conform with U.S. Bureau of the Census annual ginning enumeration with allowance for cross-State ginnings, rounded to thousands and added for U.S. totals. [9] Stock estimates based on Census Bureau data which results in an unaccounted difference between supply and use estimates and changes in ending stocks. [10] Average to April 1, 1993. [11] Flue-cured and cigar wrapper, crop year July-June; all other types October-September. Farm-sales-weight basis. [12] Includes tobacco carried over on farms. [13] Covers potatoes used for table use, frozen and canned products, chips, and dehydration. [14] Covers fresh potatoes, chips, frozen and dehydrated products.

Source: Production—U.S. Dept. of Agriculture, National Agricultural Statistics Service. In *Crop Production*, annual; and *Crop Values*, annual. Supply and disappearance—U.S. Dept. of Agriculture, Economic Research Service, *Feed Situation*, quarterly; *Fats and Oils Situation*, quarterly; *Wheat Situation*, quarterly; *Tobacco Situation*, quarterly; *Cotton and Wool Outlook Statistics*, periodic; and *Agricultural Supply and Demand Estimates*, periodic. All data are also in *Agricultural Statistics*, annual; and *Agricultural Outlook*, monthly.

No. 1131. Selected Crops—Acreage, Production, and Value, by Leading States: 1990 to 1992

[One bushel of corn = 56 pounds; one bushel of soybeans or wheat = 60 pounds. See also *Historical Statistics, Colonial Times to 1970*, series K 502-508, 521, 553-558, and 561-563]

No. 1132. Sugar Beets, Sugarcane, and Sugar—Summary: 1990 to 1992

[Data are for crop year. See also *Historical Statistics, Colonial Times to 1970*, series K 542-546]

ITEM	Unit	SUGAR BEETS			SUGARCANE FOR SUGAR AND SEED			YEAR	SUGAR PRODUCTION (1,000 tons)	
		1990	1991	1992	1990	1991	1992		Raw value [1]	Refined basis [2]
Acreage harvested	1,000 acres	1,377	1,387	1,411	794	897	935	**Beet:** 1990	3,842	3,591
Yield per acre	Sh. tons	20.0	20.3	20.4	35.4	33.7	33.0	1991	3,729	3,485
Production	Mil. tons	27.5	28.2	28.8	28.1	30.3	30.9	1992	4,147	3,876
Price per ton [3]	Dollars	43.00	38.50	(NA)	[4]30.80	[4]29.00	(NA)	**Cane:** 1990	3,152	2,945
Farm value	Mil. dol	1,182	1,086	(NA)	[5]863	[5]876	(NA)	1991	3,430	3,206
								1992	3,416	3,193

NA Not available. [1] Raw value equals 96 degree sugar as defined in Sugar Act of 1948. [2] Calculated on the basis of 100 lbs. of raw sugar required to produce 93.46 lbs. of refined sugar. [3] Season average prices received by farmers. Prices exclude Government payments under Sugar Act. [4] Price per ton for sugar. [5] Price per ton of cane for sugar used in evaluating value of production for seed.

Forests and Fisheries

This section presents data on the area, ownership, and timber resource of commercial timberland; forestry statistics covering the National Forests and Forest Service cooperative programs; product data for lumber, pulpwood, woodpulp, paper, and paperboard; and similar data. In addition, data are presented on commercial fishing and the fish processing industry.

In Brief

	1992
Production:	
Paper and board	83.7 mil. sh. tns
Consumption:	
Recovered paper	26.2 mil. sh. tns

The principal sources of data relating to forests and forest products are *An Analysis of the Timber Situation in the United States, 1989-2040,1990; Forest Statistics of the United States, 1987, 1989; U.S. Timber Production, Trade, Consumption, and Price Statistics, 1960-88; Land Areas of the National Forest System,* issued annually by the Forest Service of the Department of Agriculture; *Agricultural Statistics* issued by the Department of Agriculture; and reports of the census of manufactures (taken every 5 years) and the annual *Current Industrial Reports,* issued by the Bureau of the Census. Additional information is published in the monthly *Survey of Current Business* of the Bureau of Economic Analysis; and the annual *Wood Pulp and Fiber Statistics* and *The Statistics of Paper, Paperboard, and Wood Pulp* of the American Forest and Paper Association, New York, NY.

The Bureau of the Census also collects data on foreign trade of forest products. The Bureau of Labor Statistics publishes monthly and annual statistics of producer prices for lumber.

The completeness and reliability of statistics on forests and forest products vary considerably. The data for forest land area and stand volumes are much more reliable for areas recently surveyed than for those for which only estimates are available. In general, more data are available for lumber and other manufactured products such as particleboard and softwood panels, etc., than for the primary forest products such as poles and piling and fuelwood.

The principal sources of data relating to fisheries are *Fishery Statistics of the United States,* and *Fisheries of the United States,* both issued annually by the National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA).

The NMFS collects and disseminates data on commercial landings of fish and shellfish. Quarterly data are published on U.S. output of fish sticks, fish portions, and breaded shrimp. Annual reports include quantity and value of commercial landings of fish and shellfish, etc. Reports for the fish-processing industry include annual output of canned, packaged, and industrial products and, for the wholesaling and fish processing establishments, annual and seasonal employment, and number of firms, by product and State.

The Magnuson Fishery Conservation and Management Act of 1976 (Magnuson Act), Public Law 94-265 as amended, provides for the conservation and management of all fishery resources within the U.S. Exclusive Economic Zone (EEZ), except highly migratory species of tuna, and gives the Federal Government exclusive authority over domestic and foreign fisheries within 200 nautical miles of U.S. shores and over certain living marine resources beyond the EEZ. Within the EEZ, the total allowable level of foreign fishing, if any, is that portion of the "optimum yield" not harvested by U.S. vessels. Adjustments in the "optimum yield" level may occur periodically. For details, see *Fisheries of the United States, 1988.* The NMFS collects and disseminates data on catches by foreign fishing vessels in the EEZ.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

No. 1147. National Forest System Land and Purchases: 1970 to 1990

[Area as of **June 30** except, beginning **1980,** as of **Sept. 30;** purchases for years ending **June 30,** except as noted. Includes Puerto Rico. Prior to Oct. 1976, lands to be purchased under the Weeks Law and related acts were approved by the National Forest Reservation Commission which also set prices on such lands. With the passage of the National Forest Management Act, all functions of the Commission were transferred to the Secretary of Agriculture. Actual purchases are made by U.S. Department of Agriculture. See also *Historical Statistics, Colonial Times to 1970,* series L 10-14]

[1] Timberland is forest land that is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as timberland have the capability of producing in excess of 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included. [2] Includes Indian lands. [3] Sawtimber is timber suitable for sawing into lumber. Live trees of commercial species containing at least one 12-foot sawlog or two noncontiguous 8-foot logs, and meeting regional specifications for freedom from defect. Softwood trees must be at least 9.0-inches diameter, and hardwood trees must be at least 11.0-inches diameter at 4 1/2 feet above ground. International 1/4-inch rule. [4] Live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0-inches diameter or larger at 4 1/2 feet above ground.

Mining and Mineral Products

This section presents data relating to mineral industries and their products, general summary measures of production, and employment and more detailed data on production, prices, imports and exports, consumption, and distribution for specific industries and products. Data on mining and mineral products may also be found in sections 27 and 31 of this *Abstract;* data on mining employment may be found in section 13.

In Brief

Petroleum balance, 1991:

Production	6.1 billion barrels
Net imports	2.1 billion barrels
Stocks	1.6 billion barrels

Mining comprises the extraction of minerals occurring naturally (coal, ores, crude petroleum, natural gas) and quarrying, well operation, milling, refining and processing, and other preparation customarily done at the mine or well site or as a part of extraction activity. (Mineral preparation plants are usually operated together with mines or quarries.) Exploration for minerals is included as is the development of mineral properties.

The principal governmental sources of these data are the *Annual Reports,* published by the Bureau of Mines, Department of the Interior, and various monthly and annual publications of the Energy Information Administration, Department of Energy. See text, section 19, for list of Department of Energy publications. In addition, the Bureau of the Census conducts a census of mineral industries every 5 years. Nongovernment sources include the *Annual Statistical Report* of the American Iron and Steel Institute, Washington, DC; *Metals Week* and the monthly *Engineering and Mining Journal,* issued by the McGraw-Hill Publishing Co., New York, NY; *The Iron Age,* issued weekly by the Chilton Co., Philadelphia, PA; and the *Joint Association Survey of the U.S. Oil and Gas Industry,* conducted jointly by the American Petroleum Institute, Independent Petroleum Association of America, and Mid-Continent Oil and Gas Association.

Mineral statistics, with principal emphasis on commodity detail, have been collected by the Geological Survey or by the Bureau of Mines since 1880. Current data in Bureau of Mines publications include quantity and value of nonfuel minerals produced, sold or used by producers, or shipped; quantity of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials. The U.S. Mine Safety and Health Administration also collects and publishes data on workhours, employment, accidents, and injuries in the mineral industries, except petroleum and natural gas. In October 1977, mineral fuel data collection activities of the Bureau of Mines were transferred to the Energy Information Administration.

Censuses of mineral industries have been conducted by the Bureau of the Census at various intervals since 1840. Beginning with the 1967 census, legislation provides for a census to be conducted every 5th year for years ending in "2" and "7." The censuses provide, for the various types of mineral establishments, information on operating costs, capital expenditures, labor, equipment, and energy requirements in relation to their value of shipments and other receipts. Commodity statistics on many manufactured mineral products are also collected by the Bureau at monthly, quarterly, or annual intervals and issued in its *Current Industrial Reports* series.

In general, figures shown in the individual commodity tables include data for outlying areas and may therefore not agree with detailed table 1185. The export and import figures exclude foreign trade passing through the customs districts of Puerto Rico, except where noted as including it.

Historical statistics. Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

No. 1181. Summary of Mineral Operations: 1958 to 1987

NA Not available. [1] Gross earnings paid to all employees on payroll. [2] Computed by subtracting cost of supplies, minerals received for preparation, purchased fuel and electric energy, contract work, and purchased machinery from the value of shipments and capital expenditures. [3] Excludes proprietors and firm members of unincorporated concerns. [4] Represents employees up through the working foreman level engaged in manual work. Includes development and exploration workers. [5] Excludes paid vacations, holidays, and sick leave; includes actual overtime hours (not straight-time equivalent). [6] Represents value of shipments of primary and secondary products of the industry and amount received for services performed for other establishments on a contract, fee, or other basis. [7] Redefined to conform to 1987 and pre-1982 definition of establishment; for detail, see source. [8] Excludes data for dimension stone quarries operated in conjunction with dressing plants. [9] Excludes data for mining included in establishments classified in manufacturing industries.

64	Zinc mine production [2]	1,000 metric tons	317	227	276	515	518
65	Metals, undistributed [10]	(X)	(X)	(X)	(X)	(X)	(X)

- Represents zero. D Withheld to avoid disclosing individual company data. NA Not available. X Not applicable. [1] 42 gal. bbl. [2] Recoverable content of ores, etc. [3] Includes grindstones, oilstones, whetstones, and deburring media. Excludes grinding pebbles, and tubemill liners. [4] Contains bituminous limestone and sandstone, and gilsonite. [5] Value included in "Industrial minerals, undistributed." [6] 1980, crude and refined; thereafter, refined only. [7] From sea water and brines, except for metals (MgO equiv.). [8] Excludes abrasive stone, bituminous limestone and sandstone, and ground soapstone, all included elsewhere in table; 1991 value is for crushed and broken stone only. Includes calcareous marl and slate.

and Principal Producing States, 1991

(including consumption by producers). See *Historical Statistics, Colonial Times to 1970,* series M 13-37 for selected values]

[9] For 1991 production quantity, talc only. [10] Comprises value of items that cannot be disclosed. [11] Antimony content. [12] Included with "Metals, undistributed." [13] Dried equivalent. [14] Represents shipments; includes byproduct ores. [15] Gross weight. [16] For 1980-85, magnesium chloride for magnesium metal included in "Metals undistributed," canvass for magnesium chloride for magnesium metal discontinued in 1986. [17] 5 to 35 percent manganiferous ore. [18] 1989, mercury produced as the primary product only; thereafter, mercury produced as a byproduct of gold ores only. [19] Content of concentrate. [20] Content of ore and concentrate. [21] Tungsten content.

No. 1186. Nonfuel Mineral Commodities—Summary: 1993

[Preliminary estimates]

MINERAL	MINERAL DISPOSITION					Average price per unit (dollars)	Employment (number)
	Unit	Production	Exports	Net import reliance [1] (percent)	Consumption, apparent		
Aluminum	1,000 metric tons	4,000	1,500	(2)	5,500	[3]59.00	19,800
Antimony (contained)	Metric tons	[4]37,000	5,000	58	43,000	[3]80.00	120
Arsenic	Metric tons	-	60	100	22,000	[5]86.00	(NA)
Asbestos	1,000 metric tons	(D)	24	95	32	(D)	70
Barite	1,000 metric tons	410	1	53	874	41.90	350
Bauxite and alumina	1,000 metric tons	(D)	1,114	100	4,900	15-18	35
Beryllium (contained)	Metric tons	240	60	(2)	190	[6]308.00	25
Bismuth (contained)	Metric tons	(D)	60	(D)	[7]1,500	2.65	30
Boron (B_2O_3 content)	1,000 metric tons	521	600	(2)	(NA)	272.00	900
Bromine (contained)	1,000 metric tons	166	20	(2)	157	[3]123.00	300
Cadmium (contained)	Metric tons	1,700	350	49	3,400	[8]1.00	195
Cement	1,000 sh. tons	76,484	750	7	81,934	[9]49.70	18,100
Cesium (contained)	Kilograms	(NA)	(NA)	(NA)	(NA)	[10](NA)	(NA)
Chromium	1,000 metric tons	[11]113	9	74	435	[12]110.00	(NA)
Clays	1,000 sh. tons	42,151	4,000	(2)	38,044	(NA)	11,000
Columbium (contained)	1,000 lb	-	200	100	3,470	[13]2.83	(NA)
Copper (Mine, contained)	1,000 metric tons	1,720	600	3	2,300	[14]107.00	14,000
Diamond (industrial)	Mil. carats	98.4	76.4	10	109.4	[15]0.75	(NA)
Diatomite	1,000 metric tons	647	170	(2)	477	[16]197.00	1,000
Feldspar	1,000 metric tons	696	13	-	696	[16]43.82	400
Fluorspar	1,000 metric tons	50	60	87	399	(NA)	180
Gallium (contained)	Kilograms	-	(NA)	(NA)	(NA)	425.00	20
Garnet (industrial)	Metric tons	54,304	10,000	(2)	40,416	100-2,000	150
Gem stones	Mil. dol.	69.4	1,619	98	3,136	(17)	800
Germanium (contained)	Kilograms	13,000	(NA)	(NA)	[7]29,000	[18]1060.00	100
Gold (gold contained)	Metric tons	320	360	(NA)	100	[19]350.00	14,400
Graphite (crude)	1,000 metric tons	-	16	100	25	[20]580.00	-
Gypsum	1,000 sh. tons	16,300	26,000	35	26,000	[21]6.10	6,700
Indium	Metric tons	(NA)	(NA)	(NA)	[7]30	[22]200.00	(NA)
Iodine	Metric tons	2,042	1,500	52	(NA)	[23]9.12	50
Iron ore (usable)	Mil. metric tons	56.2	4.5	12	66.1	[24]72.5-74.0	7,500
Iron and steel scrap (metal)	Mil. sh. tons	71.2	8.3	(2)	64.3	[25]83.60	104,100
Iron and steel slag (metal)	1,000 sh. tons	18,000	4	(NA)	(NA)	[21]5.55	3,000
Lead (contained)	1,000 metric tons	1,540	70	8	1,220	[3]36.00	1,700
Lime	1,000 sh. tons	18,000	62	-	18,130	[8]51.70	5,500
Magnesium metal	1,000 metric tons	[26]135	60	(2)	126	[27]1.43	1,450
Magnesium compounds	1,000 metric tons	460	50	23	600	(NA)	650
Manganese	1,000 sh. tons	-	14	100	610	[28]3.25	(NA)
Mercury	Metric tons	60	400	(D)	(D)	[29]180.00	(NA)
Mica, scrap and flake	1,000 metric tons	93	4	14	96	[8]56.00	7
Molybdenum	1,000 metric tons	45,400	30,000	(2)	17,200	[10]5.08	800
Nickel	1,000 sh. tons	5,500	8,000	64	121,000	[30]3.21	314
Nitrogen (fixed)-ammonia	1,000 sh. tons	14,500	420	15	17,052	[31]110.00	2,500
Peat	1,000 sh. tons	730	-	50	1,459	[9]23.00	650
Perlite	1,000 sh. tons	571	30	3	591	[9]28.83	115
Phosphate rock	1,000 metric tons	47,000	4,400	(2)	42,000	[9]23.00	5,800
Platinum-group, refined	Kilograms	1,730	36,518	94	113,343	[32]356.00	500
Potash (K_2O equivalent)	1,000 metric tons	1,760	650	67	5,390	134.00	2,179
Pumice and pumicite	1,000 metric tons	439	12	32	642	[16]26.42	50
Rare-earth metals (REO content)	Metric tons	16,000	(NA)	(2)	15,700	[33]2.87	390
Salt	1,000 sh. tons	39,800	1,000	12	45,800	[34]103.00	4,150
Sand and gravel:							
Construction	Million sh. tons	805,700	1,100	(2)	806,000	[9]3.64	41,600
Industrial	1,000 sh. tons	26,100	1,500	(2)	24,690	[9]15.29	1,500
Silicon	1,000 metric tons	350	40	36	550	[35]37.00	2,300
Silver	Metric tons	1,800	2,000	(7)	(NA)	[19]4.00	1,700
Sodium carbonate (soda ash)	1,000 metric. tons	9,500	2,800	(2)	6,694	[36]98.00	2,800
Sodium sulfate	1,000 metric. tons	350	140	1	710	[37]114.00	240
Stone (crushed)	Mil. sh. tons	1,155	3	-	1,158	[9]4.83	75,000
Sulfur (all forms)	1,000 metric tons	10,600	1,000	18	12,900	[38]60.00	3,200

- Represents or rounds to zero. D Withheld to avoid disclosure. NA Not available. [1] Net import reliance as a percent of consumption. [2] Net exporter. [3] Average cents per pound, except bromine (dollars per kilogram). [4] Refinery production. [5] Metal, 99% As_2O_3. [6] Metal, vacuum-cast ingot. [7] Reported consumption. [8] Average dollars per pound, 1 to 5 short ton lots. [9] Dollars per short ton. [10] Metal, dollars per pound. [11] Secondary production. [12] Turkish, dollars per metric ton. [13] Columbite, dollars per pound. [14] Domestic producer cathode, cents per pound. [15] Dollars, per carat. [16] Dollars per metric ton. [17] Variable, depending on size, type and quality. [18] Zone refined, first reduction quality. [19] Dollars, per ounce. [20] Price of flake imports, average dollars per metric ton of foreign imports. [21] F.O.B. mine, average dollar per short ton. [22] Average annual dollars per kilogram (99.97% indium). [23] Average c.i.f. value, dollars per kilogram crude. [24] Lake Superior pellets. Cents per long ton unit of iron, delivered rail of vessel at lower lake ports. [25] Average dollars per long ton delivered, No. 1 heavy melting composite price, Iron Age average, Pittsburg, Philadelphia, Chicago. [26] Primary. [27] Yearend price, dollars per pound. [28] Average value, 46%-48% Mn metalurgical ore, dollars per metric ton unit contained Mn, c.i.f. U.S. ports. [29] Price per flask. [30] Average price, London Metal Exchange cash, dollars per pound. [31] Dollars per short ton, yearend quoted, f.o.b. gulf coast. [32] Dealer price of platinum metal, average dollars per ounce; Palladium price was $89 per ounce; rhodium price was $4,412 per ounce. [33] Yearend dollars per kilogram, bastnasite concentrate, REO basis. [34] Vacuum and open pan. [35] Average cents per pound silicon content, ferrosilicon, 50% Si. [36] Quoted yearend price, dense, bulk, f.o.b. Green River, WY, dollars per short ton. [37] Quoted price, bulk, f.o.b. works, East, dollars per short ton. [38] Reported average dollars per metric ton of elemental sulfur, f.o.b., mine and/or plant.

No. 1195. Mineral Industries—Lost Workday Injuries and Fatalities: 1985 to 1991

[Excludes office workers. Lost workday injuries are nonfatal occurrences that result in days away from work, days of restricted work activity or a permanent disability. Data for all years includes injuries to independent contractors at mine sites. Rates for the noncoal industries are based only on employment and hours worked by mine employees. See also *Historical Statistics, Colonial Times to 1970*, series M 271-286]

ITEM	COAL MINING			QUARRYING; RELATED INDUSTRY [1]			METAL; NONMETAL MINING [2]

NA Not available. [1] Estimated, end of year. Source: 1970-1975; American Gas Association, Arlington, VA (copyright); thereafter, U.S. Energy Information Administration, *U.S. Crude Oil, Natural Gas, and Natural Gas Liquids Reserves*, annual. [2] Marketed production includes gross withdrawals from reservoirs less quantities used for reservoir repressuring and quantities vented or flared. For 1980 and thereafter, it excludes the nonhydrocarbon gases subsequently removed. [3] Includes imports of liquefied natural gas. [4] Includes deliveries to municipalities and public authorities for institutional heating and other purposes. [5] Pipeline fuel. [6] Volumetric reduction in natural gas resulting from the extraction of natural gas constitutents at natural gas processing plants. [7] Beginning 1980, includes liquefied natural gas (LNG) storage in above ground tanks.

No. 1209. Coal and Coke—Summary: 1970 to 1991

[Includes coal consumed at mines. Demonstrated coal reserve base for United States on Jan. 1, 1989, was an estimated 473 billion tons. Recoverability varies between 40 and 90 percent for individual deposits; 50 percent or more of overall U.S. coal reserve base is believed to be recoverable. Construction and Housing

This section presents data on the construction industry and on various indicators of its activity and costs; on housing units and their characteristics and occupants; and on the characteristics and vacancy rates for commercial buildings. Considerable data from the 1990 census are featured in tables 1223 to 1241.

In Brief

Construction contract value up almost 9% to $251 billion in 1992 from 1991.

New homes sold in 1992 increased to 610,000 from 509,000 in 1991.

Sales of existing single-family homes up over 9% in 1992 to 3.5 million.

The principal source of these data is the U.S. Bureau of the Census, which issues a variety of current publications. Construction statistics compiled by the Bureau appear in its monthly *Current Construction Reports* series with various quarterly or annual supplements; *Housing Starts* and *Housing Completions* present data by type of structure and by 4 major census regions; *New One-Family Houses Sold and For Sale* also provides statistics annually on physical and financial characteristics for all new housing by the 4 major census regions; *Price Index of New One-Family Houses Sold* presents quarterly figures and annual regional data; and *Housing Units Authorized by Building Permits* covers approximately 17,000 permit-issuing jurisdictions in the United States. Statistics on expenditures by owners of residential properties are issued quarterly and annually in *Expenditures for Residential Upkeep and Improvements. Value of New Construction Put in Place* presents data on all types of construction and includes monthly composite cost indexes. Reports of the censuses of construction industries (see below) are also issued on various topics.

Other Census Bureau publications include the *Current Housing Reports* series, which comprises the quarterly *Housing Vacancies,* the quarterly *Market Absorption of Apartments,* the American Housing Survey (formerly Annual Housing Survey) and reports of the censuses of housing and of construction industries. *Construction Review,* published quarterly by the International Trade Administration, U.S. Department of Commerce, contains many of the census series and other construction statistics series from the Federal Government and private agencies.

Other sources include the monthly *Dodge Construction Potentials* of F. W. Dodge Division, McGraw-Hill Information Systems Company, New York, NY, which presents national and State data on construction contracts; the National Association of Home Builders with State-level data on housing starts; the NATIONAL ASSOCIATION OF REALTORS, which presents data on existing home sales; the Society of Industrial and Office Realtors and Oncor International on commercial office space; the Bureau of Economic Analysis, which presents data on residential capital and gross housing product; and the U.S. Energy Information Administration, which provides data on commercial buildings through its periodic sample surveys.

Censuses and surveys.—Censuses of the construction industry were first conducted by the Bureau of the Census for 1929, 1935, and 1939; beginning in 1967, a census has been taken every five years (for years ending in "2" and "7"). The latest reports are for 1987.

The 1987 Census of Construction Industries, in accordance with the 1987 *Standard Industrial Classification Manual* (see text, section 13), covers all employer establishments primarily engaged in (1) building construction by general contractors or operative builders; (2) heavy (non-building) construction by general contractors; and (3) construction by special trade contractors.

From 1850 through 1930, the Bureau of the Census collected some housing data as part of its censuses of population and agriculture. Beginning in 1940, separate censuses of housing have been taken at

356-918 O - 93 - 24 : QL 3

10-year intervals. For the 1970 and 1980 censuses, data on year-round housing units were collected and issued on occupancy and structural characteristics, plumbing facilities, value, and rent; for 1990 such characteristics were presented for all housing units.

Evaluation studies of the 1950, 1960, 1970, and 1980 censuses estimated the underenumeration of occupied housing units at 2.9 percent, 2.4 percent, 1.7 percent, and 1.5 percent respectively. The missed rate in 1980 for all housing units was 2.6 percent or approximately 2.3 million units, 1 million of which were vacant housing units. Estimates for underenumeration from the 1990 census are not available at this time.

The American Housing Survey (*Current Housing Reports* series H-150 and H-170), which began in 1973, provided an annual and ongoing series of data on selected housing and demographic characteristics until 1983. In 1984 the name of the survey was changed from the Annual Housing Survey. It is currently based on a biennial national sample and on 11 annual MSA samples. All samples represent a cross section of the housing stock in their respective areas. Estimates are subject to both sampling and nonsampling errors; caution should therefore, be used in making comparisons with 1970 and 1980 census data.

Data on residential mortgages were collected continuously from 1890 to 1970, except 1930, as part of the decennial census by the Bureau of the Census. Since 1973, mortgage status data, which are limited to single family homes on less than ten acres with no business on the property, have been presented in the American Housing Survey.

Housing units.—In general, a housing unit is a group of rooms or a single room occupied or intended for occupancy as separate living quarters; that is, the occupants do not live and eat with any other persons in the structure and there is direct access from the outside or through a common hall. Transient accommodations, barracks for workers, and institutional-type quarters are not counted as housing units.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

No. 1211. Construction Industries—Summary, by Industry: 1987

[Based on a probability sample of about 160,000 construction establishments with payroll in 1987; see Appendix III. N.e.c.= Not elsewhere classified]

No. 1212. Construction Materials—Producer Price Indexes: 1980 to 1992

[**1982 = 100**, except as noted. For discussion of producer price index, see text, section 15. This index, more formally known as the special commodity grouping index for construction materials, covers materials incorporated as integral part of a building or normally installed during construction and not readily removable. Excludes consumer durables such as kitchen ranges, refrigerators, etc. This index is not the same as the stage-of-processing index of intermediate materials and components for construction. See *Historical Statistics, Colonial Times to 1970*, series N 140-155 for similar data]

NA Not available. [1] Weighted average of the various indexes used to deflate the Construction Put in Place series. In calculating the index, the weights (i.e., the composition of current dollar estimates in 1987 by category) are held constant. [2] Derived ratio of total current to constant dollar Construction Put in Place (multiplied by 100). [3] Excludes value of site. [4] Based on average contract unit bid prices for composite mile (involving specific average amounts of excavation, paving, reinforcing steel, structural steel, and structural concrete). [5] Derived from the four quarterly indexes which are weighted averages of costs of labor, materials, and equipment for the construction of dams and reclamation projects. [6] Based on firm's cost experience with respect to labor rates, materials prices, competitive conditions, efficiency of plant and management, and productivity. [7] Average of 20 cities for types shown. Weights based on surveys of building costs. [8] Building index computed on the basis of a hypothetical unit of construction requiring 6 bbl. of portland cement, 1,088 M bd. ft. of 2" x 4" lumber, 2,500 lb. of structural steel, and 68.38 hours of skilled labor. Construction index based on same materials components combined with 200 hours of common labor. [9] Based on data covering public utility construction costs in six geographic regions. Covers skilled and common labor. [10] As derived by U.S. Bureau of the Census. Covers steam generation plants only. [11] As derived by U.S. Bureau of the Census. Reflects costs for structures and improvements at water pumping and treatment plants. [12] Computed by the Census Bureau by averaging the weighted component indexes published for six geographic regions.

No. 1214. Value of New Construction Put in Place: 1964 to 1992

[**In millions of dollars.** Represents value of construction put in place during year; differs from building permit and construction contract data in timing and coverage. Includes installed cost of normal building service equipment and selected types of industrial production equipment (largely site fabricated). Excludes cost of shipbuilding, land, and most types of machinery and equipment. For methodology, see Appendix III. See also *Historical Statistics, Colonial Times to 1970*, series N 1-29 and N 66-69]

No. 1215. Value of New Construction Put in Place in Current and Constant (1987) Dollars: 1985 to 1992

[**In millions of dollars.** Represents value of construction put in place during year; differs from building permit and construction contract data in timing and coverage. Includes installed cost of normal building service equipment and selected types of industrial production equipment (largely site fabricated). Excludes cost of shipbuilding, land, and most types of machinery and equipment. For details on derivation of constant values and description of revised series, see source. For description of nature of revisions and deflators used, see *Construction Reports*, series C30-9005. For methodology, see Appendix III. See also *Historical Statistics, Colonial Times to 1970*, series N 1-29 and N 66-69]

[1] This measure divides the distribution of value and rent categories into four equal parts. The lower quartile value is the value that defines the upper limit of the lowest one-quarter of the cases. The upper quartile value defines the lower limit of the upper one-quarter of the cases in the distribution.

Housing Value and Gross Rent, by State: 1990

Based on the Census of Population and Housing; see appendix III]

Window or ceiling fan	47.9	51.0	9.0	12.0	20.3	6.6	11.0	8.7	8.1	20.2

B Base figure too small to meet statistical standards for reliability. [1] Includes the 0.9 million households with both central air conditioning and window or wall air conditioning units. [2] An air-cooling unit used in dry climates that turns air into moist, cool air by saturating the air with water vapor. [3] Microwave is first or second most used oven. [4] All motorized vehicles used by U.S. households for personal transportation excluding motorcycles, mopeds, large trucks, and buses. [5] Includes refrigerators without freezer compartments. [6] Excludes water heaters that serve more than one household.

No. 1250. Commercial Office Space—Inventory and Vacancy Rates for the 50 Largest Metropolitan Areas: 1992

[**As of December 31.** Central business district is the area located near the historical urban core, commonly associated with the traditional government and financial districts in most cities; outside the central business districts is comprised of the suburban area and "urban clusters" with areas of high office space concentrations. Class A space is in "excellent" locations, with high quality finish, well maintained, and professionally managed; Class B space is in "good" locations, professionally managed, with fairly high quality construction and tenancy. Data based on responses from individuals knowledgeable in the local markets]

Manufactures

This section presents summary data for manufacturing as a whole and more detailed information for major industry groups and selected specific products. The types of measures shown at the different levels include data for establishments; employment and wages; raw materials, fuels, and electricity consumed; plant and equipment expenditures; value and quantity of production and shipments; value added by manufacture; inventories; and various indicators of financial status.

In Brief

Personal computer shipments topped 9.8 million units in 1991.

1-megabit DRAM chips:

	1965	1991
Revenue (mil. dol.)	*5*	*3,776*
Price (dollars)	*162.50*	*4.52*

The principal sources of these data are Bureau of the Census reports of the censuses of manufactures conducted every 5 years; the *Annual Survey of Manufactures;* and the *Current Industrial Reports* series, which presents monthly, quarterly, or annual data on production, shipments, and stocks for particular commodities. Indexes of industrial production are presented monthly in the Federal Reserve Board's *Federal Reserve Bulletin.* Reports on current activities of industries, or current movements of individual commodities, are compiled by such government agencies as the Bureau of Labor Statistics; the Economic Research Service of the Department of Agriculture; the International Trade Administration; and by private research or trade associations such as The Conference Board, Inc., New York, NY and the American Iron and Steel Institute, Washington, DC.

Data on financial aspects of manufacturing industries are collected by the Bureau of Economic Analysis (BEA) and the Bureau of the Census. Industry aggregates in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and amounts of security issues are published for leading manufacturing corporations registered with the Securities and Exchange Commission. The BEA issues data on capital in manufacturing industries and capacity utilization rates in manufacturing. See also section 17, Business Enterprise, in this edition.

Censuses and annual surveys.—The first census of manufactures covered the year 1809. Between 1809 and 1963, a census was conducted at periodic intervals. Since 1967 it has been taken every 5 years (for years ending in "2" and "7"). Census data, either direct reports or estimates from administrative records, are obtained for every manufacturing plant with one paid employee or more.

The *Annual Survey of Manufactures (ASM),* conducted for the first time in 1949, collects data for the years between censuses for the more general measures of manufacturing activity covered in detail by the censuses. The annual survey data are estimates derived from a scientifically selected sample of establishments. The 1991 annual survey is based on a sample of about 55,000 establishments of an approximate total of 200,000. These establishments represent all manufacturing establishments of multiunit companies and all single-establishment manufacturing companies mailed schedules in the 1987 Census of Manufactures. The 1989 through 1993 ASM sample is similar to the previous sample. For the current panel, all establishments of companies with 1987 shipments in manufacturing in excess of $500 million were included in the survey with certainty. For the remaining portion of the mail survey, the establishment was defined as the sampling unit. For this portion, all establishments with 250 employees or more and establishments with a very large value of shipments also were included. Therefore, of the 55,000 establishments included in the ASM panel, approximately 28,000 are selected with certainty. These establishments account for approximately 80 percent of total value of shipments in the 1987

census. Smaller establishments in the remaining portion of the mail survey were selected by sample.

The basic statistical measures of manufacturing activity, such as employment, payrolls, value added, etc., are defined in essentially the same way for both the annual surveys and the census of manufactures. However, the bases for computing average employment vary for different years. For example, beginning with 1949, average employment was calculated from the figures reported for the pay periods ending nearest the 15th of March, May, August, and November; whereas, for 1947 such averages were based on 12 monthly employment figures. In 1967, the average employment calculation was revised to the pay periods which include the 12th of March, May, August, and November to provide data more comparable with other statistical series.

Establishments and classification.—The censuses of manufactures for 1947 through 1987 cover operating manufacturing establishments as defined in the *Standard Industrial Classification Manual (SIC),* issued by the U.S. Office of Management and Budget (see text, section 13). The *Manual* is also used for classifying establishments in the annual surveys. The comparability of manufactures data over time is affected by changes in the official definitions of industries as presented in the *Manual.* It is important to note, therefore, that the 1987 edition of the *Manual* was used for the 1987 census; and the 1972 edition of the *Manual* and the *1977 Supplement* was used for the 1972 through 1982 censuses. For the censuses from 1947 to 1963, reports were required from all establishments employing one or more persons at any time during the census year. Beginning with the 1967 census, an effort was made to relieve the very small establishments from the necessity of filing a census report. Approximately 150,000 small single-unit manufacturing firms identified as having less than 20 employees (cutoff varied by industry) benefited from this procedure. Data for these single-unit companies were estimated on the basis of government administrative records and industry averages. Each of the establishments tabulated was classified in one of the approximately 459 manufacturing industries as defined by the *SIC Manual* in 1987. The *Manual* defines an industry as a number of establishments producing a single product or a closely related group of products. In the main, an establishment is classified in a particular industry if its production of a product or product group exceeds in value added its production of any other product group. While some establishments produce only the products of the industry in which they are classified, few within an industry specialize to that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect both the primary and secondary activities of the establishments in that industry. For this reason, care should be exercised in relating such statistics to the total shipments figures of products primary to the industry.

The censuses for 1947 through 1987 were conducted on an establishment basis. The term "establishment" signifies a single physical plant site or factory. It is not necessarily identical to the business unit or company, which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payroll and inventory records is also required to submit separate reports.

Durable goods.—Items with a normal life expectancy of 3 years or more. Automobiles, furniture, household appliances, and mobile homes are common examples.

Nondurable goods.—Items which generally last for only a short time (3 years or less). Food, beverages, clothing, shoes, and gasoline are common examples.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

NA Not available. [1] Estimated data based on *Annual Survey of Manufactures;* see text, section 27. [2] Includes administrative and auxiliary units, except as noted. [3] Excludes administrative offices and auxiliary units. [4] Includes forms of organization not shown separately. [5] Includes data for employees of manufacturing establishments engaged in distribution and construction work. [6] Data are based on pay periods ending nearest 15th of March, May, August, and November. [7] Adjusted value added; takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year. [8] Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification. [9] Includes plants under construction and not yet in operation. [10] Beginning 1967, includes data obtained from Federal administrative records.

- Represents zero. NA Not available. X Not applicable. [1] Standard Industrial Classification Code; see text, section 27. [2] *All employees* represents the average of *production workers* plus all other employees for the payroll period ending nearest the 15th of March. [3] Includes other industries, not shown separately. [4] Manufacturing concerns often reported separately for central offices or auxiliaries which serve the manufacturing establishment of a company, rather than the general public. Separate reports were obtained from such units if at a different location or if they serviced more than one establishment.

[1] Includes central administrative offices and auxiliary units. [2] Includes employment and payroll at administrative offices and auxiliary units. **All employees** represents the average of production workers plus all other employees for the payroll period ended nearest the 12th of March. Production workers represents the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November.

by State: 1982 to 1991

because U.S. and State figures were independently derived]

No. 1261. Index of Manufacturing Capacity: 1950 to 1992

[**1987 output = 100.** Annual figures are averages of quarterly data. Capacity represents estimated quantity of output, relative to output in 1967, which the *current* stock of plant and equipment in manufacturing industries was capable of producing. Primary processing industries comprise textiles, lumber, paper and pulp, petroleum, rubber, stone, clay, glass, primary metals, fabricated metals, and a portion of chemicals. Advanced processing industries comprise chemical products, food, beverages, tobacco, apparel, furniture, printing and publishing, leather, machinery, transportation equipment, instruments, ordnance, and miscellaneous industry groups]

YEAR	Index of capacity	RELATION OF OUTPUT TO CAPACITY (percent)			YEAR	Index of capacity	RELATION OF OUTPUT TO CAPACITY (percent)		
		All manufacturing	Primary processing	Advanced processing			All manufacturing	Primary processing	Advanced processing
1950	29	83	88	80	1984	111	80	80	80
1955	36	87	92	84	1985	115	80	80	79

No. 1264. U.S. Share of World Exports of Manufactures: 1980 to 1991

[World exports = exports from 15 major trading countries: United States, Austria, Belgium-Luxembourg, Canada, Denmark, France, West Germany, Italy, Japan, Netherlands, Norway, Sweden, Switzerland, and United Kingdom. Percents are calculated from the values of exports of the 5 commodity groups from each of the 15 countries. Percentage shares are based on dollar values calculated at current exchange rates. Details are reported according to the United Nations Standard International Trade Classification (SITC), Revision 2 (1980-87), Revision 3 (1988 forward).

PRODUCT CATEGORY	TOTAL (bil. dol.)						PERCENT OF WORLD EXPORTS					
	1980	1985	1988	1989	1990	1991	1980	1985	1988	1989	1990	1991

[1] Represents manufactures exports. Excludes mineral fuel products, processed food, fats, oils, firearms of war, and ammunition. [2] Includes semimanufactures of various materials, such as metals, fibers, wood, glass, leather, rubber, and certain finished products of metal. [3] Includes mainly nondurable consumer goods and professional and scientific instruments.

No. 1266. Employment Related to Manufactured Exports, by Industry: 1980 to 1989

[Total employment related to manufactured exports is the sum of employment directly calculated for the plants shipping the exported product, the supplying industries and service organizations and the central administrative offices and auxiliaries. For manufacturing industries, employment is limited to paid employees in manufacturing plants, while for nonmanufacturing it includes an estimate for working proprietors and partners]

INDUSTRY	EMPLOYMENT RELATED TO MANUFACTURED EXPORTS						CIVILIAN EMPLOYMENT (1,000)		
	Employees (1,000)			Percent of civilian employment

Other	233	483	606	0.7	1.3	1.5	32,090	37,616	40,751

[1] Includes communications and utilities.

No. 1267. Manufacturing Establishments—Export-Related Shipments and Employment, 1977 to 1989, and by Industry, 1989

[The export-related employment data shown do not include the jobs involved in the export of nonmanufactured goods and various services sold to foreign buyers. Thus, jobs in the manufacturing sector that relate to the export of nonmanufactured goods are excluded from the estimates. In addition, all of the indirect exports being reported are domestically produced, that is, they exclude imports. See source for further details on methodology]

- Represents zero. X Not applicable. Z Equal to or rounds to zero. [1] Standard Industrial Classification; see text, section 13. [2] Includes total domestic and export shipments for all manufacturing establishments. [3] Includes only the value of manufactured products exported by the producing plants. [4] Employment is limited to paid employees in manufacturing plants producing the export product. The number of employees related to export shipments was calculated for each establishment, aggregated by industry and by States, and inflated to a level comparable to the plant value of exports reported in the official foreign trade statistics at port value.

NA Not available. [1] Barrels of 31 wine gallons (see footnote 8). [2] Source: U.S. Bureau of the Census, *Census of Manufactures, 1977, 1982* and *1987*, and *Annual Survey of Manufactures*. [3] Source: U.S. Dept. of Commerce, International Trade Administration. Based on resident population as of July 1, including Armed Forces abroad. [4] Excludes alcohol produced for industrial use. [5] A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon; for spirits of less than 100 proof to the wine gallon. (See footnote 8.) A proof gallon is the alcoholic equivalent of a U.S. gallon at 60° F, containing 50 percent of ethyl alcohol by volume. [6] Includes ethyl alcohol. [7] A wine gallon is the U.S. gallon equivalent to the volume of 231 cubic inches. [8] Production represents total amount removed from fermenters, including distilling material, and includes increase after fermentation (by amelioration, sweetening, and addition of wine spirits). [9] Includes special natural wines. [10] Excludes distilling materials. [11] Includes champagne, other effervescent wines, and artificially carbonated wines.

Terry towels	1,000 doz	44,974	50,182	52,425	47,179	62,741	42,376	43,158

NA Not available. [1] Includes man-made fiber top converted from tow without combing. A number of companies were added for 1990 based on information in the 1987 Census of Manufactures. Data were received from these companies for 1990; therefore, the information shown for years prior to 1990 may not be directly comparable. These changes represent approximately 20 percent of the total fibers consumed on the woolen system and worsted combing. [2] Data are shown on a scoured basis for greasy wool. [3] Shorn and pulled wool of sheep excludes raw wool consumed in cotton system spinning to avoid disclosing figures for individual companies. [4] Includes reprocessed and reused wool, mohair, alpaca, vicuna, and other specialty fibers as well as tops and noils consumed in woolen spinning and mohair consumed in worsted combing. Does not include wool tops consumed in cotton system spinning.

No. 1289. Inorganic Materials and Pharmaceutical Preparations: 1988 to 1991

Product code	ITEM	Unit	1988	1989	1990	1991
	INORGANIC FERTILIZERS					
28731 31	Ammonia, synthetic anhydrous:					
	Total production	1,000 sh. tons	16,821	16,467	17,003	17,167
	Shipments	1,000 sh. tons	9,630	9,599	10,382	10,085
	Shipments value	Mil. dol.	1,011	1,010	1,072	1,036
28731 50	Ammonium nitrate, original solution:					
	Total production	1,000 sh. tons	7,504	7,871	7,714	7,776
28731 57	Ammonium sulfate:					
	Total production	1,000 sh. tons	2,333	2,384	2,519	2,243
	Shipments	1,000 sh. tons	2,307	2,282	2,529	2,251
	Shipments value	Mil. dol.	141	142	130	130
28732	Urea (100%):					
	Total production	1,000 sh. tons	7,914	8,004	8,217	8,133
	Shipments	1,000 sh. tons	5,080	5,231	5,362	5,432
	Shipments value	Mil. dol.	620	625	640	723
28731 11	Nitric acid (100%):					
	Total production	1,000 sh. tons	7,991	8,349	7,931	7,925
	Shipments	1,000 sh. tons	696	743	647	622
	Shipments value	Mil. dol.	76	85	81	80
28741 81	Phosphoric acid (100% P2O5):					
28741 85	Total production	1,000 sh. tons	11,659	11,736	12,035	12,056
	Shipments	1,000 sh. tons	4,212	4,307	4,170	4,352
	Shipments value	Mil. dol.	1,291	1,300	1,226	1,220
28193	Sulfuric acid, gross (100%):					
	Total production	1,000 sh. tons	42,580	43,301	44,337	43,350
	Shipments	1,000 sh. tons	11,574	11,842	11,879	11,603
	Shipments value	Mil. dol.	619	638	589	583
28742	Superphosphates and other fertilizer materials (100% P2O5):					
	Total production	1,000 sh. tons	7,968	8,362	8,982	8,906
	Shipments	1,000 sh. tons	7,813	8,247	9,016	8,899
	Shipments value	Mil. dol.	2,553	2,449	2,711	2,811
T128A	INORGANIC CHEMICAL SHIPMENTS					
2812	Alkalies and chlorine	Mil. dol.	2,590.4	2,989.2	3,187.0	2,930.3
28121	Chlorine (100% Cl)	Mil. dol.	755.1	652.8	477.9	240.6
28123	Sodium hydroxide (caustic soda)	Mil. dol.	1,529.0	1,989.5	2,340.8	2,309.3
28125	Other alkalies	Mil. dol.	300.3	340.1	361.0	373.5
28120 00	Alkalies and chlorine n.s.k.	Mil. dol.	5.9	6.9	7.3	6.8
2816	Inorganic color pigments	Mil. dol.	1,783.0	2,195.4	2,260.9	2,064.6
28161 00	Titanium dioxide (composite and pure) (commodity weight)	Mil. dol.	1,669.9	2,059.2	2,131.2	1,948.7
2819	Inorganic chemicals n.e.c.	Mil. dol.	11,806.3	12,408.1	13,612.0	12,694.3
28193	Sulfuric acid, gross (new and fortified)	Mil. dol.	618.6	638.1	589.4	583.2
28194	Inorganic acids, except nitric, phosphoric and sulfuric	Mil. dol.	563.3	587.7	603.2	568.1
28195	Aluminum oxide, except natural alumina	Mil. dol.	838.5	1,214.8	1,498.5	1,080.7
28196	Aluminum compounds	Mil. dol.	487.9	577.3	665.2	643.7
28197	Potassium and sodium compounds (except bleaches, alkalies, and alums)	Mil. dol.	1,868.2	1,940.8	1,956.3	1,849.4
28198	Chemical catalytic preparations	Mil. dol.	1,093.6	1,225.2	1,221.0	1,225.8
28199	Other inorganic chemicals n.e.c.	Mil. dol.	6,140.4	6,018.4	6,846.4	6,513.7
28190 00	Industrial inorganic chemicals n.s.k.	Mil. dol.	195.8	205.7	232.0	229.6
28422 00	Household bleaching compounds	Mil. dol.	713.2	723.0	724.0	823.6
	PHARMACEUTICAL PREP. SHIPMENTS					
	Pharmaceutical preparations:					
28341	Affecting neoplasms, endocrine systems, and metabolic disease	Mil. dol.	2,071.2	2,507.4	2,743.2	3,340.8
28342	Acting on the central nervous system and sense organs	Mil. dol.	6,172.7	6,441.3	7,218.5	7,820.3
28343	Acting on the cardiovascular system	Mil. dol.	4,449.9	4,874.9	4,814.6	5,009.3
28344	Acting on the respiratory system	Mil. dol.	3,224.0	3,286.2	3,724.1	3,757.8
28345	Acting on the digestive system	Mil. dol.	3,860.8	4,363.0	4,840.2	5,605.8
28346	Acting on the skin	Mil. dol.	1,388.5	1,451.7	1,558.0	1,621.4
28347	Vitamin, nutrient, and hematinic preps.	Mil. dol.	2,538.5	2,672.4	2,587.9	2,596.8
28348	Affecting parasitic and infective disease	Mil. dol.	4,593.6	4,936.2	5,411.0	5,731.0
28349	Pharmaceutical preps. for veterinary use	Mil. dol.	1,051.5	1,071.1	1,056.8	1,163.1

No. 1290. Engines, Refrigeration and Heating Equipment, and Pumps and Compressors—Quantity and Value of Shipments: 1989 to 1991

Product codes	ITEM	Unit	1989	1990	1991
(X)	Internal combustion engines produced	1,000	16,343.2	16,968.6	15,109.7
35191	Gasoline (except outboard, aircraft, and auto)	1,000	15,646.8	16,325.5	14,537.9
35193	Nonautomotive diesel (except aircraft)	1,000	219.1	206.1	184.2
35194	Automotive diesel	1,000	472.9	432.9	383.2
35196	Natural gas and LPG	1,000	4.3	4.0	4.3
(X)	Air-conditioning; heating equip. shipments:				
35851	Heat transfer equipment	Mil. dol.	4,578.2	4,308.3	4,119.4
35852	Unitary air-conditioners	Mil. dol.	3,854.8	3,559.8	3,441.4
35854	Compressors and compressor units	Mil. dol.	2,482.4	2,376.6	2,321.6
3561,3 pt.	Pumps and compressors [1]	Mil. dol.	4,472.8	4,797.3	5,169.0
35611	Industrial pumps	Mil. dol.	2,023.9	2,131.2	2,284.5
35613	Domestic water systems	Mil. dol.	273.8	263.6	275.1
35615 pt.	Oil well, oilfield, and other pumps (including laboratory pumps)	Mil. dol.	488.2	563.4	590.8
35631	Compressors and vacuum pumps	Mil. dol.	1,686.8	1,839.1	2,018.6

X Not applicable. [1] Excludes hand pumps, automotive circulating pumps, compressors for icemaking and refrigeration equipment, air conditioning units, and replacements and repair parts for pumps and compressor.

No. 1291. Computers and Office and Accounting Machines—Quantity and Value of Shipments: 1990 and 1991

Product code	PRODUCT DESCRIPTION	Number of companies	QUANTITY (number)		VALUE (mil. dol.)	
			1990	1991	1990	1991
3571	Electronic computers, general purpose [1]	(X)	(X)	(X)	27,877	26,492
(X)	Digital processing units (retail price):					
35711 01	Less than $500	21	3,575,515	2,757,268	1,008	615
35711 02	$500 to $1,000	25	1,581,970	1,500,493	1,863	1,402

No. 1293. Switchgear, Switchboard Apparatus, Relays, and Industrial Controls—Value of Shipments: 1985 to 1991

[In millions of dollars]

Product code	PRODUCT DESCRIPTION	Number of companies	1985	1987	1988	1989	1990	1991
36132	Power circuit breakers	22	378	373	386	393	388	367
36133	Low volt panelboards & dist. boards [1]	122	1,607	1,569	1,664	1,747	1,722	1,562
36134	Fuses and fuse equipment [2]	22	369	368	390	419	419	409
36135	Molded case circuit breakers; 1,000 volts and under	31	935	879	948	952	959	917
36136	Duct [3]	22	148	132	152	188	194	172
36139	Switchgear, except ducts	95	988	1,049	1,100	1,319	1,324	1,333
36251	General purpose and other relays	115	634	889	873	835	805	783
36252	Specific purpose industrial controls	199	1,747	1,732	1,808	1,928	2,020	1,878
36253	General purpose industrial controls	249	2,191	2,403	2,655	2,971	2,912	2,930
36254	Motor controller accessories [4]	126	381	429	459	503	452	431

[1] Includes other switching and interruption devices, 1,000 volts and below. [2] Under 2,300 volts, except power distribution cutouts. [3] Includes plug-in units and accessories, 1,000 volts and under, consisting of enclosed sectionalized prefabricated bus bars rated 20 amperes or more, associated structures and fittings. [4] Includes parts for industrial controls.

NA Not available. [1] Starting in 1987, product class 38210 (formerly 38112) includes laboratory furniture. Prior to 1987, laboratory furniture had been included in product class 38296 (formerly 38113). [2] The revision beginning 1990 is due to the classification of products in product code 38244 60. Previously, a large part of these data were collected in product class 37149. [3] Prior to 1987, "binoculars and astronomical instruments," and "other instruments and lenses" were combined under product class 38325. In 1987, these were separated into two distinct product classes, 38272 and 38273.

No. 1297. Robots—Units Shipped and Value: 1985 to 1989

[Based on a survey of all known manufacturers of robots, robot accessories, and components. Shipment value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. A robot is a reprogrammable multifunctional manipulator designed to move materials, parts, tools, or specialized devices through variable programmed motions for the performance of a variety of tasks]

Domestic Trade and Services

This section presents statistics relating to the distributive trades and service industries. Data shown for the trades, classified by kind of business, and for the various categories of services (e.g., personal, business, repair, hotel) cover sales or receipts, establishments, employees, payrolls, and other items. Also included are data for franchised businesses. The principal sources of these data are census reports and survey reports of the Bureau of the Census. Data on gross product in trade and service industries usually appear in the *Survey of Current Business*, issued by the U.S. Bureau of Economic Analysis. Financial data for firms engaged in retail, wholesale, or service activities appear in the annual *Statistics of Income*, published by the Internal Revenue Service.

In Brief

Retail sales, 1992:

Total	*$2.0 trillion*
Automotive dealers	*$.4 trillion*
Food stores	*$.4 trillion*

Annual receipts of taxable service firms ($ billions):

	1985	1991
Business services	*156*	*282*
Health services	*147*	*261*

Censuses.—Censuses of retail trade and wholesale trade have been taken at various intervals since 1929. Limited coverage of the service industries started in 1933. Beginning with the 1967 census, legislation provides for a census of each area to be conducted every 5 years (for years ending in "2" and "7"). The industries covered in the censuses and surveys of business are those classified in three divisions defined in the *Standard Industrial Classification Manual* (see text, section 13). *Retail trade* refers to places of business primarily engaged in selling merchandise for personal or household consumption; *wholesale trade,* to establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business and farm uses; and *services,* to establishments primarily engaged in providing a wide range of services for individuals and for businesses.

Beginning with the 1954 Censuses of Retail Trade and Service Industries, data for nonemployer establishments are included and published separately. The census of wholesale trade excludes establishments with no paid employees. Beginning in 1977, sales taxes and finance charges are excluded from sales (or receipt) figures of the three censuses. In 1982 and prior censuses, the count of establishments represented the number in business at the end of the year. For 1987, the count of establishments represents those in business at any time during 1987.

The 1987 Census of Service Industries includes hospitals whereas the 1982 census did not. For 1987, hospitals operated by governmental organizations are included. Government-operated facilities in other service kind-of-business classifications are excluded from the census. In 1982 and 1987, data were not collected for elementary and secondary schools, colleges and universities, labor unions and similar organizations, and political organizations.

The census of retail trade beginning in 1977, excludes nonemployer direct sellers. Beginning 1982, the census treated each leased department in a store as a separate establishment and classified it according to the kind of business it conducted. In prior years, data for leased departments were consolidated with the data for stores in which they were located.

Current surveys.—Current sample surveys conducted by the Bureau of the Census cover various aspects of the retail and wholesale trade and selected service industries. Its *Monthly Retail Trade Report* contains monthly estimates of sales, inventories, inventory/sales ratios, and sales of organizations operating 11 or more retail stores, for the United States, by kind of business. In addition, monthly retail sales data for census

regions and divisions, large States, metropolitan areas, and cities are included. Annual figures on sales, year-end inventories, and sales/inventory ratios, by kind of business, appear in the *Combined Annual and Revised Monthly Retail Trade Report.*

Statistics from the Bureau's monthly wholesale trade survey include national estimates of merchant wholesalers' sales, inventories, and stock-sales ratios by major summary groups—durable and nondurable—and selected kinds of business. Merchant wholesalers are those wholesalers who take title to the goods they sell (e.g., jobbers, exporters, importers, major distributors). These data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale Trade Report.* Annual figures on sales, sales-inventory ratios, and year-end inventories appear in the *Combined Annual and Revised Monthly Wholesale Trade Report.* The *Service Annual Survey* provides annual estimates of receipts for selected service kinds of business for the United States as a whole.

For the current sample survey programs, retail trade coverage is the same as for the census; wholesale trade coverage is limited to merchant wholesalers; and selected services coverage is less inclusive than the census.

Estimates obtained from annual and monthly surveys are based on sample data and are not expected to agree exactly with results that would be obtained from a complete census of all establishments. Data include estimates for sampling units not reporting.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

Hypermarket [5]	10	70	120	120	(NA)	1.3	0.9	(Z)	1	(NA)	(Z)

NA Not available. Z Less than 0.5 percent. [1] Contains greater variety of products than conventional supermarkets, including specialty and service departments, and considerable nonfood (general merchandise) products. [2] Contains limited product variety and fewer services provided, incorporating case lot stocking and shelving practices. [3] Contains a pharmacy, a nonprescription drug department, and a greater variety of health and beauty aids than that carried by conventional supermarkets. [4] A larger warehouse store that offers expanded product variety and often service meat, deli, or seafood departments. [5] A very large store offering a greater variety of general merchandise—like clothes, hardware, and seasonal goods—and personal care products than other grocery stores.

No. 1315. Shopping Centers—Number, Gross Leasable Area, and Retail Sales, by Gross Leasable Area: 1986 to 1992

[As of **December** 31. A shopping center is a group of architecturally unified commercial establishments built on a site that is planned, developed, owned, and managed as an operating unit related in its location, size, and type of shops to the trade area that the unit serves. The unit provides on-site parking in definite relationship to the types and total size of the stores. The data base attempts to include all centers with three or more stores. Estimates are based on a sample of data available on shopping center properties; for details, contact source]

Foreign Commerce and Aid

This section presents data on the flow of goods, services, and capital between the United States and other countries; changes in official reserve assets of the United States; international investments; foreign assistance programs; and import duties.

The Bureau of Economic Analysis publishes current figures on U.S. international transactions and the U.S. international investment position in its monthly *Survey of Current Business.* Statistics for the foreign aid programs are presented by the Agency for International Development (AID) in its annual *U.S. Overseas Loans and Grants and Assistance from International Organizations;* and by the Department of Agriculture in its *Foreign Agricultural Trade of the United States.*

The principal source of merchandise import and export data is the Bureau of the Census. Current data are presented monthly in *U.S. Merchandise Trade,* report series FT900, and *U.S. Merchandise Trade: Exports, General Imports, and Imports for Consumption,* report series FT925. The *Bureau of the Census Catalog* and the *Guide to Foreign Trade Statistics* lists the Bureau's monthly and annual reports in this field. In addition, the International Trade Administration and the Bureau of Economic Analysis present summary as well as selected commodity and country data for U.S. foreign trade in the *Overseas Business Reports* and the *Survey of Current Business,* respectively. The merchandise trade data in the latter source include balance of payments adjustments to the Census data. The Treasury Department's *Monthly Treasury Statement of Receipts and Outlays of the United States Government* contains information on import duties.

International accounts.—The international transactions tables (Nos. 1328 to 1330) show, for given time periods, the transfer of goods, services, grants, and financial assets and liabilities between the United States and the rest of the world. The international investment position table (No. 1331) presents, for specific dates, the value of U.S. investments abroad and of foreign investments in the United States. The movement of foreign and U.S. capital as presented in the balance of payments is not the only factor affecting the total value of foreign investments. Among the other factors are changes in the valuation of assets or liabilities, including changes in prices of securities, defaults, expropriations, and write-offs.

In Brief

U.S. current account deficit increased to –$62.4 billion in 1992.

U.S. merchandise trade deficit rose to –$84.3 billion in 1992.

Trade surplus in "advance technology" products of $33 billion in 1992.

U.S. foreign assistance up 4.3% in 1991 to $16.4 billion.

Direct investment abroad means the ownership or control, directly or indirectly, by one person of 10 percent or more of the voting securities of an incorporated business enterprise or an equivalent interest in an unincorporated business enterprise. Direct investment position is the value of U.S. parents' claims on the equity of, and receivables due from, foreign affiliates, less foreign affiliates' receivables due from their U.S. parents. Income consists of parents' shares in the earnings of their affiliates plus net interest received by parents on intercompany accounts, less withholding taxes on dividends and interest.

Foreign aid.—Foreign assistance is divided into three major categories—grants (military supplies and services and other grants), credits, and other assistance (through net accumulation of foreign currency claims from the sale of agricultural commodities). *Grants* are transfers for which no payment is expected (other than a limited percentage of the foreign currency "counterpart" funds generated by the grant), or which at most involve an obligation on the part of the receiver to extend aid to the United States or other

countries to achieve a common objective. *Credits* are loan disbursements or transfers under other agreements which give rise to specific obligations to repay, over a period of years, usually with interest. All known returns to the U.S. Government stemming from grants and credits (reverse grants, returns of grants, and payments of principal) are taken into account in net grants and net credits, but no allowance is made for interest or commissions. *Other assistance* represents the transfer of U.S. farm products in exchange for foreign currencies (plus, since enactment of Public Law 87-128, currency claims from principal and interest collected on credits extended under the farm products program), *less* the Government's disbursements of the currencies as grants, credits, or for purchases. The net acquisition of currencies represents net transfers of resources to foreign countries under the agricultural programs, in addition to those classified as grants or credits.

The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949. Prior to 1952, economic and technical aid was authorized in the Foreign Assistance Act of 1948, the 1950 Act for International Development, and other legislation which set up programs for specific countries. In 1952, these economic, technical, and military aid programs were combined under the Mutual Security Act, which in turn was followed by the Foreign Assistance Act passed in 1961. Appropriations to provide military assistance were also made in the Department of Defense Appropriation Act (rather than the Foreign Assistance Appropriation Act) beginning in 1966 for certain countries in Southeast Asia and in other legislation concerning program for specific countries (such as Israel). Figures on activity under the Foreign Assistance Act as reported in the *Foreign Grants and Credits* series differ from data published by AID or its immediate predecessors, due largely to differences in reporting, timing, and treatment of particular items.

Exports.—The Bureau of the Census compiles export data primarily from Shipper's Export Declarations required to be filed with customs officials for shipments leaving the United States. They include U.S. exports under mutual security programs and exclude shipments to U.S. Armed Forces for their own use.

The value reported in the export statistics is generally equivalent to a free alongside ship (f.a.s.) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. This value, as defined, excludes the cost of loading merchandise aboard the exporting carrier and also excludes freight, insurance, and any other charges or transportation and other costs beyond the U.S. port of exportation. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. When ultimate destination is not known, the shipment is statistically credited to the last country to which the shipper knows the merchandise will be shipped in the same form as exported.

For certain "low-valued" shipments, the export statistics include estimates based upon selected samples of such shipments. The dollar value of the "low-valued" shipments has varied. For instance, effective January 1987 through September 1989, data are estimated for shipments valued under $1,501; from October 1989 through December 1989, data are estimated for shipments valued under $2,501 to all countries.

Effective January 1990, the United States began substituting Canadian import statistics for U.S. exports to Canada. As a result of the data exchange between the United States and Canada, the United States has adopted the Canadian import exemption level for its export statistics based on shipments to Canada.

Data are estimated for shipments valued under $2,501 to all countries, except Canada, using factors based on the ratios of low-valued shipments to individual country totals. These shipments represent slightly less than 2.5 percent of the monthly value of U.S. exports to those countries. Data are estimated for ship-

ments reported on Canadian import documents which total less than $900 (Canadian). Such shipments represent 2 percent of the monthly value of U.S. exports to Canada.

Prior to 1989, exports were based on Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. These statistics were retabulated and published using Schedule E, Standard International Trade Classification, Revision 2. Beginning in 1989, Schedule B classifications were based on the Harmonized System and made to coincide with the Standard International Trade Classification, Revision 3. This revision will affect the comparability of most export series beginning with the 1989 data.

Imports.—The Bureau of the Census compiles import data from various customs forms required to be filed with customs officials. From 1974-1981, data on import values were presented on three bases: The transaction values f.a.s. (free alongside ship) at the foreign port of export, the c.i.f. (cost, insurance, and freight), and the previously reported customs import value (as appraised by the U.S. Customs Service in accordance with legal requirements of the Tariff Act of 1930, as amended). This latter valuation, primarily used for collection of import duties, frequently did not reflect the actual transaction value. Beginning 1982, import data are based on customs values, i.e., the price paid by the buyer to the seller in accordance with the 1979 Trade Agreement Act amendments to the 1930 Tariff Act. For the c.i.f. imports, the new customs value was substituted for the arms-length transaction value used for 1981 and earlier years. The f.a.s. transaction values were discontinued as of January 1982. Country of origin is defined as country where the merchandise was grown, mined, or manufactured. If country of origin is unknown, country of shipment is reported.

Imports are classified either as "General imports" or "Imports for consumption." General imports are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise. Imports for consumption are a combination of entries for immediate consumption, withdrawals from warehouses for consumption, and entries of merchandise into U.S. customs territory from U.S. Foreign Trade Zones, thus generally reflecting the total of the commodities entered into U.S. consumption channels.

Since July 1953, the import statistics include estimates, not classified by commodity, for certain low-valued shipments. For instance, from January 1985 through September 1989, import statistics include estimates for shipments valued under $1,001. Effective October 1989, import statistics are fully compiled on shipments valued over $1,250 or, under certain textile programs, for any article which must be reported on a formal entry. Value data for shipments valued under $1,251 and not required to be reported on formal entries are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimated low-valued shipments generally amount to slightly less than 4 percent of the import total.

Prior to 1989, imports were based on the Tariff Schedule of the United States Annotated. The statistics were retabulated and published using Schedule A, Standard International Trade Classification, Revision 2. Beginning in 1989, the statistics are based on the Harmonized Tariff Schedule of the United States, which coincides with the Standard International Trade Classification, Revision 3. This revision will affect the comparability of most import series beginning with the 1989 data.

Area coverage.—Except as noted, the geographic area covered by the export and import trade statistics is the United States Customs area (includes the 50 States, the District of Columbia and Puerto Rico), the U.S. Virgin Islands (effective January 1981), and U.S. Foreign Trade Zones (effective July 1982). Data for selected tables and total values for 1980, have been revised to reflect the U.S. Virgin Islands' trade with foreign countries, where possible.

- Represents zero. NA Not available. [1] Excludes transfers of goods and services under U.S. military grant programs. [2] Excludes exports of goods under U.S. military agency sales contracts identified in Bureau of the Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to a balance of payments basis. [3] Includes other end-use items, not shown separately. [4] Includes engines. [5] Excludes automotive. [6] Break in series due to inclusion of new data. See Technical Note in *Survey of Current Business*, June 1979. [7] Includes sales of foreign obligations to foreigners. [8] Not included elsewhere. [9] Includes foreign currency notes sold to private residents abroad.

No. 1335. Foreign Direct Investment in the United States—Gross Book Value and Employment of U.S. Affiliates of Foreign Companies, by State: 1981 and 1990

[A U.S. affiliate is a U.S. business enterprise in which one foreign owner (individual, branch, partnership, association, trust corporation, or government) has a direct or indirect voting interest of 10 percent or more. Universe estimates based on a sample survey of nonbank affiliates with assets, sales, or net income of $10 million or more]

No. 1336. U.S. Businesses Acquired or Established by Foreign Direct Investors, by Industry of U.S. Business Enterprise: 1990 and 1991

[Foreign direct investment is the ownership or control, directly or indirectly, by one foreign individual branch, partnership, association, trust, corporation, or government of 10 percent or more of the voting securities of a U.S. business enterprise or an equivalent interest in an unincorporated one. Data represent number and full cost of acquisitions of existing U.S. business enterprises, including business segments or operating units of existing U.S. business enterprises and establishments of new enterprises. Investments may be made by the foreign direct investor itself, or indirectly by an existing U.S. affiliate of the foreign direct investor. Covers investments in U.S. business enterprises with assets of over $1 million, or ownership of 200 acres of U.S. land]

No. 1338. U.S. Direct Investment Position Abroad, by Country: 1980 to 1991

[**In millions of dollars.** Direct investments represent private enterprises in one country owned or controlled by investors in another country or in the management of which foreign investors have an important role. Negative position occurs when U.S. parent company's liabilities to the foreign affiliate are greater than its equity in, and loans to the foreign affiliate. See also *Historical Statistics, Colonial Times to 1970,* series U 41-46]

Second-stage operations [11]	-	329	3,875	1,113	43	46	40	63	75
Less: Currencies disbursed	*272*	*8,696*	*8,177*	*1,514*	*111*	*116*	*66*	*108*	*76*
Economic grants and credits to purchasing country	182	6,863	6,238	160	15	16	10	36	10
Other uses	90	1,833	1,940	1,334	96	99	56	72	67

- Represents zero. Z Less than $500,000. [1] For details, see table 1340. [2] Developed countries include Australia, Canada, Japan, New Zealand, South Africa, all countries listed under "Western Europe" in table 1340, except Portugal, Spain (through 1981), Yugoslavia, and Malta, and all countries listed under "Eastern Europe" in table 1340. Developing countries include all other countries listed in table 1340 (including Spain through 1981). [3] Foreign Assistance Act of 1961 (P.L. 87-195), as amended. Also includes predecessor and related programs. [4] Includes military assistance under Dept. of Defense Appropriation Act, 1966 (P.L. 89-394) and later acts. [5] Includes funds made available under Public Law 93-199 and subsequent legislation to release Israel from its contractual liability to pay for defense articles and services purchased under other legislation. [6] Net new grants are not adjusted for settlements for postwar relief and other grants under agreements, and net new credits exclude prior grants converted into credits, which were as follows: 1946-55, $1,463 million; 1956-65, $491 million; 1972, $994 million. Repayments on these settlements are included in net new credits. [7] Agricultural Trade Development and Assistance Act. [8] Outstanding credits on Dec. 31, 1991, totaled $54,428 million representing net credits extended since organization of Export-Import Bank, Feb. 12, 1934, less chargeoffs and net adjustments due to exchange rates ($2,079 million), and excluding World War I debts. The amount repayable in dollars at U.S. Government option was $53,208 million; the remainder was repayable in foreign currencies, commodities, or services, at the option of the borrowers. [9] Commodity Credit Corporation Charter Act. [10] Equivalent value of currencies still available to be used, including some funds advanced from foreign governments and after loss by exchange rate fluctuation ($27,236 million), was $36 million on Dec. 31, 1991. [11] Includes foreign currencies acquired from triangular trade operations and principal and interest collections on credits, originally extended under P.L. 83-480, which—since enactment of P.L. 87-128—are available for the same purposes as P.L. 83-480 currencies.

No. 1341. U.S. Foreign Economic and Military Aid Programs: 1946 to 1991

[**In millions of dollars.** For years ending **June 30** except, beginning **1977,** ending **Sept. 30.** Economic aid shown here represents U.S. economic aid-not just aid under Foreign Assistance Act. Major components in recent years include AID, Food for Peace, Peace Corps, and paid-in subscriptions to international financial institutions, such as IBRD, and IDB. Cumulative totals for 1946-1991 are true totals net of deobligation; annual figures however, are gross unadjusted program figures. Military aid includes Military Assistance Program (MAP) grants, foreign military credit sales, service-funded programs, and excess defense articles]

No. 1344. U.S. Exports and Imports of Merchandise: 1970 to 1992

[**In billions of dollars, except percent.** Includes silver ore and bullion; beginning 1974, includes shipments of nonmonetary gold. Data may differ from those shown in other tables due to revisions and inclusion of the Virgin Islands since 1974. For basis of dollar values, see text, section 29. See also *Historical Statistics, Colonial Times to 1970*, series U 190-195 and U 207-212]

Z Less than $50 million. [1] Totals shown for exports reflect the value of estimated parcel post and Special Category shipments, and beginning 1988, adjustments for undocumented exports to Canada which are not distributed by coastal area/customs district. Beginning 1985, the value of bituminous coal exported through Norfolk, VA; Charleston, SC; and Mobile, AL is reflected in the total but not distributed by district. [2] Beginning 1985, excludes exports of bituminous coal. [3] Includes estimated shipments and vessel-own power.

Z Less than $50 million. [1] 1989 includes end of year adjustments for carry-over and other corrections not carried to kind of product detail; therefore, detail will not add. [2] Encompasses recent advances in the development of materials that allow for further development and application of other advanced technologies. Examples are semiconductor materials, optical fiber cable and video discs. [3] Biotechnology is the medical and industrial application of advanced scientific discoveries in genetics to the creation of new drugs, hormones and other therapeutic items for both agricultural and human use. [4] Encompasses advances in robotics, numerically—controlled machine tools, and similar products involving industrial automation that allow for greater flexibility to the manufacturing process and reduce the amount of human intervention. Includes robots, numerically controlled machine tools and semiconductor production and assembly machines. [5] Encompasses electronic products and components that involve the emitting and/or detection of light. Examples of products included are optical scanners, optical disc players, solar cells, photo-sensitive semiconductors and laser printers.

Estimate of low valued import transactions	3,424	879	302	201	323	115	108	543	160	38

- Represents zero. Z Less than $500,000. [1] Effective October 3, 1990 East Germany ceased to exist as a sovereign state and became a part of West Germany. However, trade statistics for Germany comprise of statistics for West Germany and East Germany combined for the period shown. [2] Other than fertilizers covered in SITC division 56 (Fertilizers). [3] Other than crude fertilizers covered in SITC division 272.

No. 1351. U.S. Exports, Imports, and Merchandise Trade Balance, by Country: 1989 to 1992

[**In millions of dollars.** Includes silver ore and bullion. Country totals include exports of special category commodities, if any. Data include nonmonetary gold and includes trade of Virgin Islands with foreign countries, see footnote 2 for exception. Minus sign (-) denotes an excess of imports over exports. See *Historical Statistics, Colonial Times to 1970*, series U 317-352, for selected countries]

- Represents zero. Z Less than $500,000. X Not applicable. [1] Imports are on a customs value basis. Exports are f.a.s. value. [2] Includes revisions not carried to area values; therefore, area values will not add to total. [3] Effective October 3, 1990, East Germany ceased to exist as a sovereign state and became a part of West Germany. Accordingly, trade statistics for East Germany reflect trade for January through September 1990. Trade statistics for 1990 for former West Germany reflect this unification beginning with October 1990. Data for Germany reflect the consolidation of the two countries for 1991.

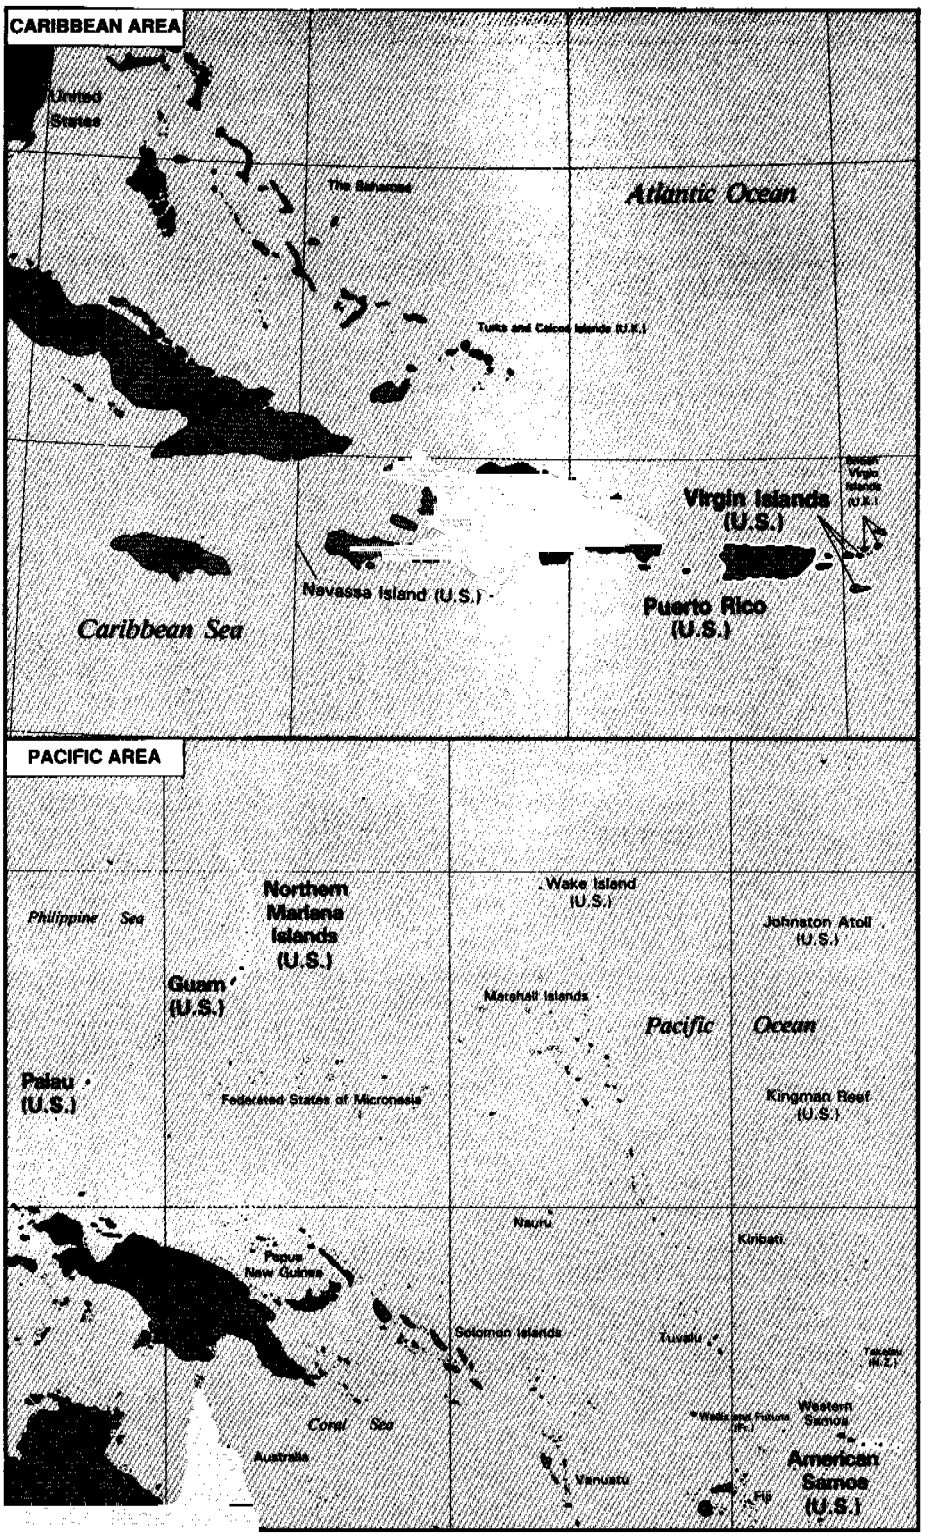
Figure 30.1
Selected Outlying Areas of the United States



Outlying Areas

This section presents summary economic and social statistics for Puerto Rico, Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands.

Primary sources are the decennial censuses of population and housing, and the censuses of agriculture, business, manufactures, and construction (taken every 5 years) conducted by the Bureau of the Census; the annual *Vital Statistics of the United States,* issued by the National Center for Health Statistics; and the annual *Income and Product* of the Puerto Rico Planning Board, San Juan.

Jurisdiction.—The United States gained jurisdiction over these areas as follows:

The islands of *Puerto Rico* and *Guam,* surrendered by Spain to the United States in October 1898, were ceded to the United States by the Treaty of Paris, ratified in 1899. Puerto Rico became a Commonwealth on July 25, 1952, thereby achieving a high degree of local autonomy under its own constitution. The *Virgin Islands,* comprising 50 islands and cays, was purchased by the United States from Denmark in 1917. *American Samoa,* a group of seven islands, was acquired by the United States in accordance with a convention among the United States, Great Britain, and Germany, ratified in 1900 (Swains Island was annexed in 1925).

By an agreement approved by the Security Council and the United States, the Northern Mariana Islands, previously under Japanese mandate, was administered by the United States between 1947 and 1986 under the United Nations trusteeship system. The Northern Mariana Islands became a Commonwealth in 1986.

For a brief summary of U.S. territorial development, see table 356.

Censuses.—Because characteristics of the outlying areas differ, the presentation of census data for them is not uniform. The 1960 Census of Population covered all of the places listed above except the Northern Mariana Islands (their census was conducted in April 1958 by the Office of the High Commissioner), while the 1960 Census of Housing also excluded American Samoa. The 1970, 1980 and 1990 Censuses of Population and Housing covered all five areas. The 1959, 1969, and 1978 Censuses of Agriculture covered Puerto Rico, American Samoa, Guam, and the Virgin Islands; the 1964, 1974, and 1982 censuses covered the same areas except American Samoa; and the 1969, 1978, and 1987 censuses included the Northern Mariana Islands. Beginning in 1967, Congress authorized the economic censuses, to be taken at 5-year intervals, for years ending in "2" and "7." Prior economic censuses were conducted in Puerto Rico for 1949, 1954, 1958, and 1963 and in Guam and the Virgin Islands for 1958 and 1963. In 1967, the census of construction industries was added for the first time in Puerto Rico; in 1972, Virgin Islands and Guam were covered. For 1982 and 1987, the economic censuses covered the Northern Mariana Islands.

In Brief

Persons per household, 1990:

Puerto Rico	*3.3*
Virgin Islands	*3.1*
Guam	*4.0*
American Samoa	*7.0*
Northern Mariana Islands	*4.6*

Information in other sections.—In addition to the statistics presented in this section, other data are included as integral parts of many tables showing distribution by States in various sections of the *Abstract.* See "Outlying areas of the United States" in the index. For definition and explanation of terms used, see section 1, Population; section 4, Education; section 23, Agriculture; section 26, Construction and Housing; section 27, Manufactures; and section 28, Domestic Trade and Services.

No. 1355. Estimated Resident Population, by Area: 1950 to 1990

[**In thousands.** As of **July 1,** except 1990, as of **April 1.** Includes estimates of Armed Forces stationed in area]

AREA	1950	1960	1970	1975	1980	1985	1987	1988	1990

Comparative International Statistics

This section presents statistics for the world as a whole and for many countries on a comparative basis with the United States. Data are shown for population, births and deaths, social and industrial indicators, finances, agriculture, communication, and military affairs.

Statistics of the individual nations may be found primarily in official national publications, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages and expressed in their own or customary units of measure. (For a listing of selected publications, see Guide to Sources.) For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles data as submitted by member countries and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook*; the *Demographic Yearbook;* the *Yearbook of International Trade Statistics;* the *Yearbook of National Accounts Statistics: Vol. II, International Tables; Population and Vital Statistics Reports* (quarterly); the *Monthly Bulletin of Statistics;* and the *Energy Statistics Yearbook.* Specialized agencies of the United Nations also issue international summary publications on agricultural, labor, health, and education statistics. Among these are the *Production Yearbook* and *Trade Yearbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* issued by the International Labour Office, the *World Health Statistics* issued by the World Health Organization, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organization.

The Bureau of the Census, in *Country Demographic Profiles,* series ISP-DP, presents data on individual countries for both a recent census year and the current period; and in the *World Population Profile* series, estimates of basic demographic measures for countries and regions of the world. The *International Population Statistics Reports,* series P-90 and P-91, issued by the Bureau of the Census, also present population figures for many foreign countries. Detailed population statistics are also available from the Bureau of the Census' computerized International Data Base.

In Brief

Ten largest countries in 1993: (1,000 persons)

China, Mainland	1,177,585
India	903,159
United States	258,104
Indonesia	197,232
Brazil	156,664
Russia	149,300
Pakistan	125,214
Japan	124,712
Bangladesh	122,255
Nigeria	95,060

The U.S. Arms Control and Disarmament Agency and the International Monetary Fund (IMF) also compile data on international statistics. In its *World Military Expenditures and Arms Transfers,* published annually, the ACDA presents data on various economic indicators, as well as basic military data. Among the topics presented have been military expenditures, gross national product, imports and exports, and armed forces, by region and/or country. The IMF publishes a series of reports relating to financial data. These include *International Financial Statistics, Direction of Trade,* and *Balance of Payments Yearbook,* published in English, French, and Spanish.

Statistical coverage, country names, and classifications.—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown. The list of countries included is based almost entirely on a list of sovereign nations, dependencies, and areas of special sovereignty published by the U.S. Department of State in *Status of the World's Nations.* Country names are shown here as specified in that publication. In the few cases where a lack of comparability exists between State Department and United Nations' terminology, the State Department's preferences are used.

In recent years, several important changes took place in the status of the world's nations. Two nations, Yemen and Germany, were formed in 1990, each by unification of two formerly separate nations. In the case of Germany, the former German Democratic Republic (East) was subsumed by the Federal Republic of Germany (West). In most cases, data presented in the *Statistical Abstract* are for former West Germany. The Republic of Yemen was formed by union of the former Yemen Arab Republic and the People's Democratic Republic of Yemen. Also in 1990, Namibia finally realized its independence; the United Nations terminated its status as a South African mandate in 1966.

The year 1990 also began a period of turmoil in the former Soviet Union. The independence of three Baltic States—Estonia, Latvia, and Lithuania—was recognized by the central Soviet government in August 1991. The United States established diplomatic relations with the democratically elected governments of the Baltic States in September 1991. In December 1991, the 12 former Soviet republics became separate sovereign nations—Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. Eleven of the 12 have formed a Commonwealth of Independent States (Georgia has not joined). Most data presented in the *Statistical Abstract* are for former Soviet Union.

In 1992, the Socialist Federal Republic of Yugoslavia dissolved and none of the successor states represents its continuation. Bosnia and Herzegovina, Croatia, and Slovenia have been formally recognized as independent states by the United States. Macedonia has proclaimed independent statehood, but has not been formally recognized as a state by the U.S. Serbia and Montenegro have asserted the formation of a joint independent state, but this entity has not been formally recognized as a state by the U.S. In addition, on December 31, 1992, at midnight, Czechoslovakia ceased to exist and was succeeded by two separate and independent states, the Czech Republic and Slovakia. The United States formally recognized the Czech Republic and Slovakia as independent states on January 1, 1993. Finally, Eritrea announced its independence from Ethiopia on April 27, 1993. After this announcement, the U.S. recognized Eritrea as an independent state.

The population estimates and projections used in tables 1374-1376 were prepared by the Census Bureau. For each country, the data on population, by age and sex, fertility, mortality, and international migration were evaluated and, where necessary, adjusted for inconsistencies and errors in the data. In most instances, comprehensive projections were made by the component method, resulting in distributions of the population by age and sex, and requiring an assessment of probable future trends of fertility, mortality, and international migration.

Economic associations.—The Organization for European Economic Co-operation (OEEC), a regional grouping of Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organization for Economic Cooperation and Development (OECD). The member nations of the OECD are Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, the United Kingdom, and the United States.

Quality and comparability of the data.—The quality and comparability of the data presented here are affected by a number of factors:

(1) The year for which data are presented may not be the same for all subjects for a particular country, or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise specified.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-period and coverage qualifications attached to the figures;

considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 States, conterminous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the U.S. figures by the United Nations or other sources in order to make them more comparable with figures from other countries.

International comparisons of national accounts data.—In order to compare national accounts data for different countries, it is necessary to convert each country's data into a common unit of currency, usually the U.S. dollar. The market exchange rates which are often used in converting national currencies do not necessarily reflect the relative purchasing power in the various countries. For example, using table 1387, it should not be concluded that the United Kingdom's individual standard of living in 1990 was only 78 percent of that of the United States, as the statistics may imply. It is obviously necessary that the goods and services produced in different countries should be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (see table 1392) instead of exchange rates is intended to achieve this objective.

The method used to present the data shown in table 1392 is to construct volume measures directly by revaluing the goods and services sold in different countries at a common set of international prices. By dividing the ratio of the gross domestic products of two countries expressed in their own national currencies by the corresponding ratio calculated at constant international prices, it is possible to derive the implied purchasing power parity (PPP) between the two currencies concerned. PPP's show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. For further information, see *National Accounts, Main Aggregates,* volume I, issued annually by the Organization for Economic Cooperation and Development, Paris, France.

International Standard Industrial Classification.—The original version of the International Standard Industrial Classification of All Economic Activities (ISIC) was adopted in 1948. Wide use has been made both nationally and internationally in classifying data according to kind of economic activity in the fields of production, employment, national income, and other economic statistics. A number of countries have utilized the ISIC as the basis for devising their industrial classification scheme. Substantial comparability has been attained between the industrial classifications of many other countries, including the United States, and the ISIC by ensuring, as far as practicable, that the categories at detailed levels of classification in national schemes fitted into only one category of the ISIC. For more detail, see Bureau of the Census, *The International Standard Industrial Classification and the U.S. Standard Industrial Classification,* Technical Paper No. 14 and text, section 27. The United Nations, the International Labour Organization, the Food and Agriculture Organization, and other international bodies have utilized the ISIC in publishing and analyzing statistical data. Revisions of the ISIC were issued in 1958, 1968, and 1989.

International maps. A series of regional world maps is provided on pages 832–838. References are included in table 1374 for easy location of individual countries on the maps. The Robinson map projection is used for this series of maps. A map projection is used to portray all or part of the round Earth on a flat surface, but this cannot be done without some distortion. For the Robinson projection, distortion is very low along the Equator and within 45 degrees of the center but is greatest near the poles. For additional information on map projections and maps, please contact the Earth Science Information Center, U.S. Geological Survey, 507 National Center, Reston, VA 22092.

No. 1374. Population, by Country, 1980, 1990, and 1993, and Projections, 2000

[Population data generally are de facto figures for the present territory. Population estimates were derived from information available as of early 1993. See text, section 31, for general comments concerning the data. For details of methodology, coverage, and reliability, see source. Minus sign (-) indicates decrease]

- Represents or rounds to zero. NA Not available. X Not applicable. Z Less than .05 percent or one person per square mile. [1] Computed by the exponential method. For explanation of average annual percent change, see Guide to Tabular Presentation. [2] Eritrea included in Ethiopia totals. [3] The U.S. view is that the Socialist Federal Republic of Yugoslavia has dissolved and no successor state represents its continuation. Macedonia has proclaimed independent statehood, but has not been recognized as a state by the United States. Serbia and Montenegro have asserted the formation of a joint independent state, but this entity has not been recognized by the United States.

[1] Number of births during 1 year per 1,000 persons (based on midyear population). [2] Number of deaths during 1 year per 1,000 persons (based on midyear population). [3] Number of deaths of children under 1 year of age per 1,000 live births in a calendar year. [4] Average number of children that would be born if all women lived to the end of their childbearing years and, at each year of age, they experienced the birth rates occurring in the specified year. [5] The U.S. view is that the Socialist Federal Republic of Yugoslavia has dissolved and no successor state represents its continuation. Serbia and Montenegro have asserted the formation of a joint independent state, but this entity has not been recognized by the United States.

No. 1377. Population and Average Annual Rates of Growth for World's Largest Cities: 1992 to 2000

[When these city projections were prepared in 1985, cities were defined as population clusters of continuous built-up area with a population density of at least 5,000 persons per square mile. Boundaries were determined by examining detailed maps of each city in conjunction with the most recent official population statistics. The ariel expansion of each city was not projected, hence, density figures for 1992 are based on areas as of 1985]

NA Not available. [1] May include unmarried cohabitating couples. Such couples are explicitly included under married couples in Canada (beginning in 1981) and France. For Sweden, beginning in 1980, all cohabitants are included as married couples, and the figures for 1970 have been adjusted to include all cohabitants. For Denmark, from 1983 onward, persons reported separately as living in consensual unions with joint children have been classified here as married couples. In other countries, some unmarried cohabitants are included as married couples, while some are classified under "other households," depending on responses to surveys and censuses. [2] Children are defined as unmarried children living at home according to the following age limits: Under 18 years old in the United States, Canada, Japan, Denmark, and the United Kingdom, except that the United Kingdom includes 16- and 17-year-olds only if they are in full-time education; under 25 years old in France; under 16 years old in Sweden; and children of all ages in the Netherlands and Germany. [3] Includes both family and nonfamily households not elsewhere classified. These households comprise, for example, siblings residing together, other households composed of relatives, and households made up of roommates. Some unmarried cohabitating couples may also be included in the "other" group. See footnote 1. [4] Estimated by the U.S. Bureau of Labor Statistics. [5] From family-based statistics. However, one person living alone constitutes a family in Denmark. In this respect, the Danish data are closer to household statistics. [6] Great Britain only (excludes Northern Ireland). [7] Former West Germany (prior to unification).

No. 1384. Education Expenditures: 1988

[For definitions of education levels, see table 1385. Includes both current and capital expenditures. Public expenditure refers to the spending of public authorities at all levels. Private expenditure refers to the spending of private sources- mainly households, private non- profit institutions, and firms and businesses. Expenditure per student based on full-time equivalent students enrolled in both public and private schools. Purchasing power parities (PPP's) are the rates of currency conversion that equalize the purchasing power of different countries. This means that a given sum of money, when converted into different currencies at the PPP rates, will buy the same basket of goods and services in all countries. Thus, PPP's are the rates of currency conversion that eliminate differences in price levels between countries]

- Represents or rounds to zero. NA Not available. [1] Expenditures per student estimated. [2] Data included in another category. [3] Public expenditure for education is underestimated because a large part of the pension costs are not included. [4] Public expenditure only. Data not available for expenditure from private sources broken down by ISCED level. [5] Data for private expenditures only. [6] Low percentage of public expenditure for education relative to total public expenditure due to high level of public expenditure and not to low level of expenditure on education.

No. 1385. Educational Attainment: 1989

[Persons 25 to 64 years of age. Educational program levels classified according to the International Standard Classification for Education developed by United Nations Educational, Scientific, and Cultural Organization. Preprimary education covers young children participating in a program intended to foster learning, and emotional and social development. Upper secondary level includes general, technical, or vocational education for students who have completed the first cycle of secondary education. It may either be "terminal" (i.e., preparing students for entry directly into working life) and/or "preparatory" (i.e., preparing students for higher education]

No. 1387. Organization for Economic Cooperation and Development (OECD)—Gross National Product: 1980 to 1990

[For interpretation of the absolute levels of GNP and per capita GNP, the market exchange rates used in converting national currencies do not necessarily reflect the relative purchasing power in the various countries. As a consequence, it should not be concluded, for instance, that the United Kingdom's individual standard of living in 1990 was only 78 percent of that of the United States, as the statistics may imply. Minus sign (-) indicates decrease. For explanation of annual percent change, see Guide to Tabular Presentation]

COUNTRY	GROSS NATIONAL PRODUCT (GNP)					GNP PER CAPITA					Inflation rate, [2] 1989-1990 (percent)

No. 1391. Selected International Economic Indicators: 1970 to 1992

[Data cover gross domestic product (GDP) at market prices, except for Germany and Japan, which relate to gross national product. Gross fixed capital formation covers private and government sectors except military. Savings data are calculated by deducting outlays—such as personal consumption expenditures, interest paid, and transfer payments to foreigners—from disposable personal income. Minus sign (-) indicates decline]

YEAR	United States	France	Germany [1]	Italy	Netherlands	United Kingdom	Japan	Canada
GDP growth rates [2] (constant 1987 prices):								
1970	-	5.7	5.0	5.3	5.4	2.3	10.2	2.6
1980	−0.5	1.6	1.0	4.0	0.9	−1.9	3.5	1.5
1985	3.2	1.9	1.8	2.6	2.6	3.8	5.2	4.8
1990	0.8	2.2	4.9	2.1	3.9	0.5	4.8	−0.5

No. 1392. Gross Domestic Product, Total and Per Capita, Using Purchasing Power Parities—Selected Countries: 1970 to 1990

[The goods and services produced in different countries should be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (PPP) instead of exchange rates is intended to achieve this objective. PPP's show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. For further explanation of PPP, see text, section 31]

- Represents zero. NA Not available. [1] Refers to blue collar workers in undertakings of 20 or more employees. [2] Excludes work-injury compensation program. [3] Includes new 1.1 percent employee tax on all sources of income. [4] Disability and survivors benefits financed through sickness insurance. [5] Includes 1 percent tax to finance employment training for youth. [6] Total contribution rate for five social security programs, including contribution rates for pension and health insurance that are based on rates for male employees under Employee Pension Insurance and Employee Health Insurance programs. [7] Rate refers to male employees and contributions for employee pension insurance only. [8] In 1990 some employer contributions were shifted to the employee, however employer is required to make a special payment to the employee (11 percent in 1991) as compensation. [9] Five to 10.45 percent. [10] Two percent on first 46 pounds per week plus 9 percent of earnings between 46 and 350 pounds. [11] Former West Germany (prior to unification).

No. 1405. Poverty Rates in the Mid-1980's

[Percent of people with income below 40 percent of adjusted household median disposable income after taxes and transfers. (The U.S. official poverty line was approximately 41 percent of median adjusted income in both 1979 and 1986). Income: all forms of cash income (earnings, property income, and all cash transfers including the value of foodstamps in the United States and housing allowances in the United Kingdom and Sweden). Income is adjusted using the U.S. Poverty Line Equivalence Scale which weights a single person household at 1.0; two persons at 1.35; three persons at 1.70; four persons at 2.05; five persons at 2.40, etc. Adjusted income is then compared to the 40 percent poverty line. Data from Luxembourg Income Study, see text, section 31, and source for details]

ITEM	United States 1985	Canada 1987	Australia 1985	Sweden 1987	West Germany 1984	Netherlands 1987	France 1984	United Kingdom 1986
All people	13.3	7.0	6.7	4.3	2.8	3.4	4.5	5.2
Elderly, 65 years old and over	10.9	2.2	4.0	0.7	3.8	-	0.7	1.0
Adults, 18 to 64 years old	10.5	7.0	6.1	5.6	2.6	3.9	5.2	5.3
With children [1]	12.7	6.6	6.6	1.5	2.0	2.8	4.4	6.3
No children [1]	8.4	7.4	5.5	9.7	3.0	4.9	6.1	4.4
All children [1]	20.4	9.3	9.0	1.5	2.8	3.8	4.6	7.4

- Represents or rounds to zero. [1] Children 17 years old and under.

No. 1408. International Economic Composite Indexes—Average Annual Percent Change: 1980 to 1992

[The coincident index changes are for calendar years and the leading index changes are for years ending June 30 because they lead the coincident indexes by about 6 months, on average. The G-7 countries are United States, Canada, France, Germany, Italy, United Kingdom, and Japan. Average annual percent changes derived from indexes with base 1980 = 100. Minus sign (-) indicates decrease]

No. 1411. Indexes of Hourly Compensation Costs for Production Workers in Manufacturing—Selected Countries: 1980 to 1992

[**United States = 100.** Compensation costs include pay for time worked, other direct pay, employer expenditures for legally required insurance programs and contractual and private benefit plans, and for some countries, other labor taxes. Data adjusted for exchange rates. Area averages are trade-weighted to account for differences in countries' relative importance to U.S. trade in manufactured goods. The trade weights used are the sum of U.S. imports of manufactured products for consumption (customs value) and U.S. domestic exports of manufactured products (f.a.s. value) in 1986; see source for detail

No. 1413. Selected Indexes of Manufacturing Activity—Selected Countries: 1970 to 1991

[1982=100. Data relate to all employed persons in the United States and Canada; all employees in other countries. Minus sign (-) indicates decrease. For explanation of average annual percent change, see Guide to Tabular Presentation]

INDEX AND YEAR	United States	Belgium	Canada	Denmark	France	Germany [1]	Italy	Japan	Netherlands	Sweden	United Kingdom
Output per hour:											
1970	(NA)	44.3	76.9	57.2	58.5	67.0	54.6	52.0	52.9	68.9	70.9
1980	94.4	87.5	99.9	98.0	90.6	98.4	95.5	92.1	93.9	96.2	89.9
1985	108.0	117.2	119.8	105.0	108.8	112.9	122.3	112.0	118.7	112.4	118.2
1989	122.5	131.2	119.0	105.6	127.9	119.0	135.1	135.2	126.3	120.0	143.5
1990	125.7	133.9	120.1	106.2	129.4	122.9	140.6	144.2	126.6	121.0	146.0
1991	128.1	137.0	121.7	109.3	129.1	125.4	145.2	146.5	128.6	122.4	149.8
Average annual percent change:											
1979-85	1.9	6.1	2.4	2.1	3.2	2.0	5.0	3.9	4.2	2.9	4.6

- Represents or rounds to zero. NA Not available. [1] Former West Germany (prior to unification). [2] Compensation includes, but real hourly compensation excludes, adjustments for payroll and employment taxes that are not compensation to employees, but are labor costs to employers. [3] Index of hourly compensation divided by the index of consumer prices to adjust for changes in purchasing power. [4] Indexes in national currency adjusted for changes in prevailing exchange rates.

No. 1415. World Production of Major Mineral Commodities, by Selected Commodity: 1985 to 1990

COUNTRY	Unit	1985	1988	1989, prel.	1990, est.	Leading producers, 1990
MINERAL FUELS [1]						
Coal	Mil. metric tons	4,353	4,652	4,785	4,750	China, U.S., Soviet Union
Dry natural gas	Tril. cu. ft.	62.0	69.6	72.0	73.2	Soviet Union, U.S., Canada
Natural gas plant liquids [2]	Mil. barrels [3]	1,437	1,663	1,676	1,728	U.S., Saudi Arabia, Soviet Union
Petroleum, crude	Mil. barrels [3]	19,703	21,412	21,817	22,072	Soviet Union, U.S., Saudi Arabia
Petroleum, refined	Mil. barrels [3]	21,114	22,626	22,812	23,791	U.S., Soviet Union, Japan
NONMETALLIC MINERALS						
Cement, hydraulic	Mil. metric tons	960	1,077	1,148	1,153	China, Soviet Union, Japan
Diamond, gem and industrial	1,000 carats	66,018	96,471	97,462	101,566	Australia, Zaire, Botswana
Nitrogen in ammonia	Mil. metric tons	91.0	99.3	99.1	97.6	Soviet Union, China, U.S.
Phosphate rock	Mil. metric tons	149	161	160	154	U.S., Soviet Union, Morocco
Potash, marketable	Mil. metric tons	29.2	31.8	29.6	27.7	Soviet Union, Canada
Salt	Mil. metric tons	173	183	190	182	U.S., China, Soviet Union
Sulfur, elemental basis	Mil. metric tons	53.8	59.1	59.5	58.2	U.S., Soviet Union, Canada
METALS						
Aluminum [4]	Mil. metric tons	15.4	17.5	18.2	18.0	U.S., Soviet Union, Canada
Bauxite, gross weight	Mil. metric tons	84.2	97.0	104.1	109.6	Australia, Guinea, Jamaica
Chromite, gross weight [2]	1,000 metric tons	10,945	12,890	14,190	12,848	South Africa, Soviet Union, India
Copper, metal content [5]	1,000 metric tons	7,988	8,323	8,667	8,693	Chile, U.S., Canada
Gold, metal content	Metric tons	1,532	1,848	2,023	2,127	South Africa, Soviet Union, U.S.
Iron ore, gross weight [6]	Mil. metric tons	861	926	953	929	Soviet Union, Brazil, China
Lead, metal content [5]	1,000 metric tons	3,431	3,359	3,285	3,390	Australia, U.S., Soviet Union
Manganese ore, gross weight	Mil. metric tons	25.4	25.0	26.6	25.4	Soviet Union, South Africa, China
Nickel, metal content [5]	1,000 metric tons	813	918	970	937	Soviet Union, Canada, New Caledonia
Steel, crude	Mil. metric tons	718	780	786	771	Soviet Union, Japan, U.S.
Tin, metal content [5]	1,000 metric tons	181	205	234	219	China, Brazil, Indonesia
Zinc, metal content [5]	1,000 metric tons	6,758	6,980	7,100	7,320	Canada, Australia, Soviet Union

[1] Source: Energy Information Administration, *International Energy Annual*. [2] Excludes China: Mainland. [3] 42-gallon barrels. [4] Unalloyed ingot metal. [5] Mine output. [6] Includes iron ore concentrates and iron ore agglomerates.

Vietnam	6.7	9.1	126	136	4.2	8.7	(X)	2.7	5.3	5.0
Yugoslavia	47.9	57.3	2,145	2,409	59.4	85.9	4.2	3.6	0.4	0.3
Zaire	2.0	2.3	75	66	4.4	6.2	1.0	[6]1.4	0.1	[6]0.1
Zambia	2.3	1.7	396	201	[5]9.2	7.8	(X)	(X)	0.6	0.4

- Represents or rounds to zero. NA Not available. X Not applicable. Z Less than 50,000 metric tons. [1] Based on apparent consumption of coal, lignite, petroleum products, natural gas, and hydro, nuclear, and geothermal electricity. [2] Comprises production by utilities generating primarily for public use, and production by industrial establishments generating primarily for own use. Relates to production at generating centers, including station use and transmission losses. [3] Includes shale oil, but excludes natural gasoline. [4] Excludes lignite and brown coal, except as noted. [5] Net production, i.e. excluding station use. [6] Provisional. [7] For year ending June of year shown. [8] Includes recovered slurries. [9] For year ending April of year shown. [10] Includes lignite. [11] Source: U.S. Bureau of the Census. Data from Republic of China publications. [12] Includes Monaco. [13] Includes inputs other than crude petroleum and natural gas liquids. [14] For year ending March 20 of year shown. [15] Includes San Marino. [16] Includes share of production and consumption in the Neutral Zone. [17] For year ending March 31 of year shown. [18] Includes Svalbard and Jan Mayen Islands. [19] Includes Botswana, Lesotho, Namibia, and Swaziland. [20] Includes Liechtenstein.

No. 1429. Total External Public Debt, 1980 to 1991, and by Type of Creditor, 1991, and Debt Service Payments and Ratio, 1980 to 1991

[**External public debt** is defined as debt repayable to external creditors in foreign currency, goods, or services, with an original or extended maturity of more than 1 year, which is a direct obligation of, or has repayment guaranteed by, a public body in the borrowing country. Excludes undisbursed debt (amounts not yet drawn by recipient) and unguaranteed private debt, which for some countries is substantial. Debt contracted for the purchase of military equipment is not usually reported. **Debt service** payments represent the sum of interest payments and repayments of principal on external public debt]

No. 1430. Net Flow of Financial Resources to Developing Countries, by Origin and Type of Resource: 1970 to 1991

[**In billions of U.S. dollars.** Net flow covers loans, grants, and grant-like flows minus amortization on loans. Military flows are excluded. Developing countries cover countries designated by Development Assistance Committee as developing. Official development assistance covers all flows to developing countries and multilateral institutions provided by official agencies, including State and local governments, or by their executive agencies, which are administered with the promotion of economic development and welfare of developing countries as their main objective and whose financial terms are intended to be concessional in character with grant element of at least 25 percent. Other official flows cover export credits and portfolio investment from the official sector]

No. 1432. Military Expenditures in Current and Constant (1989) Dollars: 1980 to 1989

[**In millions of dollars, except as indicated.** See also table 551. For most countries, data for expenditures and for GNP were based on local currencies which were deflated to constant 1989 local currency values before conversion to U.S. dollar equivalents. In general, the rates used for conversion are the 1989 average par/market exchange rates as supplied by the International Bank for Reconstruction and Development]

Guide to—Sources of Statistics, State Statistical Abstracts, and Foreign Statistical Abstracts

Alphabetically arranged by subject, this guide contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained in them is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for years later than 1982 or types of data not available in regular series are also included.

Much valuable information may also be found in State reports (see pp. 910-913) and foreign statistical abstracts (see pp. 914 and 915) and in reports for particular commodities, industries, or similar segments of our economic and social structures, many of which are not included here.

Publications listed under each subject are divided into two main groups: "U.S. Government" and "Other." The location of the publisher of each report is given except for Federal agencies located in Washington, DC. Most Federal publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, tel. 202-783-3238, or from Government Printing Office bookstores in certain major cities. In some cases, Federal publications may be obtained from the issuing agency.

Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles.

Bureau of the Census Publications

In most cases, separate reports of the most recent censuses are available for each State, subject, industry, etc. Complete information on publications of all the censuses and current surveys conducted by the Bureau of the Census appears in the *Bureau of the Census Catalog,* published annually and available from the Superintendent of Documents.

Guide to State Statistical Abstracts

This bibliography includes the most recent statistical abstracts for States and Puerto Rico published since 1980 plus those that will be issued in late 1993 or early 1994. For some States, a near equivalent has been listed in substitution for, or in addition to, a statistical abstract. All sources contain statistical tables on a variety of subjects for the State as a whole, its component parts, or both. The page counts given for publications are approximate.

Alabama

University of Alabama, Center for Business and Economic Research, P.O. Box 870221, Tuscaloosa 35487 205-348-6191 •

*Economic Abstract of Alabama.*1992. 600 pp.

Alaska

Department of Commerce and Economic Development, Division of Economic Development, P.O. Box 110804, Juneau 99811 907-465-2017

The Alaska Economy Performance Report. 1990-1991

Arizona

University of Arizona, Economic and Business Research, College of Business and Public Administration, McClelland Hall 204 Tucson Arizona 85721-0001 602-621-2155 FAX 602-621-2150

Arizona Statistical Abstract: A 1993 Data Handbook. 616 pp.

Arizona Economic Indicators. 52 pp. (Biannual.)

Arizona's Economy. 20 pp. (Quarterly newsletter and data.)

Arkansas

University of Arkansas at Little Rock, Economic Research, Library 512, Little Rock 72204

Arkansas State and County Economic Data. 18 pp. (Revised annually.)

University of Arkansas at Little Rock, Census State Data Center, Library 508, Little Rock 72204 501-569-8530

Arkansas Statistical Abstract. 600 pp. (Revised biennially.)

California

Department of Finance, 915 L Street, 8th Floor, Sacramento 95814 916-322-2263

California Statistical Abstract, 1993. 210 pp.

Pacific Data Resources, P.O. Box 1922, Santa Barbara, CA 93116-1922 800-422-2546

California Almanac, 6th ed. Biennial. 275 pp.

Colorado

University of Colorado, Business Research Division, Campus Box 420, Boulder 80309 303-4928227

Statistical Abstract of Colorado, 1987. 600 pp.

Connecticut

Connecticut Department of Economic Development, 865 Brook St., Rocky Hill 06067-3405 1-800-392-2122

Connecticut Market Data. 1992-1993, Approx. 87 pp. No charge for single copy.

Delaware

Delaware Development Office, P.O. Box 1401, 99 Kings Highway, Dover 19903 302-739-4271

Delaware Data Book, 1993. 141 pp.

University of Delaware Bureau of Economic Research, College of Business and Economics, Newark 19716-2730 302-831-8401

Delaware Economic Report 1993-94. 200 pp. Annual

District of Columbia

Office of Planning, Data Management Division, Presidential Bldg., Suite 500, 415 12th St., N.W. Washington 20004 202-727-6533

Population Estimates and Housing Units, annual.

Office of Policy and Evaluation, Executive Office of the Mayor, 1 Judiciary Square, Suite 1000, 441 4th St., N.W., Washington 20001 202-727-4016

Indices—A Statistical Index to DC Services, Dec 1992. Annual. 366 pp.

Florida

University of Florida, Bureau of Economic and Business Research, Gainesville 32611-2017 904-392-0171

Florida Statistical Abstract, 1992. 26th ed. 760 pp.

National Data Consultants, P.O. Box 6381, Athens, Georgia 30604 706-548-8460

Florida County Perspectives: 1991. Annual. 110 pp.

Georgia

University of Georgia, Selig Center for Economic Growth, Terry College of Business, Athens 30602-6269 706-542-4085

Georgia Statistical Abstract, 1992-93. 1992. 535 pp.

University of Georgia, College of Agriculture and Environmental Sciences, Cooperative Extension Service, Athens 30602 706-542-8938

The Georgia County Guide. 1993. 12th ed. Annual. 197 pp.

Office of Planning and Budget, 254 Washington St., S.W., Atlanta 30334-8501 404-656-0911

Georgia Descriptions in Data. 1990-91. 249 pp.

Hawaii

Hawaii State Department of Business, and Economic Development & Tourism, Research and Economic Analysis Division, Statistics Branch P.O. Box 2359, Honolulu 96804. Inquiries 808-586-2481; Copies 808-586-2424

The State of Hawaii Data Book 1992: A Statistical Abstract. 26th ed. 1993. 618 pp.

Idaho

Department of Commerce, 700 West State St., Boise 83720 208-334-2470

County Profiles of Idaho, 1992

Idaho Community Profiles, 1992.

Idaho Facts, 1993.

Idaho Facts Data Book, 1993.

Profile of Rural Idaho 1993.

University of Idaho, Center for Business Development and Research, Moscow 83844-3227 208-885-6611

Idaho Statistical Abstract. 1980. 415 pp. (Out of print.)

Illinois

University of Illinois, Bureau of Economic and Business Research, 428 Commerce West, 1206 South 6th Street, Champaign 61820 217-333-2330

Illinois Statistical Abstract. 1992. 812 pages.

Indiana

Indiana University, Indiana Business Research Center, School of Business, 801 W. Michigan BS4015 Indianapolis 46202-5151 317-274-2204

Indiana Factbook, 1992. 413 pages.

Iowa

Iowa Department of Economic Development Research Bureau, 200 East Grand Ave., Des Moines 50309

1993 Statistical Profile of Iowa.

Kansas

University of Kansas, Institute for Public Policy and Business Research, 607 Blake Hall, Lawrence 66045-2960 913-864-3701

Kansas Statistical Abstract, 1991-92. 27th ed. 1993.

Kentucky

Department of Existing Business and Industry, Capital Plaza Office Tower, Frankfort 40601 502-564-4886

Kentucky Deskbook of Economic Statistics. 29th ed. 1993.

Louisiana

University of New Orleans, Division of Business and Economic Research, New Orleans 70148 504-286-6248

Statistical Abstract of Louisiana. 8th ed. 1990.

Metropolitan Areas: Concepts, Components, and Population

Statistics for metropolitan areas (MA's) shown in the *Statistical Abstract* represent areas designated by the U.S. Office of Management and Budget (OMB) as metropolitan statistical areas (MSA's), consolidated metropolitan statistical areas (CMSA's), and primary metropolitan statistical areas (PMSA's). Currently defined MA's are based on application of 1990 standards (which appeared in the *Federal Register* on March 30, 1990) to 1990 decennial census data. These MA definitions were announced by OMB effective December 31, 1992.

The list of areas that follows (see p. 919) specifies geographic components and latest populations for each MA. As of the December 1992 OMB announcement there were 250 MSA's, as well as 18 CMSA's comprising 59 PMSA's in the United States. In addition, there were three MSA's, one CMSA, and three PMSA's in Puerto Rico. (The figures in tables A, B, and C below exclude the areas in Puerto Rico.)

Standard definitions of metropolitan areas were first issued in 1949 by the then Bureau of the Budget (predecessor of OMB), under the designation "standard metropolitan area" (SMA). The term was changed to "standard metropolitan statistical area" (SMSA) in 1959 and to "metropolitan statistical area" (MSA) in 1983. The current collective term "metropolitan area" for MSA's, CMSA's, and PMSA's became effective in 1990. OMB has been responsible for the official metropolitan areas since they were first defined, except for the period 1977 to 1981, when they were the responsibility of the Office of Federal Statistical Policy and Standards, Department of Commerce.

The standards for defining metropolitan areas were modified in 1958, 1971, 1975, 1980, and 1990.

Defining MA's. The general concept of a metropolitan area is that of a core area containing a large population nucleus, together with adjacent communities having a high degree of economic and social integration with that core.

The current standards provide that each MA must include at least: (a) one city with 50,000 or more inhabitants, or (b) a Census Bureau-defined urbanized area of at least 50,000 inhabitants and a total MA population of at least 100,000 (75,000 in New England).

Under the standards, the county (or counties) that contains the largest city becomes the central county (counties), along with any adjacent counties that have at least 50 percent of their population in the urbanized area surrounding the largest city. Additional "outlying counties" are included in the MA if they meet specified requirements of commuting to the central counties and selected requirements of metropolitan character (such as population density and percent urban). In New England the MA's are defined in terms of cities and towns rather than counties.

The standards provide that within MA's of a million or more population, separate component areas are defined if specified criteria are met and local opinion indicates need for the areas. Such areas are designated PMSA's, and any MA containing PMSA's is designated a CMSA. All MA's not designated as CMSA's and PMSA's are identified as MSA's, including 22 MSA's in the United States with a 1990 population greater than 1 million.

The largest city in each MA is designated a "central city," and additional cities may qualify as such if specified requirements are met concerning population size and commuting patterns. The title of each MSA consists of the names of up to three of its central cities and the name of each State into which the MSA extends. However, a central city generally is not included in an MSA title unless it has one-third the population of the area's largest city or local opinion desires its inclusion. Titles of CMSA's and PMSA's also are limited to three names and typically use central city names (although PMSA's may use county names in their titles and these names may then also appear in CMSA titles). An MA may include other cities of 50,000 or more which are not central cities.

A 1990 census listing, CPH-L-118, showing 1990 and 1980 populations for current MA's and their component counties or New England subcounty areas is available through the Statistical Information Office, Population Division, 301-763-5002. A 1990 Census Supplementary Report showing population and housing characteristics for MA's as defined through June 1993 is being released in late 1993.

New England MA's and NECMA's. MA's in New England are defined in terms of cities and towns rather than counties, with the result that some statistical data available only for counties cannot be compiled for individual New England MA's. For that reason, OMB has established "New England county metropolitan areas" (NECMA's) as a

county-based alternative for New England MA's (although NECMA's do not replace New England MA's as the standard areas). NECMA's are defined corresponding to the individual New England MSA's, for the Boston CMSA, and for the portion of the New York-Northern New Jersey-Long Island CMSA in Connecticut. There are no NECMA definitions corresponding to New England PMSA's.

Changes in MA definitions over time. Changes in the definitions of MA's since the 1950 census have consisted chiefly of (1) the recognition of new areas as they reached the minimum required city or area population; and (2) the addition of counties or New England cities and towns to existing areas as new census data showed them to qualify. Also, former separate MA's have been merged with other areas, and occasionally territory has been transferred from one MA to another or from an MA to nonmetropolitan territory. The large majority of changes have taken place on the basis of decennial census data, although the MA standards specify the bases for intercensal updates.

Because of these changes in definition, users must be cautious in comparing MA data from different dates. For some purposes, comparisons of data for MA's as defined at given dates may be appropriate. In this volume, however, data for earlier dates have been revised where possible to reflect the MA boundaries of the more recent date.

In tables A, B, and C that follow, data are given for MA's as defined for specific dates, thereby indicating the extent of change in population and land area resulting from revisions in definitions.

Table A. Number, Population, and Land Area of MA's as Defined at Specified Dates From 1950 to 1992

[The differences in population shown here for each year within each column of the table result entirely from net expansion of metropolitan territory through changes in the MA definitions. The differences in population over time shown for each MA definition (on the successive lines of the table) result entirely from population changes within that territory, unaffected by changes in MA definitions. The changes in 1990 land area result entirely from net change in MA territory. All data include Alaska and Hawaii and exclude Puerto Rico. Subtraction of any line of the table from the line below will show the net effect of change in population and land area undergone by the MA's as the result of changes in definitions between the specified dates. Such changes may have occurred throughout the period, not on any single date, and may have included reductions in, as well as additions to, MA territory. Census population data for 1970 include corrections made since publication. The area data for the 1950, 1960, 1970, and 1980 census definitions of MA's differ from the data published in those censuses because of subsequent remeasurement of land areas and changes in inland water area occurring for the 1990 census]

MA DEFINITION AS OF—	Number of MA's	POPULATION (as of April 1)					Land area, 1990 (sq. mi.)
		1950	1960	1970	1980	1990	
1950 census (Mar. 1952)	169	[1]84,853,700	106,344,548	122,184,836	128,839,422	139,837,352	206,802

1989 (June 30) [14]	[12]283	105,718,150	133,233,777	156,084,580	172,601,873	192,618,846	574,622
1990 census (June 30, 1990) [14]	[12]284	105,742,856	133,275,412	156,137,337	172,679,870	192,725,741	580,136
1992 (Dec. 31) [14]	[12]268	(NA)	(NA)	(NA)	176,662,797	197,466,567	670,157

NA Not available. [1] Corresponds to total MA population for 1950 census (84,500,680) plus Honolulu MSA. [2] Corresponds to total MA population for 1960 published in 1960 census (112,885,178), corrected by subtracting population (39) erroneously included in Franklin County, Ohio (Columbus MSA). [3] MA's as defined for the 1963 economic censuses. [4] MA's as defined for the 1967 economic censuses. [5] Corresponds to total 1960 population for 1970 MA's published in 1970 census (119,594,754), corrected by subtracting 1,256 population from Lawrence-Haverhill MSA; this represented an addition to the 1960 population of Andover town made subsequent to the original census tabulations, and therefore not reflected in State or national totals. [6] Corresponds to total MA population for 1970 published in 1970 census (139,418,811), plus net corrections made subsequent to publication. [7] MA's as defined for the 1972 economic censuses. [8] Includes estimated 1950 population (32,060) of Anchorage Census Division, as defined in 1970. [9] Includes 1960 population (82,833) of Anchorage Census Division, as defined in 1970. [10] MA's as defined for the 1977 economic censuses. [11] MA's as defined for the 1982 economic censuses. [12] MSA's and CMSA's. [13] MA's as defined for the 1987 economic censuses. [14] Data exclude the portion of Sullivan city in Crawford County, MO (1990 population 1,116) added to the St. Louis, MO-IL MSA by legislative action effective Dec. 22, 1987.

Statistical Methodology and Reliability

Introduction.—The data presented in this *Statistical Abstract* came from many sources. The sources include not only Federal statistical bureaus and other organizations that collect and issue statistics as their principal activity, but also governmental administrative and regulatory agencies, private research bodies, trade associations, insurance companies, health associations, and private organizations such as the National Education Association and philanthropic foundations. Consequently, the data vary considerably as to reference periods, definitions of terms and, for ongoing series, the number and frequency of time periods for which data are available.

The statistics presented were obtained and tabulated by various means. Some statistics are based on complete enumerations or censuses while others are based on samples. Some information is extracted from records kept for administrative or regulatory purposes (school enrollment, hospital records, securities registration, financial accounts, social security records, income tax returns, etc.), while other information is obtained explicitly for statistical purposes through interviews or by mail. The estimation procedures used vary from highly sophisticated scientific techniques, to crude "informed guesses."

Each set of data relates to a group of individuals or units of interest referred to as the *target universe* or *target population,* or simply as the *universe* or *population.* Prior to data collection the target universe should be clearly defined. For example, if data are to be collected for the universe of households in the United States, it is necessary to define a "household." The target universe may not be completely tractable. Cost and other considerations may restrict data collection to a *survey universe* of households on some available list, such list being inaccurate, out of date, defining "household" slightly differently, etc. This list is called a *survey frame* or *sampling frame.*

The data in many tables are based on data obtained for all population units, *a census,* or on data obtained for only a portion, or *sample*, of the population units. When the data presented are based on a sample, the sample is usually a scientifically selected *probability sample.* This is a sample selected from a list or sampling frame in such a way that every possible sample has a known chance of selection and usually each unit selected can be assigned a number, between zero and one, representing its likelihood or probability of selection.

For large-scale sample surveys, the probability sample of units is often selected as a multistage sample. The first stage of a multistage sample is the selection of a probability sample of large groups of population members, referred to as primary sampling units (PSU's). For example, in a national multistage household sample, PSU's are often counties or groups of counties. The second stage of a multistage sample is the selection, within each PSU selected at the first stage, of smaller groups of population units, referred to as secondary sampling units. In subsequent stages of selection, smaller and smaller nested groups are chosen until the ultimate sample of population units is obtained. To qualify a multistage sample as a probability sample, all stages of sampling must be carried out using probability sampling methods.

Prior to selection at each stage of a multistage (or a single stage) sample, a list of the sampling units or sampling frame for that stage must be obtained. For example, for the first stage of selection of a national household sample, a list of the counties and county groups that form the PSU's must be obtained. For the final stage of selection, lists of households, and sometimes persons within the households, have to be compiled in the field. For surveys of economic entities and for the economic census, the Census Bureau generally uses a frame constructed from the Bureau's Standard Statistical Establishment List (SSEL). The SSEL contains

all establishments with payroll in the United States including small single establishment firms as well as large multi-establishment firms.

Wherever the quantities in a table refer to an entire universe, but are constructed from data collected in a sample survey, the table quantities are referred to as *sample estimates.* In constructing a sample estimate, an attempt is made to come as close as is feasible to the corresponding universe quantity that would be obtained from a complete census of the universe. Estimates based on a sample will, however, generally differ from the hypothetical census figures. Two classifications of errors are associated with estimates based on sample surveys: (1) *sampling error*—the error arising from the use of a sample, rather than a census, to estimate population quantities and (2) *nonsampling error*—those errors arising from nonsampling sources. As discussed below, the magnitude of the sampling error for an estimate can usually be estimated from the sample data. However, the magnitude of the nonsampling error for an estimate can rarely be estimated. Consequently, actual error in an estimate exceeds the estimated error in the estimate.

The particular sample used in a survey is only one of a large number of possible samples of the same size which could have been selected using the same sampling procedure. Estimates derived from the different samples would, in general, differ from each other. The *standard error* (SE) is a measure of the variation among the estimates derived from all possible samples. The standard error is the most commonly used measure of the sampling error of an estimate. Valid estimates of the standard errors of survey estimates can usually be calculated from the data collected in a probability sample. For convenience, the standard error is sometimes expressed as a percent of the estimate and is called the relative standard error or *coefficient of variation* (CV). For example, an estimate of 200 units with an estimated standard error of 10 units has an estimated CV of 5 percent.

A sample estimate and an estimate of its standard error or CV can be used to construct interval estimates that have a prescribed confidence that the interval includes the average of the estimates derived from all possible samples with a known probability. To illustrate, if all possible samples were selected under essentially the same general conditions, and using the same sample design, and if an estimate and its estimated standard error were calculated from each sample, then: 1) Approximately 68% of the intervals from one standard error below the estimate to one standard error above the estimate would include the average estimate derived from all possible samples; 2) approximately 90% of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average estimate derived from all possible samples; and 3) approximately 95% of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average estimate derived from all possible samples.

Thus, for a particular sample, one can say with the appropriate level of confidence (e.g., 90% or 95%) that the average of all possible samples is included in the constructed interval. Example of a confidence interval: An estimate is 200 units with a standard error of 10 units. An approximately 90% confidence interval (plus or minus 1.6 standard errors) is from 184 to 216.

All surveys and censuses are subject to nonsampling errors. Nonsampling errors are two kinds—*random* and *nonrandom.* Random nonsampling errors arise because of the varying interpretation of questions (by respondents or interviewers) and varying actions of coders, keyers, and other processors. Some randomness is also introduced when respondents must estimate values. These same errors usually have a nonrandom component. Nonrandom nonsampling errors result from total nonresponse (no usable data obtained for a sampled unit), partial or item nonresponse (only a portion of a response may be usable), inability or unwillingness on the part of respondents to provide correct information, difficulty interpreting questions, mistakes in recording or keying data, errors of collection or processing, and coverage problems (overcoverage and undercoverage of the target universe). Random nonresponse errors usually, but not always, result in an understatement of sampling errors and thus an

overstatement of the precision of survey estimates. Estimating the magnitude of nonsampling errors would require special experiments or access to independent data and, consequently, the magnitudes are seldom available.

Nearly all types of nonsampling errors that affect surveys also occur in complete censuses. Since surveys can be conducted on a smaller scale than censuses, nonsampling errors can presumably be controlled more tightly. Relatively more funds and effort can perhaps be expended toward eliciting responses, detecting and correcting response error, and reducing processing errors. As a result, survey results can sometimes be more accurate than census results.

To compensate for suspected nonrandom errors, adjustments of the sample estimates are often made. For example, adjustments are frequently made for nonresponse, both total and partial. Adjustments made for either type of nonresponse are often referred to as *imputations.* Imputation for total nonresponse is usually made by substituting for the questionnaire responses of the nonrespondents the "average" questionnaire responses of the respondents. These imputations usually are made separately within various groups of sample members, formed by attempting to place respondents and nonrespondents together that have "similar" survey characteristics. Imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are "similar" to those of the nonrespondent.

For an estimate calculated from a sample survey, the *total error* in the estimate is composed of the sampling error, which can usually be estimated from the sample, and the nonsampling error, which usually cannot be estimated from the sample. The total error present in a population quantity obtained from a complete census is composed of only nonsampling errors. Ideally, estimates of the total error associated with data given in the *Statistical Abstract* tables should be given. However, due to the unavailability of estimates of nonsampling errors, only estimates of the levels of sampling errors, in terms of estimated standard errors or coefficients of variation, are available. To obtain estimates of the estimated standard errors from the sample of interest, obtain a copy of the referenced report which appears at the end of each table.

Principal data bases.—Beginning below are brief descriptions of 35 of the sample surveys and censuses that provide a substantial portion of the data contained in this *Abstract.*

SECTION 1. POPULATION

Source and Title: Bureau of the Census, *Census of Population*

Tables: See tables citing *Census of Population* in section 1 and also in sections 2, 4, 6, 8, 13, 14, 26, 21, and 30.

Universe, Frequency, and Types of Data: Complete count of U.S. population conducted every 10 years since 1790. Data obtained on number and characteristics of inhabitants.

Type of Data Collection Operation: In 1970, 1980, and 1990 complete census for some items—age, sex, race, marital status, and relationship to household head. In 1970, other items collected from a 5% and a 15% probability (systematic) sample of the population. In 1980, approximately 19% of the housing units were included in the sample; in 1990, approximately 17%.

Data Collection and Imputation Procedures: In 1970, extensive use of mail questionnaires in urban areas; personal interviews in most rural areas. In 1980 and 1990, mail questionnaires were used in even more areas than in 1970, with personal interviews in the remainder. Extensive telephone and personal followup for nonrespondents was done in the censuses. Imputations were made for missing characteristics.

Estimates of Sampling Error: Sampling errors for data are estimated for all items collected by sample and vary by characteristic and geographic area. The CV's for national and State estimates are generally very small.

Other (nonsampling) Errors: Since 1950, evaluation programs have been conducted to provide information on the magnitude of some sources of nonsampling errors such as response bias and undercoverage in each census. Results from the evaluation program for the 1990 census indicate that the net under coverage amounted to about 1.5 to 2 percent of the total resident population.

Sources of Additional Material: U.S. Bureau of the Census, *The Coverage of Population in the 1980 Census,* PHC80-E4; *Content Reinterview Study: Accuracy of Data for Selected Population and Housing Characteristics as Measured by Reinterview,* PHC80-E2; *1980 Census of Population,* vol. 1., (PC80-1), appendixes B, C, and D.

Source and Title: U.S. Bureau of the Census, *Current Population Survey (CPS)*

Tables: See tables citing *Current Population Reports* primarily in section 1, but also in sections 2, 3, 4, 8, 12, 13, 14, 18, 23, and 30. Many Bureau of Labor Statistics' (BLS) tables in section 13 are CPS based.

Universe, Frequency, and Types of Data: Nationwide monthly sample survey of civilian noninstitutional population, 15 years old or over, to obtain data on employment, unemployment, and a number of other characteristics.

Type of Data Collection Operation: Multistage probability sample of about 60,000 households in 729 PSU's in 1989. Oversampling in some States and the largest MSA's to improve reliability for those areas of employment data on annual average basis. A continual sample rotation system is used. Households are in sample 4 months, out for 8 months, and in for 4 more. Month-to-month overlap is 75%; year-to-year overlap is 50%.

Data Collection and Imputation Procedures: For first and fifth months that a household is in sample, personal interviews; other months, approximately, 85% of the data collected by phone. Imputation is done for both item and total nonresponse. Adjustment for total nonresponse is done by a predefined cluster of units, by MSA size and residence; for item nonresponse imputation varies by subject matter.

Estimates of Sampling Error: Estimated CV's on national annual averages for labor force, total employment, and nonagricultural employment, 0.2%; for total unemployment and agricultural employment, 1.0% to 2.5%. The estimated CV's for family income and poverty rate for all persons in 1986 are 0.5% and 1.5%, respectively. CV's for subnational areas, such as States, would be larger and would vary by area.

Other (nonsampling) Errors: Estimates of response bias on unemployment are not available, but estimates of unemployment are usually 5% to 9% lower than estimates from reinterviews. Four to 5.0% of sample households unavailable for interviews.

Sources of Additional Material: U.S. Bureau of the Census and Bureau of Labor Statistics, *Concepts and Methods Used in Labor Force Statistics from Current Population Survey* (Census series P-23, No. 62; BLS Report No. 463) and Bureau of the Census, *Current Population Survey* (Tech. Paper 40) and Bureau of Labor Statistics, *Employment and Earnings,* monthly, Explanatory Notes, table 1-A through 1-H and *BLS Handbook of Methods,* Chapter 1 (Bulletin 2414.)

SECTION 2. VITAL STATISTICS

Source and Title: U.S. National Center for Health Statistics (NCHS), *Vital Registration System*

Tables: See tables citing *Vital Statistics of the United States;* 305 in section 5; and 1360 in section 30.

Universe, Frequency, and Types of Data: Annual data on births and deaths in the United States.

Type of Data Collection Operation: Mortality data based on complete file of death records, except 1972, based on 50% sample. Natality statistics 1951-71, based on 50% sample of birth certificates, except a 20% to 50% in 1967, received by NCHS. Beginning 1972, data from some States received through Vital Statistics Cooperative Program (VSCP) and complete file used; data from other States based on 50% sample. Beginning 1986, all reporting areas participated in the VSCP.

Data Collection and Imputation Procedures: Reports based on records from registration offices of all States, District of Columbia, New York City, Puerto Rico, Virgin Islands, and Guam.

Estimates of Sampling Error: For recent years, CV's for births are small due to large portion of total file in sample (except for very small estimated totals).

Other (nonsampling) Errors: Data on births and deaths believed to be at least 99% complete.

Sources of Additional Material: U.S. National Center for Health Statistics, *Vital Statistics of the United States,* vol. I and vol. II, annual, and *Monthly Vital Statistics Report.*

(See section 1 above for information pertaining to tables 103-108.)

SECTION 3. HEALTH AND NUTRITION

Source and Title: U.S. National Center for Health Statistics, *National Health Interview Survey (NHIS)*

Tables: 169, 174, 175, 196, 199, 200, 205, 206, 210, and 212-215.

Universe, Frequency, and Types of Data: Continuous data collection covering the civilian noninstitutional population to obtain

information on personal and demographic characteristics, illnesses, injuries, impairments, and other health topics.

Type of Data Collection Operation: Multistage probability sample of 42,000 households (in 376 PSU's) selected in groups of about four adjacent households.

Data Collection and Imputation Procedures: Personal household interviews with extensive followup of nonrespondents. Data are adjusted for nonresponse by imputation procedure based on "average" characteristics of persons in interviewed households in the same geographic area.

Estimates of Sampling Error: Estimated CV's: For physician visits by males, 1.5%; for workdays lost by males, 3.5%; for persons injured at home, 4.7%.

Other (nonsampling) Errors: Response rate was 95.7% in 1985 for the NHIS.

Sources of Additional Material: U.S. National Center for Health Statistics, "Current Estimates from the National Health Interview Survey, U.S., 1983," Vital and Health Statistics, series 10.

(See section 13 for information pertaining to table 170 and section 15 for table 163.)

SECTION 4. EDUCATION

Source and Title: U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Fall Enrollment in Institutions of Higher Education;* beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS), Fall Enrollment*

Tables: 271, and 273-276.

Universe, Frequency, and Types of Data: Annual survey of all institutions and branches listed in the *Directory* to obtain data on total enrollment by sex, level of enrollment, type of program, racial/ethnic characteristics (in alternate years) and attendance status of student, and on first-time students.

Type of Data Collection Operation: Complete census.

Data Collection and Imputation Procedures: Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Approximately 82% response rate.

Sources of Additional Material: U.S. Department of Education, National Center for Education Statistics, *Fall Enrollment in Higher Education,* annual.

Source and Title: U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Financial Statistics of Institutions of Higher Education;* beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS), Financial Statistics of Institutions of Higher Education*

Tables: 222, 225, 274, and 278.

Universe, Frequency, and Types of Data: Annual survey of all institutions and branches listed in the *Education Directory, Colleges and Universities* to obtain data on financial status and operations, including current funds revenues, current funds expenditures, and physical plant assets.

Type of Data Collection Operation: Complete census.

Data Collection and Imputation Procedures: Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: For 1990, a 87% response rate. Imputed expenditures amounted to about 2.8% of total expenditures.

Sources of Additional Material: U.S. Department of Education, National Center for Education Statistics, *Financial Statistics of Institutions of Higher Education,* annual.

Source and Title: U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Degrees and Other Formal Awards Conferred.* Beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS), Degrees and Other Formal Awards Conferred.*

Tables: 291-295.

Universe, Frequency, and Types of Data: Annual survey of all institutions and branches listed in the *Education Directory, Colleges and Universities* to obtain data on earned degrees and other formal awards, conferred by field of study, level of degree, sex, and by racial/ethnic characteristics (in alternate years).

Type of Data Collection Operation: Complete census.

Data Collection and Imputation Procedures: Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

Estimates of Sampling Error: Not applicable.
Other (nonsampling) Errors: For 1989-90, approximately 92.3% response rate.
Sources of Additional Material: U.S. Department of Education, National Center for Education Statistics, *Earned Degrees Conferred,* annual.

(See sections 1 and 9 for information pertaining to the Bureau of the Census and section 3 above for the National Center for Health Statistics.)

SECTION 5. LAW ENFORCEMENT, COURTS, AND PRISONS

Source and Title: U.S. Federal Bureau of Investigation, *Uniform Crime Reporting (UCR) Program*
Tables: 300-304, 306, 307, 313, 314, and 316.
Universe, Frequency, and Types of Data: Monthly reports on the number of criminal offenses that become known to law enforcement agencies. Data are collected on crimes cleared by arrest, by age, sex, and race of offender, and on assaults on law enforcement officers.
Type of Data Collection Operation: Crime statistics are based on reports of crime data submitted either directly to the FBI by contributing law enforcement agencies or through cooperating State UCR programs.
Data Collection and Imputation Procedures: States with UCR programs collect data directly from individual law enforcement agencies and forward reports, prepared in accordance with UCR standards, to FBI. Accuracy and consistency edits are performed by FBI.
Estimates of Sampling Error: Not applicable.
Other (nonsampling) Errors: Coverage of 96% of the population (98% in SMSA's, 93% in "other cities," and 89% in rural areas) by UCR program, though varying number of agencies report. Some error may be present through incorrect reporting.
Sources of Additional Material: U.S. Federal Bureau of Investigation, *Crime in the United States.*

Source and Title: U.S. Bureau of Justice Statistics (BJS), *National Crime Survey*
Tables: 308-312.
Universe, Frequency, and Types of Data: Monthly survey of individuals and households in the United States to obtain data on criminal victimization of those units for compilation of annual estimates.
Type of Data Collection Operation: National probability sample survey of about 50,000 interviewed households in 376 PSU's selected from a list of addresses from the 1980 census, supplemented by new construction permits and an area sample where permits are not required.
Data Collection and Imputation Procedures: Interviews are conducted every 6 months for 3 years for each household in the sample; 8,000 households are interviewed monthly. Personal interviews are used in the first and fifth interviews; the intervening interviews are conducted by telephone whenever possible.
Estimates of Sampling Error: CV's in 1985: 2.2% for crimes of violence; 14.8% for estimate of rape counts; 5.5% for robbery counts; 2.5% for assault counts; 1.4% for personal larceny counts; 2.2% for burglary counts; 1.8% for household larceny; 1.3% for all household crimes; and 4.8% for motor vehicle theft counts.
Other (nonsampling) Errors: Respondent recall errors which may include reporting incidents for other than the reference period; interviewer coding and processing errors; and possible mistaken reporting or classifying of events. Adjustment is made for a household noninterview rate of about 4% and for a smaller within-household noninterview rate.
Sources of Additional Material: U.S. Bureau of Justice Statistics, *Criminal Victimization in the United States,* annual.

(See section 2 for details on table 305 and section 9 for details on table 325.)

SECTION 8. ELECTIONS

(See section 1 above for information pertaining to tables 434, 453, and 454.)

SECTION 9. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT

Source and Title: U.S. Bureau of the Census, *Census of Governments*
Tables: See tables in section 9 citing *Census of Governments.*
Universe, Frequency, and Types of Data: Survey of all governmental units in the United States conducted every 5 years to obtain data on government revenue, expenditures, debt, assets, employment and employee retirement systems, property values, public school systems, and number, size, and structure of governments.
Type of Data Collection Operation: Complete census. List of units derived through classification of government units recently authorized in each State and identification, counting, and classification of existing local governments and public school systems.
Data Collection and Imputation Procedures: Data collected through field and office compilation of financial data from official records and reports for States and

large local governments; mail canvass of selected data items, like State tax revenue and employee retirement systems; and collection of local government statistics through central collection arrangements with State governments.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Some nonsampling errors may arise due to possible inaccuracies in classification, response, and processing.

Sources of Additional Material: U.S. Bureau of the Census, *Census of Governments, 1987,* various reports, and *State Government Finances in 1990,* GF 90, No. 3.

Source and Title: U.S. Bureau of the Census, *Annual Surveys of State and Local Government*

Tables: See tables citing *Public Employment* and *Governmental Finances* in section 9; table 250 in section 4; table 325 in section 5; and table 594 in section 12.

Universe, Frequency, and Types of Data: Sample survey conducted annually to obtain data on revenue, expenditure, debt, and employment of State and local governments. Universe is all governmental units in the United States (about 83,000).

Type of Data Collection Operation: Sample of about 22,000 units includes all State governments, county governments with 50,000+ population, municipalities and townships with 25,000+ population, all school districts with 10,000+ enrollment in October 1986, and other governments meeting certain criteria; probability sample for remaining units.

Data Collection and Imputation Procedures: Field and office compilation of data from official records and reports for States and large local governments; central collection of local governmental financial data through cooperative agreements with a number of State governments; mail canvass of other units with mail and telephone followups of nonrespondents. Data for nonresponses are imputed from previous year data or obtained from secondary sources, if available.

Estimates of Sampling Error: CV's for estimates of major employment and financial items are generally less than 2% for most States and less than 1.2% for the majority of States.

Other (nonsampling) Errors: Nonresponse rate is less than 15% for number of units. Other possible errors may result from undetected inaccuracies in classification, response, and processing.

Sources of Additional Material: U.S. Bureau of the Census, *Public Employment in 1990,* GE 90, No. 1, *Governmental Finances in 1989-90,* GF 90, No. 5, and *Census of Governments, 1987,* various reports.

SECTION 10. FEDERAL GOVERNMENT

Source and Title: U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns*

Tables: 525-529.

Universe, Frequency, and Types of Data: Annual study of unaudited individual income tax returns, forms 1040, 1040A, and 1040EZ, filed by U.S. citizens and residents. Data provided on various financial characteristics by size of adjusted gross income, marital status, and by taxable and nontaxable returns. Data by State, based on 100% file, also include returns from 1040NR, filed by nonresident aliens plus certain self-employment tax returns.

Type of Data Collection Operation: Annual stratified probability sample of approximately 125,000 returns broken into sample strata based on the larger of total income or total loss amounts as well as the size of business plus farm receipts. Sampling rates for sample strata varied from .025% to 100%.

Data Collection and Imputation Procedures: Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

Estimates of Sampling Error: Estimated CV's for tax year 1987: Adjusted gross income less deficit .13%; salaries and wages .20%; and tax-exempt interest received 4.51%. (State data not subject to sampling error.)

Other (nonsampling) Errors: Processing errors and errors arising from the use of tolerance checks for the data.

Sources of Additional Material: U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns,* annual.

SECTION 12. SOCIAL INSURANCE AND HUMAN SERVICES

Source and Title: U.S. Social Security Administration, *Benefit Data*

Tables: 589 and 590.

Universe, Frequency, and Types of Data: All persons receiving monthly benefits under Title 11 of Social Security Act. Data on number and amount of benefits paid by type and State.

Type of Data Collection Operation: Data based on administrative records. Data based on 100% files, as well as 10% and 1% sample files.

Data Collection and Imputation Procedures: Records used consist of actions pursuant to applications for benefits, updated by subsequent post-entitlement actions.

Estimates of Sampling Error: Varies by size of estimate and sample file size.

Other (nonsampling) Errors: Processing errors, which are believed to be small.

Sources of Additional Material: U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin.*

Source and Title: U.S. Social Security Administration, *Supplemental Security Income (SSI) Program*

Tables: 604-607.

Universe, Frequency, and Types of Data: All eligible aged, blind, or disabled persons receiving SSI benefit payments under SSI program. Data include number of persons receiving federally administered SSI, amounts paid, and State administered supplementation.

Type of Data Collection Operation: Data based on administrative records.

Data Collection and Imputation Procedures: Data adjusted to reflect returned checks and overpayment refunds. For federally administered payments, actual adjusted amounts are used.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Processing errors, which are believed to be small.

Sources of Additional Material: U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin.*

(See section 1 above for information pertaining to the Current Population Survey, section 3 for information pertaining to the National Center for Health Statistics, and section 9 for information pertaining to Annual Surveys of State and Local Government.)

SECTION 13. LABOR FORCE, EMPLOYMENT, AND EARNINGS

Source and Title: U.S. Bureau of Labor Statistics (BLS), *Current Employment Statistics (CES)* Program

Tables: 660-662, 667; in section 3, table 170; in section 21, table 1003; in section 22, table 1069; and in section 24, table 1152.

Universe, Frequency, and Types of Data: Monthly survey covering about 5 million nonagricultural establishments to obtain data on employment, hours, and earnings, by industry.

Type of Data Collection Operation: Sample survey of over 350,000 establishments in March 1990.

Data Collection and Imputation Procedures: Cooperating State agencies mail questionnaires to sample establishments to develop State and local estimates; information is forwarded to BLS where national estimates are prepared.

Estimates of Sampling Error: Estimated CV's for average weekly hours paid, 0.1% and for average hourly earnings, 0.2%.

Other (nonsampling) Errors: Estimates of employment adjusted annually to reflect complete universe. Average adjustment is 0.2%.

Sources of Additional Material: U.S. Bureau of Labor Statistics, *Employment and Earnings,* monthly, Explanatory Notes, tables 2-A through 2-F and *BLS Handbook of Methods,* Chapter 2, Bulletin 2414 (Sept. 1992).

(See section 1 above for information pertaining to the Current Population Survey.)

SECTION 14. INCOME, EXPENDITURES, AND WEALTH

Source and Title: Board of Governors of the Federal Reserve System, *Survey of Consumer Finances*

Tables: 751-753, and in secton 16, 788-791.

Universe, Frequency, and Types of Data: Periodic sample survey of families. In this survey a given household is divided into a primary economic unit and other economic units. The primary economic unity, which may be a single individual, is generally chosen as the unit that contains the person who either holds the title to the home or is the first person listed on the lease. The primary unit is used as the reference family. The survey collects detailed data on the composition of family balance sheets, the terms of loans, and relationships with financial institutions. It also gatherd information on the employment history and pension rights of the survey respondent and the spouse or partner of the respondent.

Type of Data Collection Operation: The survey employs a two-part strategy for sampling families. Some families were selected by standard multistage area-probability sampling methods from the forty-eight contiguous states. The remaining families in the survey were selected using tax data under the strict rules governing confidentiality and the rights of potential respondents to refuse participation.

Data Collection and Imputation Procedures: The Survey Research Center at the University of Michigan collected the 1989 survey data between August 1989 and March 1990. Adjustments for nonresponse

errors are made through systematic imputation of unanswered questions and through weighting adjustments based on data used in the sample design for families that refused participation.

Estimates of Sampling Error: Because of the complex design of the survey, the estimation of potential sampling errors is not straightforward.

Other (nonsampling) Errors: The achieved sample of 3,143 families represents a response rate of about 69 percent in the area-probability sample and a rate of about 34 percent in the tax-data sample. Proper training of interviewers and careful design of questionnaires were used to control inaccurate survey responses.

Sources of Additional Material: Board of Governors of the Federal Reserve System, "Changes in Family Finances from 1983 to 1989: Evidence from the Survey of Consumer Finances", *Federal Reserve Bulletin,* January 1992.

(See section 1 above for information pertaining to the Bureau of the Census.)

SECTION 15. PRICES

Source and Title: U.S. Bureau of Labor Statistics (BLS), *Consumer Price Index (CPI)*

Tables: 755-761, 777, 778, and in section 3, table 163.

Universe, Frequency, and Types of Data: Monthly survey of price changes of all types of consumer goods and services purchased by urban wage earners and clerical workers prior to 1978, and urban consumers thereafter. Both indexes continue to be published.

Type of Data Collection Operation: Prior to 1978, sample of various consumer items in 56 urban areas; thereafter, in 85 PSU's, except from January 1987 through March 1988, when 91 areas were sampled.

Data Collection and Imputation Procedures: Prices of consumer items are obtained from about 57,000 housing units, and 19,000 other reporters in 85 areas. Prices of food, fuel, and a few other items are obtained monthly; prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in others.

Estimates of Sampling Error: Estimates of standard errors are not available at present.

Other (nonsampling) Errors: Errors result from inaccurate reporting, difficulties in defining concepts and their operational implementation, and introduction of product quality changes and new products.

Sources of Additional Material: U.S. Bureau of Labor Statistics, *The Consumer Price Index:* 1987 Revision, Report 736, and *BLS Handbook of Methods,* Bulletin 2285.

Source and Title: U.S. Bureau of Labor Statistics, *Producer Price Index (PPI)*

Tables: 755, 764-767, and in section 21, table 1053; in section 24, table 1156; and in section 26, table 1212.

Universe, Frequency, and Types of Data: Monthly survey of producing companies to determine price changes of all commodities produced in the United States for sale in commercial transactions. Data on agriculture, forestry, fishing, manufacturing, mining, gas, electricity, public utilities, and a few services.

Type of Data Collection Operation: Probability sample of approximately 3,100 commodities and about 75,000 quotations per month.

Data Collection and Imputation Procedures: Data are collected by mail. If transaction prices are not supplied, list prices are used. Some prices are obtained from trade publications, organized exchanges, and government agencies. To calculate index, price changes are multiplied by their relative weights based on total net selling value of all commodities in 1982.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Not available at present.

Sources of Additional Material: U.S. Bureau of Labor Statistics, *BLS Handbook of Methods,* Bulletin 2285.

SECTION 16. BANKING, FINANCE, AND INSURANCE

(See section 14 for information pertaining to tables 788-791.)

SECTION 17. BUSINESS ENTERPRISE

Source and Title: U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns* and *Statistics of Income Bulletin*

Tables: 847-850.

Universe, Frequency, and Types of Data: Annual study of unaudited income tax returns of nonfarm sole proprietorships, form 1040 with business schedules. Data provided on various financial characteristics by industry.

Type of Data Collection Operation: Stratified probability sample of approximately 31,000 sole proprietorships for tax year 1990. The sample is classified based on presence or absence of certain business

schedules; the larger of total income or loss; and size of business plus farm receipts. Sampling rates vary from .043% to 100%.

Data Collection and Imputation Procedures: Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

Estimates of Sampling Error: Estimated CV's for tax year 1990 are not available; for 1987 (the latest available): For sole proprietorships, business receipts, 1.66%; net income, (less loss), 1.33%; depreciation 2.17%; interest expense 2.80%; and employee benefit programs 7.55%.

Other (nonsampling) Errors: Processing errors and errors arising from the use of tolerance checks for the data.

Sources of Additional Material: U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns* (for years through 1980) and *Statistics of Income Bulletin,* vol. 10, No. 1 (summer 1990).

Source and Title: U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns* and *Statistics of Income Bulletin*

Tables: 847-849, 851, and 852.

Universe, Frequency, and Types of Data: Annual study of unaudited income tax returns of partnerships, Form 1065. Data provided on various financial characteristics by industry.

Type of Data Collection Operation: Stratified probability sample of approximately 28,000 partnership returns from a population of 1,660,000 filed during calendar year 1990. The sample is classified based on combinations of gross receipts, net income or loss, and total assets, and on industry. Sampling rates vary from .04% to 100%.

Data Collection and Imputation Procedures: Computer selection of sample of tax return records. Data are adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return. Data not available due to regulations are not imputed.

Estimates of Sampling Error: Estimated CV's for tax year 1988 (latest available): For number of partnerships, .51%; business receipts, .78%; net income, 3.03%; net loss, 2.21% and total assets, 1.22%.

Other (nonsampling) Errors: Processing errors and errors arising from the use of tolerance checks for the data.

Sources of Additional Material: U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns* and *Statistics of Income Bulletin,* vol. 10, No. 1 (summer 1990).

Source and Title: U.S. Internal Revenue Service, *Corporation Income Tax Returns*

Tables: 847-849 and 855-857.

Universe, Frequency, and Types of Data: Annual study of unaudited corporation income tax returns, Forms 1120 and 1120 (A, F, L, PC, REIT, RIC, and S), filed by corporations or businesses legally defined as corporations. Data provided on various financial characteristics by industry and size of total assets, and business receipts.

Type of Data Collection Operation: Stratified probability sample of approximately 85,000 returns for 1987, distributed by sample classes generally based on type of return, size of total assets, size of net income or deficit, and selected business activity. Sampling rates for sample strata varied from .25% to 100%.

Data Collection and Imputation Procedures: Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return and to achieve statistical definitions.

Estimates of Sampling Error: Estimated CV's for 1988: Number of returns in subgroups ranged from 1.4% with assets under $100,000, to 0% with assets over $100 mil.; for amount of net income and amount of income tax, .18%

Other (nonsampling) Errors: Processing errors and errors arising from the use of tolerance checks for the data.

Sources of Additional Material: U.S. Internal Revenue Service, *Statistics of Income, Corporation Income Tax Returns,* annual.

SECTION 18. COMMUNICATIONS

(See section 1 for information pertaining to table 905, and section 27 for table 914.)

SECTION 19. ENERGY

Source and Title: U.S. Energy Information Administration, *Residential Energy Consumption Survey*

Tables: 936-938, 968, and table 1244 in section 26.

Universe, Frequency, and Types of Data: Triennial survey of households and fuel suppliers. Data are obtained on energy-related household characteristics, housing unit characteristics, use of fuels, and energy consumption and expenditures by fuel type.

Type of Data Collection Operation: Probability sample of 7,183 eligible units in 129 PSU's. For responding units, fuel consumption and expenditure data obtained from fuel suppliers to those households.

356-918 O - 93 - 31 : QL 3

Data Collection and Imputation Procedures: Personal interviews. Extensive followup of nonrespondents including mail questionnaires for some households. Adjustments for nonrespondents were made in weighting for respondents. Most item nonresponses were imputed.

Estimates of Sampling Error: Estimated CV's for household averages: For consumption, 1.3%; for expenditures, 1.0%; for various fuels, values ranged from 1.4% for electricity to 5.9% for LPG.

Other (nonsampling) Errors: Household response rate of 86.7%. Nonconsumption data were mostly imputed for mail respondents (5.2% of eligible units). Usable responses from fuel suppliers for various fuels ranged from 82.8% for electricity to 55.7% for fuel oil.

Sources of Additional Material: U.S. Energy Information Administration, *Household Energy Consumption and Expenditures, 1987* and *Housing Characteristics,* 1987.

SECTION 21. TRANSPORTATION—LAND

(See section 1 for information pertaining to table 1017, section 13 for table 1003, and section 15 for table 1053.)

SECTION 22. TRANSPORTATION—AIR AND WATER

Source and Title: U.S. Bureau of the Census, *Foreign Trade—Export Statistics*

Tables: See Bureau of the Census citations for export statistics in source notes in sections 22 and 29 and also tables 1179 and 1180 in section 24; 1194 in section 25; and 1369 in section 30.

Universe, Frequency, and Types of Data: The export declarations collected by Customs are processed each month to obtain data on the movement of U.S. merchandise exports to foreign countries. Data obtained include value, quantity, and shipping weight of exports by commodity, country of destination, Customs district of exportation, and mode of transportation.

Type of Data Collection Operation: Shipper's Export Declarations are required to be filed for the exportation of merchandise valued over $1,500. Customs officials collect and transmit the documents to the Bureau of the Census on a flow basis for data compilation. Value data for shipments valued under $1,501 are estimated, based on established percentages of individual country totals.

Data Collection and Imputation Procedures: Statistical copies of Shipper's Export Declarations are received on a daily basis from Customs ports throughout the country and subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued over $1,500. Estimates for shipments valued at $1,500 or less are made, based on established percentages of individual country totals.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Clerical and complex computer checks intercept most processing errors and minimize otherwise significant reporting errors; other nonsampling errors are caused by undercounting of exports to Canada due to the nonreceipt of some Shipper's Export Declarations.

Sources of Additional Material: U.S. Bureau of the Census, *U.S. Merchandise Trade: Exports, General Imports, and Imports for Consumption, SITC, Commodity by Country,* FT 925.

Source and Title: U.S. Bureau of the Census, *Foreign Trade—Import Statistics*

Tables: See Bureau of the Census citations for import statistics in source notes in sections 22 and 29 and also tables 1179 and 1180 in section 24; 1194 in section 25; and 1369 in section 30.

Universe, Frequency, and Types of Data: The import entry documents collected by Customs are processed each month to obtain data on the movement of merchandise imported into the United States. Data obtained include value, quantity, and shipping weight by commodity, country of origin, Customs district of entry, and mode of transportation.

Type of Data Collection Operation: Import entry documents are required to be filed for the importation of goods into the United States valued over $1,000 or for articles which must be reported on formal entries. Customs officials collect and transmit statistical copies of the documents to the Bureau of the Census on a flow basis for data compilation. Estimates for shipments valued under $1,001 and not reported on formal entries are based on established percentages of individual country totals.

Data Collection and Imputation Procedures: Statistical copies of import entry documents, received on a daily basis from Customs ports of entry throughout the country, are subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued at $1,001 and over or items which must be reported on formal entries.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Verification of statistical data reporting by Customs officials prior to transmittal and a subsequent

program of clerical and computer checks are utilized to hold nonsampling errors arising from reporting and/or processing errors to a minimum.

Sources of Additional Material: U.S. Bureau of the Census, *U.S. Merchandise Trade: Exports, General Imports and Imports for Consumption, SITC, Commodity by Country,* FT 925.

(See section 13 for information pertaining to table 1069.)

SECTION 23. AGRICULTURE

Source and Title: U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Basic Area Frame Sample*

Tables: See tables citing NASS in source notes in section 23, which pertain to this or the following two surveys.

Universe, Frequency, and Types of Data: Two annual area sample surveys of U.S. farm operators: June agricultural survey collects data on planted acreage and livestock inventories; and a February Farm Costs and Returns survey that collects data on total farm production, expenses and specific commodity costs of production.

Type of Data Collection Operation: Stratified probability sample of about 16,000 land area units of about 1 sq. mile (range from 0.1 sq. mile in cities to several sq. miles in open grazing areas). Sample includes 60,000 parcels of agricultural land. About 20% of the sample replaced annually.

Data Collection and Imputation Procedures: Data collection is by personal enumeration. Imputation is based on enumerator observation or data reported by respondents having similar agricultural characteristics.

Estimates of Sampling Error: Estimated CV's range from 1% to 2% for regional estimates to 3% to 6% for State estimates of livestock inventories.

Other (nonsampling) Errors: Minimized through rigid quality controls on the collection process and careful review of all reported data.

Sources of Additional Material: U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service,* (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

Source and Title: U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Multiple Frame Surveys*

Tables: See tables citing NASS in source notes in section 23, which pertain to this or the following survey.

Universe, Frequency, and Types of Data: Surveys of U.S. farm operators to obtain data on major livestock inventories, selected crop acreages and production, grain stocks, and farm labor characteristics; and to obtain farm economic data for price indexing.

Type of Data Collection Operation: Primary frame is obtained from general or special purpose lists, supplemented by a probability sample of land areas used to estimate for list incompleteness.

Data Collection and Imputation Procedures: Mail, telephone, or personal interviews used for initial data collection. Mail nonrespondent followup by phone and personal interviews. Imputation based on average of respondents.

Estimates of Sampling Error: Estimated CV for number of hired farm workers is about 3%. Estimated CV's range from 1% to 2% for regional estimates to 3% to 6% for State estimates of livestock inventories.

Other (nonsampling) Errors: In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

Sources of Additional Material: U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service,* (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

Source and Title: U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Objective Yield Surveys*

Tables: See tables citing NASS in source notes in section 23, which pertain to this or the preceding survey.

Universe, Frequency, and Types of Data: Surveys for data on corn, cotton, potatoes, soybeans, wheat, and rice to forecast and estimate yields.

Type of Data Collection Operation: Random location of plots in probability sample of fields. Fields selected in June from Basic Area Frame Sample (see above).

Data Collection and Imputation Procedures: Enumerators count and measure plant characteristics in sample fields. Production measured from plots at harvest. Harvest loss measured from post harvest gleanings.

Estimates of Sampling Error: CV's for national estimates of production are about 2-3%.

Other (nonsampling) Errors: In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

Sources of Additional Material: U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service,* (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

(See section 1 above for information pertaining to the Census of Population and Current Population Survey.)

SECTION 24. FORESTS AND FISHERIES

(See section 13 for information pertaining to table 1152, section 15 for table 1156, and section 22 for tables 1179 and 1180.)

SECTION 26. CONSTRUCTION AND HOUSING

Source and Title: U.S. Bureau of the Census, *Monthly Survey of Construction*

Tables: 1221, and 1223-1225.

Universe, Frequency, and Types of Data: Survey conducted monthly of newly constructed housing units (excluding mobile homes). Data are collected on the start, completion, and sale of housing. (Annual figures are aggregates of monthly estimates.)

Type of Data Collection Operation: Probability sample of housing units obtained from building permits selected from 17,000 places. For nonpermit places, multistage probability sample of new housing units selected in 169 PSU's. In those areas, all roads are canvassed in selected enumeration districts.

Data Collection and Imputation Procedures: Data are obtained by telephone inquiry and field visit.

Estimates of Sampling Error: Estimated CV of 3% to 4% for estimates of national totals, but are as high as 20% for estimated totals of more detailed characteristics, such as housing units in multiunit structures.

Other (nonsampling) Errors: Response rate is over 90% for most items. Nonsampling errors are attributed to definitional problems, differences in interpretation of questions, incorrect reporting, inability to obtain information about all cases in the sample, and processing errors.

Sources of Additional Material: U.S. Bureau of the Census, *Construction Reports,* series C20, *Housing Starts;* C22, *Housing Completions; and* C25, *New One-Family Houses Sold and For Sale.*

Source and Title: U.S. Bureau of the Census, *Value of New Construction Put in Place*

Tables: 1214-1216.

Universe, Frequency, and Types of Data: Survey conducted monthly on total value of all construction put in place in the current month, both public and private projects. Construction values include costs of materials and labor, contractors' profits, overhead costs, cost of architectural and engineering work, and miscellaneous project costs. (Annual figures are aggregates of monthly estimates.)

Type of Data Collection Operation: Varies by type of activity: Total cost of private one-family houses started each month is distributed into value put in place using fixed patterns of monthly construction progress; using a multistage probability sample, data for private multifamily housing are obtained by mail from owners of multiunit projects. Data for residential additions and alterations are obtained in a quarterly survey measuring expenditures; monthly estimates are interpolated from quarterly data. Estimates of value of private nonhousekeeping, nonresidential buildings, and State and local government construction are obtained by mail from owners (or agents) for a probability sample of projects. Estimates of farm nonresidential construction expenditures are based on U.S. Department of Agriculture annual estimates of construction; public utility estimates are obtained from reports submitted to Federal regulatory agencies and from private utility companies; estimates for all other private construction (nonbuilding) are obtained by phasing F. W. Dodge contract award data; estimates of Federal construction are based on monthly data supplied by Federal agencies.

Data Collection and Imputation Procedures: See "Type of Data Collection Operation." Imputation accounts for approximately 20% of estimated value of construction each month.

Estimates of Sampling Error: CV estimates for private nonresidential building construction range from 3% for estimated value of industrial buildings to 10% for miscellaneous buildings. CV is approximately 2% for total new private nonresidential buildings.

Other (nonsampling) Errors: For directly measured data series based on samples, some nonsampling errors may arise from processing errors, imputations, and misunderstanding of questions. Indirect data series are dependent on the validity of the underlying assumptions and procedures.

Sources of Additional Material: U.S. Bureau of the Census, *Construction Reports,* series C30, *Value of New Construction Put in Place.*

Source and Title: U.S. Bureau of the Census, *Census of Housing*

Tables: See tables citing *Census of Housing* in source notes in section 26.

Universe, Frequency, and Types of Data: Census of all occupied and vacant housing, excluding group quarters, conducted every 10 years as part of the decennial census (see section 1 above) to determine characteristics of U.S. housing.

Type of Data Collection Operation: For 1970, 1980, and 1990, a complete count of some housing items (e.g. Owned or rented, and value). In 1970, other items collected from 5% and 15% probability samples selected from two sets of detailed questions on housing (these two sets having some common items). In 1980, approximately 19% of the housing units were included in the sample; in 1990, approximately 17%.

Data Collection and Imputation Procedures: In 1970, a self-enumeration census using a mail-out/mail-back procedure was used in most areas. In 1980 and 1990, mail questionnaires were used in even more areas than in 1970, with personal interviews in the remainder. Followup for nonrespondents and identification of vacant units done by phone and personal visit.

Estimates of Sampling Error: Sampling errors for data are estimated for all items collected by sample and vary by characteristic and geographic area.

Other (nonsampling) Errors: Evaluation studies for 1980 estimated the underenumeration of occupied housing units at 1.5%. The missed rate in 1980 for all units was 2.6% or approximately 2.3 million units, 1 million of which were vacant housing units.

Sources of Additional Material: U.S. Bureau of the Census, *1980 Census of Population and Housing, The Coverage of Housing in the 1980 Census,* PHC80-E1, July 1985.

Source and Title: U.S. Bureau of the Census, *American Housing Survey*

Tables: See tables citing *American Housing Survey* in source notes.

Universe, Frequency, and Types of Data: Conducted nationally in the fall in odd numbered years to obtain data on the approximately 103 million occupied or vacant housing units in the United States (group quarters are excluded). Data include characteristics of occupied housing units, vacant units, new housing and mobile home units, financial characteristics, recent mover households, housing and neighborhood quality indicators, and energy characteristics.

Type of Data Collection Operation: The national sample was a multistage probability sample with about 51,300 units eligible for interview in 1987. Sample units, selected within 394 PSU's, were surveyed over a 5-month period.

Data Collection and Imputation Procedures: For 1987, the survey was conducted by personal interviews. The interviewers obtained the information from the occupants or, if the unit was vacant, from informed persons such as landlords, rental agents, or knowledgeable neighbors.

Estimates of Sampling Error: For the national sample, illustrations of the S.E. of the estimates are provided in the appendix B of the 1987 report. As an example, the estimated CV is about 0.5% for the estimated percentage of owner occupied units with two persons.

Other (nonsampling) Errors: Response rate was about 97%. Nonsampling errors may result from incorrect or incomplete responses, errors in coding and recording, and processing errors. For the 1985 national sample, approximately 6% of the total housing inventory was not adequately represented by the AHS sample.

Sources of Additional Material: U.S. Bureau of the Census, *Current Housing Reports,* series H-150 and H-170, *American Housing Survey.*

(See section 1 above for information pertaining to the Census of Population, section 15 pertaining to table 1212, and section 19 for table 1244.)

Section 27. MANUFACTURES

Source and Title: U.S. Bureau of the Census, *Census of Manufactures*

Tables: See tables citing *Census of Manufactures* in source notes in section 27 and also table 914 in section 18 and table 1371 in section 30.

Universe, Frequency, and Types of Data: Conducted every 5 years to obtain information on labor, materials, capital input and output characteristics, plant location, and legal form of organization for all plants in the United States with one or more paid employees. Universe was 350,000 manufacturing establishments in 1987.

Type of Data Collection Operation: Complete enumeration of data items obtained from 200,000 firms. Administrative records from Internal Revenue Service and Social Security Administration are used for 150,000 smaller single-location firms, which were determined by various cutoffs based on size and industry.

Data Collection and Imputation Procedures: Five mail and telephone followups for larger nonrespondents. Data for small single-location firms (generally those with

fewer than 10 employees) not mailed census questionnaires were estimated from administrative records of IRS and SSA. Data for nonrespondents were imputed from related responses or administrative records from IRS and SSA. Approximately 8% of total value of shipments was represented by fully imputed records in 1987.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Based on evaluation studies, estimates of nonsampling errors for 1972 were about 1.3% for estimated total payroll; 2% for total employment; and 1% for value of shipments. Estimates for later years are not available.

Sources of Additional Material: U.S. Bureau of the Census, *1987 Census of Manufactures, Industry Series, Geographic Area Series, and Subject Series.*

Source and Title: U.S. Bureau of the Census, *Annual Survey of Manufactures*

Tables: See tables citing *Annual Survey of Manufactures* in source notes.

Universe, Frequency, and Types of Data: Conducted annually to provide basic measures of manufacturing activity for intercensal years for all manufacturing establishments having one or more paid employees.

Type of Data Collection Operation: Sampling frame is 350,000 establishments in the 1987 Census of Manufactures (see above), supplemented by Social Security Administration lists of new manufacturers and new manufacturing establishments of multi-establishment companies identified annually by the Census Bureau's Company Organization Survey. A probability sample of about 55,000 establishments is selected. All establishments of companies with more than $500 million of manufacturing shipments in 1987 are included with certainty. All establishments with 250+ employees are also included with certainty along with a probability sample of smaller establishments.

Data Collection and Imputation Procedures: Survey is conducted by mail with phone and mail followups of nonrespondents. Imputation (for all nonresponse items) is based on previous year reports, or for new establishments in survey, on industry averages.

Estimates of Sampling Error: Estimated standard errors for number of employees, new expenditure, and for value added totals are given in annual publications. For U.S. level industry statistics, most estimated standard errors are 2% or less, but vary considerably for detailed characteristics.

Other (nonsampling) Errors: Response rate is about 85%. Nonsampling errors include those due to collection, reporting, and transcription errors, many of which are corrected through computer and clerical checks.

Sources of Additional Material: U.S. Bureau of the Census, *Annual Survey of Manufactures,* and Technical Paper 24.

Section 28. DOMESTIC TRADE AND SERVICES

Source and Title: U.S. Bureau of the Census, *Census of Wholesale Trade, Census of Retail Trade, Census of Service Industries*

Tables: See tables citing the above censuses in source notes in section 28 and table 1371 in section 30.

Universe, Frequency, and Types of Data: Conducted every 5 years to obtain data on number of establishments, number of employees, total payroll size, total sales, and other industry-specific statistics. In 1987, the universe was all employer establishments primarily engaged in wholesale trade, and employer and nonemployer establishments in retail trade or service industries.

Type of Data Collection Operation: All wholesale firms with paid employees surveyed; all retail and service large employer firms surveyed (i.e. all employer firms above the payroll size cutoff established to separate large from small employers) plus a 10-percent sample of smaller employer firms. Firms with no employees were not required to file a census return.

Data Collection and Imputation Procedures: Mail questionnaire is utilized with both mail and telephone followups for nonrespondents. Data for nonrespondents and "nonselected" small employer firms in retail trade and service industries are obtained from administrative records of IRS and the Social Security Administration.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Response rate in 1987 of 80% for single establishment firms; 83% for multi-establishment firms. Item response ranged from 60% to 90% with higher rates for less detailed questions.

Sources of Additional Material: U.S. Bureau of the Census, Appendix A of *Census of Retail Trade; Census of Service Industries; Census of Wholesale Trade;* and *History of the 1987 Economic Censuses,* April 1992.

Source and Title: U.S. Bureau of the Census, *Current Business Surveys*

Tables: 1302-1305, 1321, 1324, 1327, and table 1005 in section 21.

Universe, Frequency, and Types of Data: Provides monthly estimates of retail sales by kind of business and geographic area, and end-of-month inventories of retail stores; wholesale sales and end-of-month inventories; and annual receipts of selected service industries.

Type of Data Collection Operation: Probability sample of all firms from a list frame and, additionally, for retail and service an area frame. The list frame is the Bureau's Standard Statistical Establishment List (SSEL) updated quarterly for recent birth Employer Identification (EI) Numbers issued by the Internal Revenue Service and assigned a kind-of-business code by the Social Security Administration. The largest firms are included monthly; a sample of others is included every three months on a rotating basis. The area frame covers businesses not subjected to sampling on the list frame.

Data Collection and Imputation Procedures: Data are collected by mail questionnaire with telephone followups for nonrespondents. Imputation made for each nonresponse item and each item failing edit checks.

Estimates of Sampling Error: For the 1989 monthly surveys, CV's are about 0.6% for estimated total retail sales, 1.7% for wholesale sales, 1.3% for wholesale inventories. For dollar volume of receipts, CV's from the *Service Annual Survey* vary by kind of business and range between 1.5% to 15.0%. Sampling errors are shown in monthly publications.

Other (nonsampling) Errors: Imputation rates are about 18% to 23% for monthly retail sales, 20% to 25% for wholesale sales, about 25% to 30% for monthly wholesale inventories and 14% for the *Service Annual Survey.*

Sources of Additional Material: U.S. Bureau of the Census, *Current Business Reports, Monthly Retail Trade, Monthly Wholesale Trade,* and *Service Annual Survey.*

Section 30. OUTLYING AREAS

(See section 1 for information pertaining to tables 1358 and 1359, section 2 for table 1360, section 22 for table 1369, section 27 for table 1371.)

Appendix IV

Index to Tables Having Historical Statistics, Colonial Times to 1970 Series

[The most recent historical supplement to the *Statistical Abstract* is the bicentennial edition, *Historical Statistics of the United States, Colonial Times to 1970* (see inside back cover). Listed below are statistical time series (identified by number) appearing in this edition, for which tables in the *Statistical Abstract* present comparable figures. Historical series are listed only where related or comparable data are available for one or more years later than 1970. In a few instances, it may be necessary to combine figures shown in the *Abstract* to obtain totals comparable to the series shown in *Historical Statistics*]

Appendix V

Tables Deleted From the 1992 Edition of the Statistical Abstract

1992 table number

Sec. 1. **POPULATION**

12 Total Population, by Age and Sex: 1980 to 1991
17 Resident Population, by Age, Race, and Hispanic Origin—Percent Distribution: 1980 and 1990
28 Urban and Rural Population, Housing Units, and Land Area: 1970 to 1990
50 Divorced Persons per 1,000 Married Persons With Spouse Present, by Sex, Race, and Age: 1970 to 1991
54 Married-Couple Households, by Hispanic Origin Status of Husband and Wife: 1991
61 Households, by Type—60 Largest Metropolitan Areas: 1990

Sec. 2. **VITAL STATISTICS**

95 Ability to Bear Children, Women 15 to 44 Years Old, by Age and Number of Prior Births: 1982 and 1988
99 Family Planning Visits—Number of Women: 1982 and 1988
133 Cohabitation of Women, 15-44 Years Old, by Race and Hispanic Origin: 1988

Sec. 3. **HEALTH AND NUTRITION**

143 Benefit Expenditures of Private Health Insurance Organizations: 1970 to 1987
158 Physicians, Dentists, and Nurses: 1970 to 1989
159 Physicians, by Type of Practice: 1970 to 1989
161 Federal and Non-Federal Physicians, by Sex, Specialty, and Major Professional Activity: 1970 to 1990
187 Injury, Medical Care, Morbidity, and Mortality Costs, by Sex, Age, and Cause: 1985
201 Women Who Have Had a Mammogram, Breast Physical Exam or Who Perform Breast Self Exams (BSE): 1987
202 Personal Health Practices, by Selected Characteristic: 1985
209 Persons Using Vitamin-Mineral Products, by Selected Characteristic: 1986

Sec. 4. **EDUCATION**

220 Years of School Completed, by Race, Hispanic Origin, and Sex: 1970 and 1991
222 Percent of Population With Less Than 12 Years of School and With 4 Years of College or More, by Race and Hispanic Origin: 1970 to 1991
281 Graduate Student Enrollment and Degrees Conferred in Selected Fields, by Race/Ethnicity: 1988-89
283 High School Graduates Completing College: 1976 to 1986
286 Large College and University Libraries—Selected Statistics: 1985

Sec. 5. **LAW ENFORCEMENT**

300 Reported Child Neglect and Abuse Cases, by Division: 1980 to 1987
301 Child Maltreatment Cases Reported—Summary: 1976 to 1986

Sec. 6. **GEOGRAPHY AND ENVIRONMENT**

358 State and Local Government Expenditures for Solid Waste Management and Sewerage, by State: 1990

1992 table number

Sec. 7. **PARKS AND RECREATION**
389 Household Camera and Video Equipment Use, by Selected Characteristics: 1985 and 1988
400 Financial Support of the Arts by Private Corporate Business—Summary: 1984 to 1988

Sec. 8. **ELECTIONS**
438 Voter Registration—Registered Voters, 1984 to 1990, and Registration Deadlines and Residency Requirements, 1990

Sec. 9. **STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT**
465 State Fiscal Capacity and Effort: 1988
470 State Aid to Local Governments: 1982 to 1989

Sec. 10. **FEDERAL GOVERNMENT**
498 Federal Budget Outlays, by Agency: 1980 to 1992
499 Federal Securities—Interest Bearing Debt, by Type and Debt Holder: 1970 to 1991
500 Interest-Bearing Government Securities Outstanding: 1970 to 1991

Sec. 12. **SOCIAL INSURANCE AND HUMAN SERVICES**
570 Selected Social Insurance Programs—Source of Funds From Contributions and Transfers: 1980 to 1990
586 Black Lung Benefit Program—Beneficiaries and Payments: 1975 to 1990
599 Adoptions, by Relationship of Petitioner, 1960 to 1986, and Foreign Adoptions, 1980 to 1991

Sec. 13. **LABOR FORCE, EMPLOYMENT, AND EARNINGS**
616 Civilian Labor Force—Years of School Completed, by Sex and Race: 1991
627 Job Accessions, by Selected Characteristics: 1987 to 1989
648 Computer Use On the Job, Sex, and Educational Attainment, by Selected Computer Activity: 1989

Sec. 14. **INCOME, EXPENDITURES, AND WEALTH**
685 Gross State Product, by Industry; 1989
701 Median Income of Households, by State, in Constant (1990) Dollars: 1984 to 1990
715 Per Capita Money Income, 1969 to 1987, and Median Family Income, 1969 and 1979, by State
716 Per Capita Money Income for 50 Largest Cities: 1979 and 1987
723 Percent of Persons Below Poverty Level, by State: 1984 to 1990
736 Top Wealthholders With Gross Assets of $500,000 or More, by Size of Net Worth and Sex: 1986

Sec. 16. **BANKING, FINANCE, AND INSURANCE**
770 Persons Working in Finance, Insurance, and Real Estate Indusries: 1987 to 1990
800 Use of Financial Services by Households, by Type of Account and Locality of Institution: 1989

Sec. 17. **BUSINESS ENTERPRISE**
840 Women-Owned Firms—Major Industry Statistics: 1982 and 1987
841 Women-Owned Firms—Number and Receipts, by State: 1982 and 1987
842 Women-and-Minority-Owned Firms, by Selected Metropolitan Area: 1987
843 Minority-Owned Firms—Major Industry Statistics: 1987
844 Minority-Owned Firms, by State: 1987

1992 table number

Sec. 21. **TRANSPORTATION—LAND**

1000 Motor Vehicles—Summary: 1980 to 1990
1004 New Trucks—Retail Sales, by Weight Class and Type: 1980 to 1989
1005 New Car Buyers—Characteristics, by Type of Vehicle Purchased: 1990
1010 Fatal Motor-Vehicle Accidents, by Type of Vehicle: 1980 to 1990
1018 New Car Prices and Consumer Expenditures per New Car: 1970 to 1990

Sec. 22. **TRANSPORTATION—AIR AND WATER**

1038 Certificated Route Air Carriers—Summary: 1970 to 1990

Sec. 23. **AGRICULTURE**

1074 Characteristics of Farm and Nonfarm Families: 1970 to 1990
1075 Farm Population, by Characteristics: 1970 to 1990
1076 Farm Operator Off-Farm Employment, by Age of Operator: 1988
1098 Commodity Credit Corporation—Summary: 1980 to 1991

Sec. 25. **MINING AND MINERAL PRODUCTS**

1191 Cobalt—Summary: 1980 to 1990
1192 Tin—Summary: 1980 to 1990
1193 Tungsten Concentrate—Summary: 1970 to 1990
1194 Zinc—Summary: 1980 to 1990
1195 Bauxite—Summary: 1980 to 1990
1196 Platinum-Group Metals—Summary: 1980 to 1990
1197 Titanium—Summary: 1980 to 1990
1198 Chromite—Summary: 1980 to 1990
1199 Diamond Industrial—Summary: 1985 to 1991
1200 Manganese Compounds—Summary: 1985 to 1991

Sec. 26. **CONSTRUCTION AND HOUSING**

1229 Occupied Housing Units—Housing Value and Contract Rent in Constant (1990) Dollars, by State: 1970 to 1990

Sec. 27. **MANUFACTURES**

1254 Large Manufacturing Commpanies—Adequacy of Capital Facilities: 1970 to 1989
1255 Large Manufacturing Companies—Capital Appropriations and Expeditures, by Industry: 1980 to 1989
1270 U.S. Factory Sales of Electronics Shipments: 1975 to 1990
1271 Communications Equipment—Factory Shipments: 1985 to 1990
1279 Selected Electric Home Appliances and Consumer Electronic Products—Shipments and Retail Value: 1985 to 1989

Sec. 28. **DOMESTIC TRADE AND SERVICES**

1281 Persons Working In Domestic Trade and Service Industries: 1987 to 1990
1284 Retail Trade—Sales, by Broad Merchandise Lines: 1982 and 1987
1291 Retail Trade—Sales, by Metropolitan Area: 1990
1304 Wholesale Trade—Summary, by State: 1987
1305 Wholesale Trade—Establishments and Sales by Selected Metropolitan Areas: 1987
1307 Service Industries—Summary of Establishments, by State: 1987
1312 Computer Programming and Data Processing—Establishments, Employees, and Payroll: 1989

1992 table number

Sec. 30. **OUTLYING AREAS**

1340 Estimates of Components of Population Change, by Area: 1970 to 1980 and 1980 to 1988

Sec. 31. **COMPARATIVE INTERNATIONAL STATISTICS**

1358 World Population, 1990 and 1991, and Area, 1991, by Size of Country

1369 Proficiency Test Scores in Mathematics and Science for 13-year-old Students, by Selected Countries: 1991

Appendix VI

New Tables

Table number		Page number
	Sec.1. **POPULATION**	1
3	Resident Population Projections: 1992 to 2050	9
4	Components of Population Change, 1980 to 1991, and Projections, 1992 to 2050	9
17	Resident Population Projections, by Age and Sex: 1992 to 2050	17
19	Resident Population, by Race and Hispanic Origin: 1980 to 1991	18
20	Resident Population Projections, by Race and Hispanic Origin: 1992 to 2050	19
21	Components of Population Change, by Race and Hispanic Origin: 1980 to 1991 and Projections, 1995 and 2000	20
23	Resident Population, by Age and Hispanic Origin: 1980 to 1991	22
24	White, Black, Asian, Pacific Islander, American Indian, and Hispanic Origin Population, by Single Years of Age: 1991	23
25	Projections of Resident Population, by Age, Sex, and Race: 1995 to 2025	24
26	Projections of Hispanic and Non-Hispanic Populations, by Age and Sex: 1995 to 2025	25
30	Mobility of the Resident Population, by State: 1990	27
36	Urban and Rural Population, by Size of Place: 1970 to 1990	34
52	Population Living on Selected Reservations and Trust Lands, and American Indian Tribes with 10,000 or More American Indians: 1990	48
57	Persons Speaking a Language Other Than English at Home, by Age and Language: 1990	51
58	Foreign-Born Population, Leading Ancestry Groups and Persons Speaking a Language Other Than English at Home—States: 1990	52
77	Married Couple Family Households with Children: 1980 to 1990	62
78	Children Living with Biological, Step, and Adoptive Married-Couple Parents, by Race and Hispanic Origin of Mother: 1980 to 1990	62
81	Children Living in the Home of Their Grandparents, by Presence of Parents, Race, and Hispanic Origin: 1970 to 1992	64
	Sec. 2. **VITAL STATISTICS**	70
96	Projected Fertility Rates, by Race and Age Group: 1992 to 2010	76
109	Pregnancies, Number and Outcome: 1976 to 1988	81
110	Pregnancies, by Outcome, Age of Woman, and Race: 1988	82
139	Deaths—Life Years Lost and Mortality Costs, by Age, Sex, and Cause: 1990	100
146	Marriage Experience for Women, by Age, Race, and Hispanic Origin: 1980 and 1990	102
	Sec. 3. **HEALTH AND NUTRITION**	104
170	Employment in the Health Insurance and Health Service Industries: 1980 to 1992	117
171	Physicians, by Selected Activity: 1970 to 1990	118
172	Dentists and Nurses: 1970 to 1990	118
212	Women—Selected Health Practices: 1990	139
213	Personal Health Practices, by Selected Characteristic: 1990	139
215	Persons Using Assistive Technology Devices and Home Accessibility Features, Type of Device and Source of Payment, by Age: 1990	140
	Sec. 4. **EDUCATION**	144
231	Educational Attainment, by Race, Ethnicity, and Sex: 1960 to 1992	153
233	Educational Attainment, by Race and Ethnicity: 1960 to 1992	154
235	Educational Attainmen—States: 1990	155
290	Time Spent Earning Bachelor's Degree, by Selected Characteristic: 1990	182
295	Degrees Conferred, by Level and Race/Ethnicity: 1981 to 1990	185
297	Public Libraries, Selected Characteristics: 1991	186
299	Participation in Adult Education: 1990-1991	187
	Sec. 5. **LAW ENFORCEMENT, COURTS, AND PRISONS**	188
313	Persons Arrested, by Charge and Race: 1991	198
340	Child Abuse and Neglect Cases Reported and Investigated, by State: 1991	209

Table number		Page number
341	Child Abuse and Neglect Cases Substantiated and Indicated—Victim Characteristics: 1990 and 1991	209
345	State Prison Inmates, by Criminal History and Selected Characteristics of the Inmate: 1991	211
	Sec. 6. **GEOGRAPHY AND ENVIRONMENT**	215
376	Environmental Industry—Revenues and Employment, by Industry Segment: 1988 to 1992	228
	Sec. 7. **PARKS, RECREATION, AND TRAVEL**	242
401	Adult Book Purchasing: 1991 and 1992	248
408	Anglers and Hunters: 1991	251
409	Wildlife-Associated Recreation Expenditures, by type of Activity: 1991	251
	Sec. 8. **ELECTIONS**	261
432	Votes Cast in Presidential Preference Primaries, by Party and Leading Candidates: 1992	266
453	Persons Reported Registered and Voted, by State: 1992	282
456	Presidential Primaries—Votes Cast and Percent of Voting-Age Population Casting Votes, by Party: 1992	284
	Sec. 9. **STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT**	289
475	State and Local Government Expenditures in the National Income and Product Accounts: 1970 to 1991	298
482	State Tax Collections, 1992, and Projections, 1993	304
	Sec. 10. **FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT**	324
516	Federal Debt Held by the Public: 1970 to 1993	335
517	Summary of Federal Debt: 1985 to 1992	335
	Sec. 11. **NATIONAL DEFENSE AND VETERANS AFFAIRS**	347
558	Military Installations in the United States: 1992	356
	Sec. 13. **LABOR FORCE, EMPLOYMENT, AND EARNINGS**	389
629	Employment Status of the Civilian Noninstitution Population, by Educational Attainment, Sex, Race, and Hispanic Origin: 1992	398
641	Workers on Flexible Schedules, 1985 and 1991 and by Selected Characteristics: 1991	403
642	Workers on Shift Schedules, by Selected Characteristics: 1985 and 1991	404
643	Workers Doing Job-Related Work at Home, by Selected Characteristics: 1991	404
650	Occupational and Employer Tenure, by Occupation: 1991	412
651	Displaced Workers, by Selected Characteristics: 1992	412
655	Persons Receiving Work-Related Training, by Selected Characteristics: 1990	423
	Sec. 14. **INCOME, EXPENDITURES, AND WEALTH**	437
717	Households, by Race and Hispanic Origin-Percent Distribution, by Income Level: 1991	460
718	Income Summary Measures by Household Type, in Constant (1989) Dollars: 1969 and 1989	461
719	Median Household Income, by Race for States: 1989	461
733	Income Per Capita, by Race for States: 1989	468
734	Income Per Capita, by Race for Selected Cities: 1989	468
741	Poverty Rates, by Race, for States: 1989	471
742	Poverty Rates for Selected Cities: 1989	472
	Sec. 15. **PRICES**	478
778	Average Price of Energy in Selected Metropolitan Areas: 1992	496
	Sec. 16. **BANKING, FINANCE, AND INSURANCE**	500
819	Electronic Funds Transfer Volume: 1980 to 1992	517
820	Automated Teller Machine (ATM's) Usage: 1990	517
	Sec. 18. **COMMUNICATIONS**	556
905	Percent of Households with Telephone Service: 1984 and 1992	563

Table number		Page number
	Sec. 21. **TRANSPORTATION—LAND**	607
1017	Transportation to Work: 1990	615
1019	Motor Vehicle Production and Trade: 1980 to 1991	617
1020	Motor Vehicles in Use: 1980 to 1991	617
1021	Motor Vehicle Registrations: 1980 to 1991	618
1022	Motor Vehicle Tires and Batteries: 1980 to 1991	618
1024	Roadway Congestion: 1989	619
1029	Fatal Motor Vehicle Accidents—National Summary: 1980 to 1991	621
	Sec. 22. **TRANSPORTATION—AIR AND WATER**	633
1056	U.S. Scheduled Airline Industry—Summary: 1983 to 1991	635
1061	Domestic Airline Markets: 1991	637
	Sec. 23. **AGRICULTURE**	648
1136	Fresh Fruits and Vegetables—Consumption and Imports: 1990	672
1137	Greenhouse and Nursery Crops—Summary, by Type of Product: 1988 to 1992	673
	Sec. 25. **MINING AND MINERAL PRODUCTION**	692
1193	Federal Strategic and Critical Materials—Summary: 1989 to 1991	702
1202	World Crude Oil Production: 1980 to 1991	706
1203	World Natural Gas Production: 1980 to 1989	706
	Sec. 26. **CONSTRUCTION AND HOUSING**	710
1234	Housing Units—Historical Trends for Selected Characteristics: 1940 to 1990	724
1240	Housing Units—Selected Characteristics: 1990	728;729
1241	Occupied Housing Units—Monthly Owner and Renter Costs as Related to Household Income: 1980 and 1990	730
	Sec. 27. **MANUFACTURES**	738
1286	Fiber, Rugs, Carpeting, and Sheets—Quantity and Value: 1985 to 1991	765
1287	Glass Containers, Clay Construction Products, and Refractories, Value of Shipments: 1985 to 1991	765
1288	Mining and Mineral Processing Equipment Shipments—Quantity and Value: 1990 and 1991	765
1289	Inorganic Materials and Pharmaceutical Preparations: 1988 to 1991	766
1290	Engines, Refrigeration and Heating Equipment, and Pumps and Compressors—Quantity and Value: 1989 to 1991	767
1291	Computers and Office and Accounting Machines Quantity and Value of Shipments: 1990 and 1991	767
1292	Metalworking Machinery—Value of Shipments, by Class of Product: 1985 to 1991	767
1293	Switchgear, Switchboard Apparatus, Relays, and Industrial Controls—Value of Shipments: 1985 to 1991	768
1294	Selected Industrial Air Pollution Control Equipment—Quantity and Value: 1991	768
1295	Fluid Power Products—Value of Shipment: 1985 to 1991	768
1296	Selected Instruments and Related Products—Value of Shipments: 1985 to 1991	768
	Sec. 28. **DOMESTIC TRADE AND SERVICES**	770
1308	Percent of Supermarkets Offering Selected Services and Product Lines: 1990 and 1992	778
1309	Supermarket Shopping—Selected Characteristics: 1990 and 1992	778
	Sec. 29. **FOREIGN COMMERCE AND AID**	790
1348	Characteristics of U.S. Exporters: 1987	810
1349	U.S. Trade in Advanced Technology Products: 1992	810
	Sec. 31. **COMPARATIVE INTERNATIONAL STATISTICS**	829
1384	Education Expenditures: 1988	850
1385	Educational Attainment: 1989	850
1386	Number of Women Per 100 Men, by Educational Attainment: 1989	851
1405	Poverty Rates in the Mid-1980's	860
1406	Child Poverty Rates	860

Summary Social and Economic Characteristics—Congressional Districts

[As of April 1. For definition of median, see Guide to Tabular Presentation]

STATE AND DISTRICT	POPULATION					Percent high school graduate or higher[3]	Percent bachelor's degree or higher[3]	Median household income in 1989 (dol.)	Percent of persons below poverty level	OCCUPIED HOUSING UNITS		Median value of specified owner-occupied housing units[4] (dol.)
	Total population	Percent 65 years old and over	Percent Black	Percent Hispanic[1]	Voting-age[2] population					Total	Percent owner occupied
