Description of Industries and Summary of Findings

This report shows 1992 Census of Mineral Industries statistics for establishments classified in the following industry:

SIC code and title

1321 Natural Gas Liquids

The industry statistics (employment, payroll, value of shipments, cost of supplies, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments but also all secondary activities performed by the same establishments. This fact should be taken into account in comparing industry statistics (tables 1 through 4 and 7) with product statistics (table 6) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and the value of net shipments of primary products of the industry produced as secondary products by establishments classified in other industries.

Single-establishment companies with up to 20 employees (cutoff varied by industry) were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other Federal agencies. This information was used in conjunction with industry averages and other information to develop estimates for all statistics. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown.

Establishment data were tabulated based on industry definitions included in the *1987 Standard Industrial Classification (SIC) Manual*¹. Comparability for the product

classes and product codes that changed between the 1992 and 1987 censuses is shown in appendix B. This appendix presents, in tabular form, the linkage from 1992 to 1987, and 1987 to 1992.

All dollar figures included in this report are at prices current for the year specified and, therefore, unadjusted for changes in price levels. Consequently, when making comparisons to prior years, users should take into consideration the inflation that has occurred.

The Bureau of the Census statistics on products for these industries are not entirely comparable with product statistics for the same industries published by the Bureau of Mines or the Energy Information Administration. The differences that occur result primarily from differences in data collection methods, coverage, and objectives sought.

INDUSTRY 1321, NATURAL GAS LIQUIDS

This industry is made up of establishments primarily engaged in producing liquid hydrocarbons from oil and gas field gases. Establishments recovering liquefied petroleum gases incidental to petroleum refining or to the manufacturing of chemicals are classified in Manufacturing, Major Group 28 or 29. Establishments recovering helium from natural gas are classified in Manufacturing, Major Group 28.

In the 1992 Census of Mineral Industries, Industry 1321, Natural Gas Liquids, had employment of 12.0 thousand. The employment figure was 6 percent below the 12.7 thousand reported in 1987. The total value of shipments and receipts for the industry was \$27.2 billion in 1992. The value added by mining was \$4.2 billion in 1992. Value added per employee was \$353.5 thousand in 1992; it was \$316.9 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$23.6 billion, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$23.1 billion and is shown in table 7a. The total cost of fuels used in this industry amounted to \$149.1 million in 1992. Data on specific fuels used appear in table 7b.

All establishments in this industry were included in the mail portion of the census. The data for a small number of establishments whose reports were not received at the time the data were tabulated were imputed as described above. These establishments accounted for less than 1 percent of the total value of shipments and receipts.

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of the figures shown: E1-10 to 19 percent; E2-20 to 29 percent; E3-30 to 39 percent; E4-40 to 49 percent; E5-50 to 59 percent; E6-60 to 69 percent; E7-70 to 79 percent; E8-80 to 89 percent; E9-90 percent or more.

²States with 100 employees or more are shown. Some statistics are withheld to avoid disclosing data for individual companies. If employment is 100 or more, number of establishments is shown and employment-size range is indicated by one of the following symbols: C-100 to 249 employees; E-250 to 499 employees; F-500 to 999 employees; G-1,000 to 2,499 employees; H-2,500 to 4,999 employees; I-5,000 to 9,999 employees.

Table 3a. Summary Statistics by Industry: 1992

[For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Item	Natural gas liquids (SIC 1321)	Item	Natural gas liquids (SIC 1321)
Establishments during year	591	Supplemental labor costs not included in payroll	118.9
With 0 to 19 employees	394	Legally required expenditures, including Social Security contributions	36.9
With 20 to 99 employees	181	Payments for voluntary programs	81.9
With 100 employees or more	16		
All employees:		Value added by mining	4 242.2
Average for year	12.0	Cost of supplies	23 586.1
Payroll for year	513.7	Supplies used, minerals received, and purchased machinery installed	23 149.0
Production, development, and exploration workers:		Resales	-
Average for year	8.8	Purchased fuels consumed	149.1
March	9.0	Purchased electric energy:	
May	8.9	Quantity	2 942.8
August	8.9	Cost	128.5
November	8.6	Electric energy generated less sold	663.6
Hours	18.4	Contract work	159.6
Wages	360.4	Cost of purchased communication services	3.8

Note: Data shown as a (D) are included in underscored figures above.

¹Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 percent or more.

Table 5. Industry–Product Analysis—Summary of Industry Shipments and Receipts and Net Shipments of Primary Products: 1992 and 1987

[Million dollars. An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as resales or contract work. Columns A–E show this product pattern for an industry. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F–H. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry and year	Value of shipments and receipts					Value of net shipments of primary products or services		
		Total	Primary products	Secondary products	Receipts for services	Products purchased and resold without further processing	Total produced in all industries	Produced in this industry	Produced in other industries
		A	B	C	D	E	F	G	H
1321	Natural gas liquids 1992-- 1987--	27 213.8 24 749.5	27 108.0 (D)	69.0 143.6	36.8 (D)	– –	16 474.1 15 488.1	6 194.3 (D)	279.8 (D)

¹Represents net natural gas liquids only.

Table 6a. Products or Services: 1992 and 1987

[Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Product code	Product	1992			1987		
		Quantity of production for all purposes	Product shipments		Quantity of production for all purposes	Product shipments	
			Quantity	Value (million dollars)		Quantity	Value (million dollars)
1321--	NATURAL GAS LIQUIDS

13B-8 NATURAL GAS LIQUIDS

MINERAL INDUSTRIES—INDUSTRY SERIES

Appendix A. Explanation of Terms

Employment and related items. The report forms requested separate information on production, development, and exploration workers for a specific payroll period within each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees. This item includes all full-time and part-time employees on the payrolls of mining establishments during any part of the pay period which included the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Also included are employees working for miners paid on a per ton, car, or yard basis. Excluded are employees at the mine but on the payroll of another employer (such as employees of contractors) and employees at company stores, boardinghouses, bunkhouses, and recreational centers. Also excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Production, development, and exploration workers. This item includes employees (up through the working-supervisor level) engaged in manual work (using tools, operating machines, hauling materials, loading and hauling products out of the mine in mine cars or trucks, and caring for mines, plants, mills, shops, or yards). Included are exploration work, mine development, storage, shipping, maintenance, repair, janitorial, and guard services, auxiliary production for use at establishments (such as power plant), recordkeeping, and other services closely associated with these production and development operations at the establishment covered by the report. Gang and straw bosses and supervisors who performed manual labor are included, as are employees paid on either a time- or piece-rate basis. Also included are miners paid on a per ton, car, or yard basis and persons engaged by them and paid out of the total amount received by these miners. In addition, other employees at the establishment but not on its payroll are included if paid directly through its own employees, such as superintendents and supervisors. The payments received by these types of employees are included as part of the establishments payroll. Employees above the working-supervisor level are excluded from this category.

All other employees. This item covers nonproduction employees of the establishment including those engaged in the following activities: supervision above the working-supervisor level, sales, highway trucking (by employees not entering mines or pits), advertising, credit, collection, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria and medical), professional (such as engineers and geologists), and technical activities. Also included are employees on the payroll of the establishment engaged in the construction of major additions or alterations to the plant and utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified as production, development, and exploration workers.)

Separately operated auxiliary establishments employees. This item includes employment at separate central administrative offices or auxiliary units of multiestablishment companies and at those offices or units servicing more than one establishment during the payroll period which included March 12. Establishments are classified on the basis of the industry or principal industry served. Employees at an office located at or near the mining establishment are usually included in the mine report.

All employees, average for year. The 1992 census report form requested employment figures for production, development, and exploration workers for four selected pay periods (mid-March, May, August, and November). For all other employees, only a mid-March figure was requested. The annual average is an average of the four monthly figures for production, development, and exploration workers plus the March figure for all other employees. This approach was used to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods closely approximates, for most industries, the average employment for the year that would be obtained from 12 monthly pay periods.

Payroll. This item includes the gross earnings of all employees on the payroll of mining establishments paid in the calendar year 1992. It includes all forms of compensation such as salaries, wages, commissions, payments received on a ton, car, or yard basis, dismissal pay,

bonuses, vacation and sick leave pay, employee contributions to pension plans (such as 401(K) plan), and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to proprietors or partners of unincorporated concerns, and payments to members of Armed Forces and pensioners carried on the active payroll of mining establishments. Also excluded are royalty payments to unions and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production, development, and exploration work but charged to employees and deducted from their wages.

As in the case of employment and establishment figures, the annual payrolls of separate auxiliary establishments of multiestablishment companies are included in the totals for individual industries and for States.

Production-, development-, and exploration-worker hours.

This item represents all hours that production, development, and exploration workers worked, both on active days during which there was production or development work and on inactive days when only security guards, inspectors, repair persons, and other maintenance persons were on duty. It includes all hours worked or paid for at the mining operations, except hours paid for vacations, holidays, or sick leave, when the employee was not at the establishment. Included are actual overtime hours, not straight time equivalent hours. Hours of working proprietors or partners and employees of contractors are excluded.

Supplemental labor costs. This item represents employer's cost for fringe benefits not included in payrolls.

Legally required expenditures, including Social Security contributions. This cost includes employer contributions for all programs required under Federal and State legislation, such as Federal Old Age and Survivors' Insurance, unemployment compensation, and worker's compensation. Also included are legally required State temporary disability payments.

Payments for voluntary programs. Included in this cost are payments resulting from union negotiated contracts and all employer payments of insurance premiums on hospital and medical plans, life insurance premiums, and premiums on supplementary accident and sickness insurance. For programs supported by joint employer-employee contributions, only the employer payments are included. Also included are payments or allocations on all pension plans regardless of methods of administration, supplemental unemployment compensation plans, welfare plans, stock purchase plans in which the employer payment is not subject to withholding tax, and deferred profit sharing plans.

Value added by mining. This measure of mining activity is derived by subtracting the cost of supplies, minerals received for preparation, purchased machinery installed,

purchased fuel, purchased electricity, and contract work from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. This statistic avoids the duplication in value of shipments and receipts which results from the use of products of some establishments as supplies, energy sources, or materials by others. Moreover, it provides a measure of value added not only in mineral production but also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

Cost of supplies used, purchased machinery installed, etc.

Besides supplies used and purchased machinery installed, this cost includes fuels and electric energy used and contract work done by others for each establishment. It includes charges to both the current and capital accounts. It also includes the cost of items used during 1992 whether they were purchased, withdrawn from inventories, or received from other establishments of the company. For selected supplies and fuels and for electric energy, both quantity and cost data were requested. The cost data refer to direct charges actually paid or payable (after discounts) for items used during the year. Freight charges and other direct charges incurred by the establishment in acquiring the item are included. Companies whose records did not show actual amounts used were asked to approximate use by adding purchases (or receipts) during the year to beginning inventory and subtracting ending inventory. Separate figures were requested for (1) selected supplies used, minerals received for preparation, and purchased machinery installed; (2) electric energy purchased; (3) purchased fuels used for heat, power, or the generation of electricity; (4) contract work done by others; and (5) products bought and resold in the same condition. Supplies and equipment used in mine development, plant expansion, and capitalized repairs, which are chargeable to fixed assets accounts, are included in this item, as are supplies furnished without charge to contractors for use at the mining operation and supplies sold to employees for use at the establishment. Excluded are such costs as advertising, insurance, telephone, and research and consulting services of other establishments or such overhead costs as depreciation charges, rent, interest, and royalties.

Selected supplies used, minerals prepared, etc.

In addition to the total cost of supplies used, purchased machinery installed, etc., which every establishment was required to report, information also was collected on the consumption of major supplies used in mining. These inquiries were restricted to supplies which were important parts of the cost of production, exploration, and development of a particular industry and for which cost information was available. Table 7a contains information on specific supplies consumed. On report forms for most mineral industries (except the contract services and the crude petroleum and natural gas industries), a uniform inquiry

was included on minerals prepared at the reported establishments. Figures were obtained on crude minerals mined at the establishment (quantity), received from other establishments of the company or purchased from others (quantity and cost), and received for preparation on a custom or toll basis (quantity and estimated value). Establishments consuming less than a specified amount (usually \$25,000) were not required to report the cost of a supply. For small establishments for which administrative records were used, the cost of supplies was included in "not specified by kind." (See Summary of Findings for the importance of administrative records to any industry.)

Value of shipments and receipts. The amounts shown as value of shipments and receipts for each industry (tables 1 through 5), and for individual products or classes of products (table 6), are the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during 1992, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1992. Prepared material or concentrates includes preparation from ores mined at the same establishment, purchased, received from other operations of the same company, or received for milling on a custom or toll basis. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry, (2) the value of secondary products which are primary to other industries, (3) the receipts for contract work done for others, except custom milling, and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

Shipments of individual products. In the 1992 Census of Mineral Industries, information was collected on output for about 150 individual mineral products. In general, the shipments figures of the 1992 and 1987 minerals censuses were confined to separate totals for each crude and each prepared mineral. When shipments were significant, separate figures also were obtained on crude minerals going to preparation plants and those going to consumers.

Figures were collected on both quantity and value of shipments. Shipments includes commercial shipments and transfers of products to other operations of the same company. For products that are used to a significant extent within the same establishment for power or heat, and for minerals mined and prepared in the same establishment, total production figures or separate data on production for such uses were collected. Typically, production also was collected for products for which there was usually significant differences between total production and total shipments because of stock changes.

For service industries, the amount received or due for services performed during 1992 was collected as a measure of output. For mine operators who also perform services, the amount received for such services was added to the total value of products shipped to determine total value of shipments and receipts for each establishment.

Table 6 provides total shipments figures from all industries for each of the products primary to the industry covered.

Capital expenditures. This item covers expenditures made during the year for development and exploration of mineral properties, for new construction, and for purchased machinery chargeable to fixed assets accounts of the mineral establishment. They are the type for which depreciation, depletion, or Office of Minerals Exploration accounts are ordinarily maintained. Capital expenditures during 1992 were determined as "additions completed during the year plus construction in progress at the end of the year minus construction in progress at the beginning of the year." Reported capital expenditures include work done on contract, as well as by the mine forces. Expenditures for machinery and equipment include those made for replacement purposes, as well as those for additions to capacity. Excluded from these expenditures were costs of maintenance and repairs charged as current operating expense and expenditures for land and mineral rights.

Whenever applicable, separate figures were provided for expenditures for development and exploration of mineral property, construction of preparation plants and other construction, new machinery and equipment, used plant, and used equipment acquired from others.

Gross value of depreciable assets. Assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation costs). The data were collected for the beginning and end of the year. Assets at the beginning of the year plus new and used capital expenditures minus retirements should equal assets at the end of the year. For new construction

or other improvement projects in progress but not completed by the end of the year, the cumulative capital expenditures were included in the beginning- and end-of-year assets figures.

Retirements. This item represents the gross value of depreciable assets sold, retired, scrapped, destroyed, abandoned, etc., during 1992. The values shown are the acquisition costs of the retired assets. This item also includes the value of assets (at acquisition cost rather than current market value) transferred to other establishments of the same company.

Depreciation. This item shows the reduction in value of depreciable assets brought about through use, gradual obsolescence, or the effect of the elements (decay or corrosion) during the year. Included are charges against assets acquired or completed during the year.

Rental payments. This item consists of rental payments made to other companies for use of such depreciable assets as buildings, other structures, machinery, and equipment. It does not include payments made to the parent company or another subsidiary of the parent company for the use of buildings and equipment owned by the parent company or its subsidiary. The value of such company-owned assets is included in the gross value of depreciable assets.

Rented equipment is reported according to the type of lease negotiated with the lessor. If the lease qualified as an "operating lease" the periodic payments made to the producer or the lessor are reported in the rental section. However, if the leasing arrangement met the criteria set down by the Financial Accounting Standards Board for a "capital lease," the original cost or market value of the equipment or building is reported as a value of fixed assets and not as rental payments.

Current account expenditures. This item includes all expenses for mineral properties, exploration, and development charged to current accounts. This includes all supplies, machinery, equipment, parts, fuels, power, etc., used for development or exploration and charged to current operating expenses. Also included are royalty payments, acquisition costs for mineral land and rights which were not capitalized, and the cost of maintenance and repairs associated with exploration or development activity and charged to current accounts.

Inventories. This item includes inventories of mined or quarried products and supplies, parts, fuels, etc., at the beginning and end of the year. Included as mined or quarried products are stockpiles of products ready for shipment and stocks of raw products awaiting treatment or beneficiation. Beginning with the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census in which respondents were permitted to value their inventories using any generally accepted accounting method.

Fuels and electric energy used. This item includes the quantity and cost of fuels and electric energy used in mining. For most industries, separate quantity and cost figures are shown for purchased coal, distillate fuel oil, residual fuel oil, gas, gasoline, and electric energy, and a cost figure is shown for "other fuels" (see table 7b). Data also were obtained on the quantity of fuels and electric energy produced and consumed at the same establishment. These data are shown for coal, crude petroleum, and natural gas used at the producing establishments for heat and power, and for electric energy generated and used at the same mining operations. For electric energy, the quantity generated and used is approximated by subtracting the quantity of electric energy sold from the total quantity generated (excluding generating station use).

Appendix B.

Product Code Comparability Tables

Publication Program

1992 CENSUS OF MINERAL INDUSTRIES

Publications of the 1992 Census of Mineral Industries, containing data on establishments primarily engaged in the extraction of minerals, are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Preliminary Reports

Industry series—12 reports (MIC92-I-10A(P) to -14E(P))

Preliminary data from the 1992 census are issued in 12 separate reports covering 31 mineral industries. Preliminary summary data for the United States and States are released in one report.

Final Reports

Industry series—12 reports (MIC92-I-10A to -14E)

Each of the 12 reports provides information for an industry or a group of related industries (e.g., clay, ceramic, and refractory minerals). Final figures for the United States are shown for each of 31 mineral industries on quantity and value of products shipped and supplies used; inventories; quantity and cost of fuels and electric energy purchased and the quantities of fuels produced and consumed; capital expenditures; assets; rents; employment; depreciation, amortization, and depletion; payroll; hours worked; cost of purchased machinery; value added by mining; mineral development, and exploration costs; number of establishments; and number of companies. Comparative statistics for earlier years are included. Industry statistics are shown by State, type of operation, and size of establishment.

Geographic area series—9 reports (MIC92-A-1 to -9)

A separate report for each of the nine geographic divisions presents statistics for individual States and off-shore areas for two- and three-digit industry groups by type of operation and by county. Also, data are shown for

value of shipments; value added by mining; employment; payroll; hours worked; capital expenditures; cost of supplies, etc.; purchased machinery installed; and number of mining establishments, with comparative 1987 data on employment and value added by mining.

Subject series—2 reports (MIC92-S-1 and -2)

One of these reports is a general national-level summary; the other report contains detailed statistics on fuels and electric energy consumed by mineral industries.

Reference series—1 report (MC92-R-1)

The *Numerical List of Manufactured and Mineral Products* includes a description of the principal products and services published in the 1992 Censuses of Manufactures and Mineral Industries.

Electronic Media

All data included in the printed reports are available on compact disc—read only memory (CD-ROM). The CD-ROM's provide the same information found in the reports. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, financial, insurance, real estate, construction industries, manufactures, transportation, communications, utilities, enterprise statistics, minority-owned businesses, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Commonwealth of the Northern Mariana Islands. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Mineral Industries. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

Manufacturing and Construction Division prepared this report. **Barry A. Rappaport**, Assistant Chief for Construction and Mineral Censuses, was responsible for the overall planning, management, and coordination of the census of mineral industries. Planning and implementation were under the direction of **Patricia L. Horning**, Chief, Construction and Mineral Census Branch, assisted by **M. Susan Bucci**, Section Chief, with primary staff assistance by **Susan L. DiCola**.

Brian Greenberg, Assistant Chief for Research and Methodology Programs, assisted by **Stacey Cole**, provided the mathematical and statistical techniques as well as the coverage operations.

Baruti A. Taylor, under the direction of **A. William Visnansky**, Chief, Special Reports Branch, performed overall coordination of the publication process. **Julius Smith, Jr.** and **Andrew W. Hait** provided primary staff assistance.

The Economic Planning and Coordination Division provided the computer processing procedures. **Shirin A. Ahmed**, Assistant Chief for Post Data Collection Processing, was responsible for editing and the analysts' interactive database review and correction system. Design and specifications were prepared under the supervision of **Dennis L. Wagner**, Chief, Post Collection Census Branch, assisted by **S. Mark Schmidt** and **Robert A. Rosati**.

The staff of the Data Preparation Division, **Judith N. Petty**, Acting Chief, performed mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review.

The Geography Division staff developed geographic coding procedures and associated computer programs.

The Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, developed and coordinated the computer processing systems. **Martin S. Harahush**, Assistant Chief for Quinquennial Programs, was responsible for design and implementation of the computer systems. **Gary T. Sheridan**, Chief, Manufactures and Construction Branch, assisted by **Gerald S. Turnage**, supervised the preparation of the computer programs.

Computer Services Division, **Marvin D. Raines**, Chief, performed the computer processing.

The staff of the Administrative and Publications Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Cynthia G. Brooks** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-4680.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, financial, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Mineral Industries

GENERAL

This report, from the 1992 Census of Mineral Industries, is one of a series of 12 industry reports; each provides statistics for individual industries or groups of related industries. Additional separate reports will be issued for each geographic division showing statistics by State and for special subjects, such as fuels and electric energy consumed.

The introduction to the *General Summary* report discusses, at greater length, many of the subjects described in this introduction. For example, the *General Summary* text discusses the economic significance of the mining sector, the relation of value added by mining to value added by manufacture, some of the changes in statistical concepts over the history of the census, and the valuation problems arising from intracompany transfers between mining establishments, manufacturing plants, and sales offices and sales branches of a company.

SCOPE OF CENSUS AND DEFINITION OF MINERAL INDUSTRIES

The 1992 Census of Mineral Industries covers all establishments with one paid employee or more primarily engaged in mining as defined in the *1987 Standard Industrial Classification (SIC) Manual*¹. This is the system of industrial classification developed by experts on classification in Government and private industry under the guidance of the Office of Information and Regulatory Affairs, Office of Management and Budget. This classification system is used by Government agencies as well as many organizations outside the Government.

The SIC Manual defines mining in the broad sense to include the extraction of minerals occurring naturally: solids such as coal and ores, liquids such as crude petroleum, and gases such as natural gas. The term "mining" is used in the broad sense to include quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparations needed to make minerals marketable. Exploration is included as is the development of mineral properties. Services performed on a contract, fee, or other basis in the exploration and development of mineral properties are classified separately but within this division.

Mining operations are classified by industry on the basis of the principal mineral produced or, if there is no production, on the basis of the principal mineral for which exploration or development work is in progress. The recovery of material from culm banks, ore dumps, and other waste mineral piles is classified in the appropriate mining industry according to the mineral product recovered.

The crushing, grinding, or other treatment of certain earths, rocks, and other nonmetallic minerals not in conjunction with mining activities is not included in this division but is classified as manufacturing. Hauling and other transportation beyond the mine property and contract hauling (except out of open pits in conjunction with mining) also are excluded.

Mining operations carried on as secondary activities at manufacturing establishments (such as clay pits at clay products plants or sand and gravel operations at ready-mixed concrete plants) are not within the scope of this census. However, selected data (production workers' wages and hours; total cost of supplies, fuels, electric energy, and contract work; and quantity of production for mined products) on such mining activities have been obtained in the 1992 Census of Manufactures and are included in the mining reports. They are clearly specified wherever included.

ESTABLISHMENT BASIS OF REPORTING

The census of mineral industries covers each mining establishment of firms with one paid employee or more operating in the United States. A company operating more than one establishment is required to file a separate report for each location. A mineral establishment is defined as a single physical location where mineral operations are conducted.

For oil and gas field operations and for contract services, the basis for reporting is different from the "establishment" basis used for other types of mining. Firms operating oil and gas wells, drilling wells, or exploring for oil and gas for their own account were required to submit a separate report for each State or offshore area adjacent to a State in which it conducted such activities. Firms that performed contract services for oil and gas field operations or for mining establishments were required to submit one report covering all such activities in the United States and to include information on receipts for services and production-worker wages and hours, by State. These consolidated

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

reports were then allocated to State establishments based on the data reported at the State level. The 1992 figures for establishments include the summation of operations for each State allocated from these nationwide reports.

USE OF ADMINISTRATIVE RECORDS

From a mailout universe of about 28,500 mining establishments, approximately 11,000 small single-establishment companies were not mailed a questionnaire. For these establishments, some employment, payroll, and receipts data were obtained from the administrative records of other agencies. Selection of the small establishment non-mail cases was done on an industry-by-industry basis, and a variable cutoff was used to determine those establishments for which administrative records were to be used in place of a census report. This information was then used in conjunction with industry averages and other information to estimate the statistics for administrative-record and nonresponse establishments. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown. The value of shipments and receipts and cost of supplies were generally not distributed among specific products and supplies for these establishments, but were included in the product and supply "not specified by kind" categories. Overall, establishments for which administrative-record data were used accounted for less than 2 percent of total value of shipments and receipts.

The industry classification codes included in the administrative-record files were used for those establishments excused from filing census forms. Generally, these codes were assigned on the basis of brief descriptions of the general activity of the establishment. Where the description was incomplete, or where there were relatively fine lines of demarcation among industries or between mining and nonmining activities, the code assigned to an establishment could differ from that which would have been assigned on the basis of more complete product or activity information. Therefore, the total establishment count should be viewed as an approximate measure. The counts for establishments with 20 employees or more are far more reliable.

In the 1992 census, as in the 1987, 1982, 1977, and 1972 censuses, data for single-unit firms without paid employees were excluded. This exclusion had only a slight effect on industry aggregates for most industries. Data for firms without employees were included in the 1963, 1958, and 1954 censuses if they reported more than \$500 in (1) value of shipments and receipts, (2) cost of supplies and purchased machinery, or (3) capital expenditures.

AUXILIARIES

Statistics for employment and payroll for individual industries and industry groups also include employment and payroll figures for administrative offices, warehouses,

storage facilities, and other auxiliary establishments servicing mining establishments. As in previous censuses, respondents were asked to file separate reports (form ES-9200) for any separately operated auxiliary establishments. Classification of employment and payroll data at such auxiliary establishments was based on the mining establishments served.

INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

Each of the establishments covered in the census was classified in 1 of 31 mineral industries in accordance with the industry definitions in the 1987 SIC Manual. An industry is generally defined as a group of establishments producing the same product or closely related group of products. The resulting group of establishments must be significant in terms of its number, value added by mining, value of shipments and receipts, number of employees, and payroll. Application of these criteria led to the formulation of 31 mining industries, each assigned a four-digit code. The classification system also provides broader groups of industries, with 20 three-digit groups and 4 two-digit groups. Within industries, the system provides for seven-digit products and five-digit product classes. Products are considered primary to an industry if the first four digits of the product codes are the same as the industry code. Products whose first four code numbers differ from the industry code are called secondary products. To determine the industry classification of an establishment, the seven-digit products are grouped together according to the first four digits of the product code. The first four digits of the group of products with the largest value of production become the industry code for the establishment. (For mineral service industries, the classification is on the basis of receipts for services performed.)

In most industries, establishments making products falling into the same industry category use a variety of processes. Separate statistics are provided on the various types of operation. Whenever possible, separate figures are shown for establishments with mines only, mines with preparation plants, and preparation plants only. Separate figures are provided by type of mine (underground, open pit, and combination). Separate statistics also are provided on producing and nonproducing operations, an establishment being defined as nonproducing if no mineral products were shipped during the year.

Statistics usually are provided on the production of minerals mined and used in the same establishment for producing prepared minerals or used at the producing establishment for fuel.

Differences in the integration of production processes and types of operation should be considered when relating the general items (employment, payrolls, value added, etc.) to the product and material data.

VALUE OF SHIPMENTS FOR THE INDUSTRY COMPARED WITH VALUE OF PRODUCT SHIPMENTS

This report shows value of shipments and receipt data for industries and products. In tables 1 through 4, these data represent the total value of shipments and receipts of all establishments classified in a particular industry. The data include the shipments of the products classified in the industry (primary to the industry), products classified in other industries (secondary to the industry), and miscellaneous receipts (repair work, sale of scrap, research and development, installation receipts, and resales). Value of product shipments shown in table 6 represents the total value of all products shipped that are classified as primary to an industry and includes those that were shipped by all mining establishments regardless of their industry classification. Value of product shipments also may include some products shipped from mining operations associated with manufacturing establishments.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the data for an individual establishment or company. However, the number of establishments classified in a specific industry is not considered a disclosure; this information may be released even though other information is withheld.

The disclosure analysis for the industry statistics in tables 1 through 4 of this report is based on the total value of shipments and receipts. When the total value of shipments and receipts cannot be shown without disclosing information for individual companies, the complete line is suppressed except for capital expenditures. If capital expenditures alone is a disclosure, only total capital expenditures and cost of supplies statistics are suppressed. However, the suppressed data are included in higher level totals.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Mineral Industries may be requested. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications. Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6901.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

—	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in higher level totals.
(NA)	Not available.
(NC)	Not comparable.
(S)	Withheld because estimate did not meet publication standards.
(X)	Not applicable.
(Z)	Less than half the unit shown.
n.e.c.	Not elsewhere classified.
n.s.k.	Not specified by kind.
r	Revised.
SIC	Standard Industrial Classification.

Other abbreviations, such as lb, gal, yd, and bbl, are used in the customary sense.

Description of Industries and Summary of Findings

This report shows 1992 Census of Mineral Industries statistics for establishments classified in each of the following industries:

SIC code and title

1381	Drilling Oil and Gas Wells
1382	Oil and Gas Field Exploration Services
1389	Oil and Gas Field Services, N.E.C.

The industry statistics (employment, payroll, value of shipments, cost of supplies, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments but also all secondary activities performed by the same establishments. This fact should be taken into account in comparing industry statistics (tables 1 through 4 and 7) with product statistics (table 6) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and the value of net shipments of primary products of the industry produced as secondary products by establishments classified in other industries.

Single-establishment companies with up to 20 employees (cutoff varied by industry) were excluded from the mail portion of the census. For these establishments whose reports were not received at the time the data were tabulated, data on payrolls and receipts were obtained from administrative records of other Federal agencies. This information was used in conjunction with industry averages and other information to develop estimates for all statistics. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown.

Establishment data were tabulated based on industry definitions included in the *1987 Standard Industrial Classification (SIC) Manual*¹. Comparability for the product classes and product codes that changed between the 1992 and 1987 censuses is shown in appendix B. This appendix presents, in tabular form, the linkage from 1992 to 1987, and 1987 to 1992.

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

All dollar figures included in this report are at prices current for the year specified and, therefore, unadjusted for changes in price levels. Consequently, when making comparisons to prior years, users should take into consideration the inflation that has occurred.

The Bureau of the Census statistics on products for these industries are not entirely comparable with product statistics for the same industries published by the Bureau of Mines or the Energy Information Administration. The differences that occur result primarily from differences in data collection methods, coverage, and objectives sought.

INDUSTRY 1381, DRILLING OIL AND GAS WELLS

This industry is made up of establishments primarily engaged in drilling wells for oil or gas field operations for others on a contract, fee, or similar basis. This industry includes contractors that specialize in spudding in, drilling in, redrilling, and directional drilling.

In the 1992 Census of Mineral Industries, Industry 1381, Drilling Oil and Gas Wells, had employment of 47.7 thousand. The employment figure was 13 percent below the 55.0 thousand reported in 1987. The total value of shipments and receipts for the industry was \$3.6 billion in 1992. The value added by mining was \$2.5 billion in 1992. Value added per employee was \$52.8 thousand in 1992; it was \$46.4 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$1.4 billion, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$914.3 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$190.9 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 9 percent of the total value of shipments and receipts.

INDUSTRY 1382, OIL AND GAS FIELD EXPLORATION SERVICES

This industry is made up of establishments primarily engaged in performing geophysical, geological, and other exploration services for oil and gas on a contract, fee, or similar basis.

In the 1992 Census of Mineral Industries, Industry 1382, Oil and Gas Field Exploration Services, had employment of 13.7 thousand. The employment figure was 19 percent below the 16.9 thousand reported in 1987. The total value of shipments and receipts for the industry was \$964.6 million in 1992. The value added by mining was \$725.0 million in 1992. Value added per employee was \$52.9 thousand in 1992; it was \$45.6 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$411.1 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$307.9 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$29.3 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 33 percent of the total value of shipments and receipts.

INDUSTRY 1389, OIL AND GAS FIELD SERVICES, N.E.C.

This industry is made up of establishments primarily engaged in performing for others on a contract, fee, or similar basis oil and gas field services, not elsewhere

classified. Services included are excavating slush pits and cellars; grading and building of foundations at well locations; well surveying; running, cutting, and pulling casings, tubes, and rods; cementing wells, shooting wells; perforating well casings; acidizing and chemically treating wells; and cleaning out, bailing, and swabbing wells.

In the 1992 Census of Mineral Industries, Industry 1389, Oil and Gas Field Services, N.E.C., had employment of 96.4 thousand. The employment figure was 2 percent above the 94.6 thousand reported in 1987. The total value of shipments and receipts for the industry was \$7.5 billion in 1992. The value added by mining was \$6.0 billion in 1992. Value added per employee was \$61.8 thousand in 1992; it was \$50.2 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$2.0 billion, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$1.5 billion and is shown in table 7a. The total cost of fuels used in this industry amounted to \$213.4 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 6 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 15 percent of the total value of shipments and receipts.

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of the figures shown: E1–10 to 19 percent; E2–20 to 29 percent; E3–30 to 39 percent; E4–40 to 49 percent; E5–50 to 59 percent; E6–60 to 69 percent; E7–70 to 79 percent; E8–80 to 89 percent; E9–90 percent or more.

²States with 100 employees or more are shown. Some statistics are withheld to avoid disclosing data for individual companies. If employment is 100 or more, number of establishments is shown and employment-size range is indicated by one of the following symbols: C–100 to 249 employees; E–250 to 499 employees; F–500 to 999 employees; G–1,000 to 2,499 employees; H–2,500 to 4,999 employees; I–5,000 to 9,999 employees.

Note: Data shown as a (D) are included in underscored figures above.

¹Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 percent or more.

²Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate data shown for these small establishments. Data are also included in respective size classes shown.

Table 5. **Industry-Product Analysis—Summary of Industry Shipments and Receipts and Net Shipments of Primary Products: 1992 and 1987**

[Million dollars. An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as resales or contract work. Columns A-E show this product pattern for an industry. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry and year	Value of shipments and receipts					Value of net shipments of primary products or services		
						Products purchased and resold without further processing

13C-10 OIL AND GAS FIELD SERVICES

MINERAL INDUSTRIES—INDUSTRY SERIES

Table 7a. **Selected Supplies and Purchased Machinery Installed: 1992 and 1987—Con.**

[Includes cost of supplies consumed or put into production by establishments classified only in this industry. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Supply code	Industry and supply consumed	1992 delivered cost (million dollars)	1987 delivered cost (million dollars)
	INDUSTRY 1389, OIL AND GAS FIELD SERVICES, N.E.C.—Con.		
973000	Undistributed - minerals, purchased machinery, parts, attachments, and supplies used ² -----	445.6	571.6

¹Cost for supply codes 289210 and 382900 was included in all other supplies in 1987. In 1992, cost for these supplies is shown separately.

²Represents cost for establishments that did not report detailed data, including establishments that were not mailed a form.

Table 7b. **Fuels Consumed by Type: 1992 and 1987**

[For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

¹Represents cost for establishments that did not report detailed data, including establishments that were not mailed a form.

Appendix A.

Explanation of Terms

Employment and related items. The report forms requested separate information on production, development, and exploration workers for a specific payroll period within each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees. This item includes all full-time and part-time employees on the payrolls of mining establishments during any part of the pay period which included the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Also included are employees working for miners paid on a per ton, car, or yard basis. Excluded are employees at the mine but on the payroll of another employer (such as employees of contractors) and employees at company stores, boardinghouses, bunkhouses, and recreational centers. Also excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Production, development, and exploration workers. This item includes employees (up through the working-supervisor level) engaged in manual work (using tools, operating machines, hauling materials, loading and hauling products out of the mine in mine cars or trucks, and caring for mines, plants, mills, shops, or yards). Included are exploration work, mine development, storage, shipping, maintenance, repair, janitorial, and guard services, auxiliary production for use at establishments (such as power plant), recordkeeping, and other services closely associated with these production and development operations at the establishment covered by the report. Gang and straw bosses and supervisors who performed manual labor are included, as are employees paid on either a time- or piece-rate basis. Also included are miners paid on a per ton, car, or yard basis and persons engaged by them and paid out of the total amount received by these miners. In addition, other employees at the establishment but not on its payroll are included if paid directly through its own employees, such as superintendents and supervisors. The payments received by these types of employees are included as part of the establishments payroll. Employees above the working-supervisor level are excluded from this category.

All other employees. This item covers nonproduction employees of the establishment including those engaged in the following activities: supervision above the working-supervisor level, sales, highway trucking (by employees not entering mines or pits), advertising, credit, collection, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria and medical), professional (such as engineers and geologists), and technical activities. Also included are employees on the payroll of the establishment engaged in the construction of major additions or alterations to the plant and utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified as production, development, and exploration workers.)

Separately operated auxiliary establishments employees. This item includes employment at separate central administrative offices or auxiliary units of multiestablishment companies and at those offices or units servicing more than one establishment during the payroll period which included March 12. Establishments are classified on the basis of the industry or principal industry served. Employees at an office located at or near the mining establishment are usually included in the mine report.

All employees, average for year. The 1992 census report form requested employment figures for production, development, and exploration workers for four selected pay periods (mid-March, May, August, and November). For all other employees, only a mid-March figure was requested. The annual average is an average of the four monthly figures for production, development, and exploration workers plus the March figure for all other employees. This approach was used to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods closely approximates, for most industries, the average employment for the year that would be obtained from 12 monthly pay periods.

Payroll. This item includes the gross earnings of all employees on the payroll of mining establishments paid in the calendar year 1992. It includes all forms of compensation such as salaries, wages, commissions, payments received on a ton, car, or yard basis, dismissal pay,

bonuses, vacation and sick leave pay, employee contributions to pension plans (such as 401(K) plan), and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to proprietors or partners of unincorporated concerns, and payments to members of Armed Forces and pensioners carried on the active payroll of mining establishments. Also excluded are royalty payments to unions and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production, development, and exploration work but charged to employees and deducted from their wages.

As in the case of employment and establishment figures, the annual payrolls of separate auxiliary establishments of multiestablishment companies are included in the totals for individual industries and for States.

Production-, development-, and exploration-worker hours.

This item represents all hours that production, development, and exploration workers worked, both on active days during which there was production or development work and on inactive days when only security guards, inspectors, repair persons, and other maintenance persons were on duty. It includes all hours worked or paid for at the mining operations, except hours paid for vacations, holidays, or sick leave, when the employee was not at the establishment. Included are actual overtime hours, not straight time equivalent hours. Hours of working proprietors or partners and employees of contractors are excluded.

Supplemental labor costs. This item represents employer's cost for fringe benefits not included in payrolls.

Legally required expenditures, including Social Security contributions. This cost includes employer contributions for all programs required under Federal and State legislation, such as Federal Old Age and Survivors' Insurance, unemployment compensation, and worker's compensation. Also included are legally required State temporary disability payments.

Payments for voluntary programs. Included in this cost are payments resulting from union negotiated contracts and all employer payments of insurance premiums on hospital and medical plans, life insurance premiums, and premiums on supplementary accident and sickness insurance. For programs supported by joint employer-employee contributions, only the employer payments are included. Also included are payments or allocations on all pension plans regardless of methods of administration, supplemental unemployment compensation plans, welfare plans, stock purchase plans in which the employer payment is not subject to withholding tax, and deferred profit sharing plans.

Value added by mining. This measure of mining activity is derived by subtracting the cost of supplies, minerals received for preparation, purchased machinery installed,

purchased fuel, purchased electricity, and contract work from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. This statistic avoids the duplication in value of shipments and receipts which results from the use of products of some establishments as supplies, energy sources, or materials by others. Moreover, it provides a measure of value added not only in mineral production but also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

Cost of supplies used, purchased machinery installed, etc.

Besides supplies used and purchased machinery installed, this cost includes fuels and electric energy used and contract work done by others for each establishment. It includes charges to both the current and capital accounts. It also includes the cost of items used during 1992 whether they were purchased, withdrawn from inventories, or received from other establishments of the company. For selected supplies and fuels and for electric energy, both quantity and cost data were requested. The cost data refer to direct charges actually paid or payable (after discounts) for items used during the year. Freight charges and other direct charges incurred by the establishment in acquiring the item are included. Companies whose records did not show actual amounts used were asked to approximate use by adding purchases (or receipts) during the year to beginning inventory and subtracting ending inventory. Separate figures were requested for (1) selected supplies used, minerals received for preparation, and purchased machinery installed; (2) electric energy purchased; (3) purchased fuels used for heat, power, or the generation of electricity; (4) contract work done by others; and (5) products bought and resold in the same condition. Supplies and equipment used in mine development, plant expansion, and capitalized repairs, which are chargeable to fixed assets accounts, are included in this item, as are supplies furnished without charge to contractors for use at the mining operation and supplies sold to employees for use at the establishment. Excluded are such costs as advertising, insurance, telephone, and research and consulting services of other establishments or such overhead costs as depreciation charges, rent, interest, and royalties.

Selected supplies used, minerals prepared, etc.

In addition to the total cost of supplies used, purchased machinery installed, etc., which every establishment was required to report, information also was collected on the consumption of major supplies used in mining. These inquiries were restricted to supplies which were important parts of the cost of production, exploration, and development of a particular industry and for which cost information was available. Table 7a contains information on specific supplies consumed. On report forms for most mineral industries (except the contract services and the crude petroleum and natural gas industries), a uniform inquiry

was included on minerals prepared at the reported establishments. Figures were obtained on crude minerals mined at the establishment (quantity), received from other establishments of the company or purchased from others (quantity and cost), and received for preparation on a custom or toll basis (quantity and estimated value). Establishments consuming less than a specified amount (usually \$25,000) were not required to report the cost of a supply. For small establishments for which administrative records were used, the cost of supplies was included in "not specified by kind." (See Summary of Findings for the importance of administrative records to any industry.)

Value of shipments and receipts. The amounts shown as value of shipments and receipts for each industry (tables 1 through 5), and for individual products or classes of products (table 6), are the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during 1992, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1992. Prepared material or concentrates includes preparation from ores mined at the same establishment, purchased, received from other operations of the same company, or received for milling on a custom or toll basis. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry, (2) the value of secondary products which are primary to other industries, (3) the receipts for contract work done for others, except custom milling, and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

Shipments of individual products. In the 1992 Census of Mineral Industries, information was collected on output for about 150 individual mineral products. In general, the shipments figures of the 1992 and 1987 minerals censuses were confined to separate totals for each crude and each prepared mineral. When shipments were significant, separate figures also were obtained on crude minerals going to preparation plants and those going to consumers.

Figures were collected on both quantity and value of shipments. Shipments includes commercial shipments and transfers of products to other operations of the same company. For products that are used to a significant extent within the same establishment for power or heat, and for minerals mined and prepared in the same establishment, total production figures or separate data on production for such uses were collected. Typically, production also was collected for products for which there was usually significant differences between total production and total shipments because of stock changes.

For service industries, the amount received or due for services performed during 1992 was collected as a measure of output. For mine operators who also perform services, the amount received for such services was added to the total value of products shipped to determine total value of shipments and receipts for each establishment.

Table 6 provides total shipments figures from all industries for each of the products primary to the industry covered.

Capital expenditures. This item covers expenditures made during the year for development and exploration of mineral properties, for new construction, and for purchased machinery chargeable to fixed assets accounts of the mineral establishment. They are the type for which depreciation, depletion, or Office of Minerals Exploration accounts are ordinarily maintained. Capital expenditures during 1992 were determined as "additions completed during the year plus construction in progress at the end of the year minus construction in progress at the beginning of the year." Reported capital expenditures include work done on contract, as well as by the mine forces. Expenditures for machinery and equipment include those made for replacement purposes, as well as those for additions to capacity. Excluded from these expenditures were costs of maintenance and repairs charged as current operating expense and expenditures for land and mineral rights.

Whenever applicable, separate figures were provided for expenditures for development and exploration of mineral property, construction of preparation plants and other construction, new machinery and equipment, used plant, and used equipment acquired from others.

Gross value of depreciable assets. Assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation costs). The data were collected for the beginning and end of the year. Assets at the beginning of the year plus new and used capital expenditures minus retirements should equal assets at the end of the year. For new construction

or other improvement projects in progress but not completed by the end of the year, the cumulative capital expenditures were included in the beginning- and end-of-year assets figures.

Retirements. This item represents the gross value of depreciable assets sold, retired, scrapped, destroyed, abandoned, etc., during 1992. The values shown are the acquisition costs of the retired assets. This item also includes the value of assets (at acquisition cost rather than current market value) transferred to other establishments of the same company.

Depreciation. This item shows the reduction in value of depreciable assets brought about through use, gradual obsolescence, or the effect of the elements (decay or corrosion) during the year. Included are charges against assets acquired or completed during the year.

Rental payments. This item consists of rental payments made to other companies for use of such depreciable assets as buildings, other structures, machinery, and equipment. It does not include payments made to the parent company or another subsidiary of the parent company for the use of buildings and equipment owned by the parent company or its subsidiary. The value of such company-owned assets is included in the gross value of depreciable assets.

Rented equipment is reported according to the type of lease negotiated with the lessor. If the lease qualified as an "operating lease" the periodic payments made to the producer or the lessor are reported in the rental section. However, if the leasing arrangement met the criteria set down by the Financial Accounting Standards Board for a "capital lease," the original cost or market value of the equipment or building is reported as a value of fixed assets and not as rental payments.

Current account expenditures. This item includes all expenses for mineral properties, exploration, and development charged to current accounts. This includes all supplies, machinery, equipment, parts, fuels, power, etc., used for development or exploration and charged to current operating expenses. Also included are royalty payments, acquisition costs for mineral land and rights which were not capitalized, and the cost of maintenance and repairs associated with exploration or development activity and charged to current accounts.

Inventories. This item includes inventories of mined or quarried products and supplies, parts, fuels, etc., at the beginning and end of the year. Included as mined or quarried products are stockpiles of products ready for shipment and stocks of raw products awaiting treatment or beneficiation. Beginning with the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census in which respondents were permitted to value their inventories using any generally accepted accounting method.

Fuels and electric energy used. This item includes the quantity and cost of fuels and electric energy used in mining. For most industries, separate quantity and cost figures are shown for purchased coal, distillate fuel oil, residual fuel oil, gas, gasoline, and electric energy, and a cost figure is shown for "other fuels" (see table 7b). Data also were obtained on the quantity of fuels and electric energy produced and consumed at the same establishment. These data are shown for coal, crude petroleum, and natural gas used at the producing establishments for heat and power, and for electric energy generated and used at the same mining operations. For electric energy, the quantity generated and used is approximated by subtracting the quantity of electric energy sold from the total quantity generated (excluding generating station use).

Appendix B.

Publication Program

1992 CENSUS OF MINERAL INDUSTRIES

Publications of the 1992 Census of Mineral Industries, containing data on establishments primarily engaged in the extraction of minerals, are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Preliminary Reports

Industry series—12 reports (MIC92-I-10A(P) to -14E(P))

Preliminary data from the 1992 census are issued in 12 separate reports covering 31 mineral industries. Preliminary summary data for the United States and States are released in one report.

Final Reports

Industry series—12 reports (MIC92-I-10A to -14E)

Each of the 12 reports provides information for an industry or a group of related industries (e.g., clay, ceramic, and refractory minerals). Final figures for the United States are shown for each of 31 mineral industries on quantity and value of products shipped and supplies used; inventories; quantity and cost of fuels and electric energy purchased and the quantities of fuels produced and consumed; capital expenditures; assets; rents; employment; depreciation, amortization, and depletion; payroll; hours worked; cost of purchased machinery; value added by mining; mineral development, and exploration costs; number of establishments; and number of companies. Comparative statistics for earlier years are included. Industry statistics are shown by State, type of operation, and size of establishment.

Geographic area series—9 reports (MIC92-A-1 to -9)

A separate report for each of the nine geographic divisions presents statistics for individual States and off-shore areas for two- and three-digit industry groups by type of operation and by county. Also, data are shown for

value of shipments; value added by mining; employment; payroll; hours worked; capital expenditures; cost of supplies, etc.; purchased machinery installed; and number of mining establishments, with comparative 1987 data on employment and value added by mining.

Subject series—2 reports (MIC92-S-1 and -2)

One of these reports is a general national-level summary; the other report contains detailed statistics on fuels and electric energy consumed by mineral industries.

Reference series—1 report (MC92-R-1)

The *Numerical List of Manufactured and Mineral Products* includes a description of the principal products and services published in the 1992 Censuses of Manufactures and Mineral Industries.

Electronic Media

All data included in the printed reports are available on compact disc—read only memory (CD-ROM). The CD-ROM's provide the same information found in the reports. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, financial, insurance, real estate, construction industries, manufactures, transportation, communications, utilities, enterprise statistics, minority-owned businesses, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Commonwealth of the Northern Mariana Islands. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Mineral Industries. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

Manufacturing and Construction Division prepared this report. **Barry A. Rappaport**, Assistant Chief for Construction and Mineral Censuses, was responsible for the overall planning, management, and coordination of the census of mineral industries. Planning and implementation were under the direction of **Patricia L. Horning**, Chief, Construction and Mineral Census Branch, assisted by **M. Susan Bucci**, Section Chief, with primary staff assistance by **Robert A. Wright**.

Brian Greenberg, Assistant Chief for Research and Methodology Programs, assisted by **Stacey Cole**, provided the mathematical and statistical techniques as well as the coverage operations.

Baruti A. Taylor, under the direction of **A. William Visnansky**, Chief, Special Reports Branch, performed overall coordination of the publication process. **Julius Smith, Jr.** and **Andrew W. Hait** provided primary staff assistance.

The Economic Planning and Coordination Division provided the computer processing procedures. **Shirin A. Ahmed**, Assistant Chief for Post Data Collection Processing, was responsible for editing and the analysts' interactive database review and correction system. Design and specifications were prepared under the supervision of **Dennis L. Wagner**, Chief, Post Collection Census Branch, assisted by **S. Mark Schmidt** and **Robert A. Rosati**.

The staff of the Data Preparation Division, **Judith N. Petty**, Chief, performed mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review.

The Geography Division staff developed geographic coding procedures and associated computer programs.

The Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, developed and coordinated the computer processing systems. **Martin S. Harahush**, Assistant Chief for Quinquennial Programs, was responsible for design and implementation of the computer systems. **Gary T. Sheridan**, Chief, Manufactures and Construction Branch, assisted by **Gerald S. Turnage**, supervised the preparation of the computer programs.

Computer Services Division, **Marvin D. Raines**, Chief, performed the computer processing.

The staff of the Administrative and Publications Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Cynthia G. Brooks** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-4680.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, financial, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Mineral Industries

GENERAL

This report, from the 1992 Census of Mineral Industries, is one of a series of 12 industry reports; each provides statistics for individual industries or groups of related industries. Additional separate reports will be issued for each geographic division showing statistics by State and for special subjects, such as fuels and electric energy consumed.

The introduction to the *General Summary* report discusses, at greater length, many of the subjects described in this introduction. For example, the *General Summary* text discusses the economic significance of the mining sector, the relation of value added by mining to value added by manufacture, some of the changes in statistical concepts over the history of the census, and the valuation problems arising from intracompany transfers between mining establishments, manufacturing plants, and sales offices and sales branches of a company.

SCOPE OF CENSUS AND DEFINITION OF MINERAL INDUSTRIES

The 1992 Census of Mineral Industries covers all establishments with one paid employee or more primarily engaged in mining as defined in the *1987 Standard Industrial Classification (SIC) Manual*¹. This is the system of industrial classification developed by experts on classification in Government and private industry under the guidance of the Office of Information and Regulatory Affairs, Office of Management and Budget. This classification system is used by Government agencies as well as many organizations outside the Government.

The SIC Manual defines mining in the broad sense to include the extraction of minerals occurring naturally: solids such as coal and ores, liquids such as crude petroleum, and gases such as natural gas. The term "mining" is used in the broad sense to include quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparations needed to make minerals marketable. Exploration is included as is the development of mineral properties. Services performed on a contract, fee, or other basis in the exploration and development of mineral properties are classified separately but within this division.

Mining operations are classified by industry on the basis of the principal mineral produced or, if there is no production, on the basis of the principal mineral for which exploration or development work is in progress. The recovery of material from culm banks, ore dumps, and other waste mineral piles is classified in the appropriate mining industry according to the mineral product recovered.

The crushing, grinding, or other treatment of certain earths, rocks, and other nonmetallic minerals not in conjunction with mining activities is not included in this division but is classified as manufacturing. Hauling and other transportation beyond the mine property and contract hauling (except out of open pits in conjunction with mining) also are excluded.

Mining operations carried on as secondary activities at manufacturing establishments (such as clay pits at clay products plants or sand and gravel operations at ready-mixed concrete plants) are not within the scope of this census. However, selected data (production workers' wages and hours; total cost of supplies, fuels, electric energy, and contract work; and quantity of production for mined products) on such mining activities have been obtained in the 1992 Census of Manufactures and are included in the mining reports. They are clearly specified wherever included.

ESTABLISHMENT BASIS OF REPORTING

The census of mineral industries covers each mining establishment of firms with one paid employee or more operating in the United States. A company operating more than one establishment is required to file a separate report for each location. A mineral establishment is defined as a single physical location where mineral operations are conducted.

For oil and gas field operations and for contract services, the basis for reporting is different from the "establishment" basis used for other types of mining. Firms operating oil and gas wells, drilling wells, or exploring for oil and gas for their own account were required to submit a separate report for each State or offshore area adjacent to a State in which it conducted such activities. Firms that performed contract services for oil and gas field operations or for mining establishments were required to submit one report covering all such activities in the United States and to include information on receipts for services and production-worker wages and hours, by State. These consolidated

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

reports were then allocated to State establishments based on the data reported at the State level. The 1992 figures for establishments include the summation of operations for each State allocated from these nationwide reports.

USE OF ADMINISTRATIVE RECORDS

From a mailout universe of about 28,500 mining establishments, approximately 11,000 small single-establishment companies were not mailed a questionnaire. For these establishments, some employment, payroll, and receipts data were obtained from the administrative records of other agencies. Selection of the small establishment non-mail cases was done on an industry-by-industry basis, and a variable cutoff was used to determine those establishments for which administrative records were to be used in place of a census report. This information was then used in conjunction with industry averages and other information to estimate the statistics for administrative-record and nonresponse establishments. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown. The value of shipments and receipts and cost of supplies were generally not distributed among specific products and supplies for these establishments, but were included in the product and supply "not specified by kind" categories. Overall, establishments for which administrative-record data were used accounted for less than 2 percent of total value of shipments and receipts.

The industry classification codes included in the administrative-record files were used for those establishments excused from filing census forms. Generally, these codes were assigned on the basis of brief descriptions of the general activity of the establishment. Where the description was incomplete, or where there were relatively fine lines of demarcation among industries or between mining and nonmining activities, the code assigned to an establishment could differ from that which would have been assigned on the basis of more complete product or activity information. Therefore, the total establishment count should be viewed as an approximate measure. The counts for establishments with 20 employees or more are far more reliable.

In the 1992 census, as in the 1987, 1982, 1977, and 1972 censuses, data for single-unit firms without paid employees were excluded. This exclusion had only a slight effect on industry aggregates for most industries. Data for firms without employees were included in the 1963, 1958, and 1954 censuses if they reported more than \$500 in (1) value of shipments and receipts, (2) cost of supplies and purchased machinery, or (3) capital expenditures.

AUXILIARIES

Statistics for employment and payroll for individual industries and industry groups also include employment and payroll figures for administrative offices, warehouses,

storage facilities, and other auxiliary establishments servicing mining establishments. As in previous censuses, respondents were asked to file separate reports (form ES-9200) for any separately operated auxiliary establishments. Classification of employment and payroll data at such auxiliary establishments was based on the mining establishments served.

INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

Each of the establishments covered in the census was classified in 1 of 31 mineral industries in accordance with the industry definitions in the 1987 SIC Manual. An industry is generally defined as a group of establishments producing the same product or closely related group of products. The resulting group of establishments must be significant in terms of its number, value added by mining, value of shipments and receipts, number of employees, and payroll. Application of these criteria led to the formulation of 31 mining industries, each assigned a four-digit code. The classification system also provides broader groups of industries, with 20 three-digit groups and 4 two-digit groups. Within industries, the system provides for seven-digit products and five-digit product classes. Products are considered primary to an industry if the first four digits of the product codes are the same as the industry code. Products whose first four code numbers differ from the industry code are called secondary products. To determine the industry classification of an establishment, the seven-digit products are grouped together according to the first four digits of the product code. The first four digits of the group of products with the largest value of production become the industry code for the establishment. (For mineral service industries, the classification is on the basis of receipts for services performed.)

In most industries, establishments making products falling into the same industry category use a variety of processes. Separate statistics are provided on the various types of operation. Whenever possible, separate figures are shown for establishments with mines only, mines with preparation plants, and preparation plants only. Separate figures are provided by type of mine (underground, open pit, and combination). Separate statistics also are provided on producing and nonproducing operations, an establishment being defined as nonproducing if no mineral products were shipped during the year.

Statistics usually are provided on the production of minerals mined and used in the same establishment for producing prepared minerals or used at the producing establishment for fuel.

Differences in the integration of production processes and types of operation should be considered when relating the general items (employment, payrolls, value added, etc.) to the product and material data.

VALUE OF SHIPMENTS FOR THE INDUSTRY COMPARED WITH VALUE OF PRODUCT SHIPMENTS

This report shows value of shipments and receipt data for industries and products. In tables 1 through 4, these data represent the total value of shipments and receipts of all establishments classified in a particular industry. The data include the shipments of the products classified in the industry (primary to the industry), products classified in other industries (secondary to the industry), and miscellaneous receipts (repair work, sale of scrap, research and development, installation receipts, and resales). Value of product shipments shown in table 6 represents the total value of all products shipped that are classified as primary to an industry and includes those that were shipped by all mining establishments regardless of their industry classification. Value of product shipments also may include some products shipped from mining operations associated with manufacturing establishments.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the data for an individual establishment or company. However, the number of establishments classified in a specific industry is not considered a disclosure; this information may be released even though other information is withheld.

The disclosure analysis for the industry statistics in tables 1 through 4 of this report is based on the total value of shipments and receipts. When the total value of shipments and receipts cannot be shown without disclosing information for individual companies, the complete line is suppressed except for capital expenditures. If capital expenditures alone is a disclosure, only total capital expenditures and cost of supplies statistics are suppressed. However, the suppressed data are included in higher level totals.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Mineral Industries may be requested. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications. Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6901.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

—	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in higher level totals.
(NA)	Not available.
(NC)	Not comparable.
(S)	Withheld because estimate did not meet publication standards.
(X)	Not applicable.
(Z)	Less than half the unit shown.
n.e.c.	Not elsewhere classified.
n.s.k.	Not specified by kind.
r	Revised.
SIC	Standard Industrial Classification.

Other abbreviations, such as lb, gal, yd, and bbl, are used in the customary sense.

Description of Industries and Summary of Findings

This report shows 1992 Census of Mineral Industries statistics for establishments classified in each of the following industries:

SIC code and title

1411	Dimension Stone
1422	Crushed and Broken Limestone
1423	Crushed and Broken Granite
1429	Crushed and Broken Stone, N.E.C.

The industry statistics (employment, payroll, value of shipments, cost of supplies, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments but also all secondary activities performed by the same establishments. This fact should be taken into account in comparing industry statistics (tables 1 through 4 and 7) with product statistics (table 6) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and the value of net shipments of primary products of the industry produced as secondary products by establishments classified in other industries.

Single-establishment companies with up to 20 employees (cutoff varied by industry) were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other Federal agencies. This information was used in conjunction with industry averages and other information to develop estimates for all statistics. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown.

Establishment data were tabulated based on industry definitions included in the *1987 Standard Industrial Classification (SIC) Manual*¹. Comparability for the product

classes and product codes that changed between the 1992 and 1987 censuses is shown in appendix B. This appendix presents, in tabular form, the linkage from 1992 to 1987, and 1987 to 1992.

All dollar figures included in this report are at prices current for the year specified and, therefore, unadjusted for changes in price levels. Consequently, when making comparisons to prior years, users should take into consideration the inflation that has occurred.

The Bureau of the Census statistics on products for these industries are not entirely comparable with product statistics for the same industries published by the Bureau of Mines or the Energy Information Administration. The differences that occur result primarily from differences in data collection methods, coverage, and objectives sought.

INDUSTRY 1411, DIMENSION STONE

This industry is made up of establishments primarily engaged in mining or quarrying dimension stone. Also included are establishments engaged in producing rough blocks and slabs. Establishments primarily engaged in mining dimension soapstone or in mining or quarrying and shaping grindstones, pulpstones, millstones, burrstones, and sharpening stones are classified in industry 1499, Miscellaneous Nonmetallic Minerals, Except Fuels. Establishments primarily engaged in dressing (shaping, polishing, or otherwise finishing) blocks and slabs are classified in manufacturing, Industry 3281, Cut Stone and Stone Products. Nepheline syenite mining operations are classified in Industry 1459, Clay, Ceramic and Refractory Minerals, Not Elsewhere Classified. Establishments classified in Industry 1411, Dimension Stone, represent quarries with or without dressing plants operated as part of the same establishment if the establishment was primarily shipping rough dimension stone.

In the 1992 Census of Mineral Industries, Industry 1411, Dimension Stone, had employment of 1.4 thousand. The employment figure was 8 percent above the 1.3 thousand reported in 1987. The total value of shipments and receipts for the industry was \$98.9 million in 1992. The value added by mining was \$76.7 million in 1992. Value added per employee was \$54.8 thousand in 1992; it was \$49.8 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$26.6 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

\$15.3 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$3.5 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 36 percent of the total value of shipments and receipts.

INDUSTRY 1422, CRUSHED AND BROKEN LIMESTONE

This industry is made up of establishments primarily engaged in mining or quarrying crushed and broken limestone, including related rocks, such as dolomite, cement rock, marl, travertine, and calcareous tufa. Also included are establishments primarily engaged in the grinding or pulverizing of limestone, but establishments primarily engaged in producing lime are classified in manufacturing, industry 3274.

In the 1992 Census of Mineral Industries, Industry 1422, Crushed and Broken Limestone, had employment of 27.7 thousand. The employment figure was 4 percent below the 28.9 thousand reported in 1987. The total value of shipments and receipts for the industry was \$3.2 billion in 1992. The value added by mining was \$2.3 billion in 1992. Value added per employee was \$81.9 thousand in 1992; it was \$72.4 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$1.2 billion, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$723.3 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$146.3 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 11 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 11 percent of the total value of shipments and receipts. Single establishment companies with 12 to 20 employees were mailed a short census form requesting summary data on employment, payroll, costs, capital expenditures, and products.

INDUSTRY 1423, CRUSHED AND BROKEN GRANITE

This industry is made up of establishments primarily engaged in mining or quarrying crushed and broken granite, including related rocks, such as gneiss, syenite, and diorite.

In the 1992 Census of Mineral Industries, Industry 1423, Crushed and Broken Granite, had employment of 6.1 thousand. The employment figure was 6 percent below the 6.5 thousand reported in 1987. The total value of shipments and receipts for the industry was \$895.3 million in 1992. The value added by mining was \$659.6 million in 1992. Value added per employee was \$108.1 thousand in 1992; it was \$107.1 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$305.3 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$211.6 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$25.5 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 16 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 11 percent of the total value of shipments and receipts.

INDUSTRY 1429, CRUSHED AND BROKEN STONE, N.E.C.

This industry is made up of establishments primarily engaged in mining or quarrying crushed and broken stone, not elsewhere classified, such as slate (including slate granules), marble, trap rock (basalt, diabase, and related rocks), sandstone (including quartzite and ganister), and various high lighted color volcanic rocks, mica schist, and mixed boulders.

In the 1992 Census of Mineral Industries, Industry 1429, Crushed and Broken Stone, N.E.C., had employment of 7.8 thousand. The employment figure was 6 percent below the 8.3 thousand reported in 1987. The total value of shipments and receipts for the industry was \$928.3 million in 1992. The value added by mining was \$691.0 million in 1992. Value added per employee was \$88.6 thousand in 1992; it was \$81.7 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$336.8 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$234.4 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$35.9 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 6 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 12 percent of the total value of shipments and receipts. Single-establishment companies with 7 to 20 employees were mailed a short census form requesting summary data on employment, payroll, costs, capital expenditures, and products.

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of the figures shown: E1–10 to 19 percent; E2–20 to 29 percent; E3–30 to 39 percent; E4–40 to 49 percent; E5–50 to 59 percent; E6–60 to 69 percent; E7–70 to 79 percent; E8–80 to 89 percent; E9–90 percent or more.

²States with 100 employees or more are shown. Some statistics are withheld to avoid disclosing data for individual companies. If employment is 100 or more, number of establishments is shown and employment-size range is indicated by one of the following symbols: C–100 to 249 employees; E–250 to 499 employees; F–500 to 999 employees; G–1,000 to 2,499 employees; H–2,500 to 4,999 employees; I–5,000 to 9,999 employees.

Table 3a. **Summary Statistics by Industry: 1992**

[For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Item	Dimension stone (SIC 1411)	Crushed and broken limestone (SIC 1422)	Crushed and broken granite (SIC 1423)	Crushed and broken stone, n.e.c. (SIC 1429)
Establishments during year ----- number..	166	1 432	264	446
With 0 to 19 employees ----- number..	149	1 010	138	332
With 20 to 99 employees ----- number..	16	390	121	106
With 100 employees or more ----- number..	1	32	5	8
All employees:				
Average for year ----- 1,000..	1.4	27.7	6.1	7.8
Payroll for year ----- mil dol..	30.5	784.8	184.6	237.5
Production, development, and exploration workers:				
Average for year ----- 1,000..	1.1	20.4	4.9	5.6
March ----- 1,000..	1.1	19.4	4.8	5.3
May ----- 1,000..	1.2	21.0	5.0	5.8
August ----- 1,000..	1.2	21.5	5.0	5.9
November ----- 1,000..	1.1	19.9	4.7	5.4
Hours ----- millions..	2.1	44.4	10.8	11.8
Wages ----- mil dol..	21.4	532.3	137.4	157.5
Supplemental labor costs not included in payroll ----- mil dol..	7.8	191.2	44.5	57.8
Legally required expenditures, including Social Security contributions ----- mil dol..	3.5	85.2	17.6	27.3
Payments for voluntary programs ----- mil dol..	4.3	106.0	27.0	30.5
Value added by mining ----- mil dol..	76.7	2 270.0	659.6	691.0
Cost of supplies ----- mil dol..	26.6	1 164.2	305.3	336.0
Supplies used, minerals received, and purchased machinery installed ----- mil dol..	15.3	723.3	211.6	234.4
Resales ----- mil dol..	2.8	31.2	1.8	6.3
Purchased fuels consumed ----- mil dol..	3.5	146.3	25.5	35.9
Purchased electric energy:				
Quantity ----- mil kWh..	43.0	2 332.8	580.0	626.6
Cost ----- mil dol..	2.7	143.7	35.9	39.4
Electric energy generated less sold ----- mil kWh..	(D)	13.2	(D)	1.5
Contract work ----- mil dol..	2.4	119.9	30.6	19.9
Cost of purchased communication services ----- mil dol..	.2	6.6	1.6	1.7
Value of shipments and receipts ----- mil dol..	98.9	3 178.3	895.3	928.3
Value of resales ----- mil dol..	3.1	34.3	2.0	6.7
Inventories, end of 1991 ----- mil dol..	15.1	521.0	172.8	107.1
Mined or quarried products ----- mil dol..	11.7	458.5	160.4	91.8
Supplies, parts, fuels, etc. ----- mil dol..	3.4	62.5	12.5	15.3
Inventories, end of 1992 ----- mil dol..	15.6	531.5	189.5	113.9
Mined or quarried products ----- mil dol..	12.7	467.5	177.1	98.2
Supplies, parts, fuels, etc. ----- mil dol..	3.0	64.1	12.4	15.6
Gross book value of depreciable assets (usually original cost) at beginning of year ----- mil dol..	71.7	4 104.3	1 530.5	1 168.2
Buildings and other structures, except land ----- mil dol..	7.7	289.8	66.4	142.9
Machinery and equipment ----- mil dol..	50.3	3 260.5	1 075.9	821.3
Mineral exploration and development ----- mil dol..	4.0	77.3	32.9	6.3
Mineral land and rights ----- mil dol..	9.6	476.7	355.3	197.7
Capital expenditures during year (except land and mineral rights) ----- mil dol..	4.5	255.9	69.6	98.6
New capital expenditures during year ----- mil dol..	2.8	180.4	57.0	85.0
Buildings and other structures, except land ----- mil dol..	.1	9.7	3.5	6.1
Machinery and equipment ----- mil dol..	2.7	170.7	53.4	78.9
Used capital expenditures during year ----- mil dol..	(D)	69.8	(D)	13.6
Buildings and other structures, except land ----- mil dol..	(D)	2.4	(D)	.2
Machinery and equipment ----- mil dol..	1.4	67.4	9.9	13.4
Mineral exploration and development ----- mil dol..	(D)	5.7	(D)	(Z)
Capitalized mineral land and rights ----- mil dol..	.2	19.7	(D)	3.6
Deductions from depreciable assets during year ----- mil dol..	3.8	216.6	56.2	44.5
Buildings and other structures, except land ----- mil dol..	(D)	10.3	(D)	4.6
Machinery and equipment ----- mil dol..	3.1	189.9	34.3	37.2
Mineral exploration and development ----- mil dol..	(D)	4.5	(D)	(Z)
Mineral land and rights ----- mil dol..	.4	11.9	(D)	2.6
Gross book value of depreciable assets at end of year ----- mil dol..	72.6	4 163.4	1 545.1	1 225.9
Buildings and other structures, except land ----- mil dol..	7.5	291.6	66.5	144.6
Machinery and equipment ----- mil dol..	51.3	3 308.7	1 104.9	876.4
Mineral exploration and development ----- mil dol..	4.3	78.5	34.5	6.3
Mineral land and rights ----- mil dol..	9.5	484.5	339.2	198.7
Depreciation and depletion charges for year ----- mil dol..	5.8	317.4	101.5	93.6
Buildings and other structures, except land ----- mil dol..	.5	18.4	4.6	8.4
Machinery and equipment ----- mil dol..	4.3	277.3	84.9	77.2
Mineral exploration and development ----- mil dol..	.2	4.0	2.2	.7
Mineral land and rights ----- mil dol..	.9	17.7	9.8	7.2
Rental payments during year ----- mil dol..	1.6	36.7	11.0	10.2
Buildings and other structures, except land ----- mil dol..	.1	5.4	.3	1.1
Machinery and equipment ----- mil dol..	1.5	31.3	10.6	9.1
Lease rents ----- mil dol..	(Z)	9.2	1.7	2.0
Expensed mineral exploration, development, land, and rights ----- mil dol..	.8	41.9	15.1	17.7
Mineral exploration and development ----- mil dol..	(D)	20.0	6.1	11.3
Mineral land and rights ----- mil dol..	(D)	21.9	9.0	6.4

Table 3b. Industry Statistics by Industry and Type of Operation: 1992 and 1987

[For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Industry and type of operation	1992											1987	
	Establishments during year		All employees		Production, development, and exploration workers			Value added by mining (million dollars)	Cost of supplies used, purchased machinery installed, etc. (million dollars)	Value of shipments and receipts (million dollars)	Capital expenditures (million dollars)	All employees (1,000)	Value added by mining (million dollars)
	Total (number)	With 20 employees or more (number)	Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)

Note: Data shown as a (D) are included in underscored figures above.

¹Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 percent or more.

²Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate data shown for these small establishments. Data are also included in respective size classes shown.

Table 5. Industry–Product Analysis—Summary of Industry Shipments and Receipts and Net Shipments of Primary Products: 1992 and 1987

[Million dollars. An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as resales or contract work. Columns A–E show this product pattern for an industry. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F–H. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry and year	Value of shipments and receipts					Value of net shipments of primary products or services		
		Total	Primary products	Secondary products	Receipts for services	Products purchased and resold without further processing	Total produced in all industries	Produced in this industry	Produced in other industries
		A	B	C	D	E	F	G	H
1411	Dimension stone ----- 1992-- ----- 1987--	98.9 85.8	91.6 80.8	(D) 3.9	(D) --	3.1 1.1	(D) (D)	(D) (D)	(D) (D)
1422	Crushed and broken limestone ----- 1992-- ----- 1987--	3 178.3 2 914.4	2 929.7 2 702.7	184.0 152.8	30.3 24.9	34.3 34.0	13 060.6 12 824.7	12 891.2 12 664.6	169.4 160.1
1423	Crushed and broken granite ----- 1992-- ----- 1987--	895.3 922.7	882.1 899.0	9.9 20.6	1.2 .7	2.0 2.3	1899.5 1914.5	1890.7 1897.7	18.8 16.8
1429	Crushed and broken stone, n.e.c. ----- 1992-- ----- 1987--	928.3 931.0	854.2 875.0	59.5 49.8	7.9 2.0	6.7 4.2	1945.5 1980.9	1848.9 1872.6	96.6 108.3

¹Represents net shipments obtained by subtracting minerals received for preparation from gross shipments.

Table 6a. Products or Services: 1992 and 1987

[Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Product code	Product	1992 product shipments		1987 product shipments	
		Quantity	Value (million dollars)	Quantity	Value (million dollars)
1411--	DIMENSION STONE

MINERAL INDUSTRIES—INDUSTRY SERIES

Table 6b. **Product Classes—Value of Shipments by All Producers for Specified States: 1992 and 1987**

[Million dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than \$1 million in product class shipments or they disclose data for individual companies in 1992. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Note: States with less than 50 thousand hours for employees engaged in production, development, and exploration work are not shown.

Appendix A. Explanation of Terms

Employment and related items. The report forms requested separate information on production, development, and exploration workers for a specific payroll period within each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees. This item includes all full-time and part-time employees on the payrolls of mining establishments during any part of the pay period which included the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Also included are employees working for miners paid on a per ton, car, or yard basis. Excluded are employees at the mine but on the payroll of another employer (such as employees of contractors) and employees at company stores, boardinghouses, bunkhouses, and recreational centers. Also excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Production, development, and exploration workers. This item includes employees (up through the working-supervisor level) engaged in manual work (using tools, operating machines, hauling materials, loading and hauling products out of the mine in mine cars or trucks, and caring for mines, plants, mills, shops, or yards). Included are exploration work, mine development, storage, shipping, maintenance, repair, janitorial, and guard services, auxiliary production for use at establishments (such as power plant), recordkeeping, and other services closely associated with these production and development operations at the establishment covered by the report. Gang and straw bosses and supervisors who performed manual labor are included, as are employees paid on either a time- or piece-rate basis. Also included are miners paid on a per ton, car, or yard basis and persons engaged by them and paid out of the total amount received by these miners. In addition, other employees at the establishment but not on its payroll are included if paid directly through its own employees, such as superintendents and supervisors. The payments received by these types of employees are included as part of the establishments payroll. Employees above the working-supervisor level are excluded from this category.

All other employees. This item covers nonproduction employees of the establishment including those engaged in the following activities: supervision above the working-supervisor level, sales, highway trucking (by employees not entering mines or pits), advertising, credit, collection, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria and medical), professional (such as engineers and geologists), and technical activities. Also included are employees on the payroll of the establishment engaged in the construction of major additions or alterations to the plant and utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified as production, development, and exploration workers.)

Separately operated auxiliary establishments employees. This item includes employment at separate central administrative offices or auxiliary units of multiestablishment companies and at those offices or units servicing more than one establishment during the payroll period which included March 12. Establishments are classified on the basis of the industry or principal industry served. Employees at an office located at or near the mining establishment are usually included in the mine report.

All employees, average for year. The 1992 census report form requested employment figures for production, development, and exploration workers for four selected pay periods (mid-March, May, August, and November). For all other employees, only a mid-March figure was requested. The annual average is an average of the four monthly figures for production, development, and exploration workers plus the March figure for all other employees. This approach was used to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods closely approximates, for most industries, the average employment for the year that would be obtained from 12 monthly pay periods.

Payroll. This item includes the gross earnings of all employees on the payroll of mining establishments paid in the calendar year 1992. It includes all forms of compensation such as salaries, wages, commissions, payments received on a ton, car, or yard basis, dismissal pay,

bonuses, vacation and sick leave pay, employee contributions to pension plans (such as 401(K) plan), and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to proprietors or partners of unincorporated concerns, and payments to members of Armed Forces and pensioners carried on the active payroll of mining establishments. Also excluded are royalty payments to unions and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production, development, and exploration work but charged to employees and deducted from their wages.

As in the case of employment and establishment figures, the annual payrolls of separate auxiliary establishments of multiestablishment companies are included in the totals for individual industries and for States.

Production-, development-, and exploration-worker hours.

This item represents all hours that production, development, and exploration workers worked, both on active days during which there was production or development work and on inactive days when only security guards, inspectors, repair persons, and other maintenance persons were on duty. It includes all hours worked or paid for at the mining operations, except hours paid for vacations, holidays, or sick leave, when the employee was not at the establishment. Included are actual overtime hours, not straight time equivalent hours. Hours of working proprietors or partners and employees of contractors are excluded.

Supplemental labor costs. This item represents employer's cost for fringe benefits not included in payrolls.

Legally required expenditures, including Social Security contributions. This cost includes employer contributions for all programs required under Federal and State legislation, such as Federal Old Age and Survivors' Insurance, unemployment compensation, and worker's compensation. Also included are legally required State temporary disability payments.

Payments for voluntary programs. Included in this cost are payments resulting from union negotiated contracts and all employer payments of insurance premiums on hospital and medical plans, life insurance premiums, and premiums on supplementary accident and sickness insurance. For programs supported by joint employer-employee contributions, only the employer payments are included. Also included are payments or allocations on all pension plans regardless of methods of administration, supplemental unemployment compensation plans, welfare plans, stock purchase plans in which the employer payment is not subject to withholding tax, and deferred profit sharing plans.

Value added by mining. This measure of mining activity is derived by subtracting the cost of supplies, minerals received for preparation, purchased machinery installed,

purchased fuel, purchased electricity, and contract work from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. This statistic avoids the duplication in value of shipments and receipts which results from the use of products of some establishments as supplies, energy sources, or materials by others. Moreover, it provides a measure of value added not only in mineral production but also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

Cost of supplies used, purchased machinery installed, etc.

Besides supplies used and purchased machinery installed, this cost includes fuels and electric energy used and contract work done by others for each establishment. It includes charges to both the current and capital accounts. It also includes the cost of items used during 1992 whether they were purchased, withdrawn from inventories, or received from other establishments of the company. For selected supplies and fuels and for electric energy, both quantity and cost data were requested. The cost data refer to direct charges actually paid or payable (after discounts) for items used during the year. Freight charges and other direct charges incurred by the establishment in acquiring the item are included. Companies whose records did not show actual amounts used were asked to approximate use by adding purchases (or receipts) during the year to beginning inventory and subtracting ending inventory. Separate figures were requested for (1) selected supplies used, minerals received for preparation, and purchased machinery installed; (2) electric energy purchased; (3) purchased fuels used for heat, power, or the generation of electricity; (4) contract work done by others; and (5) products bought and resold in the same condition. Supplies and equipment used in mine development, plant expansion, and capitalized repairs, which are chargeable to fixed assets accounts, are included in this item, as are supplies furnished without charge to contractors for use at the mining operation and supplies sold to employees for use at the establishment. Excluded are such costs as advertising, insurance, telephone, and research and consulting services of other establishments or such overhead costs as depreciation charges, rent, interest, and royalties.

Selected supplies used, minerals prepared, etc.

In addition to the total cost of supplies used, purchased machinery installed, etc., which every establishment was required to report, information also was collected on the consumption of major supplies used in mining. These inquiries were restricted to supplies which were important parts of the cost of production, exploration, and development of a particular industry and for which cost information was available. Table 7a contains information on specific supplies consumed. On report forms for most mineral industries (except the contract services and the crude petroleum and natural gas industries), a uniform inquiry

was included on minerals prepared at the reported establishments. Figures were obtained on crude minerals mined at the establishment (quantity), received from other establishments of the company or purchased from others (quantity and cost), and received for preparation on a custom or toll basis (quantity and estimated value). Establishments consuming less than a specified amount (usually \$25,000) were not required to report the cost of a supply. For small establishments for which administrative records were used, the cost of supplies was included in "not specified by kind." (See Summary of Findings for the importance of administrative records to any industry.)

Value of shipments and receipts. The amounts shown as value of shipments and receipts for each industry (tables 1 through 5), and for individual products or classes of products (table 6), are the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during 1992, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1992. Prepared material or concentrates includes preparation from ores mined at the same establishment, purchased, received from other operations of the same company, or received for milling on a custom or toll basis. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry, (2) the value of secondary products which are primary to other industries, (3) the receipts for contract work done for others, except custom milling, and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

Shipments of individual products. In the 1992 Census of Mineral Industries, information was collected on output for about 150 individual mineral products. In general, the shipments figures of the 1992 and 1987 minerals censuses were confined to separate totals for each crude and each prepared mineral. When shipments were significant, separate figures also were obtained on crude minerals going to preparation plants and those going to consumers.

Figures were collected on both quantity and value of shipments. Shipments includes commercial shipments and transfers of products to other operations of the same company. For products that are used to a significant extent within the same establishment for power or heat, and for minerals mined and prepared in the same establishment, total production figures or separate data on production for such uses were collected. Typically, production also was collected for products for which there was usually significant differences between total production and total shipments because of stock changes.

For service industries, the amount received or due for services performed during 1992 was collected as a measure of output. For mine operators who also perform services, the amount received for such services was added to the total value of products shipped to determine total value of shipments and receipts for each establishment.

Table 6 provides total shipments figures from all industries for each of the products primary to the industry covered.

Capital expenditures. This item covers expenditures made during the year for development and exploration of mineral properties, for new construction, and for purchased machinery chargeable to fixed assets accounts of the mineral establishment. They are the type for which depreciation, depletion, or Office of Minerals Exploration accounts are ordinarily maintained. Capital expenditures during 1992 were determined as "additions completed during the year plus construction in progress at the end of the year minus construction in progress at the beginning of the year." Reported capital expenditures include work done on contract, as well as by the mine forces. Expenditures for machinery and equipment include those made for replacement purposes, as well as those for additions to capacity. Excluded from these expenditures were costs of maintenance and repairs charged as current operating expense and expenditures for land and mineral rights.

Whenever applicable, separate figures were provided for expenditures for development and exploration of mineral property, construction of preparation plants and other construction, new machinery and equipment, used plant, and used equipment acquired from others.

Gross value of depreciable assets. Assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation costs). The data were collected for the beginning and end of the year. Assets at the beginning of the year plus new and used capital expenditures minus retirements should equal assets at the end of the year. For new construction

or other improvement projects in progress but not completed by the end of the year, the cumulative capital expenditures were included in the beginning- and end-of-year assets figures.

Retirements. This item represents the gross value of depreciable assets sold, retired, scrapped, destroyed, abandoned, etc., during 1992. The values shown are the acquisition costs of the retired assets. This item also includes the value of assets (at acquisition cost rather than current market value) transferred to other establishments of the same company.

Depreciation. This item shows the reduction in value of depreciable assets brought about through use, gradual obsolescence, or the effect of the elements (decay or corrosion) during the year. Included are charges against assets acquired or completed during the year.

Rental payments. This item consists of rental payments made to other companies for use of such depreciable assets as buildings, other structures, machinery, and equipment. It does not include payments made to the parent company or another subsidiary of the parent company for the use of buildings and equipment owned by the parent company or its subsidiary. The value of such company-owned assets is included in the gross value of depreciable assets.

Rented equipment is reported according to the type of lease negotiated with the lessor. If the lease qualified as an "operating lease" the periodic payments made to the producer or the lessor are reported in the rental section. However, if the leasing arrangement met the criteria set down by the Financial Accounting Standards Board for a "capital lease," the original cost or market value of the equipment or building is reported as a value of fixed assets and not as rental payments.

Current account expenditures. This item includes all expenses for mineral properties, exploration, and development charged to current accounts. This includes all supplies, machinery, equipment, parts, fuels, power, etc., used for development or exploration and charged to current operating expenses. Also included are royalty payments, acquisition costs for mineral land and rights which were not capitalized, and the cost of maintenance and repairs associated with exploration or development activity and charged to current accounts.

Inventories. This item includes inventories of mined or quarried products and supplies, parts, fuels, etc., at the beginning and end of the year. Included as mined or quarried products are stockpiles of products ready for shipment and stocks of raw products awaiting treatment or beneficiation. Beginning with the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census in which respondents were permitted to value their inventories using any generally accepted accounting method.

Fuels and electric energy used. This item includes the quantity and cost of fuels and electric energy used in mining. For most industries, separate quantity and cost figures are shown for purchased coal, distillate fuel oil, residual fuel oil, gas, gasoline, and electric energy, and a cost figure is shown for "other fuels" (see table 7b). Data also were obtained on the quantity of fuels and electric energy produced and consumed at the same establishment. These data are shown for coal, crude petroleum, and natural gas used at the producing establishments for heat and power, and for electric energy generated and used at the same mining operations. For electric energy, the quantity generated and used is approximated by subtracting the quantity of electric energy sold from the total quantity generated (excluding generating station use).

Appendix B.

Publication Program

1992 CENSUS OF MINERAL INDUSTRIES

Publications of the 1992 Census of Mineral Industries, containing data on establishments primarily engaged in the extraction of minerals, are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Preliminary Reports

Industry series—12 reports (MIC92-I-10A(P) to -14E(P))

Preliminary data from the 1992 census are issued in 12 separate reports covering 31 mineral industries. Preliminary summary data for the United States and States are released in one report.

Final Reports

Industry series—12 reports (MIC92-I-10A to -14E)

Each of the 12 reports provides information for an industry or a group of related industries (e.g., clay, ceramic, and refractory minerals). Final figures for the United States are shown for each of 31 mineral industries on quantity and value of products shipped and supplies used; inventories; quantity and cost of fuels and electric energy purchased and the quantities of fuels produced and consumed; capital expenditures; assets; rents; employment; depreciation, amortization, and depletion; payroll; hours worked; cost of purchased machinery; value added by mining; mineral development, and exploration costs; number of establishments; and number of companies. Comparative statistics for earlier years are included. Industry statistics are shown by State, type of operation, and size of establishment.

Geographic area series—9 reports (MIC92-A-1 to -9)

A separate report for each of the nine geographic divisions presents statistics for individual States and off-shore areas for two- and three-digit industry groups by type of operation and by county. Also, data are shown for

value of shipments; value added by mining; employment; payroll; hours worked; capital expenditures; cost of supplies, etc.; purchased machinery installed; and number of mining establishments, with comparative 1987 data on employment and value added by mining.

Subject series—2 reports (MIC92-S-1 and -2)

One of these reports is a general national-level summary; the other report contains detailed statistics on fuels and electric energy consumed by mineral industries.

Reference series—1 report (MC92-R-1)

The *Numerical List of Manufactured and Mineral Products* includes a description of the principal products and services published in the 1992 Censuses of Manufactures and Mineral Industries.

Electronic Media

All data included in the printed reports are available on compact disc—read only memory (CD-ROM). The CD-ROM's provide the same information found in the reports. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, financial, insurance, real estate, construction industries, manufactures, transportation, communications, utilities, enterprise statistics, minority-owned businesses, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Commonwealth of the Northern Mariana Islands. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Mineral Industries. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

Manufacturing and Construction Division prepared this report. **Barry A. Rappaport**, Assistant Chief for Construction and Mineral Censuses, was responsible for the overall planning, management, and coordination of the census of mineral industries. Planning and implementation were under the direction of **Patricia L. Horning**, Chief, Construction and Mineral Census Branch, assisted by **M. Susan Bucci**, Section Chief, with primary staff assistance by **Robert A. Wright**.

Brian Greenberg, Assistant Chief for Research and Methodology Programs, assisted by **Stacey Cole**, provided the mathematical and statistical techniques as well as the coverage operations.

Baruti A. Taylor, under the direction of **A. William Visnansky**, Chief, Special Reports Branch, performed overall coordination of the publication process. **Julius Smith, Jr.** and **Andrew W. Hait** provided primary staff assistance.

The Economic Planning and Coordination Division provided the computer processing procedures. **Shirin A. Ahmed**, Assistant Chief for Post Data Collection Processing, was responsible for editing and the analysts' interactive database review and correction system. Design and specifications were prepared under the supervision of **Dennis L. Wagner**, Chief, Post Collection Census Branch, assisted by **S. Mark Schmidt** and **Robert A. Rosati**.

The staff of the Data Preparation Division, **Judith N. Petty**, Acting Chief, performed mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review.

The Geography Division staff developed geographic coding procedures and associated computer programs.

The Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, developed and coordinated the computer processing systems. **Martin S. Harahush**, Assistant Chief for Quinquennial Programs, was responsible for design and implementation of the computer systems. **Gary T. Sheridan**, Chief, Manufactures and Construction Branch, assisted by **Gerald S. Turnage**, supervised the preparation of the computer programs.

Computer Services Division, **Marvin D. Raines**, Chief, performed the computer processing.

The staff of the Administrative and Publications Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Cynthia G. Brooks** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-4680.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, financial, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Mineral Industries

GENERAL

This report, from the 1992 Census of Mineral Industries, is one of a series of 12 industry reports; each provides statistics for individual industries or groups of related industries. Additional separate reports will be issued for each geographic division showing statistics by State and for special subjects, such as fuels and electric energy consumed.

The introduction to the *General Summary* report discusses, at greater length, many of the subjects described in this introduction. For example, the *General Summary* text discusses the economic significance of the mining sector, the relation of value added by mining to value added by manufacture, some of the changes in statistical concepts over the history of the census, and the valuation problems arising from intracompany transfers between mining establishments, manufacturing plants, and sales offices and sales branches of a company.

SCOPE OF CENSUS AND DEFINITION OF MINERAL INDUSTRIES

The 1992 Census of Mineral Industries covers all establishments with one paid employee or more primarily engaged in mining as defined in the *1987 Standard Industrial Classification (SIC) Manual*¹. This is the system of industrial classification developed by experts on classification in Government and private industry under the guidance of the Office of Information and Regulatory Affairs, Office of Management and Budget. This classification system is used by Government agencies as well as many organizations outside the Government.

The SIC Manual defines mining in the broad sense to include the extraction of minerals occurring naturally: solids such as coal and ores, liquids such as crude petroleum, and gases such as natural gas. The term "mining" is used in the broad sense to include quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparations needed to make minerals marketable. Exploration is included as is the development of mineral properties. Services performed on a contract, fee, or other basis in the exploration and development of mineral properties are classified separately but within this division.

Mining operations are classified by industry on the basis of the principal mineral produced or, if there is no production, on the basis of the principal mineral for which exploration or development work is in progress. The recovery of material from culm banks, ore dumps, and other waste mineral piles is classified in the appropriate mining industry according to the mineral product recovered.

The crushing, grinding, or other treatment of certain earths, rocks, and other nonmetallic minerals not in conjunction with mining activities is not included in this division but is classified as manufacturing. Hauling and other transportation beyond the mine property and contract hauling (except out of open pits in conjunction with mining) also are excluded.

Mining operations carried on as secondary activities at manufacturing establishments (such as clay pits at clay products plants or sand and gravel operations at ready-mixed concrete plants) are not within the scope of this census. However, selected data (production workers' wages and hours; total cost of supplies, fuels, electric energy, and contract work; and quantity of production for mined products) on such mining activities have been obtained in the 1992 Census of Manufactures and are included in the mining reports. They are clearly specified wherever included.

ESTABLISHMENT BASIS OF REPORTING

The census of mineral industries covers each mining establishment of firms with one paid employee or more operating in the United States. A company operating more than one establishment is required to file a separate report for each location. A mineral establishment is defined as a single physical location where mineral operations are conducted.

For oil and gas field operations and for contract services, the basis for reporting is different from the "establishment" basis used for other types of mining. Firms operating oil and gas wells, drilling wells, or exploring for oil and gas for their own account were required to submit a separate report for each State or offshore area adjacent to a State in which it conducted such activities. Firms that performed contract services for oil and gas field operations or for mining establishments were required to submit one report covering all such activities in the United States and to include information on receipts for services and production-worker wages and hours, by State. These consolidated

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

reports were then allocated to State establishments based on the data reported at the State level. The 1992 figures for establishments include the summation of operations for each State allocated from these nationwide reports.

USE OF ADMINISTRATIVE RECORDS

From a mailout universe of about 28,500 mining establishments, approximately 11,000 small single-establishment companies were not mailed a questionnaire. For these establishments, some employment, payroll, and receipts data were obtained from the administrative records of other agencies. Selection of the small establishment non-mail cases was done on an industry-by-industry basis, and a variable cutoff was used to determine those establishments for which administrative records were to be used in place of a census report. This information was then used in conjunction with industry averages and other information to estimate the statistics for administrative-record and nonresponse establishments. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown. The value of shipments and receipts and cost of supplies were generally not distributed among specific products and supplies for these establishments, but were included in the product and supply "not specified by kind" categories. Overall, establishments for which administrative-record data were used accounted for less than 2 percent of total value of shipments and receipts.

The industry classification codes included in the administrative-record files were used for those establishments excused from filing census forms. Generally, these codes were assigned on the basis of brief descriptions of the general activity of the establishment. Where the description was incomplete, or where there were relatively fine lines of demarcation among industries or between mining and nonmining activities, the code assigned to an establishment could differ from that which would have been assigned on the basis of more complete product or activity information. Therefore, the total establishment count should be viewed as an approximate measure. The counts for establishments with 20 employees or more are far more reliable.

In the 1992 census, as in the 1987, 1982, 1977, and 1972 censuses, data for single-unit firms without paid employees were excluded. This exclusion had only a slight effect on industry aggregates for most industries. Data for firms without employees were included in the 1963, 1958, and 1954 censuses if they reported more than \$500 in (1) value of shipments and receipts, (2) cost of supplies and purchased machinery, or (3) capital expenditures.

AUXILIARIES

Statistics for employment and payroll for individual industries and industry groups also include employment and payroll figures for administrative offices, warehouses,

storage facilities, and other auxiliary establishments servicing mining establishments. As in previous censuses, respondents were asked to file separate reports (form ES-9200) for any separately operated auxiliary establishments. Classification of employment and payroll data at such auxiliary establishments was based on the mining establishments served.

INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

Each of the establishments covered in the census was classified in 1 of 31 mineral industries in accordance with the industry definitions in the 1987 SIC Manual. An industry is generally defined as a group of establishments producing the same product or closely related group of products. The resulting group of establishments must be significant in terms of its number, value added by mining, value of shipments and receipts, number of employees, and payroll. Application of these criteria led to the formulation of 31 mining industries, each assigned a four-digit code. The classification system also provides broader groups of industries, with 20 three-digit groups and 4 two-digit groups. Within industries, the system provides for seven-digit products and five-digit product classes. Products are considered primary to an industry if the first four digits of the product codes are the same as the industry code. Products whose first four code numbers differ from the industry code are called secondary products. To determine the industry classification of an establishment, the seven-digit products are grouped together according to the first four digits of the product code. The first four digits of the group of products with the largest value of production become the industry code for the establishment. (For mineral service industries, the classification is on the basis of receipts for services performed.)

In most industries, establishments making products falling into the same industry category use a variety of processes. Separate statistics are provided on the various types of operation. Whenever possible, separate figures are shown for establishments with mines only, mines with preparation plants, and preparation plants only. Separate figures are provided by type of mine (underground, open pit, and combination). Separate statistics also are provided on producing and nonproducing operations, an establishment being defined as nonproducing if no mineral products were shipped during the year.

Statistics usually are provided on the production of minerals mined and used in the same establishment for producing prepared minerals or used at the producing establishment for fuel.

Differences in the integration of production processes and types of operation should be considered when relating the general items (employment, payrolls, value added, etc.) to the product and material data.

VALUE OF SHIPMENTS FOR THE INDUSTRY COMPARED WITH VALUE OF PRODUCT SHIPMENTS

This report shows value of shipments and receipt data for industries and products. In tables 1 through 4, these data represent the total value of shipments and receipts of all establishments classified in a particular industry. The data include the shipments of the products classified in the industry (primary to the industry), products classified in other industries (secondary to the industry), and miscellaneous receipts (repair work, sale of scrap, research and development, installation receipts, and resales). Value of product shipments shown in table 6 represents the total value of all products shipped that are classified as primary to an industry and includes those that were shipped by all mining establishments regardless of their industry classification. Value of product shipments also may include some products shipped from mining operations associated with manufacturing establishments.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the data for an individual establishment or company. However, the number of establishments classified in a specific industry is not considered a disclosure; this information may be released even though other information is withheld.

The disclosure analysis for the industry statistics in tables 1 through 4 of this report is based on the total value of shipments and receipts. When the total value of shipments and receipts cannot be shown without disclosing information for individual companies, the complete line is suppressed except for capital expenditures. If capital expenditures alone is a disclosure, only total capital expenditures and cost of supplies statistics are suppressed. However, the suppressed data are included in higher level totals.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Mineral Industries may be requested. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications. Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6901.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

—	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in higher level totals.
(NA)	Not available.
(NC)	Not comparable.
(S)	Withheld because estimate did not meet publication standards.
(X)	Not applicable.
(Z)	Less than half the unit shown.
n.e.c.	Not elsewhere classified.
n.s.k.	Not specified by kind.
r	Revised.
SIC	Standard Industrial Classification.

Other abbreviations, such as lb, gal, yd, and bbl, are used in the customary sense.

Description of Industries and Summary of Findings

This report shows 1992 Census of Mineral Industries statistics for establishments classified in each of the following industries:

SIC code and title

1442	Construction Sand and Gravel
1446	Industrial Sand

The industry statistics (employment, payroll, value of shipments, cost of supplies, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments but also all secondary activities performed by the same establishments. This fact should be taken into account in comparing industry statistics (tables 1 through 4 and 7) with product statistics (table 6) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and the value of net shipments of primary products of the industry produced as secondary products by establishments classified in other industries.

Single-establishment companies with up to 20 employees (cutoff varied by industry) were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other Federal agencies. This information was used in conjunction with industry averages and other information to develop estimates for all statistics. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown.

Establishment data were tabulated based on industry definitions included in the 1987 *Standard Industrial Classification (SIC) Manual*¹. Comparability for the product classes and product codes that changed between the 1992 and 1987 censuses is shown in appendix B. This appendix presents, in tabular form, the linkage from 1992 to 1987, and 1987 to 1992.

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

All dollar figures included in this report are at prices current for the year specified and, therefore, unadjusted for changes in price levels. Consequently, when making comparisons to prior years, users should take into consideration the inflation that has occurred.

The Bureau of the Census statistics on products for these industries are not entirely comparable with product statistics for the same industries published by the Bureau of Mines or the Energy Information Administration. The differences that occur result primarily from differences in data collection methods, coverage, and objectives sought.

INDUSTRY 1442, CONSTRUCTION SAND AND GRAVEL

This industry is made up of establishments primarily engaged in operating sand and gravel pits and dredges, and in washing, screening, or otherwise preparing sand and gravel for construction uses.

In the 1992 Census of Mineral Industries, Industry 1442, Construction Sand and Gravel, had employment of 27.1 thousand. The employment figure was 6 percent below the 28.9 thousand reported in 1987. The total value of shipments and receipts for the industry was \$2.7 billion in 1992. The value added by mining was \$2.0 billion in 1992. Value added per employee was \$75.3 thousand in 1992; it was \$69.6 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$942.5 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$570.3 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$128.2 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 21 percent of the total value of shipments and receipts. Establishments of single-establishment companies with 6 to 20 employees were mailed a short census form requesting summary data on employment, payroll, costs, capital expenditures, assets, and products. Selected statistics for sand and gravel mines included in manufacturing establishments are shown separately in table 8 of this report.

INDUSTRY 1446, INDUSTRIAL SAND

This industry is made up of establishments primarily engaged in operating sand pits and dredges, and in washing, screening, and otherwise preparing sand for uses other than construction, such as glassmaking, molding, and abrasives.

In the 1992 Census of Mineral Industries, Industry 1446, Industrial Sand, had employment of 3.2 thousand. The employment figure was 18 percent below the 3.9 thousand reported in 1987. The total value of shipments and receipts for the industry was \$410.8 million in 1992. The value added by mining was \$277.8 million in 1992. Value added per employee was \$86.8 thousand in 1992; it was \$79.1 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$158.7 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$87.7 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$24.8 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 8 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 9 percent of the total value of shipments and receipts.

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of the figures shown: E1-10 to 19 percent; E2-20 to 29 percent; E3-30 to 39 percent; E4-40 to 49 percent; E5-50 to 59 percent; E6-60 to 69 percent; E7-70 to 79 percent; E8-80 to 89 percent; E9-90 percent or more.

²States with 100 employees or more are shown. Some statistics are withheld to avoid disclosing data for individual companies. If employment is 100 or more, number of establishments is shown and employment-size range is indicated by one of the following symbols: C-100 to 249 employees; E-250 to 499 employees; F-500 to 999 employees; G-1,000 to 2,499 employees; H-2,500 to 4,999 employees; I-5,000 to 9,999 employees.

Note: Data shown as a (D) are included in underscored figures above.

¹See table 2, footnote 1.²Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate data shown for these small establishments. Data are also included in respective size classes shown.

Table 5. Industry–Product Analysis—Summary of Industry Shipments and Receipts and Net Shipments of Primary Products: 1992 and 1987

[Million dollars. An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as resales or contract work. Columns A–E show this product pattern for an industry. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F–H. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry and year	Value of shipments and receipts					Value of net shipments of primary products or services		
		Total	Primary products	Secondary products	Receipts for services	Products purchased and resold without further processing	Total produced in all industries	Produced in this industry	Produced in other industries
		A	B	C	D	E	F	G	H
1442	Construction sand and gravel 1992..	2 749.7	2 539.8	134.6	34.0	41.3	12 953.3	12 482.6	470.7
	 1987..	2 696.8	2 544.0	88.5	33.5	30.8	12 946.7	12 500.6	446.1
1446	Industrial sand 1992..	410.8	395.8	12.3	1.7	1.0	1407.4	1389.3	18.1
	 1987..	442.1	398.8	(D)	(D)	2.8	1408.2	1395.1	13.0

¹Represents gross shipments less minerals received for preparation.

Table 6a. Products or Services: 1992 and 1987

[Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Product code	Product	1992			1987

14B-10 SAND AND GRAVEL

MINERAL INDUSTRIES—INDUSTRY SERIES

Appendix A. Explanation of Terms

Employment and related items. The report forms requested separate information on production, development, and exploration workers for a specific payroll period within each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees. This item includes all full-time and part-time employees on the payrolls of mining establishments during any part of the pay period which included the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Also included are employees working for miners paid on a per ton, car, or yard basis. Excluded are employees at the mine but on the payroll of another employer (such as employees of contractors) and employees at company stores, boardinghouses, bunkhouses, and recreational centers. Also excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Production, development, and exploration workers. This item includes employees (up through the working-supervisor level) engaged in manual work (using tools, operating machines, hauling materials, loading and hauling products out of the mine in mine cars or trucks, and caring for mines, plants, mills, shops, or yards). Included are exploration work, mine development, storage, shipping, maintenance, repair, janitorial, and guard services, auxiliary production for use at establishments (such as power plant), recordkeeping, and other services closely associated with these production and development operations at the establishment covered by the report. Gang and straw bosses and supervisors who performed manual labor are included, as are employees paid on either a time- or piece-rate basis. Also included are miners paid on a per ton, car, or yard basis and persons engaged by them and paid out of the total amount received by these miners. In addition, other employees at the establishment but not on its payroll are included if paid directly through its own employees, such as superintendents and supervisors. The payments received by these types of employees are included as part of the establishments payroll. Employees above the working-supervisor level are excluded from this category.

All other employees. This item covers nonproduction employees of the establishment including those engaged in the following activities: supervision above the working-supervisor level, sales, highway trucking (by employees not entering mines or pits), advertising, credit, collection, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria and medical), professional (such as engineers and geologists), and technical activities. Also included are employees on the payroll of the establishment engaged in the construction of major additions or alterations to the plant and utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified as production, development, and exploration workers.)

Separately operated auxiliary establishments employees. This item includes employment at separate central administrative offices or auxiliary units of multiestablishment companies and at those offices or units servicing more than one establishment during the payroll period which included March 12. Establishments are classified on the basis of the industry or principal industry served. Employees at an office located at or near the mining establishment are usually included in the mine report.

All employees, average for year. The 1992 census report form requested employment figures for production, development, and exploration workers for four selected pay periods (mid-March, May, August, and November). For all other employees, only a mid-March figure was requested. The annual average is an average of the four monthly figures for production, development, and exploration workers plus the March figure for all other employees. This approach was used to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods closely approximates, for most industries, the average employment for the year that would be obtained from 12 monthly pay periods.

Payroll. This item includes the gross earnings of all employees on the payroll of mining establishments paid in the calendar year 1992. It includes all forms of compensation such as salaries, wages, commissions, payments received on a ton, car, or yard basis, dismissal pay,

bonuses, vacation and sick leave pay, employee contributions to pension plans (such as 401(K) plan), and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to proprietors or partners of unincorporated concerns, and payments to members of Armed Forces and pensioners carried on the active payroll of mining establishments. Also excluded are royalty payments to unions and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production, development, and exploration work but charged to employees and deducted from their wages.

As in the case of employment and establishment figures, the annual payrolls of separate auxiliary establishments of multiestablishment companies are included in the totals for individual industries and for States.

Production-, development-, and exploration-worker hours.

This item represents all hours that production, development, and exploration workers worked, both on active days during which there was production or development work and on inactive days when only security guards, inspectors, repair persons, and other maintenance persons were on duty. It includes all hours worked or paid for at the mining operations, except hours paid for vacations, holidays, or sick leave, when the employee was not at the establishment. Included are actual overtime hours, not straight time equivalent hours. Hours of working proprietors or partners and employees of contractors are excluded.

Supplemental labor costs. This item represents employer's cost for fringe benefits not included in payrolls.

Legally required expenditures, including Social Security contributions. This cost includes employer contributions for all programs required under Federal and State legislation, such as Federal Old Age and Survivors' Insurance, unemployment compensation, and worker's compensation. Also included are legally required State temporary disability payments.

Payments for voluntary programs. Included in this cost are payments resulting from union negotiated contracts and all employer payments of insurance premiums on hospital and medical plans, life insurance premiums, and premiums on supplementary accident and sickness insurance. For programs supported by joint employer-employee contributions, only the employer payments are included. Also included are payments or allocations on all pension plans regardless of methods of administration, supplemental unemployment compensation plans, welfare plans, stock purchase plans in which the employer payment is not subject to withholding tax, and deferred profit sharing plans.

Value added by mining. This measure of mining activity is derived by subtracting the cost of supplies, minerals received for preparation, purchased machinery installed,

purchased fuel, purchased electricity, and contract work from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. This statistic avoids the duplication in value of shipments and receipts which results from the use of products of some establishments as supplies, energy sources, or materials by others. Moreover, it provides a measure of value added not only in mineral production but also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

Cost of supplies used, purchased machinery installed, etc.

Besides supplies used and purchased machinery installed, this cost includes fuels and electric energy used and contract work done by others for each establishment. It includes charges to both the current and capital accounts. It also includes the cost of items used during 1992 whether they were purchased, withdrawn from inventories, or received from other establishments of the company. For selected supplies and fuels and for electric energy, both quantity and cost data were requested. The cost data refer to direct charges actually paid or payable (after discounts) for items used during the year. Freight charges and other direct charges incurred by the establishment in acquiring the item are included. Companies whose records did not show actual amounts used were asked to approximate use by adding purchases (or receipts) during the year to beginning inventory and subtracting ending inventory. Separate figures were requested for (1) selected supplies used, minerals received for preparation, and purchased machinery installed; (2) electric energy purchased; (3) purchased fuels used for heat, power, or the generation of electricity; (4) contract work done by others; and (5) products bought and resold in the same condition. Supplies and equipment used in mine development, plant expansion, and capitalized repairs, which are chargeable to fixed assets accounts, are included in this item, as are supplies furnished without charge to contractors for use at the mining operation and supplies sold to employees for use at the establishment. Excluded are such costs as advertising, insurance, telephone, and research and consulting services of other establishments or such overhead costs as depreciation charges, rent, interest, and royalties.

Selected supplies used, minerals prepared, etc.

In addition to the total cost of supplies used, purchased machinery installed, etc., which every establishment was required to report, information also was collected on the consumption of major supplies used in mining. These inquiries were restricted to supplies which were important parts of the cost of production, exploration, and development of a particular industry and for which cost information was available. Table 7a contains information on specific supplies consumed. On report forms for most mineral industries (except the contract services and the crude petroleum and natural gas industries), a uniform inquiry

was included on minerals prepared at the reported establishments. Figures were obtained on crude minerals mined at the establishment (quantity), received from other establishments of the company or purchased from others (quantity and cost), and received for preparation on a custom or toll basis (quantity and estimated value). Establishments consuming less than a specified amount (usually \$25,000) were not required to report the cost of a supply. For small establishments for which administrative records were used, the cost of supplies was included in "not specified by kind." (See Summary of Findings for the importance of administrative records to any industry.)

Value of shipments and receipts. The amounts shown as value of shipments and receipts for each industry (tables 1 through 5), and for individual products or classes of products (table 6), are the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during 1992, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1992. Prepared material or concentrates includes preparation from ores mined at the same establishment, purchased, received from other operations of the same company, or received for milling on a custom or toll basis. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry, (2) the value of secondary products which are primary to other industries, (3) the receipts for contract work done for others, except custom milling, and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

Shipments of individual products. In the 1992 Census of Mineral Industries, information was collected on output for about 150 individual mineral products. In general, the shipments figures of the 1992 and 1987 minerals censuses were confined to separate totals for each crude and each prepared mineral. When shipments were significant, separate figures also were obtained on crude minerals going to preparation plants and those going to consumers.

Figures were collected on both quantity and value of shipments. Shipments includes commercial shipments and transfers of products to other operations of the same company. For products that are used to a significant extent within the same establishment for power or heat, and for minerals mined and prepared in the same establishment, total production figures or separate data on production for such uses were collected. Typically, production also was collected for products for which there was usually significant differences between total production and total shipments because of stock changes.

For service industries, the amount received or due for services performed during 1992 was collected as a measure of output. For mine operators who also perform services, the amount received for such services was added to the total value of products shipped to determine total value of shipments and receipts for each establishment.

Table 6 provides total shipments figures from all industries for each of the products primary to the industry covered.

Capital expenditures. This item covers expenditures made during the year for development and exploration of mineral properties, for new construction, and for purchased machinery chargeable to fixed assets accounts of the mineral establishment. They are the type for which depreciation, depletion, or Office of Minerals Exploration accounts are ordinarily maintained. Capital expenditures during 1992 were determined as "additions completed during the year plus construction in progress at the end of the year minus construction in progress at the beginning of the year." Reported capital expenditures include work done on contract, as well as by the mine forces. Expenditures for machinery and equipment include those made for replacement purposes, as well as those for additions to capacity. Excluded from these expenditures were costs of maintenance and repairs charged as current operating expense and expenditures for land and mineral rights.

Whenever applicable, separate figures were provided for expenditures for development and exploration of mineral property, construction of preparation plants and other construction, new machinery and equipment, used plant, and used equipment acquired from others.

Gross value of depreciable assets. Assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation costs). The data were collected for the beginning and end of the year. Assets at the beginning of the year plus new and used capital expenditures minus retirements should equal assets at the end of the year. For new construction

or other improvement projects in progress but not completed by the end of the year, the cumulative capital expenditures were included in the beginning- and end-of-year assets figures.

Retirements. This item represents the gross value of depreciable assets sold, retired, scrapped, destroyed, abandoned, etc., during 1992. The values shown are the acquisition costs of the retired assets. This item also includes the value of assets (at acquisition cost rather than current market value) transferred to other establishments of the same company.

Depreciation. This item shows the reduction in value of depreciable assets brought about through use, gradual obsolescence, or the effect of the elements (decay or corrosion) during the year. Included are charges against assets acquired or completed during the year.

Rental payments. This item consists of rental payments made to other companies for use of such depreciable assets as buildings, other structures, machinery, and equipment. It does not include payments made to the parent company or another subsidiary of the parent company for the use of buildings and equipment owned by the parent company or its subsidiary. The value of such company-owned assets is included in the gross value of depreciable assets.

Rented equipment is reported according to the type of lease negotiated with the lessor. If the lease qualified as an "operating lease" the periodic payments made to the producer or the lessor are reported in the rental section. However, if the leasing arrangement met the criteria set down by the Financial Accounting Standards Board for a "capital lease," the original cost or market value of the equipment or building is reported as a value of fixed assets and not as rental payments.

Current account expenditures. This item includes all expenses for mineral properties, exploration, and development charged to current accounts. This includes all supplies, machinery, equipment, parts, fuels, power, etc., used for development or exploration and charged to current operating expenses. Also included are royalty payments, acquisition costs for mineral land and rights which were not capitalized, and the cost of maintenance and repairs associated with exploration or development activity and charged to current accounts.

Inventories. This item includes inventories of mined or quarried products and supplies, parts, fuels, etc., at the beginning and end of the year. Included as mined or quarried products are stockpiles of products ready for shipment and stocks of raw products awaiting treatment or beneficiation. Beginning with the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census in which respondents were permitted to value their inventories using any generally accepted accounting method.

Fuels and electric energy used. This item includes the quantity and cost of fuels and electric energy used in mining. For most industries, separate quantity and cost figures are shown for purchased coal, distillate fuel oil, residual fuel oil, gas, gasoline, and electric energy, and a cost figure is shown for "other fuels" (see table 7b). Data also were obtained on the quantity of fuels and electric energy produced and consumed at the same establishment. These data are shown for coal, crude petroleum, and natural gas used at the producing establishments for heat and power, and for electric energy generated and used at the same mining operations. For electric energy, the quantity generated and used is approximated by subtracting the quantity of electric energy sold from the total quantity generated (excluding generating station use).

Appendix B.

Product Code Comparability Tables

Part 1. Comparability of Product Classes and Product Codes That Changed: 1992 to 1987

Publication Program

1992 CENSUS OF MINERAL INDUSTRIES

Publications of the 1992 Census of Mineral Industries, containing data on establishments primarily engaged in the extraction of minerals, are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Preliminary Reports

Industry series—12 reports (MIC92-I-10A(P) to -14E(P))

Preliminary data from the 1992 census are issued in 12 separate reports covering 31 mineral industries. Preliminary summary data for the United States and States are released in one report.

Final Reports

Industry series—12 reports (MIC92-I-10A to -14E)

Each of the 12 reports provides information for an industry or a group of related industries (e.g., clay, ceramic, and refractory minerals). Final figures for the United States are shown for each of 31 mineral industries on quantity and value of products shipped and supplies used; inventories; quantity and cost of fuels and electric energy purchased and the quantities of fuels produced and consumed; capital expenditures; assets; rents; employment; depreciation, amortization, and depletion; payroll; hours worked; cost of purchased machinery; value added by mining; mineral development, and exploration costs; number of establishments; and number of companies. Comparative statistics for earlier years are included. Industry statistics are shown by State, type of operation, and size of establishment.

Geographic area series—9 reports (MIC92-A-1 to -9)

A separate report for each of the nine geographic divisions presents statistics for individual States and off-shore areas for two- and three-digit industry groups by type of operation and by county. Also, data are shown for

value of shipments; value added by mining; employment; payroll; hours worked; capital expenditures; cost of supplies, etc.; purchased machinery installed; and number of mining establishments, with comparative 1987 data on employment and value added by mining.

Subject series—2 reports (MIC92-S-1 and -2)

One of these reports is a general national-level summary; the other report contains detailed statistics on fuels and electric energy consumed by mineral industries.

Reference series—1 report (MC92-R-1)

The *Numerical List of Manufactured and Mineral Products* includes a description of the principal products and services published in the 1992 Censuses of Manufactures and Mineral Industries.

Electronic Media

All data included in the printed reports are available on compact disc—read only memory (CD-ROM). The CD-ROM's provide the same information found in the reports. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, financial, insurance, real estate, construction industries, manufactures, transportation, communications, utilities, enterprise statistics, minority-owned businesses, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Commonwealth of the Northern Mariana Islands. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Mineral Industries. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

Manufacturing and Construction Division prepared this report. **Barry A. Rappaport**, Assistant Chief for Construction and Mineral Censuses, was responsible for the overall planning, management, and coordination of the census of mineral industries. Planning and implementation were under the direction of **Patricia L. Horning**, Chief, Construction and Mineral Census Branch, assisted by **M. Susan Bucci**, Section Chief, with primary staff assistance by **Beth Eldridge-Lee**.

Brian Greenberg, Assistant Chief for Research and Methodology Programs, assisted by **Stacey Cole**, provided the mathematical and statistical techniques as well as the coverage operations.

Baruti A. Taylor, under the direction of **A. William Visnansky**, Chief, Special Reports Branch, performed overall coordination of the publication process. **Julius Smith, Jr.** and **Andrew W. Hait** provided primary staff assistance.

The Economic Planning and Coordination Division provided the computer processing procedures. **Shirin A. Ahmed**, Assistant Chief for Post Data Collection Processing, was responsible for editing and the analysts' interactive database review and correction system. Design and specifications were prepared under the supervision of **Dennis L. Wagner**, Chief, Post Collection Census Branch, assisted by **S. Mark Schmidt** and **Robert A. Rosati**.

The staff of the Data Preparation Division, **Judith N. Petty**, Acting Chief, performed mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review.

The Geography Division staff developed geographic coding procedures and associated computer programs.

The Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, developed and coordinated the computer processing systems. **Martin S. Harahush**, Assistant Chief for Quinquennial Programs, was responsible for design and implementation of the computer systems. **Gary T. Sheridan**, Chief, Manufactures and Construction Branch, assisted by **Gerald S. Turnage**, supervised the preparation of the computer programs.

Computer Services Division, **Marvin D. Raines**, Chief, performed the computer processing.

The staff of the Administrative and Publications Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Cynthia G. Brooks** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-4680.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, financial, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Mineral Industries

GENERAL

This report, from the 1992 Census of Mineral Industries, is one of a series of 12 industry reports; each provides statistics for individual industries or groups of related industries. Additional separate reports will be issued for each geographic division showing statistics by State and for special subjects, such as fuels and electric energy consumed.

The introduction to the *General Summary* report discusses, at greater length, many of the subjects described in this introduction. For example, the *General Summary* text discusses the economic significance of the mining sector, the relation of value added by mining to value added by manufacture, some of the changes in statistical concepts over the history of the census, and the valuation problems arising from intracompany transfers between mining establishments, manufacturing plants, and sales offices and sales branches of a company.

SCOPE OF CENSUS AND DEFINITION OF MINERAL INDUSTRIES

The 1992 Census of Mineral Industries covers all establishments with one paid employee or more primarily engaged in mining as defined in the *1987 Standard Industrial Classification (SIC) Manual*¹. This is the system of industrial classification developed by experts on classification in Government and private industry under the guidance of the Office of Information and Regulatory Affairs, Office of Management and Budget. This classification system is used by Government agencies as well as many organizations outside the Government.

The SIC Manual defines mining in the broad sense to include the extraction of minerals occurring naturally: solids such as coal and ores, liquids such as crude petroleum, and gases such as natural gas. The term "mining" is used in the broad sense to include quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparations needed to make minerals marketable. Exploration is included as is the development of mineral properties. Services performed on a contract, fee, or other basis in the exploration and development of mineral properties are classified separately but within this division.

Mining operations are classified by industry on the basis of the principal mineral produced or, if there is no production, on the basis of the principal mineral for which exploration or development work is in progress. The recovery of material from culm banks, ore dumps, and other waste mineral piles is classified in the appropriate mining industry according to the mineral product recovered.

The crushing, grinding, or other treatment of certain earths, rocks, and other nonmetallic minerals not in conjunction with mining activities is not included in this division but is classified as manufacturing. Hauling and other transportation beyond the mine property and contract hauling (except out of open pits in conjunction with mining) also are excluded.

Mining operations carried on as secondary activities at manufacturing establishments (such as clay pits at clay products plants or sand and gravel operations at ready-mixed concrete plants) are not within the scope of this census. However, selected data (production workers' wages and hours; total cost of supplies, fuels, electric energy, and contract work; and quantity of production for mined products) on such mining activities have been obtained in the 1992 Census of Manufactures and are included in the mining reports. They are clearly specified wherever included.

ESTABLISHMENT BASIS OF REPORTING

The census of mineral industries covers each mining establishment of firms with one paid employee or more operating in the United States. A company operating more than one establishment is required to file a separate report for each location. A mineral establishment is defined as a single physical location where mineral operations are conducted.

For oil and gas field operations and for contract services, the basis for reporting is different from the "establishment" basis used for other types of mining. Firms operating oil and gas wells, drilling wells, or exploring for oil and gas for their own account were required to submit a separate report for each State or offshore area adjacent to a State in which it conducted such activities. Firms that performed contract services for oil and gas field operations or for mining establishments were required to submit one report covering all such activities in the United States and to include information on receipts for services and production-worker wages and hours, by State. These consolidated

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

reports were then allocated to State establishments based on the data reported at the State level. The 1992 figures for establishments include the summation of operations for each State allocated from these nationwide reports.

USE OF ADMINISTRATIVE RECORDS

From a mailout universe of about 28,500 mining establishments, approximately 11,000 small single-establishment companies were not mailed a questionnaire. For these establishments, some employment, payroll, and receipts data were obtained from the administrative records of other agencies. Selection of the small establishment non-mail cases was done on an industry-by-industry basis, and a variable cutoff was used to determine those establishments for which administrative records were to be used in place of a census report. This information was then used in conjunction with industry averages and other information to estimate the statistics for administrative-record and nonresponse establishments. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown. The value of shipments and receipts and cost of supplies were generally not distributed among specific products and supplies for these establishments, but were included in the product and supply "not specified by kind" categories. Overall, establishments for which administrative-record data were used accounted for less than 2 percent of total value of shipments and receipts.

The industry classification codes included in the administrative-record files were used for those establishments excused from filing census forms. Generally, these codes were assigned on the basis of brief descriptions of the general activity of the establishment. Where the description was incomplete, or where there were relatively fine lines of demarcation among industries or between mining and nonmining activities, the code assigned to an establishment could differ from that which would have been assigned on the basis of more complete product or activity information. Therefore, the total establishment count should be viewed as an approximate measure. The counts for establishments with 20 employees or more are far more reliable.

In the 1992 census, as in the 1987, 1982, 1977, and 1972 censuses, data for single-unit firms without paid employees were excluded. This exclusion had only a slight effect on industry aggregates for most industries. Data for firms without employees were included in the 1963, 1958, and 1954 censuses if they reported more than \$500 in (1) value of shipments and receipts, (2) cost of supplies and purchased machinery, or (3) capital expenditures.

AUXILIARIES

Statistics for employment and payroll for individual industries and industry groups also include employment and payroll figures for administrative offices, warehouses,

storage facilities, and other auxiliary establishments servicing mining establishments. As in previous censuses, respondents were asked to file separate reports (form ES-9200) for any separately operated auxiliary establishments. Classification of employment and payroll data at such auxiliary establishments was based on the mining establishments served.

INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

Each of the establishments covered in the census was classified in 1 of 31 mineral industries in accordance with the industry definitions in the 1987 SIC Manual. An industry is generally defined as a group of establishments producing the same product or closely related group of products. The resulting group of establishments must be significant in terms of its number, value added by mining, value of shipments and receipts, number of employees, and payroll. Application of these criteria led to the formulation of 31 mining industries, each assigned a four-digit code. The classification system also provides broader groups of industries, with 20 three-digit groups and 4 two-digit groups. Within industries, the system provides for seven-digit products and five-digit product classes. Products are considered primary to an industry if the first four digits of the product codes are the same as the industry code. Products whose first four code numbers differ from the industry code are called secondary products. To determine the industry classification of an establishment, the seven-digit products are grouped together according to the first four digits of the product code. The first four digits of the group of products with the largest value of production become the industry code for the establishment. (For mineral service industries, the classification is on the basis of receipts for services performed.)

In most industries, establishments making products falling into the same industry category use a variety of processes. Separate statistics are provided on the various types of operation. Whenever possible, separate figures are shown for establishments with mines only, mines with preparation plants, and preparation plants only. Separate figures are provided by type of mine (underground, open pit, and combination). Separate statistics also are provided on producing and nonproducing operations, an establishment being defined as nonproducing if no mineral products were shipped during the year.

Statistics usually are provided on the production of minerals mined and used in the same establishment for producing prepared minerals or used at the producing establishment for fuel.

Differences in the integration of production processes and types of operation should be considered when relating the general items (employment, payrolls, value added, etc.) to the product and material data.

VALUE OF SHIPMENTS FOR THE INDUSTRY COMPARED WITH VALUE OF PRODUCT SHIPMENTS

This report shows value of shipments and receipt data for industries and products. In tables 1 through 4, these data represent the total value of shipments and receipts of all establishments classified in a particular industry. The data include the shipments of the products classified in the industry (primary to the industry), products classified in other industries (secondary to the industry), and miscellaneous receipts (repair work, sale of scrap, research and development, installation receipts, and resales). Value of product shipments shown in table 6 represents the total value of all products shipped that are classified as primary to an industry and includes those that were shipped by all mining establishments regardless of their industry classification. Value of product shipments also may include some products shipped from mining operations associated with manufacturing establishments.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the data for an individual establishment or company. However, the number of establishments classified in a specific industry is not considered a disclosure; this information may be released even though other information is withheld.

The disclosure analysis for the industry statistics in tables 1 through 4 of this report is based on the total value of shipments and receipts. When the total value of shipments and receipts cannot be shown without disclosing information for individual companies, the complete line is suppressed except for capital expenditures. If capital expenditures alone is a disclosure, only total capital expenditures and cost of supplies statistics are suppressed. However, the suppressed data are included in higher level totals.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Mineral Industries may be requested. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications. Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6901.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

—	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in higher level totals.
(NA)	Not available.
(NC)	Not comparable.
(S)	Withheld because estimate did not meet publication standards.
(X)	Not applicable.
(Z)	Less than half the unit shown.
n.e.c.	Not elsewhere classified.
n.s.k.	Not specified by kind.
r	Revised.
SIC	Standard Industrial Classification.

Other abbreviations, such as lb, gal, yd, and bbl, are used in the customary sense.

Description of Industries and Summary of Findings

This report shows 1992 Census of Mineral Industries statistics for establishments classified in each of the following industries:

SIC code and title

1455	Kaolin and Ball Clay
1459	Clay, Ceramic, and Refractory Minerals, N.E.C.

The industry statistics (employment, payroll, value of shipments, cost of supplies, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments but also all secondary activities performed by the same establishments. This fact should be taken into account in comparing industry statistics (tables 1 through 4 and 7) with product statistics (table 6) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and the value of net shipments of primary products of the industry produced as secondary products by establishments classified in other industries.

Single-establishment companies with up to 20 employees (cutoff varied by industry) were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other Federal agencies. This information was used in conjunction with industry averages and other information to develop estimates for all statistics. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown.

Establishment data were tabulated based on industry definitions included in the *1987 Standard Industrial Classification (SIC) Manual*¹. Comparability for the product classes and product codes that changed between the 1992 and 1987 censuses is shown in appendix B. This appendix presents, in tabular form, the linkage from 1992 to 1987, and 1987 to 1992.

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

All dollar figures included in this report are at prices current for the year specified and, therefore, unadjusted for changes in price levels. Consequently, when making comparisons to prior years, users should take into consideration the inflation that has occurred.

The Bureau of the Census statistics on products for these industries are not entirely comparable with product statistics for the same industries published by the Bureau of Mines or the Energy Information Administration. The differences that occur result primarily from differences in data collection methods, coverage, and objectives sought.

INDUSTRY 1455, KAOLIN AND BALL CLAY

This industry is made up of establishments primarily engaged in the mining, milling, or otherwise preparing kaolin or ball clay, including china clay, paper clay, and slip clay.

In the 1992 Census of Mineral Industries, Industry 1455, Kaolin and Ball Clay, had employment of 5.0 thousand. The employment figure was 6 percent below the 5.3 thousand reported in 1987. The total value of shipments and receipts for the industry was \$780.4 million in 1992. The value added by mining was \$506.3 million in 1992. Value added per employee was \$101.2 thousand in 1992; it was \$94.1 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$327.1 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$183.6 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$42.1 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for less than 1 percent of the total value of shipments and receipts.

INDUSTRY 1459, CLAY, CERAMIC, AND REFRACTORY MATERIALS, N.E.C.

This industry is made up of establishments primarily engaged in the mining, milling, or otherwise preparing clay, ceramic, or refractory minerals, not elsewhere classified.

Establishments producing clay in conjunction with the manufacture of refractory or structural clay and pottery products are classified in manufacturing, major group 32.

In the 1992 Census of Mineral Industries, Industry 1459, Clay, Ceramic, and Refractory Materials, N.E.C., had employment of 5.0 thousand. The employment figure was 9 percent above the 4.6 thousand reported in 1987. The total value of shipments and receipts for the industry was \$619.8 million in 1992. The value added by mining was \$430.2 million in 1992. Value added per employee was \$86.0 thousand in 1992; it was \$71.4 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$220.5 million, while

the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$131.1 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$40.9 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 12 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 7 percent of the total value of shipments and receipts.

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of the figures shown: E1-10 to 19 percent; E2-20 to 29 percent; E3-30 to 39 percent; E4-40 to 49 percent; E5-50 to 59 percent; E6-60 to 69 percent; E7-70 to 79 percent; E8-80 to 89 percent; E9-90 percent or more.

²States with 100 employees or more are shown. Some statistics are withheld to avoid disclosing data for individual companies. If employment is 100 or more, number of establishments is shown and employment-size range is indicated by one of the following symbols: C-100 to 249 employees; E-250 to 499 employees; F-500 to 999 employees; G-1,000 to 2,499 employees; H-2,500 to 4,999 employees; I-5,000 to 9,999 employees.

Note: Data shown as a (D) are included in underscored figures above.

¹Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 percent or more.

²Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate data shown for these small establishments. Data are also included in respective size classes shown.

Table 5. Industry-Product Analysis—Summary of Industry Shipments and Receipts and Net Shipments of Primary Products: 1992 and 1987

[Million dollars. An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as resales or contract work. Columns A-E show this product pattern for an industry. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry and year	Value of shipments and receipts					Value of net shipments of primary products or services		
		Total	Primary products	Secondary products	Receipts for services	Products purchased and resold without further processing	Total produced in all industries	Produced in this industry	Produced in other industries

South Carolina -----	6	.1	.9	1.3	792.1
Texas -----	13	(D)	(D)	(D)	(D)

Note: States with less than 50 thousand hours for employees engaged in production, development, and exploration work are not shown.

¹Excludes clay produced at manufacturing establishments whose primary mineral production is another mineral product.

Appendix A.

Explanation of Terms

Employment and related items. The report forms requested separate information on production, development, and exploration workers for a specific payroll period within each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees. This item includes all full-time and part-time employees on the payrolls of mining establishments during any part of the pay period which included the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Also included are employees working for miners paid on a per ton, car, or yard basis. Excluded are employees at the mine but on the payroll of another employer (such as employees of contractors) and employees at company stores, boardinghouses, bunkhouses, and recreational centers. Also excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Production, development, and exploration workers. This item includes employees (up through the working-supervisor level) engaged in manual work (using tools, operating machines, hauling materials, loading and hauling products out of the mine in mine cars or trucks, and caring for mines, plants, mills, shops, or yards). Included are exploration work, mine development, storage, shipping, maintenance, repair, janitorial, and guard services, auxiliary production for use at establishments (such as power plant), recordkeeping, and other services closely associated with these production and development operations at the establishment covered by the report. Gang and straw bosses and supervisors who performed manual labor are included, as are employees paid on either a time- or piece-rate basis. Also included are miners paid on a per ton, car, or yard basis and persons engaged by them and paid out of the total amount received by these miners. In addition, other employees at the establishment but not on its payroll are included if paid directly through its own employees, such as superintendents and supervisors. The payments received by these types of employees are included as part of the establishments payroll. Employees above the working-supervisor level are excluded from this category.

All other employees. This item covers nonproduction employees of the establishment including those engaged in the following activities: supervision above the working-supervisor level, sales, highway trucking (by employees not entering mines or pits), advertising, credit, collection, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria and medical), professional (such as engineers and geologists), and technical activities. Also included are employees on the payroll of the establishment engaged in the construction of major additions or alterations to the plant and utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified as production, development, and exploration workers.)

Separately operated auxiliary establishments employees. This item includes employment at separate central administrative offices or auxiliary units of multiestablishment companies and at those offices or units servicing more than one establishment during the payroll period which included March 12. Establishments are classified on the basis of the industry or principal industry served. Employees at an office located at or near the mining establishment are usually included in the mine report.

All employees, average for year. The 1992 census report form requested employment figures for production, development, and exploration workers for four selected pay periods (mid-March, May, August, and November). For all other employees, only a mid-March figure was requested. The annual average is an average of the four monthly figures for production, development, and exploration workers plus the March figure for all other employees. This approach was used to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods closely approximates, for most industries, the average employment for the year that would be obtained from 12 monthly pay periods.

Payroll. This item includes the gross earnings of all employees on the payroll of mining establishments paid in the calendar year 1992. It includes all forms of compensation such as salaries, wages, commissions, payments received on a ton, car, or yard basis, dismissal pay,

bonuses, vacation and sick leave pay, employee contributions to pension plans (such as 401(K) plan), and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to proprietors or partners of unincorporated concerns, and payments to members of Armed Forces and pensioners carried on the active payroll of mining establishments. Also excluded are royalty payments to unions and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production, development, and exploration work but charged to employees and deducted from their wages.

As in the case of employment and establishment figures, the annual payrolls of separate auxiliary establishments of multiestablishment companies are included in the totals for individual industries and for States.

Production-, development-, and exploration-worker hours.

This item represents all hours that production, development, and exploration workers worked, both on active days during which there was production or development work and on inactive days when only security guards, inspectors, repair persons, and other maintenance persons were on duty. It includes all hours worked or paid for at the mining operations, except hours paid for vacations, holidays, or sick leave, when the employee was not at the establishment. Included are actual overtime hours, not straight time equivalent hours. Hours of working proprietors or partners and employees of contractors are excluded.

Supplemental labor costs. This item represents employer's cost for fringe benefits not included in payrolls.

Legally required expenditures, including Social Security contributions. This cost includes employer contributions for all programs required under Federal and State legislation, such as Federal Old Age and Survivors' Insurance, unemployment compensation, and worker's compensation. Also included are legally required State temporary disability payments.

Payments for voluntary programs. Included in this cost are payments resulting from union negotiated contracts and all employer payments of insurance premiums on hospital and medical plans, life insurance premiums, and premiums on supplementary accident and sickness insurance. For programs supported by joint employer-employee contributions, only the employer payments are included. Also included are payments or allocations on all pension plans regardless of methods of administration, supplemental unemployment compensation plans, welfare plans, stock purchase plans in which the employer payment is not subject to withholding tax, and deferred profit sharing plans.

Value added by mining. This measure of mining activity is derived by subtracting the cost of supplies, minerals received for preparation, purchased machinery installed,

purchased fuel, purchased electricity, and contract work from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. This statistic avoids the duplication in value of shipments and receipts which results from the use of products of some establishments as supplies, energy sources, or materials by others. Moreover, it provides a measure of value added not only in mineral production but also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

Cost of supplies used, purchased machinery installed, etc.

Besides supplies used and purchased machinery installed, this cost includes fuels and electric energy used and contract work done by others for each establishment. It includes charges to both the current and capital accounts. It also includes the cost of items used during 1992 whether they were purchased, withdrawn from inventories, or received from other establishments of the company. For selected supplies and fuels and for electric energy, both quantity and cost data were requested. The cost data refer to direct charges actually paid or payable (after discounts) for items used during the year. Freight charges and other direct charges incurred by the establishment in acquiring the item are included. Companies whose records did not show actual amounts used were asked to approximate use by adding purchases (or receipts) during the year to beginning inventory and subtracting ending inventory. Separate figures were requested for (1) selected supplies used, minerals received for preparation, and purchased machinery installed; (2) electric energy purchased; (3) purchased fuels used for heat, power, or the generation of electricity; (4) contract work done by others; and (5) products bought and resold in the same condition. Supplies and equipment used in mine development, plant expansion, and capitalized repairs, which are chargeable to fixed assets accounts, are included in this item, as are supplies furnished without charge to contractors for use at the mining operation and supplies sold to employees for use at the establishment. Excluded are such costs as advertising, insurance, telephone, and research and consulting services of other establishments or such overhead costs as depreciation charges, rent, interest, and royalties.

Selected supplies used, minerals prepared, etc.

In addition to the total cost of supplies used, purchased machinery installed, etc., which every establishment was required to report, information also was collected on the consumption of major supplies used in mining. These inquiries were restricted to supplies which were important parts of the cost of production, exploration, and development of a particular industry and for which cost information was available. Table 7a contains information on specific supplies consumed. On report forms for most mineral industries (except the contract services and the crude petroleum and natural gas industries), a uniform inquiry

was included on minerals prepared at the reported establishments. Figures were obtained on crude minerals mined at the establishment (quantity), received from other establishments of the company or purchased from others (quantity and cost), and received for preparation on a custom or toll basis (quantity and estimated value). Establishments consuming less than a specified amount (usually \$25,000) were not required to report the cost of a supply. For small establishments for which administrative records were used, the cost of supplies was included in "not specified by kind." (See Summary of Findings for the importance of administrative records to any industry.)

Value of shipments and receipts. The amounts shown as value of shipments and receipts for each industry (tables 1 through 5), and for individual products or classes of products (table 6), are the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during 1992, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1992. Prepared material or concentrates includes preparation from ores mined at the same establishment, purchased, received from other operations of the same company, or received for milling on a custom or toll basis. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry, (2) the value of secondary products which are primary to other industries, (3) the receipts for contract work done for others, except custom milling, and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

Shipments of individual products. In the 1992 Census of Mineral Industries, information was collected on output for about 150 individual mineral products. In general, the shipments figures of the 1992 and 1987 minerals censuses were confined to separate totals for each crude and each prepared mineral. When shipments were significant, separate figures also were obtained on crude minerals going to preparation plants and those going to consumers.

Figures were collected on both quantity and value of shipments. Shipments includes commercial shipments and transfers of products to other operations of the same company. For products that are used to a significant extent within the same establishment for power or heat, and for minerals mined and prepared in the same establishment, total production figures or separate data on production for such uses were collected. Typically, production also was collected for products for which there was usually significant differences between total production and total shipments because of stock changes.

For service industries, the amount received or due for services performed during 1992 was collected as a measure of output. For mine operators who also perform services, the amount received for such services was added to the total value of products shipped to determine total value of shipments and receipts for each establishment.

Table 6 provides total shipments figures from all industries for each of the products primary to the industry covered.

Capital expenditures. This item covers expenditures made during the year for development and exploration of mineral properties, for new construction, and for purchased machinery chargeable to fixed assets accounts of the mineral establishment. They are the type for which depreciation, depletion, or Office of Minerals Exploration accounts are ordinarily maintained. Capital expenditures during 1992 were determined as "additions completed during the year plus construction in progress at the end of the year minus construction in progress at the beginning of the year." Reported capital expenditures include work done on contract, as well as by the mine forces. Expenditures for machinery and equipment include those made for replacement purposes, as well as those for additions to capacity. Excluded from these expenditures were costs of maintenance and repairs charged as current operating expense and expenditures for land and mineral rights.

Whenever applicable, separate figures were provided for expenditures for development and exploration of mineral property, construction of preparation plants and other construction, new machinery and equipment, used plant, and used equipment acquired from others.

Gross value of depreciable assets. Assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation costs). The data were collected for the beginning and end of the year. Assets at the beginning of the year plus new and used capital expenditures minus retirements should equal assets at the end of the year. For new construction

or other improvement projects in progress but not completed by the end of the year, the cumulative capital expenditures were included in the beginning- and end-of-year assets figures.

Retirements. This item represents the gross value of depreciable assets sold, retired, scrapped, destroyed, abandoned, etc., during 1992. The values shown are the acquisition costs of the retired assets. This item also includes the value of assets (at acquisition cost rather than current market value) transferred to other establishments of the same company.

Depreciation. This item shows the reduction in value of depreciable assets brought about through use, gradual obsolescence, or the effect of the elements (decay or corrosion) during the year. Included are charges against assets acquired or completed during the year.

Rental payments. This item consists of rental payments made to other companies for use of such depreciable assets as buildings, other structures, machinery, and equipment. It does not include payments made to the parent company or another subsidiary of the parent company for the use of buildings and equipment owned by the parent company or its subsidiary. The value of such company-owned assets is included in the gross value of depreciable assets.

Rented equipment is reported according to the type of lease negotiated with the lessor. If the lease qualified as an "operating lease" the periodic payments made to the producer or the lessor are reported in the rental section. However, if the leasing arrangement met the criteria set down by the Financial Accounting Standards Board for a "capital lease," the original cost or market value of the equipment or building is reported as a value of fixed assets and not as rental payments.

Current account expenditures. This item includes all expenses for mineral properties, exploration, and development charged to current accounts. This includes all supplies, machinery, equipment, parts, fuels, power, etc., used for development or exploration and charged to current operating expenses. Also included are royalty payments, acquisition costs for mineral land and rights which were not capitalized, and the cost of maintenance and repairs associated with exploration or development activity and charged to current accounts.

Inventories. This item includes inventories of mined or quarried products and supplies, parts, fuels, etc., at the beginning and end of the year. Included as mined or quarried products are stockpiles of products ready for shipment and stocks of raw products awaiting treatment or beneficiation. Beginning with the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census in which respondents were permitted to value their inventories using any generally accepted accounting method.

Fuels and electric energy used. This item includes the quantity and cost of fuels and electric energy used in mining. For most industries, separate quantity and cost figures are shown for purchased coal, distillate fuel oil, residual fuel oil, gas, gasoline, and electric energy, and a cost figure is shown for "other fuels" (see table 7b). Data also were obtained on the quantity of fuels and electric energy produced and consumed at the same establishment. These data are shown for coal, crude petroleum, and natural gas used at the producing establishments for heat and power, and for electric energy generated and used at the same mining operations. For electric energy, the quantity generated and used is approximated by subtracting the quantity of electric energy sold from the total quantity generated (excluding generating station use).

Publication Program

1992 CENSUS OF MINERAL INDUSTRIES

Publications of the 1992 Census of Mineral Industries, containing data on establishments primarily engaged in the extraction of minerals, are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Preliminary Reports

Industry series—12 reports (MIC92-I-10A(P) to -14E(P))

Preliminary data from the 1992 census are issued in 12 separate reports covering 31 mineral industries. Preliminary summary data for the United States and States are released in one report.

Final Reports

Industry series—12 reports (MIC92-I-10A to -14E)

Each of the 12 reports provides information for an industry or a group of related industries (e.g., clay, ceramic, and refractory minerals). Final figures for the United States are shown for each of 31 mineral industries on quantity and value of products shipped and supplies used; inventories; quantity and cost of fuels and electric energy purchased and the quantities of fuels produced and consumed; capital expenditures; assets; rents; employment; depreciation, amortization, and depletion; payroll; hours worked; cost of purchased machinery; value added by mining; mineral development, and exploration costs; number of establishments; and number of companies. Comparative statistics for earlier years are included. Industry statistics are shown by State, type of operation, and size of establishment.

Geographic area series—9 reports (MIC92-A-1 to -9)

A separate report for each of the nine geographic divisions presents statistics for individual States and off-shore areas for two- and three-digit industry groups by type of operation and by county. Also, data are shown for

value of shipments; value added by mining; employment; payroll; hours worked; capital expenditures; cost of supplies, etc.; purchased machinery installed; and number of mining establishments, with comparative 1987 data on employment and value added by mining.

Subject series—2 reports (MIC92-S-1 and -2)

One of these reports is a general national-level summary; the other report contains detailed statistics on fuels and electric energy consumed by mineral industries.

Reference series—1 report (MC92-R-1)

The *Numerical List of Manufactured and Mineral Products* includes a description of the principal products and services published in the 1992 Censuses of Manufactures and Mineral Industries.

Electronic Media

All data included in the printed reports are available on compact disc—read only memory (CD-ROM). The CD-ROM's provide the same information found in the reports. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, financial, insurance, real estate, construction industries, manufactures, transportation, communications, utilities, enterprise statistics, minority-owned businesses, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Commonwealth of the Northern Mariana Islands. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Mineral Industries. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

Manufacturing and Construction Division prepared this report. **Barry A. Rappaport**, Assistant Chief for Construction and Mineral Censuses, was responsible for the overall planning, management, and coordination of the census of mineral industries. Planning and implementation were under the direction of **Patricia L. Horning**, Chief, Construction and Mineral Census Branch, assisted by **M. Susan Bucci**, Section Chief, with primary staff assistance by **Beth Eldridge-Lee**.

Brian Greenberg, Assistant Chief for Research and Methodology Programs, assisted by **Stacey Cole**, provided the mathematical and statistical techniques as well as the coverage operations.

Baruti A. Taylor, under the direction of **A. William Visnansky**, Chief, Special Reports Branch, performed overall coordination of the publication process. **Julius Smith, Jr.** and **Andrew W. Hait** provided primary staff assistance.

The Economic Planning and Coordination Division provided the computer processing procedures. **Shirin A. Ahmed**, Assistant Chief for Post Data Collection Processing, was responsible for editing and the analysts' interactive database review and correction system. Design and specifications were prepared under the supervision of **Dennis L. Wagner**, Chief, Post Collection Census Branch, assisted by **S. Mark Schmidt** and **Robert A. Rosati**.

The staff of the Data Preparation Division, **Judith N. Petty**, Chief, performed mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review.

The Geography Division staff developed geographic coding procedures and associated computer programs.

The Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, developed and coordinated the computer processing systems. **Martin S. Harahush**, Assistant Chief for Quinquennial Programs, was responsible for design and implementation of the computer systems. **Gary T. Sheridan**, Chief, Manufactures and Construction Branch, assisted by **Gerald S. Turnage**, supervised the preparation of the computer programs.

Computer Services Division, **Marvin D. Raines**, Chief, performed the computer processing.

The staff of the Administrative and Publications Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Cynthia G. Brooks** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-4680.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, financial, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Mineral Industries

GENERAL

This report, from the 1992 Census of Mineral Industries, is one of a series of 12 industry reports; each provides statistics for individual industries or groups of related industries. Additional separate reports will be issued for each geographic division showing statistics by State and for special subjects, such as fuels and electric energy consumed.

The introduction to the *General Summary* report discusses, at greater length, many of the subjects described in this introduction. For example, the *General Summary* text discusses the economic significance of the mining sector, the relation of value added by mining to value added by manufacture, some of the changes in statistical concepts over the history of the census, and the valuation problems arising from intracompany transfers between mining establishments, manufacturing plants, and sales offices and sales branches of a company.

SCOPE OF CENSUS AND DEFINITION OF MINERAL INDUSTRIES

The 1992 Census of Mineral Industries covers all establishments with one paid employee or more primarily engaged in mining as defined in the *1987 Standard Industrial Classification (SIC) Manual*¹. This is the system of industrial classification developed by experts on classification in Government and private industry under the guidance of the Office of Information and Regulatory Affairs, Office of Management and Budget. This classification system is used by Government agencies as well as many organizations outside the Government.

The SIC Manual defines mining in the broad sense to include the extraction of minerals occurring naturally: solids such as coal and ores, liquids such as crude petroleum, and gases such as natural gas. The term "mining" is used in the broad sense to include quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparations needed to make minerals marketable. Exploration is included as is the development of mineral properties. Services performed on a contract, fee, or other basis in the exploration and development of mineral properties are classified separately but within this division.

Mining operations are classified by industry on the basis of the principal mineral produced or, if there is no production, on the basis of the principal mineral for which exploration or development work is in progress. The recovery of material from culm banks, ore dumps, and other waste mineral piles is classified in the appropriate mining industry according to the mineral product recovered.

The crushing, grinding, or other treatment of certain earths, rocks, and other nonmetallic minerals not in conjunction with mining activities is not included in this division but is classified as manufacturing. Hauling and other transportation beyond the mine property and contract hauling (except out of open pits in conjunction with mining) also are excluded.

Mining operations carried on as secondary activities at manufacturing establishments (such as clay pits at clay products plants or sand and gravel operations at ready-mixed concrete plants) are not within the scope of this census. However, selected data (production workers' wages and hours; total cost of supplies, fuels, electric energy, and contract work; and quantity of production for mined products) on such mining activities have been obtained in the 1992 Census of Manufactures and are included in the mining reports. They are clearly specified wherever included.

ESTABLISHMENT BASIS OF REPORTING

The census of mineral industries covers each mining establishment of firms with one paid employee or more operating in the United States. A company operating more than one establishment is required to file a separate report for each location. A mineral establishment is defined as a single physical location where mineral operations are conducted.

For oil and gas field operations and for contract services, the basis for reporting is different from the "establishment" basis used for other types of mining. Firms operating oil and gas wells, drilling wells, or exploring for oil and gas for their own account were required to submit a separate report for each State or offshore area adjacent to a State in which it conducted such activities. Firms that performed contract services for oil and gas field operations or for mining establishments were required to submit one report covering all such activities in the United States and to include information on receipts for services and production-worker wages and hours, by State. These consolidated

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

reports were then allocated to State establishments based on the data reported at the State level. The 1992 figures for establishments include the summation of operations for each State allocated from these nationwide reports.

USE OF ADMINISTRATIVE RECORDS

From a mailout universe of about 28,500 mining establishments, approximately 11,000 small single-establishment companies were not mailed a questionnaire. For these establishments, some employment, payroll, and receipts data were obtained from the administrative records of other agencies. Selection of the small establishment non-mail cases was done on an industry-by-industry basis, and a variable cutoff was used to determine those establishments for which administrative records were to be used in place of a census report. This information was then used in conjunction with industry averages and other information to estimate the statistics for administrative-record and nonresponse establishments. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown. The value of shipments and receipts and cost of supplies were generally not distributed among specific products and supplies for these establishments, but were included in the product and supply "not specified by kind" categories. Overall, establishments for which administrative-record data were used accounted for less than 2 percent of total value of shipments and receipts.

The industry classification codes included in the administrative-record files were used for those establishments excused from filing census forms. Generally, these codes were assigned on the basis of brief descriptions of the general activity of the establishment. Where the description was incomplete, or where there were relatively fine lines of demarcation among industries or between mining and nonmining activities, the code assigned to an establishment could differ from that which would have been assigned on the basis of more complete product or activity information. Therefore, the total establishment count should be viewed as an approximate measure. The counts for establishments with 20 employees or more are far more reliable.

In the 1992 census, as in the 1987, 1982, 1977, and 1972 censuses, data for single-unit firms without paid employees were excluded. This exclusion had only a slight effect on industry aggregates for most industries. Data for firms without employees were included in the 1963, 1958, and 1954 censuses if they reported more than \$500 in (1) value of shipments and receipts, (2) cost of supplies and purchased machinery, or (3) capital expenditures.

AUXILIARIES

Statistics for employment and payroll for individual industries and industry groups also include employment and payroll figures for administrative offices, warehouses,

storage facilities, and other auxiliary establishments servicing mining establishments. As in previous censuses, respondents were asked to file separate reports (form ES-9200) for any separately operated auxiliary establishments. Classification of employment and payroll data at such auxiliary establishments was based on the mining establishments served.

INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

Each of the establishments covered in the census was classified in 1 of 31 mineral industries in accordance with the industry definitions in the 1987 SIC Manual. An industry is generally defined as a group of establishments producing the same product or closely related group of products. The resulting group of establishments must be significant in terms of its number, value added by mining, value of shipments and receipts, number of employees, and payroll. Application of these criteria led to the formulation of 31 mining industries, each assigned a four-digit code. The classification system also provides broader groups of industries, with 20 three-digit groups and 4 two-digit groups. Within industries, the system provides for seven-digit products and five-digit product classes. Products are considered primary to an industry if the first four digits of the product codes are the same as the industry code. Products whose first four code numbers differ from the industry code are called secondary products. To determine the industry classification of an establishment, the seven-digit products are grouped together according to the first four digits of the product code. The first four digits of the group of products with the largest value of production become the industry code for the establishment. (For mineral service industries, the classification is on the basis of receipts for services performed.)

In most industries, establishments making products falling into the same industry category use a variety of processes. Separate statistics are provided on the various types of operation. Whenever possible, separate figures are shown for establishments with mines only, mines with preparation plants, and preparation plants only. Separate figures are provided by type of mine (underground, open pit, and combination). Separate statistics also are provided on producing and nonproducing operations, an establishment being defined as nonproducing if no mineral products were shipped during the year.

Statistics usually are provided on the production of minerals mined and used in the same establishment for producing prepared minerals or used at the producing establishment for fuel.

Differences in the integration of production processes and types of operation should be considered when relating the general items (employment, payrolls, value added, etc.) to the product and material data.

VALUE OF SHIPMENTS FOR THE INDUSTRY COMPARED WITH VALUE OF PRODUCT SHIPMENTS

This report shows value of shipments and receipt data for industries and products. In tables 1 through 4, these data represent the total value of shipments and receipts of all establishments classified in a particular industry. The data include the shipments of the products classified in the industry (primary to the industry), products classified in other industries (secondary to the industry), and miscellaneous receipts (repair work, sale of scrap, research and development, installation receipts, and resales). Value of product shipments shown in table 6 represents the total value of all products shipped that are classified as primary to an industry and includes those that were shipped by all mining establishments regardless of their industry classification. Value of product shipments also may include some products shipped from mining operations associated with manufacturing establishments.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the data for an individual establishment or company. However, the number of establishments classified in a specific industry is not considered a disclosure; this information may be released even though other information is withheld.

The disclosure analysis for the industry statistics in tables 1 through 4 of this report is based on the total value of shipments and receipts. When the total value of shipments and receipts cannot be shown without disclosing information for individual companies, the complete line is suppressed except for capital expenditures. If capital expenditures alone is a disclosure, only total capital expenditures and cost of supplies statistics are suppressed. However, the suppressed data are included in higher level totals.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Mineral Industries may be requested. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications. Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6901.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

—	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in higher level totals.
(NA)	Not available.
(NC)	Not comparable.
(S)	Withheld because estimate did not meet publication standards.
(X)	Not applicable.
(Z)	Less than half the unit shown.
n.e.c.	Not elsewhere classified.
n.s.k.	Not specified by kind.
r	Revised.
SIC	Standard Industrial Classification.

Other abbreviations, such as lb, gal, yd, and bbl, are used in the customary sense.

Description of Industries and Summary of Findings

This report shows 1992 Census of Mineral Industries statistics for establishments classified in each of the following industries:

SIC code and title

1474	Potash, Soda, and Borate Minerals
1475	Phosphate Rock
1479	Chemical and Fertilizer Mineral Mining, N.E.C.

The industry statistics (employment, payroll, value of shipments, cost of supplies, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments but also all secondary activities performed by the same establishments. This fact should be taken into account in comparing industry statistics (tables 1 through 4 and 7) with product statistics (table 6) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and the value of net shipments of primary products of the industry produced as secondary products by establishments classified in other industries.

Single-establishment companies with up to 20 employees (cutoff varied by industry) were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other Federal agencies. This information was used in conjunction with industry averages and other information to develop estimates for all statistics. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown.

Establishment data were tabulated based on industry definitions included in the *1987 Standard Industrial Classification (SIC) Manual*¹. Comparability for the product classes and product codes that changed between the 1992 and 1987 censuses is shown in appendix B. This appendix presents, in tabular form, the linkage from 1992 to 1987, and 1987 to 1992.

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

All dollar figures included in this report are at prices current for the year specified and, therefore, unadjusted for changes in price levels. Consequently, when making comparisons to prior years, users should take into consideration the inflation that has occurred.

The Bureau of the Census statistics on products for these industries are not entirely comparable with product statistics for the same industries published by the Bureau of Mines or the Energy Information Administration. The differences that occur result primarily from differences in data collection methods, coverage, and objectives sought.

INDUSTRY 1474, POTASH, SODA, AND BORATE MINERALS

This industry is made up of establishments primarily engaged in mining, milling, or otherwise preparing natural potassium, sodium, or boron compounds (other than common salt). Products of the industry include potash salts, sodium borates, sodium carbonates, sodium sulfates, and colemanite, a calcium borate. Dry-lake brine operations are included in this industry, as well as establishments engaged in producing the specified minerals from underground and open pit mines.

In the 1992 Census of Mineral Industries, Industry 1474, Potash, Soda, and Borate Minerals, had employment of 5.5 thousand. The employment figure was 20 percent below the 6.9 thousand reported in 1987. The total value of shipments and receipts for the industry was \$1.5 billion in 1992. The value added by mining was \$1.2 billion in 1992. Value added per employee was \$210.0 thousand in 1992; it was \$132.6 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$424.9 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$218.4 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$106.1 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for less than 1 percent of the total value of shipments and receipts.

INDUSTRY 1475, PHOSPHATE ROCK

This industry is made up of establishments primarily engaged in mining, milling, drying, calcining, sintering, otherwise preparing phosphate rock, including apatite. Establishments primarily engaged in the production of phosphoric acid, superphosphates, or other manufactured phosphate compounds or chemicals are classified in Major Group 28, Chemicals and Allied Products.

In the 1992 Census of Mineral Industries, Industry 1475, Phosphate Rock, had employment of 5.4 thousand. The employment figure was 2 percent above the 5.3 thousand reported in 1987. The total value of shipments and receipts for the industry was \$1.2 billion in 1992. The value added by mining was \$ 690.0 million in 1992. Value added per employee was \$127.8 thousand in 1992; it was \$112.3 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$633.9 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$353.9 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$19.4 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for less than 1 percent of the total value of shipments and receipts.

INDUSTRY 1479, CHEMICAL AND FERTILIZER MINERAL MINING, N.E.C.

This industry is made up of establishments primarily engaged in mining, milling, or otherwise preparing chemical or fertilizer mineral raw materials, not elsewhere classified. Establishments primarily engaged in milling, grinding, or otherwise preparing barite not in conjunction with mining or quarry operations are classified in Manufacturing, industry 3295; similar establishments preparing other minerals of this industry are included here. Establishments primarily engaged in producing salt by evaporation of sea water or brine are classified in Manufacturing, industry 2899.

In the 1992 Census of Mineral Industries, Industry 1479, Chemical and Fertilizer Mineral Mining, N.E.C., had employment of 4.1 thousand. The employment figure was 2 percent below the 4.2 thousand reported in 1987. The total value of shipments and receipts for the industry was \$422.8 million in 1992. The value added by mining was \$277.0 million in 1992. Value added per employee was \$67.6 thousand in 1992; it was \$116.4 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$255.8 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$169.0 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$48.6 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 2 percent of the total value of shipments and receipts.

Table 2. Industry Statistics for Selected States: 1992 and 1987—Con.

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of the figures shown: E1–10 to 19 percent; E2–20 to 29 percent; E3–30 to 39 percent; E4–40 to 49 percent; E5–50 to 59 percent; E6–60 to 69 percent; E7–70 to 79 percent; E8–80 to 89 percent; E9–90 percent or more.

²States with 100 employees or more are shown. Some statistics are withheld to avoid disclosing data for individual companies. If employment is 100 or more, number of establishments is shown and employment-size range is indicated by one of the following symbols: C–100 to 249 employees; E–250 to 499 employees; F–500 to 999 employees; G–1,000 to 2,499 employees; H–2,500 to 4,999 employees; I–5,000 to 9,999 employees.

Table 3a. Summary Statistics by Industry: 1992

[For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Item	Potash, soda, and borate minerals (SIC 1474)	Phosphate Rock (SIC 1475)	Chemical and fertilizer mineral mining, n.e.c. (SIC 1479)	Item	Potash, soda, and borate minerals (SIC 1474)	Phosphate Rock (SIC 1475)	Chemical and fertilizer mineral mining, n.e.c. (SIC 1479)
Establishments during year	33	28	99	Gross book value of depreciable assets (usually original cost) at beginning of year	2 060.3	3 275.3	1 331.5
With 0 to 19 employees	9	7	64	Buildings and other structures, except land	239.7	312.9	99.3
With 20 to 99 employees	8	8	19	Machinery and equipment	1 461.0	2 001.4	1 118.8
With 100 employees or more	16	13	16	Mineral exploration and development	(D)	19.0	(D)
All employees:				Mineral land and rights	(D)	941.9	(D)
Average for year	5.5	5.4	4.1	Capital expenditures during year (except land and mineral rights)	64.0	134.9	110.0
Payroll for year	225.4	192.7	160.9	New capital expenditures during year	61.1	(D)	107.6
Production, development, and exploration workers:				Buildings and other structures, except land	(D)	(D)	4.8
Average for year	4.3	4.2	2.2	Machinery and equipment	(D)	(D)	102.8
March	4.3	4.3	2.2	Used capital expenditures during year	(D)	(D)	(D)

Note: Data shown as a (D) are included in underscored figures above.

¹Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 percent or more.

²Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate data shown for these small establishments. Data are also included in respective size classes shown.

Table 5. Industry-Product Analysis—Summary of Industry Shipments and Receipts and Net Shipments of Primary Products: 1992 and 1987

[Million dollars. An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as resales or contract work. Columns A-E show this product pattern for an industry. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry and year	Value of shipments and receipts					Value of net shipments of primary products or services		
		Total	Primary products	Secondary products	Receipts for services	Products purchased and resold without further processing	Total produced in all industries	Produced in this industry	Produced in other industries
		A	B	C	D	E	F	G	H
1474	Potash, soda, and borate minerals	1992... 1 515.7 1987... 1 271.8	1 505.5 1 265.1	(D) (D)	— —	(D) (D)	(D) (D)	(D) (D)	— —

¹Includes value for establishments that did not report detailed data and estimates for small companies (estimates were made from administrative-record data rather than collected from respondents).

²Quantity and value of net shipments for 1992 are withheld to avoid disclosing data for individual companies. In 1987, they were 45.7 million metric tons and 844.6 million dollars. Net shipments of phosphate rock represent all other shipments of crude, washed, and concentrated phosphate rock plus shipments of dried, calcined, sintered, or nodulized phosphate rock. Data for phosphate rock, n.s.k., are excluded from this figure.

³Includes some rock salt shipped as brine.

⁴Represents pyrites and such other miscellaneous chemical and fertilizer minerals as fluor spar, spodumene, lithium carbonate, wollastonite, natural wollastonite, and natural iron oxide pigments.

Table 6b. **Product Classes—Value of Shipments by All Producers for Specified States: 1992 and 1987**

[Million dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than \$1 million in product class shipments or they disclose data for individual companies in 1992. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

¹Represents cost for establishments that did not report detailed data, including establishments that were not mailed a form.

Appendix A. Explanation of Terms

Employment and related items. The report forms requested separate information on production, development, and exploration workers for a specific payroll period within each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees. This item includes all full-time and part-time employees on the payrolls of mining establishments during any part of the pay period which included the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Also included are employees working for miners paid on a per ton, car, or yard basis. Excluded are employees at the mine but on the payroll of another employer (such as employees of contractors) and employees at company stores, boardinghouses, bunkhouses, and recreational centers. Also excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Production, development, and exploration workers. This item includes employees (up through the working-supervisor level) engaged in manual work (using tools, operating machines, hauling materials, loading and hauling products out of the mine in mine cars or trucks, and caring for mines, plants, mills, shops, or yards). Included are exploration work, mine development, storage, shipping, maintenance, repair, janitorial, and guard services, auxiliary production for use at establishments (such as power plant), recordkeeping, and other services closely associated with these production and development operations at the establishment covered by the report. Gang and straw bosses and supervisors who performed manual labor are included, as are employees paid on either a time- or piece-rate basis. Also included are miners paid on a per ton, car, or yard basis and persons engaged by them and paid out of the total amount received by these miners. In addition, other employees at the establishment but not on its payroll are included if paid directly through its own employees, such as superintendents and supervisors. The payments received by these types of employees are included as part of the establishments payroll. Employees above the working-supervisor level are excluded from this category.

All other employees. This item covers nonproduction employees of the establishment including those engaged in the following activities: supervision above the working-supervisor level, sales, highway trucking (by employees not entering mines or pits), advertising, credit, collection, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria and medical), professional (such as engineers and geologists), and technical activities. Also included are employees on the payroll of the establishment engaged in the construction of major additions or alterations to the plant and utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified as production, development, and exploration workers.)

Separately operated auxiliary establishments employees. This item includes employment at separate central administrative offices or auxiliary units of multiestablishment companies and at those offices or units servicing more than one establishment during the payroll period which included March 12. Establishments are classified on the basis of the industry or principal industry served. Employees at an office located at or near the mining establishment are usually included in the mine report.

All employees, average for year. The 1992 census report form requested employment figures for production, development, and exploration workers for four selected pay periods (mid-March, May, August, and November). For all other employees, only a mid-March figure was requested. The annual average is an average of the four monthly figures for production, development, and exploration workers plus the March figure for all other employees. This approach was used to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods closely approximates, for most industries, the average employment for the year that would be obtained from 12 monthly pay periods.

Payroll. This item includes the gross earnings of all employees on the payroll of mining establishments paid in the calendar year 1992. It includes all forms of compensation such as salaries, wages, commissions, payments received on a ton, car, or yard basis, dismissal pay,

bonuses, vacation and sick leave pay, employee contributions to pension plans (such as 401(K) plan), and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to proprietors or partners of unincorporated concerns, and payments to members of Armed Forces and pensioners carried on the active payroll of mining establishments. Also excluded are royalty payments to unions and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production, development, and exploration work but charged to employees and deducted from their wages.

As in the case of employment and establishment figures, the annual payrolls of separate auxiliary establishments of multiestablishment companies are included in the totals for individual industries and for States.

Production-, development-, and exploration-worker hours.

This item represents all hours that production, development, and exploration workers worked, both on active days during which there was production or development work and on inactive days when only security guards, inspectors, repair persons, and other maintenance persons were on duty. It includes all hours worked or paid for at the mining operations, except hours paid for vacations, holidays, or sick leave, when the employee was not at the establishment. Included are actual overtime hours, not straight time equivalent hours. Hours of working proprietors or partners and employees of contractors are excluded.

Supplemental labor costs. This item represents employer's cost for fringe benefits not included in payrolls.

Legally required expenditures, including Social Security contributions. This cost includes employer contributions for all programs required under Federal and State legislation, such as Federal Old Age and Survivors' Insurance, unemployment compensation, and worker's compensation. Also included are legally required State temporary disability payments.

Payments for voluntary programs. Included in this cost are payments resulting from union negotiated contracts and all employer payments of insurance premiums on hospital and medical plans, life insurance premiums, and premiums on supplementary accident and sickness insurance. For programs supported by joint employer-employee contributions, only the employer payments are included. Also included are payments or allocations on all pension plans regardless of methods of administration, supplemental unemployment compensation plans, welfare plans, stock purchase plans in which the employer payment is not subject to withholding tax, and deferred profit sharing plans.

Value added by mining. This measure of mining activity is derived by subtracting the cost of supplies, minerals received for preparation, purchased machinery installed,

purchased fuel, purchased electricity, and contract work from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. This statistic avoids the duplication in value of shipments and receipts which results from the use of products of some establishments as supplies, energy sources, or materials by others. Moreover, it provides a measure of value added not only in mineral production but also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

Cost of supplies used, purchased machinery installed, etc.

Besides supplies used and purchased machinery installed, this cost includes fuels and electric energy used and contract work done by others for each establishment. It includes charges to both the current and capital accounts. It also includes the cost of items used during 1992 whether they were purchased, withdrawn from inventories, or received from other establishments of the company. For selected supplies and fuels and for electric energy, both quantity and cost data were requested. The cost data refer to direct charges actually paid or payable (after discounts) for items used during the year. Freight charges and other direct charges incurred by the establishment in acquiring the item are included. Companies whose records did not show actual amounts used were asked to approximate use by adding purchases (or receipts) during the year to beginning inventory and subtracting ending inventory. Separate figures were requested for (1) selected supplies used, minerals received for preparation, and purchased machinery installed; (2) electric energy purchased; (3) purchased fuels used for heat, power, or the generation of electricity; (4) contract work done by others; and (5) products bought and resold in the same condition. Supplies and equipment used in mine development, plant expansion, and capitalized repairs, which are chargeable to fixed assets accounts, are included in this item, as are supplies furnished without charge to contractors for use at the mining operation and supplies sold to employees for use at the establishment. Excluded are such costs as advertising, insurance, telephone, and research and consulting services of other establishments or such overhead costs as depreciation charges, rent, interest, and royalties.

Selected supplies used, minerals prepared, etc.

In addition to the total cost of supplies used, purchased machinery installed, etc., which every establishment was required to report, information also was collected on the consumption of major supplies used in mining. These inquiries were restricted to supplies which were important parts of the cost of production, exploration, and development of a particular industry and for which cost information was available. Table 7a contains information on specific supplies consumed. On report forms for most mineral industries (except the contract services and the crude petroleum and natural gas industries), a uniform inquiry

was included on minerals prepared at the reported establishments. Figures were obtained on crude minerals mined at the establishment (quantity), received from other establishments of the company or purchased from others (quantity and cost), and received for preparation on a custom or toll basis (quantity and estimated value). Establishments consuming less than a specified amount (usually \$25,000) were not required to report the cost of a supply. For small establishments for which administrative records were used, the cost of supplies was included in "not specified by kind." (See Summary of Findings for the importance of administrative records to any industry.)

Value of shipments and receipts. The amounts shown as value of shipments and receipts for each industry (tables 1 through 5), and for individual products or classes of products (table 6), are the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during 1992, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1992. Prepared material or concentrates includes preparation from ores mined at the same establishment, purchased, received from other operations of the same company, or received for milling on a custom or toll basis. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry, (2) the value of secondary products which are primary to other industries, (3) the receipts for contract work done for others, except custom milling, and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

Shipments of individual products. In the 1992 Census of Mineral Industries, information was collected on output for about 150 individual mineral products. In general, the shipments figures of the 1992 and 1987 minerals censuses were confined to separate totals for each crude and each prepared mineral. When shipments were significant, separate figures also were obtained on crude minerals going to preparation plants and those going to consumers.

Figures were collected on both quantity and value of shipments. Shipments includes commercial shipments and transfers of products to other operations of the same company. For products that are used to a significant extent within the same establishment for power or heat, and for minerals mined and prepared in the same establishment, total production figures or separate data on production for such uses were collected. Typically, production also was collected for products for which there was usually significant differences between total production and total shipments because of stock changes.

For service industries, the amount received or due for services performed during 1992 was collected as a measure of output. For mine operators who also perform services, the amount received for such services was added to the total value of products shipped to determine total value of shipments and receipts for each establishment.

Table 6 provides total shipments figures from all industries for each of the products primary to the industry covered.

Capital expenditures. This item covers expenditures made during the year for development and exploration of mineral properties, for new construction, and for purchased machinery chargeable to fixed assets accounts of the mineral establishment. They are the type for which depreciation, depletion, or Office of Minerals Exploration accounts are ordinarily maintained. Capital expenditures during 1992 were determined as "additions completed during the year plus construction in progress at the end of the year minus construction in progress at the beginning of the year." Reported capital expenditures include work done on contract, as well as by the mine forces. Expenditures for machinery and equipment include those made for replacement purposes, as well as those for additions to capacity. Excluded from these expenditures were costs of maintenance and repairs charged as current operating expense and expenditures for land and mineral rights.

Whenever applicable, separate figures were provided for expenditures for development and exploration of mineral property, construction of preparation plants and other construction, new machinery and equipment, used plant, and used equipment acquired from others.

Gross value of depreciable assets. Assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation costs). The data were collected for the beginning and end of the year. Assets at the beginning of the year plus new and used capital expenditures minus retirements should equal assets at the end of the year. For new construction

or other improvement projects in progress but not completed by the end of the year, the cumulative capital expenditures were included in the beginning- and end-of-year assets figures.

Retirements. This item represents the gross value of depreciable assets sold, retired, scrapped, destroyed, abandoned, etc., during 1992. The values shown are the acquisition costs of the retired assets. This item also includes the value of assets (at acquisition cost rather than current market value) transferred to other establishments of the same company.

Depreciation. This item shows the reduction in value of depreciable assets brought about through use, gradual obsolescence, or the effect of the elements (decay or corrosion) during the year. Included are charges against assets acquired or completed during the year.

Rental payments. This item consists of rental payments made to other companies for use of such depreciable assets as buildings, other structures, machinery, and equipment. It does not include payments made to the parent company or another subsidiary of the parent company for the use of buildings and equipment owned by the parent company or its subsidiary. The value of such company-owned assets is included in the gross value of depreciable assets.

Rented equipment is reported according to the type of lease negotiated with the lessor. If the lease qualified as an "operating lease" the periodic payments made to the producer or the lessor are reported in the rental section. However, if the leasing arrangement met the criteria set down by the Financial Accounting Standards Board for a "capital lease," the original cost or market value of the equipment or building is reported as a value of fixed assets and not as rental payments.

Current account expenditures. This item includes all expenses for mineral properties, exploration, and development charged to current accounts. This includes all supplies, machinery, equipment, parts, fuels, power, etc., used for development or exploration and charged to current operating expenses. Also included are royalty payments, acquisition costs for mineral land and rights which were not capitalized, and the cost of maintenance and repairs associated with exploration or development activity and charged to current accounts.

Inventories. This item includes inventories of mined or quarried products and supplies, parts, fuels, etc., at the beginning and end of the year. Included as mined or quarried products are stockpiles of products ready for shipment and stocks of raw products awaiting treatment or beneficiation. Beginning with the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census in which respondents were permitted to value their inventories using any generally accepted accounting method.

Fuels and electric energy used. This item includes the quantity and cost of fuels and electric energy used in mining. For most industries, separate quantity and cost figures are shown for purchased coal, distillate fuel oil, residual fuel oil, gas, gasoline, and electric energy, and a cost figure is shown for "other fuels" (see table 7b). Data also were obtained on the quantity of fuels and electric energy produced and consumed at the same establishment. These data are shown for coal, crude petroleum, and natural gas used at the producing establishments for heat and power, and for electric energy generated and used at the same mining operations. For electric energy, the quantity generated and used is approximated by subtracting the quantity of electric energy sold from the total quantity generated (excluding generating station use).

Publication Program

1992 CENSUS OF MINERAL INDUSTRIES

Publications of the 1992 Census of Mineral Industries, containing data on establishments primarily engaged in the extraction of minerals, are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Preliminary Reports

Industry series—12 reports (MIC92-I-10A(P) to -14E(P))

Preliminary data from the 1992 census are issued in 12 separate reports covering 31 mineral industries. Preliminary summary data for the United States and States are released in one report.

Final Reports

Industry series—12 reports (MIC92-I-10A to -14E)

Each of the 12 reports provides information for an industry or a group of related industries (e.g., clay, ceramic, and refractory minerals). Final figures for the United States are shown for each of 31 mineral industries on quantity and value of products shipped and supplies used; inventories; quantity and cost of fuels and electric energy purchased and the quantities of fuels produced and consumed; capital expenditures; assets; rents; employment; depreciation, amortization, and depletion; payroll; hours worked; cost of purchased machinery; value added by mining; mineral development, and exploration costs; number of establishments; and number of companies. Comparative statistics for earlier years are included. Industry statistics are shown by State, type of operation, and size of establishment.

Geographic area series—9 reports (MIC92-A-1 to -9)

A separate report for each of the nine geographic divisions presents statistics for individual States and off-shore areas for two- and three-digit industry groups by type of operation and by county. Also, data are shown for

value of shipments; value added by mining; employment; payroll; hours worked; capital expenditures; cost of supplies, etc.; purchased machinery installed; and number of mining establishments, with comparative 1987 data on employment and value added by mining.

Subject series—2 reports (MIC92-S-1 and -2)

One of these reports is a general national-level summary; the other report contains detailed statistics on fuels and electric energy consumed by mineral industries.

Reference series—1 report (MC92-R-1)

The *Numerical List of Manufactured and Mineral Products* includes a description of the principal products and services published in the 1992 Censuses of Manufactures and Mineral Industries.

Electronic Media

All data included in the printed reports are available on compact disc—read only memory (CD-ROM). The CD-ROM's provide the same information found in the reports. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, financial, insurance, real estate, construction industries, manufactures, transportation, communications, utilities, enterprise statistics, minority-owned businesses, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Commonwealth of the Northern Mariana Islands. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Mineral Industries. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

Manufacturing and Construction Division prepared this report. **Barry A. Rappaport**, Assistant Chief for Construction and Mineral Censuses, was responsible for the overall planning, management, and coordination of the census of mineral industries. Planning and implementation were under the direction of **Patricia L. Horning**, Chief, Construction and Mineral Census Branch, assisted by **M. Susan Bucci**, Section Chief, with primary staff assistance by **Susan L. DiCola**.

Brian Greenberg, Assistant Chief for Research and Methodology Programs, assisted by **Stacey Cole**, provided the mathematical and statistical techniques as well as the coverage operations.

Baruti A. Taylor, under the direction of **A. William Visnansky**, Chief, Special Reports Branch, performed overall coordination of the publication process. **Julius Smith, Jr.** and **Andrew W. Hait** provided primary staff assistance.

The Economic Planning and Coordination Division provided the computer processing procedures. **Shirin A. Ahmed**, Assistant Chief for Post Data Collection Processing, was responsible for editing and the analysts' interactive database review and correction system. Design and specifications were prepared under the supervision of **Dennis L. Wagner**, Chief, Post Collection Census Branch, assisted by **S. Mark Schmidt** and **Robert A. Rosati**.

The staff of the Data Preparation Division, **Judith N. Petty**, Chief, performed mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review.

The Geography Division staff developed geographic coding procedures and associated computer programs.

The Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, developed and coordinated the computer processing systems. **Martin S. Harahush**, Assistant Chief for Quinquennial Programs, was responsible for design and implementation of the computer systems. **Gary T. Sheridan**, Chief, Manufactures and Construction Branch, assisted by **Gerald S. Turnage**, supervised the preparation of the computer programs.

Computer Services Division, **Marvin D. Raines**, Chief, performed the computer processing.

The staff of the Administrative and Publications Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Cynthia G. Brooks** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-4680.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, financial, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Mineral Industries

GENERAL

This report, from the 1992 Census of Mineral Industries, is one of a series of 12 industry reports; each provides statistics for individual industries or groups of related industries. Additional separate reports will be issued for each geographic division showing statistics by State and for special subjects, such as fuels and electric energy consumed.

The introduction to the *General Summary* report discusses, at greater length, many of the subjects described in this introduction. For example, the *General Summary* text discusses the economic significance of the mining sector, the relation of value added by mining to value added by manufacture, some of the changes in statistical concepts over the history of the census, and the valuation problems arising from intracompany transfers between mining establishments, manufacturing plants, and sales offices and sales branches of a company.

SCOPE OF CENSUS AND DEFINITION OF MINERAL INDUSTRIES

The 1992 Census of Mineral Industries covers all establishments with one paid employee or more primarily engaged in mining as defined in the *1987 Standard Industrial Classification (SIC) Manual*¹. This is the system of industrial classification developed by experts on classification in Government and private industry under the guidance of the Office of Information and Regulatory Affairs, Office of Management and Budget. This classification system is used by Government agencies as well as many organizations outside the Government.

The SIC Manual defines mining in the broad sense to include the extraction of minerals occurring naturally: solids such as coal and ores, liquids such as crude petroleum, and gases such as natural gas. The term "mining" is used in the broad sense to include quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparations needed to make minerals marketable. Exploration is included as is the development of mineral properties. Services performed on a contract, fee, or other basis in the exploration and development of mineral properties are classified separately but within this division.

Mining operations are classified by industry on the basis of the principal mineral produced or, if there is no production, on the basis of the principal mineral for which exploration or development work is in progress. The recovery of material from culm banks, ore dumps, and other waste mineral piles is classified in the appropriate mining industry according to the mineral product recovered.

The crushing, grinding, or other treatment of certain earths, rocks, and other nonmetallic minerals not in conjunction with mining activities is not included in this division but is classified as manufacturing. Hauling and other transportation beyond the mine property and contract hauling (except out of open pits in conjunction with mining) also are excluded.

Mining operations carried on as secondary activities at manufacturing establishments (such as clay pits at clay products plants or sand and gravel operations at ready-mixed concrete plants) are not within the scope of this census. However, selected data (production workers' wages and hours; total cost of supplies, fuels, electric energy, and contract work; and quantity of production for mined products) on such mining activities have been obtained in the 1992 Census of Manufactures and are included in the mining reports. They are clearly specified wherever included.

ESTABLISHMENT BASIS OF REPORTING

The census of mineral industries covers each mining establishment of firms with one paid employee or more operating in the United States. A company operating more than one establishment is required to file a separate report for each location. A mineral establishment is defined as a single physical location where mineral operations are conducted.

For oil and gas field operations and for contract services, the basis for reporting is different from the "establishment" basis used for other types of mining. Firms operating oil and gas wells, drilling wells, or exploring for oil and gas for their own account were required to submit a separate report for each State or offshore area adjacent to a State in which it conducted such activities. Firms that performed contract services for oil and gas field operations or for mining establishments were required to submit one report covering all such activities in the United States and to include information on receipts for services and production-worker wages and hours, by State. These consolidated

¹*Standard Industrial Classification Manual: 1987*. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

reports were then allocated to State establishments based on the data reported at the State level. The 1992 figures for establishments include the summation of operations for each State allocated from these nationwide reports.

USE OF ADMINISTRATIVE RECORDS

From a mailout universe of about 28,500 mining establishments, approximately 11,000 small single-establishment companies were not mailed a questionnaire. For these establishments, some employment, payroll, and receipts data were obtained from the administrative records of other agencies. Selection of the small establishment non-mail cases was done on an industry-by-industry basis, and a variable cutoff was used to determine those establishments for which administrative records were to be used in place of a census report. This information was then used in conjunction with industry averages and other information to estimate the statistics for administrative-record and nonresponse establishments. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown. The value of shipments and receipts and cost of supplies were generally not distributed among specific products and supplies for these establishments, but were included in the product and supply "not specified by kind" categories. Overall, establishments for which administrative-record data were used accounted for less than 2 percent of total value of shipments and receipts.

The industry classification codes included in the administrative-record files were used for those establishments excused from filing census forms. Generally, these codes were assigned on the basis of brief descriptions of the general activity of the establishment. Where the description was incomplete, or where there were relatively fine lines of demarcation among industries or between mining and nonmining activities, the code assigned to an establishment could differ from that which would have been assigned on the basis of more complete product or activity information. Therefore, the total establishment count should be viewed as an approximate measure. The counts for establishments with 20 employees or more are far more reliable.

In the 1992 census, as in the 1987, 1982, 1977, and 1972 censuses, data for single-unit firms without paid employees were excluded. This exclusion had only a slight effect on industry aggregates for most industries. Data for firms without employees were included in the 1963, 1958, and 1954 censuses if they reported more than \$500 in (1) value of shipments and receipts, (2) cost of supplies and purchased machinery, or (3) capital expenditures.

AUXILIARIES

Statistics for employment and payroll for individual industries and industry groups also include employment and payroll figures for administrative offices, warehouses,

storage facilities, and other auxiliary establishments servicing mining establishments. As in previous censuses, respondents were asked to file separate reports (form ES-9200) for any separately operated auxiliary establishments. Classification of employment and payroll data at such auxiliary establishments was based on the mining establishments served.

INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

Each of the establishments covered in the census was classified in 1 of 31 mineral industries in accordance with the industry definitions in the 1987 SIC Manual. An industry is generally defined as a group of establishments producing the same product or closely related group of products. The resulting group of establishments must be significant in terms of its number, value added by mining, value of shipments and receipts, number of employees, and payroll. Application of these criteria led to the formulation of 31 mining industries, each assigned a four-digit code. The classification system also provides broader groups of industries, with 20 three-digit groups and 4 two-digit groups. Within industries, the system provides for seven-digit products and five-digit product classes. Products are considered primary to an industry if the first four digits of the product codes are the same as the industry code. Products whose first four code numbers differ from the industry code are called secondary products. To determine the industry classification of an establishment, the seven-digit products are grouped together according to the first four digits of the product code. The first four digits of the group of products with the largest value of production become the industry code for the establishment. (For mineral service industries, the classification is on the basis of receipts for services performed.)

In most industries, establishments making products falling into the same industry category use a variety of processes. Separate statistics are provided on the various types of operation. Whenever possible, separate figures are shown for establishments with mines only, mines with preparation plants, and preparation plants only. Separate figures are provided by type of mine (underground, open pit, and combination). Separate statistics also are provided on producing and nonproducing operations, an establishment being defined as nonproducing if no mineral products were shipped during the year.

Statistics usually are provided on the production of minerals mined and used in the same establishment for producing prepared minerals or used at the producing establishment for fuel.

Differences in the integration of production processes and types of operation should be considered when relating the general items (employment, payrolls, value added, etc.) to the product and material data.

VALUE OF SHIPMENTS FOR THE INDUSTRY COMPARED WITH VALUE OF PRODUCT SHIPMENTS

This report shows value of shipments and receipt data for industries and products. In tables 1 through 4, these data represent the total value of shipments and receipts of all establishments classified in a particular industry. The data include the shipments of the products classified in the industry (primary to the industry), products classified in other industries (secondary to the industry), and miscellaneous receipts (repair work, sale of scrap, research and development, installation receipts, and resales). Value of product shipments shown in table 6 represents the total value of all products shipped that are classified as primary to an industry and includes those that were shipped by all mining establishments regardless of their industry classification. Value of product shipments also may include some products shipped from mining operations associated with manufacturing establishments.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the data for an individual establishment or company. However, the number of establishments classified in a specific industry is not considered a disclosure; this information may be released even though other information is withheld.

The disclosure analysis for the industry statistics in tables 1 through 4 of this report is based on the total value of shipments and receipts. When the total value of shipments and receipts cannot be shown without disclosing information for individual companies, the complete line is suppressed except for capital expenditures. If capital expenditures alone is a disclosure, only total capital expenditures and cost of supplies statistics are suppressed. However, the suppressed data are included in higher level totals.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Mineral Industries may be requested. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications. Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6901.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

—	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in higher level totals.
(NA)	Not available.
(NC)	Not comparable.
(S)	Withheld because estimate did not meet publication standards.
(X)	Not applicable.
(Z)	Less than half the unit shown.
n.e.c.	Not elsewhere classified.
n.s.k.	Not specified by kind.
r	Revised.
SIC	Standard Industrial Classification.

Other abbreviations, such as lb, gal, yd, and bbl, are used in the customary sense.

Description of Industries and Summary of Findings

This report shows 1992 Census of Mineral Industries statistics for establishments classified in each of the following industries:

SIC code and title

1481	Nonmetallic Minerals Services, Except Fuels
1499	Miscellaneous Nonmetallic Minerals, Except Fuels

The industry statistics (employment, payroll, value of shipments, cost of supplies, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments but also all secondary activities performed by the same establishments. This fact should be taken into account in comparing industry statistics (tables 1 through 4 and 7) with product statistics (table 6) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and the value of net shipments of primary products of the industry produced as secondary products by establishments classified in other industries.

Single-establishment companies with up to 20 employees (cutoff varied by industry) were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other Federal agencies. This information was used in conjunction with industry averages and other information to develop estimates for all statistics. The first column in tables 2 and 4 provides an indication of the extent that these establishments account for the figures shown.

Establishment data were tabulated based on industry definitions included in the *1987 Standard Industrial Classification (SIC) Manual*¹. Comparability for the product

classes and product codes that changed between the 1992 and 1987 censuses is shown in appendix B. This appendix presents, in tabular form, the linkage from 1992 to 1987, and 1987 to 1992.

All dollar figures included in this report are at prices current for the year specified and, therefore, unadjusted for changes in price levels. Consequently, when making comparisons to prior years, users should take into consideration the inflation that has occurred.

The Bureau of the Census statistics on products for these industries are not entirely comparable with product statistics for the same industries published by the Bureau of Mines or the Energy Information Administration. The differences that occur result primarily from differences in data collection methods, coverage, and objectives sought.

INDUSTRY 1481, NONMETALLIC MINERALS SERVICES, EXCEPT FUELS

This industry is made up of establishments primarily engaged in the removal of overburden, strip mining, and other services for nonmetallic minerals, except fuels, for others on a contract or fee basis. Establishments primarily engaged in performing hauling services are classified in SIC Division E, Transportation and Public Utilities.

In the 1992 Census of Mineral Industries, Industry 1481, Nonmetallic Minerals Services, Except Fuels, had employment of 2.0 thousand. The employment figure was 11 percent above the 1.8 thousand reported in 1987. The total value of shipments and receipts for the industry was \$188.9 million in 1992. The value added by mining was \$136.0 million in 1992. Value added per employee was \$68.0 thousand in 1992; it was \$66.1 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$67.7 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$42.1 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$11.0 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 9 percent of the total value of shipments and receipts.

¹Standard Industrial Classification Manual: 1987. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

INDUSTRY 1499, MISCELLANEOUS NONMETALLIC MINERALS, EXCEPT FUELS

This industry is made up of establishments primarily engaged in mining, quarrying, milling, or otherwise preparing nonmetallic minerals, except fuels. This industry includes the shaping of natural abrasive stones at the quarry. Establishments primarily engaged in the production of blast, grinding, or polishing sand are classified in industry 1446, and those calcining gypsum are classified in manufacturing, industry 3275.

In the 1992 Census of Mineral Industries, Industry 1499, Miscellaneous Nonmetallic Minerals, Except Fuels, had employment of 5.5 thousand. The employment figure was 21 percent below the 7.0 thousand reported in 1987. The total value of shipments and receipts for the industry was \$596.3 million in 1992. The value added by mining was

\$419.0 million in 1992. Value added per employee was \$76.2 thousand in 1992; it was \$62.6 thousand in 1987.

The total cost of supplies used by establishments classified in this industry amounted to \$219.7 million, while the cost of selected supplies, minerals received for preparation, and purchased machinery installed amounted to \$141.5 million and is shown in table 7a. The total cost of fuels used in this industry amounted to \$30.5 million in 1992. Data on specific fuels used appear in table 7b.

Single-establishment companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were imputed as described above. These establishments accounted for 9 percent of the total value of shipments and receipts.

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of the figures shown: E1-10 to 19 percent; E2-20 to 29 percent; E3-30 to 39 percent; E4-40 to 49 percent; E5-50 to 59 percent; E6-60 to 69 percent; E7-70 to 79 percent; E8-80 to 89 percent; E9-90 percent or more.

²States with 100 employees or more are shown. Some statistics are withheld to avoid disclosing data for individual companies. If employment is 100 or more, number of establishments is shown and employment-size range is indicated by one of the following symbols: C-100 to 249 employees; E-250 to 499 employees; F-500 to 999 employees; G-1,000 to 2,499 employees; H-2,500 to 4,999 employees; I-5,000 to 9,999 employees.

Note: Data shown as a (D) are included in underscored figures above.

¹Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 percent or more.

²Some payroll and sales data for small single-establishment companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate data shown for these small establishments. Data are also included in respective size classes shown.

Table 5. Industry-Product Analysis—Summary of Industry Shipments and Receipts and Net Shipments of Primary Products: 1992 and 1987

[Million dollars. An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as resales or contract work. Columns A–E show this product pattern for an industry. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F–H. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry and year	Value of shipments and receipts					Value of net shipments of primary products or services		
		Total	Primary products	Secondary products	Receipts for services	Products purchased and resold without further processing	Total produced in all industries	Produced in this industry	Produced in other industries
		A	B	C	D	E	F	G	H
1481	Nonmetallic minerals services, except fuels ----- 1992-- 1987--	188.9 165.4	160.0 146.2	24.8 14.7	— .6	4.2 3.9	245.1 214.5	160.0 146.2	85.1 68.3

14990 00	Miscellaneous nonmetallic minerals, n.s.k. ²	(X)	(X) 69.2	(X)	(X) 66.2

¹Includes contract services performed by mine operators classified in nonmetallic minerals (except fuels) mining industries.

²Includes value for establishments that did not report detailed data and estimates for small companies (estimates were made from administrative-record data rather than collected from respondents).

³Includes bituminous limestone, bituminous sandstone, and gilsonite.

⁴Includes volcanic ash and scoria.

⁵Excludes gypsum produced and used in the same establishment manufacturing gypsum products. For 1992, it was 10.9 million short tons. For 1987, it was 10.8 million short tons.

⁶Quantity and value of crushed, ground, screened, or dried gypsum processed in manufacturing establishments without mines (product code 32950 61) are .5 million short tons and 18.3 million dollars for 1992. For 1987, they were .3 million short tons and 7.4 million dollars.

⁷Excludes data for prepared talc, soapstone, and pyrophyllite produced at establishments classified in manufacturing industries. Quantity and value of prepared talc, soapstone, and pyrophyllite processed in manufacturing establishments without mines (product code 32950 94) were withheld to avoid disclosing data for individual companies in 1992 and 1987.

⁸Excludes production and shipments of shell produced and used by establishments primarily classified in construction or in manufacturing industries, such as those producing cement or concrete products.

⁹Represents other miscellaneous nonmetallic minerals, such as vermiculite, graphite, gem stones, staurolite, etc.

Table 6b. **Product Classes—Value of Shipments by All Producers for Specified States: 1992 and 1987**

[Million dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than \$1 million in product class shipments or they disclose data for individual companies in 1992. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Note: States with less than 50 thousand hours for employees engaged in production, development, and exploration work are not shown.

Appendix A. Explanation of Terms

Employment and related items. The report forms requested separate information on production, development, and exploration workers for a specific payroll period within each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees. This item includes all full-time and part-time employees on the payrolls of mining establishments during any part of the pay period which included the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Also included are employees working for miners paid on a per ton, car, or yard basis. Excluded are employees at the mine but on the payroll of another employer (such as employees of contractors) and employees at company stores, boardinghouses, bunkhouses, and recreational centers. Also excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Production, development, and exploration workers. This item includes employees (up through the working-supervisor level) engaged in manual work (using tools, operating machines, hauling materials, loading and hauling products out of the mine in mine cars or trucks, and caring for mines, plants, mills, shops, or yards). Included are exploration work, mine development, storage, shipping, maintenance, repair, janitorial, and guard services, auxiliary production for use at establishments (such as power plant), recordkeeping, and other services closely associated with these production and development operations at the establishment covered by the report. Gang and straw bosses and supervisors who performed manual labor are included, as are employees paid on either a time- or piece-rate basis. Also included are miners paid on a per ton, car, or yard basis and persons engaged by them and paid out of the total amount received by these miners. In addition, other employees at the establishment but not on its payroll are included if paid directly through its own employees, such as superintendents and supervisors. The payments received by these types of employees are included as part of the establishments payroll. Employees above the working-supervisor level are excluded from this category.

All other employees. This item covers nonproduction employees of the establishment including those engaged in the following activities: supervision above the working-supervisor level, sales, highway trucking (by employees not entering mines or pits), advertising, credit, collection, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria and medical), professional (such as engineers and geologists), and technical activities. Also included are employees on the payroll of the establishment engaged in the construction of major additions or alterations to the plant and utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified as production, development, and exploration workers.)

Separately operated auxiliary establishments employees. This item includes employment at separate central administrative offices or auxiliary units of multiestablishment companies and at those offices or units servicing more than one establishment during the payroll period which included March 12. Establishments are classified on the basis of the industry or principal industry served. Employees at an office located at or near the mining establishment are usually included in the mine report.

All employees, average for year. The 1992 census report form requested employment figures for production, development, and exploration workers for four selected pay periods (mid-March, May, August, and November). For all other employees, only a mid-March figure was requested. The annual average is an average of the four monthly figures for production, development, and exploration workers plus the March figure for all other employees. This approach was used to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods closely approximates, for most industries, the average employment for the year that would be obtained from 12 monthly pay periods.

Payroll. This item includes the gross earnings of all employees on the payroll of mining establishments paid in the calendar year 1992. It includes all forms of compensation such as salaries, wages, commissions, payments received on a ton, car, or yard basis, dismissal pay,

bonuses, vacation and sick leave pay, employee contributions to pension plans (such as 401(K) plan), and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to proprietors or partners of unincorporated concerns, and payments to members of Armed Forces and pensioners carried on the active payroll of mining establishments. Also excluded are royalty payments to unions and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production, development, and exploration work but charged to employees and deducted from their wages.

As in the case of employment and establishment figures, the annual payrolls of separate auxiliary establishments of multiestablishment companies are included in the totals for individual industries and for States.

Production-, development-, and exploration-worker hours.

This item represents all hours that production, development, and exploration workers worked, both on active days during which there was production or development work and on inactive days when only security guards, inspectors, repair persons, and other maintenance persons were on duty. It includes all hours worked or paid for at the mining operations, except hours paid for vacations, holidays, or sick leave, when the employee was not at the establishment. Included are actual overtime hours, not straight time equivalent hours. Hours of working proprietors or partners and employees of contractors are excluded.

Supplemental labor costs. This item represents employer's cost for fringe benefits not included in payrolls.

Legally required expenditures, including Social Security contributions. This cost includes employer contributions for all programs required under Federal and State legislation, such as Federal Old Age and Survivors' Insurance, unemployment compensation, and worker's compensation. Also included are legally required State temporary disability payments.

Payments for voluntary programs. Included in this cost are payments resulting from union negotiated contracts and all employer payments of insurance premiums on hospital and medical plans, life insurance premiums, and premiums on supplementary accident and sickness insurance. For programs supported by joint employer-employee contributions, only the employer payments are included. Also included are payments or allocations on all pension plans regardless of methods of administration, supplemental unemployment compensation plans, welfare plans, stock purchase plans in which the employer payment is not subject to withholding tax, and deferred profit sharing plans.

Value added by mining. This measure of mining activity is derived by subtracting the cost of supplies, minerals received for preparation, purchased machinery installed,

purchased fuel, purchased electricity, and contract work from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. This statistic avoids the duplication in value of shipments and receipts which results from the use of products of some establishments as supplies, energy sources, or materials by others. Moreover, it provides a measure of value added not only in mineral production but also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

Cost of supplies used, purchased machinery installed, etc.

Besides supplies used and purchased machinery installed, this cost includes fuels and electric energy used and contract work done by others for each establishment. It includes charges to both the current and capital accounts. It also includes the cost of items used during 1992 whether they were purchased, withdrawn from inventories, or received from other establishments of the company. For selected supplies and fuels and for electric energy, both quantity and cost data were requested. The cost data refer to direct charges actually paid or payable (after discounts) for items used during the year. Freight charges and other direct charges incurred by the establishment in acquiring the item are included. Companies whose records did not show actual amounts used were asked to approximate use by adding purchases (or receipts) during the year to beginning inventory and subtracting ending inventory. Separate figures were requested for (1) selected supplies used, minerals received for preparation, and purchased machinery installed; (2) electric energy purchased; (3) purchased fuels used for heat, power, or the generation of electricity; (4) contract work done by others; and (5) products bought and resold in the same condition. Supplies and equipment used in mine development, plant expansion, and capitalized repairs, which are chargeable to fixed assets accounts, are included in this item, as are supplies furnished without charge to contractors for use at the mining operation and supplies sold to employees for use at the establishment. Excluded are such costs as advertising, insurance, telephone, and research and consulting services of other establishments or such overhead costs as depreciation charges, rent, interest, and royalties.

Selected supplies used, minerals prepared, etc.

In addition to the total cost of supplies used, purchased machinery installed, etc., which every establishment was required to report, information also was collected on the consumption of major supplies used in mining. These inquiries were restricted to supplies which were important parts of the cost of production, exploration, and development of a particular industry and for which cost information was available. Table 7a contains information on specific supplies consumed. On report forms for most mineral industries (except the contract services and the crude petroleum and natural gas industries), a uniform inquiry

was included on minerals prepared at the reported establishments. Figures were obtained on crude minerals mined at the establishment (quantity), received from other establishments of the company or purchased from others (quantity and cost), and received for preparation on a custom or toll basis (quantity and estimated value). Establishments consuming less than a specified amount (usually \$25,000) were not required to report the cost of a supply. For small establishments for which administrative records were used, the cost of supplies was included in "not specified by kind." (See Summary of Findings for the importance of administrative records to any industry.)

Value of shipments and receipts. The amounts shown as value of shipments and receipts for each industry (tables 1 through 5), and for individual products or classes of products (table 6), are the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during 1992, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1992. Prepared material or concentrates includes preparation from ores mined at the same establishment, purchased, received from other operations of the same company, or received for milling on a custom or toll basis. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry, (2) the value of secondary products which are primary to other industries, (3) the receipts for contract work done for others, except custom milling, and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

Shipments of individual products. In the 1992 Census of Mineral Industries, information was collected on output for about 150 individual mineral products. In general, the shipments figures of the 1992 and 1987 minerals censuses were confined to separate totals for each crude and each prepared mineral. When shipments were significant, separate figures also were obtained on crude minerals going to preparation plants and those going to consumers.

Figures were collected on both quantity and value of shipments. Shipments includes commercial shipments and transfers of products to other operations of the same company. For products that are used to a significant extent within the same establishment for power or heat, and for minerals mined and prepared in the same establishment, total production figures or separate data on production for such uses were collected. Typically, production also was collected for products for which there was usually significant differences between total production and total shipments because of stock changes.

For service industries, the amount received or due for services performed during 1992 was collected as a measure of output. For mine operators who also perform services, the amount received for such services was added to the total value of products shipped to determine total value of shipments and receipts for each establishment.

Table 6 provides total shipments figures from all industries for each of the products primary to the industry covered.

Capital expenditures. This item covers expenditures made during the year for development and exploration of mineral properties, for new construction, and for purchased machinery chargeable to fixed assets accounts of the mineral establishment. They are the type for which depreciation, depletion, or Office of Minerals Exploration accounts are ordinarily maintained. Capital expenditures during 1992 were determined as "additions completed during the year plus construction in progress at the end of the year minus construction in progress at the beginning of the year." Reported capital expenditures include work done on contract, as well as by the mine forces. Expenditures for machinery and equipment include those made for replacement purposes, as well as those for additions to capacity. Excluded from these expenditures were costs of maintenance and repairs charged as current operating expense and expenditures for land and mineral rights.

Whenever applicable, separate figures were provided for expenditures for development and exploration of mineral property, construction of preparation plants and other construction, new machinery and equipment, used plant, and used equipment acquired from others.

Gross value of depreciable assets. Assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation costs). The data were collected for the beginning and end of the year. Assets at the beginning of the year plus new and used capital expenditures minus retirements should equal assets at the end of the year. For new construction

or other improvement projects in progress but not completed by the end of the year, the cumulative capital expenditures were included in the beginning- and end-of-year assets figures.

Retirements. This item represents the gross value of depreciable assets sold, retired, scrapped, destroyed, abandoned, etc., during 1992. The values shown are the acquisition costs of the retired assets. This item also includes the value of assets (at acquisition cost rather than current market value) transferred to other establishments of the same company.

Depreciation. This item shows the reduction in value of depreciable assets brought about through use, gradual obsolescence, or the effect of the elements (decay or corrosion) during the year. Included are charges against assets acquired or completed during the year.

Rental payments. This item consists of rental payments made to other companies for use of such depreciable assets as buildings, other structures, machinery, and equipment. It does not include payments made to the parent company or another subsidiary of the parent company for the use of buildings and equipment owned by the parent company or its subsidiary. The value of such company-owned assets is included in the gross value of depreciable assets.

Rented equipment is reported according to the type of lease negotiated with the lessor. If the lease qualified as an "operating lease" the periodic payments made to the producer or the lessor are reported in the rental section. However, if the leasing arrangement met the criteria set down by the Financial Accounting Standards Board for a "capital lease," the original cost or market value of the equipment or building is reported as a value of fixed assets and not as rental payments.

Current account expenditures. This item includes all expenses for mineral properties, exploration, and development charged to current accounts. This includes all supplies, machinery, equipment, parts, fuels, power, etc., used for development or exploration and charged to current operating expenses. Also included are royalty payments, acquisition costs for mineral land and rights which were not capitalized, and the cost of maintenance and repairs associated with exploration or development activity and charged to current accounts.

Inventories. This item includes inventories of mined or quarried products and supplies, parts, fuels, etc., at the beginning and end of the year. Included as mined or quarried products are stockpiles of products ready for shipment and stocks of raw products awaiting treatment or beneficiation. Beginning with the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census in which respondents were permitted to value their inventories using any generally accepted accounting method.

Fuels and electric energy used. This item includes the quantity and cost of fuels and electric energy used in mining. For most industries, separate quantity and cost figures are shown for purchased coal, distillate fuel oil, residual fuel oil, gas, gasoline, and electric energy, and a cost figure is shown for "other fuels" (see table 7b). Data also were obtained on the quantity of fuels and electric energy produced and consumed at the same establishment. These data are shown for coal, crude petroleum, and natural gas used at the producing establishments for heat and power, and for electric energy generated and used at the same mining operations. For electric energy, the quantity generated and used is approximated by subtracting the quantity of electric energy sold from the total quantity generated (excluding generating station use).

Appendix B.

Publication Program

1992 CENSUS OF MINERAL INDUSTRIES

Publications of the 1992 Census of Mineral Industries, containing data on establishments primarily engaged in the extraction of minerals, are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Preliminary Reports

Industry series—12 reports (MIC92-I-10A(P) to -14E(P))

Preliminary data from the 1992 census are issued in 12 separate reports covering 31 mineral industries. Preliminary summary data for the United States and States are released in one report.

Final Reports

Industry series—12 reports (MIC92-I-10A to -14E)

Each of the 12 reports provides information for an industry or a group of related industries (e.g., clay, ceramic, and refractory minerals). Final figures for the United States are shown for each of 31 mineral industries on quantity and value of products shipped and supplies used; inventories; quantity and cost of fuels and electric energy purchased and the quantities of fuels produced and consumed; capital expenditures; assets; rents; employment; depreciation, amortization, and depletion; payroll; hours worked; cost of purchased machinery; value added by mining; mineral development, and exploration costs; number of establishments; and number of companies. Comparative statistics for earlier years are included. Industry statistics are shown by State, type of operation, and size of establishment.

Geographic area series—9 reports (MIC92-A-1 to -9)

A separate report for each of the nine geographic divisions presents statistics for individual States and off-shore areas for two- and three-digit industry groups by type of operation and by county. Also, data are shown for

value of shipments; value added by mining; employment; payroll; hours worked; capital expenditures; cost of supplies, etc.; purchased machinery installed; and number of mining establishments, with comparative 1987 data on employment and value added by mining.

Subject series—2 reports (MIC92-S-1 and -2)

One of these reports is a general national-level summary; the other report contains detailed statistics on fuels and electric energy consumed by mineral industries.

Reference series—1 report (MC92-R-1)

The *Numerical List of Manufactured and Mineral Products* includes a description of the principal products and services published in the 1992 Censuses of Manufactures and Mineral Industries.

Electronic Media

All data included in the printed reports are available on compact disc—read only memory (CD-ROM). The CD-ROM's provide the same information found in the reports. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, financial, insurance, real estate, construction industries, manufactures, transportation, communications, utilities, enterprise statistics, minority-owned businesses, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Commonwealth of the Northern Mariana Islands. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Numerical List of Manufactured and Mineral Products

U.S. Department of Commerce
Economics and Statistics Administration
BUREAU OF THE CENSUS

ACKNOWLEDGMENTS

John P. Govoni, Assistant Chief for Census/ Annual Survey of Manufactures (ASM) Program was responsible for the overall management of the Numerical List of Manufactured and Mineral Products. He guided the activities with other divisions.

The computer processing systems were developed and programmed by **Taylor C. Murph**. The computer specifications and analytical procedures were prepared under the supervision of **James E. Kristoff**, Chief, Commodity Classification Branch, Economic Censuses and Surveys Division.

The coordination activities, such as developing specifications and procedures were conducted by **Andrew W. Hait** under the direction of **Bruce M. Goldhirsch**, Chief, Census/ ASM Special Reports Branch. They were assisted by **Lucy Cardellino**, **Brenda Lukenich**, and **Veronica R. Harley**.

The review of the product codes were performed by the Industry Division under the direction of **John P. McNamee**, Chief of the Minerals Branch, **Michael J. Zampogna**, Chief of the

Census/ ASM Nondurables Branch, and **Kenneth I. Hansen**, Chief of the Census/ ASM Durables Branch. They were assisted by **Patricia L. Horning**, **Allen H. Foreman**, **Ted McGrath**, **Mendel D. Gayle**, **Charles T. Lee Jr.**, **Susan Bucci**, **Susan DiCola**, **John Roehl**, **Eva Snapp**, **Kimberly M. Credito**, **Lissene Haffenrichter**, **Jason Hill**, **Walter R. Hunter Jr.**, **Robert Miller**, **Bernice Patterson**, **Suzanne Pasdar**, **Joyce Pomeroy**, **Susan Sundermann**, **Denneth Wallace**, **Sheila Winkelbauer**, **Michele Chaney**, **Raphael Corrado**, **Merry Glascoe**, **Mary Jane Gwynn**, **Melissa McBride**, **Michael Narod**, **Joanna T.Q. Nguyen**, **Renee Reda**, **Jerome Roth**, **Ann Truffa**, **Richard Wiesler**, and **Ric Williamson**.

The staff of the Administrative and Publications Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement. **Cynthia G. Brooks** provided publication coordination and editing.

INTRODUCTION

PURPOSE

This numerical list includes the principal products and services of the manufacturing and mining industries in the United States. The data for these products and services were collected in the 1992 Census of Manufactures on 213 long forms (MC-2001 through MC-3912) and 78 short report forms (MC-2071 through MC-3975) and in the 1992 Census of Mineral Industries on 10 long (MC-1001 through MC-1403) and 2 short forms (MC-1371 and MC-1471). Each report form covers one industry or more and includes a product inquiry which lists the primary products of the industries as well as the chief secondary products frequently reported by establishments classified in the industries on that report form.

Products and services are arrayed generally in ascending seven-digit numerical order followed by alphabetical characters within their respective five-digit codes (product classes), the product classes in order within their four-digit codes (industries), and the industries within their three-digit industry groups and two-digit major groups. Major groups, industry groups, and industries, as presented in this manual, are in accord with both title and content of the *Standard Industrial Classification Manual: 1987* edition, published by the Office of Management and Budget.¹

In addition to the more than 6,300 products for which information is collected primarily in the censuses of manufactures and mineral industries, there are over 4,500 products for which information is collected monthly, quarterly, and annually in the Census Bureau's Current Industrial Reports (CIR) program. Where CIR product detail is available, the census report requests only broad aggregates that can be "tied in" with the product detail in the CIR program.

PRODUCT CODING SYSTEM

Each product or service is assigned a seven-digit code. The product coding structure represents an extension, by the Bureau of the Census, of the four-digit industrial classification of the manufacturing and mining industries as defined in the Standard Industrial Classification (SIC) System. The SIC, developed under the direction of the Office of Management and Budget by the Technical Committee on Industrial Classification, classifies establishments to the four-digit industry level by their primary type of activity.

The classification system operates so that the industrial coverage is progressively narrower with the successive addition of digits. This is illustrated as follows:

SIC Code	Level	Description
20	Major group	Food and kindred products
202	Industry group	Dairy products
2022	Industry	Cheese, natural, and processed
20225	Product class	Cheese substitutes
20225 11	Product	Products substituting for natural cheese

COMPARABILITY BETWEEN 1992 AND 1987

This manual attempts to preserve the historical comparability between the 1992 and 1987 censuses for product classes and product codes in appendixes I and J. Appendix I presents the linkage from 1992 to 1987. Appendix J provides the mirror-type linkage from 1987 to 1992. The use of these appendixes is illustrated below using ethyl alcohol and other industrial organic chemicals, n.e.c.:

Appendix I, 1992 to 1987 Appendix J, 1987 to 1992

1992	1987	1987	1992
28692	28695	28695	28692
28692 10	28695 11	28695	28698
28692 15	28695 25	28695 11	28692 10
28692 19	28695 27	28695 11	28692 20
28692 20	28695 11	28695 25	28692 15
28692 25	28695 25	28695 25	28692 25
28692 29	28695 27	28695 27	28692 19
28698	28695	28695 27	28692 29
28698 31	28695 31	28695 31	28698 31
28698 37	28695 37	28695 37	28698 37
28698 53	28695 53	28695 53	28698 53
28698 55	28695 55	28695 55	28698 55
28698 98	28695 98	28695 98	28698 98

For 1992, Product Classes 28692, Ethyl Alcohol; and 28698, Other Organic Chemicals, N.E.C.; were split out from 1987 Product Class 28695, Ethyl Alcohol and Other Organic Chemicals, N.E.C. 1987 product code 28695 11 was split into 1992 codes 28692 10 and 20; the same split was applied to 1987 codes 28695 25 and 27. Finally, 1987 product codes 28695 31 through 98 were recoded to 1992 codes 28698 31 through 98.

CURRENT INDUSTRIAL REPORTS (CIR)

The 1992 Census of Manufactures, as in earlier censuses, utilizes the tieline relationship for reporting summary information in the census where product detail is being reported for the same period in a CIR or, in a few instances, surveys conducted by other Federal Government agencies. The product detail that is collected monthly, quarterly, or annually in the CIR is not duplicated in the census of manufactures. Instead a single (tieline) code is collected in the census that corresponds to the sum of the detail appearing if the CIR is used. For tielines related to the CIR, the product detail covered in the commodity surveys comprises, additionally, more than 4,500 product lines, each coded to the seven-digit level. The products collected in the CIR are shown in Appendixes A and B, "Product Descriptions in Current Industrial Reports That Relate to Tielines in 1992 Census of Manufactures" and "Product Descriptions in Production-Only Current Industrial Reports." The product coding structure used for the census and the CIR includes about 11,000 categories.

FORMAT OF MANUAL

In this numerical list, the product code column, which includes codes used in the 1992 publications, is based on the 1987 SIC structure. Appended to each seven-digit product code is an eighth digit called the "check digit" used to verify the keying of product codes for computer processing. The check digit is developed from the seven-digit product code itself but is not part of the product code. The sixth and seventh digits of the product code taken together are unique and identify the product. Occasionally, the sixth digit will be similar for a group of related products within the product class but the sixth digit by itself is not significant. These products and services codes are arrayed (generally) in ascending numerical order within their respective five-digit product classes, the product classes within their four-digit industries, the industries within their three-digit industry groups, and the industry groups within their two-digit major groups. Major groups, industry groups, and industries are titled in accordance with the short SIC titles shown in Part II, Numerical List of Short Titles, *Standard Industrial Classification Manual*, 1987 edition. Titles and descriptions of the five-digit product classes and seven-digit products have been developed by the Bureau of the Census. The titles of the two- to five-digit levels are shown in capital letters.

To the right of each four-digit industry title is the number of the report form used in the censuses to collect the information for products and services of that industry (for example, MC-1001). The product code, check digit, product description, unit of measure for quantity data collected, and kinds of data collected are given for each product. (See abbreviations section for key to the abbreviations used for unit of quantity and data collected.)

This manual contains ten appendixes. Appendixes A and B list the product detail brought into the census by both tielines to and special production-related surveys

of the CIR. Appendix C relates these Current Industrial Reports to their census tielines. Appendixes D, E, and F contain the codes for the contract and miscellaneous receipts reported by manufacturing and mining establishments. Appendix G shows those products that are primary to more than one industry; that is, produced elsewhere but by a different process. Appendix H provides the list of census product codes that relate to the U.S. International Trade Commission Report, "Synthetic Organic Chemicals." Finally, appendixes I and J illustrate the relationship between the 1992 and 1987, and the 1987 and 1992 product classes and product codes, respectively.

CHANGES IN PRODUCT CLASSES

For the 1992 Census of Manufactures, data were collected on 1,462 product classes compared with 1,446 for the 1987 census. Table A compares the number of manufacturing SIC four-digit industries and census five-digit product classes for 1992 and 1987. Tables B and C show the distribution of industries according to number of product classes in an industry for manufacturing and mining, respectively. For instance, 130 manufacturing industries have only one product class; 91 have two.

ABBREVIATIONS

The phrase “To be spec” indicates that the unit of measure is specified by the reporting establishment.

The abbreviation “n.e.c.” means not elsewhere classified.

Unit of Measure

bbls	Barrel
bd	Board
Btu	British thermal unit
co	Consumed
cu	Cubic
cwt	Hundredweight
doz	Dozen
equiv	Equivalent
fin	Finished
ft	Feet
gal	Gallon
hr	Hour
lum	Lumber
lb	Pounds
lin	Linear
mil	Millions
no	Number
oz	Ounces
qt	Quarts
sm	Surface measure
sngl	Single
sol	Solids
sq	Square
st	Strength
std	Standard
yd	Yards

Data Collected

C	Consumption
CC	Circulation copies
I	Inventory (stock)
ISV	Interplant shipments (value)
P	Production (quantity)
PC	Produced and consumed (quantity)
PV	Production (value)
R	Receipts (value)
RA	Receipts from advertising
RAC	Receipts from advertising and copy sales
RC	Receipts from single copy sales
RQ	Receipts (quantity)
RS	Receipts from subscriptions and sales
RSB	Receipts from subscriptions
S	Shipments (quantity and value)
SQ	Shipments (quantity)
SV	Shipments (value)
UO	Unfilled orders (value)
UOQ	Unfilled orders (quantity)
VW	Value of work done

12222	PREPARED BITUMINOUS COAL SHIPPED FROM UNDERGROUND OPERATIONS		
1222201 4	Mechanically cleaned by wet-washing, pneumatic, or other methods	short tons	S
1222217 0	Other preparation only, such as mechanical crushing, screening, or sizing	short tons	S
1231	ANTHRACITE MINING—MC-1201		
12311	UNPREPARED (RAW) ANTHRACITE SHIPPED		
1231101 5	For use without preparation	short tons	S
1231103 1	For preparation at other establishments	short tons	S
12312	PREPARED ANTHRACITE SHIPPED		
1231201 3	Mechanically cleaned by wet-washing, pneumatic, or other methods	short tons	S
1231217 9	Other preparation only, such as mechanical crushing, screening, or sizing	short tons	S
1241	COAL MINING SERVICES—MC-1101		
12410	COAL MINING SERVICES		
1241012 2	Stripping overburden		R
1241013 0	Prospect and test drilling		R
1241014 8	Strip mining coal not for own account	short tons	RQ
1241015 5	Drilling, other than prospect and test drilling, including blasting		R
1241016 3	Recovering culm bank material and auger mining coal not for own account	short tons	RQ
1241017 1	Sinking mine shafts and driving mine tunnels		R
1241019 7	Other coal mining services		R

Major Group 13—Oil and Gas Extraction

Product code	Industry and product description	Unit of measure	Data collected
1311	CRUDE PETROLEUM AND NATURAL GAS—MC-1301		
13111	CRUDE PETROLEUM, INCLUDING LEASE CONDENSATE (VOLUMES CORRECTED TO 60 DEGREES F) SHIPPED		
1311100 0	Crude petroleum, including lease condensate (volumes corrected to 60 degrees F) shipped.....	1,000 bbl	S
1311104 2	From stripper well leases	1,000 bbl	SQ
1311107 5	Lease condensate produced (volumes corrected to 60 degrees F)	1,000 bbl	SQ
13115	NATURAL GAS		
1311500 1	Natural gas (volumes adjusted to pressure base of 14.73 lb absolute at 60 degrees F) shipped to consumers	mil cu ft	S
1321	NATURAL GAS LIQUIDS—MC-1302		
13212	NATURAL GAS LIQUIDS		
1321210 5	Plant condensate	1,000 bbl	P,S
1321215 4	Ethane	1,000 bbl	P,S
1321220 4	Isopentane and natural gasoline	1,000 bbl	P,S
1321231 1	Propane	1,000 bbl	P,S
1321232 9	Butane	1,000 bbl	P,S
1321234 5	Gas mixtures	1,000 bbl	P,S
1321298 0	Other natural gas liquids	1,000 bbl	P,S
13213	RESIDUE GAS SHIPPED		
1321300 4	Residue gas shipped	mil cu ft	S
1381	DRILLING OIL AND GAS WELLS —MC-1303		
13810	DRILLING OIL AND GAS WELLS		
1381011 4	Drilling oil, gas, dry, or service wells	1,000 ft	RQ,R
1381012 2	Drilling in, spudding in, or tailing in	1,000 ft	RQ,R
1381014 8	Reworking wells.....		R
1381015 5	Directional drilling control		R
1382	OIL AND GAS FIELD EXPLORATION SERVICES—MC-1303		
13820	OIL AND GAS FIELD EXPLORATION SERVICES

1389	OIL AND GAS FIELD SERVICES, N.E.C.—MC-1303		
13890	OIL AND GAS FIELD SERVICES, N.E.C.		
1389011 6	Cementing wells		R
1389012 4	Acidizing and other chemical treatment of wells, excluding hydraulic fracturing	no. of wells	RQ,R
1389013 2	Perforating well casing		R
1389014 0	Well surveying and well logging		R
1389021 5	Hydraulic fracturing	no. of wells	RQ,R
1389024 9	Running, cutting, and pulling casing, tubes, or rods		R
1389025 6	Installing production equipment, such as wellhead fittings, pumps, and engines		R
1389026 4	Cleaning out, bailing out, or swabbing wells		R
1389035 5	Pumping wells but not operating leases		R
1389036 3	Other oil and gas field services		R

4 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 14—Nonmetallic Minerals, Except Fuels

Product code	Industry and product description	Unit of measure	Data collected
1411	DIMENSION STONE—MC-1401		
14110	DIMENSION STONE		
1411011 8	Rough dimension limestone	short tons	P,S
1411015 9	Rough dimension granite.....	short tons	P,S
1411019 1	Other rough dimension stone (slate, marble, trap rock, sandstone, and miscellaneous stone).....	short tons	P,S
1422	CRUSHED AND BROKEN LIMESTONE —MC-1401		
14220	CRUSHED AND BROKEN LIMESTONE		
1422000 8	Crushed and broken limestone	short tons	P,S
1423	CRUSHED AND BROKEN GRANITE —MC-1401		
14230	CRUSHED AND BROKEN GRANITE		
1423000 7	Crushed and broken granite	short tons	P,S
1429	CRUSHED AND BROKEN STONE, N.E.C.—MC-1401		
14290	CRUSHED AND BROKEN STONE, N.E.C.		
1429000 1	Crushed and broken stone, n.e.c.	short tons	P,S
1442	CONSTRUCTION SAND AND GRAVEL —MC-1401		
14421	CONSTRUCTION SAND AND GRAVEL (RUN OF PIT OR BANK)		
1442101 0	Construction sand	short tons	P,S
1442105 1	Gravel	short tons	P,S
14422	CONSTRUCTION SAND AND GRAVEL (WASHED, SCREENED, GROUND, OR OTHERWISE TREATED)		
1442201 8	Construction sand	short tons	P,S
1442205 9	Gravel	short tons	P,S
1446	INDUSTRIAL SAND—MC-1401		
14461	GLASS SAND		
1446100 8	Glass sand	short tons	P,S
14465	MOLDING SAND		
1446500 9	Molding sand	short tons	P,S
14469	INDUSTRIAL SAND, N.E.C.		
1446900 1	Industrial sand, n.e.c.	short tons	P,S
1455	KAOLIN AND BALL CLAY—MC-1402		
14551	CRUDE KAOLIN AND BALL CLAY		
1455100 6	Crude kaolin and ball clay	short tons	S
14552	PREPARED KAOLIN AND BALL CLAY		
1455201 2	Kaolin.....	short tons	S
1455202 0	Ball clay.....	short tons	S
1459	CLAY, CERAMIC, AND REFRACTORY MINERALS, N.E.C.—MC-1402		
14591	BENTONITE		
1459100 2	Bentonite.....	short tons	S
14592	FIRE CLAY		
1459211 7	Crude fire clay	short tons	S
1459221 6	Prepared fire clay	short tons	S
14593	FULLER'S EARTH		
1459300 8	Fuller's earth	short tons	S
14596	FELDSPAR (CRUDE, CRUSHED, OR GROUND)		
1459600 1	Feldspar (crude, crushed, or ground)	short tons	S

Major Group 14—Nonmetallic Minerals, Except Fuels—Con.

Product code	Industry and product description	Unit of measure	Data collected
1459	CLAY, CERAMIC, AND REFRACTORY MINERALS, N.E.C.—MC-1402—Con.		
14597	COMMON (MISCELLANEOUS) CLAY AND SHALE		
1459711 6	Crude common (miscellaneous) clay and shale	short tons	S
1459721 5	Prepared common (miscellaneous) clay and shale	short tons	S
14599	OTHER CLAY, CERAMIC, AND REFRACTORY MINERALS INCLUDING MAGNESITE AND BRUCITE		
1459900 5	Other clay, ceramic, and refractory minerals including magnesite and brucite	short tons	S
1474	POTASH, SODA, AND BORATE MINERALS—MC-1403		
14741	CRUDE POTASSIUM SALTS MINED		
1474100 3	Crude potassium salts mined	short tons	P,S
14742	PROCESSED OR REFINED POTASSIUM SALTS		
1474200 1	Processed or refined potassium salts	short tons	P,S
14743	SODIUM CARBONATE AND SULFATE		
1474301 7	Sodium carbonate (natural)	short tons	S
1474303 3	Sodium sulfate (natural)	short tons	S
14744	BORON COMPOUNDS		
1474400 7	Boron compounds	short tons	S
1475	PHOSPHATE ROCK—MC-1403		
14751	CRUDE PHOSPHATE ROCK		
1475101 0	Crude phosphate rock (ore or matrix) produced	short tons (dry basis)	P
1475103 6	Shipped to washer and concentrator	short tons (dry basis)	S
1475105 1	All other shipments	short tons (dry basis)	S
14752	PREPARED PHOSPHATE ROCK		
1475201 8	Washed and concentrated phosphate rock produced	short tons (dry basis)	P
1475203 4	Shipped to preparation plant	short tons (dry basis)	S
1475205 9	All other shipments	short tons (dry basis)	S
1475207 5	Dried, calcined, sintered, or nodulized phosphate rock	short tons (dry basis)	P,S
1479	CHEMICAL AND FERTILIZER MINING, N.E.C.—MC-1403		
14791	BARITE		
1479100 8	Barite	short tons	P,S
14793	ROCK SALT		
1479300 4	Rock salt	short tons	S
14794	SULFUR		
1479400 2	Sulfur	long tons	P,S
14798	CHEMICAL AND FERTILIZER MINERALS, N.E.C.		
1479800 3	Chemical and fertilizer minerals, n.e.c.		SV
1481	NONMETALLIC MINERALS SERVICES (EXCEPT FUELS)—MC-1101		
14810	NONMETALLIC MINERALS SERVICES (EXCEPT FUELS)		
1481012 1	Stripping overburden		R
1481013 9	Prospect and test drilling		R
1481014 7	Open-pit or quarry mining minerals not for own account		R
1481015 4	Drilling, other than prospect and test drilling, including blasting		R
1481019 6	Other nonmetallic minerals services (except fuels)		R

Major Group 20—Food and Kindred Products

Product code	Industry and product description	Unit of measure	Data collected
2011	FRESH AND FROZEN MEAT FROM ANIMALS SLAUGHTERED IN THIS PLANT—MC-2001		
20111	BEEF, NOT CANNED OR MADE INTO SAUSAGE		
2011112 6	Whole carcass and half carcass beef -----	1,000 lb	S
2011114 2	Primal cuts -----	1,000 lb	S
2011116 7	Subprimal and fabricated cuts packaged in plastics (boxed beef) -----	1,000 lb	S
2011118 3	Other subprimal and fabricated cuts -----	1,000 lb	S
2011131 6	Boneless beef, including hamburger -----	1,000 lb	S
2011151 4	Variety meats (edible organs) -----	1,000 lb	S
2011171 2	Other edible beef, including corned beef -----	1,000 lb	S
20112	VEAL, NOT CANNED OR MADE INTO SAUSAGE		
2011212 4	Whole carcass and half carcass veal -----	1,000 lb	S
2011217 3	Primal, subprimal, and fabricated cuts, and boneless veal -----	1,000 lb	S
2011261 1	Other edible veal, including edible organs -----	1,000 lb	S
20113	LAMB AND MUTTON, NOT CANNED OR MADE INTO SAUSAGE		
2011312 2	Whole carcass and half carcass lamb and mutton -----	1,000 lb	S
2011352 8	Primal cuts and all other edible lamb and mutton -----	1,000 lb	S
20114	PORK, NOT CANNED OR MADE INTO SAUSAGE		
2011412 0	Whole carcass and half carcass pork -----	1,000 lb	S
2011417 9	Primal and fabricated cuts (including trimmings) -----	1,000 lb	S
2011451 8	Variety meats (edible organs) -----	1,000 lb	S
20115	LARD¹		
2011513 5	Consumer sizes (containers 3 lb or less) -----	1,000 lb	S
2011517 6	Commercial sizes (containers more than 3 lb) -----	1,000 lb	S
20116	PORK, PROCESSED OR CURED (NOT CANNED OR MADE INTO SAUSAGE)²		
2011612 5	Sweet-pickled or dry-cured pork (not smoked or cooked) -----	1,000 lb	S
2011622 4	Dry salt pork -----	1,000 lb	S
2011631 5	Smoked pork (not otherwise cooked):		
2011635 6	Hams and picnics, except canned -----	1,000 lb	S
2011641 4	Slab bacon -----	1,000 lb	S
2011652 1	Sliced bacon -----	1,000 lb	S
2011661 2	Other smoked pork -----	1,000 lb	S
2011661 2	Boiled ham, barbecue pork, and other cooked pork, except canned meats and sausage -----	1,000 lb	S
20117	SAUSAGES AND SIMILAR PRODUCTS (NOT CANNED)²		
2011711 5	Fresh sausage (pork sausage, breakfast links, etc.) -----	1,000 lb	S
2011717 2	Dry or semidry (salami, cervelat, pepperoni, summer sausage, pork roll, etc.) -----	1,000 lb	S
2011721 4	Frankfurters, including wieners -----	1,000 lb	S
2011735 4	Other sausage, smoked or cooked (bologna, liverwurst, Polish sausage, packaged luncheon meats, minced roll, etc.) -----	1,000 lb	S
2011791 7	Jellied goods and similar preparations, (headcheese, meat loaves, scrapple, puddings, chili con carne, etc.) -----	1,000 lb	S
20118	CANNED MEATS (EXCEPT DOG, CAT, AND BABY FOOD)²		
2011800 6	Canned meats (except dog and cat food and baby food) containing 20 percent meat or more -----	1,000 lb	S
20119	HIDES, SKINS, AND PELTS		
2011914 5	Cattle, including kip -----	number	S
2011922 8	Calf, except kip -----	number	S
2011951 7	Sheep and lamb -----	number	S
2011997 0	Other hides, skins, and pelts, except kip -----	number	S
2011B	MISCELLANEOUS BYPRODUCTS OF MEAT PACKING PLANTS		
2011B15 7	Other fresh and frozen meats including horsemeat for human consumption -----	1,000 lb	S
2011B17 3	Pork rind pellets, including pork cracklings -----		SV
2011B41 3	Edible tallow and stearin ¹ -----	1,000 lb	S
2011B45 4	Natural sausage casings (beef, hog, etc.) -----	1,000 lb	S
2011B55 3	Killing floor offal, scrap, bones -----		SV
2011B59 5	Other miscellaneous byproducts of meat packing plants, including pulled wool and glue stock (except sausage casings) -----		SV
2013	SAUSAGE AND OTHER PREPARED MEATS—MC-2002		
20136	PORK, PROCESSED OR CURED, INCLUDING FROZEN, NOT CANNED OR MADE INTO SAUSAGE²		
2013612 3	Sweet-pickled or dry-cured pork (not smoked or cooked) -----	1,000 lb	S
2013622 2	Dry salt pork -----	1,000 lb	S
2013631 3	Smoked pork (not otherwise cooked):		
2013635 4	Hams and picnics, except canned -----	1,000 lb	S
2013641 2	Slab bacon -----	1,000 lb	S
2013652 9	Sliced bacon -----	1,000 lb	S
2013661 0	Other smoked pork -----	1,000 lb	S
2013661 0	Boiled ham, barbecue pork, and other cooked pork, except canned meats and sausages -----	1,000 lb	S

34 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 22—Textile Mill Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
2295	COATED FABRICS, NOT RUBBERIZED —MC-2209		
22952	VINYL COATED FABRICS, INCLUDING EXPANDED VINYL COATED		
	Lightweight fabrics, 10 oz or less per sq yd finished weight:		
2295213 9	Woven fabrics base	1,000 lin yd	S
2295215 4	Knit fabrics base	1,000 lin yd	S
2295217 0	Nonwoven base	1,000 lin yd	S
	Mediumweight fabrics, more than 10 oz up to 16 oz per sq yd finished weight:		
2295222 0	Woven fabrics base	1,000 lin yd	S
2295224 6	Knit fabrics base	1,000 lin yd	S
2295226 1	Nonwoven base	1,000 lin yd	S
	Heavyweight fabrics, more than 16 oz per sq yd finished weight:		
2295232 9	Woven fabrics base	1,000 lin yd	S
2295234 5	Knit fabrics base	1,000 lin yd	S
2295236 0	Nonwoven base	1,000 lin yd	S
22953	OTHER COATED OR LAMINATED FABRICS AND COATED YARNS		
2295311 1	Pyroxylin coated fabrics	1,000 lin yd	S
2295315 2	Polyurethane coated fabrics	1,000 lin yd	S
	Other coated or laminated fabrics, excluding rubber:		
2295317 8	Lightweight fabrics, 10 oz or less per sq yd finished weight	1,000 lin yd	S
2295338 4	Mediumweight fabrics, more than 10 oz up to and including 16 oz per sq yd finished weight	1,000 lin yd	S
2295348 3	Heavyweight fabrics, more than 16 oz per sq yd finished weight	1,000 lin yd	S
2295398 8	Coated yarns, all types except rubber	1,000 lin yd	S
2296	TIRE CORD AND TIRE CORD FABRICS —MC-2201		
22960	TIRE CORD AND TIRE CORD FABRICS		
2296000 9	Tire cord and tire cord fabrics ¹	1,000 lb	P,S
2297	NONWOVEN FABRICS—MC-2208		
22971	NONWOVEN FABRICS		
	Laminated and wet laid:		
2297121 2	Less than 1 oz per sq yd	1,000 sq yd	S
2297123 8	1 oz to 2.5 oz per sq yd	1,000 sq yd	S
2297125 3	More than 2.5 oz per sq yd	1,000 sq yd	S
	Spun bonded, dry laid, and other:		
2297131 1	Less than 0.8 oz per sq yd	1,000 sq yd	S
2297133 7	0.8 oz to 1.5 oz per sq yd	1,000 sq yd	S
2297135 2	More than 1.5 oz per sq yd	1,000 sq yd	S
22972	FABRICATED NONWOVEN PRODUCTS		
2297241 8	Blankets made from nonwoven fabrics	dozens	S
	Ribbons, nonwoven for gift tyings:		
2297203 8	Christmas gift tyings	1,000 lin yd	S
2297205 3	Other gift tyings	1,000 lin yd	S
2297251 7	Wipers made from nonwoven fabrics (including windshield, industrial, and lithographic)	dozens	S
2297298 8	All other fabricated nonwoven products, excluding diapers and orthopedic, prosthetic, and surgical supplies	dozens	S
2298	CORDAGE AND TWINE—MC-2209		
22981	HARD FIBER CORDAGE AND TWINE		
2298111 2	Hard fiber cordage rope and cable (including products of 3 strands or more) each strand composed of 2 yarns or more	1,000 lb	S
2298135 1	Hard fiber twine (including products laid or twisted, but not stranded; and twine of hard fiber and paper)	1,000 lb	S
22982	SOFT FIBER CORDAGE AND TWINE (EXCEPT COTTON)		
	Manmade fiber cordage and twine:		
	Fish line:		
2298201 1	Commercial	1,000 lb	S
2298202 9	Recreational	1,000 lb	S
	Fish nets and fish netting:		
2298203 7	Commercial	1,000 lb	S
2298205 2	Recreational	1,000 lb	S
2298208 6	Rope 3/16 inch diameter and larger	1,000 lb	S
2298214 4	Industrial and agriculture twine, less than 3/16 inch diameter	1,000 lb	S
2298219 3	All other manmade fiber cordage and twine	1,000 lb	S
2298228 4	Soft fiber cordage and twine (except cotton and manmade, including hemp, jute, and paper)	1,000 lb	S
22983	COTTON CORDAGE AND TWINE		
2298311 8	Braided cord, regardless of size	1,000 lb	S
2298325 8	Wrapping, seine, and other twine	1,000 lb	S
2298398 5	All other cotton cordage and twine, including fish nets	1,000 lb	S

2841112 2	Chips, flakes, granulated, powdered, and sprayed, including washing powders	1,000 lb	S
2841114 8	Liquid (potash and other), excluding shampoos	1,000 gal	S
2841119 7	Other soaps, including mechanics' hand soap	1,000 lb	S
	Alkaline detergents:		
	Dishwashing compounds:		
2841121 3	Liquid	1,000 gal	S
2841123 9	Dry	1,000 lb	S
2841124 7	Scouring cleaners	1,000 lb	S
	Other alkaline detergents:		
2841125 4	Liquid	1,000 gal	S
2841126 2	Dry hard surface cleaners	1,000 lb	S
2841128 8	Other dry cleaners	1,000 lb	S
	Synthetic organic detergents:		
	Dry:		
2841141 1	Anionic base	1,000 lb	S
2841143 7	Nonionic base or other	1,000 lb	S
	Liquid:		
2841145 2	Anionic base	1,000 gal	S
2841146 0	Cationic or amphoteric	1,000 gal	S
2841149 4	Nonionic or other	1,000 gal	S
	Acid-type cleaners:		
2841165 0	Liquid dairy, farm, and food plant cleaners, sanitizers, etc.:	1,000 gal	S
2841167 6	Halogenated	1,000 gal	S
2841177 5	Nonhalogenated	1,000 gal	S
2841178 3	Liquid metal cleaners	1,000 gal	SV
	All other acid-type cleaners, including dry cleaners		
28412	HOUSEHOLD DETERGENTS		
	Alkaline detergents:		
	Automatic dishwashing detergents:		
2841201 3	Liquid	1,000 gal	S
2841203 9	Dry	1,000 lb	S
	Hard surface cleaners, including general-purpose cleaners and degreasers:		
2841204 7	Liquid	1,000 gal	S
2841205 4	Aerosol	1,000 gal	S
2841206 2	Dry	1,000 lb	S
	Scouring cleaners:		
2841209 6	Liquid	1,000 gal	S
2841210 4	Dry	1,000 lb	S
2841211 2	All other alkaline detergents		SV
	Household laundry detergents:		
	Dry:		
2841221 1	Light-duty	1,000 lb	S
2841224 5	Heavy-duty, phosphate based	1,000 lb	S
2841226 0	Heavy-duty, phosphate free	1,000 lb	S
	Liquid:		
2841231 0	Light-duty	1,000 gal	S
2841235 1	Heavy-duty	1,000 gal	S
2841261 7	Presoaks	1,000 lb	S
28413	SOAPS, EXCEPT SPECIALTY CLEANERS, HOUSEHOLD		
	Toilet soaps, excluding medicated soaps:		
	Bars:		
2841312 8	Deodorant	1,000 lb	S
2841313 6	Nondeodorant	1,000 lb	S
2841314 4	Novelty	1,000 lb	S
2841315 1	Liquids	1,000 gal	S
2841398 7	Other household soaps, including mechanics' hand soaps (except waterless) and medicated soaps		SV
28414	GLYCERIN, NATURAL¹		
2841411 8	Crude, 100 percent basis	1,000 lb	S
2841431 6	High-gravity, dynamite, and yellow distilled, 100 percent basis	1,000 lb	S
2841451 4	Chemically pure, 100 percent basis	1,000 lb	S

72 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 28—Chemicals and Allied Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
2844	TOILET PREPARATIONS—MC-2807—Con.		
28444	DENTIFRICES, MOUTHWASHES, GARGLES, AND RINSES		
2844421 4	Toothpaste, including gels and tooth powder		SV
2844431 3	Denture cleaners		SV
2844498 2	Other oral hygiene products, including dental floss, dental adhesives, etc.; excluding toothbrushes and toothpicks.....		SV
28446	CREAMS, LOTIONS AND OILS, EXCLUDING SHAVING, HAIR, AND DEODORANT		
	Creams, excluding shaving, hair, deodorant, and manicuring:		
2844611 0	Cleansing creams		SV
2844613 6	Foundation creams		SV
2844615 1	Lubricating creams, including hormone creams		SV
2844617 7	Moisturizing creams		SV
2844619 3	Other creams, except eye and manicuring creams		SV
	Lotions and oils, excluding hair, shaving preparations, and bath:		
2844621 9	Suntan lotions and oils		SV
2844622 7	Sunscreens and sunblocks		SV
2844623 5	Cleansing lotions		SV
2844624 3	Cosmetic oils, including baby oils but excluding suntan oils		SV
2844625 0	Hand lotions		SV
2844626 8	Body lotions		SV
2844629 2	Other lotions and oils, excluding hair, shaving, and bath		SV
28447	OTHER COSMETICS AND TOILET PREPARATIONS		
2844711 8	Lip preparations (lipstick, lip gloss, lip conditioners, etc.).....		SV
2844715 9	Blushers		SV
2844721 7	Eye preparations (mascara, eye shadow, eye liners, eye creams, etc.)		SV
2844725 8	Feminine hygiene douches and deodorants, except medicated		SV
	Underarm deodorants:		
2844731 6	Aerosol and spray types		SV
2844735 7	Roll-ons, solids, etc.		SV
	Manicuring preparations:		
2844741 5	Nail enamels and polishes		SV
2844745 6	Nail enamel and polish removers		SV
2844751 4	Other manicuring preparations, including nail and cuticle conditioners and creams		SV
	Powder:		
2844755 5	Talcum and toilet powder		SV
2844761 3	Face powder (pressed and loose).....		SV
2844765 4	Other powder, including foot powder, etc.		SV
2844771 2	Bath salts, tablets, oils, and bubble baths		SV
2844775 3	Premoistened towelettes, including wipes for babies		SV
2844781 1	Facial scrubs and masks		SV
2844785 2	Depilatories		SV
2844795 1	Other cosmetics and toiletries		SV
2851	PAINTS AND ALLIED PRODUCTS —MC-2808		
28511	ARCHITECTURAL COATINGS		
2851100 4	Architectural coatings ³		SV
28512	PRODUCT FINISHES FOR ORIGINAL EQUIPMENT MANUFACTURERS (OEM), EXCLUDING MARINE COATINGS		
2851200 2	Product finishes for original equipment manufacturers (OEM), excluding marine coatings ³		SV
28513	SPECIAL PURPOSE COATINGS, INCLUDING ALL MARINE COATINGS		
2851300 0	Special purpose coatings including all marine coatings (industrial construction and maintenance, traffic marking, etc.) ³		SV
28515	MISCELLANEOUS ALLIED PAINT PRODUCTS		
2851500 5	Miscellaneous allied paint products (paint and varnish removers, thinners, pigment dispersions, glazing compounds, etc.) ³		SV
2861	GUM AND WOOD CHEMICALS—MC-2809		
28610	GUM AND WOOD CHEMICALS, INCLUDING WOOD DISTILLATION PRODUCTS		
2861010 3	Hardwood charcoal and charcoal briquets, including blends with lignite or other materials.....	short tons	S
2861015 2	Softwood distillation products, including wood rosin, charcoal and charcoal briquets, vegetable pitches, etc.		SV
	Tall oil:		
2861020 2	Crude ³	1,000 lb	P,S
2861025 1	Refined (containing less than 90 percent free fatty acids, including tall oil resins, other than tall oil rosin) ³	1,000 lb	P,S
2861030 1	Rosin	1,000 lb	S
2861035 0	Other tall oil derivatives, including rosin acid salts (except tall oil fatty acids)		SV
2861040 0	Other gum and wood chemicals, including gum naval stores, natural tanning and dyeing materials, tannic acid, etc.		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

73

Major Group 28—Chemicals and Allied Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
2865	CYCLIC CRUDES AND INTERMEDIATES —MC-2810		
28651	CYCLIC INTERMEDIATES		
2865100 8	Cyclic (coal tar) intermediates ⁴		SV
28652	SYNTHETIC ORGANIC DYES		
2865200 6	Synthetic organic dyes ⁴		SV
28653	SYNTHETIC ORGANIC PIGMENTS, LAKES, AND TONERS		
2865300 4	Synthetic organic pigments, lakes, and toners ⁴		SV
28655	TAR, TAR CRUDES, AND TAR PITCHES		
2865500 9	Tar, tar crudes, and tar pitches ⁴		SV
28656	AROMATICS (BENZENE, TOLUENE, XYLENE, ETC.), NOT MADE IN A REFINERY ²

74 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 28—Chemicals and Allied Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
2874	PHOSPHATIC FERTILIZERS—MC-2811		
28741	PHOSPHORIC ACID		
2874100 7	Phosphoric acid ³		SV
28742	SUPERPHOSPHATE AND OTHER PHOSPHATIC FERTILIZER MATERIALS		
2874200 5	Superphosphate and other phosphatic fertilizer materials ³		SV
28744	MIXED FERTILIZERS²		
2874410 0	In packages, tablets, and similar forms of a gross weight not exceeding 10 kg (22 lb)	short tons	S
	In bulk or in packages of a gross weight of 10 kg (22 lb) or more:		
2874411 8	Dry, shipped in bulk	short tons	S
2874421 7	Dry, shipped in bags	short tons	S
2874431 6	Liquid	short tons	S
2875	FERTILIZERS, MIXING ONLY—MC-2811		
28750	MIXED FERTILIZERS, MADE BY PLANTS WHICH DO NOT MANUFACTURE FERTILIZER MATERIALS²		
2875010 7	In packages, tablets, and similar forms of a gross weight not exceeding 10 kg (22 lb)	short tons	S
	In bulk or in packages of a gross weight of 10 kg or more:		
2875011 5	Dry, shipped in bulk	short tons	S
2875021 4	Dry, shipped in bags	short tons	S
2875031 3	Liquid	short tons	S
2879	AGRICULTURAL CHEMICALS, N.E.C. —MC-2812		
28795	INSECTICIDAL PREPARATIONS PRIMARILY FOR AGRICULTURAL, GARDEN, AND HEALTH SERVICE USE		
2879531 8	Carbamate insecticidal preparations	1,000 lb	S
2879541 7	Organo-phosphate insecticidal preparations	1,000 lb	S
2879561 5	Biological (botanical, bacterial, etc.) insecticidal preparations	1,000 lb	S
2879581 3	All other insecticidal preparations	1,000 lb	S
28796	HERBICIDAL PREPARATIONS PRIMARILY FOR AGRICULTURAL, GARDEN, AND HEALTH SERVICE USE		
2879641 5	Phenoxy compound herbicidal preparations	1,000 lb	S
2879661 3	Urea herbicidal preparations	1,000 lb	S
2879665 4	Triazine herbicidal preparations	1,000 lb	S
2879675 3	Benzoic herbicidal preparations	1,000 lb	S
2879685 2	All other herbicidal preparations	1,000 lb	S
28797	FUNGICIDAL PREPARATIONS PRIMARILY FOR AGRICULTURAL, GARDEN, AND HEALTH SERVICE USE		
2879721 5	Preparations containing inorganic compounds	1,000 lb	S
2879751 2	Preparations containing organic compounds	1,000 lb	S
28798	OTHER PESTICIDAL PREPARATIONS AND AGRICULTURAL CHEMICALS, N.E.C., PRIMARILY FOR AGRICULTURAL USE		
	Fumigants:		
2879812 2	Soil fumigants	1,000 lb	S
2879818 9	All other fumigants, including space, excluding household	1,000 lb	S
2879822 1	Defoliants and desiccants	1,000 lb	S
2879885 8	All other pesticidal preparations and agricultural chemicals, n.e.c., primarily for agricultural and health service use		SV
28799	HOUSEHOLD PESTICIDAL PREPARATIONS, INCLUDING INDUSTRIAL EXTERMINANTS		
	Insecticides for crawling insects, excluding fumigants:		
2879912 0	Aerosols		SV
2879917 9	Nonaerosols		SV
	Insecticides for flying insects, excluding fumigants:		
2879921 1	Aerosols		SV
2879924 5	Nonaerosols		SV
2879930 2	Repellents and attractants for insects, birds, fish, and other animals, except for human and pet use		SV
2879940 1	Insect repellents for human use		SV
2879945 0	Pet flea and tick products, including collars		SV
2879971 6	Rodenticides		SV
2879986 4	Other household pesticidal preparations, n.e.c., including fumigants		SV
2891	ADHESIVES AND SEALANTS—MC-2813		
28913	NATURAL BASE GLUES AND ADHESIVES		
	Animal glues:		
2891311 9	Hide (dry forms)	1,000 lb	S
2891326 7	Flexible, nonwarp, and liquid glue (not glue stock)	1,000 lb	S
2891350 7	Protein adhesives, including casein, blood, fish, soybean, albumen, etc.	1,000 lb	S
	Vegetable adhesives:		
2891351 5	Dextrines	1,000 lb	S
2891355 6	Starches		SV
2891380 4	Other natural base glues and adhesives made from natural gums, shellac, silicates, lacquers, and oleoresinous varnishes		SV

2891721 9	Bituminous base (coal tar or asphalt)		SV
	Synthetic base:		
2891731 8	General performance sealants (PVAC, butyl, vinyl, acrylic, neoprene, etc.)	1,000 lb	S
2891746 6	Special performance sealants, including polysulfide, silicone, epoxy, urethane, etc.	1,000 lb	S
2891771 4	Preformed tapes (butyl, polybutene, polyisobutylene, etc.)		SV
2892	EXPLOSIVES—MC-2814		
28920	EXPLOSIVES, PROPELLANTS, AND BLASTING ACCESSORIES, EXCEPT THOSE SHIPPED BY GOVERNMENT-OWNED, CONTRACTOR-OPERATED PLANTS		
	Industrial explosives:		
2892017 1	Ammonium nitrate, fuel sensitized, except slurry	1,000 lb	S
2892020 5	Water gel and slurries, cap and noncap sensitive, except permissible slurries	1,000 lb	S
2892024 7	Other industrial explosives, including permissible, dynamites, black blasting powder, nitroglycerin, etc.		SV
2892039 5	Propellants, including smokeless and black powder	1,000 lb	S
2892054 4	Blasting accessories, including blasting caps, squibs, ignitors, detonating primers, fuses, detonating cord, etc.		SV
2892071 8	Other explosives, including military detonators, jet starters, fuse and explosive assemblies, etc.		SV
2893	PRINTING INK—MC-2815		
28931	LETTERPRESS INKS		
2893105 3	News inks	1,000 lb	S
2893115 2	Packaging inks	1,000 lb	S
2893117 8	Other letterpress inks, including publication inks	1,000 lb	S
28932	LITHOGRAPHIC AND OFFSET INKS		
2893231 7	News and nonheat web offset inks	1,000 lb	S
2893232 5	Publication and commercial web inks	1,000 lb	S
	Sheet-fed inks:		
2893235 8	Packaging inks	1,000 lb	S
2893244 0	General inks	1,000 lb	S
2893246 5	Other lithographic and offset inks	1,000 lb	S
28933	GRAVURE INKS		
	Packaging inks:		
2893341 4	Solvent types	1,000 lb	S
2893342 2	Water types	1,000 lb	S
	Publication inks:		
2893344 8	Solvent types	1,000 lb	S
2893346 3	Water types	1,000 lb	S
2893349 7	Other gravure inks	1,000 lb	S
28934	FLEXOGRAPHIC INKS		
	Packaging inks:		
2893482 6	Solvent types	1,000 lb	S
2893483 4	Water types	1,000 lb	S
2893487 5	News and commercial inks	1,000 lb	S
2893489 1	Other flexographic inks	1,000 lb	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

77

Major Group 29—Petroleum and Coal Products

Product code	Industry and product description	Unit of measure	Data collected
2911	PETROLEUM REFINING—MC-2901		
29111	GASOLINE, INCLUDING FINISHED BASE STOCKS AND BLENDING AGENTS		
2911111 9	Aviation gasoline, except jet fuel -----	1,000 bbl	S
2911131 7	Motor gasoline -----	1,000 bbl	S
29112	JET FUEL		
2911211 7	Naphtha type -----	1,000 bbl	S
2911213 3	Kerosene type -----	1,000 bbl	S
29113	KEROSENE		
2911300 8	Kerosene, except jet fuel -----	1,000 bbl	S
29114	LIGHT FUEL OILS		
2911412 1	Distillate fuel oil, including grades No. 1, 2, light diesel-type, light gas-enrichment oils, etc. -----	1,000 bbl	S
2911414 7	No. 4 type fuel oil -----	1,000 bbl	S
29115	HEAVY FUEL OILS		
2911500 3	Heavy fuel oils, including grades No. 5, 6, heavy diesel-type, heavy gas-enrichment oils, etc.-----	1,000 bbl	S
29117	LUBRICATING OILS AND GREASES, MADE IN A REFINERY ²		
2911721 5	Lubricating oils (hydraulic fluids, quenching and cutting oils, transformer oils, liquid rust preventives, etc.)-----	1,000 bbl	S
2911731 4	Lubricating greases -----	1,000 bbl	S
29118	UNFINISHED OILS AND LUBRICATING OIL BASE STOCK		
2911813 0	Unfinished oils, naphthenic and paraffinic -----	1,000 bbl	S
2911816 3	Naphtha and other oils for use as petrochemical feedstocks, excluding carbon black -----	1,000 bbl	S
2911817 1	Carbon black feedstock -----	1,000 bbl	S
	Lubricating oil petroleum-base stocks:		
2911851 0	Bright stock -----	1,000 bbl	S
2911852 8	Neutral stock -----	1,000 bbl	S
2911856 9	Red and pale oils -----	1,000 bbl	S
2911859 3	Other oils -----	1,000 bbl	S
29119	ASPHALT		
2911921 1	Paving grade asphalts -----	1,000 bbl	S
2911931 0	Roofing grade asphalts -----	1,000 bbl	S
2911941 9	Miscellaneous asphalts, n.e.c. -----	1,000 bbl	S
2911A	LIQUEFIED REFINERY GASES INCLUDING OTHER ALIPHATICS (FEED STOCK AND OTHER USES), MADE IN A REFINERY ²		
2911A21 8	Chemical raw material, including synthetic rubber components ⁴ -----		SV
2911A22 6	Other uses -----	1,000 lb	S
2911D	OTHER FINISHED PETROLEUM PRODUCTS, INCLUDING WAXES		
2911D11 3	Petrolatum -----	1,000 bbl	S
2911D23 8	Petroleum coke -----	short tons	S
2911D25 3	Calcined petroleum coke, made in a refinery -----	short tons	S
2911D31 1	Road oil -----	1,000 bbl	S
2911D41 0	Still gas -----	mil cu ft	S
2911D51 9	Special naphthas -----	1,000 bbl	S
	Aromatics (benzene, toluene, xylenes, etc.), made in a refinery:		
2911D55 0	Chemical raw material ² ⁴ -----		SV
2911D57 6	Other uses ² -----	1,000 lb	S
	Waxes, made in a refinery:		
2911D62 6	Microcrystalline ² -----	1,000 bbl	S
	Crystalline:		
2911D72 5	Fully refined ² -----	1,000 bbl	S
2911D82 4	Other ² -----	1,000 bbl	S
2911D99 8	Other finished petroleum products made in a refinery -----	1,000 bbl	S
2951	ASPHALT PAVING MIXTURES AND BLOCKS—MC-2902		
29510	PAVING MIXTURES AND BLOCKS		
	Liquid asphalt and tar paving materials:		
2951011 2	Emulsified asphalt, including liquid additives -----		SV
2951015 3	Other liquid asphalt and tar paving materials, including cut-backs-----		SV
2951051 8	Asphalt and tar paving mixtures, including bituminous or asphaltic concrete, and asphaltic paving cements -----		SV
2951098 9	Other paving mixtures, except brick, concrete, granite, or stone -----		SV

See footnotes at end of major group 39.

78 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 29—Petroleum and Coal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
2952	ASPHALT FELTS AND COATINGS —MC-2902		
29522	ROOFING ASPHALTS AND PITCHES, COATINGS, AND CEMENTS		
2952212 5	Roofing asphalt	short tons	S
2952251 3	Asphaltic roofing coatings and cements:		
2952255 4	Fibrited asphaltic coatings	1,000 gal	S
2952261 2	Nonfibrited asphaltic coatings	1,000 gal	S
2952298 4	Asphaltic roofing cements		SV
	Other roofing asphalts and pitches, coatings, and cements, including coal tar base coatings, cements, and roofing pitch		SV
29524	PREPARED ASPHALT AND TAR ROOFING AND SIDING PRODUCTS INCLUDING SATURATED FELTS AND BOARDS FOR NONBUILDING USE		
2952419 6	Asphalt and tar saturated felts and boards for nonbuilding use		SV
2952421 2	Smooth-surfaced roll roofing and cap sheets:		
2952422 0	Organic base	1,000 sales sq	S
	Fiberglass base	1,000 sales sq	S
2952423 8	Mineral-surfaced roll roofing and cap sheets:		
2952424 5	Organic base	1,000 sales sq	S
	Fiberglass base	1,000 sales sq	S
	Strip shingles:		
2952425 3	Organic base, excluding laminated:		
2952426 1	235 to 240 lb/ sq	1,000 sales sq	S
	All other weights	1,000 sales sq	S
2952427 9	Inorganic base, excluding laminated:		
2952428 7	215 to 235 lb/ sq	1,000 sales sq	S
2952429 5	All other weights	1,000 sales sq	S
2952431 1	Organic and/ or inorganic base laminated or multilayered shingles	1,000 sales sq	S
	Individual shingles, organic or inorganic base, all styles	1,000 sales sq	S
	Saturated asphalt and tar felts:		
2952460 0	Ply felts, organic base		SV
2952462 6	Ply felts, fiberglass base		SV
2952464 2	Other felts, organic base		SV
2952466 7	Other felts, fiberglass base		SV
2952497 2	Other prepared asphalt and tar products for roofing and siding		SV
2992	LUBRICATING OILS AND GREASES —MC-2901		
29920	LUBRICATING OILS AND GREASES, NOT MADE IN A REFINERY²		
2992021 2	Lubricating oils (hydraulic fluids, quenching and cutting oils, transformer oils, liquid rust preventives, etc.)	1,000 bbl	S
2992031 1	Lubricating greases	1,000 bbl	S
2999	PETROLEUM AND COAL PRODUCTS, N.E.C.—MC-2901		
29990	PETROLEUM AND COAL PRODUCTS, N.E.C.		
2999020 7	Waxes, not made in a refinery:		
2999030 6	Microcrystalline ²	1,000 bbl	S
2999091 8	Crystalline ²	1,000 bbl	S
2999098 3	Calcined petroleum coke, not made in a refinery	short tons	S
	Other petroleum and coal products, n.e.c., including packaged fuel and fuel briquettes, and petroleum pitches	short tons	S

See footnotes at end of major group 39.

79

Major Group 30—Rubber and Miscellaneous Plastics Products

Product code	Industry and product description	Unit of measure	Data collected
3011	TIRES AND INNER TUBES—MC-3001		
30111	PASSENGER CAR PNEUMATIC TIRES (CASINGS)		
3011112 4	Radial	1,000 tires	S
3011115 7	Other	1,000 tires	S
30112	TRUCK AND BUS (INCLUDING OFF-THE-HIGHWAY PNEUMATIC TIRES)		
3011211 4	Light truck:		
3011212 2	Radial	1,000 tires	S
3011221 3	Other	1,000 tires	S
3011221 3	Radial	1,000 tires	S
3011222 1	Large off-the-highway (sizes 16.00 inches and larger):		
3011222 1	Other	1,000 tires	S
3011231 2	Other truck and bus tires, pneumatic tires:		
3011231 2	Radial	1,000 tires	S
3011232 0	Other	1,000 tires	S
30117	TRACTOR AND IMPLEMENT PNEUMATIC TIRES		
3011700 6	Tractor and implement (farm and industrial) pneumatic	1,000 tires	S
30118	INDUSTRIAL AND UTILITY PNEUMATIC TIRES		
3011800 4	Industrial and utility pneumatic (including garden)	1,000 tires	S
30119	OTHER PNEUMATIC TIRES		
3011921 8	Motorcycle, motorbike, and moped pneumatic tires (casings)		SV
3011922 6	Aircraft		SV
3011925 9	Other pneumatic tires and casings (including bicycle and mobile home)		SV
3011A	SOLID AND SEMIPNEUMATIC TIRES		
3011A39 7	Solid tires (including industrial, highway, bogie, idler, and support rollers)	1,000 tires	S
3011A52 0	Other solid and semipneumatic tires (including hand lawnmower, baby carriage, tricycle, juvenile, etc.)		SV
3011C	INNER TUBES		
3011C21 1	Passenger car and motorcycle	1,000 tubes	S
3011C23 7	Truck and bus inner tubes (including off-the-highway)	1,000 tubes	SQ
3011C25 2	Tractor and implement (farm and industrial)	1,000 tubes	S
3011C29 4	All other inner tubes (including aircraft, industrial, utility, garden, and bicycle)		SV
3011D	TREAD RUBBER, TIRE SUNDRIES, AND REPAIR MATERIALS		
3011D11 0	Tread rubber (camelback) (including slab rubber for use in automatic tread rubber extruding machines)	1,000 lb	S
3011D31 8	Tire flaps		SV
3011D39 1	Other tire sundries, repair materials, and tiring		SV
3021	RUBBER AND PLASTICS FOOTWEAR —MC-3002		
30214	PROTECTIVE FOOTWEAR		
3021400 1	Protective footwear ³		SV
30215	SHOES WITH SOLES VULCANIZED, MOLDED, OR CEMENTED TO FABRICS UPPERS		
3021500 8	Shoes with soles vulcanized, molded, or cemented to fabrics uppers, excluding sandals and slippers ³		SV
3052	RUBBER AND PLASTICS HOSE AND BELTING—MC-3003		
30521	RUBBER AND PLASTICS BELTS AND BELTING, FLAT		
3052141 3	Lightweight		SV
3052143 9	Heavy-duty		SV
3052145 4	Transmission, flat		SV
3052149 6	Other flat rubber and plastics belts and belting		SV
30522	RUBBER AND PLASTICS TRANSMISSION BELTS AND BELTING OTHER THAN FLAT		
3052225 4	Motor vehicle		SV
3052231 2	Industrial, except fractional horsepower		SV
3052241 1	Agricultural, except fractional horsepower		SV
3052251 0	Fractional horsepower		SV
3052289 0	All other rubber and plastics belts and belting, other than flat		SV
3052A	HOSE FOR ON- AND OFF-HIGHWAY MOTOR VEHICLES (MADE OF RUBBER AND OTHER MATERIALS E.G., PLASTICS, NYLON)		
3052A01 7	High pressure hose (greater than 300 p.s.i. working pressure) including air-conditioning, brake line, etc.		SV
3052A02 5	Low pressure hose (less than 300 p.s.i. working pressure) including value of pre-positioned sleeves, clamps, etc.)		SV
3052B	INDUSTRIAL HOSE WITHOUT FITTINGS		
3052B00 7	Industrial hose without fittings (chemical handling, food and beverage, petroleum curb pump, dock, transfer, etc.)		SV

See footnotes at end of major group 39.

80 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 30—Rubber and Miscellaneous Plastics Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3052	RUBBER AND PLASTICS HOSE AND BELTING—MC-3003—Con.		
3052C	WATER HOSE WITHOUT FITTINGS		
3052C00 5	Water hose without fittings (e.g., fire, irrigation, water suction/ discharge, and other water hose, n.e.c.)		SV
3052D	RUBBER AND PLASTICS GARDEN HOSE (WITH OR WITHOUT FITTINGS)		
3052D01 1	Plastics, including perforated sprinkler		SV
3052D02 9	Rubber.....		SV
3052F	AIR HOSE (OTHER THAN PNEUMATIC POWER TRANSFER)		
	Rubber inner tube type (including rubber and plastics combination):		
3052F10 7	Wire reinforced (including wire/textile reinforced combination).....		SV
3052F20 6	Textile reinforced.....		SV
	Nonrubber inner tube type:		
3052F30 5	Wire reinforced (including wire/textile combination)		SV
3052F40 4	Textile reinforced.....		SV
3052G	PNEUMATIC AND HYDRAULIC HOSE, N.E.C., WITHOUT FITTINGS (MADE OF RUBBER AND OTHER MATERIALS - E.G., PLASTICS, NYLON)		
	Rubber inner tube type (including rubber and plastics combination):		
3052G10 5	Wire reinforced (including wire/textile combination)		SV
3052G20 4	Textile reinforced.....		SV
	Nonrubber inner tube type:		
3052G30 3	Wire reinforced (including wire/textile combination)		SV
3052G40 2	Textile reinforced.....		SV
3053	GASKETS, PACKING, AND SEALING DEVICES—MC-3006		
30534	COMPRESSION PACKINGS		
3053411 9	Plant fiber		SV
3053415 0	Synthetic fiber, plastics composition		SV
3053418 4	All other compression packings, n.e.c.....		SV
30535	NONMETALLIC GASKETS AND GASKETING		
3053511 6	Asbestos, compressed.....		SV
3053513 2	Asbestos, beater saturated.....		SV
3053515 7	Elastomeric, all materials.....		SV
3053517 3	Paper, felt base, and plant fiber		SV
3053519 9	Cork and cork composition		SV
3053521 5	Fluorocarbon (including envelope-type)		SV
3053531 4	Other nonmetallic gaskets and gasketing, n.e.c.		SV
30536	MOLDED PACKINGS AND SEALS		
3053621 3	O-rings (including spliced; excluding metal)		SV
3053622 1	Squeeze-type, solid section ring seals (including rectangular, quad, Delta, D, Tee; excluding O-rings)		SV
3053625 4	Flexible seals, dual component-cushioned rings, backed, constrained, or loaded by an elastomeric ring		SV
3053626 2	Flexible seals, single and multiple component lip type, both symmetrical and nonsymmetrical, V-rings, V-ring sets, U-cup		SV
3053630 4	Diaphragm seal: flat, rolling		SV
3053635 3	All other molded packings and seals including nonmetallic exclusion devices and nonmetallic piston rings		SV
30537	METALLIC GASKETS AND MACHINED SEALS		
3053729 4	Spiral wound filler type.....		SV
3053748 4	Other metal gaskets and machined seals (exclusion devices; heavy cross-section, API type; nonautomotive piston rings)		SV
30538	AXIAL MECHANICAL FACE SEALS		
3053810 2	Complete mechanical seals with single coil springs		SV
3053813 6	Complete mechanical seals with multiple coil springs		SV
3053815 1	Complete mechanical seals with bellows.....		SV
3053817 7	Parts for all axial mechanical face seals		SV
3053819 3	Clearance, labyrinth, and other face seals, n.e.c.		SV
30539	ROTARY OIL SEALS		
3053970 4	Bonded, sprung (spring-loaded)		SV
3053973 8	Bonded, unsprung (nonspring-loaded)		SV
3053975 3	Unitized		SV

Major Group 31—Leather and Leather Products

Product code	Industry and product description	Unit of measure	Data collected
3111	LEATHER TANNING AND FINISHING —MC-3101		
31116	FINISHED AND UNFINISHED LEATHER		
	Cattle hide and kip side leathers, finished:		
	Full grain and grain split (except offal and welting leather):		
3111611 4	Sole leather	1,000 sq ft	S
3111615 5	Bag, case, and strap leather (sides)	1,000 sq ft	S
3111619 7	Upholstery leather, top grains and machine buffs	1,000 sq ft	S
3111624 7	Upper leather, including patent (sides)	1,000 sq ft	S
3111627 0	Garment leather (sides)	1,000 sq ft	S
3111629 6	Other grains, including flat and handbag leather, lining leather (sides), and belting and mechanical leather	1,000 sq ft	S
3111633 8	Offal (heads, shoulders, bellies, etc.) and welting leather	1,000 sq ft	S
3111635 3	Finished splits, including shoulder splits, deep buffs, buffing, and fleshers	1,000 sq ft	S
	Cattle hide and kip side leathers, unfinished:		
3111637 9	Wet blues	no. of hides, whole hide equiv	S
3111638 7	Other	no. of hides, whole hide equiv	S
3111643 7	All calf and whole kip leathers, finished and unfinished	1,000 sq ft	S
	Sheep and lamb leathers, finished and unfinished:		
3111651 0	Garment	1,000 sq ft	S
3111657 7	Other (including glove, shoe, fleshers, skivers, and shearlings)	1,000 sq ft	S
	Other leathers, finished and unfinished:		
3111662 7	Goat and kid leathers	1,000 sq ft	S
3111663 5	Pig skin leathers	1,000 sq ft	S
3111665 0	Other animal leathers (including horse, colt, mule, ass, and pony leathers)		SV
31119	CONTRACT AND COMMISSION RECEIPTS FOR TANNING OR FINISHING LEATHER OWNED BY OTHERS		
3111900 1	Contract and commission receipts for tanning or finishing leather owned by others		SV
3131	BOOT AND SHOE CUT STOCK AND FINDINGS—MC-3101		
31310	BOOT AND SHOE CUT STOCK AND FINDINGS		
3131016 2	Outer soles and innersoles of leather	dozen pairs	S
3131031 1	Other leather cut stock (heels, counters, box toes, taps, etc.)		SV
3131061 8	Other (wood heel blocks made for sale as such, finished wood heels, shanks, welting, etc.)		SV
3142	HOUSE SLIPPERS—MC-3102		
31420	HOUSE SLIPPERS		
3142060 7	House slippers, all types, except slipper socks ³	1,000 pairs	S
3142071 4	Slipper socks made from purchased socks ³	1,000 pairs	S
3143	MEN'S FOOTWEAR, EXCEPT ATHLETIC —MC-3102		
31430	MEN'S FOOTWEAR, EXCEPT ATHLETIC		
3143000 2	Men's footwear, except athletic (size run 6 and larger) ³	1,000 pairs	S
3144	WOMEN'S FOOTWEAR, EXCEPT ATHLETIC—MC-3102		
31440	WOMEN'S FOOTWEAR, EXCEPT ATHLETIC		
3144000 1	Women's footwear, except athletic (size run 4 and larger) ³	1,000 pairs	S
3149	FOOTWEAR, EXCEPT RUBBER, N.E.C.—MC-3102		
31490	FOOTWEAR, EXCEPT RUBBER, N.E.C.		
3149010 5	Athletic shoes, except rubber sole/ fabrics upper ³	1,000 pairs	S
3149020 4	All other footwear, including youths' and boys', misses', children's, and infants' (excluding rubber and slippers) ³	1,000 pairs	S
3151	LEATHER GLOVES AND MITTENS —MC-2304		
31510	GLOVES AND MITTENS, ALL LEATHER		
3151000 1	Gloves and mittens, all leather ^{2 3}		SV
3161	LUGGAGE—MC-3103		
31610	SUITCASES, BRIEFCASES, BAGS, AND MUSICAL INSTRUMENT CASES		
	Hand luggage (including zippered):		
3161001 7	Outer surface of all leather or mostly leather	number	S
3161003 3	Outer surface of all textile or mostly textile materials	number	S
3161005 8	Outer surface of supported vinyl or plastics	number	S
3161007 4	Molded and semimolded	number	S
3161009 0	All other materials	number	S
3161043 9	Tote bags, open, without closures	number	S
3161053 8	Occupational luggage cases, sample cases, binocular, and camera cases	number	S
3161063 7	Trunks, hand trunks, and lockers	number	S
3161073 6	Briefcases, brief bags, school bags, envelopes, catalog cases, and zippered ring binders	number	S
3161081 9	Musical instrument cases	number	S
3161084 3	Attache cases	number	S
3161086 8	Other luggage	number	S

3229600 6	Machine-made lighting, automotive, and electronic glassware ³ -----		SV
32297	ALL OTHER MACHINE-MADE GLASSWARE ²		
3229700 4	All other machine-made glassware (including technical and scientific glassware, glass blocks, and lens blanks) ³ -----		SV
32298	HANDMADE PRESSED AND BLOWN GLASSWARE²		
3229800 2	Handmade pressed and blown glassware ³ -----		SV
3231	PRODUCTS OF PURCHASED GLASS —MC-3201 Glass products made in establishments not producing glass:		
32311	MACHINE-MADE PRESSED AND BLOWN GLASSWARE²		
3231100 3	Machine-made pressed and blown glassware (table, kitchen, novelty, lighting, electronic, scientific, industrial, etc.) ³ -----		SV
32312	HANDMADE PRESSED AND BLOWN GLASSWARE²		
3231200 1	Handmade pressed and blown glassware ³ -----		SV
32313	LAMINATED GLASS²		
3231300 9	Laminated glass -----		SV
32315	MIRRORS (DECORATED OR UNDECORATED)		
3231521 0	Framed mirrors -----		SV
3231541 8	Unframed mirrors -----		SV
3231571 5	Automotive mirrors -----		SV
32318	OTHER GLASS PRODUCTS		
3231821 4	Stained, leaded, and faceted glass and colored glass slabs -----		SV
3231871 9	Multiple-glazed, sealed insulating glass units ² -----		SV
3231884 2	Tempered glass for construction, architectural, and automotive purposes ² -----		SV
3231889 1	Tempered glass for other uses, such as for appliances ² -----		SV
3231892 5	Optical glass fiber, data and nondata transmission ³ -----		SV
3231895 8	Glass and glass fiber optical components-----		SV
3231899 0	Other glass products not listed above -----		SV

See footnotes at end of major group 39.

88 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 32—Stone, Clay, and Glass Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3241	CEMENT, HYDRAULIC—MC-3203		
32410	CEMENT, HYDRAULIC (INCLUDING COST OF SHIPPING CONTAINERS)		
3241012 8	Portland cements:		
3241013 6	Normal portland cement ASTM type I -----	short tons	S
3241014 4	Moderate heat of hydration (moderate sulfate resistance) ASTM type II -----	short tons	S
3241016 9	High early strength ASTM type III -----	short tons	S
3241018 5	High sulfate resistance ASTM type V -----	short tons	S
3241021 9	Other hydraulic cements (oil well, white cement, blended cements, etc.) including low heat of hydration ASTM type IV -----	short tons	S
3241023 5	Masonry cement -----	short tons	S
3241031 8	Other cements (e.g., natural, hydraulic lime, etc.) -----	short tons	S
	Cement clinker, for sale separately -----	short tons	S
3251	BRICK AND STRUCTURAL CLAY TILE—MC-3204		
32510	BRICK AND CLAY TILE		
3251011 7	Building or common brick ³ -----		SV
3251019 0	Other brick (paving, floor, and sewer) -----		SV
3251020 8	Glazed brick and structural hollow tile ³ -----		SV
3253	CERAMIC WALL AND FLOOR TILE —MC-3204		
32530	CLAY FLOOR AND WALL TILE		
3253000 8	Clay floor and wall tile, glazed and unglazed (including quarry tile and ceramic mosaic tile) ³ -----		SV
3255	CLAY REFRACTORIES—MC-3205		
32550	CLAY REFRACTORIES		
3255000 6	Clay refractories ³ -----		SV
3259	STRUCTURAL CLAY PRODUCTS, N.E.C.—MC-3204		
32591	VITRIFIED CLAY SEWER PIPE AND FITTINGS		
3259100 0	Vitrified clay sewer pipe and fittings ³ -----		SV
32592	OTHER STRUCTURAL CLAY PRODUCTS, N.E.C. (EXCEPT CLAY REFRACTORIES)		
3259200 8	Other structural clay products (architectural terra cotta, drain tile, flue tile, roofing tile, conduit, etc.) -----		SV
3261	VITREOUS PLUMBING FIXTURES —MC-3206		
32610	VITREOUS PLUMBING FIXTURES, ACCESSORIES, AND FITTINGS		
3261020 6	China plumbing fixtures ³ -----		SV
3261061 0	China plumbing fixtures accessories and fittings (including towel racks, soap cups, earthenware plumbing fixtures, etc.) -----		SV
3261070 1	Earthenware plumbing fixtures, accessories, and fittings -----		SV
3262	VITREOUS CHINA TABLE AND KITCHENWARE—MC-3206		
32620	VITREOUS CHINA AND PORCELAIN TABLE AND KITCHENWARE (INCLUDING BONE AND FELDSPAR) FOR HOUSEHOLD, HOTEL, OR COMMERCIAL USE		
3262000 7	Vitreous china and porcelain table and kitchenware (including bone and feldspar) for household, hotel, or commercial use -----		SV
3263	SEMIVITREOUS TABLE AND KITCHENWARE —MC-3206		
32630	EARTHENWARE TABLE AND KITCHENWARE		
3263000 6	Earthenware (semivitreous) table and kitchenware (including household, hotel, or commercial uses) -----		SV
3264	PORCELAIN ELECTRICAL SUPPLIES —MC-3206		
32640	PORCELAIN, STEATITE, AND OTHER CERAMIC ELECTRICAL PRODUCTS		
	Porcelain electrical products:		
	Wet process voltage porcelain products shipped as complete insulators:		
3264010 4	Pin-type insulators and line posts -----		SV
3264014 6	Suspension-type insulators, 7 1/2 inch disc and smaller -----		SV
3264015 3	Suspension-type insulators, larger than 7 1/2 inch disc -----		SV
3264016 1	Switch and bus insulators (including cap-and-pin, and post types) -----		SV
3264017 9	All other (including guy strain insulators and spools) -----		SV
3264018 7	Wet process voltage products shipped as porcelain pieces only for component parts of other electrical equipment -----		SV
3264029 4	All dry process electrical porcelain (including porcelain parts for wiring devices, fuses, circuit breakers, etc.) -----		SV
3264041 9	Steatite electrical products -----		SV
	Ferrites:		
3264051 8	Ceramic permanent magnets -----		SV
3264055 9	Other ferrites -----		SV
3264061 7	Alumina materials for electronic application -----		SV
3264098 9	Beryllia, titanate, and other ceramic electrical products and components for electronic applications not included above -----		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 32—Stone, Clay, and Glass Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3269	POTTERY PRODUCTS, N.E.C.—MC-3206		
32690	POTTERY PRODUCTS, N.E.C. (INCLUDING CHINA DECORATING FOR THE TRADE)		
3269011 7	Art, decorative, and novelty pottery ware (including vases, lamp bases, figures):		SV
3269031 5	China and porcelain		SV
3269041 4	Earthenware and stoneware		SV
	Stoneware table and kitchen articles, household and commercial (for serving, cooking, and storing food and drink)		SV
	Other pottery products, not elsewhere classified:		
3269061 2	Chemical, technical, and industrial pottery ware (including chemical stoneware and porcelain, pyrometric tubes, etc.)		SV
3269071 1	Red unglazed earthenware (flowerpots, etc.)		SV
3269081 0	All other pottery products (including pyrometric cones, veritas rings, etc.)		SV
3271	CONCRETE BLOCK AND BRICK—MC-3207		
32710	CONCRETE BRICK AND BLOCK		
	Structural block:		
3271011 3	Lightweight units (units made with concrete weighing less than 105 lb per cubic foot) (dry weight)	1,000 blocks	S
3271015 4	Mediumweight units (units made with concrete weighing at least 105 lb but less than 125 lb per cubic foot) (dry weight)		SV
3271017 0	Normal weight units (units made with concrete weighing at least 125 lb per cubic foot) (dry weight)	1,000 blocks	S
3271018 8	Decorative block (such as screen block, split block, slump block, shadowal block, etc.)		SV
3271034 5	Concrete pavers (including grid, interlocking, etc.)		SV
3271051 9	Concrete brick		SV
3272	CONCRETE PRODUCTS, N.E.C.—MC-3207		
32721	CONCRETE PIPE		
	Culvert pipe:		
	Reinforced:		
3272112 8	36 inches or more	short tons	S
3272114 4	Less than 36 inches	short tons	S
3272117 7	Nonreinforced		SV
	Storm sewer pipe:		
	Reinforced:		
3272121 9	36 inches or more	short tons	S
3272124 3	Less than 36 inches	short tons	S
3272125 0	Nonreinforced		SV
	Sanitary sewer pipe:		
	Reinforced:		
3272126 8	24 inches or more	short tons	S
3272127 6	Less than 24 inches		SV
3272130 0	Nonreinforced		SV
	Pressure pipe:		
3272131 8	Reinforced concrete pressure pipe		SV
3272132 6	Prestressed concrete cylinder pipe		SV
3272137 5	Pretensioned concrete cylinder pipe and other pressure pipe	linear ft	S
3272151 6	Irrigation pipe and drain tile		SV
3272198 7	Other concrete pipe (such as manholes and conduits)		SV
32722	PRECAST CONCRETE PRODUCTS		
	Roof and floor units:		
3272213 4	Slabs and tile		SV
3272217 5	Joists and beams		SV
3272223 3	Architectural wall panels		SV
3272225 8	Piling, posts, and poles		SV
3272227 4	Cast stone products for architectural purposes (except architectural wall panels, such as window sills, ashlar, etc.)		SV
3272228 2	Prefabricated building systems, primarily concrete, sold as complete units, and shipped in panel or modular form		SV
3272229 0	Other precast concrete construction or building products (including prefabricated housing components)		SV
	Burial vaults and boxes:		
3272233 2	Vaults		SV
3272235 7	Boxes		SV
3272261 3	Septic tanks		SV
3272271 2	Dry-mixed concrete materials (including prepackaged sand, gravel, and cement, mortar and cement premixes)		SV
3272299 3	Other precast concrete products (except construction or building products)		SV
32723	PRESTRESSED CONCRETE PRODUCTS		
	Single tees, double tees, and channels	square ft	S
3272311 6	Piling, bearing piles, and sheet piles	linear ft	S
3272323 1	Bridge beams	linear ft	S
3272325 6	Joists, girders, and beams (other than bridge beams)	linear ft	S
3272327 2	Solid and hollow cored slabs and panels	square ft	S
3272331 4	Other prestressed concrete products (such as arches, columns, etc.)	short tons	S
3272398 3			
3273	READY-MIXED CONCRETE—MC-3208		
32730	READY-MIXED CONCRETE		
	Ready-mixed concrete	1,000 cu yd	S
3273000 4			
3274	LIME—MC-3203		
32740	LIME (INCLUDING COST OF CONTAINERS)		
	Quicklime	short tons	S
3274011 0	Hydrated lime	short tons	S
3274051 6	Dead-burned dolomite	short tons	S
3274071 4	Other lime	short tons	S
3274072 2			

See footnotes at end of major group 39.

90 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 32—Stone, Clay, and Glass Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3275	GYPSUM PRODUCTS—MC-3203		
32751	GYPSUM BUILDING MATERIALS		
3275112 5 3275113 3	Plaster building boards and lath ----- Building plasters -----	short tons	S SV
32752	OTHER GYPSUM PRODUCTS		
3275211 5 3275221 4	Industrial plasters ----- Other calcined gypsum products -----		SV SV
3281	CUT STONE AND STONE PRODUCTS —MC-3209		
32811	DRESSED DIMENSION GRANITE (INCLUDING GNEISS, SYENITE, DIORITE, AND CUT GRANITE)		
3281113 5 3281135 8 3281198 6	Building stone ----- Monumental stone ----- Other granite products, such as paving blocks and curbing -----	cubic feet cubic feet cubic feet	S S S
32812	DRESSED DIMENSION LIMESTONE (INCLUDING DOLOMITE, TRAVERTINE, CALCAREOUS, TUFA, AND CUT LIMESTONE)		
3281213 3 3281298 4	Building stone ----- Other limestone products, such as flagging -----	cubic feet cubic feet	S S
32813	DRESSED DIMENSION MARBLE AND OTHER STONE		
3281337 0 3281398 2	Building stone, monumental stone, and other marble products ----- Other stone, such as slate, sandstone, gabbro, and basalt, and other dressed dimension stone products -----	cubic feet cubic feet	S S
3291	ABRASIVE PRODUCTS—MC-3210		
32915	NONMETALLIC SIZED GRAINS, POWDERS, AND FLOUR ABRASIVES (INCLUDING GRADED PRODUCTS ONLY)		
3291517 5 3291519 1 3291529 0 3291548 0	Silicon carbide ----- Aluminum oxide ----- Other artificial sized grains, powders, and flour (including combinations thereof) ----- Natural sized grains, powders, and flours -----	short tons short tons	S S SV SV
32916	NONMETALLIC ABRASIVE PRODUCTS (INCLUDING DIAMOND ABRASIVES)		
3291631 4 3291637 1 3291642 1 3291644 7 3291665 2 3291672 8 3291674 4 3291676 9 3291698 3	Artificial and natural bonded abrasives: Vitrified bond ----- Resinoid and shellac bond, reinforced ----- Resinoid and shellac bond, nonreinforced ----- Rubber bond ----- Diamond wheels: Other bonded abrasives ----- Metal bond ----- Other bond ----- Cubic boron nitride wheels, all bonds ----- Other artificial and natural nonmetallic abrasive products (except coated abrasives) -----		SV SV SV SV SV SV SV S SV
32917	NONMETALLIC COATED ABRASIVE PRODUCTS AND BUFFING WHEELS, POLISHING WHEELS, AND LAPS		
3291712 2 3291714 8 3291716 3 3291718 9 3291723 9 3291740 3 3291771 8	Coated or impregnated with any natural or artificial abrasive material: Cloth-glue bond: Belts ----- Other shapes ----- Cloth-resin and waterproof bond: Belts ----- Other shapes ----- Paper-glue bond ----- Other (paper-cloth or vulcanized fiber-cloth combinations, vulcanized fibers, paper-resin, waterproof bond, etc.) ----- Buffing and polishing wheels and laps of cloth, leather, felt, etc. but containing no abrasive grains, powders, or flour -----		SV SV SV SV SV SV SV
32918	METAL ABRASIVES (INCLUDING SCOURING PADS)		
3291811 2 3291831 0 3291890 6	Steel and iron grit, shot, and sand ----- Steel wool ----- Other metal abrasives and scouring pads (including metal pads with soaps) -----	short tons short tons	S S SV
3292	ASBESTOS PRODUCTS—MC-3211		
32922	ASBESTOS FRICTION MATERIALS		
3292211 4 3292215 5 3292221 3 3292258 5	Brake lining: Woven, containing asbestos yarn, tape, or cloth ----- Molded (including all nonwoven types) ----- Disc brake pads ----- Clutch facings (nonwoven, woven, and molded) -----		SV SV SV SV
32927	OTHER ASBESTOS PRODUCTS		
3292710 5 3292711 3 3292712 1 3292799 8	Asbestos textiles, all types (yarn, cord, thread, rope, tape, lap, roving, wick, carded fibers, etc.) ----- Asbestos felts, all kinds (roofing, asphalt, tar saturated, etc.) ----- Asbestos-cement products, all kinds, including flat sheet, wallboard, shingles, clapboard, pipe, conduits, ducts, etc. ----- Other asbestos products (vinyl asbestos floor tile, pipe and block insulation, asphalt floor tile, millboard, etc.) -----		SV SV SV SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

91

Major Group 32—Stone, Clay, and Glass Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3295	MINERALS, GROUND OR TREATED —MC-3212		
32950	MINERALS AND EARTHS, GROUND OR OTHERWISE TREATED		
3295011 5	Lightweight aggregate (diatomaceous earth, expanded clay, expanded slag, cinders, perlite, haydite, pumice, etc.) ----- Exfoliated vermiculite: -----		SV
3295013 1	Aggregate -----	1,000 cu ft	S
3295015 6	Other (such as loose fill insulation, acoustical, etc.) -----	1,000 cu ft	S
3295020 6	Dead-burned magnesia or magnesite ³ -----		SV
3295031 3	Crushed slag -----		SV
3295061 0	Crushed and ground uncalcined gypsum (including gypsite and anhydrite) -----	short tons	S
3295081 8	Natural graphite: ground, refined, or blended -----	short tons	S
3295084 2	Ground crude fire clay, high alumina clay, and silica fire clay -----		SV
3295085 9	Clays, artificially activated with acid or other materials -----	short tons	S
3295086 7	Mica, ground or treated -----	short tons	S
3295094 1	Talc, steatite, soapstone, and pyrophyllite, ground or otherwise treated -----		SV
3295098 2	Other minerals and earths, ground or otherwise treated (including feldspar, roofing granules, and ground barite) -----		SV
3296	MINERAL WOOL—MC-3213		
32961	MINERAL WOOL FOR THERMAL AND ACOUSTICAL ENVELOPE INSULATION (FOR INSULATING HOMES, COMMERCIAL AND INDUSTRIAL BUILDINGS)		
3296111 2	Loose fiber (blowing and pouring) (shipped as such) and granulated fiber ----- Building batts, blankets, and rolls (in thermal resistance (R) values): -----		SV
3296131 0	R-19.0 or more -----		SV
3296135 1	R-11.0 to R-18.9 -----		SV
3296138 5	R-10.9 or less -----		SV
3296151 8	Board (such as roof insulation) -----		SV
3296161 7	Acoustical, such as wall and ceiling (sold as acoustical insulation) -----		SV
3296198 9	Other mineral wool for thermal insulation -----		SV
32962	MINERAL WOOL FOR INDUSTRIAL, EQUIPMENT, AND APPLIANCE INSULATION		
3296231 8	Blankets (flexible) (including fabricated pieces, rolls, and batts): ----- Plain -----		SV
3296234 2	Coated -----		SV
3296236 7	Faced and metal meshed -----		SV
3296245 8	Special-purpose insulation pieces (special-purpose automotive, appliance, aerospace items, and original equipment parts) -----		SV
3296251 6	Other blocks and boards -----		SV
3296261 5	Pipe insulation -----		SV
3296283 9	Acoustical (including pads, boards, patches, etc.) -----		SV
3296298 7	Other mineral wool (including air duct, loose fiber, granulated fiber, insulating and finishing cements, etc.) -----		SV
3297	NONCLAY REFRACTORIES—MC-3205		
32970	NONCLAY REFRACTORIES (EXCEPT DEAD-BURNED MAGNESIA)		
3297000 6	Nonclay refractories (except dead-burned magnesia) ³ -----		SV
3299	NONMETALLIC MINERAL PRODUCTS, N.E.C.—MC-3213		
32990	OTHER NONMETALLIC MINERAL PRODUCTS, N.E.C.		
3299053 3	Mica products: ----- Built-up sheet mica products -----		SV
3299055 8	Other sheet mica products -----		SV
3299056 6	Mica products, other than sheet -----		SV
3299081 4	Statuary and art goods (factory production) -----		SV
3299094 7	Other nonmetallic mineral products (magnesite floor composition, stucco, artificial graphite, synthetic stones, etc.) -----		SV

See footnotes at end of major group 39.

Major Group 33—Primary Metal Industries

Product code	Industry and product description	Unit of measure	Data collected
3312	BLAST FURNACES AND STEEL MILLS—MC-3301		
33121	COKE OVEN AND BLAST FURNACE PRODUCTS, INCLUDING FERROALLOYS		
3312111 2	Coke oven products:	short tons	P,S
3312112 0	Coke, except screenings and breeze -----	short tons	P,S
3312131 0	Screenings and breeze -----	mil cu ft	P,S
3312151 8	Coke oven gas -----	1,000 gal	P,S
3312171 6	Crude tar -----	1,000 gal	P,S
3312197 1	Crude light oil -----		SV
	Other coke oven products (including tar derivatives, ammonia, and light oil derivations) -----		
3312191 4	Blast furnace products (except ferroalloys):	short tons	P,S
3312192 2	Pig iron (including pig iron with silicon content up to and including 6 percent silicon) -----	short tons	P,S
3312193 0	Slag -----	short tons	P,S
3312194 8	Sinter from ore, flue dust, and other materials -----	mil cu ft	P,S
3312198 9	Blast furnace gas -----	short tons	P,S
	Other blast furnace products -----		
33122	STEEL INGOT AND SEMIFINISHED SHAPES		
3312200 3	Ingots and semifinished shapes and forms ³ -----		SV
33123	HOT-ROLLED SHEET AND STRIP, INCLUDING TIN MILL PRODUCTS		
3312300 1	Tinplate, blackplate, terneplate, tin free steel, and hot-rolled sheet and strip ³ -----		SV
33124	HOT-ROLLED BARS AND BAR SHAPES, PLATES, STRUCTURAL SHAPES, AND PILING		
3312400 9	Plates, structural shapes, piling, hot-rolled bars and bar shapes (including concrete reinforcing and tool steel bars) ³ -----		SV
33125	STEEL WIRE (MADE IN STEEL MILLS) ²		
3312500 6	Wire, including galvanized and other coated wire (made in plants producing wire rods or hot-rolled bars) ³ -----		SV
33126	STEEL PIPE AND TUBES (MADE IN STEEL MILLS) ²		
3312600 4	Pipe and tubes (made in plants producing semifinished shapes or plate) ³ -----		SV
33127	COLD-ROLLED STEEL SHEET AND STRIP (MADE IN STEEL MILLS) ²		
3312700 2	Cold-rolled sheet and strip (made in plants producing hot-rolled sheet or strip) ³ -----		SV
33128	COLD-FINISHED STEEL BARS AND BAR SHAPES (MADE IN STEEL MILLS) ²		
3312800 0	Cold finished bars and bar shapes (made in plants producing hot-rolled bars and bar shapes) ³ -----		SV
3312C	OTHER STEEL MILL PRODUCTS, INCLUDING STEEL RAILS, EXCEPT WIRE PRODUCTS		
3312C00 1	Other steel mill products (including steel rails, except wire products) ³ -----		SV
3312A	SEAMLESS ROLLED RING FORGINGS, FERROUS (MADE IN STEEL MILLS) ²		
3312A17 9	Carbon steel and alloy steel (excluding stainless and hi-temp) -----		SV
3312A26 0	Stainless and hi-temp (iron, nickel, or cobalt-base alloy) -----		SV
3312B	OPEN DIE OR SMITH FORGINGS (HAMMER OR PRESS), FERROUS (MADE IN STEEL MILLS) ²		
3312B62 3	Carbon steel and alloy steel (excluding stainless and hi-temp) -----		SV
3312B66 4	Stainless and hi-temp (iron, nickel, or cobalt-base alloy) -----		SV
3313	ELECTROMETALLURGICAL PRODUCTS —MC-3301		
33132	FERROCHROMIUM		
3313200 2	Ferrochromium (including briquets), ferrochromium silicon, exothermic chromium additives, and other chromium alloys -----	short tons	P,S
33133	FERROSILICON		
3313300 0	Ferrosilicon (including briquets) and other silicon alloys -----	short tons	P,S
33134	OTHER FERROALLOYS		
3313408 1	Ferromanganese (including briquets), manganese metal, and silicomanganese -----	short tons	P,S
3313415 6	Superalloys (these superior heat and creep resistant alloys should be excluded from alloy categories listed elsewhere) -----	short tons	P,S
3313489 1	Other ferroalloys (including silvery iron and spiegeleisen) -----	short tons	P,S
3313498 2	Other products made in electric and other furnaces -----	short tons	P,S

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 33—Primary Metal Industries—Con.

Product code	Industry and product description	Unit of measure	Data collected
3315	STEEL WIRE AND RELATED PRODUCTS —MC-3301		
33151	NONINSULATED FERROUS WIRE ROPE, CABLE, AND STRAND (MADE IN WIREDRAWING PLANTS) ²		
3315113 5	Rope and cable made from steel wire (excluding fabricated wire rope assemblies) ³ -----		SV
3315115 0	Fabricated wire rope assemblies (including lifting slings) -----		SV
3315125 9	Wire forms (excluding rope assemblies) and composite rope and cable -----		SV
3315134 1	Steel wire strand (including strand for prestressed concrete, composite wire strand except ACSR, and guard rail cable) ³ -----		SV
33152	STEEL NAILS, STAPLES, TACKS, SPIKES, AND BRADS		
3315201 8	Round wire nails, collated, prepackaged ³ ----- Round wire nails, not collated, smooth shank: Coated, plated, or painted: -----	short tons	S
3315203 4	Galvanized ³ -----	short tons	S
3315205 9	Vinyl, resin, or cement coated ³ -----	short tons	S
3315207 5	Other ³ -----	short tons	S
3315209 1	Not coated, plated, or painted ³ ----- Round wire nails, not collated, other than smooth shank: Coated, plated, or painted: -----	short tons	S
3315210 9	Galvanized ³ -----	short tons	S
3315213 3	Other (including vinyl, resin, or cement coated) ³ -----	short tons	S
3315216 6	Not coated, plated, or painted ³ -----	short tons	S
3315222 4	Steel cut nails (including horseshoe nails) ³ -----		SV
3315223 2	Steel wire staples ³ -----		SV
3315225 7	Steel tacks (wire and cut) -----		SV
3315230 7	Steel spikes and brads (including track spikes) -----		SV
33155	STEEL WIRE (NOT MADE IN STEEL MILLS) ²		
3315500 3	Wire, including galvanized and other coated wire (made in plants not producing wire rods or hot-rolled bars) ³ -----		SV
33156	FENCING AND FENCE GATES (MADE IN WIREDRAWING PLANTS) ²		
3315613 4	Chain link fencing, excluding posts, gates, and fittings (including galvanized and plastics coated) -----		SV
3315621 7	Woven and welded fencing, excluding posts, gates, and fittings (including galvanized and plastics coated) -----		SV
3315635 7	Fence gates, posts, and fittings -----		SV
3315671 2	Ornamental lawn fence (excluding posts, gates, and fittings) -----		SV
33157	FERROUS WIRE CLOTH AND OTHER FERROUS WOVEN WIRE PRODUCTS (MADE IN WIREDRAWING PLANTS) ²		
3315700 9	Ferrous wire cloth and other ferrous woven wire products -----		SV
33159	OTHER FABRICATED FERROUS WIRE PRODUCTS (EXCEPT SPRINGS) (MADE IN WIREDRAWING PLANTS) ²		
3315942 7	Wire chain (including tire chain, stud-link, and welded-link) -----		SV
3315951 8	Barbed and twisted wire ³ -----		SV
3315955 5	Wire bale ties ³ -----		SV
3315963 3	Welded steel wire fabrics (including concrete reinforcing mesh) -----		SV
3315971 6	Wire garment hangers -----		SV
3315973 2	Wire carts (including household, grocery, and industrial) -----		SV
3315975 7	Steel wire cages -----		SV
3315999 7	Other wire products (guards, baskets, florists' designs, paperclips, kitchenware, wire shelving, wire rack, etc.) -----		SV
3316	COLD-FINISHING OF STEEL SHAPES —MC-3301		
33167	COLD-ROLLED STEEL SHEET AND STRIP (NOT MADE IN STEEL MILLS) ²		
3316700 8	Cold-rolled sheet and strip (made in plants not producing hot-rolled sheet or strip) ³ -----		SV
33168	COLD-FINISHED STEEL BARS AND BAR SHAPES (NOT MADE IN STEEL MILLS) ²		
3316800 6	Cold-finished bars and bar shapes (made in plants not producing hot-rolled bars and bar shapes) ³ -----		SV
3317	STEEL PIPE AND TUBES—MC-3301		
33170	STEEL PIPE AND TUBES (NOT MADE IN STEEL MILLS) ²		
3317000 2	Pipe and tubes (made in plants not producing semifinished shapes or plate) ³ -----		SV
3321	GRAY AND DUCTILE IRON FOUNDRIES —MC-3302		
33211	DUCTILE IRON PRESSURE PIPE AND FITTINGS ¹		
3321121 0	Ductile iron pressure pipe: Less than 14 inches (inside diameter) -----	short tons	S
3321123 6	14 inches or more (inside diameter) -----	short tons	S
3321125 1	Fittings: Less than 14 inches (inside diameter) -----	short tons	S
3321126 9	14 inches or more (inside diameter) -----	short tons	S
33212	OTHER DUCTILE IRON CASTINGS ¹		
3321222 6	Automotive uses -----	short tons	S
3321224 2	Construction and utility uses -----	short tons	S
3321233 3	Machinery uses -----	short tons	S
3321231 7	Valve uses -----	short tons	S
3321240 8	All other uses, including electric and electronic equipment uses, heat resistant parts, and coke oven door parts -----	short tons	S

94 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 33—Primary Metal Industries—Con.

Product code	Industry and product description	Unit of measure	Data collected
3321	GRAY AND DUCTILE IRON FOUNDRIES —MC-3302—Con.		
33216	MOLDS AND STOOLS FOR HEAVY STEEL INGOTS		
3321600 3	Molds and stools for heavy steel ingots ¹	short tons	S
33217	CAST IRON PRESSURE PIPE AND FITTINGS ¹		
3321731 6	Cast iron pressure pipe:		
3321733 2	Less than 14 inches (inside diameter)		SV
	14 inches or more (inside diameter)		SV
3321735 7	Fittings:	short tons	S
3321736 5	Less than 14 inches (inside diameter)	short tons	S
	14 inches or more (inside diameter)		
33218	CAST IRON SOIL PIPE AND FITTINGS (INCLUDING SPECIAL FITTINGS) ¹		
3321822 3	Cast iron soil pipe:	short tons	S
3321824 9	3 inches or less (inside diameter)	short tons	S
3321827 2	More than 3 inches up to but not including 5 inches (inside diameter)	short tons	S
	5 inches or more (inside diameter)		
3321830 6	Fittings (including special fittings):	short tons	S
3321833 0	3 inches or less (inside diameter)	short tons	S
3321836 3	More than 3 inches up to but not including 5 inches (inside diameter)	short tons	S
	5 inches or more (inside diameter)		
33219	OTHER GRAY IRON CASTINGS ¹		
3321931 2	Rolls for rolling mills	short tons	S
3321939 5	Automotive uses	short tons	S
3321949 4	Construction and utility uses	short tons	S
3321998 1	All other uses	short tons	S
3322	MALLEABLE IRON FOUNDRIES—MC-3302		
33221	STANDARD MALLEABLE IRON CASTINGS		
3322100 3	Standard malleable iron castings ¹	short tons	S
33222	PEARLITIC MALLEABLE IRON CASTINGS		
3322200 1	Pearlitic malleable iron castings ¹	short tons	S
3324	STEEL INVESTMENT FOUNDRIES —MC-3302		
33240	STEEL INVESTMENT CASTINGS ¹		
3324063 1	Carbon (including low alloy)		SV
3324064 9	Alloy (excluding stainless)		SV
3324066 4	Stainless steel		SV
3324067 2	Hi-temp metal castings (iron, nickel, or cobalt-base alloys)	pounds	S
3325	STEEL FOUNDRIES, N.E.C.—MC-3302		
33252	OTHER CARBON STEEL CASTINGS, EXCEPT INVESTMENT ¹		
3325211 5	Cast steel railroad car wheels and railway specialties		SV
3325215 6	Rolls for rolling mills		SV
3325219 8	Other carbon steel castings		SV
33254	HIGH ALLOY STEEL CASTINGS, EXCEPT INVESTMENT ¹		
3325421 0	High manganese steel castings	short tons	S
3325431 9	Other high alloy steel castings		SV
33255	OTHER ALLOY STEEL CASTINGS, EXCEPT INVESTMENT ¹		
3325551 4	Railway specialties	short tons	S
3325555 5	Rolls for rolling mills	short tons	S
3325559 7	All other alloy steel castings	short tons	S
3331	PRIMARY COPPER—MC-3303		
33311	COPPER SMELTER PRODUCTS		
3331100 2	Copper smelter products, not of commercial grade, produced for further refining, including blister or anode copper, etc.	short tons	P,S
33312	REFINED PRIMARY COPPER AND COPPER-BASE ALLOY ²		
3331217 4	Cathode	short tons	P,S
3331230 7	Other (including wire bar, ingot and ingot bar, cakes, slabs, shot, etc.)	short tons	P,S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 33—Primary Metal Industries—Con.

Product code	Industry and product description	Unit of measure	Data collected
3334	PRIMARY ALUMINUM—MC-3303		
33347	ALUMINUM INGOT (PRODUCED IN PRIMARY ALUMINUM REDUCTION PLANTS) ²		
3334700 6	Ingot, excluding billet ¹ -----	short tons	P,S
33348	ALUMINUM EXTRUSION BILLET (PRODUCED IN PRIMARY ALUMINUM REDUCTION PLANTS) ²		
3334800 4	Extrusion ingot (billet) ¹ -----	short tons	P,S
3339	PRIMARY NONFERROUS METALS, N.E.C.—MC-3303		
33391	ZINC RESIDUES AND OTHER ZINC SMELTER PRODUCTS		
3339100 4	Zinc smelter products not of commercial grade, produced for further refining including base bullion, matte, speiss, etc. -----		SV
33392	REFINED PRIMARY ZINC ²		
3339234 1	Zinc (including all ASTM specification zinc) unalloyed:		
3339244 0	Slab, excluding remelt zinc -----		SV
3339255 6	Slab, remelt zinc -----		SV
3339251 5	Dust -----		SV
	Zinc-base alloys -----	short tons	P,S
33395	PRECIOUS METALS AND PRECIOUS METAL ALLOYS ²		
3339525 2	Gold -----	troy ounces	P,S
3339535 1	Silver -----	troy ounces	P,S
3339545 0	Platinum (including platinum-group metals) -----	troy ounces	P,S
33398	OTHER PRIMARY NONFERROUS METALS, N.E.C.		
3339801 7	Lead smelter products not of commercial grade, produced for further refining including base bullion, matte, speiss, etc. -----		SV
3339805 8	Lead and lead-base alloys ² -----		SV
3339833 0	Magnesium and magnesium-base alloys ² -----	short tons	P,S
3339843 9	Nickel and nickel-base alloys ² -----		SV
3339863 7	Tin, unalloyed ² -----		SV
3339873 6	Silicon, unalloyed ² -----		SV
3339889 2	Other unrefined nonferrous metals (including metal bearing furnace residues and other metal products) ² -----		SV
3339899 1	Other refined nonferrous metals and their alloys including cadmium, antimony, cobalt, molybdenum, titanium sponge, etc. ² -----		SV
3341	SECONDARY NONFERROUS METALS —MC-3304		
33412	COPPER ²		
3341224 8	Unalloyed:		
3341226 3	Cathode, wire bar, ingot and ingot bar -----	short tons	P,S
3341231 3	Other (including cakes, slabs, shot, etc.) -----	short tons	P,S
	Copper-base alloys -----	short tons	P,S
33413	LEAD ²		
3341311 3	Lead, unalloyed (pig, ingots, shot, etc.) -----	short tons	P,S
	Lead- and tin-base alloys:		
3341321 2	Antimonial lead -----	short tons	P,S
3341333 7	Babbitt metal -----	short tons	P,S
3341351 9	Solder -----	short tons	P,S
3341399 8	Other (including type-metal) -----	short tons	P,S
33414	ZINC ²		
3341434 3	Zinc (including all ASTM specification zinc) unalloyed:		
3341444 2	Slab, excluding remelt zinc -----		SV
3341405 3	Slab, remelt zinc -----		SV
3341411 1	Dust -----		SV
	Zinc-base alloys -----	short tons	P,S
33415	PRECIOUS METALS AND PRECIOUS METAL ALLOYS ²		
3341525 8	Gold -----	troy ounces	P,S
3341535 7	Silver -----	troy ounces	P,S
3341545 6	Platinum (including platinum-group metals) -----	troy ounces	P,S
33416	OTHER SECONDARY NONFERROUS METALS ²		
3341633 0	Magnesium and magnesium-base alloys -----		SV
3341635 5	Nickel and nickel-base alloys -----		SV
3341671 0	Tin, unalloyed -----		SV
3341697 5	Other nonferrous metals and their alloys (cadmium, antimony, cobalt, titanium sponge, etc.) -----		SV
33417	ALUMINUM INGOT (PRODUCED BY SECONDARY SMELTERS) ²		
3341700 7	Ingot, excluding billet -----	short tons	P,S
33418	ALUMINUM EXTRUSION BILLET (PRODUCED BY SECONDARY SMELTERS) ²		
3341800 5	Extrusion ingot (billet) -----	short tons	P,S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 33—Primary Metal Industries—Con.

Product code	Industry and product description	Unit of measure	Data collected
3356	NONFERROUS ROLLING AND DRAWING, N.E.C.—MC-3305		
33561	NICKEL AND NICKEL-BASE ALLOY MILL SHAPES (INCLUDING NICKEL-COPPER ALLOYS)		
3356161 4	Plate, sheet, and strip (excluding nickel-copper alloys) -----	short tons	P,S
3356164 8	Other nickel shapes (excluding nickel-copper alloys and wire) -----	short tons	P,S
3356165 5	Nickel-copper alloys, all shapes and forms (except wire) -----	short tons	P,S
3356166 3	Nickel and nickel alloy wire -----	short tons	P,S
33562	TITANIUM AND TITANIUM-BASE ALLOY MILL SHAPES (EXCLUDING WIRE)		
3356272 9	Ingot -----	short tons	P,S
3356274 5	Forging and extrusion ingot (billet) -----	short tons	P,S
3356279 4	Other, including sheet, plate, tubing, bar, etc. -----	short tons	P,S
33563	PRECIOUS METAL MILL SHAPES		
3356381 8	Gold (excluding wire) -----	troy ounces	P,S
3356383 4	Silver (excluding wire) -----	troy ounces	P,S
3356386 7	Other, including platinum-group metals (excluding wire) -----	troy ounces	P,S
3356391 7	Precious metal wire -----	troy ounces	P,S
33569	ALL OTHER NONFERROUS METAL MILL SHAPES		
3356934 4	Magnesium and magnesium-base alloy mill shapes (excluding wire) ----- Lead and lead-base alloy mill shapes (excluding wire):	short tons	P,S
3356951 8	Plate, sheet, and strip -----	short tons	P,S
3356957 5	Other rolled, drawn, or extruded products, including pipe, tubing, traps, and bends -----	short tons	P,S
3356994 8	Tungsten and tungsten-base alloy mill shapes (excluding wire) -----	short tons	P,S
3356996 3	Molybdenum and molybdenum-base alloy mill shapes (excluding wire) -----	short tons	P,S
3356997 1	Other nonferrous metals, rolled, drawn, and extruded shapes, including zinc (excluding wire) -----	short tons	P,S
3356993 0	Other nonferrous wire (except copper, aluminum, nickel, and precious metals) ² -----	short tons	P,S
3357	NONFERROUS WIREDRAWING AND INSULATING—MC-3306		
33571	ALUMINUM AND ALUMINUM-BASE ALLOY WIRE AND CABLE, EXCEPT COVERED OR INSULATED (PRODUCED IN NONFERROUS WIREDRAWING PLANTS) ²		
3357100 1	Aluminum and aluminum-base alloy wire and cable, except covered or insulated (include ACSR) -----	short tons	P,S
33572	COPPER AND COPPER-BASE ALLOY WIRE, STRAND, AND CABLE, (FOR ELECTRICAL TRANSMISSION)		
3357211 6	Bare wire, unalloyed -----	short tons	P,S
3357251 2	Bare wire, alloyed -----	short tons	P,S
3357271 0	Strand and cable, bare -----	short tons	P,S
3357281 9	Other copper and copper-base alloy wire, strand, and cable (including electrical wire rod) -----	short tons	P,S
33573	OTHER BARE NONFERROUS METAL WIRE, MADE IN NONFERROUS WIREDRAWING PLANTS ²		
3357300 7	Other nonferrous metal wire, bare -----	short tons	P,S
33575	NONFERROUS WIRE CLOTH AND OTHER WOVEN WIRE PRODUCTS (MADE IN NONFERROUS WIREDRAWING PLANTS) ²		
3357500 2	Nonferrous wire cloth and other woven wire products -----		SV
33576	APPARATUS WIRE AND CORD AND FLEXIBLE CORD SETS ²		
3357600 0	Apparatus wire and cordage and flexible cord sets, except wiring harnesses ³ -----		SV
33577	MAGNET WIRE		
3357700 8	Magnet wire ³ -----		SV
33578	POWER WIRE AND CABLE		
3357800 6	Power wire and cable ³ -----		SV
3357A	ELECTRONIC WIRE AND CABLE		
3357A00 1	Electronic wire and cable ³ -----		SV
3357B	TELEPHONE AND TELEGRAPH WIRE AND CABLE		
3357B00 9	Telephone and telegraph wire and cable ³ -----		SV
3357C	CONTROL AND SIGNAL WIRE AND CABLE		
3357C00 7	Control and signal wire and cable ³ -----		SV
3357D	BUILDING WIRE AND CABLE		
3357D00 5	Building wire and cable ³ -----		SV
3357E	OTHER WIRE AND CABLE, N.E.C.		
3357E00 2	Other insulated wire and cable, including automotive ³ -----		SV

3399133 2	Copper and copper-base alloy	1,000 lb	S
3399155 5	Iron and steel	1,000 lb	S
3399166 2	Nickel-cobalt-base superalloy materials	1,000 lb	S
3399177 9	Tungsten and tungsten-base alloy	1,000 lb	S
3399186 0	Molybdenum	1,000 lb	S
3399187 8	Titanium		SV
3399188 6	Tantalum		SV
3399191 0	Precious metals and precious-metal-base alloys (gold, silver, platinum, etc.)	troy ounces	S
3399198 5	Other nonferrous powders, paste, and flakes	1,000 lb	S
33992	PRIMARY METAL PRODUCTS, N.E.C.		
3399211 6	Nonferrous nails, brads, tacks, and staples		SV
3399298 3	Other primary metal products, n.e.c.		SV

See footnotes at end of major group 39.

Major Group 34—Fabricated Metal Products

Product code	Industry and product description	Unit of measure	Data collected
3411	METAL CANS—MC-3401		
34111	STEEL CANS AND TINWARE PRODUCTS		
3411120 3	Steel, (including lids, ends, and parts shipped separately) -----		SV
3411191 4	Tinware end products (including ice cream cans, but excluding cooking and kitchen utensils) -----		SV
34112	ALUMINUM CANS		
3411200 3	Aluminum (including lids, ends, and parts shipped separately) -----		SV
3412	METAL BARRELS, DRUMS, AND PAILS—MC-3401		
34121	STEEL PAILS		
3412100 4	Steel pails (1 to 12 gallon capacity) ³ -----		SV
34122	STEEL SHIPPING BARRELS AND DRUMS (MORE THAN 12 GALLON CAPACITY)		
3412200 2	Steel shipping barrels and drums (excluding beer barrels) (more than 12 gallon capacity) ³ -----		SV
34123	ALL OTHER METAL BARRELS		
3412313 3	Metal fluid milk shipping and delivery containers (except crates) -----		SV
3412319 0	All other metal barrels (including beer barrels and parts for metal barrels and pails) -----		SV
3421	CUTLERY—MC-3402		
34211	CUTLERY, SCISSORS, SHEARS, TRIMMERS, AND SNIPS		
	Cutlery:		
3421111 0	Table cutlery (knives, forks, spoons, etc.) for serving and eating, with handles of materials other than metal -----		SV
3421125 0	Kitchen cutlery (including knives, forks, cleavers, butchers' and meat packing cutlery), excluding carving sets -----		SV
3421130 0	Other cutlery (including knife blades sold separately) -----		SV
	Scissors and shears:		
3421153 2	Household scissors and barber shears, pinking shears, and tailoring shears -----		SV
3421155 7	Manicure and pedicure scissors and implements (including tweezers) -----		SV
3421157 3	Metal cutting shears (including aviation and tanners' snips, BX and wire filament cutters) -----		SV
3421159 9	All other scissors and shears (including hedge and grass shears and pruners) -----		SV
3421180 5	Other knives (including pocket, pen, and replacement blade knives) -----		SV
34212	RAZOR BLADES AND RAZORS, EXCEPT ELECTRIC		
3421205 0	Razors -----		SV
	Razor blades:		
3421210 0	Single and double edge for shaving -----		SV
3421216 7	All other uses -----		SV
3423	HAND AND EDGE TOOLS, N.E.C. —MC-3402		
34231	MECHANICS' HAND SERVICE TOOLS		
	Pliers:		
3423112 6	Slip joint -----	thousands	S
3423113 4	Solid joint -----	thousands	S
3423121 7	Ball peen hammers -----	thousands	S
	Wrenches:		
3423131 6	Socket, including sockets, drives (ratchet and other), extensions, etc., for hand-operated socket wrenches -----		SV
3423133 2	Open-end and box wrenches -----		SV
3423136 5	Torque wrenches -----	thousands	S
3423137 3	Adjustable, including pipe wrenches -----	thousands	S
3423138 1	Combination open-end and box -----		SV
3423139 9	All other wrenches -----	1,000 units	S
3423141 5	Screwdrivers -----		SV
3423151 4	Automobile jacks, mechanical (excluding hydraulic and pneumatic) -----	thousands	S
3423155 5	Tools for automotive use (excluding jacks, but including wheel or gear pullers, valve tools, body or fender tools, etc.) -----		SV
3423197 7	Other mechanics' hand service tools (including blow torches) -----		SV
34234	EDGE TOOLS, HAND-OPERATED		
3423414 6	Axes, adzes, hatchets, and chisels -----		SV
3423433 6	Professional and craft edge handtools (palette knives, paperhanger knives, putty knives, scrapers, trimmers, etc.) -----		SV
3423444 3	Kitchen tools (including nonelectric can openers, peelers, slicers, dicers, etc.) -----		SV
3423498 9	Other edge tools (including agricultural and forestry edge handtools) -----		SV
34235	DIES AND INTERCHANGEABLE CUTTING TOOLS, FOR MACHINES AND POWER-DRIVEN HANDTOOLS		
	Dies (except metal cutting):		
3423511 9	Steel rule dies -----		SV
3423512 7	Other cutting dies, for use in cutting cloth, paper, leathers, etc. (excluding dies for cutting metal) -----		SV
	Machine knives (except metal cutting):		
3423521 8	Veneer knives and chipper knives -----		SV
3423522 6	All other machines knives -----		SV
	Machine tools for woodcutting:		
3423531 7	Countersink, drill, and router bits -----		SV
3423541 6	All other woodcutting machine tools (including milling cutters) -----		SV

See footnotes at end of major group 39.

100 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3423	HAND AND EDGE TOOLS, N.E.C. —MC-3402—Con.		
34236	OTHER HANDTOOLS, N.E.C.		
3423611 7	Shovels, spades, scoops, telegraph spoons, and scrapers	thousands	S
3423621 6	Light forged hammers, less than 4 lb (excluding ball peen hammers)	thousands	S
3423631 5	Heavy forged tools, sledges (4 lb or more), picks, pick mattocks, and mauls	thousands	S
3423641 4	Steel goods (forks, hoes, rakes, weeders, etc.)	thousands	S
3423681 0	Soldering irons (electric)	thousands	S
3423685 1	Clamps and vises (excluding machine tool accessories)		SV
3423698 4	Other handtools (including woodworking and metalworking files and rasps; including precision files; except edge tools)		SV
3425	SAW BLADES AND HANDSAWS—MC-3402		
34250	HANDSAWS, SAW BLADES (HAND AND POWER), AND SAW ACCESSORIES		
	Power saw blades:		
	Woodworking (including chain saw blades):		
3425011 8	Circular, solid tooth		SV
3425013 4	Circular, inserted tooth		SV
3425016 7	Band		SV
3425018 3	Teeth for inserted saws, sold separately		SV
3425019 1	All other woodworking power saw blades (scroll, jig, etc.)	feet	S
	Metalworking:		
3425031 6	Circular (including metal teeth and cutting segments sold separately)		SV
3425035 7	Hack (power only)	thousands	S
3425036 5	Band (flexible back, spring temper metal cutting, and high-speed metal cutting)	feet	S
3425039 9	Other metalworking saw blades (saber, reciprocating, etc.)		SV
3425041 5	All other power saw blades		SV
	Hand-operated saws:		
3425043 1	Hacksaw blades (hand only)	thousands	S
3425045 6	Carpenter crosscuts and ripaws	number	S
3425049 8	Other hand saws (heavy hand saws, crosscut, buck, miter, coping, pruning, compass, etc., including frames, and blades)		SV
3429	HARDWARE, N.E.C.—MC-3403		
34292	FURNITURE HARDWARE (EXCLUDING CABINET HARDWARE)		
3429212 8	Sleeper mechanisms		SV
3429213 6	Rotating and tilting fixtures and bases		SV
3429214 4	Furniture hardware, including drawer pulls and handles, etc. (excluding furniture and drawer slides)		SV
3429216 9	Furniture and drawer slides		SV
3429253 2	Furniture casters		SV
3429255 7	Other floor protective devices (including slides, glides, furniture rests, and desk leg cups)		SV
34293	VACUUM AND INSULATED BOTTLES, JUGS, AND CHESTS		
3429300 1	Vacuum and insulated bottles, jugs, and chests (except those made principally of foam plastics)		SV
34294	BUILDERS' HARDWARE		
	Padlocks:		
3429412 4	Pin tumbler		SV
3429413 2	Nonpin tumbler		SV
3429414 0	Combination		SV
	Doorlocks, locksets, and lock trim:		
3429416 5	Bored, cylindrical and tubular (except deadlocks)		SV
3429417 3	Mortise, except mortise deadlocks		SV
3429418 1	Tubular and mortise deadlocks		SV
3429419 9	Electronically or electrically operated locks		SV
3429422 3	All other types		SV
3429423 1	Architectural trim (sold separately) (including protection plates, push plates, pulls, push-pull bars, lock trim, etc.)		SV
3429424 9	Key blanks		SV
3429427 2	Exit devices (including fire exit hardware)		SV
3429433 0	Screen and storm door hardware (including pneumatic and hydraulic closers)		SV
3429436 3	Window hardware (including window locks)		SV
3429437 1	Miscellaneous closet hardware (including shelving other than wire and decorative shelving)		SV
	Door controls, closers, and checking devices:		
3429442 1	Surface applied		SV
3429443 9	Concealed (overhead, in the door, or on the floor)		SV
3429444 7	Electromechanical-pneumatic (with hold-open mechanism released by integral or remote smoke detector)		SV
	Hinges, excluding cabinet hinges, but including spring hinges:		
	Butt hinges:		
3429452 0	3 1/2 in. x 3 1/2 in. or less		SV
3429453 8	More than 3 1/2 in. x 3 1/2 in., either dimension		SV
3429454 6	Other		SV
	Cabinet hardware:		
3429461 1	Cabinet hinges		SV
3429462 9	Cabinet locks		SV
3429464 5	Cabinet knobs, pulls, and catches		SV
3429466 0	Other cabinet hardware (including drawer slides, etc.)		SV
3429471 0	Hangers, tracks, and related items (except sliding and folding door hardware), residential and commercial		SV
3429473 6	Sliding and folding door hardware (residential and commercial)		SV
3429481 9	Door holders and stops (overhead, surface, and concealed; floor and wall mounted)		SV
3429491 8	Rim locks and other locking devices, n.e.c.		SV
3429498 3	Other builders' hardware		SV
34296	MOTOR VEHICLE HARDWARE		
3429600 4	Motor vehicle hardware (lock units, door and window handles, window regulators, hinges, license plate brackets, etc.)		SV
34297	OTHER TRANSPORTATION EQUIPMENT HARDWARE (EXCEPT MOTOR VEHICLE HARDWARE)		
3429711 9	Marine hardware (including shackles, rope sockets, tackle blocks, wire rope clips, clamps, and joiners' hardware)		SV
3429731 7	Aircraft hardware		SV
3429798 6	Other transportation equipment hardware (including railroad car hardware)		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

101

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3429	HARDWARE, N.E.C.—MC-3403—Con.		
34298	OTHER HARDWARE, N.E.C.		
3429812 5	Casket and casket shell hardware -----		SV
3429822 4	Casters and wheels for dollies and industrial handtrucks -----		SV
3429852 1	Fireplace fixtures and equipment, andirons, screens, tongs, and other fire tools -----		SV
3429862 0	Hose fittings and couplings, excluding fittings and couplings used in fluid power systems -----		SV
3429865 3	Refrigerator and stove hardware -----		SV
3429898 4	Other hardware (including saddlery and harness hardware, but excluding drapery hardware) -----		SV
3431	METAL SANITARY WARE—MC-3404		
34310	METAL PLUMBING FIXTURES		
3431010 2	Enameled iron and metal plumbing fixtures ³ -----		SV
3431098 7	Other enameled iron and metal plumbing fixtures, including portable chemical toilets, water closet tanks, etc.-----		SV
3432	PLUMBING FIXTURE FITTINGS AND TRIM—MC-3404		
34321	SINGLE LEVER CONTROLS, TWO OR THREE HANDLE BATH OR SHOWER FITTINGS, AND ANTI-SCALD BATH OR SHOWER VALVES (BRASS GOODS)		
3432102 6	Single lever controls:		
3432105 9	Lavatory (metallic and nonmetallic) -----	number	S
3432108 3	Kitchen with spray (metallic and nonmetallic) -----	number	S
3432110 9	Kitchen without spray (metallic and nonmetallic) -----	number	S
3432112 5	Shower combination, mechanical -----	number	S
3432113 3	Shower-tub combination, mechanical -----	number	S
3432113 3	Tub filler, mechanical -----	number	S
3432114 1	Shower control only -----		SV
3432115 8	Two and three handle bath and shower fittings:		
3432117 4	Bathtub fillers -----	number	S
3432118 2	Shower fittings with shower heads -----	number	S
3432118 2	Shower heads sold separately -----	number	S
3432120 8	Bathtub and shower fittings:		
3432122 4	Diverter spout -----	number	S
3432125 7	Three valve diverter -----	number	S
3432128 1	Personal showers (handheld) -----	number	S
3432130 7	Tub and shower control only -----	number	S
3432132 3	Other bath and shower fittings, including stall and gang -----	number	S
3432134 9	Anti-scald bath and shower valves:		
3432136 4	Thermostatic controlled fittings -----	number	S
	Thermo/pressure controlled fittings -----	number	S
	Pressure balanced controlled fittings -----	number	S
34322	LAVATORY AND SINK FITTINGS (EXCEPT SINGLE CONTROL), INCLUDING DRAINS AND OVERFLOWS (BRASS GOODS)		
	Lavatory fittings (except basin cocks):		
3432201 6	4 inch center-set fittings:		
3432203 2	With pop-up drain:		
	Metallic -----	number	S
	Nonmetallic -----	number	S
3432205 7	Without pop-up drain:		
3432207 3	Metallic -----	number	S
	Nonmetallic -----	number	S
3432212 3	Greater than 4 inches:		
3432215 6	With pop-up drain (metallic and nonmetallic) -----	number	S
3432218 0	Without pop-up drain (metallic and nonmetallic) -----	number	S
	Basin cocks (one supply line only) -----	number	S
3432221 4	Sink fittings:		
	Wallmount combination sink faucet -----	number	S
3432224 8	Deck faucet, exposed type:		
3432227 1	3 inch to 4 inch deck fittings (rough or plated, with or without hose end), excluding double laundry-tray faucets -----	number	S
3432230 5	6 inch to 8 inch with spray (metallic and nonmetallic) -----	number	S
	6 inch to 8 inch without spray (metallic and nonmetallic) -----	number	S
3432233 9	Deck faucet, concealed type:		
3432236 2	With spray -----	number	S
3432239 6	Without spray -----	number	S
3432245 3	Single sink faucet (solid flanged female and adjustable male flange) -----	number	S
3432250 3	Other sink fittings (including sink strainers sold separately) -----	number	S
	Drains and overflows (metallic and nonmetallic), including pop-up drains for bath and shower, lavatory, and sink -----	number	S
34323	MISCELLANEOUS PLUMBING FIXTURES, FITTINGS, AND TRIM (BRASS GOODS)		
3432302 2	IPS mechanical connecting fittings -----		SV
3432305 5	Compression stops, including those with drains -----	number	S
3432308 9	Solder connecting fittings -----		SV
3432311 3	Sediment, hydrant, lawn, hose bibb, and sill cock faucets -----	number	S
	P-traps:		
3432314 7	Metallic -----		SV
3432317 0	Nonmetallic -----		SV
	S-traps:		
3432320 4	Metallic -----		SV
3432323 8	Nonmetallic -----		SV
3432325 3	Lawn hose nozzles and lawn sprinklers -----		SV
3432327 9	Flushometer valves and flush valves (for gravity-type flush tanks) -----		SV
3432332 9	Other miscellaneous items and accessories (water closet tank flushing controls, double laundry-tray faucets, etc.) -----		SV

See footnotes at end of major group 39.

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3433	HEATING EQUIPMENT, EXCEPT ELECTRIC—MC-3405		
34333	CAST IRON HEATING BOILERS, RADIATORS, AND CONVECTORS, EXCEPT PARTS		
	Cast iron boilers:		
3433321 1	Gas	number	S
3433335 1	Other	number	S
	Radiators and convectors:		
3433365 8	Cast iron and steel	number	S
3433377 3	Aluminum and other nonferrous metal, including baseboard and finned tube type, residential, industrial, and special type	number	S
34334	DOMESTIC HEATING STOVES, EXCEPT ELECTRIC (EXCLUDING PARTS)		
3433410 2	Gas (all types), including vented and unvented circulators, radiants and laundry stoves	number	S
3433422 7	Coal, kerosene, gasoline, and fuel oil	number	S
	Wood:		
3433430 0	Freestanding fireplaces and stoves (all types), including circulating and radiants	number	S
3433440 9	Pellet fuel-burning heaters	number	S
3433462 3	Heat exchangers and zero clearance (factory built) fireplaces	number	S
3433474 8	Fireplace inserts	number	S
34335	STEEL HEATING BOILERS (15 P.S.I. OR LESS), AND ALL HOT WATER HEATING BOILERS, EXCLUDING PARTS		
3433512 5	400,000 Btu/ hr or less	number	S
3433515 8	Gross output of these boilers	1,000 Btu/ hr	S
3433520 8	400,001 Btu/ hr or more, including scotch type and horizontal fire box	number	S
3433525 7	Gross output of these boilers	1,000 Btu/ hr	S
34338	FLOOR AND WALL FURNACES, UNIT HEATERS, INFRARED HEATERS, AND MECHANICAL STOKERS		
3433820 2	Floor and wall furnaces (gas and oil)		SV
	Unit heaters:		
3433830 1	Gas-fired, 400,000 Btu/ hr or less		SV
3433832 7	Steam or hot water heating element, centrifugal fan-type (blower) and propeller fan-type	number	SV
3433838 4	Gas-fired infrared heaters		S
3433854 1	Mechanical stokers		SV
3433888 9	Parts for floor and wall furnaces, unit heaters, gas-fired infrared heaters, and mechanical stokers		SV
34339	OTHER HEATING EQUIPMENT, EXCEPT ELECTRIC, (INCLUDING PARTS FOR NONELECTRIC HEATING EQUIPMENT AND OIL BURNERS)		
	Oil burners:		
	Sold separately, except range-type:		
3433906 9	Residential-type (oil consumption rate less than 6 gal/ hr)	number	S
3433908 5	Commercial- and industrial-type (oil consumption rate 6 gal/ hr or more)	number	S
	Shipped with furnaces or boilers, except range-type:		
3433911 9	Residential-type (oil consumption rate less than 6 gal/ hr)	number	S
3433913 5	Commercial- and industrial-type (oil consumption rate 6 gal/ hr or more)	number	S
3433915 0	Range-type (sleeve- and pot-type, for use in water heaters, stoves, ranges, etc.)	number	S
3433985 3	Parts and attachments for oil burners		SV
	Gas burners and gas conversion burners, including parts:		
3433916 8	400,000 Btu/ hr or less	number	S
3433918 4	400,001 Btu/ hr or more		SV
3433919 2	Parts and attachments for gas burners (sold separately)		SV
3433945 7	Heat transfer coils (blast coils)		SV
3433950 7	Range boilers, expansion tanks (including basement tanks) and hot water storage tanks		SV
3433960 6	Unit ventilators		SV
3433961 4	Tanks for direct-fired water heaters (sold separately)	number	S
3433971 3	Nonelectric prefabricated metal fireplaces for commercial and industrial use	number	S
3433975 4	Solar energy collectors (water or air)		SV
3433999 4	Other heating equipment (dual-fired gas and oil burners, etc.) and other parts for heating equipment, except electric		SV
3441	FABRICATED STRUCTURAL METAL —MC-3406		
34411	FABRICATED STRUCTURAL METAL FOR BUILDINGS		
	Iron and steel:		
3441141 3	Industrial		SV
3441142 1	Commercial		SV
3441143 9	Residential		SV
3441144 7	Institutional, medical, and religious		SV
3441146 2	Public and educational		SV
3441147 0	Public utilities		SV
3441171 0	Aluminum		SV
34412	FABRICATED STRUCTURAL METAL FOR BRIDGES		
3441200 7	Fabricated structural metal for bridges		SV
34413	OTHER FABRICATED STRUCTURAL METAL		
	Iron and steel:		
3441316 1	For ships, boats, and barges		SV
3441320 3	For transmission towers, substations, radio antenna towers, and supporting structures		SV
3441323 7	For offshore oil and gas platforms		SV
3441326 0	For tunnelling and subway work		SV
3441329 4	For aerospace and defense		SV
3441359 1	Other fabricated structural iron and steel		SV
3441384 9	Aluminum for ships, boats, barges, transmission towers, and other structures		SV
3441398 9	Structural metal other than iron, steel, or aluminum		SV

3442222 0	Awning -----	number	S
3442224 6	Horizontal sliding -----	number	S
3442230 3	All other, including jalousie -----		SV
	Other (including commercial, industrial, etc.):		
3442235 2	Steel -----		SV
	Aluminum:		
3442241 0	Single and double hung -----	number	S
3442242 8	Awning -----	number	S
3442243 6	Projected -----	number	S
3442249 3	All other -----		SV
3442298 0	Metal window sash and frames, other than steel or aluminum -----		SV
34423	METAL MOLDING AND TRIM AND STORE FRONTS		
	Metal molding and trim:		
3442321 0	Steel -----		SV
3442325 1	Aluminum -----		SV
3442351 7	Store fronts, sold complete at factory -----		SV
34424	METAL COMBINATION SCREEN, STORM SASH, AND STORM DOORS		
	Metal storm sash (except combination) -----		SV
3442412 7	Combination screen and storm sash -----		SV
3442413 5	Storm doors -----	number	S
34425	METAL WINDOW AND DOOR SCREENS, (EXCEPT COMBINATION) AND METAL WEATHER STRIP		
	Door screens -----		SV
3442512 4	Window screens, with metal frames (including tension and roll types) -----		SV
3442551 2	Weather strip -----		SV
3443	FABRICATED PLATE WORK (BOILER SHOPS)—MC-3406		
34431	HEAT EXCHANGERS AND STEAM CONDENSERS (EXCEPT FOR NUCLEAR APPLICATIONS)		
	Heat exchangers, closed types, industrial:		
3443113 0	Bare tube -----		SV
3443118 9	Fin tube -----		SV
3443155 1	Steam condensers -----		SV
34432	FABRICATED STEEL PLATE (STACKS AND WELDMENTS)		
	Shielding for use in nuclear reactor buildings -----		SV
3443221 1	Pipe, penstocks, tunnel lining, stacks, and breeching -----		SV
3443236 9	Containers (trash and other) steel plate:		
3443244 3	Less than 13 gallons -----		SV
3443246 8	13 gallons to 79 gallons -----		SV
3443248 4	More than 79 gallons -----		SV
	Sound control equipment:		
3443252 6	Jet engine test facilities (including hush houses, demountable run-up silencers, demountable test cells, etc.) -----		SV
3443254 2	Gas turbine sound systems (enclosed) (including natural gas compression, electric generation, marine propulsion, etc.) -----		SV
3443256 7	Other (including sound panels, one piece enclosures, industrial silencers, and air duct silencers) -----		SV
3443298 9	Weldments and fabricated steel plate for other purposes -----		SV

See footnotes at end of major group 39.

104 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3443	FABRICATED PLATE WORK (BOILER SHOPS)—MC-3406—Con.		
34433	STEEL POWER BOILERS, (STATIONARY AND MARINE) PARTS AND ATTACHMENTS (EXCEPT NUCLEAR APPLICATIONS)		
3443308 6	Water tube: 10,000 lb/ hr or less 15 p.s.i. steam working pressure or less ----- More than 15 p.s.i. steam working pressure: 10,000 lb/ hr or less: -----		SV
3443310 2	Saturated -----		SV
3443315 1	Super heated -----		SV
3443319 3	10,001 lb/ hr to 100,000 lb/ hr: Saturated -----		SV
3443324 3	Super heated -----		SV
3443326 8	100,001 lb/ hr to 250,000 lb/ hr: Saturated -----		SV
3443328 4	Super heated -----		SV
3443330 0	250,001 lb/ hr or more: Saturated -----		SV
3443334 2	Super heated -----		SV
3443335 9	Other water tube (including 10,001 lb/ hr or more with 15 p.s.i. steam working pressure or less) -----		SV
3443337 5	Fire tube: Horizontal return tubular: 15 p.s.i. steam working pressure or less -----		SV
3443340 9	More than 15 p.s.i. steam working pressure -----		SV
3443341 7	Firebox: 15 p.s.i. steam working pressure or less -----		SV
3443344 1	More than 15 p.s.i. steam working pressure -----		SV
3443346 6	Scotch type pressure: 15 p.s.i. steam working pressure or less -----		SV
3443347 4	More than 15 p.s.i. steam working pressure -----		SV
3443348 2	Vertical and other fire tube type -----		SV
3443351 6	Other steel power boilers (stationary and marine) (except nuclear applications) -----		SV
3443352 4	Parts and attachments for steel power boilers (sold separately) -----		SV
34434	GAS CYLINDERS		
3443414 2	Seamless ferrous and nonferrous -----		SV
3443416 7	Welded ferrous and nonferrous -----		SV
34435	METAL TANKS, COMPLETE AT FACTORY (STANDARD LINE PRESSURE)		
3443520 6	Liquefied petroleum gas tanks (all types) ferrous and nonferrous -----		SV
3443535 4	Air receivers ferrous and nonferrous -----		SV
3443542 0	Other pressure tanks (including anhydrous ammonia tanks) ferrous and nonferrous -----		SV
34436	NUCLEAR REACTOR STEAM SUPPLY SYSTEMS		
3443600 6	Nuclear reactor steam supply systems, heat exchangers and condensers, pressurizers, components, and auxiliary equipment -----		SV
34437	METAL TANKS, COMPLETE AT FACTORY (STANDARD LINE NONPRESSURE)		
3443712 9	Storage tanks: 4,000 gallon capacity or less: Ferrous -----		SV
3443715 2	Nonferrous -----		SV
3443717 8	More than 4,000 gallon capacity: Ferrous -----		SV
3443719 4	Nonferrous -----		SV
3443748 3	Other nonpressure tanks (including tanks for trailers, metal septic tanks, etc.): Ferrous -----		SV
3443750 9	Nonferrous -----		SV
34438	METAL TANKS AND VESSELS, CUSTOM FABRICATED AT THE FACTORY		
3443803 6	Pressure (more than 24 inches outside diameter and not less than 5 cu ft capacity): Ferrous: Refineries, chemical plants, and paper mills -----		SV
3443805 1	Other processing industries -----		SV
3443808 5	Nonferrous process vessels, tanks, and kettles for refineries, chemical plants, and paper mills -----		SV
3443813 5	Liquefied petroleum gas tanks, ferrous and nonferrous -----		SV
3443820 0	All other tanks and vessels, custom fabricated at the factory: Ferrous -----		SV
3443822 6	Nonferrous -----		SV
34439	METAL TANKS AND VESSELS, CUSTOM FABRICATED AND FIELD ERECTED		
3443915 8	Bulk storage tanks: Elevated type: Ferrous: Dry materials -----		SV
3443917 4	Water -----		SV
3443919 0	Other liquids -----		SV
3443923 2	Nonferrous -----		SV
3443931 5	Ground storage type: Ferrous: Dry materials -----		SV
3443932 3	Petroleum products -----		SV
3443933 1	Water -----		SV
3443934 9	Other -----		SV
3443936 4	Nonferrous -----		SV
3443951 3	Pressure vessels and tanks (including gas holders and process vessels, etc.): Ferrous: Refineries, chemical plants, and paper mills -----		SV
3443953 9	Other processing industries -----		SV
3443958 8	Nonferrous -----		SV

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

105

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3444	SHEET METAL WORK—MC-3408		
34441	AIR-CONDITIONING DUCTS AND STOVE PIPE		
3444121 2	Air-conditioning ducts (including dust collecting ducts):		SV
3444123 8	Steel.....		SV
	Aluminum		
3444127 9	Stove pipe, furnace smoke pipe, and elbows:		SV
3444129 5	Steel.....		SV
	Aluminum		
34442	CULVERTS, FLUMES, IRRIGATION PIPES, ETC.		
3444213 7	Steel.....		SV
3444215 2	Aluminum		SV
3444219 4	Other metals		SV
34443	BINS AND VATS		
3444314 3	Grain, excluding drying floors, fans, and heaters (steel and aluminum)		SV
3444324 2	Other, including feed storage bins and sheet metal vats (steel and aluminum)		SV
34444	METAL ROOFING AND ROOF DRAINAGE EQUIPMENT		
3444411 7	Metal roofing:	short tons	S
3444417 4	Steel, all types	short tons	S
	Aluminum and other metals, all types		
	Roof drainage equipment (including eave troughs, etc.):		
3444423 2	Steel.....	short tons	S
3444429 9	Aluminum	short tons	S
3444431 5	All other metals	short tons	S
34445	METAL FLOORING AND SIDING		
3444505 6	Fabricated metal flooring	short tons	S
	Metal siding:		
3444516 3	Steel.....	short tons	S
	Aluminum:		
3444517 1	Residential (including mobile homes)	short tons	S
3444518 9	Other (commercial, industrial, farm buildings, etc.)	short tons	S
3444519 7	Other metals	short tons	S
34447	METAL AWNINGS, CANOPIES, CORNICES, AND SOFFITS		
	Awnings, canopies, carports, patios:		
3444721 9	Steel.....		SV
3444725 0	Aluminum		SV
3444731 8	Cornices, skylights, domes, copings (steel and aluminum)		SV
3444741 7	Soffits, fascia, and shutters (steel and aluminum)		SV
34448	ELECTRONIC ENCLOSURES		
	Computer and peripheral equipment:		
3444811 8	Steel.....		SV
3444813 4	Aluminum		SV
3444819 1	Other electronic enclosures (including machine and motor housings, panels, and guards) steel and aluminum		SV
34449	OTHER SHEET METAL WORK		
3444931 4	Roof ventilators		SV
3444941 3	Louvers and dampers for heating, ventilation, and air-conditioning (steel and aluminum)		SV
	Restaurant and hotel kitchen sheet metal equipment:		
3444953 8	Steel.....		SV
3444955 3	Aluminum		SV
	Other sheet metal work:		
3444962 9	Steel.....		SV
3444965 2	Aluminum		SV
3444998 3	Metals other than steel or aluminum		SV
3446	ARCHITECTURAL METAL WORK—MC-3409		
34461	GRILLES, REGISTERS, AND AIR DIFFUSERS		
	Warm air or air-conditioning grilles, registers, and air diffusers:	short tons	S
3446110 3	Iron and steel.....		SV
3446112 9	Aluminum		
	Other grilles (including open mesh partitions):		
3446115 2	Iron and steel.....		SV
3446117 8	Aluminum		SV
34462	STAIRS, RAILINGS, FENCES, AND GATES (OTHER THAN WIRE)		
	Stairs, staircases, and fire escapes:		
3446210 1	Iron and steel.....		SV
3446212 7	Aluminum		SV
	Fences and gates (other than wire):		
3446220 0	Iron and steel.....		SV
3446222 6	Aluminum		SV
3446226 7	Railings and window guards (iron, steel, and aluminum)		SV

See footnotes at end of major group 39.

106 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3446	ARCHITECTURAL METAL WORK—MC-3409—Con.		
34463	OPEN FLOORING, GRATING, AND STUDS		
3446310 9	Open flooring and grating for building construction:		
3446312 5	Iron and steel		SV
3446320 8	Aluminum		SV
3446322 4	Nonload-bearing studs (iron, steel, and aluminum)		SV
	Load-bearing studs (iron, steel, and aluminum)		SV
34464	SCAFFOLDING; SHORING AND FORMING FOR CONCRETE WORK		
3446410 7	Suspended scaffolding (including midpoint, two point, multilevel, boatswain chairs, etc.) (iron, steel, and aluminum)		SV
3446413 1	Access scaffolding, including tube and coupler system, prefabricated mobil scaffolds, etc. (iron, steel, and aluminum)		SV
3446416 4	Shoring (including flying forms, postshores, ellis clamps, reshores, etc.) (iron, steel, and aluminum)		SV
3446418 0	Forming (including modular, prefabricated, etc.) (iron, steel, aluminum, and all other material-metal combinations)		SV
34465	OTHER ARCHITECTURAL AND ORNAMENTAL WORK		
3446510 4	Iron and steel	short tons	S
3446512 0	Aluminum		SV
3446530 2	Other than iron, steel, or aluminum		SV
3448	PREFABRICATED METAL BUILDINGS —MC-3409		
34481	PREFABRICATED METAL BUILDING SYSTEMS (EXCLUDING FARM SERVICE BUILDINGS, RESIDENTIAL BUILDINGS, AND PARTS)		
3448115 0	Industrial and commercial	short tons	S
3448117 6	Institutional, medical, and religious	short tons	S
3448118 4	Public and educational	short tons	S
34482	OTHER PREFABRICATED AND PORTABLE METAL BUILDINGS AND PARTS		
3448211 7	Greenhouses, steel and aluminum		SV
3448214 1	Grain storage buildings (including farm and commercial types) steel and aluminum		SV
3448215 8	Other farm service buildings (livestock shelters, machinery storage, etc.), steel and aluminum		SV
3448218 2	Dwellings (including vacation homes and camps), steel and aluminum		SV
	Small utility buildings (including toolsheds, cabanas, storage houses, etc.):		
3448216 6	Steel		SV
3448226 5	Aluminum		SV
	Other (including garages, etc.):		
3448217 4	Steel		SV
3448227 3	Aluminum		SV
3448254 7	Panels, parts, or sections for prefabricated buildings, not sold as a complete unit; steel and aluminum		SV
3449	MISCELLANEOUS METAL WORK—MC-3409		
34494	FABRICATED BAR JOISTS AND CONCRETE REINFORCING BARS		
3449447 6	Fabricated bar joists:		
3449443 5	Long span	short tons	S
3449452 6	Short span (open web)	short tons	S
	Fabricated concrete reinforcing bars	short tons	S
34496	METAL PLASTER BASES		
3449611 7	Expanded metal lath	1,000 sq yd	S
3449632 3	Metal plaster base accessories (including corner beads, screeds, grounds, etc.)		SV
34497	CURTAIN WALL		
3449773 5	Steel (including stainless)		SV
3449775 0	Aluminum		SV
3449779 2	All other (including combination of metals)		SV
34498	CUSTOM ROLL FORM PRODUCTS		
3449811 3	Carbon steel		SV
3449813 9	Stainless steel		SV
3449815 4	Aluminum		SV
3449817 0	Other metals		SV
3451	SCREW MACHINE PRODUCTS—MC-3410		
34511	AUTOMOTIVE SCREW MACHINE PRODUCTS AND TURNED PARTS (NONSTANDARD ITEMS MADE FROM ROD, BAR, OR TUBE STOCK)		
3451100 6	Automotive		SV
34512	OTHER SCREW MACHINE PRODUCTS AND TURNED PARTS (NONSTANDARD ITEMS MADE FROM ROD, BAR, OR TUBE STOCK)		
3451231 9	Aircraft		SV
3451239 2	Ordnance		SV
3451242 6	Household appliances, including radio and television		SV
3451252 5	Electric and electronic equipment, except household appliances		SV
3451262 4	Machinery		SV
3451299 6	All other end uses		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3452	BOLTS, NUTS, RIVETS, AND WASHERS—MC-3410		
34524	EXTERNALLY THREADED METAL FASTENERS, EXCEPT AIRCRAFT TYPES		
3452411 6	Bolts:		SV
3452412 4	Mine roof bolts.....		SV
3452419 9	Hex bolts, including heavy, tap-and-joint, excluding high-strength structural		SV
	Other metal bolts, including square, round, plow, high-strength structural, and bent bolts		SV
3452439 7	Screws:		SV
3452445 4	Cap, set, machine, lag, flange, and self-locking		SV
3452489 2	Tapping, including fillister, flat, hex, oval, pan and truss; and wood, including flat, oval, and round		SV
	Other externally threaded metal fasteners not mentioned above, including studs		SV
34525	INTERNALLY THREADED METAL FASTENERS, EXCEPT AIRCRAFT TYPES		
3452504 8	Nuts:		SV
3452529 5	Hex, including flanges, double chamfered, washer face, flat, jam, slotted, thick, castle, heavy, machine, and locking.....		SV
3452589 9	Square, including flat, washer, crowned, heavy, track, sleeve, and machine; sheet metal; weld; wing; nut retainers; etc.		SV
	Other internally threaded metal fasteners not mentioned above, including flanged nuts and locknuts		SV
34526	NONTHREADED METAL FASTENERS, EXCEPT AIRCRAFT TYPES		
3452609 5	Rivets:		SV
3452615 2	Solid		SV
3452635 0	Tubular, split (including rivet caps) and blind		SV
3452679 8	Washers		SV
	Other nonthreaded metal fasteners not mentioned above, including pins (all types)		SV
34527	AIRCRAFT (INCLUDING AEROSPACE) FASTENERS OTHER THAN PLASTICS (MEET SPECIFICATIONS FOR FLYING VEHICLES)		
	Externally threaded:		
3452701 0	Bolts:		SV
3452706 9	Less than 161 KSI tensile		SV
3452715 0	161 KSI tensile or more.....		SV
	Screws, all types; and studs, all types		SV
3452745 7	Internally threaded:		SV
3452759 8	Locknuts, including flanged locknuts		SV
	Other, including flanged nuts (all types except flanged locknuts), hex square nuts (all types) and sheet metal fasteners		SV
3452761 4	Nonthreaded:		SV
3452762 2	Washers, all types.....		SV
3452763 0	Rivets, all types		SV
	Pins, all types.....		SV
34528	OTHER FORMED PARTS NOT MADE OF PLASTICS (MADE ON FASTENER MACHINES)		
3452811 7	Automotive		SV
3452821 6	Household appliances, including radio and television		SV
3452831 5	Aircraft		SV
3452898 4	All other, including ordnance		SV
3462	IRON AND STEEL FORGINGS—MC-3411		
34625	HOT IMPRESSION DIE IMPACT, PRESS, AND UPSET STEEL FORGINGS		
3462511 1	Carbon steel.....	short tons	S
3462513 7	Alloy steel, excluding stainless and hi-temp	short tons	S
3462515 2	Stainless	short tons	S
3462517 8	Hi-temp (iron, nickel, or cobalt-base alloy)	short tons	S
34626	COLD IMPRESSION DIE IMPACT, PRESS, AND UPSET STEEL FORGINGS		
3462611 9	Carbon steel	short tons	S
3462613 5	Alloy steel	short tons	S
3462616 8	Stainless steel and hi-temp (iron, nickel, or cobalt-base alloy)	short tons	S
34627	SEAMLESS ROLLED RING FORGINGS, FERROUS (NOT MADE IN STEEL MILLS)²		
3462712 5	Carbon and alloy steel, excluding stainless and hi-temp		SV
3462716 6	Stainless steel and hi-temp (iron, nickel, or cobalt-base alloy)		SV
34628	OPEN DIE OR SMITH FORGINGS (HAMMER OR PRESS), FERROUS (NOT MADE IN STEEL MILLS)²		
3462812 3	Carbon and alloy steel, excluding stainless and hi-temp		SV
3462816 4	Stainless steel and hi-temp (iron, nickel, or cobalt-base alloy)		SV
3463	NONFERROUS FORGINGS—MC-3411		
34635	HOT IMPRESSION DIE IMPACT, PRESS, AND UPSET NONFERROUS FORGINGS¹		
3463521 9	Aluminum and aluminum alloy	short tons	S
3463523 5	Titanium and titanium alloy	short tons	S
3463525 0	Copper and copper-base alloy	short tons	S
3463529 2	Other hot impression nonferrous forgings	short tons	S
34639	OTHER NONFERROUS FORGINGS		
3463915 3	Cold impression die impact, press, and upset nonferrous forgings	short tons	S
3463925 2	Seamless rolled ring forgings (nonferrous)	short tons	S
3463935 1	Open die or smith forgings, hammer or press (nonferrous).....	short tons	S

See footnotes at end of major group 39.

108 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3465	AUTOMOTIVE STAMPINGS—MC-3412		
34650	JOB STAMPINGS, AUTOMOTIVE		
3465000 2	Automotive job stampings (truck, bus, and passenger car)		SV
3466	CROWNS AND CLOSURES—MC-3412		
34661	METAL COMMERCIAL CLOSURES AND METAL HOME-CANNING CLOSURES, EXCEPT CROWNS		
3466105 8	Metal and metal-composite closures, including home-canning closures		SV
3466120 7	All other closures, including roll-ons:		
3466122 3	Soft drinks		SV
	All other including beer		SV
34662	METAL CROWNS		
3466230 4	Soft drinks		SV
3466232 0	All other including beer		SV
3469	METAL STAMPINGS, N.E.C.—MC-3412		
34692	JOB STAMPINGS, EXCEPT AUTOMOTIVE		
3469201 2	Recreational vehicle stampings (motor homes, travel trailers, etc.)		SV
3469205 3	Motor and generator stampings		SV
3469211 1	Aviation stampings		SV
3469215 2	Agricultural equipment stampings, including tractor		SV
3469220 2	Computer stampings		SV
3469225 1	Electrical appliance stampings, except refrigeration and laundry equipment		SV
3469231 9	Furniture stampings		SV
3469241 8	Office machine stampings, excluding computer		SV
3469252 5	Radio and phonograph stampings		SV
3469253 3	Television stampings		SV
3469261 6	Refrigeration stampings (residential, commercial, and industrial)		SV
3469271 5	Stove, heater, and air-conditioner stampings (residential, commercial, and industrial)		SV
3469284 8	Laundry equipment stampings (residential, commercial, and industrial)		SV
3469288 9	Other industrial equipment stampings		SV
3469298 8	Other job stampings		SV
34694	STAMPED AND SPUN UTENSILS, COOKING AND KITCHEN, ALUMINUM		
3469411 7	Top of range household utensils (items generally used directly on top of source of heat), including pressure cookers		SV
3469414 1	Bakeware, pantryware, and miscellaneous household utensils		SV
3469417 4	Camping and outdoor cooking equipment		SV
3469429 9	Other, including commercial and hospital		SV
34695	STAMPED AND SPUN UTENSILS, COOKING AND KITCHEN, EXCEPT ALUMINUM		
	Stainless steel:		
3469507 2	Top of range household utensils (items generally used directly on top of source of heat)		SV
3469509 8	Bakeware, pantryware, and miscellaneous household utensils		SV
3469515 5	Other, including commercial, hospital, and outdoor cooking equipment		SV
	Tinware:		
3469521 3	Household		SV
3469524 7	Other, including commercial, hospital, and outdoor cooking equipment		SV
3469527 0	Vitreous enameled cooking and kitchen utensils		SV
3469598 1	Other stamped and spun cooking and kitchen utensils, including copper		SV
34696	METAL SPINNING PRODUCTS		
3469600 5	Metal spinning products, excluding cooking and kitchen utensils		SV
34699	OTHER STAMPED AND PRESSED METAL END PRODUCTS, INCLUDING VITREOUS ENAMELED PRODUCTS		
	Vitreous (porcelain) enameled products, excluding cooking and kitchen utensils:		
3469941 3	Architectural parts (exterior and interior), including store front and curtain wall components		SV
3469948 8	Other products including refrigerator and laundry equipment parts; and commercial and hospital utensils		SV
3469951 2	Chemical milling products; milled contoured metal; and clad and bonded metal products		SV
3469959 5	Perforated metal end products		SV
	Pails, ash cans, garbage cans, tubs, etc., excluding shipping containers:		
3469961 1	Galvanized steel		SV
3469969 4	Other metal, including other grades of steel		SV
3469971 0	Electronic enclosures (stamped and/or pressed), excluding computer stampings		SV
3469985 0	Mailboxes (commercial and multiple unit residential)		SV
3469989 2	Toolboxes		SV
3469997 5	Other stamped and pressed metal end products, excluding spinning products		SV
3471	PLATING AND POLISHING—MC-3413		
34710	ELECTROPLATING, PLATING, AND POLISHING		
3471000 4	Electroplating, plating, polishing, and anodizing		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

109

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3479	METAL COATING AND ALLIED SERVICES—MC-3413		
34790	ETCHING, ENGRAVING, COATING, AND ALLIED SERVICES		
3479010 5	Electronic engraving, excluding metal nameplates -----		SV
3479011 3	Photo chemical etching, including machining (excluding metal nameplates) -----		SV
3479013 9	Etching and engraving nameplates -----		SV
3479021 2	Other engraving and etching -----		SV
3479031 1	Galvanizing and other hot dip coating -----		SV
	Organic coatings, enamels, and lacquers, including alkyds, plastics, etc.: -----		
3479061 8	Coil coating -----		SV
3479073 3	Liquid spray coating, including electrostatic coating -----		SV
3479075 8	Powder coating, including electrostatic and fluidized bed -----		SV
3479081 6	All other, including curtain coating and wash coating -----		SV
3479077 4	Inorganic coatings, including porcelain -----		SV
3482	SMALL ARMS AMMUNITION—MC-3414		
34820	SMALL ARMS AMMUNITION, 30 MM OR LESS (OR 1.18 INCHES OR LESS) FOR SMALL FIREARMS (RIFLES, SHOTGUNS, AND SIDEARMS)		
	Cartridges: -----		
3482025 8	Rimfire rifle/ pistol -----	thousands	S
3482035 7	Centerfire rifle -----	thousands	S
3482045 6	Centerfire pistols, including cartridges interchangeable between rifles and pistols -----	thousands	S
3482055 5	Shotgun shells -----	thousands	S
	Ammunition components: -----		
3482061 3	Primers -----	thousands	S
3482069 6	All other, including wads, shot cases (primed or unprimed), bullets, bullet jackets, and cases -----		SV
3482098 5	Other ammunition products, including industrial shells and cartridges, air gun ammunition, and percussion caps -----		SV
3483	AMMUNITION, EXCEPT FOR SMALL ARMS, N.E.C.—MC-3414		
34831	ARTILLERY AMMUNITION, MORE THAN 30 MM (OR MORE THAN 1.18 INCHES)		
3483111 5	Complete rounds, loaded -----		SV
3483135 4	Steel cases only -----		SV
3483151 1	Projectile metal parts -----		SV
3483171 9	Other components, including primers, fuses, boosters, and nonsteel cases -----		SV
3483181 8	Receipts for ammunition loading and assembly, more than 30 mm (or more than 1.18 inches) -----		SV
34833	AMMUNITION, EXCEPT FOR SMALL ARMS, N.E.C.		
3483311 1	Bombs, depth charges, mines, torpedoes, etc., and parts -----		SV
3483331 9	Rockets (other than guided missiles) and parts -----		SV
3484	SMALL ARMS—MC-3414		
34841	MACHINE GUNS, 30 MM OR LESS (OR 1.18 INCHES OR LESS)		
3484100 7	Machine guns, 30 mm or less (or 1.18 inches or less) -----	thousands	S
34842	SMALL ARMS, 30 MM OR LESS (OR 1.18 INCHES OR LESS)		
	Pistols and revolvers: -----		
3484211 2	Centerfire: -----		
3484213 8	Overall length 6 inches or less -----	thousands	S
3484216 1	All other, including units with interchangeable barrels -----	thousands	S
	Rimfire -----		
	Rifles: -----		
3484221 1	Centerfire: -----		
3484223 7	Semiautomatic -----	thousands	S
3484226 0	Bolt repeater -----	thousands	S
	All other types -----	thousands	S
3484254 2	Rimfire -----	thousands	S
3484265 8	Single barrel shotguns -----	thousands	S
3484274 0	Other small firearms (30 mm or less), including double barrel shotguns and combination rifle-shotguns -----	thousands	S
3484281 5	Parts and attachments for small firearms -----		SV
3489	ORDNANCE AND ACCESSORIES, N.E.C.—MC-3414		
34891	GUNS, HOWITZERS, MORTARS, AND RELATED EQUIPMENT, MORE THAN 30 MM (OR MORE THAN 1.18 INCHES)		
3489121 8	Guns, howitzers, and mortars, assembled and recoilless rifles -----		SV
3489151 5	Turrets (except aircraft turrets and aircraft turret drives), mounts and carriages (except self-propelled) -----		SV
3489171 3	Parts and other related equipment for heavy weapons -----		SV
34892	ORDNANCE AND ACCESSORIES, N.E.C.		
3489200 0	Ordnance and accessories, n.e.c. (rocket projectors, line throwing guns, flame throwers, torpedo tubes, etc., and parts) -----		SV

See footnotes at end of major group 39.

110 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3491	INDUSTRIAL VALVES—MC-3416		
34911	GATES, GLOBES, ANGLES, STRAIGHTWAY (Y-TYPE) CHECKS, STOP AND CHECK, CROSS, 3- AND 4-WAY, ETC.,		
3491111 5	Iron body, including ductile or modular, all pressures (excluding IBBM, AWWA, and UL) -----		SV
	Carbon steel:		
3491121 4	Cast -----		SV
3491123 0	Forged -----		SV
3491134 7	Alloy steel and other metals -----		SV
3491138 8	Brass and bronze (125 lb. w.s.p. or more) -----		SV
3491143 8	Actuators (power-operated, on/ off mounted) -----		SV
3491152 9	Parts -----		SV
34912	VALVES FOR WATER WORKS AND MUNICIPAL EQUIPMENT (IBBW, AWWA, AND UL)		
3491201 4	IBBM gate line and tapping valves -----		SV
	UL valves (all pressures):		
3491211 3	Check valves -----		SV
3491221 2	All others, including pest indicators -----		SV
3491223 8	Tapping sleeves and crosses -----		SV
3491231 1	Fire hydrants -----		SV
	AWWA valves (all pressures):		
3491235 2	Check valves -----		SV
3491241 0	Butterfly valves -----		SV
3491243 6	Parts -----		SV
34913	BALL VALVES (ALL METALS, PRESSURES, AND TYPES), INCLUDING MANUAL AND POWER-OPERATED, ON/ OFF VALVES		
3491311 1	Iron, including ductile -----		SV
3491323 6	Brass and bronze -----		SV
3491335 0	Carbon steel (cast and fabricated) -----		SV
3491347 5	Alloy steel and other metals -----		SV
3491359 0	Actuators (power-operated, on/ off mounted) -----		SV
3491361 6	Parts -----		SV
34914	BUTTERFLY VALVES (ALL METALS, PRESSURES, AND TYPES), INCLUDING MANUAL AND POWER-OPERATED, ON/ OFF VALVES		
	Industrial types, including elastomer and fluorochemicals, lined:		
3491411 9	Iron, including ductile -----		SV
3491413 5	Brass and bronze -----		SV
3491415 0	Carbon steel (cast and fabricated) -----		SV
3491417 6	Alloy steel and other metals -----		SV
	High-pressure types (shut-off to full ANSI class ratings):		
3491421 8	Iron -----		SV
3491423 4	Carbon steel (cast and fabricated) -----		SV
3491425 9	Alloy steel and other metals -----		SV
3491431 7	Actuators (power-operated, on/ off mounted) -----		SV
3491461 4	Parts -----		SV
34915	PLUG VALVES (ALL METALS, PRESSURES, AND TYPES), SUCH AS LUBRICATED, CYLINDRICAL ECCENTRIC, AND SLEEVE-LINED		
3491511 6	Iron, including ductile -----		SV
3491523 1	Carbon steel -----		SV
3491535 5	Alloy steel and other metals -----		SV
3491547 0	Actuators (power-operated, on/ off mounted) -----		SV
3491561 1	Parts -----		SV
34916	INDUSTRIAL VALVES, N.E.C.		
3491611 4	Cocks and stops (all metals, pressures, and types) -----		SV
3491623 9	Diaphragm and pinch valves, including operators (all metals, pressures, and types); excluding automatic valves -----		SV
	Pop safety valves and relief valves (more than 15 lb. w.s.p.):		
3491631 2	Iron and steel -----		SV
3491633 8	Brass and bronze -----		SV
3491641 1	Compressed gas cylinder valves -----		SV
3491653 6	Steam traps (more than 15 lb. w.s.p.) -----		SV
3491665 0	Thru conduit pipeline valves -----		SV
3491678 3	Actuators, sold separately (power-operated, on/ off mounted) -----		SV
3491698 1	Other metal valves, excluding control valves, regulators, and solenoid valves -----		SV
34917	NUCLEAR VALVES (N-STAMP ONLY)		
	Gate, globe, and check valves:		
3491711 2	Cast-carbon steel and low alloy -----		SV
3491713 8	Forged-carbon steel and low alloy -----		SV
3491715 3	Corrosion-resistant alloy steel -----		SV
3491727 8	Ball valves, butterfly valves, and plug valves (on/ off only) -----		SV
3491731 0	Actuators (mounted power-operated, on/ off) -----		SV
3491739 3	Automated control valves -----		SV
3491798 9	Parts -----		SV
34918	AUTOMATIC VALVES (REGULATING AND CONTROL TYPE) AND PARTS (EXCEPT NUCLEAR)		
3491800 3	Automatic regulating and control valves, power-operated; designed for modulating (throttling) service ³ -----		SV
34919	SOLENOID-OPERATED VALVES AND PARTS, EXCEPT NUCLEAR AND FLUID POWER TRANSFER		
3491900 1	Solenoid-operated valves and parts, except nuclear and fluid power transfer ³ -----		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

111

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3492	FLUID POWER VALVES AND HOSE FITTINGS—MC-3416		
3492A	AEROSPACE-TYPE HYDRAULIC FLUID POWER VALVES		
3492A00 7	Aerospace-type hydraulic fluid power valves ³		SV
3492B	AEROSPACE-TYPE PNEUMATIC FLUID POWER VALVES		
3492B00 5	Aerospace-type pneumatic fluid power valves ³		SV
3492C	NONAEROSPACE-TYPE HYDRAULIC DIRECTIONAL CONTROL VALVES		
3492C00 3	Nonaerospace-type hydraulic directional control valves ³		SV
3492D	NONAEROSPACE-TYPE HYDRAULIC VALVES, EXCEPT DIRECTIONAL CONTROL		
3492D00 1	Nonaerospace-type hydraulic valves, except directional control ³		SV
3492E	NONAEROSPACE-TYPE PNEUMATIC DIRECTIONAL CONTROL VALVES		
3492E00 8	Nonaerospace-type pneumatic directional control valves ³		SV
3492F	NONAEROSPACE-TYPE PNEUMATIC VALVES, EXCEPT DIRECTIONAL CONTROL		
3492F00 6	Nonaerospace-type pneumatic valves, except directional control ³		SV
3492G	PARTS FOR FLUID POWER VALVES		
3492G00 4	Parts for fluid power valves ³ Fluid power hose fittings and assemblies:		SV
3492H	AEROSPACE-TYPE HYDRAULIC AND PNEUMATIC HOSE OR TUBE END FITTINGS AND ASSEMBLIES		
3492H00 2	Aerospace-type hydraulic and pneumatic hose or tube end fittings and assemblies ³		SV
3492J	NONAEROSPACE-TYPE FLARED (METAL) FITTINGS, COUPLINGS FOR, AND ASSEMBLIES OF TUBING USED IN FLUID POWER TRANSFER SYSTEMS		
3492J00 9	Nonaerospace-type flared (metal) fittings, couplings for, and assemblies of tubing used in fluid power transfer systems ³		SV
3492K	NONAEROSPACE-TYPE FLARELESS FITTINGS AND COUPLINGS (INCLUDING NONMETAL FITTINGS) USED IN FLUID POWER TRANSFER SYSTEMS		
3492K00 7	Nonaerospace-type flareless fittings and couplings (including nonmetal fittings) used in fluid power transfer systems ³		SV
3492M	NONAEROSPACE-TYPE HYDRAULIC AND PNEUMATIC FITTINGS AND COUPLINGS FOR HOSE		
3492M00 3	Nonaerospace-type hydraulic and pneumatic fittings and couplings for hose ³		SV
3492N	NONAEROSPACE-TYPE HYDRAULIC AND PNEUMATIC ASSEMBLIES OF HOSE		
3492N00 1	Nonaerospace-type hydraulic and pneumatic assemblies of hose ³		SV
3493	STEEL SPRINGS, EXCEPT WIRE —MC-3415		
34931	HOT FORMED SPRINGS		
	Hot formed, helical springs, hot wound:		
	Automobile coil springs:		
3493105 5	Shipments for domestic replacement and shipments for export.....		SV
3493106 3	Shipments to U.S. motor vehicle manufacturers or their suppliers for use in original equipment		SV
3493116 2	Locomotive and railroad car and other helical springs, hot wound	short tons	S
	Hot formed leaf springs for automotive (auto, truck, bus, trailer, etc.):		
3493155 0	Shipments for domestic replacement and shipments for export.....	short tons	S
3493157 6	Shipments to U.S. motor vehicle manufacturers or their suppliers for use in original equipment		SV
3493199 8	Other hot formed springs, including torsion bar springs and leaf springs for tractors, farm equipment, locomotive, etc.		SV
34932	COLD FORMED SPRINGS		
3493210 3	Cold formed flat springs made of sheet or strip.....		SV
3493220 2	Cold formed helical suspension springs.....		SV

See footnotes at end of major group 39.

112 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3494	VALVES AND PIPE FITTINGS, N.E.C.—MC-3416		
34944	PLUMBING AND HEATING VALVES AND SPECIALTIES, EXCEPT PLUMBERS' BRASS GOODS		
3494421 5	Safety and relief valves		SV
3494431 4	Check valves		SV
3494441 3	All other plumbing and heating valves (less than 125 lb w.s.p.)		SV
3494451 2	Plumbing and heating valve specialties		SV
3494499 1	Parts		SV
34945	METAL FITTINGS, FLANGES, AND UNIONS FOR PIPING SYSTEMS		
	Gray iron:		
3494511 3	Fittings, flanges, and unions		SV
3494512 1	Grooved fittings and couplings		SV
	Malleable iron:		
3494513 9	Fittings and flanges, including reducers, caps, etc.		SV
3494514 7	Grooved fittings and couplings		SV
3494515 4	Unions and union fittings		SV
	Ductile iron:		
3494516 2	Fittings, flanges, and unions		SV
3494517 0	Grooved fittings and couplings		SV
	Copper, brass, or bronze, including solder and threaded types:		
3494518 8	Cast brass or bronze fittings, flanges, and unions		SV
3494519 6	Wrought copper and wrought copper alloy fittings, flanges, and unions		SV
3494521 2	Cast carbon and alloy steel fittings, flanges, and unions		SV
	Forged carbon, alloy, and stainless steel:		
3494523 8	Fittings, flanges, and unions; socket-weld or threaded-type		SV
	Flanges, butt-welding type:		
3494532 9	Carbon steel		SV
3494534 5	Alloy steel		SV
3494537 8	Stainless steel		SV
	Fittings, butt-welding type:		
3494542 8	Carbon steel		SV
3494544 4	Alloy steel		SV
3494547 7	Stainless steel		SV
3494571 7	Pipe hangers and supports (not including metal framing)		SV
3494585 7	Pipe couplings		SV
3494599 8	Other metal fittings, flanges, and unions, including metal framing and fittings for mechanical and electrical supports		SV
3495	WIRE SPRINGS—MC-3415		
34952	PRECISION MECHANICAL SPRINGS		
	Compression-type:		
3495212 7	Shipped to original equipment manufacturers		SV
3495214 3	Other shipments		SV
3495215 0	Extension-type		SV
3495217 6	Torsion-type		SV
34953	OTHER WIRE SPRINGS		
	Upholstery and furniture springs (unassembled):		
3495311 7	Seat and back springs for motor vehicles		SV
3495313 3	Springs for mattresses and bedsprings, excluding complete bedsprings		SV
3495317 4	Spring units for box springs, innerspring mattresses, and dual-purpose sleep furniture		SV
3495318 2	Spring units for upholstered furniture		SV
3495319 0	Other upholstery and furniture springs (unassembled)		SV
3495321 6	Valve springs		SV
3495398 4	Other wire springs		SV
3496	MISCELLANEOUS FABRICATED WIRE PRODUCTS—MC-3417		
34961	NONINSULATED FERROUS WIRE ROPE, CABLE, AND STRAND (NOT MADE IN WIREDRAWING PLANTS)²		
3496113 6	Rope and cable made from steel wire, excluding fabricated wire rope assemblies		SV
3496115 1	Fabricated wire rope assemblies, including lifting slings		SV
3496134 2	Steel wire strand, including strand for prestressed concrete, composite wire strand, except ACSR, and guard rail cable		SV
3496152 4	Other noninsulated ferrous wire rope, cable, and strand, including composite rope and cable and wire forms		SV
34964	FERROUS WIRE CLOTH AND OTHER FERROUS WOVEN WIRE PRODUCTS (NOT MADE IN WIREDRAWING PLANTS)²		
3496400 7	Ferrous wire cloth and other ferrous woven wire products not made in wiredrawing plants		SV
34965	NONFERROUS WIRE CLOTH AND OTHER WOVEN WIRE PRODUCTS (NOT MADE IN WIREDRAWING PLANTS)²		
3496500 4	Nonferrous wire cloth and other woven wire products		SV
34966	FENCING AND FENCE GATES (NOT MADE IN WIREDRAWING PLANTS)²		
3496613 5	Chain link fencing, excluding posts, gates, and fittings (including galvanized and plastics coated)		SV
3496621 8	Woven and welded fencing, including galvanized and plastics coated		SV
3496635 8	Fence gates, posts, and fittings		SV
3496671 3	Ornamental lawn fence, excluding posts, gates, and fittings		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

113

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3496	MISCELLANEOUS FABRICATED WIRE PRODUCTS—MC-3417—Con.		
34968	OTHER FABRICATED FERROUS WIRE PRODUCTS (EXCEPT SPRINGS) NOT MADE IN WIREDRAWING PLANTS) ²		
3496842 0	Wire chain, including tire chain, stud-link chain, and welded link		SV
3496851 1	Barbed and twisted steel wire		SV
3496855 2	Wire bale ties		SV
3496863 6	Welded steel wire fabrics, including concrete reinforcing mesh		SV
3496871 9	Wire garment hangers		SV
3496873 5	Wire carts, including household, grocery, and industrial		SV
3496875 0	Steel wire cages		SV
3496881 8	Wire baskets		SV
3496883 4	Wire shelving, including oven, refrigerator, closet, and barbeque grills		SV
3496885 9	Wire racks, including shoe, bottle, display, and point of purchase		SV
3496898 2	Other wire products, including guards, florists' designs, and paper clips		SV
3497	METAL FOIL AND LEAF—MC-3418		
34971	CONVERTED UNMOUNTED ALUMINUM FOIL PACKAGING PRODUCTS		
3497132 5	Household, institutional, and freezer foil	1,000 lb	S
3497133 3	Semirigid containers	1,000 lb	S
3497137 4	Other unmounted foil flexible packaging products, including gift wrap	1,000 lb	S
34972	LAMINATED ALUMINUM FOIL ROLLS AND SHEETS FOR FLEXIBLE PACKAGING USES		
3497210 9	Film/ foil without paper	1,000 lb	S
	Foil/ paper:		
3497222 4	Extrusion laminated foil/ paper combinations	1,000 lb	S
3497225 7	Adhesive or wax laminated foil/ paper combinations	1,000 lb	S
3497228 1	Foil/ film/ paper combinations	1,000 lb	S
3497241 4	Gift wrap (laminated)	1,000 lb	S
34973	CONVERTED FOIL FOR NONPACKAGING APPLICATIONS AND FOIL AND LEAF		
	Aluminum:		
3497352 9	Unmounted or coated, plain or printed	1,000 lb	S
3497354 5	Laminated to other materials	1,000 lb	S
3497358 6	Other foil, including composition (combination of two metals or more) and metal leaf (including aluminum leaf)	1,000 lb	S
3498	FABRICATED PIPE AND FITTINGS —MC-3419		
34980	FABRICATED PIPE AND PIPE FITTINGS MADE FROM PURCHASED PIPE		
3498013 6	Iron and steel		SV
3498015 1	Aluminum and aluminum-base alloy		SV
3498017 7	Copper and copper-base alloy		SV
3498019 3	All other nonferrous fabricated pipe and pipe fittings		SV
3499	FABRICATED METAL PRODUCTS, N.E.C.—MC-3419		
34991	SAFES AND VAULTS		
3499117 4	Safes and vaults (fire-resistive and burglary-resistive)	number	SV
3499141 4	Safe deposit boxes		S
3499198 4	All other bank and security vaults and equipment (including bank security lockers, night depositories, etc.)		SV
34992	COLLAPSIBLE TUBES		
3499211 5	Aluminum		SV
3499213 1	Other, including tin, tin-coated, tin-lead alloy, and lead		SV
34993	FLAT METAL STRAPPING		
3499300 6	Flat metal strapping	short tons	S
34995	METAL LADDERS		
3499511 8	Step and platform types		SV
3499521 7	Rung types (single, trestle, extension, sectional, etc.)		SV
3499531 6	Ladder-type step stools		SV
3499539 9	Ladder accessories (metal), including levelors, ladder feet, ladder jacks, roof hooks, bucket shelves, etc.		SV
34996	POWDER METALLURGY PARTS, EXCLUDING BEARINGS, GEARS, AND MACHINE CUTTING TOOLS AND ALL CEMENTED CARBIDE PARTS		
3499611 6	Aluminum and aluminum-base alloy	1,000 lb	S
3499633 0	Copper and copper-base alloy	1,000 lb	S
3499655 3	Iron and steel	1,000 lb	S
3499666 0	Nickel-cobalt-base super alloy materials	1,000 lb	S
3499677 7	Tungsten metal and tungsten-base alloy	1,000 lb	S
3499688 4	Other materials	1,000 lb	S

See footnotes at end of major group 39.

114 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 34—Fabricated Metal Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3499	FABRICATED METAL PRODUCTS, N.E.C.—MC-3419—Con.		
34998	ALL OTHER FABRICATED METAL PRODUCTS, N.E.C.		
3499811 2	Permanent magnets, except ceramic permanent magnets -----		SV
3499819 5	Fabricated assemblies of railroad frogs, switches, and crossings -----		SV
3499821 1	Steel boxes for packaging and shipping -----		SV
3499825 2	Steel boxes other than for shipping (ammunition boxes, jewelry cases, etc.) -----		SV
3499829 4	Stamped metal wheels for golf carts, lawn mowers, etc., (disc type) -----		SV
3499831 0	Metal aerosol valves -----		SV
3499839 3	Metal spools and reels -----		SV
3499899 7	Other fabricated metal products, n.e.c., including metal ironing boards, and metal memorial tablets and grave markers -----		SV

See footnotes at end of major group 39.

Major Group 35—Industrial Machinery and Equipment

Product code	Industry and product description	Unit of measure	Data collected
3511	TURBINES, TURBINE GENERATORS, AND TURBINE GENERATOR SETS—MC-3501		
35110	TURBINE GENERATOR SETS, TURBINES, TURBINE GENERATORS, AND PARTS		
3511005 5	Turbine generator sets and parts:		
3511009 7	Turbine generator sets -----	number	S
	Parts and accessories (sold separately) -----		SV
3511011 3	Steam, gas, hydraulic, and wind turbines and parts:		
	Steam turbines and other vapor turbines -----		SV
	Kilowatt or horsepower capacity (rated or normal) for all vapor turbines:		
3511021 2	Less than 373 kW (500 hp) -----	number	SQ
3511022 0	373 kW (500 hp) to 745 kW (999 hp) -----	number	SQ
3511023 8	746 kW (1,000 hp) to 7,459 kW (9,999 hp) -----	number	SQ
3511024 6	7,460 kW (10,000 hp) or more -----	number	SQ
3511061 8	Hydraulic turbines (all sizes) -----	number	S
3511075 8	Gas turbines, except aircraft (all sizes) -----	number	S
3511079 0	Wind turbines -----	number	S
	Parts and accessories (sold separately):		
3511072 5	For steam and other vapor turbines -----		SV
3511071 7	For hydraulic turbines -----		SV
3511081 6	For gas turbines, except aircraft -----		SV
3511083 2	For wind turbines -----		SV
	Turbine generators and parts:		
3511091 5	Turbine generators -----	number	S
3511095 6	Parts and accessories (sold separately) -----		SV
3519	INTERNAL COMBUSTION ENGINES, N.E.C.—MC-3501		
35191	GASOLINE AND GAS-GASOLINE ENGINES (EXCEPT AIRCRAFT, AUTOMOBILE, HIGHWAY TRUCK, BUS, TANK, AND OUTBOARD MARINE)		
3519100 6	Gasoline and gas-gasoline engines (except aircraft, automobile, highway truck, bus, tank, and outboard marine) ³ -----		SV
35193	DIESEL, SEMIDIESEL, AND DUAL-FUEL ENGINES (EXCEPT AUTOMOBILE, HIGHWAY TRUCK, BUS, AND TANK)		
3519300 2	Diesel, semidiesel, and dual-fuel engines (except automobile, highway truck, bus, and tank) ³ -----		SV
35194	DIESEL, SEMIDIESEL, AND DUAL-FUEL ENGINES FOR AUTOMOBILES, HIGHWAY TRUCKS, AND BUSES		
3519400 0	Diesel, semidiesel, and dual-fuel engines for automobiles, highway trucks, and buses ³ -----		SV
35195	OUTBOARD MOTORS (INTERNAL COMBUSTION)		
3519500 7	Outboard motors (internal combustion) -----	number	S
35196	PISTON-TYPE NATURAL GAS ENGINES, INCLUDING LPG ENGINES (EXCLUDING GAS TURBINES)		
3519600 5	Piston-type natural gas engines, including LPG engines (excluding gas turbines) ³ -----		SV
35197	TANK (EXCEPT GAS TURBINE) AND CONVERTED INTERNAL COMBUSTION ENGINES		
3519721 9	Tank engines, except gas turbines -----	number	S
3519751 6	Converted engines (basic engines, short blocks purchased or intracompany transfer and converted to marine or other uses) -----	number	S
35199	PARTS AND ACCESSORIES FOR INTERNAL COMBUSTION ENGINES, EXCEPT AIRCRAFT AND GASOLINE AUTOMOTIVE ENGINES AND GAS TURBINES		
3519901 7	Connecting rods -----		SV
3519908 2	Crankshafts, engine -----		SV
3519909 0	Camshafts, engine -----		SV
3519921 5	Flywheels -----		SV
	Engine bearings (halves):		
3519924 9	Main (crankshaft) -----		SV
3519925 6	Connecting rod -----		SV
3519933 0	Other (camshaft, balance shaft, etc.) -----		SV
	Engine pumps, new:		
3519927 2	Oil -----		SV
3519931 4	Fuel -----		SV
3519932 2	Water -----		SV
3519935 5	Engine blocks -----		SV
3519939 7	Cylinder liners (sleeves) -----		SV
3519949 6	Cylinder heads -----		SV
3519963 7	Intake manifolds and exhaust manifolds -----		SV
3519967 8	Valve guides, seats, and tappets -----		SV
3519971 0	Rocker arms and parts -----		SV
3519975 1	Fuel injection systems (multipoint) -----		SV
3519983 5	Governors, engine speed -----		SV
3519987 6	Radiators, stationary engine -----		SV
3519991 8	Superchargers, including turbochargers -----		SV
3519999 1	Other parts and accessories -----		SV

See footnotes at end of major group 39.

116 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3523	FARM MACHINERY AND EQUIPMENT —MC-3502		
35231	FARM-TYPE (POWER TAKE OFF HP) WHEEL TRACTORS (2- AND 4-WHEEL DRIVE) (SOLD WITH OR WITHOUT ATTACHMENTS)		
3523100 0	Farm-type (power take off hp) wheel tractors (2- and 4-wheel drive) (sold with or without attachments) ³ -----		SV
35232	FARM DAIRY EQUIPMENT, SPRAYERS AND DUSTERS (EXCEPT AERIAL TYPES), FARM ELEVATORS, AND FARM BLOWERS		
3523200 8	Farm dairy equipment, sprayers and dusters (except aerial types), farm elevators, farm blowers, and attachments ³ -----		SV
35233	PLANTING, SEEDING, AND FERTILIZING MACHINERY, EXCLUDING TURF MACHINERY		
3523300 6	Planting, seeding, and fertilizing machinery, and attachments ³ -----		SV
35235	HARVESTING MACHINERY, EXCEPT HAY AND STRAW		
3523500 1	Harvesting machinery (except hay and straw) and attachments ³ -----		SV
35236	HAYING MACHINERY		
3523600 9	Haying machinery and attachments ³ -----		SV
3523C	PLOWS, INCLUDING PLOWSHARES (PRIMARY TILLAGE), HARROWS, ROLLERS, PULVERIZERS, AND CULTIVATORS AND WEEDERS		
3523C00 6	Plows (including plowshares), harrows, rollers, pulverizers, and cultivators and weeders, and attachments ³ -----		SV
3523E	ALL OTHER FARM MACHINERY AND EQUIPMENT (EXCLUDING PARTS)		
3523E00 1	All other farm machinery and equipment (excluding parts), but including attachments ³ -----		SV
35239	PARTS FOR FARM MACHINERY, FOR SALE SEPARATELY		
3523926 8	Parts for farm machinery (except operator cabs):		SV
3523931 8	Parts for wheel tractors (farm-type) ³ -----		SV
3523953 2	Parts (except for wheel tractors) ³ -----		SV
	Operator cabs for farm equipment ³ -----		SV
3523F	COMMERCIAL TURF AND GROUNDS CARE EQUIPMENT		
3523F00 9	Commercial turf and grounds care equipment, including parts and attachments ³ -----		SV
3524	LAWN AND GARDEN EQUIPMENT—MC-3502		
35241	CONSUMER NONRIDING LAWN, GARDEN, AND SNOW EQUIPMENT		
3524100 9	Consumer nonriding lawn, garden, and snow equipment ³ -----		SV
35244	CONSUMER RIDING LAWN, GARDEN, AND SNOW EQUIPMENT		
3524400 3	Consumer riding lawn, garden, and snow equipment ³ -----		SV
35246	PARTS AND ATTACHMENTS FOR CONSUMER LAWN, GARDEN, AND SNOW EQUIPMENT		
3524600 8	Parts and attachments for consumer lawn, garden, and snow equipment ³ -----		SV
3531	CONSTRUCTION MACHINERY—MC-3503		
3531A	WHEEL TRACTORS, CONTRACTORS' OFF-HIGHWAY (2- AND 4-WHEEL), RUBBER-TIRED DOZERS, AND SELF-PROPELLED WHEELED LOG SKIDDERS		
3531A00 0	Wheel tractors, contractors' off-highway (2- and 4-wheel), rubber-tired dozers, and self-propelled wheeled log skidders ³ -----		SV
3531B	CRAWLER TRACTORS, 20 NET ENGINE HORSEPOWER RATING OR MORE (SOLD WITH OR WITHOUT ATTACHMENTS) (EXCLUDING PARTS)		
3531B00 8	Crawler tractors, 20 net engine horsepower rating or more (sold with or without attachments) (excluding parts) ³ -----		SV
3531C	TRACTOR SHOVEL LOADERS (SOLD WITH OR WITHOUT ATTACHMENTS) (EXCLUDING PARTS)		
3531C00 6	Tractor shovel loaders (sold with or without attachments) (excluding parts) ³ -----		SV
3531E	POWER CRANES, DRAGLINES, AND SHOVELS (EXCAVATORS) (INCLUDING SURFACE MINING EQUIPMENT AND ATTACHMENTS) (EXCLUDING PARTS)		
3531E00 1	Power cranes, draglines, and shovels (excavators) (including surface mining equipment and attachments) (excluding parts) ³ -----		SV
3531F	MIXERS, PAVERS, AND RELATED EQUIPMENT (EXCLUDING PARTS)		
3531F00 9	Mixers, pavers, and related equipment (excluding parts) ³ -----		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3531	CONSTRUCTION MACHINERY—MC-3503—Con.		
3531G	SCRAPERS, GRADERS, ROLLERS, OFF-HIGHWAY TRUCKS AND COAL HAULERS, TRAILERS, WAGONS, ROUGH TERRAIN FORKLIFTS, EXCEPT PARTS		
3531G00 7	Scrapers, graders, rollers, off-highway trucks and coal haulers, trailers, wagons, rough terrain forklifts, except parts ³ -----		SV
3531N	CONSTRUCTION MACHINERY FOR MOUNTING ON TRACTORS AND OTHER PRIME MOVERS (EXCLUDING PARTS AND SNOW CLEARING ATTACHMENTS)		
3531N00 4	Construction machinery for mounting on tractors and other prime movers (excluding parts and snow clearing attachments) ³ -----		SV
3531P	OTHER CONSTRUCTION MACHINERY AND EQUIPMENT (EXCLUDING PARTS)		
3531P06 6	Commercial brush, limb, and log chippers for waste wood reduction -----	number	S
3531P07 4	Log splitters -----	number	S
3531P11 6	Dredging machinery, hydraulic and other types -----		SV
3531P20 7	Self-propelled continuous ditchers and trenchers (including ladder and wheel types) (integral units only) ³ -----		SV
3531P21 5	Railway maintenance of way equipment (rail layers, ballast spreaders, etc.), except rail cars -----		SV
3531P22 3	Vertical earth augers and power posthole diggers, excluding water well and blasthole drills -----	number	S
3531P24 9	Horizontal earth boring machines and accessories -----	number	S
3531P25 6	Digger-derricks -----	number	S
3531P27 2	Pile driving equipment (including air, steam, or diesel pile hammers and impact pile or vibratory driver extractors) -----	number	S
3531P53 8	Winches, including for marine use (excluding winches for mounting on tractors):		
3531P55 3	Electric -----		SV
3531P61 1	Other -----		SV
3531P61 3	Automobile hoists (used on tow trucks) -----	number	S
3531P70 2	Portable crushing plants, screening plants, washing plants, and combination plants ³ -----		SV
3531P74 4	Handheld compaction equipment (including tampers, upright, and vibratory compactors) -----	number	S
3531P77 7	Handheld pavement breakers -----	number	S
3531P82 7	Rotary snow blowers, except residential (including integral units and attachments for mounting) -----	number	S
3531P85 0	Snow clearing attachments for mounting on tractors or trucks (except rotary snow blowers), including snow plows, etc. -----		SV
3531P90 0	Personnel aerial work platforms ³ -----		SV
3531P97 5	All other construction machinery and equipment, complete units, including well point systems -----	number	S
3531M	PARTS FOR CONSTRUCTION MACHINERY AND EQUIPMENT, SOLD SEPARATELY		
3531M01 4	Parts for contractors' off-highway wheel tractors, crawler tractors, and tractor shovel loaders (sold separately) -----		SV
3531M03 0	Parts for power cranes, draglines, and shovels (excavators) (including surface mining equipment) -----		SV
3531M05 5	Parts for mixers, pavers, and related equipment (sold separately) -----		SV
3531M07 1	Parts for scrapers, graders, rollers, off-highway trucks and coal haulers, trailers, wagons, rough terrain forklifts -----		SV
3531M08 9	Parts for construction machinery for mounting on tractors and other prime movers -----		SV
3531M21 2	Parts for other construction machinery and equipment listed in product class 3531P -----		SV
3532	MINING MACHINERY—MC-3503		
35325	UNDERGROUND MINING MACHINERY (EXCEPT PARTS SOLD SEPARATELY)		
3532500 0	Underground mining machinery (except parts sold separately) ³ -----		SV
35326	MINERAL PROCESSING AND BENEFICIATION MACHINERY (EXCEPT PARTS SOLD SEPARATELY)		
3532600 8	Mineral processing and beneficiation equipment (except parts sold separately) ³ -----		SV
35327	CRUSHING, PULVERIZING, AND SCREENING MACHINERY (EXCLUDING PORTABLE PLANTS), EXCEPT PARTS SOLD SEPARATELY		
3532700 6	Crushing, pulverizing, and screening machinery (excluding portable plants), except parts sold separately ³ -----		SV
35328	DRILLS AND OTHER MINING MACHINERY, N.E.C. (EXCEPT PARTS SOLD SEPARATELY)		
3532800 4	Drills and other mining machinery, n.e.c. (except parts sold separately) ³ -----		SV
35329	PARTS AND ATTACHMENTS FOR MINING MACHINERY AND EQUIPMENT (SOLD SEPARATELY)		
3532931 7	Mining drill bits:		
3532935 8	Rock drill bits:		
3532942 4	Percussion -----		SV
3532972 1	Other than percussion -----		SV
3532972 1	All other mining drill bits -----		SV
3532972 1	Parts and attachments for mining machinery and equipment (except drill bits) -----		SV
3533	OIL AND GAS FIELD MACHINERY —MC-3504		
35337	ROTARY OIL AND GAS FIELD DRILLING MACHINERY AND EQUIPMENT		
3533711 2	Rotary drilling surface equipment:		
3533712 0	Blocks, crown and traveling -----	number	S
3533714 6	Draw works and accessories -----	number	S
3533715 3	Rotary tables -----	number	S
3533716 1	Elevators, spiders, slips, hooks, links, and connectors -----		SV
3533717 9	Swivels and accessories -----		SV
3533721 1	Well control equipment (blow-out preventers, etc.) -----		SV
3533721 1	Other rotary drilling surface machinery and equipment, including kelly joints -----		SV
3533722 9	Rotary drilling subsurface equipment:		
3533723 7	Bits:		
3533728 6	With working part of sintered metal carbide or cermets -----	number	S
3533732 8	With working part of other material, including diamond -----	number	S
3533744 3	Reamers and stabilizers -----		SV
3533745 0	Coring equipment -----		SV
3533747 6	Tool joints, subs, and connectors -----		SV
3533748 4	Drill collars -----	number	S
3533759 1	Fishing and cutting tools -----		SV
3533759 1	Subsea drilling risers -----	number	S
3533759 1	Other subsurface rotary drilling equipment -----		SV

See footnotes at end of major group 39.

118 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3533	OIL AND GAS FIELD MACHINERY —MC-3504—Con.		
35337	ROTARY OIL AND GAS FIELD DRILLING MACHINERY AND EQUIPMENT—Con.		
3533761 7	Parts for rotary drilling equipment, sold separately (except for portable drilling rigs)-----		SV
35338	OTHER OIL AND GAS FIELD DRILLING MACHINERY AND EQUIPMENT		
3533831 8	Cable tool drilling machinery and equipment, including both surface and subsurface equipment-----		SV
3533851 6	Cementing, floating, guiding, and shoe equipment:-----		SV
3533855 7	Guide shoes, float collars, and combination guide and float shoes-----		SV
3533898 7	Other cementing equipment-----		SV
3533899 5	Other oil and gas field drilling equipment, except rotary drilling equipment and portable drilling rigs-----		SV
	Parts for other oil and gas field drilling equipment, sold separately-----		SV
35339	OIL AND GAS FIELD PRODUCTION MACHINERY AND EQUIPMENT (EXCEPT PUMPS)		
	Production well equipment, surface, subsurface, and subsea:-----		
3533912 6	Christmas tree assemblies, excluding subsea-----		SV
3533913 4	Casing and tubing heads and supports-----		SV
3533914 2	Chokes, manifolds, and other accessories (excluding subsea manifolds and templates)-----		SV
3533919 1	Rodless oil lifting machinery and equipment (except pumps)-----		SV
3533921 7	Subsea Christmas tree assemblies, manifolds, and templates-----		SV
	Rod lifting machinery and equipment, surface, including pumps:-----		
3533953 0	Pumping units and accessories, including back crank equipment-----	number	S
3533955 5	Other surface rod lifting machinery and equipment-----		SV
3533957 1	Subsurface rod lifting equipment (sucker rods), except pumps-----	no. sucker rods	S
3533961 3	Packers-----		SV
3533965 4	Screens, tubing, catchers, etc.-----		SV
3533971 2	Oil and gas separating, metering, and treating equipment for use at the wellhead-----	number	S
3533998 5	Other oil and gas field production machinery and tools-----		SV
3533982 9	Parts for oil and gas field production machinery and tools, sold separately-----		SV
3533A	PORTABLE DRILLING RIGS AND PARTS		
3533A10 7	Portable drilling rigs (mounted and unmounted) used on the surface (above ground) ³ -----		SV
3533A78 4	Parts for portable drilling rigs used on the surface (above ground) ³ -----		SV
3533B	OIL AND GAS FIELD DERRICKS AND WELL SURVEYING MACHINERY		
3533B21 2	Derricks, oil and gas field, substructures, and accessories - regular and portable-----	number	S
3533B32 9	Well surveying machinery and equipment, excluding well logging equipment-----		SV
3533B34 5	Well logging equipment-----		SV
3534	ELEVATORS AND MOVING STAIRWAYS —MC-3505		
35341	ELEVATORS AND MOVING STAIRWAYS		
	Elevators (except farm and portable):-----		
	Electric passenger (except residence lifts):-----		
3534105 6	Geared-----		SV
3534107 2	Gearless-----		SV
3534112 2	Hydraulic passenger-----		SV
3534113 0	Electric freight-----		SV
3534115 5	Hydraulic freight-----		SV
3534131 2	Automobile lifts (service station and garage type)-----		SV
3534151 0	Moving stairways, escalators, and moving walkways-----		SV
3534196 5	Other nonfarm elevators, including sidewalk elevators, dumb waiters, man lifts, etc. (except portable elevator/ stackers)-----		SV
35342	PARTS AND ATTACHMENTS FOR ELEVATORS AND MOVING STAIRWAYS (SOLD SEPARATELY)		
3534200 5	Parts and attachments for elevators and moving stairways (sold separately)-----		SV
3535	CONVEYORS AND CONVEYING EQUIPMENT —MC-3505		
35353	UNIT HANDLING CONVEYORS AND CONVEYING SYSTEMS, EXCEPT HOISTS AND FARM ELEVATORS		
3535309 3	Gravity conveyors (skate wheel and roller)-----		SV
	Trolley conveyors (overhead systems):-----		
3535313 5	Light- to medium-duty-----		SV
3535314 3	Heavy-duty-----		SV
3535317 6	Tow conveyors (under floor systems)-----		SV
	Powered conveyors (belt and roller):-----		
3535321 8	Light- to medium-duty-----		SV
3535323 4	Heavy-duty-----		SV
3535335 8	Pneumatic tube conveyors-----		SV
3535337 4	Portable conveyors, except farm-----		SV
3535341 6	Carousels-----		SV
3535347 3	All other, such as pallet conveyors, etc.-----		SV
35354	PARTS, ATTACHMENTS, AND ACCESSORIES FOR UNIT HANDLING CONVEYORS AND CONVEYING SYSTEMS (SOLD SEPARATELY)		
3535400 0	Parts, attachments, and accessories for unit handling conveyors and conveying systems (sold separately)-----		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

119

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3535	CONVEYORS AND CONVEYING EQUIPMENT —MC-3505—Con.		
35355	BULK MATERIAL HANDLING CONVEYORS AND CONVEYING SYSTEMS, EXCEPT HOISTS AND FARM ELEVATORS		
	Conveyors and elevators:		
3535505 6	Belt conveyors and systems		SV
3535509 8	Screw conveyors		SV
3535511 4	Bucket elevators		SV
3535515 5	Pneumatic conveyors		SV
3535519 7	Portable conveyors, except farm		SV
3535523 9	En masse conveyors		SV
3535527 0	Vibrating conveyors		SV
3535531 2	All other, such as apron, flight, and drag conveyors, etc.		SV
	Unloading and reclaiming systems:		
3535541 1	Bucket wheel reclaimers		SV
3535543 7	Vibrating feeders		SV
3535545 2	All other, such as bins, apron feeders, gates, etc.		SV
	Loading and storing systems:		
3535551 0	Traveling stackers		SV
3535555 1	Other, such as trippers, centrifugal throwers, etc.		SV
35356	PARTS, ATTACHMENTS, AND ACCESSORIES FOR BULK MATERIAL HANDLING CONVEYORS AND CONVEYING SYSTEMS (SOLD SEPARATELY)		
3535611 2	Belt conveyor idlers		SV
3535625 2	Belt conveyor pulleys		SV
3535637 7	All other parts, attachments, and accessories, sold separately		SV
3536	HOISTS, CRANES, AND MONORAILS —MC-3523		
35363	HOISTS		
	Hand hoists:		
3536301 9	Chain	number	S
3536302 7	Ratchet lever	number	S
3536303 5	Wire rope pullers	number	S
	Chain hoists, except hand:		
3536313 4	Electric (roller and link)	number	S
3536332 4	Air or other nonelectric	number	S
	Wire rope hoists, except hand:		
3536315 9	Mine shaft and slope wire rope hoists, drum or friction, electric or hydraulic (except tuggers, sheaves, skips, cages) ³		SV
3536316 7	Electric (excluding mine shaft and slope wire rope hoists)	number	S
3536334 0	Air or other nonelectric (excluding mine shaft and slope wire rope hoists)	number	S
3536339 9	Other hoists	number	S
3536345 6	Parts and attachments for hoists (sold separately)		SV
35364	OVERHEAD TRAVELING CRANES AND MONORAIL SYSTEMS		
	Overhead traveling cranes (excluding construction power cranes):		
3536401 7	Single top running bridge type	number	S
3536402 5	Double top running bridge type	number	S
3536403 3	Under running bridge type	number	S
3536404 1	Gantry type	number	S
3536405 8	Stacker/ storage type	number	S
3536406 6	Other, including jib type	number	S
3536417 3	Parts and attachments for overhead traveling cranes (sold separately)		SV
3536452 0	Monorail systems (manual and powered)	number	S
3536454 6	Parts and attachments for monorail systems (sold separately)		SV
3537	INDUSTRIAL TRUCKS AND TRACTORS —MC-3505		
35373	INDUSTRIAL TRUCKS, TRACTORS, MOBILE STRADDLE CARRIERS AND CRANES, AND AUTOMATIC STACKING MACHINES		
	Fork lift and other work trucks fitted with lifting or handling equipment:		
	Self-propelled:		
	Electric motor powered:		
3537301 8	Fork lift (operating riding)	number	S
3537302 6	Other (operating riding)	number	S
3537303 4	Nonriding	number	S
	Internal combustion engine or other nonelectric powered:		
3537304 2	Gasoline (operating riding fork lift)	number	S
3537307 5	Diesel (operating riding fork lift)	number	S
3537309 1	LPG (liquid petroleum gas) (operating riding fork lift)	number	S
3537311 7	Other, including CNG (compressed natural gas) (operating riding fork lift)	number	S
3537306 7	Other operator riding, except fork lift	number	S
3537308 3	Nonriding	number	S
3537312 5	Not self-propelled (hand lift, etc.)	number	S
	Works trucks and tractors not fitted with lifting or handling equipment:		
	Self-propelled:		
	Electric motor powered:		
3537315 8	Operator riding	number	S
3537316 6	Other	number	S
	Internal combustion engine or other nonelectric powered:		
3537317 4	Operator riding	number	S
3537318 2	Other	number	S
3537319 0	Not self-propelled		SV
3537321 6	Mobile straddle carriers and cranes	number	S
3537325 7	Portable elevators/ stackers (except farm type)	number	S
3537326 5	Palletizers and depalletizers (pallet loaders and unloaders)		SV
	Hydraulic lift tables (electrohydraulic lift platforms):		
3537328 1	Scissors type	number	S
3537329 9	Other types	number	S
3537331 5	Metal pallets and skids (excluding wood and metal combination)	number	S
3537332 3	Dock boards (industrial loading ramps, hinged loading ramps)	number	S
3537335 6	Automatic stacking machines	number	S
3537339 8	All other industrial trucks and tractors	number	S

3537	INDUSTRIAL TRUCKS AND TRACTORS —MC-3505— Con.		
35374	PARTS AND ATTACHMENTS FOR INDUSTRIAL TRUCKS AND TRACTORS (SOLD SEPARATELY)		
3537411 5	Cabs for industrial trucks and tractors -----		SV
3537418 0	All other parts and attachments-----		SV
3541	MACHINE TOOLS, METAL CUTTING TYPES—MC-3506		
3541D	BORING MACHINES (EXCLUDING MACHINING CENTERS) AND DRILLING MACHINES (EXCLUDING MACHINING CENTERS)		
3541D00 2	Boring machines (excluding machining centers) and drilling machines (excluding machining centers) ³ -----		SV
35413	GEAR CUTTING MACHINES		
3541300 4	Gear cutting machines ³ -----		SV
35414	GRINDING, POLISHING, BUFFING, HONING, AND LAPPING MACHINES, EXCEPT GEAR-TOOTH GRINDING, LAPPING, POLISHING, AND BUFFING		
3541400 2	Grinding, polishing, buffing, honing, and lapping machines, except gear-tooth grinding, lapping, polishing, and buffing ³ -----		SV
35415	LATHES (TURNING MACHINES)		
3541500 9	Lathes (turning machines) ³ -----		SV
35416	MILLING MACHINES (EXCLUDING MACHINING CENTERS)		
3541600 7	Milling machines (excluding machining centers) ³ -----		SV
3541A	MACHINING CENTERS (MULTIFUNCTION NUMERICALLY CONTROLLED MACHINES)		
3541A00 8	Machining centers (multifunction numerically controlled machines) ³ -----		SV
3541B	STATION TYPE MACHINES		
3541B00 6	Station type machines ³ -----		SV
3541C	OTHER METAL CUTTING MACHINE TOOLS (EXCEPT THOSE DESIGNED PRIMARILY FOR HOME WORKSHOPS, LABORATORIES, GARAGES, ETC.)		
3541C00 4	Other metal cutting machine tools (except those designed primarily for home workshops, laboratories, garages, etc.) ³ -----		SV
35418	MACHINE TOOLS DESIGNED PRIMARILY FOR HOME WORKSHOPS, LABS, GARAGES, ETC. (METALWORKING AND PRIMARILY METALWORKING)		
3541811 0	Drilling machines -----	number	S
3541831 8	Grinding and polishing machines, including crankshaft regrinding and valve grinding machines -----	number	S
3541851 6	Lathes -----	number	S
3541871 4	Sawing and cut-off machines -----	number	S
3541891 2	Other metalworking (or primarily metalworking) types, including automotive cylinder reboring machines -----	number	S
35419	PARTS FOR METAL CUTTING MACHINE TOOLS (SOLD SEPARATELY) AND REBUILT METAL CUTTING MACHINE TOOLS		
3541911 8	Parts for metal cutting machine tools, sold separately -----		SV
3541941 5	Rebuilt metal cutting machine tools -----		SV
3542	MACHINE TOOLS, METAL FORMING TYPES—MC-3506		
35421	PUNCHING AND SHEARING MACHINES (INCLUDING POWER AND MANUAL) AND BENDING AND FORMING MACHINES (POWER ONLY)		
3542100 7	Punching and shearing machines (including power and manual) and bending and forming machines (power only) ³ -----		SV
35422	METALWORKING PRESSES (EXCEPT FORGING AND DIE-STAMPING PRESSES)		
3542200 5	Metalworking presses (except forging and die-stamping presses) ³ -----		SV
35423	OTHER METAL FORMING MACHINE TOOLS, INCLUDING FORGING AND DIE-STAMPING MACHINES (EXCEPT METALWORKING PRESSES)		
3542300 3	Other metal forming machine tools, including forging and die-stamping machines (except metalworking presses) ³ -----		SV
35424	PARTS FOR METAL FORMING MACHINE TOOLS (SOLD SEPARATELY) AND REBUILT METAL FORMING MACHINE TOOLS		
3542411 8	Parts for metal forming machine tools (sold separately) -----		SV
3542475 3	Rebuilt metal forming machine tools -----		SV
3543	INDUSTRIAL PATTERNS—MC-3518		
35430	INDUSTRIAL PATTERNS, EXCEPT SHOE PATTERNS		
3543011 5	Foundry patterns -----		SV
3543098 2	All other industrial patterns (except shoe patterns) -----		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3544	SPECIAL DIES, TOOLS, JIGS, AND FIXTURES—MC-3507		
35441	SPECIAL DIES AND TOOLS, DIE SETS, JIGS, AND FIXTURES		
	Jigs and fixtures, all types:		
	Gauging and checking types:		
3544113 8	Less than 1,000 lb weight		SV
3544115 3	1,000 lb weight or more		SV
	All other jigs and fixtures (holding, positioning, layout, assembly, etc.):		
3544117 9	Less than 1,000 lb weight		SV
3544118 7	1,000 lb weight or more		SV
3544119 5	Standard catalog components and parts for jigs and fixtures, including drill bushings		SV
	Dies, metalworking only:		
3544121 1	Press brake dies		SV
	Forming and drawing dies:		
3544122 9	500 lb weight or less		SV
3544124 5	501 to 3,000 lb weight		SV
3544126 0	More than 3,000 lb weight		SV
	Stamping dies, including lamination and blanking dies:		
	Progressive-type dies:		
3544127 8	High-speed steel		SV
3544128 6	Carbide		SV
3544125 2	Other		SV
3544123 7	All other stamping-type dies (punch, trim, notch, pierce, perforate, etc.)		SV
	Forging dies, including cold forging and heading:		
3544133 6	Open die type		SV
3544135 1	Closed die type		SV
	Extrusion and wiredrawing and straightening dies:		
3544143 5	High-speed steel		SV
3544145 0	Carbide		SV
3544142 7	Ceramic and ceramic composite		SV
3544144 3	Other		SV
	All other dies:		
3544146 8	High-speed steel		SV
3544147 6	Carbide		SV
3544148 4	Other		SV
	Standard and special components and parts for dies:		
3544173 2	Die sets		SV
	Standard punches:		
3544175 7	Steel		SV
3544177 3	Carbide		SV
3544178 1	Other		SV
3544183 1	Industrial models and prototypes		SV
3544189 8	Other specially designed tooling		SV
35442	INDUSTRIAL MOLDS AND MOLD BOXES		
	Industrial molds made of metal:		
	Molds for metal or metal carbides (except ingot molds):		
	Die-casting dies:		
3544203 7	For low-pressure casting		SV
3544205 2	For high-pressure casting		SV
3544207 8	Permanent molds (for gravity casting)		SV
3544209 4	Other types		SV
3544214 4	Molds for wax		SV
3544221 9	Molds for mineral materials		SV
3544225 0	Molds for glass		SV
	Molds for rubber:		
3544241 7	Injection- or compression-types		SV
3544242 5	Other types		SV
	Molds for plastics:		
3544251 6	Injection-type		SV
3544255 7	Compression-type, including matched metal molds		SV
3544259 9	All other types, including transfer, plunger, and rotational molds		SV
3544245 8	Molds for other materials		SV
3544247 4	Mold bases		SV
3544263 1	Industrial molds made of materials other than metal		SV
3544267 2	Mold boxes or flasks for use with patterns and sand molds in foundries		SV
3545	MACHINE TOOL ACCESSORIES—MC-3507		
35451	SMALL CUTTING TOOLS FOR MACHINE TOOLS AND METALWORKING MACHINERY		
3545114 5	Broaches (excluding holders and burnishing bars)		SV
	Twist drills (excluding combined drills, countersinks, and gun drills):		
	Carbon steel and high-speed steel:		
3545115 2	Taper shank		SV
3545121 0	Straight shank		SV
3545124 4	Carbide, solid and tipped (excluding tips and blanks sold separately and masonry drills)		SV
3545122 8	Masonry drill bits		SV
3545125 1	Gun drills and gun reamers		SV
3545126 9	Combination drills and countersinks		SV
3545127 7	Countersinks, including port cutters, etc. (except combined drills-countersinks and pilots for interchangeable pilots)		SV
3545129 3	Counterbores, including spot facers, etc. (excluding pilots for interchangeable pilot types)		SV
	Reamers (all types, but excluding gun reamers):		
3545132 7	Carbon steel and high-speed steel, including blades sold separately		SV
3545136 8	Carbide, solid and tipped (including replaceable blades sold separately) (excluding tips and blanks sold separately)		SV
3545142 6	Hobs, all types		SV
3545147 5	Gear shaper cutters and gear shaving cutters		SV
	End mills and milling cutters:		
	End mills (excluding inserted blade types and shell mills):		
3545151 7	High-speed steel		SV
3545152 5	Carbide, solid and tipped (excluding blades sold separately)		SV
	Inserted blade type cutters, all types complete:		
3545153 3	Nonindexible		SV
3545154 1	Indexible or throwaway insert types		SV
	Milling cutters, not elsewhere classified:		
3545162 4	High-speed steel		SV
3545164 0	Carbide, solid and tipped (excluding tips and blanks sold separately)		SV

See footnotes at end of major group 39.

122 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3545	MACHINE TOOL ACCESSORIES—MC-3507—Con.		
35451	SMALL CUTTING TOOLS FOR MACHINE TOOLS AND METALWORKING MACHINERY—Con.		
	Threading tools:		
3545174 9	Taps (excluding taps in threading sets and screw plates and inserted chaser types)		SV
3545173 1	Dies, with two or more thread-forming edges integral with the body (excluding metalworking dies in product class 35441)		SV
3545175 6	Chasers, single edge thread-cutting, circular blade and tangent types for mount in/on holders, die heads, and tap bodies		SV
3545187 1	Thread-rolling dies, including circular, flat, and planetary		SV
3545189 7	Other threading tools, including screw plates and threading sets		SV
3545167 3	Single and double point tools		SV
3545172 3	Circular form tools, including semifinished blanks		SV
	Blanks, tips, and inserts:		
3545179 8	Molded blanks and tips (excluding pressed-to-size inserts)		SV
	Inserts, indexible and throwaway types:		
	Carbide:		
3545183 0	Precision ground		SV
3545181 4	Other carbide		SV
3545195 4	Ceramic		SV
3545196 2	Other than carbide and ceramic		SV
	Inserts, other than indexible and throwaway types:		
3545186 3	Carbide		SV
3545197 0	Ceramic		SV
3545199 6	Other than carbide and ceramic		SV
	Other types of cutting tools for machine tools, not elsewhere classified:		
3545192 1	Carbon steel (including rotary burrs, rotary files, and spade drills)		SV
3545194 7	High-speed steel (including rotary burrs, rotary files, and spade drills)		SV
3545198 8	Carbide, solid and tipped (except tips and blanks sold separately) (including rotary burrs, rotary files, spade drills)		SV
35454	OTHER ATTACHMENTS AND ACCESSORIES FOR MACHINE TOOLS AND METALWORKING MACHINERY		
	Tool holders:		
3545412 3	Turning tool holders, mechanically clamping for inserts and bits (except box tools and screw machine tool holders)		SV
3545414 9	Boring bars and heads		SV
3545417 2	Drilling, reaming, and tapping chucks		SV
3545431 3	Special tooling and attachments for screw and automatic machines (box tools, tool holders, turrets, rollers, etc.)		SV
3545437 0	Die heads and tap bodies for chaser-type threading and thread-rolling heads (excluding hand-type die stocks)		SV
3545438 8	Other tool holders, including other chucks, drill heads, tool posts, turrets, sleeves, sockets, etc.		SV
	Work holding devices:		
3545445 3	Rotary tables and indexing work holders, including numerically controlled		SV
3545459 4	Other work holding and positioning devices, including vises, mandrels, feeding fingers and collets, clamps, stops, etc.		SV
	Other attachments and accessories for machine tools and metalworking machinery:		
3545441 2	Tracer and tapering attachments, safety devices, centers, dogs, work rests, chutes, etc.		SV
3545443 8	Lathe chucks		SV
3545451 1	Tool room specialties, including levels, angle plates, parallels, sine bars, V-blocks, flats, etc.		SV
3545498 2	Other attachments and accessories		SV
35455	PRECISION MEASURING TOOLS (INSPECTION, QUALITY CONTROL, TOOL ROOM, AND MACHINISTS')		
3545511 2	Comparators (excluding optical)		SV
	Fixed size limit gauges (American Gauge Design Type C58-61):		
3545513 8	Fixture-type		SV
3545515 3	Thread-type		SV
3545517 9	Adjustable size limit gauges		SV
3545521 1	Gauge blocks		SV
3545561 7	Dial indicators		SV
3545565 8	Micrometers and calipers		SV
3545571 6	Pneumatic and electronic gauges (manual and automatic)		SV
3545573 2	Coordinate and contour measuring machines (inspection and gauging)		SV
3545577 3	Other machinists' precision measuring tools (including dividers, gear checking and surface texture measuring machines)		SV
3545579 9	Parts and accessories for machinists' precision measuring tools (sold separately)		SV
3546	POWER-DRIVEN HANDTOOLS—MC-3508		
35464	POWER-DRIVEN HANDTOOLS, BATTERY-POWERED (CORDLESS)		
3546401 5	Screwdrivers (without 3-jaw chuck)	number	S
3546405 6	Driver/ drills	number	S
	Drills:		
3546409 8	With integrated battery packs	number	S
3546415 5	With removable battery packs	number	S
3546419 7	Other battery-powered (cordless) handtools	number	S
3546421 3	Parts, attachments, and accessories for battery-powered (cordless) handtools (sold separately)		SV
35465	POWER-DRIVEN HANDTOOLS, ELECTRIC (EXCLUDING BATTERY-POWERED)		
3546502 0	Drills:		
	Armature mounted primarily on sleeve bearings	number	S
	Armature mounted primarily on other than sleeve bearings:		
3546505 3	1/4 inch (6.35 mm) chuck size or less	number	S
3546507 9	5/16 inch (7.94 mm) to less than 1/2 inch (12.70 mm)	number	S
3546509 5	1/2 inch (12.70 mm) or more	number	S
3546522 8	Screwdrivers and nut-runners	number	S
3546521 0	Hammers, percussion and rotary, without drill chuck	number	S
3546523 6	Hammers - drills, with a drill chuck	number	S
3546525 1	Impact wrenches	number	S
3546528 5	Shears and nibblers	number	S
3546531 9	Planers	number	S
	Routers:		
3546541 8	Less than 1/2 inch collet size (maximum collet capacity)	number	S
3546543 4	1/2 inch collet size (maximum collet capacity) or more	number	S
	Polishers, circular sanders, and grinders (except bench grinders):		
	Right angle polishers, circular sanders, and grinders:		
3546524 4	Less than 7 inch wheel drive	number	S
3546527 7	7 inch wheel drive or more	number	S
3546529 3	All other polishers, circular sanders, and grinders (including die grinders, but excluding bench)	number	S
	Sanders (except circular):		
3546533 5	Belt	number	S
3546538 4	Oscillating, reciprocating, vibrating, and random orbit	number	S

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

123

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3546	POWER-DRIVEN HANDTOOLS—MC-3508—Con.		
35465	POWER-DRIVEN HANDTOOLS, ELECTRIC (EXCLUDING BATTERY-POWERED)—Con.		
3546512 9	Saws, circular: Armature mounted primarily on sleeve bearings -----	number	S
3546515 2	Armature mounted primarily on other than sleeve bearings: 7 inch (177.80 mm) blade or less -----	number	S
3546516 0	More than 7 inch (177.80 mm) to less than 8 inch (203.20 mm) blade -----	number	S
3546517 8	8 inch (203.20 mm) blade or more -----	number	S
3546511 1	Saws - jig and saber: Armature mounted on ball bearings -----	number	S
3546513 7	Armature mounted on other than ball bearings -----	number	S
3546514 5	Reciprocating saws -----	number	S
3546537 6	Chain saws -----	number	S
3546539 2	Other electric-powered handtools -----	number	S
3546536 8	Parts, attachments, and accessories for electric-powered handtools (sold separately) -----		SV
35462	POWER-DRIVEN HANDTOOLS, PNEUMATIC, HYDRAULIC, AND POWDER-ACTUATED		
3546238 1	Pneumatic: Drills, screwdrivers, and nut-runners -----	number	S
3546237 3	Percussion tools (such as runners, riveters, chippers, scalers) -----	number	S
3546241 5	Impact wrenches -----	number	S
3546242 3	Grinders, polishers, and sanders: Rotary -----	number	S
3546244 9	Other -----	number	S
3546245 6	Staplers -----	number	S
3546248 0	Nailers -----	number	S
3546249 8	Other pneumatic-powered handtools -----	number	S
3546251 4	Parts, attachments, and accessories for pneumatic-powered handtools (sold separately) -----		SV
3546271 2	Hydraulic: Chain saws, including pole -----	number	S
3546272 0	Other hydraulic-powered handtools -----	number	S
3546279 5	Parts, attachments, and accessories for powder-actuated and hydraulic handtools (sold separately) -----		SV
3546261 3	Powder-actuated handtools -----	number	S
35463	POWER-DRIVEN HANDTOOLS, ENGINE (INTERNAL COMBUSTION) DRIVEN		
3546301 7	Chain saws -----	number	S
3546311 6	Other, including cut-off saws and drills -----	number	S
3546319 9	Parts, attachments, and accessories for engine-driven handtools (sold separately) -----		SV
3547	ROLLING MILL MACHINERY—MC-3506		
35471	HOT ROLLING MILL MACHINERY (INCLUDING COMBINATION HOT AND COLD) (EXCEPT TUBE ROLLING)		
3547111 9	Blooming and slabbing mill machinery -----		SV
3547113 5	Plate rolling mill machinery, except tin plate machinery -----		SV
3547117 6	Hot strip mill -----		SV
3547118 4	Other hot rolling mill machinery and equipment -----		SV
35472	COLD ROLLING MILL MACHINERY		
3547221 6	Tandem roll mills -----		SV
3547223 2	Single stand roll mills -----		SV
3547227 3	Double stand roll mills -----		SV
3547228 1	Other cold rolling mill machinery and equipment -----		SV
35473	OTHER ROLLING MILL MACHINERY (INCLUDING TUBE MILL MACHINERY) AND PARTS FOR ALL ROLLING MILL MACHINERY		
3547335 4	Tube mill machinery -----		SV
3547347 9	Processing lines (including pickling and cleaning, tinning, galvanizing, etc.) -----		SV
3547341 2	Scarfing units -----		SV
3547343 8	Press feed lines -----		SV
3547349 5	Other rolling mill machinery and equipment, excluding parts -----		SV
3547351 1	Machined rolls for rolling mills -----		SV
3547352 9	Parts, excluding rolls, for rolling mill machinery (sold separately) -----		SV
3548	WELDING APPARATUS—MC-3529		
35481	ARC WELDING MACHINES, COMPONENTS, AND ACCESSORIES (EXCEPT ELECTRODES), EXCLUDING STUD WELDING EQUIPMENT		
3548114 2	Arc welding machines: Alternating current transformer arc welders -----	number	S
3548103 5	Direct current arc welders: Generators only -----	number	S
3548104 3	Rectifier types, including ac/dc -----	number	S
3548115 9	Complete units only -----	number	S
3548107 6	Components and accessories for arc welding machines (except electrodes): Automatic and semiautomatic wire drive apparatus and related accessories -----		SV
3548109 2	Automatic and semiautomatic welding torches, guns and cables, and related accessories -----		SV
3548108 4	Special purpose automatic welding apparatus -----		SV
3548111 8	Circuit welding accessories (including electrode holders, ground clamps, cable connectors, cables sold separately, etc.) -----		SV
3548112 6	Positioning and manipulating equipment, including turn rolls, head and tail stock, weld head manipulators, seamers, etc. -----		SV
3548119 1	All other components and accessories for arc welding machinery, excluding welding rods and electrodes -----		SV

See footnotes at end of major group 39.

124 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3548	WELDING APPARATUS—MC-3529—Con.		
35482	ARC WELDING ELECTRODES, METAL		
3548209 0	Stick electrodes (including solid, cored, covered, and bare electrodes): Hard facing	1,000 lb	S
3548203 3	Other than hard facing: Mild steel	1,000 lb	S
3548204 1	Low alloy steel	1,000 lb	S
3548205 8	Stainless steel (chromium, 4 percent or more)	1,000 lb	S
3548206 6	Nonferrous	1,000 lb	S
3548217 3	Coiled and spooled continuous wire electrodes for automatic arc and inert gas: Hard facing	1,000 lb	S
3548211 6	Other than hard facing: Solid wire: Mild steel	1,000 lb	S
3548212 4	Low alloy steel	1,000 lb	S
3548213 2	Stainless steel (chromium, 4 percent or more)	1,000 lb	S
3548214 0	Nonferrous	1,000 lb	S
3548218 1	Cored wire	1,000 lb	S
35483	RESISTANCE WELDERS, COMPONENTS, ACCESSORIES, AND ELECTRODES		
3548305 6	Spot and projection welders, single electrode	number	S
3548306 4	Spot and projection welders, multielectrode	number	S
3548307 2	Seam welders	number	S
3548308 0	Other resistance welders, including flash, upset, and butt welders	number	S
3548309 8	Resistance welder transformers (sold separately)	number	S
3548311 4	Resistance welder electrodes	1,000 lb	S
3548319 7	Resistance welder components and accessories, including electrode holders, etc.		SV
35484	GAS WELDING AND CUTTING EQUIPMENT, PARTS, ATTACHMENTS, AND ACCESSORIES		
3548401 3	Torches (including welding torches and gas air torches)	number	S
3548402 1	Cutting machines and carriages, stationary and portable	number	S
3548403 9	Other gas welding and cutting equipment, excluding pressure containers		SV
3548404 7	Spare parts, accessories, attachments, adaptors, etc., sold separately: Tips		SV
3548405 4	Regulators, gas pressure	number	S
3548409 6	All other		SV
35485	OTHER WELDING EQUIPMENT, COMPONENTS, AND ACCESSORIES (EXCLUDING ARC, RESISTANCE, AND GAS)		
3548501 0	Stud welding equipment	number	S
3548503 6	Friction welding equipment	number	S
3548504 4	Plasma welding and cutting equipment	number	S
3548505 1	All other welding equipment (excluding laser, electron beam, and ultrasonic equipment)		SV
3548507 7	Soldering equipment (except hand and ultrasonic)	number	S
3548509 3	Components and accessories for all other welding equipment, excluding arc, resistance, and gas welding equipment		SV
3549	METALWORKING MACHINERY, N.E.C. —MC-3506		
35492	ASSEMBLY MACHINES		
3549211 5	Rotary transfer (dial or rotary, trunnion, center column)	number	S
3549215 6	In-line transfer, synchronous	number	S
3549217 2	In-line transfer, nonsynchronous	number	S
3549213 1	Special-purpose and other types	number	S
3549218 0	Parts and attachments for assembly machines (sold separately)		SV
35495	OTHER METALWORKING MACHINERY (EXCEPT HANDHELD AND ULTRASONIC)		
3549501 9	Machines for weaving, other wire fabricating, and wiredrawing and draw benches: Draw benches and wiredrawing machines (except dies)		SV
3549502 7	Wire rope or wire cable making machines		SV
3549503 5	Other machines for working wire		SV
3549543 1	Coil handling equipment (conversion or straightening): Cut-to-length lines		SV
3549545 6	Slitting lines		SV
3549592 8	Other metalworking machinery		SV
3549595 1	Parts and attachments for other metalworking machinery (sold separately)		SV
3552	TEXTILE MACHINERY—MC-3510		
35521	TEXTILE MACHINERY, EXCEPT PARTS, ATTACHMENTS, AND ACCESSORIES		
3552115 2	Fiber-to-fabrics textile machinery: Cleaning and opening machinery, including picker, garnetting, and other		SV
3552125 1	Carding machines and combing machines		SV
3552136 8	Drawing and roving frames	number	S
3552138 4	Spinning and twisting frames: Frames	number	S
3552139 2	Spindles	no. of spindles	SQ
3552151 7	Yarn preparing machines: Winding machines (skein, spool, bobbin, quill, cone, etc.)		SV
3552153 3	Other yarn preparing machines (beaming, warping, warp tying, warp drawing in, slashing, etc.)		SV
3552157 4	Other fiber-to-fabrics machinery, including machines for extruding, drawing, or cutting manmade textile fibers		SV
3552167 3	Fabrics machinery: Weaving machinery, power-driven (including machinery for broad and narrow fabrics), shuttle and shuttleless		SV
3552171 5	Knitting machinery		SV
3552181 4	Other fabrics machinery, including lace, embroidery, braiding, and tufting machinery and hand looms		SV
3552182 2	Bleaching, mercerizing, and dyeing machinery		SV
3552183 0	Printing machinery		SV
3552186 3	Finishing machinery, including calendering or rolling machines		SV
3552187 1	Machinery for drying stocks, yarns, cloth, carpet, nonwoven, etc.		SV
3552198 8	Other textile industries machinery, n.e.c. (except parts, attachments, and accessories)		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

125

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3552	TEXTILE MACHINERY—MC-3510—Con.		
35522	PARTS AND ATTACHMENTS FOR TEXTILE MACHINERY		
3552211 9	Textile machinery turnings and shapes (bobbins, shuttles, spools, picker sticks, cops, etc.) ----- Parts and attachments:		SV
3552222 6	Fiber-to-fabrics machinery:		
3552231 7	Card clothing -----		SV
3552243 2	Other fiber-to-fabrics machinery, except card clothing -----		SV
3552245 7	Weaving machines, including broad and narrow fabrics -----		SV
3552274 7	Knitting machines, excluding needles -----		SV
3552279 6	Finishing machinery -----		SV
	Other textile machinery, including printing -----		SV
3553	WOODWORKING MACHINERY—MC-3511		
35533	WOODWORKING MACHINERY, INCLUDING PARTS, ATTACHMENTS AND ACCESSORIES		
	Sawmill equipment:		
3553311 6	Saws (head rigs):		
3553313 2	Circular -----		SV
3553315 7	Band -----		SV
3553319 9	Other sawmill equipment, except saws (head rigs) -----		SV
3553321 5	Sawing machines, except sawmill equipment -----		SV
3553323 1	Planing machinery, including single and double planers, facers, jointers, and abrasive planers -----		SV
3553325 6	Sanding machines -----		SV
3553327 2	Boring machines -----		SV
3553329 8	Mortising and tenoning machines -----		SV
3553330 0	Lathes or turning machines -----		SV
3553334 8	Routers -----		SV
3553335 5	Shapers and profilers -----		SV
3553337 1	Assembling, gluing, laminating, and finishing machines -----		SV
3553338 9	Multifunction machines -----		SV
3553387 6	Other woodworking machines and equipment, including moulders -----		SV
	Parts, attachments, and accessories for woodworking machinery (sold separately), excluding saw blades and cutting tools -----		SV
35534	WOODWORKING MACHINERY FOR HOME WORKSHOPS, GARAGES, SERVICE SHOPS		
3553412 2	Saws, including circular and band saws, excluding chain saws -----	number	S
3553413 0	Other woodworking machines and equipment, designed primarily for home workshops, etc., except power-driven handtools -----		SV
3553411 4	Parts, attachments, and accessories for woodworking machinery designed for home workshops, etc. (sold separately) -----		SV
3554	PAPER INDUSTRIES MACHINERY —MC-3512		
35543	PAPER INDUSTRIES MACHINERY		
3554301 6	Wood preparation equipment, including debarkers, chippers, knotters, splitters, chipscreens, etc. -----		SV
3554302 4	Pulp mill machinery:		
3554303 2	Grinders and refiners (TMP) for the manufacture of mechanical pulp -----		SV
3554304 0	Digesters and other equipment for the manufacture of chemical pulp -----		SV
3554305 7	Deckers, thickeners, wet lap machines, bleaching equipment, pulp screens, washers, and save-alls -----		SV
	Other pulp mill machinery -----		SV
3554309 9	Paper mill machinery:		
	Stock preparation equipment: refiners (chip, conical, deflaker, disk, etc.), pulpers, beaters, jordans, etc. -----		SV
3554311 5	Paper machines:		
3554312 3	Paper making machines, including headbox forming area, presses, dryers, and reels -----		SV
3554313 1	Coating machines, including equipment for applying sizing or pigment coating to paper -----		SV
3554314 9	Calendering and similar rolling machines for finishing paper -----		SV
3554315 6	Machines for finishing paper, except calendering or similar rolling -----		SV
	Other paper machines -----		SV
3554321 4	Paper and paperboard converting equipment:		
3554322 2	Cutting machines, except sheeters and winders -----		SV
3554323 0	Machines for making bags, sacks, or envelopes -----		SV
3554324 8	Corrugated box making machines -----		SV
3554325 5	Machines for making cartons, boxes, cases, tubes, drums, or similar containers, except by molding -----		SV
3554326 3	Machines for molding articles in paper pulp, paper, or paperboard -----		SV
	Other paper and paperboard converting equipment (folding, gluing, laminating, gumming, scoring, sandpapering, etc.) -----		SV
35544	PARTS AND ATTACHMENTS FOR PAPER INDUSTRIES MACHINERY (SOLD SEPARATELY)		
3554401 4	Parts and attachments for wood preparation equipment -----		SV
3554402 2	Parts and attachments for pulp mill machinery -----		SV
3554403 0	Parts and attachments for machines for finishing paper -----		SV
3554404 8	Parts and attachments for paper mill machinery, except machines for finishing paper -----		SV
3554405 5	Parts and attachments for paper and paperboard converting equipment -----		SV
3555	PRINTING TRADES MACHINERY—MC-3513		
35551	PRINTING PRESSES, OFFSET LITHOGRAPHIC		
3555101 9	Sheet-fed:		
3555103 5	Small offset lithographic presses, less than 14 inches -----		SV
	Other offset lithographic presses, 14 inches or more -----		SV
3555132 4	Roll-fed (web-fed):		
3555133 2	Newspaper -----	complete presses	S
3555135 7	Business form presses -----	complete presses	S
3555136 5	Commercial, including heat-set -----	complete presses	S
	All other roll-fed (web-fed) offset lithographic printing presses -----		SV
35552	PRINTING PRESSES, OTHER THAN LITHOGRAPHIC		
3555203 3	Flexographic, sheet-fed and web-fed:		
3555205 8	Presses less than 16 inches -----	complete presses	S
3555209 0	Presses 16 inches or more -----	complete presses	S
	Other printing presses, including letterpress, gravure, metal decorating, proof, screen, pad printing, and rebuilt -----		SV

See footnotes at end of major group 39.

126 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3555	PRINTING TRADES MACHINERY—MC-3513—Con.		
35553	TYPESETTING MACHINERY, EXCLUDING JUSTIFYING TYPEWRITERS		
3555300 7	Typesetting machinery, excluding justifying typewriters		SV
35556	BINDING MACHINERY AND EQUIPMENT, INCLUDING PAPER CUTTING AND COLLATING OR GATHERING MACHINES		
3555661 2	Saddle, perfect/adhesive, and hard case (edition) binding equipment		SV
3555666 1	Paper cutting machines		SV
3555667 9	Collating and/or gathering machines (sold separately)		SV
3555671 1	Folding machines		SV
3555673 7	Newspaper inserting equipment		SV
3555679 4	Other binding machinery and equipment, including stitchers and trimmers		SV
35558	PRINTING TRADES MACHINERY, N.E.C.		
	Pre-press preparation equipment, excluding typesetting equipment, cameras:		
3555801 4	Digital electronic pre-press systems, components, and elements		SV
3555803 0	Digital proofing devices, miscellaneous digital electronic pre-press systems		SV
3555811 3	Other pre-press preparatory equipment, except densitometers		SV
3555869 1	Engravers' materials and equipment, including metal plates, etc.		SV
3555899 8	Other printing trades machinery and equipment, including platens, except typewriters		SV
	Parts, attachments, and accessories for printing trades machinery, all types:		
3555883 2	For printing presses, including flying pasters, dryers, folders, and reels		SV
3555885 7	For typesetting machines		SV
3555887 3	For bindery equipment		SV
3555891 5	For pre-press preparatory equipment, excluding typesetting and camera parts		SV
3555893 1	For other printing trades machinery and equipment		SV
3556	FOOD PRODUCTS MACHINERY—MC-3509		
35561	DAIRY AND MILK PRODUCTS PLANT MACHINERY AND EQUIPMENT, EXCEPT BOTTLING AND PACKAGING		
3556105 9	Ice cream freezers		SV
3556106 7	Butter and cheese processing plant machinery and equipment		SV
3556109 1	Homogenizers		SV
3556118 2	Other dairy and milk products plant machinery and equipment, including cream separators, pasteurizers, sterilizers, etc.		SV
3556121 6	Parts and attachments for dairy and milk products plant machinery and equipment		SV
35562	COMMERCIAL FOOD PRODUCTS MACHINERY, EXCEPT PACKAGING MACHINERY AND FOOD COOKING AND WARMING EQUIPMENT		
3556211 5	Slicers		SV
3556221 4	Choppers, grinders, cutters, dicers, and similar machines		SV
3556231 3	Mixers and whippers, except drink mixers		SV
	Industrial bakery machinery and equipment:		
3556265 1	Dough mixers, dividers, and molders		SV
3556273 5	Bake ovens, including traveling tray		SV
3556289 1	Other bakery machinery and equipment, including pastry rolling machines		SV
3556241 2	Other commercial food preparation machines, including tenderizers (power-driven)		SV
3556251 1	Parts and attachments for commercial food preparation machines		SV
35563	INDUSTRIAL MACHINERY AND EQUIPMENT FOR MANUFACTURING OR PROCESSING FOODS, BEVERAGES, AND ANIMAL OR FOWL FEED		
3556304 8	Presses, crushers, and similar machinery used in the production of wine, cider, fruit juices, and similar beverages		SV
3556305 5	Machinery for sorting, grading, or cleaning fruits, vegetables, or eggs		SV
3556311 3	Meat and poultry processing and preparation machinery and equipment (killing, dehairing, stuffing, cooking, rendering)		SV
3556312 1	Machinery, not specified above, for the preparation of fruits, vegetables, and nuts		SV
3556319 6	Other industrial food and feed products machinery		SV
3556321 2	Parts and attachments for industrial food products machinery		SV
3559	SPECIAL INDUSTRY MACHINERY, N.E.C.—MC-3514		
35591	CHEMICAL MANUFACTURING MACHINERY, EQUIPMENT, AND PARTS		
3559101 5	Distilling, rectifying, or fractionating		SV
3559103 1	Heat exchange units		SV
3559105 6	Dryers		SV
3559107 2	Gas or air liquefying machinery		SV
3559109 8	Mixing, kneading, crushing, grinding, sifting, homogenizing (except dairy), emulsifying, or stirring machines		SV
3559111 4	Other chemical manufacturing machines and equipment		SV
3559113 0	Parts for distilling, rectifying, fractionating, heat exchange, dryers, gas or air liquefying machinery and equipment		SV
3559115 5	Parts for other chemical manufacturing machinery and equipment		SV
35592	FOUNDRY MACHINERY AND EQUIPMENT, EXCLUDING PATTERNS AND MOLDS		
3559201 3	Foundry pouring equipment, including ladles, crucibles, and pouring machines		SV
3559204 7	Molding machines		SV
3559211 2	Casting machines, except die-casting machines		SV
3559207 0	Blast cleaning machines (hydraulic, pneumatic, and airless)		SV
3559215 3	Other foundry machinery and equipment, including converters		SV
3559219 5	Parts for foundry machinery and equipment		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

127

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3559	SPECIAL INDUSTRY MACHINERY, N.E.C.—MC-3514—Con.		
35593	PLASTICS WORKING MACHINERY AND EQUIPMENT, EXCLUDING PATTERNS AND MOLDS		
3559301 1	Compression molding machines ----- Extrusion machines:		SV
	Single screw extruders:		
3559303 7	Up to 2.49 inch screw diameter -----		SV
3559305 2	2.50 to 5.49 inch screw diameter -----		SV
3559307 8	5.50 inch screw diameter or larger -----		SV
3559309 4	Multiple screw extruders -----		SV
	Injection molding machines:		
3559311 0	500 tons or less -----		SV
3559313 6	More than 500 tons -----		SV
3559315 1	Blow molding machines -----		SV
3559317 7	Granulators and pelletizers -----		SV
3559319 3	Thermoforming machines -----		SV
3559321 9	Calendering or other rolling machines for working plastics -----		SV
3559323 5	Machines for cold working plastics drilling, milling, slicing, grinding, etc. -----		SV
3559325 0	Other machinery for working plastics or making products from plastics -----		SV
3559341 7	Parts for plastics working machinery -----		SV
35594	RUBBER WORKING MACHINERY AND EQUIPMENT, EXCLUDING TIRE MOLDS		
3559401 9	High-intensity solids mixers -----		SV
3559403 5	Extruding machines -----		SV
3559405 0	Tire building equipment, except tire molds -----		SV
3559407 6	Tire recapping and repairing machinery and equipment, including recapping vulcanizers -----		SV
3559416 7	Other machinery for working rubber or making products of rubber -----		SV
3559425 8	Parts for rubber working machinery -----		SV
35595	PRINTED CIRCUIT BOARD MANUFACTURING MACHINERY, EXCEPT TESTING		
3559501 6	Surface mount machinery -----		SV
3559503 2	Through-hole machinery -----		SV
3559505 7	Other printed circuit board manufacturing machinery and equipment -----		SV
3559509 9	Parts, attachments and accessories for printed circuit board manufacturing machinery and equipment -----		SV
35596	SEMICONDUCTOR MANUFACTURING EQUIPMENT (EXCEPT FURNACES AND OVENS, INSTRUMENTS AND PHOTOGRAPHICS)		
	Wafer processing equipment:		
	Microlithography:		
	Aligners:		
3559601 4	Contact/ proximity -----		SV
3559603 0	Scan optical -----		SV
3559605 5	Step and repeat -----		SV
3559607 1	Other -----		SV
	Other lithography systems:		
3559609 7	E-beam direct writers -----		SV
3559611 3	E-beam mask makers -----		SV
3559613 9	Focused ion beam writers -----		SV
	Thin layer deposition:		
3559615 4	Chemical vapor deposition -----		SV
3559617 0	Physical vapor deposition -----		SV
3559619 6	Epitaxial growth -----		SV
	Etch and strip:		
3559621 2	Wet etch -----		SV
3559623 8	Plasma etch -----		SV
3559625 3	Reactive ion etch -----		SV
3559627 9	Stripping systems -----		SV
	Ion implantation:		
3559629 5	Current ion implanters -----		SV
3559631 1	Voltage ion implanters -----		SV
3559633 7	Other wafer processing equipment -----		SV
	Assembly and packaging equipment:		
	Assembly:		
	Dicing:		
3559635 2	Dicing saws -----		SV
3559637 8	Scribing/ fracturing machines -----		SV
	Bonding:		
3559639 4	Die bonders -----		SV
3559641 0	Wire bonders -----		SV
3559643 6	Lead frame inserting machines -----		SV
	Packaging:		
3559645 1	Surface mounted (chip) placement machines (mold and seal) -----		SV
3559647 7	Finish and mark equipment -----		SV
3559649 3	Other assembly and packaging equipment -----		SV
3559651 9	Parts for semiconductor manufacturing machinery -----		SV
35597	AUTOMOTIVE MAINTENANCE EQUIPMENT, EXCEPT HANDTOOLS		
3559701 2	Frame and body alignment equipment -----		SV
3559702 0	Wheel alignment equipment -----		SV
3559703 8	Wheel balancing equipment -----		SV
3559704 6	Tire and wheel mounting equipment -----		SV
3559705 3	Brake service equipment -----		SV
3559709 5	All other automotive maintenance equipment, except handtools -----		SV
3559711 1	Parts and attachments for automotive maintenance equipment, excluding handtools (sold separately) -----		SV

See footnotes at end of major group 39.

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3559	SPECIAL INDUSTRY MACHINERY, N.E.C.—MC-3514—Con.		
35598	SPECIAL INDUSTRY MACHINERY AND EQUIPMENT, N.E.C.		
3559801 0	Petroleum refining machinery		SV
3559803 6	Parts for petroleum refining machinery		SV
3559805 1	Ammunition and explosive loading machinery		SV
3559807 7	Parts for ammunition and explosive loading machinery		SV
3559809 3	Tobacco processing machinery		SV
3559811 9	Parts for tobacco processing machinery		SV
3559813 5	Machines for working stone, ceramics, or like mineral materials including glass: Sawing machines		SV
3559815 0	Grinding or polishing machines: Glass working		SV
3559817 6	Other		SV
3559819 2	Other machines: Glass working		SV
3559822 6	Other		SV
3559825 9	Parts		SV
3559827 5	Clay products forming equipment (brick, tile, ceramic)		SV
3559829 1	Parts for clay products forming equipment		SV
3559831 7	Concrete products forming equipment: Concrete block equipment		SV
3559835 8	Other concrete products equipment		SV
3559836 6	Parts for concrete products forming equipment		SV
3559839 0	Cement making machinery		SV
3559841 6	Parts for cement making machinery		SV
3559843 2	Glass making machinery and equipment, including machines for hot working glass or glassware		SV
3559845 7	Parts for glass making machinery and equipment		SV
3559848 1	Machines for assembling electric or electronic lamps, tubes, or flashbulbs in glass envelopes		SV
3559851 5	Parts for machines for assembling electric or electronic lamps, tubes, or flashbulbs in glass envelopes		SV
3559853 1	Cotton ginning machinery		SV
3559855 6	Parts for cotton ginning machinery		SV
3559858 0	Fuel-fired kilns for cement, wood, and chemical processing and parts thereof		SV
3559861 4	Electroplating equipment (except rolling mill lines)		SV
3559863 0	Parts for electroplating equipment		SV
3559865 5	Metal finishing equipment, except electroplating and rolling mill: Vibratory finishing machines		SV
3559867 1	Plating equipment		SV
3559869 7	Other equipment		SV
3559871 3	Parts for metal finishing equipment		SV
3559874 7	Metal degreasing machines and parts thereof		SV
3559878 8	Desalinization equipment and parts thereof		SV
3559884 6	Footwear manufacturing or repairing machinery and parts thereof		SV
3559888 7	Industrial sewing machines, excluding shoe sole stitching machines: Industrial sewing machine heads		SV
3559889 5	Industrial sewing machinery, except heads		SV
3559890 3	Parts and attachments for industrial sewing machinery		SV
3559891 1	Machines for insulating electrical wire for cable and parts thereof		SV
3559896 0	Electric battery manufacturing machinery		SV
3559897 8	Parts for battery making machines		SV
3559898 6	Special industry machinery, not elsewhere classified, and parts thereof		SV
3561	PUMPS AND PUMPING EQUIPMENT —MC-3515		
35611	INDUSTRIAL PUMPS, EXCEPT FLUID POWER PUMPS		
3561100 3	Industrial pumps, except hydraulic fluid power pumps, automotive circulating pumps, and measuring and dispensing pumps ³		SV
35613	DOMESTIC WATER SYSTEMS		
3561300 9	Domestic water systems (pumps for farm and home use), excluding irrigation pumps ³		SV
35615	PUMPS, N.E.C.		
3561530 1	Domestic sump pumps (1 hp or less) (including the value of the driver if shipped as a complete unit) ³		SV
3561510 3	Oil-well and oil-field pumps, except boiler feed (including the value of the driver if shipped as a complete unit) ³		SV
3561520 2	Other pumps, except automotive circulating pumps and measuring and dispensing pumps ³		SV
35616	PARTS AND ATTACHMENTS FOR PUMPS AND PUMPING EQUIPMENT (EXCEPT FOR HYDRAULIC FLUID POWER AND AIR AND GAS COMPRESSORS)		
3561600 2	Parts and attachments for pumps and pumping equipment, except for hydraulic fluid power, and air and gas compressors		SV
3562	BALL AND ROLLER BEARINGS—MC-3516		
35621	BALL BEARINGS, COMPLETE, UNMOUNTED		
3562100 2	Ball bearings, complete, unmounted ³		SV
35622	TAPERED ROLLER BEARINGS (INCLUDING CUPS AND CONES), UNMOUNTED		
3562200 0	Tapered roller bearings (including cups and cones), unmounted ³		SV
35623	ROLLER BEARINGS, EXCEPT TAPERED, UNMOUNTED		
3562300 8	Roller bearings, except tapered, unmounted ³		SV
35624	MOUNTED BEARINGS, EXCEPT PLAIN		
3562400 6	Mounted bearings, except plain ³		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

129

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3562	BALL AND ROLLER BEARINGS—MC-3516—Con.		
35629	PARTS FOR BALL AND ROLLER BEARINGS, EXCEPT CUPS AND CONES		
3562900 5	Parts and components for ball and roller bearings (including ball and rollers sold separately) ³ -----		SV
3563	AIR AND GAS COMPRESSORS—MC-3515		
35631	AIR AND GAS COMPRESSORS AND VACUUM PUMPS		
3563120 9	Vacuum pumps (compressors) (including value of the driver if shipped as a complete unit), except laboratory ³ -----		SV
3563130 8	Air and gas compressors, except compressors for ice making, refrigeration, or air-conditioning equipment, and air motors ³ -----		SV
35632	PARTS AND ATTACHMENTS FOR AIR AND GAS COMPRESSORS, EXCEPT REFRIGERATION COMPRESSORS		
3563200 9	Parts and attachments for air and gas compressors, except for refrigeration, ice making, and air-conditioning equipment -----		SV
35635	INDUSTRIAL SPRAYING EQUIPMENT		
3563531 7	Power paint spraying outfits and other liquid power sprayers, except agricultural -----		SV
3563551 5	Hand sprayers, except agricultural and flame -----	number	S
3564	BLOWERS AND FANS—MC-3517		
35643	CENTRIFUGAL FANS AND BLOWERS		
3564317 0	Blower-filter units -----		SV
3564319 6	Classes I and II fans (more than 1 1/2 inch to 6 3/4 inch maximum total pressure) -----		SV
3564321 2	Classes III and IV fans (more than 6 3/4 inch maximum total pressure) -----		SV
3564324 6	Industrial fans, excluding blowers, turboblowers, and multistage blowers -----		SV
3564327 9	Positive displacement blowers, excluding turboblowers -----		SV
3564329 5	Multistage blowers -----		SV
3564331 1	Small housed blowers (utility sets) -----		SV
3564339 4	Other centrifugal fans and blowers (including furnace blowers, lightweight air-conditioning blowers, and turboblowers) -----		SV
35644	PROPELLER FANS AND ACCESSORIES, AXIAL FANS AND POWER ROOF VENTILATORS, AND PARTS		
3564413 7	Axial fans: -----		SV
3564415 2	Directly connected to driver -----		SV
	Belt-driven -----		
	Propeller fans and accessories: -----		
	Industrial: -----		
3564433 5	Directly connected to driver -----		SV
3564435 0	Belt-driven -----		SV
3564437 6	Penthouses, shutters, guards, and other accessories -----		SV
3564439 2	Parts for fans and blowers -----		SV
	Power roof ventilators group: -----		
3564441 8	Axial and propeller type -----		SV
3564443 4	Centrifugal type -----		SV
3564445 9	Parts for power roof ventilators -----		SV
35645	DUST COLLECTION AND OTHER AIR PURIFICATION EQUIPMENT FOR CLEANING INCOMING AIR		
3564531 6	Air washers -----		SV
	Dust collection and other air purification equipment: -----		
3564541 5	Electrostatic precipitation equipment -----		SV
3564543 1	Air filters for air-conditioners and furnaces, etc., of 2400 CFM or less -----		SV
3564546 4	Other dust collection and other air purification equipment (including air filters for air-conditioners and furnaces) -----		SV
3564547 2	Parts -----		SV
35646	DUST COLLECTION AND OTHER AIR PURIFICATION EQUIPMENT FOR INDUSTRIAL GAS CLEANING SYSTEMS (FOR CLEANING OUTGOING AIR)		
3564611 6	Dust collection and other air purification equipment for industrial gas cleaning systems (for cleaning outgoing air) -----		SV
3564621 5	Parts for industrial air purification equipment -----		SV
3565	PACKAGING MACHINERY—MC-3530		
35651	PACKING, PACKAGING, AND BOTTLING MACHINERY, EXCEPT PARTS		
3565123 1	Cartoning, multipacking, and leaflet/ coupon placing machinery -----		SV
3565125 6	Thermoforming, blister, and skin (including carded display) machinery -----		SV
3565103 3	Bag (pre-form) opening, filling, and closing machinery and systems -----		SV
3565131 4	Vacuum, gas, and other modified atmosphere laminating and bagging machines -----		SV
	Bag or pouch form, fill, and seal machinery (must perform all three functions): -----		
3565104 1	Horizontal -----		SV
3565105 8	Vertical -----		SV
3565152 0	Adhesive devices (hot melt and cold glue) -----		SV
3565122 3	Machinery for cleaning or drying bottles or other containers -----		SV
3565151 2	Bottling and canning machinery (including fillers, all types of closers, and accessory equipment) -----		SV
	Filling machinery: -----		
3565133 0	Dry products (free and nonfree flowing) including by count machinery, except bags -----		SV
3565135 5	Liquids and viscous products (very heavy liquids, slurries, and pumpable semisolids) -----		SV
3565145 4	Glass or plastics container or can capping, sealing, and lidding machinery (except all filling, bottling, and canning) -----		SV
3565137 1	Labeling machinery (all types of applications and methods) -----		SV
3565141 3	Coding, dating, imprinting, jet printing, marking, and stamping machinery -----		SV
3565143 9	Corrugated and solid fiber case and tray forming, loading, and sealing machinery -----		SV
3565118 1	Accumulating, collating, feeding, and unscrambling machinery -----		SV
3565149 6	Testing, inspecting, detecting, checkweighing, and other quality control devices -----		SV
3565127 2	Paper, film, and foil wrapping machines (all types, except shrink and stretch film equipment) -----		SV
3565128 0	Shrink and stretch film overwrapping, banding, and bundling machinery (excluding pallet unitizing) -----		SV
3565153 8	Palletizing, depalletizing, and pallet unitizing machinery with stretch film, adhesive, or strapping -----		SV
3565159 5	Other packing, packaging, and bottling machinery or systems and combination or equipment not listed above, except parts -----		SV

See footnotes at end of major group 39.

130 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3565	PACKAGING MACHINERY—MC-3530—Con.		
35652	PARTS FOR PACKING, PACKAGING, AND BOTTLING MACHINERY		
3565200 7	Parts for packing, packaging, and bottling machinery		SV
3566	SPEED CHANGERS, DRIVES, AND GEARS—MC-3516		
35660	SPEED CHANGERS, INDUSTRIAL HIGH-SPEED DRIVES, AND GEARS		
3566011 7	Mechanical nonhydraulic variable speed changers and parts, excluding value of drivers		SV
3566021 6	Industrial high-speed drives, fixed ratio (pitch line velocity of 5,000 feet (1,525 meters) per minute or more)		SV
	Speed reducers, fixed ratio, enclosed, except gear motors (sold without motor):		
	Worm gear reducers, including "C" flange or scoop mount:		
3566017 4	6 inch (15.24 cm) centers or more		SV
3566018 2	3 inch (7.62 cm) to 5.99 inch (15.22 cm) centers		SV
3566024 0	Less than 3 inch (7.62 cm) centers		SV
3566025 7	Shaft mounted reducers and screw conveyor drives, including repair parts:		
3566029 9	Hollow shaft diameter, 2 1/2 inch (6.35 cm) or less		SV
	Hollow shaft diameter, more than 2 1/2 inch (6.35 cm)		SV
3566027 3	Helical, herringbone, spur, and spiral bevel reducers:		
3566028 1	More than 15 inch (38.10 cm) low-speed center		SV
	15 inch (38.10 cm) low-speed center or less		SV
	Gearmotors, sold with motors, including "C" flange and scoop mount units:		
	Worm gearmotors:		
3566034 9	Less than 1 horsepower (746.0 w)		SV
3566037 2	1 horsepower (746.0 w) or more		SV
	Helical, herringbone, spur, or spiral bevel gearmotors:		
3566047 1	Less than 1 horsepower (746.0 w)		SV
3566049 7	1 horsepower (746.0 w) or more		SV
3566041 4	Loose gears, pinions, and racks (excluding spare parts for reducers):		
	Fine pitch (19.99 diametral pitch and finer)		SV
	Coarse pitch (less than 19.99 diametral pitch):		
	Helical, herringbone, and spur gears:		
3566042 2	24 inch (60.96 cm) or less		SV
3566043 0	More than 24 inch (60.96 cm) diameter through 72 inch (182.88 cm) diameter		SV
3566044 8	More than 72 inch (182.88 cm) diameter		SV
3566045 5	Worms and worm gearing		SV
3566046 3	Others, including bevel gears and racks		SV
3566051 3	Other parts and components for speed changers, including housings, shafts, pins, and spacers		SV
3567	INDUSTRIAL FURNACES AND OVENS —MC-3519		
35671	ELECTRIC INDUSTRIAL FURNACES, OVENS, AND KILNS		
	Electric furnaces (excluding induction):		
3567111 4	Metal melting		SV
3567121 3	Metal processing and heat treating (such as annealing, hardening, carburizing, and porcelain enameling furnaces)		SV
3567129 6	Other electric furnaces		SV
3567143 7	Electric industrial ovens and kilns, including infrared		SV
35674	HIGH-FREQUENCY INDUCTION AND DIELECTRIC HEATING EQUIPMENT		
	Furnaces and ovens, induction or dielectric:		
3567401 9	Radio frequency type (includes spark gap) and line and motor-generator set frequency types, except metal melting		SV
3567402 7	Metal melting induction furnaces		SV
3567403 5	Other induction or dielectric furnaces and ovens		SV
3567404 3	Other induction or dielectric heating equipment		SV
35675	ELECTRICAL HEATING EQUIPMENT FOR INDUSTRIAL USE, N.E.C. (EXCEPT SOLDERING IRON), AND PARTS AND ATTACHMENTS		
	Industrial electric heating units and devices:		
3567501 6	Tubular heaters		SV
3567502 4	Space heaters		SV
3567503 2	All other, including strip heaters, ring heaters, water and oil immersion heaters, glue and compound pots, etc.		SV
	Parts and attachments for electrical industrial furnaces and ovens:		
3567511 5	For space heaters		SV
3567512 3	For other electrical		SV
35676	FUEL-FIRED INDUSTRIAL FURNACES, OVENS, AND KILNS		
	Furnaces:		
3567601 4	Metal melting, including blast furnaces and cupolas		SV
3567602 2	Metal processing and heat treating (such as annealing, hardening, carburizing, and porcelain enameling furnaces)		SV
3567609 7	Other fuel-fired furnaces (including hot rolling, forging, forming, and extruding)		SV
3567615 4	Industrial ovens and kilns (except cement, wood, and chemical)		SV
	Parts and attachments:		
3567621 2	For other fuel-fired furnaces, ovens, and kilns ³		SV
3568	POWER TRANSMISSION EQUIPMENT, N.E.C.—MC-3516		
35681	PLAIN BEARINGS AND BUSHINGS		
3568112 1	Plain bearings and bushings, unmounted, machined		SV
3568151 9	Mounted bearings, plain (except engine)		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

131

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3568	POWER TRANSMISSION EQUIPMENT, N.E.C.—MC-3516—Con.		
35683	MECHANICAL POWER TRANSMISSION EQUIPMENT, EXCEPT SPEED CHANGERS, DRIVES, AND GEARS, N.E.C.		
3568311 9	Clutches and brakes:		SV
3568313 5	Friction-type		SV
3568319 2	Hydraulic-type, including hydraulic couplings		SV
	All other clutches and brakes.....		SV
3568320 0	Flexible couplings:		SV
3568323 4	Gear-type		SV
3568326 7	Other than gear-type		SV
3568325 9	Nonflexible couplings		SV
3568330 9	Universal joints		SV
3568328 3	Ball joints		SV
	Drive shafts, except flexible shafts		SV
	Chains for sprocket drives:		
3568333 3	ASA standard roller chain		SV
3568335 8	Other chain for sprocket drives		SV
3568344 0	Sprockets		SV
3568351 5	Pulleys		SV
	Sheaves:		
3568361 4	Single drive		SV
3568365 5	Multiple drive		SV
3568394 5	Inboard marine propulsion gear transmissions, including reversing, speed changing, and turbine driven gear drives		SV
3568396 0	Outboard gear drives (inboard prime mover)		SV
3568389 5	Other mechanical power transmission equipment, n.e.c.		SV
3568391 1	Mountings for bearings (pillow blocks, flange blocks, etc.)		SV
3568399 4	Other parts for mechanical power transmission equipment.....		SV
3569	GENERAL INDUSTRIAL MACHINERY, N.E.C.—MC-3514		
35693	FILTERS AND STRAINERS, EXCEPT FLUID POWER		
3569304 3	Containment (housing devices):		SV
3569305 0	For water.....		SV
3569306 8	For beverages other than water		SV
3569309 2	For other fluids		SV
	Parts and accessories, sold separately		SV
3569311 8	Media:		SV
3569312 6	Reusable (cleanable)		SV
	Nonreusable, including disposable (throwaway) litter cartridges.....		SV
35694	FILTERS FOR HYDRAULIC FLUID POWER SYSTEMS, NONAEROSPACE		
3569400 9	Hydraulic ³		SV
35695	FILTERS FOR PNEUMATIC FLUID POWER SYSTEMS, NONAEROSPACE		
3569500 6	Pneumatic ³		SV
35696	FILTERS FOR HYDRAULIC AND PNEUMATIC FLUID POWER SYSTEMS, AEROSPACE		
3569600 4	Filters for hydraulic and pneumatic fluid power systems, aerospace ³		SV
35699	GENERAL INDUSTRIAL MACHINERY, N.E.C.		
3569909 9	Industrial robots, attachments and parts		SV
3569901 6	Gas generating equipment		SV
3569903 2	Gas separating equipment		SV
3569905 7	Steam and vapor separators		SV
	Compressed air and gas dryers:		
3569941 2	Refrigerated dryers		SV
3569942 0	Desiccant dryers		SV
3569943 8	Deliquescent dryers		SV
3569944 6	Other compressed air and gas dryers		SV
3569911 5	Mixers for industrial processes, solids or liquids		SV
3569913 1	Lubricating systems, industrial, centralized and automatic		SV
3569915 6	Sifting and screening machines		SV
3569917 2	Presses, metal baling		SV
3569921 4	Centrifugals and separators (except cream, grain, and berry)		SV
3569923 0	Automatic fire sprinklers		SV
3569925 5	Pneumatic jacks		SV
3569927 1	Hydraulic jacks		SV
3569931 3	Screwjacks (except automotive)		SV
3569947 9	Other general industrial machinery, n.e.c.		SV
3569951 1	Parts for general industrial equipment, n.e.c.		SV
3571	ELECTRONIC COMPUTERS—MC-3520		
35713	GENERAL PURPOSE LARGE-SCALE PROCESSING EQUIPMENT (64 MEGABYTES OR MORE IN MINIMUM MAIN MEMORY CONFIGURATION)		
3571300 7	General purpose large-scale processing equipment (64 megabytes or more in MINIMUM main memory configuration) ³		SV
35714	GENERAL PURPOSE MEDIUM- AND SMALL-SCALE PROCESSING EQUIPMENT (LESS THAN 64 MEGABYTES MINIMUM MAIN MEMORY CONFIGURATION)		
3571400 5	General purpose medium- and small-scale processing equipment (less than 64 megabytes MINIMUM main memory configuration) ³		SV
35715	GENERAL PURPOSE PERSONAL COMPUTERS AND WORKSTATIONS, EXCLUDING PORTABLES		
3571500 2	General purpose personal computers and workstations, excluding portables ³		SV

See footnotes at end of major group 39.

132 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3571	ELECTRONIC COMPUTERS—MC-3520—Con.		
35716	GENERAL PURPOSE PORTABLE COMPUTERS (MACHINES WITH ATTACHED DISPLAY)		
3571600 0	General purpose portable computers (machines with attached display) ³		SV
35717	OTHER GENERAL PURPOSE DIGITAL PROCESSING UNITS		
3571700 8	Other general purpose digital processing units ³		SV
35718	SPECIAL PURPOSE, HYBRID, OR ANALOG COMPUTERS, INCLUDING ARRAY, DATABASE, IMAGE PROCESSORS, ETC.		
3571800 6	Special purpose, hybrid, or analog computers, including array, database, image processors, etc. ³		SV
3572	COMPUTER STORAGE DEVICES—MC-3520		
35721	COMPUTER STORAGE DEVICES		
3572100 0	Computer storage devices ³		SV
35722	PARTS, ATTACHMENTS, AND SUBASSEMBLIES FOR COMPUTER STORAGE DEVICES		
3572200 8	Parts, attachments, and subassemblies for computer storage devices ³		SV
3575	COMPUTER TERMINALS—MC-3520		
35751	COMPUTER TERMINALS		
3575100 7	Computer terminals (excluding point-of-sale and funds-transfer devices) ³		SV
35752	PARTS, ATTACHMENTS, AND SUBASSEMBLIES FOR COMPUTER TERMINALS		
3575200 5	Parts, attachments, and subassemblies for computer terminals (excluding point-of-sale and funds-transfer devices) ³		SV
3577	COMPUTER PERIPHERAL EQUIPMENT, N.E.C.—MC-3520		
35771	COMPUTER PERIPHERAL EQUIPMENT, N.E.C.		
3577100 5	Computer peripheral equipment, n.e.c., including input/output equipment ³		SV
35772	PARTS, ATTACHMENTS, AND SUBASSEMBLIES FOR COMPUTER PERIPHERAL EQUIPMENT, N.E.C.		
3577200 3	Parts, attachments, and subassemblies for computer peripheral equipment, n.e.c., including input/output equipment ³		SV
3578	CALCULATING AND ACCOUNTING EQUIPMENT—MC-3520		
35784	ACCOUNTING MACHINES AND CASH REGISTERS		
3578400 8	Accounting machines and cash registers, including calculator, funds-transfer terminals and point-of-sale terminals ³		SV
35789	PARTS AND ATTACHMENTS FOR CALCULATORS, ACCOUNTING MACHINES, CASH REGISTERS, FUNDS-TRANSFER AND POINT-OF-SALE TERMINALS		
3578900 7	Parts and attachments for calculators, accounting machines, cash registers, funds-transfer and point-of-sale terminals ³		SV
3579	OFFICE MACHINES, N.E.C.—MC-3520		
35792	AUTOMATIC TYPING AND WORD PROCESSING MACHINES		
3579200 1	Automatic typing and word processing machines, including parts and attachments ³		SV
35793	DUPLICATING MACHINES		
3579300 9	Duplicating machines, except parts and attachments ³		SV
35795	MAILING, LETTER HANDLING, AND ADDRESSING MACHINES		
3579500 4	Mailing, letter handling, and addressing machines, except parts and attachments ³		SV
35799	STANDARD TYPEWRITERS, DICTATING, TRANSCRIBING, RECORDING MACHINES, AND ALL OTHER OFFICE MACHINES, N.E.C		
3579900 6	Standard typewriters, dictating, transcribing, recording machines, and all other office machines, n.e.c. ³		SV
3579A	PARTS AND ATTACHMENTS FOR STANDARD TYPEWRITERS, DICTATING, DUPLICATING, AND OTHER OFFICE MACHINES, N.E.C.		
3579A00 3	Parts and attachments for office machines n.e.c. ³		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

133

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3581	AUTOMATIC MERCHANDISING MACHINES —MC-3527		
35811	AUTOMATIC MERCHANDISING MACHINES, COIN-OPERATED (VENDING)		
3581100 9	Automatic merchandising machines, coin-operated (vending), excluding money changing machines ³ -----		SV
35812	COIN-OPERATED MECHANISMS AND PARTS FOR AUTOMATIC MERCHANDISING MACHINES		
3581251 0	Coin-operated mechanisms for vending machines (for sale separately) -----		SV
3581269 2	Parts for automatic merchandising machines, except coin-operated mechanisms -----		SV
3582	COMMERCIAL LAUNDRY EQUIPMENT —MC-3528		
35820	COMMERCIAL LAUNDRY, DRY CLEANING, AND PRESSING MACHINERY AND EQUIPMENT		
	Commercial laundry equipment and presses, capacity exceeding 10 kg (22 lb):		
3582011 7	Washers only -----		SV
3582012 5	Washer-extractor combinations -----		SV
	Drying tumblers:		
3582017 4	Coin-operated, more than 22 lb load -----		SV
3582018 2	Other than coin-operated -----		SV
3582027 3	Presses, laundry -----		SV
3582029 9	Other commercial laundry equipment, including extractors only, flatwork ironers, etc. -----		SV
3582031 5	Parts, attachments, and accessories -----		SV
	Dry-cleaning equipment and clothing presses:		
3582039 8	Dry-cleaning units, presses including garment manufacturers' (needle trades) presses, reclaiming units, etc. -----		SV
3582091 9	Parts, attachments, and accessories -----		SV
3585	REFRIGERATION AND HEATING EQUIPMENT —MC-3522		
35851	HEAT TRANSFER EQUIPMENT (EXCEPT ELECTRICALLY OPERATED DEHUMIDIFIERS), MECHANICALLY REFRIGERATED, SELF-CONTAINED		
3585100 5	Heat transfer equipment (except electrically operated dehumidifiers), mechanically refrigerated, self-contained ³ -----		SV
35852	UNITARY AIR-CONDITIONERS		
3585200 3	Unitary air-conditioners ³ -----		SV
35853	COMMERCIAL REFRIGERATORS AND RELATED EQUIPMENT		
	Refrigerated enclosures, including self-contained units and remote units:		
3585312 6	Sectional coolers or cooling rooms of the prefabricated (factory produced) type -----	number	S
	Reach-in refrigerators and reach-in type vertical display cabinets:		
3585315 9	For normal temperature application; i.e., not intended for frozen foods, ice cream, etc. -----	number	S
3585318 3	For low temperature application -----	number	S
	Display cases operated at normal temperatures:		
3585322 5	Closed -----	number	S
	Open self-service:		
3585323 3	One level -----	number	S
3585328 2	Multilevel -----	number	S
	Display cases operated at low temperatures:		
3585332 4	Frozen food display cases, open, self-service -----	number	S
3585335 7	Frozen food cabinets, closed, other than reach-in type -----	number	S
3585337 3	Other -----	number	S
3585343 1	Mechanical drinking water coolers ³ -----		SV
	Mechanical beverage cooling and dispensing equipment, except coin-operated:		
3585352 2	Bottled beverage coolers, dry and wet types -----		SV
3585357 1	Bulk beverage dispensers, including malt dispensers and precooler cabinets -----		SV
3585398 5	Other commercial refrigerators -----		SV
35854	COMPRESSORS AND COMPRESSOR UNITS, ALL REFRIGERANTS		
3585400 9	Compressors and compressor units, all refrigerants ³ -----		SV
35855	REFRIGERATION CONDENSING UNITS (COMPLETE)		
3585500 6	Condensing units, all refrigerants, except ammonia (complete) ³ -----		SV
35856	ROOM AIR-CONDITIONERS AND DEHUMIDIFIERS		
3585600 4	Room air-conditioners and dehumidifiers, except portable dehumidifiers ³ -----		SV
35859	REFRIGERATION AND AIR-CONDITIONING EQUIPMENT, N.E.C.		
3585901 6	Soda fountain equipment (cooler box, fountainette, and similar equipment) -----		SV
3585902 4	Beer dispensing equipment -----		SV
3585903 2	Evaporative air coolers -----		SV
3585906 5	Other refrigeration machinery and air-conditioning equipment -----		SV
3585C	WARM AIR FURNACES, INCLUDING DUCT FURNACES AND HUMIDIFIERS, AND ELECTRIC COMFORT HEATING EQUIPMENT		
3585C00 1	Warm air furnaces, including duct furnaces and humidifiers, and electric comfort heating equipment ³ -----		SV

See footnotes at end of major group 39.

134 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3585	REFRIGERATION AND HEATING EQUIPMENT—MC-3522—Con.		
3585D	PARTS AND ACCESSORIES FOR AIR-CONDITIONING AND HEAT TRANSFER EQUIPMENT		
3585D10 8	Parts for heat transfer equipment, including parts for air-conditioning condensing units		SV
3585D20 7	Parts for unitary air-conditioners		SV
3585D30 6	Parts for commercial refrigeration and related equipment		SV
3585D40 5	Parts for compressors and compressor units		SV
3585D50 4	Parts for condensing units, excluding air-conditioning condensing units		SV
3585D60 3	Parts for dehumidifiers and room air-conditioners		SV
3585D70 2	Parts for refrigeration and air-conditioning equipment, n.e.c.		SV
3585D80 1	Parts for warm air furnaces, including duct furnaces (excluding complete humidifiers)		SV
3586	MEASURING AND DISPENSING PUMPS—MC-3515		
35860	MEASURING AND DISPENSING PUMPS		
	Gasoline dispensing pumps, computing type (filling station type):		
	Single units:		
3586013 9	With suction pumping unit	number	S
3586014 7	Without suction pumping unit	number	S
	Multiple units:		
3586015 4	With suction pumping unit	number	S
3586016 2	Without suction pumping unit	number	S
3586031 1	Lubricating oil pumps, including barrel pumps	number	S
3586051 9	Grease guns	number	S
3586089 9	Other measuring and dispensing pumps (noncomputing gasoline dispensing, grease, and lubrication oil outfits, etc.)		SV
3586091 5	Parts and attachments for measuring and dispensing pumps		SV
3589	SERVICE INDUSTRY MACHINERY, N.E.C.—MC-3521		
35891	COMMERCIAL COOKING AND FOOD-WARMING EQUIPMENT		
	Nonelectric:		
3589111 8	Commercial ranges, ovens, and broilers (except electric)		SV
3589113 4	Deep-fat fryers (except electric)		SV
3589130 8	Other commercial cooking equipment (griddles, toasters, coffee urns, steam pressure cookers, etc.), except electric		SV
3589131 6	Commercial food-warming equipment, including steam tables (except electric)		SV
	Electric:		
3589161 3	Commercial ranges, ovens, and broilers		SV
3589163 9	Commercial microwave stoves and ovens		SV
3589167 0	Deep-fat fryers		SV
3589170 4	Other commercial cooking equipment, including griddles, toasters, coffee makers, coffee urns, etc.		SV
3589181 1	Commercial food-warming equipment, including hot-food server units and steam tables		SV
3589185 2	Parts and accessories for commercial cooking and food-warming equipment		SV
35892	SERVICE INDUSTRY MACHINES AND PARTS		
	Water heaters, including parts (excluding household and boilers):		
3589201 7	Instantaneous		SV
3589202 5	All others with more than 120 gallons (454.2 liters capacity)		SV
	Water softeners:		
3589222 3	Industrial		SV
3589226 4	Farm, household and commercial		SV
3589227 2	Parts for water softeners (excluding tanks)		SV
	Commercial and industrial floor and carpet cleaning equipment:		
3589242 1	Sanding and scrubbing machines		SV
3589243 9	Carpet cleaning equipment, including sweepers (except vacuum cleaners)		SV
3589246 2	Other machines, including waxing and polishing machines, except vacuum cleaners		SV
3589245 4	Parts and attachments		SV
	Dishwashing machines, commercial type:		
3589273 6	Conveyor type		SV
3589275 1	All other		SV
3589276 9	Parts for dishwashing machines		SV
3589284 3	Sewer pipe and drain cleaning equipment		SV
3589286 8	High-pressure (more than 1,000 p.s.i.) cleaning and blasting machinery and equipment (except foundry)		SV
	Other service industry machines and parts:		
3589282 7	Commercial car, truck, and bus washing machinery and equipment		SV
3589283 5	Trash and garbage compactors		SV
3589281 9	Sewage treatment equipment		SV
3589296 7	Other equipment		SV
3589297 5	Parts for other service industry machines		SV
35893	COMMERCIAL AND INDUSTRIAL VACUUM CLEANERS, INCLUDING PARTS AND ATTACHMENTS		
	Portable:		
3589301 5	Complete machine		SV
3589302 3	Parts and attachments		SV
3589307 2	Central system, including parts and attachments		SV
3592	CARBURETORS, PISTONS, RINGS, AND VALVES—MC-3524		
35921	CARBURETORS, NEW AND REBUILT (ALL TYPES)		
	Carburetors (new), all types:		
3592101 4	For motor vehicle engines (passenger car, truck, and bus)		SV
3592102 2	All other carburetors		SV
3592103 0	Carburetors, rebuilt, all types		SV
3592105 5	Parts for carburetors (excluding gaskets and screw machine products)		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3592	CARBURETORS, PISTONS, RINGS, AND VALVES—MC-3524—Con.		
35922	PISTONS, PISTON RINGS, AND PISTON PINS (ENGINE)		
3592201 2	Pistons, all types (machined), excluding rough castings:		SV
3592202 0	For motor vehicle engines (passenger car, truck, and bus).....		SV
	All other pistons		
	Piston rings, all types, and piston pins:		
	Oil-type:		
3592203 8	For motor vehicle engines (passenger car, truck, and bus).....		SV
3592204 6	All other oil-type piston rings		SV
	Compression-type:		
3592205 3	For motor vehicle engines (passenger car, truck, and bus).....		SV
3592206 1	All other compression-type piston rings		SV
3592209 5	Piston pins		SV
35923	VALVES (ENGINE INTAKE AND EXHAUST)		
3592301 0	For motor vehicle engines (passenger car, truck, and bus).....		SV
3592302 8	For other engines		SV
3593	FLUID POWER CYLINDERS AND ACTUATORS—MC-3531		
35934	NONAEROSPACE-TYPE HYDRAULIC FLUID POWER CYLINDERS AND ACTUATORS, LINEAR AND ROTARY		
3593400 9	Nonaerospace-type hydraulic fluid power cylinders and actuators, linear and rotary ³		SV
35935	NONAEROSPACE-TYPE PNEUMATIC FLUID POWER CYLINDERS AND ACTUATORS, LINEAR AND ROTARY		
3593500 6	Nonaerospace-type pneumatic fluid power cylinders and actuators, linear and rotary ³		SV
35932	AEROSPACE-TYPE FLUID POWER CYLINDERS AND ACTUATORS, HYDRAULIC AND PNEUMATIC		
3593200 3	Aerospace-type fluid power cylinders and actuators, hydraulic and pneumatic ³		SV
35939	PARTS FOR HYDRAULIC AND PNEUMATIC FLUID POWER CYLINDERS AND ACTUATORS		
3593900 8	Parts for hydraulic and pneumatic fluid power cylinders and actuators ³		SV
3594	FLUID POWER PUMPS, MOTORS, AND HYDROSTATIC TRANSMISSION COMPONENTS—MC-3531		
35943	NONAEROSPACE-TYPE RECEPROCATING PUMPS		
3594300 0	Nonaerospace-type reciprocating pumps ³		SV
35944	NONAEROSPACE-TYPE ROTARY AND OTHER FLUID POWER PUMPS		
3594400 8	Nonaerospace-type rotary and other fluid power pumps ³		SV
35945	NONAEROPSACE-TYPE FLUID POWER MOTORS		
3594500 5	Nonaerospace-type fluid power motors ³		SV
35946	AEROSPACE-TYPE FLUID POWER PUMPS AND MOTORS		
3594600 3	Aerospace-type fluid power pumps and motors ³		SV
35949	PARTS FOR FLUID POWER PUMPS, MOTORS, AND HYDROSTATIC TRANSMISSIONS		
3594900 7	Parts for fluid power pumps, motors, and hydrostatic transmissions ³		SV
3596	SCALES AND BALANCES, EXCEPT LABORATORY—MC-3526		
35961	VEHICLE AND INDUSTRIAL SCALES		
3596101 0	Motor truck scales		SV
3596103 6	Railroad track scales		SV
	Industrial scales:		
3596105 1	Bench and portable		SV
3596107 7	Floor scales, dormant, pitless.....		SV
3596109 3	Automatic checkweigher		SV
3596111 9	Bulkweigher		SV
3596113 5	Over-under (predetermined weight)		SV
3596115 0	Miscellaneous industrial scales (crane, suspension, tank, hopper, force measuring devices, bulk conveyor, etc.).....		SV
3596117 6	Counting scales		SV
35962	RETAIL, COMMERCIAL, HOUSEHOLD, AND MAILING SCALES		
	Retail and commercial scales:		
3596201 8	Delicatessen		SV
3596203 4	Checkstand		SV
3596205 9	Automatic prepack		SV
3596207 5	Other		SV
3596212 5	Household and person-weighing scales (including bathroom, coin-operated, free weighing, kitchen, and baby scales)		SV
3596214 1	Mailing and parcel post scales (including handheld scales)		SV
3596221 6	Balances with or without weights (of all sensitivities), except laboratory		SV

136 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 35—Industrial Machinery and Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3596	SCALES AND BALANCES, EXCEPT LABORATORY—MC-3526—Con.		
35963	PARTS, ATTACHMENTS, AND ACCESSORIES FOR SCALES AND BALANCES		
	Accessories and attachments (sold separately):		
3596301 6	Printers		SV
3596303 2	Digital indicators		SV
3596305 7	Other		SV
3596309 9	Parts for scales and balances (sold for assembly elsewhere, repair, service, etc.)		SV
3599	MACHINERY, EXCEPT ELECTRICAL, N.E.C.—MC-3525		
35994	MISCELLANEOUS MACHINERY PRODUCTS (INCLUDING FLEXIBLE METAL HOSE AND TUBING, METAL BELLOWS, ETC.)		
	Flexible metal hose and tubing:		
3599411 0	Copper and copper-base alloy		SV
3599413 6	Aluminum and aluminum-base alloy		SV
3599415 1	Stainless steel		SV
3599416 9	Other		SV
3599425 0	Metal bellows		SV
3599431 8	Carnival and amusement park equipment (ferris wheels, merry-go-rounds, etc.), excluding coin-operated amusement machines		SV
3599498 7	All other miscellaneous machinery products		SV
35995	RECEIPTS FOR MACHINE SHOP JOB WORK AND JOB ORDER REPAIRS		
3599500 0	Receipts for machine shop job work work and job order repairs		SV

See footnotes at end of major group 39.

Major Group 36—Electronic and Other Electric Equipment

Product code	Industry and product description	Unit of measure	Data collected
3612	TRANSFORMERS, EXCEPT ELECTRONIC —MC-3601		
36122	POWER AND DISTRIBUTION TRANSFORMERS, EXCEPT PARTS		
3612202 6	Distribution transformers, excluding general-purpose:		SV
3612204 2	Overhead-type, single-phase, liquid-immersed; 500 kVA and smaller -----		SV
3612206 7	Compartmentalized pad-mounted, single-phase, liquid-immersed; 500 kVA and smaller -----		SV
3612214 1	Subsurface and subway types, single-phase, liquid-immersed; 500 kVA and smaller -----		SV
3612216 6	Three-phase transformers 500 kVA and smaller, liquid-immersed (all voltages) -----		SV
3612219 0	Network transformers, all ratings, excluding network protectors -----		SV
	Single-phase and three-phase, pad-mounted (dry); 500 kVA and smaller -----		SV
	Small power transformers, single- and three-phase, all voltages:		
3612221 6	Liquid-immersed, 501 kVA through 2500 kVA:		SV
3612223 2	Compartmentalized pad-mounted and subsurface underground and conventional subway-type transformers -----		SV
3612228 1	Conventional transformers and autotransformers, primary unit substation transformers and single circuit unit substations -----		SV
3612229 9	Liquid-immersed conventionals, primary unit and single circuit unit substations, 2501 kVA through 10,000 kVA -----		SV
3612232 3	Dry-type small power transformers, conventional, primary unit substation, and core and coil units -----		SV
3612233 1	Secondary unit substation transformers, liquid-immersed, all kVA ratings -----		SV
	Secondary unit substation transformers, dry-type, all kVA ratings -----		SV
	Large power transformers, liquid-immersed:		
3612237 2	10,001 kVA, OA to 30,000 kVA, OA (50,000 kVA, top FOA):		SV
3612239 8	With load-tap-changing -----		SV
	Without load-tap-changing -----		
3612241 4	30,001 kVA, OA (50,001 kVA, top FOA) to 100,000 kVA, OA (167,000 kVA, top FOA):		SV
3612242 2	With load-tap-changing -----		SV
	Without load-tap-changing -----		
3612243 0	100,001 kVA, OA (167,001 kVA, top FOA) and larger:		SV
3612244 8	With load-tap-changing -----		SV
	Without load-tap-changing -----		
36123	SPECIALTY TRANSFORMERS, EXCEPT FLOURESCENT LAMP BALLAST		
3612301 6	Open core and coil units, excluding machine tool control transformers and all units end-bell enclosed (250 VA and under) -----		SV
3612302 4	Machine tool control transformers -----		SV
3612308 1	High intensity discharge lamp transformers, also known as ballasts -----		SV
	Instrument transformers:		
3612306 5	Indoor and outdoor current transformers -----		SV
3612307 3	Indoor and outdoor voltage transformers -----		SV
3612311 5	All other specialty transformers, excluding internal combustion engine ignition -----		SV
36124	FLOURESCENT LAMP BALLASTS		
3612400 6	Flourescent lamp ballasts ³ -----		SV
36126	COMMERCIAL, INSTITUTIONAL, AND INDUSTRIAL GENERAL-PURPOSE TRANSFORMERS, ALL VOLTAGES		
3612601 9	Single- and three-phase, 3 kVA and below, all voltages -----		SV
3612602 7	Single- and three-phase, 3.01 kVA through 15 kVA, all voltages -----		SV
3612603 5	Single- and three-phase, 15.01 kVA through 100 kVA, all voltages -----		SV
3612604 3	Single- and three-phase, 100.01 kVA and above, all voltages -----		SV
3612605 0	Voltage regulating transformers, except transmission and distribution voltage regulators -----		SV
3612609 2	Other general-purpose transformers, including saturable core reactors -----		SV
36127	POWER REGULATORS, BOOSTERS, AND OTHER TRANSFORMERS AND PARTS FOR ALL TRANSFORMERS		
3612701 7	Power regulators, boosters, and other transformers -----		SV
3612778 5	Parts, including renewal and repair parts, subassemblies and accessories for all transformers -----		SV
3613	SWITCHGEAR AND SWITCHBOARD APPARATUS—MC-3602		
36132	POWER CIRCUIT BREAKERS, ALL VOLTAGES		
3613200 9	Power circuit breakers, all voltages ³ -----		SV
36133	LOW VOLTAGE PANELBOARDS AND DISTRIBUTION BOARDS		
3613300 7	Low voltage panelboards and distribution boards and other switching and interrupting devices, 1000 volts or less ³ -----		SV
36134	FUSES AND FUSE EQUIPMENT, LESS THAN 2.3 KV, EXCEPT POWER DISTRIBUTION CUT-OUTS		
3613400 5	Fuses and fuse equipment, less than 2300 volts, except power distribution cut-outs ³ -----		SV
36135	MOLDED CASE CIRCUIT BREAKERS, 1000 VOLTS OR LESS		
3613500 2	Molded case circuit breakers, 1000 volts or less ³ -----		SV
36136	DUCT, INCLUDING PLUG-IN UNITS AND ACCESSORIES, 1000 VOLTS OR LESS		
3613600 0	Duct, including plug-in units and accessories, 1000 volts or less ³ -----		SV
36139	SWITCHGEAR, EXCEPT DUCTS AND RELAYS		
3613900 4	Switchgear, except ducts and relays ³ -----		SV

See footnotes at end of major group 39.

138 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 36—Electronic and Other Electric Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3621	MOTORS AND GENERATORS—MC-3603		
36211	FRACTIONAL HORSEPOWER MOTORS		
3621100 1	Fractional horsepower motors (rated at less than 746 watts) (excluding hermetics) ³		SV
36212	INTEGRAL HORSEPOWER MOTORS AND GENERATORS		
3621200 9	Integral horsepower motors and generators other than for land transportation equipment (rated at 746 watts or more) ³		SV
36213	LAND TRANSPORTATION MOTORS AND GENERATORS		
3621300 7	Land transportation motors, generators, and control equipment, excluding parts ³		SV
36214	PRIME MOVER GENERATOR SETS, EXCEPT STEAM OR HYDRAULIC TURBINE		
3621400 5	Prime mover generator sets, except steam or hydraulic turbine ³		SV
36217	FRACTIONAL MOTOR GENERATOR SETS AND OTHER ROTATING EQUIPMENT, INCLUDING HERMETICS		
3621700 8	Fractional motor generator sets and other rotating equipment, including hermetics ³		SV
36218	INTEGRAL MOTOR GENERATOR SETS AND OTHER ROTATING EQUIPMENT, INCLUDING HERMETICS		
3621800 6	Integral motor generator sets and other rotating equipment, including hermetics ³		SV
36219	PARTS AND SUPPLIES FOR MOTORS, GENERATORS, SETS, AND OTHER ROTATING EQUIPMENT, EXCLUDING MOTORS FOR BUILT-IN JOBS		
3621900 4	Parts, supplies for motors, generators, generator sets, and other rotating equipment, excluding motors for built-in jobs ³		SV
3624	CARBON AND GRAPHITE PRODUCTS —MC-3605		
36241	ELECTRODES		
3624152 9	Electrodes for electric furnaces and electrolytic cell use:	1,000 lb	S
3624156 0	Carbon		
	Graphite	1,000 lb	S
	Brushes, contacts, and brush plates:		
36249	ALL OTHER CARBON AND GRAPHITE PRODUCTS		
3624911 8	Automotive brushes, including replacement brushes and those that are coded, except automobile accessory brushes		SV
3624913 4	Other fractional horsepower brushes and contacts, including replacement brushes and automobile accessory brushes		SV
3624915 9	Other industrial brushes and contacts (brushes more than 1/4 sq inch in cross section and more than 1 1/2 inches long)		SV
3624917 5	Brush plates		SV
3624988 6	Carbon and graphite fibers		SV
	All other carbon and graphite products, except refractories:		
3624981 1	For electrical uses, including welding products, illuminating carbons, battery, except silver or other metal contacts		SV
3624983 7	For mechanical uses, rotor vanes, and other uses where motion is between two parts, except metallic oilless bearings		SV
3624986 0	For aerospace uses, including unmachined stock and machined items not included elsewhere		SV
	For all other uses (including chemical, metallurgical, etc.):		
3624994 4	Paste		SV
3624996 9	Other		SV
3625	RELAYS AND INDUSTRIAL CONTROLS —MC-3602		
36251	RELAYS FOR ELECTRONIC CIRCUITRY, INDUSTRIAL CONTROL, OVERLOAD, AND SWITCHGEAR TYPE		
3625100 7	Relays for electronic circuitry, industrial control, overload, and switchgear type ³		SV
36252	SPECIFIC-PURPOSE INDUSTRIAL CONTROLS		
3625200 5	Specific-purpose industrial controls ³		SV
36253	GENERAL-PURPOSE INDUSTRIAL CONTROLS		
3625300 3	General-purpose industrial controls ³		SV
36254	PARTS FOR INDUSTRIAL CONTROLS AND MOTOR-CONTROL ACCESSORIES		
3625400 1	Parts for industrial controls and motor-control accessories ³		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

139

Major Group 36—Electronic and Other Electric Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3629	ELECTRICAL INDUSTRIAL APPARATUS, N.E.C.—MC-3618		
36291	CAPACITORS FOR INDUSTRIAL USE (EXCEPT FOR ELECTRONIC CIRCUITRY)		
3629101 1	Shunt and series power capacitors, units, and equipment, 1/2 kVA or more, and accessories -----		SV
3629104 5	Other capacitors (except electrolytic) incl. ac, general-purpose for motors, controls, high intensity discharge lighting -----		SV
36292	RECTIFYING APPARATUS		
	Rectifying (power conversion) apparatus, except for electronic circuitry: Semiconductor power conversion apparatus: Semiconductor battery chargers: Automotive ----- Industrial and railroad ----- Semiconductor high-voltage power supplies in excess of 2 kV: 100 kW or less ----- More than 100 kW ----- All other ac to dc semiconductor power conversion apparatus, including computer supplies ----- Other rectifying (power conversion) apparatus -----		SV SV SV SV SV SV
36293	OTHER ELECTRICAL EQUIPMENT FOR INDUSTRIAL USE, EXCEPT FOR ELECTRONIC CIRCUITRY		
3629301 7	Coil windings, electrical -----		SV
3629302 5	Solenoids (except solenoid-actuated regulating valves) -----		SV
3629303 3	Surge suppressors -----		SV
3629304 1	Cathodic protection equipment -----		SV
3629311 6	Other miscellaneous electrical equipment for industrial use, n.e.c., including electrical discharge equipment -----		SV
3631	HOUSEHOLD COOKING EQUIPMENT —MC-3606		
36311	ELECTRIC, INCLUDING MICROWAVE, HOUSEHOLD RANGES, OVENS, SURFACE COOKING UNITS		
3631110 8	Electric household ranges, ovens, surface cooking units, and equipment ³ -----		SV
3631120 7	Parts and accessories for electric household ranges and ovens, such as burners, rotisseries, oven racks, broiler pans ³ -----		SV
36313	GAS HOUSEHOLD RANGES, OVENS, SURFACE COOKING UNITS, AND EQUIPMENT		
3631310 4	Gas household ranges, ovens, surface cooking units, and equipment ³ -----		SV
3631320 3	Parts and accessories for gas household ranges and ovens, such as burners, rotisseries, oven racks, broiler pans, etc. ³ -----		SV
36314	OTHER HOUSEHOLD RANGES AND COOKING EQUIPMENT		
3631410 2	Other household ranges and cooking equipment (except gas and electric), and outdoor cooking equipment ³ -----		SV
3631420 1	Parts and accessories for outdoor and other cooking equipment, sold separately ³ -----		SV
3632	HOUSEHOLD REFRIGERATORS AND FREEZERS—MC-3522		
36321	HOUSEHOLD MECHANICAL REFRIGERATORS, INCLUDING COMBINATION REFRIGERATOR-FREEZERS		
3632100 8	Household mechanical refrigerators, including combination refrigerator-freezers ³ -----		SV
36322	FOOD FREEZERS, HOUSEHOLD		
3632200 6	Food freezers, complete units, household-type ³ -----		SV
36323	PARTS AND ATTACHMENTS FOR HOUSEHOLD REFRIGERATORS AND FREEZERS		
3632300 4	Parts, attachments for household refrigerators and freezers (excl. compressors, condensing units, ice making machines ³ -----		SV
3633	HOUSEHOLD LAUNDRY EQUIPMENT —MC-3606		
36330	HOUSEHOLD LAUNDRY MACHINES, INCLUDING WASHING MACHINES, DRYERS, AND COMBINATIONS		
3633010 8	Household laundry machines, including both coin- and noncoin-operated washing machines, dryers, and combinations ³ -----		SV
3633020 7	Parts, accessories, and attachments for household laundry equipment, sold separately ³ -----		SV
3634	ELECTRIC HOUSEWARES AND FANS —MC-3606		
36341	ELECTRIC FANS, EXCEPT INDUSTRIAL-TYPE		
3634100 6	Electric fans, except industrial-type ³ -----		SV
36345	SMALL ELECTRIC HOUSEHOLD APPLIANCES, EXCEPT FANS		
3634500 7	Small electric household appliances, except fans ³ -----		SV
36349	PARTS AND ATTACHMENTS FOR SMALL HOUSEHOLD ELECTRIC APPLIANCES		
3634911 6	Parts and attachments for household electric fans ³ -----		SV
3634920 7	Parts for other small household electric appliances ³ -----		SV

See footnotes at end of major group 39.

140 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 36—Electronic and Other Electric Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3635	HOUSEHOLD VACUUM CLEANERS—MC-3606		
36350	HOUSEHOLD VACUUM CLEANERS, INCLUDING PARTS AND ATTACHMENTS		
3635041 1	Complete power units, central system type.....	number	S
3635011 4	Hand type	number	S
3635033 8	Upright/ stick type	number	S
3635031 2	Cannister/ tank type	number	S
3635036 1	Other general-purpose types, including utility	number	S
3635051 0	Attachments and cleaning tools, including central system attachments		SV
3635071 8	Parts for household-type vacuum cleaners, including central system parts		SV
3639	HOUSEHOLD APPLIANCES, N.E.C. —MC-3606		
36391	HOUSEHOLD WATER HEATERS, ELECTRIC		
3639100 1	Water heaters, electric, for permanent installation ³		SV
36392	HOUSEHOLD WATER HEATERS, EXCEPT ELECTRIC		
3639200 9	Water heaters, except electric ³		SV
36395	HOUSEHOLD APPLIANCES, N.E.C., AND PARTS FOR HOUSEHOLD APPLIANCES, N.E.C.		
3639510 1	Other major household appliances, n.e.c., excluding parts ³		SV
3639520 0	Parts and accessories for other household appliances, n.e.c. ³		SV
3641	ELECTRIC LAMPS (BULBS AND TUBES)—MC-3607		
36411	ELECTRIC LAMP BULBS AND TUBES		
3641100 7	Electric lamp bulbs and tubes (including sealed beam lamp bulbs) ³		SV
36412	ELECTRIC LAMP (BULBS AND TUBES) COMPONENTS		
3641200 5	Electric lamp (bulbs and tubes) components (bases, supports, lead-ins, filaments, etc., but excluding lamp bulb blanks).....		SV
3643	CURRENT-CARRYING WIRING DEVICES —MC-3608		
36431	LAMPHOLDERS		
3643100 5	Lampholders ³		SV
36432	CONVENIENCE AND POWER OUTLETS		
3643200 3	Convenience and power outlets, both general- and special-purpose (excluding pin-and-sleeve type) ³		SV
36433	SWITCHES FOR ELECTRICAL CIRCUITRY		
3643300 1	Switches for electrical circuitry (including vehicular switches) ³		SV
36434	METAL CONTACTS		
3643400 9	Metal contacts, precious and other ³		SV
36435	WIRE CONNECTORS FOR ELECTRICAL CIRCUITRY		
3643500 6	Wire connectors for electrical circuitry ³		SV
	CONNECTORS FOR ELECTRONIC CIRCUITRY:		
36436	CURRENT-CARRYING WIRING DEVICES, N.E.C.		
3643600 4	Other current-carrying wiring devices (attachments, plug caps, connector bodies, lightning arrestors, etc.) ³		SV
3644	NONCURRENT-CARRYING WIRING DEVICES—MC-3608		
36441	POLE AND TRANSMISSION LINE HARDWARE		
3644100 4	Pole and transmission line hardware ³		SV
36442	ELECTRICAL CONDUIT AND CONDUIT FITTINGS		
3644200 2	Electrical conduit and conduit fittings, including plastics conduit and conduit fittings ³		SV
36443	NONCURRENT-CARRYING WIRING DEVICES AND SUPPLIES		
3644300 0	Other noncurrent-carrying wiring devices and supplies (boxes, covers, bar hangers, etc.) ³		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

3648500 1	Outdoor lighting equipment (including parts and accessories) ³		SV
36489	ELECTRIC AND NONELECTRIC LIGHTING EQUIPMENT, N.E.C., INCLUDING HAND PORTABLE, AND PARTS AND ACCESSORIES		
	Incandescent hand portable lighting equipment:		
3648912 8	Rechargeable battery-operated		SV
	Other than rechargeable battery-operated:		
3648916 9	Flashlights and flashlight lanterns (one to five cells)		SV
3648917 7	Other, such as miners' lights, emergency warning lights, generator flashlights, etc.		SV
3648931 8	Other incandescent electric lighting equipment (including marine markers or beacons)		SV
3648975 5	Other fluorescent lighting equipment, complete units, including processing and technical equipment		SV
3648921 2	Other electric lighting equipment, including electrical discharge, such as mercury vapor, sodium vapor, etc.		SV
3648991 2	Ultraviolet and infrared health lamp fixtures (excluding lamp bulbs sold separately)		SV
3648970 6	Parts and accessories for other electric lighting fixtures, n.e.c.		SV
	Nonelectric lighting equipment (including parts):		
3648983 9	Lamps and lanterns (including kerosene, gasoline, propane, butane, etc.)		SV
3648987 0	Other nonelectric lighting fixtures and equipment, complete units (including carbide lamps of all types)		SV
3648985 4	Parts and accessories for nonelectric lighting equipment (including reflectors and fittings, incandescent mantles, etc.)		SV
3651	RADIO RECEIVERS, TELEVISION SETS, PHONOGRAPHS, SPEAKERS, AND RELATED EQUIPMENT—MC-3610		
36511	HOME, PORTABLE, AND AUTOMOBILE RADIOS AND RADIO-PHONOGRAPH-TAPE RECORDER COMBINATIONS		
3651100 4	Home, portable, and automobile radios and radio-phonograph-tape recorder combinations ³		SV
36512	TELEVISION RECEIVERS (INCLUDING TELEVISION COMBINATIONS)		
3651200 2	Television receivers (including television combinations) ³		SV
36515	SPEAKER SYSTEMS, MICROPHONES, AND COMMERCIAL SOUND EQUIPMENT (INCLUDING PUBLIC ADDRESS SYSTEMS)		
3651500 5	Speakers (including loudspeaker systems and loudspeakers sold separately, and commercial sound equipment) ³		SV
36514	CONSUMER HIGH FIDELITY COMPONENTS		
3651400 8	Consumer high fidelity components (including audio and video recorders and players, camcorders) ³		SV
3652	PRERECORDED RECORDS AND TAPES —MC-3611		
36520	PRERECORDED RECORDS AND TAPES		
	Audio discs or records (including compact discs prerecorded):		
3652002 1	Vinyl singles, including 7 and 12 inch	thousands	S
3652005 4	Long playing (LP), excluding digitally mastered records for consumer use	thousands	S
3652006 2	Compact disc (CD) singles/ maxisingles	thousands	S
3652008 8	Compact disc (CD) full-length	thousands	S
3652009 6	Other, including digitally mastered records for consumer use, and master records used to press commercial records	thousands	S
	Audio tapes, prerecorded:		
3652012 0	Cassette singles/ maxisingles	thousands	S
3652013 8	Cassette full-length	thousands	S
3652019 5	Other (including 8 track and DAT)		SV

36784	PRINTED CIRCUIT CONNECTORS FOR ELECTRONIC CIRCUITRY		
3678400 7	Printed circuit connectors for electronic circuitry ³ -----		SV
36785	OTHER CONNECTORS FOR ELECTRONIC CIRCUITRY, INCLUDING PARTS		
3678500 4	Other connectors for electronic circuitry, including parts ³ -----		SV
3679	ELECTRONIC COMPONENTS, NOT ELSEWHERE CLASSIFIED—MC-3621		
36791	CRYSTALS, FILTERS, PIEZOELECTRIC, AND OTHER RELATED DEVICES		
3679100 2	Crystals, filters, piezoelectric, and other related electronic devices, except microwave filters ³ -----		SV
36793	MICROWAVE COMPONENTS AND DEVICES, EXCEPT ANTENNAE, TUBES, AND SEMICONDUCTORS		
3679300 8	Microwave components and devices (except antennae, tubes, and semiconductors) ³ -----		SV
36795	TRANSDUCERS, ELECTRICAL/ ELECTRONIC INPUT OR OUTPUT, N.E.C.		
3679500 3	Transducers, electrical/ electronic input or output ³ -----		SV
36796	SWITCHES, MECHANICAL, FOR ELECTRONIC CIRCUITRY		
3679600 1	Switches, mechanical, for electronic circuitry ³ -----		SV
36798	PRINTED CIRCUIT ASSEMBLIES, LOADED BOARDS OR MODULES (PRINTED CIRCUIT BOARDS WITH INSERTED ELECTRONIC COMPONENTS) ³		
3679800 7	Printed circuit assemblies, loaded boards or modules (printed circuit boards with inserted electronic components) ³ -----		SV
36799	ELECTRONIC COMPONENTS, N.E.C.		
3679930 2	Earphones and headsets (except telephone), phonograph cartridges and pickups, and phonograph needle and styli ³ -----		SV
3679920 3	Other electronic components, n.e.c. (including static power supply converters, and cable harness assemblies) ³ -----		SV
3691	STORAGE BATTERIES—MC-3614		
36913	STORAGE BATTERIES, LEAD ACID TYPE, BCI DIMENSIONAL SIZE GROUP 8D (1.5 CU FT OR .042 CU M AND SMALLER)		
3691311 9	Starting, lighting, and ignition (SLI) type:		
3691312 7	For original equipment -----		SV
3691317 6	For replacement -----		SV
	Other than (SLI) type -----		SV
36914	STORAGE BATTERIES, LEAD ACID TYPE, LARGER THAN BCI DIMENSIONAL SIZE GROUP 8D (1.5 CU FT OR .042 CU M)		
3691411 7	Motive power type:		
3691419 0	Industrial truck -----		SV
3691421 6	Other (including mining and industrial locomotive) -----		SV
3691422 4	Communication (for central office telephone supervisory equipment, telemetering, and microwave) -----		SV
3691479 4	Standby emergency power -----		SV
	Other, including starting, lighting, and ignition (SLI type) for aircraft, marine, fire alarms, and railroad signaling -----		SV
36915	STORAGE BATTERIES, EXCEPT LEAD ACID, INCLUDING PARTS FOR ALL STORAGE BATTERIES		
3691501 5	Nickel cadmium (sealed or vented) -----		SV
3691502 3	Other than nickel cadmium -----		SV
3691591 6	Parts for storage batteries (excluding cases and containers) -----		SV

See footnotes at end of major group 39.

144 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 36—Electronic and Other Electric Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3692	PRIMARY BATTERIES, DRY AND WET—MC-3614		
36920	PRIMARY BATTERIES, DRY AND WET		
3692001 5	Primary cells and batteries having an external volume not exceeding 300 cc:		SV
3692004 9	Manganese dioxide		SV
3692003 1	Mercuric oxide		SV
3692005 6	Silver oxide		SV
3692007 2	Other		SV
3692009 8	Primary cells and batteries having an external volume exceeding 300 cc (18.3 cu inch)		SV
	Parts for primary batteries (excluding cases and containers)		SV
3694	ENGINE ELECTRICAL EQUIPMENT —MC-3616		
36941	IGNITION HARNESS AND CABLE SETS		
3694101 1	Ignition harness sets:		
3694102 9	Automotive type		SV
	Other (including tractor, stationary engine, and aircraft)		SV
3694103 7	Cable sets:		
3694104 5	Automotive type		SV
	Aircraft and other type		SV
36942	BATTERY CHARGING ALTERNATORS, GENERATORS, AND REGULATORS		
3694201 9	Battery charging alternators and generators for internal combustion engines:		
3694202 7	Automotive types, new		S
3694203 5	Other types, new		S
3694204 3	Rebuilt, all types		SV
	Regulators for battery charging alternators and generators (new and rebuilt)		S
36943	CRANKING MOTORS (STARTERS)		
3694301 7	Starting (engine cranking) motors:		
3694302 5	Automotive types, new		SV
3694303 3	Other types, new		SV
	Rebuilt, all types		SV
36944	SPARK PLUGS		
3694400 7	Spark plugs (all types)		SV
36947	COMPLETE ENGINE ELECTRICAL EQUIPMENT, N.E.C.		
3694701 8	Ignition coils (all types)		SV
3694702 6	Distributors (all types)		SV
3694704 2	Magnetos, magneto-dynamos, magnetic flywheels		SV
3694705 9	Other complete ignition equipment (including electronic ignitions)		SV
3694711 7	Electronic systems for complete engine control, using computers or microprocessors		SV
3694719 0	Other complete electrical and/or electronic equipment for internal combustion engines		SV
36949	PARTS FOR ENGINE ELECTRICAL AND/OR ELECTRONIC EQUIPMENT		
3694901 4	Armatures, field coils, and drive-end housings for cranking motors		SV
3694907 1	Armatures and field coils for alternators and generators		SV
3694911 3	Parts for ignition distributors:		
3694912 1	Distributor heads and rotors		SV
3694913 9	Breaker point sets		SV
3694919 6	Condensers (capacitors)		SV
	Other parts for engine electrical and/or electronic equipment		SV
3695	MAGNETIC RECORDING MEDIA—MC-3619		
36950	MAGNETIC AND OPTICAL RECORDING MEDIA (UNRECORDED)		
3695000 4	Magnetic and optical recording media (unrecorded) ³		SV
3699	ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES, NOT ELSEWHERE CLASSIFIED—MC-3617		
36991	ELECTRICAL TEACHING MACHINES, TEACHING AIDS, TRAINERS, AND SIMULATORS, INCLUDING KITS		
3699100 8	Electronic teaching machines, teaching aids, trainers, and simulators, including kits ³		SV
36992	LASER SYSTEMS AND EQUIPMENT, EXCEPT COMMUNICATION³		
3699283 2	Designator/ ranging equipment		SV
3699284 0	Instrumentation (laboratory alignment devices, surveying equipment, etc.)		SV
3699291 5	Industrial:		
3699292 3	Welding		SV
3699293 1	Cutting and drilling machine tools		SV
3699294 9	Printing		SV
3699295 6	Wirephoto		SV
3699296 4	Other		SV
3699297 3	Medical		SV
3699298 0	Bar code scanners/readers		SV
3699299 8	Other		SV
	Laser generator power supplies and components		SV
36995	ULTRASONIC EQUIPMENT (EXCEPT MEDICAL AND DENTAL)		
3699500 9	Ultrasonic equipment (except medical and dental) ³		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

145

Major Group 36—Electronic and Other Electric Equipment—Con.

Product code	Industry and product description	Unit of measure	Data collected
3699	ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES, NOT ELSEWHERE CLASSIFIED—MC-3617—Con.		
36996	APPARATUS WIRE AND CORDAGE MANUFACTURED FROM PURCHASED INSULATED WIRE		
3699600 7	Apparatus wire and cordage (manufactured primarily from purchased insulated wire) ^{2 3} -----		SV
36999	ELECTRONIC SYSTEMS AND EQUIPMENT, N.E.C. (INCLUDING AUTOMATIC GARAGE DOOR OPENERS, AND AMPLIFIERS)		
3699900 1	Electronic systems and equipment, n.e.c. (including automatic garage door openers, amplifiers) ³ -----		SV
3699A	ELECTRICAL PRODUCTS, N.E.C. (EXCLUDING GARAGE DOOR OPENERS)		
3699A05 7	Electrical door openers, except garage door openers -----		SV
3699A01 6	Electric gongs, chimes, bells, etc. -----		SV
3699A03 2	Insect killers -----		SV
3699A07 3	Electrical outboard motors for boats (complete propulsion unit) -----		SV
3699A21 4	Other electrical products, n.e.c. -----		SV

See footnotes at end of major group 39.

37243	AERONAUTICAL SERVICES ON AIRCRAFT ENGINES		
3724321 9	Research and development work on aircraft engines:		
3724323 5	For U.S. military aircraft engines and all other engines built to military specifications -----		SV
	For civilian aircraft engines -----		SV
3724331 8	All other aeronautical services on aircraft engines:		
3724333 4	For U.S. military aircraft engines and all other engines built to military specifications -----		SV
	For civilian aircraft engines -----		SV
37244	AIRCRAFT ENGINE PARTS AND ACCESSORIES		
3724401 9	Military:		
3724402 7	For spark ignition reciprocating or rotary internal combustion engines -----		SV
	For other engines -----		SV
3724405 0	Civilian:		
3724406 8	For spark ignition reciprocating or rotary internal combustion engines -----		SV
	For other engines -----		SV
3728	AIRCRAFT PARTS AND AUXILIARY EQUIPMENT, N.E.C.—MC-3711		
37282	AIRCRAFT PROPELLERS AND HELICOPTER ROTORS		
3728210 0	Complete propellers, excluding helicopter rotors -----		SV
3728231 6	Propeller blades -----		SV
3728251 4	Propeller parts, except propeller blades -----		SV
3728261 3	Helicopter rotors and parts -----		SV
37283	RESEARCH AND DEVELOPMENT ON AIRCRAFT PARTS (EXCEPT ENGINES)		
3728313 2	For U.S. military aircraft and all other aircraft built to military specifications -----		SV
3728315 7	For civilian aircraft -----		SV
37284	AIRCRAFT HYDRAULIC AND PNEUMATIC SUBASSEMBLIES		
3728473 4	Aircraft hydraulic subassemblies:		
3728475 9	For U.S. military aircraft and all other aircraft built to military specifications -----		SV
	For civilian aircraft -----		SV
3728483 3	Aircraft pneumatic subassemblies:		
3728485 8	For U.S. military aircraft and all other aircraft built to military specifications -----		SV
	For civilian aircraft -----		SV
37285	AIRCRAFT PARTS AND AUXILIARY EQUIPMENT, EXCLUDING HYDRAULIC AND PNEUMATIC SUBASSEMBLIES AND ENGINES		
3728513 7	Aircraft mechanical power transmission equipment:		
3728515 2	For U.S. military aircraft and all other aircraft built to military specifications -----		SV
	For civilian aircraft -----		SV
3728594 7	Aircraft landing gear:		
3728595 4	For U.S. military aircraft and all other aircraft built to military specifications -----		SV
	For civilian aircraft -----		SV
3728598 8	Other aircraft subassemblies and parts:		
3728599 6	For U.S. military aircraft and all other aircraft built to military specifications -----		SV
	For civilian aircraft -----		SV
3731	SHIP BUILDING AND REPAIRING —MC-3704		
37311	NONPROPELLED SHIPS, NEW CONSTRUCTION		
3731111 5	Military and nonmilitary:		
3731107 3	Barges, all types -----		SV
3731119 8	Drilling/production platforms -----		SV
	Other (including dredges and floating docks) -----		SV
37312	SELF-PROPELLED SHIPS, U.S. MILITARY, NEW CONSTRUCTION		
3731200 6	Military, including combat ships, troop transport vessels, fleet auxiliaries, service craft, etc. -----		SV
37313	SELF-PROPELLED SHIPS, NONMILITARY, NEW CONSTRUCTION		
3731315 2	Yachts, 65 ft or more in length (requires a professional crew as specified by the Coast Guard) -----		SV
3731324 4	Dry bulk carriers -----		SV
3731326 9	Tankers -----		SV
3731332 7	Fire, patrol, and pilot vessels -----		SV
3731333 5	Support vessels for offshore drilling and mining -----		SV
3731335 0	Self-propelled mobile drilling/production platforms -----		SV
	Commercial fishing vessels:		
3731343 4	Trawlers -----		SV
3731348 3	Other (including seiners) -----		SV
3731357 4	Tugboats and towboats, including integrated tug/barge combination -----		SV
3731321 0	Ferryboats -----		SV
3731328 5	Other ships (including container and trailer ships) -----		SV

3841131 0	Orthopedic instruments, excluding eye, ear, nose, and throat instruments		SV
	Diagnostic apparatus:		
3841121 1	Metabolism and blood-pressure apparatus		SV
3841123 7	Other diagnostic apparatus, including optical diagnostic apparatus		SV
3841142 7	Syringes		S
3841149 2	Hypodermic needles	thousands	S
3841172 4	Anesthesia apparatus and instruments	thousands	S
3841184 9	Bone plates, screws, and nails, and other internal fixation devices or appliances		SV
3841185 6	Blood transfusion, I.V. equipment, and donor kits		SV
3841186 4	Catheters		SV
3841187 2	Mechanical therapy appliances		SV
3841196 3	Other surgical and medical instruments		SV
3841199 7	Parts for surgical and medical instruments and apparatus		SV
38412	HOSPITAL FURNITURE		
3841291 2	Operating room furniture, including tables, cases, cabinets, etc.		SV
3841293 8	Patient room furniture, including cabinets, overbed tables, desks, dressers, etc., but excluding beds and chairs		SV
3841296 1	Other hospital furniture excluding operating and patient room furniture, beds, and instruments.....		SV
3842	SURGICAL APPLIANCES AND SUPPLIES —MC-3803		
38421	SURGICAL, ORTHOPEDIC, PROSTHETIC, AND THERAPEUTIC APPLIANCES AND SUPPLIES		
	Orthopedic or fracture appliances and prosthetic appliances:		
3842101 2	Artificial joints		SV
3842102 0	Artificial limbs		SV
3842104 6	Braces, mechanical		SV
3842105 3	Elastic braces, suspensories, and other elastic supports		SV
3842106 1	Elastic stockings		SV
3842107 9	Surgical corsets		SV
3842108 7	Splints and trusses		SV
3842109 5	Crutches, canes (orthopedic), and other walking assistance devices		SV
3842110 3	Arch supports and other foot appliances		SV
3842112 9	Intraocular lenses		SV
3842113 7	Other orthopedic and prosthetic appliances		SV
	Surgical dressings:		
3842122 8	Bandages, elastic		SV
3842123 6	Bandages, other, including muslin, plaster of paris, etc., excluding self-adhering bandages		SV
3842124 4	Adhesive plaster, medicated and nonmedicated, including self-adhering bandages		SV
3842126 9	Gauze (absorbent and packing)		SV
3842127 7	Cotton, including cotton balls (sterile and nonsterile)		SV
3842129 3	Other surgical dressings, including sponges, compresses, pads, etc.		SV
3842131 9	Disposable surgical drapes, including O/B and O/R packs		SV
3842132 7	Disposable incontinent pads, bedpads, and adult diapers		SV
3842137 6	Sterile surgical sutures		SV
3842165 7	Breathing devices, excluding anesthetic apparatus but including incubators, respirators, resuscitators, inhalators, etc.		SV
	Patient transport devices:		
3842183 0	Wheel chairs	number	S
3842185 5	Other patient transport devices, including stretchers, wheeled chairs, tables, etc.		SV
	Therapeutic appliances and supplies:		
3842187 1	Hydrotherapy equipment, including full body and limb tanks (portable and stationary)		SV
3842189 7	Other therapeutic equipment and supplies, excluding electromedical		SV
3842191 3	Surgical kits		SV
3842197 0	Other surgical and orthopedic items not included in above categories.....		SV
3842198 8	Parts for surgical, orthopedic, prosthetic, and therapeutic appliances and supplies		SV
38423	PERSONAL INDUSTRIAL SAFETY DEVICES		
3842311 7	Respiratory protection equipment, including gas masks, abrasive masks, canister masks, etc.		SV
3842321 6	Industrial helmets (hardhats)		SV
3842322 4	Eye and face protection devices (face shields, welding helmets, masks), excluding industrial goggles and eye protectors		SV
3842351 3	Protective clothing, except shoes		SV
3842361 2	First aid, snake bite, and burn kits, both household and industrial types		SV
3842373 7	Other personal safety devices, including motorcycle and auto racing helmets		SV

156 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 38—Instruments and Related Products—Con.

Product code	Industry and product description	Unit of measure	Data collected
3861	PHOTOGRAPHIC EQUIPMENT AND SUPPLIES—MC-3805		
38611	STILL PICTURE EQUIPMENT		
3861111 7	Still cameras:	number	S
3861121 2	Hand-type cameras (excluding film, bulbs, batteries, etc., in outfits)	number	S
3861132 3	Process cameras for photoengraving and photolithography, including value of stands and attachments when shipped together	number	S
3861167 9	Other still cameras, excluding photocopying, microfilming, blueprinting, and whiteprinting	number	S
3861173 7	Projectors, except rear screen viewers		
3861181 0	Still picture commercial-type finishing equipment:		
3861197 6	Processing equipment for film		SV
	All other processing equipment (developing machines, motor-operated print washers and driers, etc.)		SV
	Other still picture equipment, parts, attachments, and accessories, excluding projection screens		SV
38612	PHOTOCOPYING EQUIPMENT (INCLUDES DIFFUSION TRANSFER, DYE TRANSFER, ELECTROSTATIC, LIGHT AND HEAT SENSITIVE TYPES, ETC.)		
3861200 8	Photocopying equipment (includes diffusion transfer, dye transfer, electrostatic, light and heat sensitive types, etc.)		SV
38614	MICROFILMING, BLUEPRINTING, AND WHITEPRINTING EQUIPMENT		
3861406 1	Microfilming equipment (including microfiche):		
3861403 8	Cameras, including computer output		SV
3861404 6	Microfilm readers, excluding handheld and service type		SV
3861405 3	Microfilm reader-printers		SV
3861421 0	Other microfilm equipment		SV
	Blueprinting and whiteprinting (direct process type) equipment		SV
38613	MOTION PICTURE EQUIPMENT		
3861311 3	8 mm and 16 mm motion picture equipment		SV
3861321 2	35 mm or larger motion picture equipment		SV
3861352 7	Projection screens (for motion picture and/ or still projection)	number	S
3861397 2	Motion picture processing equipment, all types, excluding motion picture still type equipment and interchangeable types		SV
38615	PHOTOGRAPHIC SENSITIZED FILM AND PLATES, SILVER HALIDE TYPE (EXCEPT X-RAY)		
3861502 7	Sheet film, pack film, and long lengths of still picture roll film other than graphic arts film	1,000 sq meters	S
3861503 5	Presensitized printing plates, unexposed	1,000 sq meters	S
3861506 8	Phototypesetting and imagesetting film	1,000 sq meters	S
3861508 4	Graphic arts film	1,000 sq meters	S
3861519 1	Other film, plates, and slides, including microfilm and motion picture film	1,000 sq meters	S
38616	SENSITIZED PHOTOGRAPHIC PAPER AND CLOTH, SILVER HALIDE TYPE		
3861600 9	Sensitized photographic paper and cloth, silver halide type	1,000 sq meters	S
38617	SENSITIZED PHOTOGRAPHIC FILM, PLATES, PAPER, AND CLOTH, OTHER THAN SILVER HALIDE TYPE		
3861713 0	Diazo type:		
3861718 9	Dry diazo print paper	1,000 sq yd	S
3861722 1	Paper reproducibles	1,000 sq yd	S
3861723 9	Diazo type film, except microfilm/ microfiche	1,000 sq yd	S
3861729 6	Diazo microfilm/ microfiche	1,000 sq yd	S
3861741 1	All other diazo materials	1,000 sq yd	S
3861743 7	Diffusion transfer materials (including both imager and receiver sheets)	1,000 sq yd	S
3861745 2	Off-press color proofing media	1,000 sq yd	S
3861747 8	Letterpress plates	1,000 sq yd	S
3861751 0	Flexographic plates	1,000 sq yd	S
	Other types, including sensitized film, plates, paper, and cloth for all other processes (including blueprint types)	1,000 sq yd	S
38618	PREPARED PHOTOGRAPHIC CHEMICALS		
3861812 0	Prepared photographic chemicals (developers, fixers, toners, and other chemicals):		
3861814 6	Office copy toners		SV
3861815 3	Photographic chemicals		SV
3861819 5	Plate chemicals		SV
	Other		SV
38619	X-RAY FILM AND PLATES		
3861900 3	X-ray film and plates	1,000 sq meters	S
3873	WATCHES, CLOCKS, WATCHCASES, AND PARTS—MC-3806		
38731	WATCHES, WATCHCASES, MOVEMENTS OR MODULES, AND WATCH PARTS		
3873104 8	Watches	number	S
3873114 7	Watchcases, movements or modules, and watch parts	number	S

Product code	Industry and product description	Unit of measure	Data collected
3911	JEWELRY, PRECIOUS METAL—MC-3901		
39111	JEWELRY, MADE OF PLATINUM METALS AND KARAT GOLD		
	Rings and ring mountings:		
	Rings (complete):		
3911111 7	Fraternal, college, and school rings		SV
3911112 5	Wedding rings		SV
3911114 1	Other rings		SV
3911115 8	Ring mountings, for sale separately		SV
3911131 5	Women's and children's jewelry (necklaces, bracelets, brooches, pins, clips, earrings, lockets, etc.)		SV
3911141 4	Watch attachments (bracelets for watches)		SV
3911151 3	Organizational jewelry (fraternal, college, and school jewelry and emblems; military insignia, excluding rings)		SV
3911198 4	Other jewelry worn or carried about the person (watch chains, rosaries, cigarette cases, lighters, compacts, etc.)		SV
39113	JEWELRY MADE OF SILVER (INCLUDING PLATINUM METALS AND KARAT GOLD CLAD TO SILVER)		
3911311 3	Rings and ring mountings		SV
3911321 2	Men's jewelry (collar and cuff buttons, studs, watch chains, money clips, identification bracelets, scarf pins, etc.)		SV
3911331 1	Women's and children's jewelry (necklaces, bracelets, brooches, pins, clips, earrings, lockets, etc.)		SV
3911341 0	Watch attachments (bracelets for watches)		SV
3911398 0	Other jewelry worn or carried about the person (rosaries, cigarette cases, lighters, compacts, vanity cases, etc.)		SV
39114	OTHER JEWELRY, EXCEPT COSTUME		
	Jewelry of base metal clad with precious metal:		
3911411 1	Rings and ring mountings		SV
3911421 0	Men's jewelry (collar and cuff buttons, studs, watch chains, money clips, identification bracelets, scarf pins, etc.)		SV
3911431 9	Women's and children's jewelry (necklaces, bracelets, brooches, pins, clips, earrings, lockets, etc.)		SV
3911441 8	Watch attachments (bracelets for watches)		SV
3911451 7	Other clad jewelry, including cigarette lighters		SV
3911461 6	Jewelry of natural or cultured pearls		SV
3911471 5	Jewelry of semiprecious or precious stones		SV
3914	SILVERWARE AND PLATED WARE —MC-3902		
39141	HOLLOWWARE (INCLUDING TOILETWARE, ECCLESIASTICAL WARE, NOVELTIES, TROPHIES, BABY GOODS, AND OTHER PLATED WARE)		
3914111 4	Sterling silver		SV
3914131 2	Electrosilverplated		SV
3914141 1	Precious metal other than silver whether or not clad with precious metal		SV
3914143 7	Base metal clad with precious metal		SV
3914153 6	Pewter		SV
3914170 0	Unplated hollowware of other metals (including stainless steel), and hollowware plated with other metals		SV
39142	FLATWARE (INCLUDING ALL KNIVES, FORKS, SPOONS, AND CARVING SETS MADE WHOLLY OF METAL)		
3914211 2	Sterling silver		SV
3914235 1	Electrosilverplated		SV
3914241 9	Precious metal other than silver whether or not clad with precious metal		SV
3914243 5	Base metal clad with precious metal		SV
3914270 8	Unplated flatware of other metals (including stainless steel), and flatware plated with metals other than silver		SV
3915	JEWELERS' MATERIALS AND LAPIDARY WORK—MC-3901		
39152	LAPIDARY WORK AND DIAMOND CUTTING AND POLISHING		
	Stones cut or polished in the plant from materials owned by the plant:		
3915211 1	Diamonds for jewelry purposes		SV
3915233 5	Other natural precious and semiprecious stones, including synthetic stones, industrial diamonds, and drilling of pearls		SV
39153	JEWELERS' FINDINGS AND MATERIALS OF PRECIOUS METAL		
3915311 9	Jewelers' findings and materials of platinum and karat gold, except machine chain		SV
3915312 7	Machine chain of platinum and karat gold		SV
3915321 8	Jewelers' findings and materials of silver		SV
3915331 7	Jewelers' findings and materials made of base metal clad with precious metal		SV
39154	JEWELERS' FINDINGS AND MATERIALS OF BASE METAL		
3915400 0	Jewelers' findings and stock shop products made of base metal not clad with precious metal		SV
3931	MUSICAL INSTRUMENTS—MC-3903		
39311	PIANOS		
3931111 3	Verticals, uprights, or consoles, 37 inches or less in height	number	S
3931115 4	Verticals, uprights, or consoles, more than 37 inches in height	number	S
3931151 9	Grand pianos	number	S
39312	ORGANS		
3931211 1	Pipe and reed		SV
3931251 7	Electronic		SV
39313	PIANO AND ORGAN PARTS		
3931311 9	Piano parts (actions, attachments, strings, tuning pins, etc.), except benches		SV
3931351 5	Organ parts and materials, except benches		SV

See footnotes at end of major group 39.

160 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 39—Miscellaneous Manufacturing Industries—Con.

Product code	Industry and product description	Unit of measure	Data collected
3949	SPORTING AND ATHLETIC GOODS, N.E.C.—MC-3905		
39491	FISHING TACKLE AND EQUIPMENT		
3949106 3	Fishing tackle:		SV
3949111 3	Fishing rods, all types		SV
3949114 7	Fishing reels, all types		SV
3949117 0	Fishing rod and reel combinations		SV
3949118 8	Fish hooks (including snelled hooks)		SV
3949120 4	Casting plugs, spinners, and spoons; flies, lures, and similar artificial baits		SV
3949121 2	Tackle boxes		SV
	Other fishing equipment, including creels, fish and bait buckets, floats, furnished lines, sinkers, snap swivels, etc.		SV
39492	GOLF EQUIPMENT		
3949231 9	Golf balls	dozens	S
	Golf clubs:		
3949241 8	Irons	number	S
3949245 9	Woods	number	S
3949247 5	Golf bags	number	S
3949298 8	Other golf equipment (carts for carrying golf bags, shafts sold as such, tees, etc.) excluding shoes and apparel		SV
39493	PLAYGROUND EQUIPMENT		
3949301 0	Home, including swing sets, slides, seesaws, sandboxes, etc.		SV
3949302 8	Institutional and commercial playground equipment, heavy-duty (including swings, slides, etc.)		SV
39494	GYMNASIUM AND EXERCISE EQUIPMENT		
3949401 8	Gymnasium and gymnastic apparatus and equipment (parallel and horizontal bars, balance beams, trampolines, mats, etc.)		SV
3949402 6	Weight lifting equipment (including belts, benches, and weights)		SV
3949403 4	Multipurpose home gyms		SV
3949404 2	Rowing machines		SV
3949405 9	Exercise cycles	number	S
3949406 7	Other health, physical fitness, and exercising equipment (treadmills, slant-boards, multistation training units, etc.)		SV
39495	OTHER SPORTING AND ATHLETIC GOODS		
3949511 4	Billiard and pool tables		SV
3949515 5	Billiard and pool supplies (such as balls, cues, etc.) sold separately		SV
3949527 0	Bowling alleys and bowling pinsetters	number	S
	Bowling alley playing supplies:		
3949528 8	Bowling balls	number	S
3949530 4	Other bowling alley playing supplies (including pins, etc.)		SV
3949536 1	Baseballs and softballs		SV
3949537 9	Baseball mitts and gloves, including softball		SV
	Baseball bats, including softball bats:		
3949538 7	Wood	dozens	S
3949539 5	Metal	dozens	S
3949541 1	Footballs	dozens	S
3949551 0	All inflatable athletic balls other than footballs (including basketballs, soccer balls, volleyballs, etc.)		SV
	Tennis equipment:		
3949564 3	Tennis rackets, all types (strung and unstrung), and tennis balls		SV
3949586 6	Other tennis equipment and accessories (excluding clothing, shoes, and nets)		SV
3949591 6	Racquetball rackets and racquet balls		SV
3949589 0	Uninflatable athletic balls (handballs, table tennis balls, etc.), excl. golf, tennis, bowling, billiard, and racquet		SV
3949585 8	Archery equipment		SV
3949553 6	Ice skates, shoe skates and roller rink skates, excluding clamp-on type roller skates		SV
3949556 9	Wooden and plastics skateboards (including complete sets)		SV
3949571 8	Winter sports equipment (bobsleds, toboggans, hockey goods, etc.), excluding clothing, protective equipment, and skates		SV
3949570 0	Snow skis and other snow-ski equipment (excluding clothing, body protective equipment, and shoes)		SV
3949569 2	Surfboards and sailboards		SV
3949575 9	Water skis	pairs	S
3949577 5	Underwater sports equipment (SCUBA) and scindiving equipment, excluding watches and cameras		SV
3949592 4	Football helmets	number	S
3949593 2	Other sports helmets (including bicycle; excluding football, motorcycle, and auto racing)		SV
3949596 5	Body protective equipment for all sports (masks; shoulder, chest, knee, and kidney pads, etc.), excluding helmets		SV
3949594 0	Football, baseball, and soccer equipment, n.e.c. (including track, field, and miscellaneous athletic field equipment)		SV
3949595 7	Wading pools and other above ground swimming pools less than 15 ft in diameter, not filtered		SV
3949597 3	Above ground swimming pools 15 ft or more in diameter, filtered, (completely manufactured)	number	S
3949599 9	Other sporting and athletic goods		SV
3951	PENS AND MECHANICAL PENCILS —MC-3906		
39511	PENS		
3951102 7	Ball point:		
3951104 3	Refillable	1,000 units	S
3951113 4	Nonrefillable	1,000 units	S
	Roller	1,000 units	S
39512	MARKERS		
3951202 5	Fine point (thin-line writing pens)	1,000 units	S
3951206 6	Broad tipped (thick-line coloring pens and markers)	1,000 units	S
39513	OTHER PENS, MECHANICAL PENCILS, AND PARTS		
3951305 6	Mechanical pencils, including clutch action and twist action		SV
	Refill cartridges for pens and markers:		
3951310 6	Ball point pen refills	1,000 units	S
3951313 0	All other refills (fountain and roller pens, fine point markers, etc.)		SV
3951325 4	All other pens, mechanical pencil parts, (including pen points, renewal parts, fountain pens, desk sets, etc.)		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 39—Miscellaneous Manufacturing Industries—Con.

Product code	Industry and product description	Unit of measure	Data collected
3952	LEAD PENCILS AND ART GOODS —MC-3906		
39523	NONMECHANICAL PENCILS, CRAYONS, AND CHALK		
3952310 5	Nonmechanical (wood-cased) black graphite pencils	1,000 units	S
3952313 9	Other nonmechanical (wood-cased) pencils (indelible, colored, etc.) and graphite and colored sticks		SV
3952322 0	Crayons and chalk, except artists', including tailors' chalk		SV
39524	ARTISTS' EQUIPMENT		
3952413 7	Artists' equipment (including children's school art equipment, airbrushes, drawing tables, boards, palettes, etc.)		SV
3952419 4	Other art materials (including modeling clay, other modeling material, chalk, water colors, tempera colors, etc.)		SV
3953	MARKING DEVICES—MC-3906		
39530	HAND STAMPS, STENCILS, AND OTHER MARKING DEVICES		
3953013 4	Rubber and vinyl stamps:		
3953015 9	Hand stamps, typeholder, and dies, custom and stock		SV
3953033 2	Permanently inked stamps, excluding print dies.....		SV
3953035 7	Mechanical hand stamps, self inkers including daters, time and numbering stamps, and metal and rubber wheel band goods.....		SV
3953037 3	Embossing seals, including notary, engineering, corporate, stationery, etc.....		SV
3953098 5	Hand, letter, and figure stamps; dies; types and type holders; and steel embossing and incising numbering heads.....		SV
	Other marking devices, such as stencils, letters, figures, numerals, stamp pads, branding irons, etc.		SV
3955	CARBON PAPER AND INKED RIBBONS —MC-3907		
39551	INKED RIBBONS		
3955110 6	Typewriter ribbons.....	dozens	S
3955115 5	Computer (electronic data processing) ribbons	dozens	S
3955120 5	Other ribbons		SV
39552	CARBON PAPER, STENCIL PAPER, ETC.		
3955200 5	Carbon paper, stencil paper, etc.		SV
3961	COSTUME JEWELRY—MC-3901		
39610	COSTUME JEWELRY AND COSTUME NOVELTIES (EXCEPT PRECIOUS METAL)		
3961011 8	Base metal, whether or not electroplated with gold, silver, chromium, etc.:		
3961021 7	Rings and ring mountings		SV
3961031 6	Men's jewelry (excluding watch attachments and rings)		SV
3961041 5	Women's and children's jewelry and costume novelties (excluding watch attachments and rings)		SV
3961051 4	Watch attachments (bracelets for watches)		SV
3961072 0	Fraternal, college, and school jewelry and emblems (including military insignia; excluding rings)		SV
3961096 9	Other jewelry worn or carried about the person except compacts, vanity cases, cigar and cigarette cases, and lighters		SV
3961099 3	Compacts and vanity cases, other than leather		SV
	Other costume jewelry, imitation pearls, and costume novelties made of plastics, wood, leather, etc.....		SV
3965	FASTENERS, BUTTONS, NEEDLES, AND PINS—MC-3909		
39651	BUTTONS AND PARTS (EXCEPT PRECIOUS OR SEMIPRECIOUS METALS AND PRECIOUS OR SEMIPRECIOUS STONES)		
3965101 3	Metal:		
3965109 6	Sew on type		SV
	Other metal buttons (including mechanically applied types, etc.)		SV
3965111 2	Plastics:		
3965119 5	Polyester		SV
3965121 1	Other plastics (including casein)		SV
3965129 4	Button blanks or molds, backs and parts for sale as such		SV
	Other buttons (including all fabrics covered; wood, bone, and hoof, vegetable ivory, leather, etc.)		SV
39654	ZIPPERS AND SLIDE FASTENERS		
3965422 3	Plastics:		
3965423 1	Nylon		SV
	Other plastics		SV
3965431 4	Metal:		
3965433 0	Aluminum		SV
3965439 7	Brass		SV
	Other		SV
39656	NEEDLES, PINS, FASTENERS (EXCEPT SLIDE), AND SIMILAR NOTIONS		
3965620 2	Snap fasteners (all types)		SV
3965625 1	Buckles (including those covered with fabrics or other material, but excluding those used for costume jewelry and shoes)		SV
3965633 5	Other fasteners (including tape fasteners, hook and eyes, rivet and burrs, trimmings, etc.)		SV
3965651 7	Hair curlers (except rubber and those designed for beauty parlor use)		SV
3965671 5	Needles (except hypodermic, phonograph, and styli)		SV
	Pins (except jewelry):		
3965681 4	Common or toilet, (including dressmakers' pins)		SV
3965689 7	Other pins, hatpins, glasshead pins, safety pins, plastics and metal hairpins		SV

See footnotes at end of major group 39.

162 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 39—Miscellaneous Manufacturing Industries—Con.

Product code	Industry and product description	Unit of measure	Data collected
3991	BROOMS AND BRUSHES—MC-3910		
39911	BROOMS		
3991113 6	Household floor brooms -----		SV
3991198 7	Other brooms (industrial brooms, whiskbrooms, toy brooms, hearth brooms, streetsweeping machine brooms, etc.) -----		SV
39912	PAINT AND VARNISH BRUSHES, ROLLERS, AND PADS		
3991211 8	Whitewash, kalsomine, paperhanging, marking, and stenciling brushes:		
3991233 2	Made of pure bristle -----	dozens	S
3991243 1	Made of synthetic bristle and other materials, including mixtures -----		SV
	Paint pads and holders -----		SV
	Paint rollers, roller frames and replacement rollers:		
3991281 1	Complete units -----	dozens	S
3991283 7	Roller frames -----	dozens	S
3991285 2	Replacement rollers -----	dozens	S
39913	OTHER BRUSHES		
	Personal brushes:		
3991321 5	Toothbrushes -----	dozens	S
3991327 2	Hairbrushes -----	dozens	S
3991329 8	Other, including shaving brushes -----		SV
	Maintenance brushes, including floor, scrub, dusting, window, etc.:		
3991336 3	Household (including any twisted-in-wire brushes) -----		SV
3991338 9	Industrial (including any twisted-in-wire brushes) -----		SV
3991343 9	Industrial brushes (except maintenance) (including power-driven rotary, end, cup, jewelers' and dentists' brushes, etc.) -----		SV
3991398 3	Other brushes, including artists' brushes and hair pencils, except artists' airbrushes -----		SV
3993	SIGNS AND ADVERTISING SPECIALTIES —MC-3911		
39931	ELECTRIC SIGNS		
3993112 6	Luminous tubing (neon, argon, hydrogen, etc.) -----		SV
3993113 4	Fluorescent lamp -----		SV
	Incandescent bulb signs:		
3993114 2	Electronic variable message displays -----		SV
3993115 9	Other -----		SV
3993116 7	All other electric signs (including combinations of luminous fluorescent and incandescent) -----		SV
39932	NONELECTRIC SIGNS		
	Metal signs:		
3993212 4	Screen printed -----		SV
3993222 3	Other -----		SV
	Wood signs:		
3993232 2	Screen printed -----		SV
3993242 1	Other -----		SV
	Other signs manufactured, that are printed or unprinted in this establishment:		
	Counters, floor displays, point-of-purchase, and other display materials:		
3993252 0	Letterpress -----		SV
3993262 9	Screen printed -----		SV
3993272 8	Offset (lithographic) -----		SV
3993276 9	Unprinted -----		SV
	All other signs (including sign letters):		
3993278 5	Screen printed -----		SV
3993288 4	Other -----		SV
39933	ADVERTISING SPECIALTIES		
3993300 7	Advertising specialties -----		SV
3995	BURIAL CASKETS—MC-3912		
39951	METAL CASKETS AND COFFINS COMPLETELY LINED AND TRIMMED, ADULT SIZES ONLY		
3995113 2	Steel caskets and coffins (excluding stainless steel) -----	number	S
3995115 7	Other metal caskets and coffins (stainless steel, bronze, copper, etc.) -----	number	S
39952	WOOD CASKETS AND COFFINS, COMPLETELY LINED AND TRIMMED, ADULT SIZES ONLY		
3995211 4	Cloth covered (softwood) -----	number	S
3995252 8	Hardwood -----	number	S
39953	OTHER CASKETS AND COFFINS AND METAL VAULTS		
3995311 2	Caskets and coffins other than metal or wood, completely lined and trimmed (including plastics, fiberglass, foam, etc.) -----		SV
	Caskets shells, KD and SU unlined or untrimmed:		
3995331 3	Metal -----	number	S
3995358 3	Other materials (including wood, plastics, fiberglass, foam, masonite, cardboard, fiberboard, etc.) -----		SV
3995393 0	Burial vaults (except concrete), burial boxes, and casket-shipping containers and cases -----	number	S
3996	HARD SURFACE FLOOR COVERINGS, N.E.C.—MC-3211		
39960	HARD FLOOR COVERING		
3996000 0	Hard floor covering, including resilient, and other floor coverings (plain or adhesive backed) -----		SV

See footnotes at end of major group 39.

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Major Group 39—Miscellaneous Manufacturing Industries—Con.

Product code	Industry and product description	Unit of measure	Data collected
3999	MANUFACTURING INDUSTRIES, N.E.C.—MC-3908		
39991	CHEMICAL FIRE-EXTINGUISHING EQUIPMENT AND PARTS		
	Hand portable extinguishers:	number	S
3999113 8	Carbon dioxide		SV
3999117 9	Dry chemical fire extinguishers	number	S
3999140 1	Other hand portable extinguishers (including foam, pressurized water, and halogenated agents)		SV
3999170 8	Fixed systems, including inert gas, dry and wet chemical and other chemical fire-extinguishing equipment		SV
3999171 6	Parts and attachments for chemical fire-extinguishing equipment		SV
39992	COIN-OPERATED AMUSEMENT MACHINES		
3999222 7	Arcade and amusement center type electronic games ³		SV
3999299 5	Other amusement machines, including nonelectronic arcade games and parts for all arcade games		SV
39993	MATCHES		
3999300 1	Matches		SV
39994	CANDLES		
3999400 9	Candles (including tapers)		SV
39996	FURS, DRESSED AND DYED		
3999611 1	Furs, dressed and dyed		SV
3999693 9	Receipts for dressing and dyeing furs done in your plant on materials owned by others		SV
39997	UMBRELLAS AND PARASOLS		
3999700 2	Umbrellas and parasols (including parts)		SV
39998	FEATHERS, PLUMES, AND ARTIFICIAL FLOWERS		
3999813 3	Artificial Christmas trees, all types (metal, plastics, etc.)	thousands	S
	Artificial flowers, fruits, and wreaths:		
3999815 8	Plastics type		SV
3999817 4	Other materials		SV
3999821 6	Feathers and plumes		SV
39999	MISCELLANEOUS FABRICATED PRODUCTS, N.E.C.		
3999907 3	Hair clippers, for human use, hand and electric		SV
3999911 5	Barber and beauty shop furniture and equipment, including barber and beauty chairs		SV
3999913 1	Beauty and barber shop accessories (including hair curlers, pads, and wraps)		SV
3999924 8	Hair work, switches, toupees, and wigs		SV
3999942 0	Tobacco pipes	number	S
3999944 6	Cigar and cigarette lighters (except precious metal and electric)	thousands	S
3999951 1	Christmas tree ornaments and decorations (except glass and electrical)		SV
3999961 0	Lamp shades, excluding plastics, metal, and glass		SV
3999981 8	Potpourri (dried and chemically preserved flowers, foliage, fruits, and vines)		SV
3999999 0	Miscellaneous fabricated products, not elsewhere classified		SV

¹Additional production quantity data are available for this product class in the Current Industrial Report (CIR) series. See appendix B for a listing of these additional CIR product codes.

²This product is primary to more than one industry. See appendix G for a listing of the related product codes.

³Additional data are available for this product in the Current Industrial Reports (CIR) series. See appendix C for the corresponding CIR title and appendix A for a listing of the additional product codes.

⁴Additional data are available for this product in the U.S. International Trade Commission (USITC) Report, "Synthetic Organic Chemicals". See appendix H for the corresponding USITC section number and title.

APPENDIX A.

Product Description in Current Industrial Reports That Relate to Tielines in the 1992 Census of Manufactures

Product code	CIR and product description	Unit of measure	Data collected
MA20D, CONFECTIONERY			
2064200	Chocolate and chocolate-type confectionery	1,000 lb	S
2064211	Solid	1,000 lb	S
2064212	Solid with inclusions	1,000 lb	S
	Enrobed or molded:		
2064213	With candy, fruit, or nut center	1,000 lb	S
2064214	With bakery product center	1,000 lb	S
2064215	Panned	1,000 lb	S
2064216	Assortments and other	1,000 lb	S
2064300	Nonchocolate-type confectionery	1,000 lb	S
2064311	Hard candy	1,000 lb	S
2064312	Chewy candy (including granola bars)	1,000 lb	S
2064313	Soft candy	1,000 lb	S
2064314	Iced coated	1,000 lb	S
2064315	Panned	1,000 lb	S
2064316	Licorice and licorice-type	1,000 lb	S
20661	Chocolate coatings	1,000 lb	S
2066111	Chocolate coatings (blocks, wafers, liquid)	1,000 lb	S
2066114	Chocolate liquor	1,000 lb	S
2066121	Compound coatings (blocks, wafers, liquid)	1,000 lb	S
20669	Other chocolate and cocoa products	1,000 lb	S
2066912	Baking chocolate (bars or blocks)	1,000 lb	S
2066913	Chocolate chips and baking pieces	1,000 lb	S
2066961	Cocoa powder (sweetened and unsweetened), syrup, toppings, and other	1,000 lb	S
2066981	Cocoa butter	1,000 lb	S
MA22Q, CARPET AND RUGS			
2273100	Woven carpet and rugs	1,000 sq yd	S
2273220	Tufted carpet and rugs	1,000 sq yd	S
2273201	Scatter rugs, bathmats, and sets (rugs 6 feet x 9 feet and smaller)	1,000 sq yd	S
2273203	Roll goods and rugs larger than 6 feet x 9 feet, excluding artificial grass	1,000 sq yd	S
2273205	Tufted artificial grass for nonathletic surface	1,000 sq yd	S
2273207	Automobile and aircraft carpeting	1,000 sq yd	S
2273300	Other carpet and rugs	1,000 sq yd	S
2273310	Knitted	1,000 sq yd	S
2273320	Needlepunched	1,000 sq yd	S
2273330	Felt	1,000 sq yd	S
2273390	Braided, hooked, and other carpet and rugs, n.e.c.	1,000 sq yd	S
MA23A, APPAREL			
2311500	Men's and junior boys' tailored suits, including casual and uniform	units	P,SV
2311600	Men's and junior boys' overcoats, topcoats, and tailored suburban and car coats	units	P,SV
2311700	Men's and boys' tailored dress and sport coats and tailored vests		P,SV
2311710	Men's and junior boys' tailored suit-type dress and sport coats	units	P,SV
2311720	Men's and junior boys' separate vests, excluding sweater vests	units	P,SV
2321300	Men's and boys' knit shirts, dress and sport	dozens	P,SV
2321320	Men's and junior boys' knit T-shirts and tank tops made for outerwear	dozens	P,SV
2321340	Men's and junior boys' sweatshirts	dozens	P,SV
2321310	All other men's and junior boys' knit shirts, except sweatshirts	dozens	P,SV
2321600	Men's and boys' woven dress and sport shirts	dozens	P,SV
2321610	Men's and junior boys' woven dress and business shirts	dozens	P,SV
2321620	Men's and junior boys' woven sport shirts	dozens	P,SV
2322100	Men's and boys' underwear	dozens	P,SV
2322160	Men's and junior boys' thermal underwear	dozens	P,SV

2816313	Chrome oxide green (c.p.) -----	short tons	S
2816315	Chrome yellow and orange (c.p.) -----	short tons	S
2816317	Molybdate chrome orange (c.p.) -----	short tons	S
2816318	Zinc yellow (zinc chromate) (c.p.) -----	short tons	S
2816319	Other chrome colors (c.p.) -----	short tons	S
2819300	Sulfuric acid, gross (new and fortified) (100 percent basis) -----	short tons	S
2819400	Inorganic acids, except nitric, sulfuric, and phosphoric -----		SV
2819411	Boric (boracic) (100 percent basis) -----	short tons	S
2819421	Chlorosulfonic (100 percent basis) -----	short tons	S
	Hydrochloric (including anhydrous): -----		
2819441	From salt and acid -----	short tons	S
2819445	From chlorine and hydrogen -----	short tons	S
2819447	Byproduct and other -----	short tons	S
2819451	Hydrocyanic, including anhydrous (100 percent basis) -----	short tons	S
	Hydrofluoric: -----		
2819461	Anhydrous -----	short tons	S
2819465	Technical -----	short tons	S
2819467	Mixed (sulfuric and nitric) (commodity weight) -----	short tons	S
2819471	Perchloric (100 percent basis) -----	short tons	S
2819498	Other inorganic acids, n.e.c. (including chlorosulfonic and perchloric) -----		SV
2819500	Aluminum oxide, except natural alumina (100 percent basis) -----	short tons	S
2819600	Other aluminum compounds -----		SV
	Chloride: -----		
2819613	Liquid and crystal (100 percent basis) -----	short tons	S
2819617	Anhydrous (100 percent basis) -----	short tons	S
2819625	Hydroxide, trihydrate (100 percent basis) -----	short tons	S
2819627	Fluoride (technical) -----	short tons	S
	Sulfate: -----		
2819651	Commercial (17 percent basis) including municipalities -----	short tons	S
2819655	Iron-free (17 percent basis) -----	short tons	S
2819673	Aluminates (sodium aluminate, potassium aluminate, etc.) (100 percent by weight) -----	short tons	S
2819679	Other inorganic aluminum compounds (light aluminum hydroxide, cryolite, etc.) -----	short tons	S
2819700	Potassium and sodium compounds (except bleaches, alkalies, and alums) -----		SV
	Potassium compounds, n.e.c.: -----		
2819713	Iodide (100 percent basis) -----	short tons	S
2819716	Sulfate (100 percent basis) -----	short tons	S
2819718	Pyrophosphate (tetrapotassium pyrophosphate) (100 percent basis) -----	short tons	S
2819719	Potassium silicates (100 percent by weight) -----	short tons	S
2819720	Potassium bromides (100 percent by weight) -----	short tons	S
2819723	Potassium phosphates (100 percent by weight) -----	short tons	S
2819724	Potassium silicates (100 percent by weight) -----		SV
2819717	Other potassium salts, n.e.c. (including potassium, chlorate, nitrate, and perchlorate) -----		SV
2819721	Sodium (metal) (100 percent basis) -----	short tons	S
	Sodium compounds, n.e.c.: -----		
2819727	Chlorate (100 percent basis) -----	short tons	S
2819728	Bromides (100 percent by weight) -----	short tons	S
2819729	Hydrosulfide (sodium sulfhydrate) (100 percent basis) -----	short tons	S
2819730	Hydrosulfite (100 percent basis) -----	short tons	S
2819731	Cyanides and cyanide oxides (100 percent by weight) -----	short tons	S
	Phosphate: -----		
2819732	Monobasic (100 percent basis) -----	short tons	S
2819733	Dibasic (100 percent basis) -----	short tons	S
2819734	Tribasic (100 percent basis) -----	short tons	S
2819735	Tetrabasic (pyro) (100 percent basis) -----	short tons	S
2819736	Meta (100 percent basis) -----	short tons	S
2819737	Acid pyro (100 percent basis) -----	short tons	S
2819738	Tripoly (100 percent basis) -----	short tons	S
2819739	Other sodium phosphates -----		SV
	Silicates: -----		
2819741	Soluble silicate glass (water glass, solid and liquid) (anhydrous) -----	short tons	S
2819742	Metasilicate pentahydrate (100 percent basis) -----	short tons	S
2819744	Metasilicate anhydrous (100 percent basis) -----	short tons	S
2819745	Orthosilicate (100 percent basis) -----	short tons	S
2819747	Sequisilicate (100 percent basis) -----	short tons	S
2819751	Silicofluoride (100 percent basis) -----	short tons	S
2819761	Sulfate, high purity (100 percent basis) -----	short tons	S
2819766	Sulfate, lower purity and glauber's salt (100 percent basis) -----	short tons	S
2819784	Sulfite (100 percent basis) -----	short tons	S
2819785	Thiosulfate (hypo) (100 percent basis) -----	short tons	S
2819787	Other sodium compounds, n.e.c. (bifluoride, borate, and fluoride) -----		SV

2819911	Cadmium compounds		SV
	Calcium compounds:		
2819912	Carbide (commercial)	short tons	S
2819913	Carbonate (precipitated) (100 percent basis)	short tons	S
2819914	Chloride (100 percent basis)	short tons	S
	Phosphates:		
2819918	Monobasic (100 percent basis)	short tons	S
2819919	Dibasic (100 percent basis)	short tons	S
2819920	Tribasic, animal feed grades	short tons	S
2819922	Tribasic, other grades	short tons	S
2819923	Other inorganic calcium compounds		SV
	Carbon activated:		
2819925	Granular carbons (dry weight)	short tons	S
2819927	Pulverized carbons (dry weight)	short tons	S
	Chromium compounds:		
2819933	Sodium bichromate and chromate (hydrous)	short tons	S
2819934	Other chromium compounds, including potassium bichromate; excluding chrome colors		SV
	Copper compounds:		
2819935	Cuprous oxide (100 percent basis)	short tons	S
2819936	Copper hydroxides (100 percent by weight)	short tons	S
2819937	Other copper compounds, including copper cyanide and copper sulfate		SV
2819938	Gold compounds	short tons	SV
2819939	Hydrogen peroxide (100 percent by weight)	short tons	S
2819940	Iodine, crude or resublimed (100 percent basis)	pounds	S
	Iron compounds:		
2819942	Ferric chloride (100 percent basis)	short tons	S
2819943	Iron oxides and hydroxides (100 percent by weight)	short tons	S
2819944	Other iron compounds, including ferrous sulfate		SV
2819945	Lithium compounds		SV
	Magnesium compounds:		
2819948	Chloride (100 percent basis)	short tons	S
2819949	Sulfate (100 percent basis)	short tons	S
2819950	Other magnesium compounds, including magnesium and epsom salts		SV
	Manganese compounds:		
2819951	Dioxides (100 percent basis)	short tons	S
2819952	Other manganese compounds, including potassium, and manganese sulfate		SV
	Mercury and compounds:		
2819953	Mercury, redistilled (100 percent by weight)	pounds	S
2819954	Other mercury compounds, including mercuric oxide; excluding mercuric fulminate and medicinal grades		SV
	Molybdenum compounds:		
281995A	Oxides (100 percent by weight)	short tons	S
281995B	Molybdates (ammonium molybdate, sodium molybdate, etc.) (100 percent by weight)	short tons	S
281995C	Other molybdenum compounds		SV
	Nickel compounds:		
2819956	Oxides and hydroxides (100 percent by weight)	short tons	S
2819957	Chloride (100 percent basis)	short tons	S
2819955	Sulfate (100 percent basis)	short tons	S
2819959	Other nickel compounds		SV
	Phosphorus and compounds:		
2819958	Phosphorus, elemental (technical)	short tons	S
2819960	Oxychloride (100 percent basis)	short tons	S
2819961	Pentasulfide (100 percent basis)	short tons	S
2819963	Trichloride (chloride) (100 percent basis)	short tons	S
2819964	Other phosphorus compounds, including phosphorus pentoxide		SV
2819965	Rare earth compounds		SV
	Silicon compounds:		
2819966	Silicon tetrachloride (silted) (100 percent basis)	short tons	S
2819967	Silica gel		SV
2819968	Other silicon compounds		SV
2819973	Silver compounds		SV
	Strontium compounds:		
2819971	Carbonate (100 percent basis)	short tons	S
2819972	Other strontium compounds		SV
	Sulfur and sulfur compounds:		
2819974	Sulfur, recovered elemental (by weight)	metric tons	S
2819975	Sulfur dioxide (produced for sale) (100 percent basis)	short tons	S
2819978	Other sulfur compounds, including sulfur chloride		SV
	Tin compounds:		
2819982	Chloride (100 percent basis)	short tons	S
2819983	Other tin compounds		SV
	Tungsten compounds:		
2819984	Tungstates (ammonium tungstate, sodium tungstate, etc.) (100 percent by weight)	short tons	S
2819985	All other tungsten compounds		SV
	Zinc compounds:		
2819986	Oxide and peroxide (100 percent by weight)		SV
2819987	Sulfate (100 percent basis)	short tons	S
2819988	Chloride (100 percent basis)	short tons	S
2819989	Other zinc compounds, excluding pigment grades		SV
2819990	Platinum, radium, tantalum, and thallium		SV
2819998	All other inorganic chemicals, including nuclear fuels, titanium tetrachloride and other titanium compounds		SV
2842243	Household liquid bleaches (sodium hypochlorite, etc.)		SV
2842253	Household dry bleaches (calcium hypochlorite, etc.)		SV
	MA28B, FERTILIZER MATERIALS		
2819300	Sulfuric acid, gross (new and fortified)		SV
	Oleum grades:		
2819311	Oleum, less than 40 percent	short tons	S
2819315	Oleum, 40 percent	short tons	S
2819317	Oleum, more than 40 percent	short tons	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-5

Product code	CIR and product description	Unit of measure	Data collected
	MA28B, FERTILIZER MATERIALS—Con.		
2819300	Sulfuric acid, gross (new and fortified)—Con.		SV
2819331	Other than oleum -----	short tons	S
2873100	Synthetic ammonia, nitric acid, and ammonium compounds -----		SV
2873111	Nitric acid (100 percent basis)-----	short tons	S
2873131	Ammonia, synthetic anhydrous:-----		
2873130	Fertilizer use -----	short tons	S
2873132	Other uses -----	short tons	S
	Ammonium compounds:		
	Chloride:		
2873141	Gray -----	short tons	S
2873143	White -----	short tons	S
	Nitrate:		
2873142	Solution produced for sale as such for direct application -----	short tons	S
2873144	Solution produced for consumption in the manufacture of nitrogen solutions or other fertilizer materials -----	short tons	S
2873146	Solid (excluding fertilizer grade material sold for explosive uses) -----	short tons	S
2873148	Explosives and other uses (solution and solid) -----	short tons	S
	Ammonium sulfate:		
2873156	Synthetic -----	short tons	S
2873158	Nitrogen solutions: -----	short tons	S
	Nitrogen solutions:		
2873165	Solutions containing ammonia -----	short tons	S
2873166	Ammonium nitrate/urea solutions -----	short tons	S
2873173	Ammonium nitrate/ calcium nitrate solutions -----	short tons	S
2873175	All other two-component products -----	short tons	S
2873177	Other ammonium compounds (including ammonium chloride, gray and white) -----		SV
2873200	Urea (100 percent) -----		SV
	Fertilizer use:		
2873216	Solutions produced as intermediate in nitrogen solutions -----	short tons	S
2873218	Solid -----	short tons	S
	Other uses:		
2873221	Feed (solid and solution) -----	short tons	S
2873222	All other (solid and solution) -----	short tons	S
2874100	Phosphoric acid (100 percent basis) -----		SV
2874181	Thermal -----	short tons	S
2874185	Wet -----	short tons	S
2874200	Superphosphate and other phosphatic fertilizer materials (100 percent basis) -----		SV
2874215	Normal and enriched superphosphates -----	short tons	S
2874241	Concentrated superphosphates -----	short tons	S
2874251	Monoammonium phosphates -----	short tons	S
2874252	Diammonium phosphates -----	short tons	S
2874255	Other ammonium phosphates -----	short tons	S
2874261	Other phosphatic fertilizer materials -----	short tons	S
2874271	Phosphate, tribasic, animal feed grades (defluorinated phosphate rock) -----	short tons	S
	MA28C, INDUSTRIAL GASES		
2813200	Acetylene -----		SV
2813211	Produced for compression, including cylinder and pipeline -----	mil cu ft	S
2813221	Produced for pipeline shipment (excluding that shipped to be compressed) -----	mil cu ft	S
2813300	Carbon dioxide -----		SV
2813301	Gas -----	short tons	S
2813302	Liquid -----	short tons	S
2813331	Solid (dry ice) -----	short tons	S
2813500	Nitrogen -----		SV
	Gas:		
2813522	Pipeline and onsite use -----	mil cu ft	S
2813524	Produced for consumption in this plant -----	mil cu ft	S
	Liquid:		
2813532	Produced for consumption in this plant -----	mil cu ft	S
2813534	Produced for other shipments or uses -----	mil cu ft	S
2813600	Oxygen -----		SV
	Gas:		
2813622	Produced for pipeline and onsite use -----	mil cu ft	S
2813624	Produced for consumption in this plant -----	mil cu ft	S
	Liquid:		
2813612	Produced for merchant shipment -----	mil cu ft	S
2813632	Produced for consumption in this plant -----	mil cu ft	S
2813634	Produced for other shipments or uses -----	mil cu ft	S
2813700	Elemental gases and other industrial gases, n.e.c.-----		SV
2813715	Argon, high purity produced for cylinder and bulk delivery, pipeline shipment -----	mil cu ft	S
	Hydrogen:		
	Gas:		
2813722	Produced for merchant shipment -----	mil cu ft	S
2813732	Produced for pipeline and on-site use -----	mil cu ft	S
2813742	Produced for consumption in this plant -----	mil cu ft	S
	Liquid:		
2813752	Produced for merchant shipment -----	mil cu ft	S
2813762	Produced for other shipments or uses -----	mil cu ft	S
	MA28F, PAINT, VARNISH, AND LACQUER		
2851100	Architectural coatings -----		SV
	Exterior solvent-type:		
2851112	Solvent thinned paints and tinting bases, including barn and roof paints -----	1,000 gal	S
2851115	Solvent thinned enamels and tinting bases, including interior-exterior floor -----	1,000 gal	S
2851125	Solvent thinned undercoaters and primers -----	1,000 gal	S
2851135	Solvent thinned clear finishes -----	1,000 gal	S
2851137	Solvent thinned stains, including shingle and shake -----	1,000 gal	S
2851139	Other exterior solvent thinned coatings, including bituminous paints -----	1,000 gal	S
	Exterior water-type:		
2851141	Water thinned paints and tinting bases, including barn and roof paints -----	1,000 gal	S
2851142	Water thinned interior-exterior deck and floor enamel -----	1,000 gal	S
2851144	Water thinned undercoaters and primers -----	1,000 gal	S
2851149	Water thinned stains -----	1,000 gal	S
2851155	Other exterior water thinned coatings -----	1,000 gal	S

	Interior water-type:		
2851181	Flat water thinned paints and tinting bases	1,000 gal	S
2851183	Semigloss, eggshell, satin, and other gloss water thinned paints and tinting	1,000 gal	S
2851186	Water thinned undercoaters and primers	1,000 gal	S
2851188	Other interior water thinned coatings	1,000 gal	S
2851193	Architectural lacquers	1,000 gal	S
2851200	Product finishes for original equipment manufacturers (OEM), excluding marine		SV
2851222	Automobile finishes	1,000 gal	S
2851223	Truck, bus, and recreational vehicle finishes	1,000 gal	S
2851225	Other transportation equipment finishes, including aircraft and railroad	1,000 gal	S
2851235	Appliance, heating equipment, and air-conditioner finishes	1,000 gal	S
2851237	Wood furniture, cabinet, and fixture finishes	1,000 gal	S
2851239	Wood and composition board flat stock finishes	1,000 gal	S
2851241	Sheet, strip, and coil coatings, including siding	1,000 gal	S
2851243	Container and closure finishes	1,000 gal	S
2851247	Machinery and equipment finishes, including road building equipment and farm implements	1,000 gal	S
2851249	Nonwood furniture and fixture finishes, including business equipment finishes	1,000 gal	S
2851252	Paper, paperboard, film, and foil finishes, excluding pigment binders	1,000 gal	S
2851253	Electrical insulating coatings	1,000 gal	S
2851255	Powder coatings	1,000 lb	S
2851267	Other industrial product finishes, excluding semimanufactured products	1,000 gal	S
2851300	Special-purpose coatings, including all marine coatings		SV
	Industrial new construction and maintenance paints:		
2851301	Interior	1,000 gal	S
2851305	Exterior	1,000 gal	S
2851311	Traffic marking paints (all types, shelf goods, and highway department)	1,000 gal	S
2851313	Automotive, other transportation, and machinery refinish paints and enamels	1,000 gal	S
2851315	Marine paints, ship and offshore facilities and shelf goods for new construct	1,000 gal	S
2851331	Aerosol paint concentrates produced for packaging in aerosol containers	1,000 gal	S
2851500	Miscellaneous allied paint products		SV
2851523	Paint and varnish removers	1,000 gal	S
2851531	Thinners for dopes, lacquers, and oleoresinous thinners	1,000 gal	S
2851533	Pigment dispersions	1,000 gal	S
2851598	Other miscellaneous allied paint products, including brush cleaners	1,000 gal	S
	MA28G, PHARMACEUTICAL PREPARATIONS, EXCEPT BIOLOGICALS		
2834100	Pharmaceutical preparations affecting neoplasms, endocrine system, and metabolic diseases, for human use		SV
	Hormones and synthetic substitutes:		
	Corticoids:		
2834111	Systemic		SV
2834115	Local and topical including anti-infective combinations		SV
2834117	Androgens		SV
2834119	Estrogens		SV
2834121	Insulin and antidiabetic agents		SV
2834125	Acth (corticotropin)		SV
2834127	Oral contraceptive preparations		SV
2834129	Progestogens (excludes premenstrual tension preparations)		SV
2834131	Sex hormone combinations, except progestogen combinations		SV
2834135	Thyroid and antithyroid preparations, including iodides		SV
2834137	Anabolic agents		SV
2834139	Other hormone preparations		SV
	Antineoplastic agents:		
2834143	Radioactive isotopes for internal use		SV
2834145	Specific antineoplastic agents		SV
2834198	Other pharmaceutical preparations affecting neoplasms		SV
2834200	Pharmaceutical preparations acting on the central nervous system and the sense organs, for human use		SV
2834211	Parasympathomimetic cholinergic drugs		SV
2834213	Skeletal muscle relaxants		SV
	Internal analgesics and antipyretics:		
	Narcotic:		
2834219	Opium and derivatives		SV
2834220	Synthetic narcotics		SV
	Non-narcotic:		
2834222	Aspirin (acetylsalicylic acid)		SV
2834224	Other salicylates, such as sodium salicylate		SV
2834225	Aspirin combinations		SV
2834226	Acetaminophen and combinations		SV
2834227	Antiarthritics (nonhormonal)		SV
2834228	Other internal analgesics and antipyretics, including effervescent types		SV
2834241	Anticonvulsants, except phenobarbital		SV
	Psychotherapeutic agents:		
2834251	Antidepressants		SV
	Tranquilizers:		
2834255	Phenothiazine derivatives		SV
2834257	Other tranquilizers		SV
2834259	Other psychotherapeutic agents		SV
	Central nervous systems stimulants:		
2834261	Amphetamines		SV
2834263	Anorexiant, except amphetamines		SV
2834269	Other central nervous system stimulants		SV
	Sedatives, anxiolytics, and hypnotics:		
	Prescription:		
2834271	Barbiturates		SV
2834275	Nonbarbiturates		SV
	Nonprescription:		
2834277	Sleep inducers		SV
2834279	Calming agents		SV
	Anesthetics:		
2834281	Local and topical		SV
2834285	General		SV
	Eye and ear preparations:		
2834291	Mydriatics and miotics		SV
2834293	Contact lens solutions		SV
2834294	Other eye and ear preparations		SV

Product code	CIR and product description	Unit of measure	Data collected
	MA28G, PHARMACEUTICAL PREPARATIONS, EXCEPT BIOLOGICALS—Con.		
2834200	Pharmaceutical preparations acting on the central nervous system and the sense organs, for human use—Con.		SV
2834298	Other pharmaceutical preparations acting on the central nervous system		SV
2834300	Pharmaceutical preparations acting on the cardiovascular system, for human use		SV
2834311	Anticoagulants		SV
2834321	Hemostatics		SV
2834331	Digitalis preparations		SV
	Hypotensives:		
2834343	Rauwolfia-alkaloid preparations		SV
2834347	Beta receptor blocking agents		SV
2834348	Other hypotensives		SV
	Vasodilators:		
2834351	Coronary		SV
2834355	Peripheral		SV
2834361	Antiarrhythmics, such as propranolol and quinidine		SV
2834371	Calcium channel blockers such as isoptin, calan, procardia, cardizem, and adalat		SV
2834381	Ace inhibitors such as vasotec, capoten, prinvil, and zestril		SV
2834397	Other pharmaceutical preparations acting on the cardiovascular system		SV
2834400	Pharmaceutical preparations acting on the respiratory system, for human use		SV
2834411	Antihistamines, except cold preparations and antiemetics		SV
2834415	Bronchial dilators, including antiasthmatics		SV
	Cough and cold preparations (prescription):		
	Cough preparations and expectorants containing an antitussive:		
2834421	Narcotic		SV
2834425	Non-narcotic		SV
	Cold preparations not containing an antitussive:		
2834431	Nasal decongestants		SV
2834435	Antihistamine cold preparations		SV
2834439	Other prescription cold preparations		SV
2834441	Cough and cold combinations (prescription)		SV
	Cough and cold preparations (nonprescription):		
	Decongestants:		
2834451	Nasal sprays		SV
2834455	Nose drops		SV
2834459	Other decongestants		SV
2834461	Cough syrups		SV
2834463	Capsules and tablets		SV
2834465	Lozenges		SV
2834467	Topical preparations		SV
2834471	Cough drops		SV
2834479	Other nonprescription cough and cold preparations		SV
2834481	Decongestants, beta agonists such as proventil and ventolin		SV
2834498	Other pharmaceutical preparations acting on the respiratory system, for human use		SV
2834500	Pharmaceutical preparations acting on the digestive or genito-urinary systems		SV
	Digestive system preparations:		
2834511	Enzymes		SV
2834515	Antacids, including acid neutralizing products with coating functions		SV
2834519	Antidiarrheals		SV
	Laxatives:		
2834521	Irritants		SV
2834523	Bulk producing		SV
2834525	Fecal softeners		SV
2834527	Emollients		SV
2834528	Saline		SV
2834529	Enema specialties		SV
2834531	Digestants		SV
2834533	Bile therapy preparations, including bile products, cholagogics, and cholegogics		SV
2834535	Antinauseants and motion sickness remedies, including antihistaminic antiemetics preparations		SV
2834537	Lipotropics and cholesterol reducers		SV
2834539	Diet aids containing local anesthetics such as benzocaine		SV
	Antispasmodics and anticholinergics:		
2834541	Synthetics		SV
2834543	Ataractic combinations		SV
2834545	Belladonna and derivatives		SV
2834547	Digestive system preparations, h2 blocking agents such as zantac, tagamet, carafate, and pepcid		SV
2834549	Other antispasmodics and anticholinergics		SV
2834558	Other digestive system preparations, including emetics		SV
	Genito-urinary preparations:		
2834561	Urinary antibacterials and antiseptics		SV
	Diuretics:		
2834571	Thiazides and related agents		SV
2834573	Other diuretics		SV
2834581	Oxytocics		SV
2834583	Contraceptive agents, except oral contraceptives (aerosols, gels, sponges, and creams)		SV
2834585	Premenstrual tension preparations		SV
2834587	Vaginal cleaners		SV
2834598	Other pharmaceutical preparations acting on the genito-urinary system		SV
2834600	Pharmaceutical preparations acting on the skin, for human use		SV
	Dermatological preparations:		
2834611	Emollients and protectives, including burn remedies and ointment bases		SV
2834613	Antipruritics and local anesthetic skin preparations		SV
2834615	Coal tar, sulfur, and resorcinol preparations		SV
2834616	Antiacne preparations		SV
2834618	Antidandruff and antiseborrheic preparations, except dandruff shampoos		SV
2834619	Other dermatological preparations		SV
2834621	Hemorrhoidal preparations		SV
	External analgesics and counterirritants:		
2834631	Ointments, jellies, pastes, creams, cerates, and salves		SV
2834635	Liquid (excluding rubbing alcohol but including liniments)		SV
2834637	Rubbing alcohol		SV
2834639	Other external analgesics and counterirritants		SV
2834698	Other pharmaceutical preparations acting on the skin, for human use		SV
2834700	Vitamin, nutrient, and hematinic preparations, for human use		SV
	Vitamins:		
2834711	Multivitamins, plain and with minerals, except B-complex vitamins and fish liver oils		SV
2834713	Pediatric vitamin preparations (drops, suspensions, and chewable tablets)		SV
2834714	Prenatal vitamin preparations		SV
2834715	B-complex preparations		SV
2834717	Fluoride preparations		SV
2834719	All other vitamin preparations		SV
2834721	Fish liver oils (cod, etc.)		SV
2834731	Nutrients, excluding therapeutic dietary foods and infant formulas		SV
2834741	Tonics and alteratives		SV
	Hematinics:		
	With B-12:		
2834751	Oral		SV
2834753	Parenteral		SV

Product code	CIR and product description	Unit of measure	Data collected
	MA28G, PHARMACEUTICAL PREPARATIONS, EXCEPT BIOLOGICALS—Con.		
2834700	Vitamin, nutrient, and hematonic preparations, for human use—Con.		SV
	Hematinics—Con.		
	Other hematinics:		
2834755	Oral		SV
2834757	Parenteral		SV
2834761	Hospital solutions, including dextran, etc.		SV
2834798	Other vitamin, nutrient, and hematonic preparations, for human use		SV
2834800	Pharmaceutical preparations affecting parasitic and infective diseases, for human use		SV
	Anti-infective agents:		
2834811	Amebicides and trichomonocides		SV
2834815	Anthelmintics		SV
	Systemic antibiotic preparations, broad and medium spectrum:		
2834820	Tetracyclines, including chlortetracycline and congeners		SV
2834822	Cephalosporins, such as cefamandole nafate and cephalexin		SV
2834824	Erythromycins		SV
2834826	Injectable semisynthetic penicillins, including amoxicillins and ampicillins		SV
2834828	Other forms of semisynthetic penicillins		SV
2834830	Other injectable penicillins		SV
2834832	Other forms of penicillins		SV
2834834	Other broad and medium spectrum antibiotics (except sulfa-antibiotic combinations)		SV
2834836	Antibiotics in combination with sulfonamides		SV
2834838	Other systemic antibiotic preparations, including narrow spectrum antibiotics		SV
2834841	Topical antibiotic preparations		SV
	Tuberculostatic agents:		
2834851	Isoniazid (isonicotinic acid hydrazide) preparations		SV
2834855	Other antituberculars		SV
2834861	Antimalarials (plasmodicides)		SV
2834863	Sulfonamides, except antibiotic-sulfonamide combinations		SV
2834865	Antifungal preparations		SV
2834867	Antivirals, systemic, such as zovirax and retrovir		SV
2834869	Other anti-infective agents		SV
	Antibacterials and antiseptics:		
2834871	General		SV
2834875	Mouth and throat preparations		SV
2834898	Other pharmaceutical preparations affecting parasitic and infective diseases, for human use		SV
2834900	Pharmaceutical preparations for veterinary use		SV
2834911	Anesthetics		SV
2834921	Anthelmintics		SV
	Antibiotics:		
2834922	Tetracyclines		SV
2834924	Penicillins		SV
2834926	Other antibiotics		SV
2834927	Antiseptics, wound dressings, and fungicides		SV
2834931	Hematinics		SV
2834933	Hemostatics		SV
	Hormones:		
2834934	Insulin preparations		SV
2834935	ACTH (corticotropin) preparations		SV
2834938	Other hormone preparations		SV
2834939	Intravenous solutions and electrolytes		SV
2834941	Nitrofurans		SV
2834943	Nutrients and tonics		SV
2834945	Parasitocides, external		SV
2834947	Sulfonamides		SV
2834951	Tranquilizers and ataractics		SV
2834955	Vitamins and minerals		SV
2834998	Other pharmaceutical preparations for veterinary use		SV
	MA31A, FOOTWEAR		
3021400	Protective footwear		SV
	Rubber uppers:		
3021415	Boots, lumberman and pacs	1,000 pairs	S
3021417	Arctics and gaiters, light and heavy rubbers	1,000 pairs	S
	Plastics or fabrics uppers:		
3021425	Slush molded	1,000 pairs	S
3021427	Injection molded	1,000 pairs	S
3021429	Other	1,000 pairs	S
3021500	Shoes with rubber or plastics soles vulcanized, molded, or cemented to fabrics uppers	1,000 pairs	S
	Athletic:		
3021521	Men's	1,000 pairs	S
3021523	Women's	1,000 pairs	S
3021525	Other	1,000 pairs	S
	Nonathletic:		
3021531	Men's	1,000 pairs	S
3021533	Women's	1,000 pairs	S
3021535	Other	1,000 pairs	S
3142060	Slippers (except slipper socks)	1,000 pairs	S
3142061	Men's	1,000 pairs	S
3142062	Women's	1,000 pairs	S
3142063	All other	1,000 pairs	S
3143000	Men's nonrubber footwear, except athletic		SV
3143010	Dress and casual	1,000 pairs	S
3143021	Boots, dress and casual, except western style	1,000 pairs	S
3143022	Western style boots	1,000 pairs	S
3143030	Work oxfords	1,000 pairs	S
3143040	Workshoes, ankle height or higher	1,000 pairs	S
3144000	Women's nonrubber footwear, except athletic		SV
3144010	Sandals	1,000 pairs	S
3144020	Dress and casual, except sandals	1,000 pairs	S
3144030	Uniform duty shoes	1,000 pairs	S
3144040	Boots, ankle height or higher	1,000 pairs	S
3149010	Athletic footwear, except rubber sole/ fabrics upper	1,000 pairs	S
3149011	Men's	1,000 pairs	S
3149013	Women's	1,000 pairs	S
3149015	All other	1,000 pairs	S
3149020	All other nonrubber footwear		SV
3149021	Youth's and boys', except athletic		SV
3149022	Misses' and boots, except athletic	1,000 pairs	S
3149023	Children's shoes and boots, except athletic	1,000 pairs	S
3149024	Infants' and babies'	1,000 pairs	S
3149029	All other (ballet, theatrical, etc.)	1,000 pairs	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-9

Product code	CIR and product description	Unit of measure	Data collected
MQ32A, FLAT GLASS			
3211500	Flat glass (float, sheet, and plate) -----		SV
3211512	Up to and including .107 inch -----	1,000 sq ft	S
3211513	.108 inch through .134 inch -----	1,000 sq ft	S
3211514	.135 inch through .199 inch -----	1,000 sq ft	S
3211515	.200 inch through .244 inch -----	1,000 sq ft	S
3211516	More than .244 inch -----	1,000 sq ft	S
MQ32C, REFRACTORIES			
3255000	Clay refractories -----		SV
	Bricks and shapes: -----		
3255011	Fire clay (including semisilica) brick and clay, except super-duty -----	1,000 brk equiv	S
3255016	Bloating and super-duty fire clay brick and shapes -----	1,000 brk equiv	S
3255025	High alumina brick and shapes, including high alumina ladle brick -----	1,000 brk equiv	S
3255033	Pouring pit refractories, fire clay, and high alumina -----	1,000 brk equiv	S
	Insulating fire brick and shapes: -----		
3255035	Below 2600 degrees F -----	1,000 brk equiv	S
3255037	2600 degrees F or higher -----	short tons	S
3255049	Clay kiln furniture, radiant heater elements, potters' supplies -----	short tons	S
	Unshaped clay refractories: -----		
3255055	Refractory bonding mortars wet and dry, less than 50 percent alumina -----	short tons	S
3255057	High alumina bonding mortars, wet and dry, 50 percent alumina or more -----	short tons	S
3255061	Plastics refractories and ramming mixes, less than 50 percent alumina -----	short tons	S
3255064	High alumina plastics refractories and ramming mixes, 50 percent alumina or more -----	short tons	S
3255066	Phosphate bonded high alumina, plastics, and ramming mixes, 50 percent alumina -----	short tons	S
	Castable refractories (hydraulic setting): -----		
3255065	Castable refractories (hydraulic setting) less than 50 percent alumina -----	short tons	S
3255067	High alumina castable refractories (hydraulic setting) 50 percent alumina or more -----	short tons	S
3255069	Insulating castables (hydraulic setting) (density up to 105 pounds per cubic foot) -----	short tons	S
3255070	Insulating gunning mixes (hydraulic setting) -----	short tons	S
3255071	Fine clay gunning mixes (hydraulic setting gunning mixes) less than 50 percent alumina, bauxite, or kyanite -----	short tons	S
3255075	High alumina gunning mixes, 50 percent or more alumina, bauxite, or kyanite -----	short tons	S
	Other refractory raw materials and refractory materials: -----		
3255085	Clay and high alumina refractory materials -----	short tons	S
3255095	Clay and high alumina refractory raw materials -----	short tons	S
3274071	Dead-burned dolomite -----	short tons	S
3295020	Dead-burned magnesia or magnesite -----	short tons	S
3295023	Domestic shipments for direct use as finished refractory products -----	short tons	S
3295025	All other domestic shipments predominantly for use as a refractory raw material -----	short tons	S
3297000	Nonclay refractories -----		SV
	Brick and shapes: -----		
3297012	Silica brick and shapes -----	1,000 brk equiv	S
3297013	Magnesite-carbon brick and shapes (predominantly pitch or resin bonded) -----	1,000 brk equiv	S
3297014	Magnesite-carbon brick and shapes, 7 percent carbon and over (predominantly pitch and resin bonded) -----	1,000 brk equiv	S
3297015	Magnesite brick and shapes, burned and unburned -----	1,000 brk equiv	S
3297017	Carbon impregnated magnesite brick and shapes -----	1,000 brk equiv	S
3297019	Magnesite-chrome brick and shapes, high-fired (3050 degrees F or above) -----	1,000 brk equiv	S
3297020	Magnesite-chrome brick and shapes, including burned and unburned brick -----	1,000 brk equiv	S
3297033	Carbon and graphite crucibles, retorts, stopper heads, brick, block, and others -----	1,000 brk equiv	S
3297048	Silicon carbide kiln furniture (made predominantly of silicon carbide) -----	1,000 brk equiv	S
3297049	Silicon carbide bricks and shapes (made predominantly of silicon carbide) -----	1,000 brk equiv	S
3297052	Mullite brick and shapes (made predominantly of synthetic or fused mullites) -----	1,000 brk equiv	S
3297053	Extra-high alumina brick and shapes and extra-high alumina pouring pit refractories -----	1,000 brk equiv	S
3297055	Zircon and zirconia brick and shapes (made predominantly of either material) -----	1,000 brk equiv	S
3297058	All other brick and shapes, including basic pouring pit refractories -----	1,000 brk equiv	S
	Unshaped nonclay refractories: -----		
	Mortars: -----		
3297061	Basic bonding mortars (made predominantly of magnesite or chrome ore) and other nonclay mortars -----	short tons	S
3297062	Extra-high alumina mortars (made predominantly of fused or synthetic alumina -----	short tons	S
3297063	Other nonclay mortars (forsterite, zircon, and silica) -----	short tons	S
	Plastics refractories and ramming mixes: -----		
3297064	Extra-high alumina plastics and ramming mixes (fused or synthetic aluminas) -----	short tons	S
3297065	Basic castables, plastics and ramming mixes (wet and dry types) -----	short tons	S
3297066	Extra-high alumina phosphate bonded plastics and ramming mixes -----	short tons	S
3297069	Other nonclay plastics refractories and ramming mixes (forsterite, zircon, etc.) -----	short tons	S
3297068	Extra-high alumina castables (hydraulic setting) (fused or synthetic alumina) -----	short tons	S
3297093	Other nonclay refractory castables (hydraulic setting) -----	short tons	S
3297072	Basic nonclay gunning mixes (including chrome, chrome-magnesia, magnesia-chrome, magnesia, and dolomite) -----	short tons	S
	Ceramic refractory fibers: -----		
3297075	1500 to 2000 degrees F -----	short tons	S
3297078	2001 to 2400 degrees F -----	short tons	S
3297080	2401 to 2700 degrees F -----	short tons	S
3297084	2701 to 3000 degrees F -----	short tons	S
	Other nonclay refractory materials in lump or ground form: -----		
3297094	Domestic shipments for direct use by customers refractory and all exported materials -----	short tons	S
3297096	All other domestic shipments of nonclay refractory materials sold in ground form -----	short tons	S
MA32E, CONSUMER, SCIENTIFIC, TECHNICAL, AND INDUSTRIAL GLASSWARE			
3229500	Machine-made pressed and blown consumer glassware -----		SV
3229521	Tumblers -----	dozens	S
3229522	Stemware -----	dozens	S
3229523	Tableware -----	1,000 pieces	S
3229525	Cookware, ovenware, and kitchenware (except microwave specialty pieces) -----	1,000 pieces	S
3229527	Microwave specialty pieces -----	1,000 pieces	S
3229528	Ornamental, decorative, novelty glassware, and smokers' accessories -----	1,000 pieces	S
3229538	Other table, kitchen, art, and novelty glassware (excluding tumblers, stemware) -----		SV
3229539	Interplant transfers and shipments of partially made glass to other glassware plants -----		SV
3229600	Machine-made lighting, automotive, and electronic glassware -----		SV
3229641	Automotive lighting glassware -----		SV
3229643	Search light and other lenses -----	1,000 pieces	S
3229645	Electric light bulb blanks -----	1,000 pieces	S
3229647	Tubing and cane for electric light bulbs and florescent and neon lighting -----	1,000 pieces	S
3229651	Electronic tube blanks, radio, X-ray, etc. (except television) -----	1,000 pieces	S
3229655	Television tube blanks and parts: tubing, cane, and glass parts for electronic -----	1,000 pieces	S
3229657	Lamp chimneys, shades, bowls, globes, parts, and other glassware, interior -----	1,000 pieces	S
3229659	Lamp chimneys, shades, bowls, globes, parts, and other glassware, exterior -----	1,000 pieces	S
3229665	Other lighting and electronic glassware -----	1,000 pieces	S
3229669	Interplant transfers and shipments of partially made glass to other glassware plants -----		SV

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Product code	CIR and product description	Unit of measure	Data collected
MA32E, CONSUMER, SCIENTIFIC, TECHNICAL, AND INDUSTRIAL GLASSWARE—Con.			
3229700	All other machine-made glassware		SV
3229771	Tubing, rods and canes, all types (except electrical and electronic)		SV
3229772	Scientific and laboratory glassware, reusable	1,000 pieces	S
3229774	Scientific and laboratory glassware, disposable	1,000 pieces	S
3229775	Technical and industrial glassware	1,000 pieces	S
3229777	Ophthalmic lens blanks and optical instruments lens blanks	1,000 pieces	S
3229779	Other glassware (radomes, nose cones, nursery bottles, vials, etc.)	1,000 pieces	S
3229789	Interplant transfers and shipments of partially made glassware to other glassware plants		SV
3229800	Handmade pressed and blown glassware		SV
	Consumer:		
3229821	Tumblers	dozens	S
3229822	Stemware	dozens	S
3229823	Tableware	1,000 pieces	S
3229825	Cookware, ovenware, and kitchenware (except microwave specialty pieces)	1,000 pieces	S
3229827	Microwave specialty pieces	1,000 pieces	S
3229828	Ornamental, decorative, novelty glassware, and smokers' accessories	1,000 pieces	S
3229838	Other table, kitchen, art, and novelty glassware (excluding tumblers, stemware)		SV
3229839	Interplant transfers and shipments of partially made glass to other glassware plants		SV
	Lighting, automotive, and electronic glassware:		
3229841	Automotive lighting glassware		SV
3229843	Search light and other lenses	1,000 pieces	S
3229845	Electric light bulb blanks	1,000 pieces	S
3229847	Tubing and cane for electric light bulbs and florescent and neon lighting	1,000 pieces	S
3229851	Electronic tube blanks, radio, X-ray, etc. (except television)	1,000 pieces	S
3229855	Television tube blanks and parts: tubing, cane, and glass parts for electronic products	1,000 pieces	S
3229857	Lamp chimneys, shades, bowls, globes, parts, and other glassware, interior	1,000 pieces	S
3229859	Lamp chimneys, shades, bowls, globes, parts, and other glassware, exterior	1,000 pieces	S
3229865	Other lighting and electronic glassware	1,000 pieces	S
3229869	Interplant transfers and shipments of partially made glassware to other glassware plants	1,000 pieces	S
	All other glassware:		
3229871	Tubing, rods and canes, all types (except electrical and electronic)	1,000 pieces	S
3229872	Scientific and laboratory glassware, reusable	1,000 pieces	S
3229874	Scientific and laboratory glassware, disposable	1,000 pieces	S
3229875	Technical and industrial glassware	1,000 pieces	S
3229877	Ophthalmic lens blanks and optical instruments lens blanks	1,000 pieces	S
3229879	Other glassware (radomes, nose cones, nursery bottles, vials, etc.)	1,000 pieces	S
3229889	Interplant transfers and shipments of partially made glassware to other glassware plants		SV
M32D, CLAY CONSTRUCTION PRODUCTS			
3251011	Brick (building or common and face)	1,000 pieces	S
3251020	Glazed brick and structural hollow tile		SV
3251031	Facing tile (structural) and ceramic glazed brick, including unglazed and salt glazed	1,000 pieces	S
3251061	Structural clay tile, except facing	short tons	S
3253000	Clay floor and wall tile	1,000 sq ft	S
3253005	Glazed, having a facial area greater than 6 square inches but less than 59 square inches	1,000 sq ft	S
3253015	Glazed, having a facial area 59 square inches or greater	1,000 sq ft	S
3253020	Glazed ceramic mosaic tile	1,000 sq ft	S
3253020	Ceramic mosaic tile	1,000 sq ft	S
3253030	Unglazed floor and wall tile	1,000 sq ft	S
3259100	Vitrified clay sewer pipe and fittings	short tons	S
MA33B, STEEL MILL PRODUCTS			
3312200	Ingots and semifinished shapes		SV
	Carbon steel:		
3312211	Ingots	short tons	SQ
	Semifinished products:		
3312213	Blooms, billets, sheet bars, tin mill bars, tube rounds, and skelp	short tons	S
3312219	Wire rods	short tons	S
3312220	Slabs	short tons	S
	Alloy steel:		
3312231	Ingots	short tons	S
	Semifinished products:		
3312237	Blooms, billets, sheet bars, rounds, and skelp	short tons	S
3312239	Wire rods	short tons	S
3312241	Slabs	short tons	S
	Stainless steel:		
3312251	Ingots	short tons	S
	Semifinished products:		
3312256	Blooms, billets, slabs, sheet bars, tube rounds, and skelp	short tons	S
3312259	Wire rods	short tons	S
3312300	Hot-rolled sheet and strip, including tin mill products	short tons	S
	Carbon steel:		
3312311	Hot-rolled sheet, including hot-rolled bands	short tons	S
	Galvanized sheet and strip:		
3312313	Hot-dipped	short tons	S
3312315	Electrolytic	short tons	S
3312317	Electrical	short tons	S
3312318	All other metallic coated sheet and strip, including long ternes	short tons	S
3312319	Hot-rolled strip	short tons	S
	Tin mill products:		
3312324	Black plate	short tons	S
3312326	Electrolytic and hot-dipped tin plate	short tons	S
3312328	Tinfree steel	short tons	S
3312329	All other tin mill products, including short ternes, and foil	short tons	S
	Alloy steel:		
3312331	Hot-rolled sheet	short tons	S
3312335	Hot-dipped galvanized sheet and strip	short tons	S
3312337	All other metallic coated sheet and strip, including electrolytic	short tons	S
3312339	Hot-rolled strip	short tons	S
3312357	Stainless steel	short tons	S
3312400	Hot-rolled bars and bar shapes, plates, structural shapes, and piling	short tons	S
	Carbon steel:		
	Finished products:		
3312413	Plates in cut lengths	short tons	S
3312414	Plates in coils	short tons	S
	Structural shapes (heavy):		
3312415	Wide flange	short tons	S
3312417	Standard heavy shapes	short tons	S
3312418	Sheet piling and bearing piles	short tons	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-11

Product code	CIR and product description	Unit of measure	Data collected
	MA33B, STEEL MILL PRODUCTS—Con.		
3312400	Hot-rolled bars and bar shapes, plates, structural shapes, and piling—Con. Carbon steel—Con.	short tons	S
	Bars:		
3312422	Hot-rolled bars, except concrete reinforcing	short tons	S
3312424	Light structurals (less than 3 inches)	short tons	S
3312426	Concrete reinforcing bars	short tons	S
	Alloy steel:		
3312433	Plates, cut lengths	short tons	S
3312436	Plates in coil	short tons	S
3312438	Structural shapes (3 inches or more)	short tons	S
3312441	Bars, including structural shapes less than 3 inches	short tons	S
	Tool steel:		
3312448	High-speed	short tons	S
3312449	Other than high-speed	short tons	S
	Stainless steel:		
3312453	Plates and structurals	short tons	S
3312461	Bars	short tons	S
3312C00	Other steel mill products (including steel rails, except wire products)	short tons	S
3312C11	Standard tee rails (more than 60 pounds per yard)	short tons	S
3312C13	All other rails, including light (60 pounds per yard or less)	short tons	S
3312C15	Joint bars	short tons	S
3312C17	Tie plates	short tons	S
3312C19	Wheels (rolled and forged)	short tons	S
3312C21	Axles (rolled and forged)	short tons	S
3312C23	Track spikes	short tons	S
3315113	Wire rope and cable	short tons	S
3315134	Carbon steel wire strand	short tons	S
3315133	Wire strand for prestressed concrete	short tons	S
3315135	Other wire strand	short tons	S
33152	Nails and staples	short tons	S
3315500	Steel wire	short tons	S
	Carbon steel:		
3315501	Plain flat wire	short tons	S
3315502	Plain thermally treated round wire, less than 1.5 mm in diameter	short tons	S
3315503	Plain thermally treated round wire, 1.5 mm or more in diameter	short tons	S
3315504	Other plain round wire, less than 1.5 mm in diameter	short tons	S
3315505	Other plain round wire, 1.5 mm or more in diameter	short tons	S
3315506	Other shape plain wire	short tons	S
3315513	Plated or zinc coated round wire, less than 1.5 mm in diameter	short tons	S
3315514	Plated or zinc coated round wire, 1.5 mm or more in diameter	short tons	S
3315515	Other shape plated or zinc coated wire, including flat wire	short tons	S
3315517	Other coated flat wire	short tons	S
3315518	Other coated round wire	short tons	S
3315521	Other coated shape wire	short tons	S
3315537	Alloy steel wire (plain and coated)	short tons	S
	Stainless steel:		
3315552	Round wire, less than 0.75 mm in diameter	short tons	S
3315553	Round wire, 0.75 mm to less than 1.5 mm in diameter	short tons	S
3315554	Round wire, 1.5 mm or more in diameter	short tons	S
3315557	Other shape wire, including flat wire	short tons	S
3315621	Wire fence, woven and welded	short tons	S
3315771	Woven wire netting	short tons	S
3315951	Barbed and twisted wire	short tons	S
3315955	Bale ties	short tons	S
3316700	Cold-rolled steel sheet and strip	short tons	S
	Carbon steel:		
3316711	Cold-rolled sheet	short tons	S
3316715	Cold-rolled strip	short tons	S
	Alloy steel:		
3316731	Cold-rolled sheet	short tons	S
3316735	Cold-finished strip	short tons	S
3316757	Stainless steel	short tons	S
3316800	Cold-finished steel bars and bar shapes	short tons	S
3316811	Cold finished carbon steel	short tons	S
3316831	Cold-finished alloy steel	short tons	S
3316851	Cold-finished stainless steel	short tons	S
3317000	Steel pipe and tubes	short tons	S
	Carbon steel:		
3317014	Line pipe, 16 inch outside diameter or less	short tons	S
3317015	Line pipe, more than 16 inch outside diameter	short tons	S
3317019	Oil country goods	short tons	S
3317021	Seamless pressure tubing	short tons	S
3317022	Welded pressure tubing	short tons	S
3317023	Seamless mechanical tubing	short tons	S
3317024	Welded mechanical tubing	short tons	S
3317027	Structurals	short tons	S
3317029	Miscellaneous, including standard pipe	short tons	S
	Alloy steel:		
3317032	Oil country goods and line pipe	short tons	S
3317043	Pressure tubing	short tons	S
3317045	Mechanical tubing	short tons	S
3317048	Miscellaneous, including standard and structural	short tons	S
	Stainless steel:		
3317061	Seamless pressure tubing	short tons	S
3317062	Welded pressure tubing	short tons	S
3317063	Seamless mechanical tubing	short tons	S
3317064	Welded mechanical tubing	short tons	S
3317065	Other pipe and tube	short tons	S
	MA33L, INSULATED WIRE AND CABLE		
3357A00	Electronic wire and cable	pounds	S
	Electronic coaxial cable, armored or nonarmored:		
3357A10	Rigid	pounds	S
3357A12	Semirigid	pounds	S
	Flexible:		
3357A13	135 degrees C or above temperature rating	pounds	S
3357A14	Below 135 degrees C temperature rating	pounds	S
3357A16	CATV/ broadcast coaxial cable	pounds	S

Product code	CIR and product description	Unit of measure	Data collected
	MA33L, INSULATED WIRE AND CABLE—Con.		
3357A00	Electronic wire and cable—Con.	pounds	S
3357A22	Antenna lead-in wire -----	pounds	S
	Hookup wire:		
3357A23	135 degrees C or above temperature rating -----	pounds	S
3357A25	Below 135 degrees C temperature rating -----	pounds	S
3357A30	Multiconductor electronic wire and cable (shielded or unshielded):		
	Flat and ribbon cable -----	pounds	S
	Other multiconductor electronic wire and cable:		
3357A31	Shielded, 135 degrees C and over temperature rating -----	pounds	S
3357A33	Shielded, under 135 degrees C temperature rating -----	pounds	S
3357A35	Nonshielded, 135 degrees C and over temperature rating -----	pounds	S
3357A37	Nonshielded, under 135 degrees C temperature rating -----	pounds	S
3357B00	Telephone and telegraph wire and cable -----	pounds	S
3357B41	Jumper and distributing frame wire -----	pounds	S
3357B43	Station wire and cable -----	pounds	S
3357B73	Telephone cord sets and cordage -----	pounds	S
3357B52	Inside wiring cable -----	pounds	S
3357B55	Drop and bridle and duct wire -----	pounds	S
3357B68	Rural and urban distribution wire and cable -----	pounds	S
3357B83	Polyethylene covered exchange area and toll cable -----	pounds	S
3357B90	Other telephone and telegraph wire and cable -----	pounds	S
3357800	Power wire and cable -----	pounds	S
3357807	Paper insulated cable (all voltages, all types) -----	pounds	S
	Plastics and rubber insulated:		
	600 volts or less:		
3357808	Portable welding cable -----	pounds	S
3357809	Portable molded and nonmolded cable and cord -----	pounds	S
3357817	Underground distribution cable (UD, URD) -----	pounds	S
3357819	Thermoplastics insulated power cable -----	pounds	S
3357820	Thermoset insulated power cable, armored, rubber and cross-linked -----	pounds	S
3357821	Thermoset insulated power cable, unarmored, rubber -----	pounds	S
3357822	Thermoset insulated power cable, unarmored, cross-linked -----	pounds	S
3357825	Weatherproof cable -----	pounds	S
3357827	Service drop cable, thermoset insulated -----	pounds	S
3357828	Service drop cable, thermoplastics insulated -----	pounds	S
	Over 600 volts:		
3357832	Portable molded rubber sheathed cable (mine shovel cable) -----	pounds	S
3357835	Portable nonmolded cable -----	pounds	S
3357837	Underground distribution cable (UD, URD) -----	pounds	S
3357839	Thermoplastics insulated power cable -----	pounds	S
3357841	Thermoset insulated power cable, over 600 volts to 15 kV, armored, rubber and cross-linked -----	pounds	S
3357842	Thermoset insulated power cable, over 600 volts to 15 kV, unarmored, rubber -----	pounds	S
3357843	Thermoset insulated power cable, over 600 volts to 15 kV, unarmored, cross-linked -----	pounds	S
3357844	Thermoset insulated power cable, over 15 kV (rubber and cross-linked) -----	pounds	S
3357850	Other power wire and cable -----	pounds	S
3357C00	Control and signal wire and cable -----	pounds	S
3357C11	Signal wire and cable -----	pounds	S
	Control wire and cable:		
3357C14	Thermoset insulated -----	pounds	S
3357C17	Thermoplastics insulated -----	pounds	S
3357D00	Building wire and cable -----	pounds	S
	Thermoset insulated:		
3357D36	Rubber (R, RH, RHH, RHW, USE, etc.) -----	pounds	S
3357D37	Cross-linked polyethylene (XHHW) -----	pounds	S
3357D38	Cross-linked polyethylene (USE) -----	pounds	S
	Thermoplastics insulated:		
3357D40	Flame-retardant nylon (THHN, THWN) -----	pounds	S
3357D41	Moisture-resistant (TW) -----	pounds	S
3357D48	Moisture and heat-resistant (THW) -----	pounds	S
3357D51	Service entrance cable (SER, SEU, ASE) -----	pounds	S
	Nonmetallic branch circuit and underground feeder:		
3357D54	Type NM-B -----	pounds	S
3357D55	Type UF and NMC (corrosion resistant) -----	pounds	S
3357D57	Metallic armored cable (all AC types) -----	pounds	S
3357D58	Other building wire and cable -----	pounds	S
3357600	Apparatus wire and cordage -----	pounds	S
	Flexible cordage:		
3357613	Thermoset insulated -----	pounds	S
3357615	Thermoplastics, including thermoplastic elastomers -----		SV
3357642	Extension cord sets -----	pounds	S
3357643	Fixed power supply cords -----	pounds	S
3357644	Detachable power supply cords -----	pounds	S
3357647	Retractable power cords and other -----	pounds	S
3357621	Appliance fixture wire -----	pounds	S
	Appliance wiring material 14 gauge and larger:		
3357623	Thermoset insulated -----	pounds	S
3357624	Thermoplastics insulated -----	pounds	S
3357628	Submersible pump cable -----	pounds	S
3357629	Other apparatus wire and cordage, including machine tool wire -----	pounds	S
3357E00	Other insulated wire and cable -----		SV
	Automotive:		
3357E72	Bulk automotive primary wire -----	pounds	S
3357E74	Bulk battery cable -----	pounds	S
3357E76	Bulk ignition wire -----	pounds	S
3357E78	Other automotive wire and cable -----	pounds	S
	Airframe, shipboard, and ground support cable:		
3357E79	Airframe and missile, including ground support cable -----	pounds	S
3357E81	Shipboard cable -----		SV
3357E98	Other insulated or covered wire and cable, n.e.c. -----	pounds	S
3357700	Magnet wire -----	pounds	S
	Film-coated:		
	Class 105:		
3357711	Copper, 7 AWG round and larger (also all square and rectangle) -----	pounds	S
3357713	Copper, 8 to 21 AWG, inclusive -----	pounds	S
3357715	Copper, 22 to 32 AWG, inclusive -----	pounds	S
3357717	Copper, 33 to 44 AWG, inclusive -----	pounds	S
3357719	Aluminum -----	pounds	S
	Class 130 and 155:		
3357720	Copper, 7 AWG round and larger (also all square and rectangle) -----	pounds	S
3357722	Copper, 8 to 21 AWG, inclusive -----	pounds	S
3357724	Copper, 22 to 32 AWG, inclusive -----	pounds	S
3357726	Copper, 33 to 44 AWG, inclusive -----	pounds	S

	Bathtubs:		
3088012	Fiberglass (frp) gel coat	thousands	S
3088013	Fiberglass (frp) acrylic	thousands	S
3088014	Cultured marble	thousands	S
3088015	Other plastics (PVC, ABS)	thousands	S
3088055	Shower receptors	thousands	S
	Shower stalls:		
3088021	Fiberglass (frp) gel coat	thousands	S
3088022	Fiberglass (frp) acrylic	thousands	S
3088023	Other plastics	thousands	S
3088070	Wall surrounds for showers (all materials)	thousands	S
3088071	Wall surrounds for bathtubs (all materials)	thousands	S
	Whirlpool baths:		
3088026	Fiberglass (frp) gel coat	thousands	S
3088027	Fiberglass (frp) acrylic	thousands	S
3088028	Cultured marble	thousands	S
3088029	Other plastics	thousands	S
3088089	Spas (acrylic)	thousands	S
3088020	All other fixtures	thousands	S
3261020	China plumbing fixtures	thousands	S
3261012	Drinking fountains (vitreous china)	thousands	S
3261017	Lavatories (vitreous china)	thousands	S
	Water closet bowls, more than 1.6 gpf consumption:		
3261021	Flushometer	thousands	S
3261024	One piece	thousands	S
3261027	Close couple (for use with flush tank)	thousands	S
3261031	Flush tanks (vitreous china)	thousands	S
3261036	Urinals (vitreous china)	thousands	S
3261054	Wash sinks, service sinks, mop sinks, sink and laundry tray combinations, etc. (vitreous china)	thousands	S
3261080	All other fixtures (made of vitreous china)	thousands	S
3431010	Enameled iron and metal plumbing fixtures	thousands	S
3431015	Drinking fountains	thousands	S
	Lavatories:		
3431017	Cast iron (enameled)	thousands	S
3431018	Steel (enameled)	thousands	S
3431019	Steel (stainless)	thousands	S
3431038	Urinals	thousands	S
	Kitchen sinks:		
3431041	Cast iron (enameled)	thousands	S
3431042	Steel (enameled)	thousands	S
3431047	Steel (stainless)	thousands	S
	Bar sinks:		
3431051	Cast iron (enameled)	thousands	S
3431053	Steel (stainless)	thousands	S
3431054	Wash sinks, service sinks, mop sinks, sink and laundry tray combinations, etc.	thousands	S
	Bathtubs:		
3431061	Cast iron (enameled)	thousands	S
3431062	Steel (enameled)	thousands	S
3431077	Shower receptors	thousands	S
3431074	Shower stalls	thousands	S
	Whirlpool baths:		
3431086	Cast iron (enameled)	thousands	S
3431089	Steel (enameled)	thousands	S
2449099	Hot tubs (noninstitutional), made of wood	thousands	S
3272284	Wash sinks, service sinks, mop sinks, sink and laundry tray combinations, etc., made of concrete and other materials	thousands	S
1900000	Plumbing fixtures made of all other materials	thousands	S
1900102	Drinking fountains	thousands	S
1900103	Lavatories	thousands	S
	Water closet bowls:		
1900202	1.6 gpf or less low consumption	thousands	S
1900104	Close couple, all other consumption rates	thousands	S
1900105	Flush tanks	thousands	S
1900107	Kitchen sinks	thousands	S
1900108	Bar sinks	thousands	S
1900109	Bathtubs	thousands	S
1900110	Shower receptors	thousands	S
1900111	Shower stalls	thousands	S
1922208	Bidets	thousands	S

3523C27	Middlebusters and disc bedders	number	S
3523C29	Attachments for plows (coulters, root cutters, subsoilers, fertilizer distributors, etc.)	number	S
3523C31	Plowshares	number	S
	Harrows, rollers, pulverizers, and similar equipment:		
3523C41	Spike-tooth harrow sections and spring-tooth and tine-tooth harrow sections	number	S
3523C43	Power harrows	number	S
3523C44	Disc harrows, single, tandem, and offset	number	S
3523C53	Combination tillage equipment, roller/harrows, disc or coulters/field cultivators	number	S
3523C54	Blade terracers or scrapers (farm-size)	number	S
3523C59	Land levelers	number	S
3523C61	Other harrows, rollers, pulverizers, and similar equipment	number	S
3523C63	Attachments for harrows, rollers, pulverizers and similar equipment		SV
	Cultivators and weeders:		
3523C70	Corn and cotton type cultivators	number	S
3523C80	Rotary cultivators, ground and power-driven	number	S
3523C90	Field cultivators	number	S
3523C94	Other cultivators and weeders, including tool bars	number	S
3523C98	Attachments for cultivators and weeders (front mounting frame, disc weeders, rear section and drawbars)	number	S
3523E00	All other farm machinery and equipment (excluding parts)	number	S
	Stalk shredders and cutters or rotary movers (pto):		
3523E01	Flail type (without spout)	number	S
	Horizontal-blade type:		
3523E05	66 inch cutting width or less	number	S
3523E07	More than 66 inch up to 100 inch cutting width	number	S
3523E09	More than 100 inch cutting width	number	S
	Machines for preparing crops for market or use:		
3523E11	Feed grinders and crushers, power	number	S
3523E13	Feed mixers, farm-size, stationary and portable	number	S
3523E14	Combination grinder-mixers	number	S
	Driers (grain, hog, seed):		
3523E25	Heated air crop driers	number	S
3523E26	Crop drying fans only	number	S
3523E23	Other machines for preparing crops for market or for use	number	S
3523E24	Attachments for machines for preparing crops for market or for use	number	S
3523970	Parts for machines for preparing crops for market or for use, replacement units only	number	S
	Farm poultry equipment:		
3523E31	Incubators	number	S
3523E33	Brooders, floor and hanging, gas, electric, oil, coal, and wood	number	S
3523E35	Brooders, battery (starting and growing), quantity in number of decks	number	S
3523E39	Poultry feeders	number	S
3523E43	Poultry waterers, except turkey	number	S
3523E48	Other farm poultry equipment	number	S
3523E49	Attachments for farm poultry equipment	number	S
	Hog equipment:		
3523E50	Feeding equipment	number	S
3523E55	Handling equipment	number	S
3523E59	Watering equipment	number	S
3523E61	Other hog equipment	number	S
3523E62	Attachments for hog equipment	number	S
3523E63	Silo and grain bin unloaders	number	S
	Cattle and dairy farm equipment:		
3523E64	Feeding equipment, cattle and dairy barn	number	S
3523E71	Handling equipment, cattle and dairy barn	number	S
3523E79	Water equipment, cattle and dairy barn	number	S
3523E85	Other barn and barnyard equipment	number	S
3523E86	Attachments for barn and barnyard equipment	number	S
	Farm wagons and other farm transportation equipment:		
3523E88	Wagons (chassis only) and trailer gears (except motor trucks), 4-wheel	number	S
	Boxes and racks for mounting or wagons and trailer gears:		
3523E90	Manual unloading or dump	number	S
3523E91	Gravity unloading, grain-type only	number	S
3523E92	Power unloading	number	S
3523E94	Boxes with integral running gear, grain- and forage-type	number	S
3523E95	Other farm transportation equipment	number	S
3523E96	Attachments for farm transportation equipment	number	S
	Irrigation systems:		
3523E98	Self-propelled irrigation systems, center-pivot	number	S
3523E99	All other systems using 100 feet flexible hose feeder line or more	number	S
3523926	Parts for wheel tractors, farm-type (except operator cabs)	number	S
3523931	Parts for farm machinery (except operator cabs and wheel tractors)	number	S
3523930	Parts for farm dairy machines and equipment, replacement units only	number	S
3523935	Parts for sprayers and dusters, replacement units only	number	S
3523940	Parts for farm elevators and for grain and forage blowers, replacement units only	number	S
3523971	Parts for planting, seeding, and fertilizing machinery, replacement units only	number	S
3523950	Parts for harvesting machinery, replacement units only	number	S
3523955	Parts for haying machinery, replacement units only	number	S
3523960	Parts for plows, except plowshares, replacement units only	number	S
3523945	Parts for harrows, rollers, pulverizers, and similar equipment, replacement units only	number	S
3523965	Parts for cultivators and weeders, replacement units only	number	S
3523985	Parts for stalk shredders, and cutters or rotary mowers (pto), replacement units only	number	S
3523970	Parts for machines for preparing crops for market or for use, replacement units only	number	S
3523975	Parts for farm poultry equipment, replacement units only	number	S
3523988	Parts for hog equipment	number	S
3523980	Parts for other barnyard equipment	number	S
3523984	Parts for farm transportation equipment, replacement units only	number	S
3523982	Parts for irrigation systems, replacement units only	number	S
3523953	Operator cabs		SV
3523990	Farm tractors	number	S
3523995	All other including windrowers, combines, power sprayers, etc.	number	S

A-16 NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Product code	CIR and product description	Unit of measure	Data collected
	MA35A, FARM MACHINERY AND LAWN AND GARDEN EQUIPMENT—Con.		
3523F00	Commercial turf and grounds care equipment, including parts and attachments	number	S
3523F01	Powered nonriding mowers	number	S
3523F03	Riding reel-type turf mowers, including greens mowers	number	S
3523F07	Riding rotary turf mowers	number	S
3523F09	Gang rotary cutting units, reel and rotary, individual sections	number	S
3523F11	Flail mower cutting units, including gang	number	S
3523F13	Other mowing equipment	number	S
3523F17	Parts for commercial turf and grounds mowing equipment	number	S
3523F19	Attachments for commercial turf and grounds mowing equipment	number	S
3523F21	Turf tractors	number	S
3523F23	Sod cutters and sod harvesters	number	S
3523F25	Seeders, spreaders, and top dresser attachments	number	S
3523F27	Aerators, spikers, and pluggers	number	S
3523F29	Dethatchers	number	S
3523F31	Power brooms, blowers, vacuums, and sweepers	number	S
3523F33	Irrigation systems, except agricultural and residential	number	S
3523F35	Turf trucks	number	S
3523F37	Other commercial turf and grounds care equipment	number	S
3523F41	Parts for other commercial turf and ground care equipment	number	S
3523F43	Attachments for other commercial turf and ground care equipment	number	S
3524100	Consumer nonriding lawn, garden, and snow equipment		SV
	Lawnmowers:		
3524101	Reel, push-type, nonpowered	number	S
3524111	Rotary, push-type, gas-powered	number	S
3524112	Rotary, self-propelled, gas-powered	number	S
3524115	Electric, all types, including battery-powered	number	S
3524120	Rotary garden motor tillers	number	S
3524130	2-wheel tractors walking-type, except rotary tillers	number	S
	Snow throwers (blowers):		
3524141	Single-stage	number	S
3524142	Dual-stage	number	S
	Dual-stage		
3524150	Fixed-blade	number	S
	Other than fixed-blades:		
3524154	Gasoline engine	number	S
3524155	Other, including electric	number	S
3524161	Shredders and shredder-grinders	number	S
3524163	Yard vacuums and blowers	number	S
3524164	Lawn sweepers, push-type and powered, except attachment-type	number	S
3524191	Other consumer nonriding lawn, garden, and snow equipment	number	S
3524400	Consumer riding lawn, garden, and snow equipment	number	S
	Lawn tractors and riding mowers:		
	Front engine:		
3524403	Under 10.0 hp	number	S
3524407	10.0 hp or more	number	S
	Rear engine:		
3524408	Under 8.0 hp	number	S
3524410	8.0 hp to 9.9 hp	number	S
3524411	10.0 hp or more	number	S
	Garden tractors:		
3524412	Under 14.0 hp	number	S
3524415	14.0 hp to 15.9 hp	number	S
3524417	16.0 hp to 19.9 hp	number	S
3524419	20.0 hp or more	number	S
3524431	Other consumer riding lawn, garden, and snow equipment	number	S
3524600	Parts and attachments for consumer lawn, garden, and snow equipment	number	S
	Nonriding:		
3524603	Parts	number	S
3524605	Attachments	number	S
	Riding:		
	Parts:		
3524611	For tractors and riding mowers	number	S
3524613	For other equipment	number	S
	Attachments:		
3524615	Rotary mower decks	number	S
3524617	Rotary tiller attachments	number	S
3524619	Blades, dozer	number	S
3524621	Snow throwers	number	S
3524623	Carts and wagons	number	S
3524625	All other attachments	number	S
	MA35D, CONSTRUCTION MACHINERY		
3531A00	Contractors' off-highway wheel tractors	number	S
3531A13	Single axle	number	S
	Two axle:		
3531A20	Under 100 hp	number	S
3531A22	100 to 149 hp	number	S
3531A24	150 hp and over	number	S
3531A34	Rubber-tired dozers, all sizes	number	S
3531A37	Wheeled log skidders, self-propelled	number	S
3531B00	Crawler tractors (net engine horsepower)	number	S
3531B30	Less than 60 nehp	number	S
3531B36	90 to 159 nehp	number	S
3531B40	160 nehp and over	number	S
3531C00	Tractor shovel loaders	number	S
3531C60	Skid steer loaders, 4-wheel drive	number	S
	Wheel loaders, rear engine mount, integral design, nonskid steer, 4-wheel drive:		
3531C71	Under 79 nehp	number	S
3531C72	80 to 149 nehp	number	S
3531C73	150 to 249 nehp	number	S
3531C74	250 nehp and over	number	S
	Crawler loaders (nehp):		
3531C81	Under 89 nehp	number	S
3531C84	90 nehp or over	number	S
3531E00	Power cranes, draglines, and shovels (excavators), including surface mining equipment	number	S
	Excavators:		
3531E03	Cable-operated, crawler-mounted	number	S
	Hydraulic-operated, crawler-mounted:		
3531E05	24 metric tons and less rated size	number	S
3531E06	Over 24 metric tons to 40 metric tons rated size	number	S
3531E07	Over 40 metric tons rated size	number	S
3531E19	Hydraulic-operated, wheel (rubber) mounted, all sizes	number	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-17

Product code	CIR and product description	Unit of measure	Data collected
	MA35D, CONSTRUCTION MACHINERY—Con.		
3531E00	Power cranes, draglines, and shovels (excavators), including surface mining equipment—Con. Cranes:	number	S
	Lattice boom, crawler mounted:		
3531E20	Up to 90 tons maximum working load	number	S
3531E26	More than 90 tons up to and including 120 tons maximum working load	number	S
3531E29	Over 120 tons maximum working load	number	S
	Lattice boom, wheel (rubber) mounted:		
3531E37	120 tons and less maximum working load	number	S
3531E38	Over 120 tons maximum working load	number	S
3531E41	Hydraulic-operated, telescoping boom, crawler-mounted	number	S
	Hydraulic, telescopic boom wheel cranes, multiple control stations (rubber mounted):		
3531E51	20 tons or less	number	S
3531E52	More than 20 tons up to and including 30 tons	number	S
3531E53	More than 30 tons up to and including 55 tons	number	S
3531E54	More than 55 tons	number	S
3531E57	Hydraulic, pinned-on type, telescopic and articulated	number	S
	Wheel cranes, one control station (self-propelled, rubber-mounted):		
3531E68	Up to and including 18 tons	number	S
3531E65	More than 18 tons up to and including 25 tons	number	S
3531E66	Over 25 tons	number	S
3531E75	Draglines: crawler and/ or tub	number	S
	Other cranes:		
3531E81	Locomotive (except wrecking)	number	S
3531E82	Pedestal or shipboard mounted marine cranes, telescopic or box boom	number	S
3531E86	Pedestal or shipmounted marine cranes, lattice boom	number	S
3531E85	All other cranes, including locomotive wrecking	number	S
	Attachments for power cranes, draglines, and excavators (sold separately):		
3531E94	Hoe	number	S
3531E95	Dragline buckets/ rated bucket capacity (all sizes)	number	S
3531E97	Clamshell/ grapple	number	S
3531E98	All other attachments	number	S
3531F00	Mixers, pavers, and related equipment	number	S
	Concrete:		
	Mixers:		
3531F21	Portable truck mixer or agitator, all sizes	number	S
3531F25	Portable, other than truck mixer, all sizes	number	S
3531F31	Plaster and mortar, all sizes	number	S
	Concrete pavers:		
3531F33	Automated slipform curb and gutter machines	number	S
3531F34	Nonautomated (extruder) curbers and concrete placer spreaders	number	S
3531F39	Concrete trowels	number	S
3531F40	Concrete vibrators (electric motor, gasoline engine, structural high cycle, pneumatic, etc.)	number	S
3531F42	Concrete screeds (hand-propelled or winch-type)	number	S
3531F43	Concrete batching plants, bin and batch (for concrete aggregate only and bulk cement)	number	S
	Concrete pumps, mobile:		
3531F60	Trailer mounted, less than 25 cubic yard per hour	number	S
3531F62	Trailer mounted, 25 cubic yard per hour or more	number	S
3531F64	Truck mounted (including value of booms and trucks), all sizes	number	S
	Bituminous:		
3531F66	Distributors	number	S
	Pavers, self-propelled:		
3531F71	21,999 pounds gross weight or less (basic unit)	number	S
3531F75	22,000 pounds gross weight or more (basic unit)	number	S
3531F80	Pavers, not self-propelled	number	S
	Asphalt plants:		
3531F82	Less than 7,500 pounds (239 tons per hour)	number	S
3531F84	7,500 pounds or more (240 tons per hour or more)	number	S
3531F85	Stabilization mixing equipment	number	S
3531F89	Cold planers/ milling machines (self-propelled)	number	S
3531F98	Other concrete and bituminous equipment, not specified above, including mixers, etc.	number	S
3531G00	Scrapers, graders, rollers, off-highway trucks, coal haulers, and rough terrain forklifts	number	S
	Scraper bowls:		
3531G01	Conventional scraper bowls only (digging, carrying, and hauling)	number	S
3531G03	Elevating scraper bowls (digging, carrying, and hauling, 2- and 4-wheel type)	number	S
3531G05	All other scraper bowls	number	S
	Motor graders and light maintainers:		
3531G11	Under 144 nehp	number	S
3531G17	145 nehp and over	number	S
	Rollers and compactors, self-propelled/ ride-on type, static compaction:		
	Smooth steel wheel rollers, tandem:		
3531G21	Less than 3 metric tons	number	S
3531G23	3 metric tons to less than 5.5 metric tons	number	S
3531G26	5.5 metric tons and over	number	S
	Pneumatic tire rollers:		
3531G29	Less than 2.5 metric tons	number	S
3531G31	2.5 metric tons or more	number	S
	Multiple projection steel wheel rollers:		
3531G33	Embankment	number	S
3531G35	Landfill	number	S
	Rollers and compactors, self-propelled/ ride-on type, vibratory compaction:		
	Single drum with one or two wheels:		
3531G37	Less than 5 metric tons	number	S
3531G39	5 metric tons to less than 8 metric tons	number	S
3531G42	8 metric tons and over	number	S
	Double drum, two drums vibrating:		
3531G45	Less than 3 metric tons	number	S
3531G47	3 metric tons to less than 5 metric tons	number	S
3531G49	5 metric tons to less than 8 metric tons	number	S
3531G51	8 metric tons to less than 11.3 metric tons	number	S
3531G53	11.3 metric tons or more	number	S
3531G55	Double drum with 1 drum vibrating, all sizes	number	S
3531G57	Other compactors (except handheld)	number	S
3531G91	Rollers, towed-type	number	S
	Off-highway vehicles:		
3531G71	Rear dump haulers, all sizes	number	S
3531G73	Integral self-powered side and bottom dumps, including coal haulers	number	S
3531G75	Truck-type, rear dump chassis used as a tractor for towing earth, rock, coal, and ore trailers	number	S
3531G77	Other truck-type tractor chassis, used for log hauling, oilfields, desert, and other uses	number	S
3531G79	Trailers and wagons (end, side, and bottom dump), all sizes	number	S
	Rough terrain forklifts:		
3531G81	2-wheel drive, vertical mast	number	S
3531G83	4-wheel drive, vertical mast	number	S
3531G85	2- and 4-wheel drive, variable reach	number	S
3531N00	Construction machinery for mounting on tractors and other prime movers	number	S
3531N01	Sidebooms or pipehandlers, all sizes	number	S
3531N03	Dozers, for crawler and wheel tractors, all sizes	number	S

Product code	CIR and product description	Unit of measure	Data collected
	MA35D, CONSTRUCTION MACHINERY—Con.		
3531N00	Construction machinery for mounting on tractors and other prime movers—Con.	number	S
3531N05	Winches (towing, logging, and oilfield types):		
3531N07	Electric	number	S
	Other, including hydraulic	number	S
3531N09	Backhoes:		
	Less than 14 feet digging depth	number	S
3531N11	14 feet digging depth or more	number	S
3531N13	Front-end loaders, 3/8 cubic yards or more, including shovel loaders	number	S
3531N15	Logging arches	number	S
3531N17	Rippers and rooters, heavy rear-mounted	number	S
3531N19	Continuous ditching and trenching attachments, crawler and rubber-tired, vehicle mounted	number	S
3531N21	Fork lift attachments, including only fork lift masts sold separately	number	S
3531N23	All other construction machinery for mounting, including cranes, cable power-control units, etc.	number	S
3531P20	Self-propelled continuous ditchers and trenchers	number	S
	Ladder-type digging element:		
3531P14	Less than 2,000 pounds gross weight	number	S
3531P15	2,000 to 4,999 pounds gross weight	number	S
3531P16	5,000 pounds gross weight or more	number	S
3531P18	Wheel-type digging element	number	S
3531P90	Aerial work platforms	number	S
3531P81	Boom-type, self-propelled	number	S
3531P83	Scissors, self-propelled	number	S
3531P85	Not self-propelled, boom- and scissors-type	number	S
3531P87	Truck mounted	number	S
	MA35F, MINING MACHINERY AND MINERAL PROCESSING EQUIPMENT		
3531P70	Portable crushing, screening, washing, and combination plants	number	S
	Crushing plants:		
3531P41	Gyratory (cone)	number	S
3531P42	Impact	number	S
3531P43	Jaw	number	S
3531P44	Roll	number	S
3531P45	Screening plants	number	S
3531P46	Washing and combination plants	number	S
3532500	Underground mining machinery (except parts sold separately)	number	S
3532514	Cutting machines, shortwall and universal	number	S
	Longwall mining machines, coal-type:		
3532516	Plows	number	S
3532518	Shearer or cutter-loader	number	S
3532519	Powered roof supports for long wall mining	number	S
3535564	Armored flexible conveyors for long wall mining	number	S
	Loader machines, underground mine:		
3532533	Gathering arm type	number	S
3532535	Loader-hauler-dumper (lhd), diesel-powered	number	S
3532537	Scoops, shovels, buckets, all types	number	S
3532538	All other, including slusher hoists	number	S
	Continuous mining machines, borer, ripper, auger, and drum:		
3532543	Coal	number	S
3532542	Other than coal	number	S
	Face haulage vehicles, rubber-tired, self-propelled:		
3532557	Coal	number	S
3532559	Other than coal	number	S
3532558	Ratio feeders and feeder breakers	number	S
3532575	Mine cars, track haulage	number	S
3532577	Rock dusters	number	S
	Support vehicles, rubber-tired, or track-mounted:		
	Self-propelled:		
3532572	Coal	number	S
3532573	Other than coal	number	S
	Towed:		
3532576	Coal	number	S
3532578	Other than coal	number	S
3532598	Other underground mining machinery, n.e.c.	number	S
3532600	Mineral processing and beneficiation equipment, excluding parts sold separately		SV
3532652	Flotation machines	number	S
3532653	Dense medium vessels	number	S
3532654	Jigs	number	S
3532655	Tables, concentrating	number	S
3532656	Classifiers, sizing, washing, and dewatering, excluding cyclones	number	S
3532657	Cyclones, wet, including heavy medium cyclones	number	S
3532658	Centrifuges	number	S
3532659	Centrifugal dryers	number	S
3532661	Scrubbers (all types including drums, log washers, attritioning machines, etc.)	number	S
3532662	Dryers, thermal	number	S
3532663	Spirals, concentrating	number	S
3532664	Thickeners, excluding wet cyclones	number	S
3532665	Filters	square ft	S
	Feeders:		
	Vibrating:		
3532671	Electromagnetic	number	S
3532672	Mechanical	number	S
3532673	Reciprocating	number	S
3532674	Apron	number	S
3532667	Magnetic separators	number	S
3532669	Other mineral classifying, flotation, separating, concentrating, and related equipment	number	S
3532700	Crushing, pulverizing, screening machinery, excluding parts sold separately	number	S
	Crushers, stationary-type, including skid mounted:		
	Gyratory:

Product code	CIR and product description	Unit of measure	Data collected
	MA35M, AIR-CONDITIONING AND REFRIGERATION EQUIPMENT		
3585100	Heat transfer equipment (except electrically-operated dehumidifiers)		SV
3585101	Packaged terminal air-conditioners	thousands	S
3585103	Packaged terminal heat pumps	thousands	S
	Evaporative condensers:		
3585104	100 tons or less	thousands	S
3585107	More than 100 tons	thousands	S
	Room fan-coil air-conditioning units:		
3585108	Vertical stack	thousands	S
3585109	Vertical	thousands	S
3585110	Horizontal	thousands	S
3585111	Room air induction units	thousands	S
	Central station air handling units:		
3585113	Draw through	thousands	S
3585115	Blow through	thousands	S
3585117	Heating and ventilating	thousands	S
	Coolers (refrigeration):		
	Ceiling, wall mounted, and floor mounted unit coolers:		
3585118	1,000 Btu per hour	thousands	S
3585119	1,001 to 2,000 Btu per hour	thousands	S
3585120	2,001 to 4,000 Btu per hour	thousands	S
3585121	4,001 to 6,000 Btu per hour	thousands	S
3585122	6,001 to 8,000 Btu per hour	thousands	S
3585123	8,001 to 12,000 Btu per hour	thousands	S
3585124	12,001 to 18,000 Btu per hour	thousands	S
3585125	More than 18,000 Btu per hour	thousands	S
	Air-cooled refrigerant condensers (remote-type):		
3585130	Under 30 tons	thousands	S
3585132	30 to 50 tons	thousands	S
3585134	50 tons or more	thousands	S
	Miscellaneous heat transfer equipment:		
	Shell-and-tube, shell-and-coil, shell-and-U-tube, tube-in-tube:		
3585135	Condensers		SV
3585136	Liquid coolers		SV
3585137	Liquid-suction heat exchangers, and refrigerant liquid receivers		SV
	Central system finned coils, air-conditioning and refrigeration type:		
3585138	Standard steam and steam distributing tube		SV
3585139	Standard water cooling and/or heating and cleanable tube water		SV
3585140	Volatile refrigerant cooling		SV
	OEM coil sales intended for resale or assembly into equipment by other manufacturers:		
3585141	Copper only		SV
3585142	Copper and aluminum		SV
3585143	Aluminum only		SV
3585144	All other, including steel		SV
3585145	Factory-assembled, finned gravity coils, including wetted-surface dehumidifiers		SV
	Centrifugal liquid-chilling packages:		
	Hermetic-type:		
3585147	200 hp or less	thousands	S
3585149	201 to 300 hp	thousands	S
3585150	301 to 400 hp	thousands	S
3585153	More than 400 hp	thousands	S
3585155	Open-type (all sizes)	thousands	S
	Ice-making machines:		
	Self-contained icecube makers:		
3585162	Automatic, less than 200 pounds per day	thousands	S
3585163	Automatic, 201 pounds to 350 pounds per day	thousands	S
3585165	Automatic, 351 pounds or more per day	thousands	S
	Self-contained flake or chip machines:		
3585168	300 pounds or less per day	thousands	S
3585170	301 pounds or more per day	thousands	S
3585171	Not self-contained	thousands	S
3585172	Combination ice makers and ice dispensers	thousands	S
3585173	Combination ice makers and drink dispensers	thousands	S
3585174	Absorption refrigeration and dehydration systems	thousands	S
3585178	Mechanical refrigeration systems used on all types of vehicles	thousands	S
	Mobile vehicle mechanical air-conditioning systems:		
3585179	Air-conditioning units and systems for passenger automobiles	thousands	S
3585180	Air-conditioning units and systems for truck, bus, construction, and agriculture machinery and other vehicles	thousands	S
	Reciprocating liquid-chilling packages:		
3585187	20 hp or less	thousands	S
3585188	21 to 49 hp	thousands	S
3585189	50 to 75 hp	thousands	S
3585190	More than 75 hp	thousands	S
3585192	Factory-fabricated water-cooling towers	thousands	S
3585200	Unitary air-conditioners	thousands	S
3585230	Recreational vehicle air-conditioners	thousands	S
	Single package, with or without evaporator fan:		
	Horizontal:		
3585231	Less than 27,000 Btu per hour	thousands	S
3585232	27,000 to 32,999 Btu per hour	thousands	S
3585233	33,000 to 53,999 Btu per hour	thousands	S
3585234	54,000 to 64,999 Btu per hour	thousands	S
3585235	65,000 to 96,999 Btu per hour	thousands	S
3585236	97,000 to 134,999 Btu per hour	thousands	S
3585237	135,000 to 184,999 Btu per hour	thousands	S
3585238	185,000 to 249,999 Btu per hour	thousands	S
3585239	250,000 to 319,999 Btu per hour	thousands	S
3585240	320,000 to 379,999 Btu per hour	thousands	S
3585241	380,000 Btu per hour or more	thousands	S
	Other than horizontal:		
3585242	Less than 33,000 Btu per hour	thousands	S
3585243	33,000 to 53,999 Btu per hour	thousands	S
3585244	54,000 to 64,999 Btu per hour	thousands	S
3585245	65,000 to 96,999 Btu per hour	thousands	S
3585246	97,000 to 134,999 Btu per hour	thousands	S
3585247	135,000 to 184,999 Btu per hour	thousands	S
3585248	185,000 to 249,999 Btu per hour	thousands	S
3585249	250,000 Btu per hour or more	thousands	S
	Year round, single package and remote condenser air-conditioners, except heat pumps:		
3585250	Less than 33,000 Btu per hour	thousands	S
3585251	33,000 to 38,999 Btu per hour	thousands	S
3585252	39,000 to 43,999 Btu per hour	thousands	S
3585253	44,000 to 53,999 Btu per hour	thousands	S
3585254	54,000 to 64,999 Btu per hour	thousands	S
3585255	65,000 to 134,999 Btu per hour	thousands	S
3585256	135,000 to 184,999 Btu per hour	thousands	S
3585257	185,000 to 249,999 Btu per hour	thousands	S
3585258	250,000 to 319,999 Btu per hour	thousands	S

3492C25	Other, including mechanical and pilot operated	thousands	S
3492D00	Nonaerospace-type hydraulic valves, except directional control		SV
3492D33	Nonelectrohydraulic-types: Pressure control	thousands	S
3492D35	Volume flow control	thousands	S
3492D41	Combination	thousands	S
3492D48	Other, including logic	thousands	S
3492D37	Electrohydraulic-types: Servovalves	thousands	S
3492D38	Other	thousands	S
3492E00	Nonaerospace-type pneumatic directional control valves		SV
3492E51	Manual	thousands	S
3492E53	Solenoid	thousands	S
3492E55	Other, including mechanical	thousands	S
3492F00	Nonaerospace-type pneumatic valves, except directional control		SV
3492F61	Pressure control: Filter-regulator combination units	thousands	S
3492F62	Filter-regulator-lubricator combination units	thousands	S
3492F64	Other pressure control	thousands	S
3492F65	Volume flow control	thousands	S
3492F69	Other, including logic and combination	thousands	S
3492A00	Aerospace-type hydraulic fluid power valves		SV
3492A71	Two-, three-, and four-way directional control valves: Manually or mechanically operated	thousands	S
3492A72	Solenoid-operated	thousands	S
3492A73	Motor-operated	thousands	S
3492A74	Electrohydraulic servo valves	thousands	S
3492A75	Flow pressure, and other types of hydraulic control valves, n.e.c.	thousands	S
3492B00	Aerospace-type pneumatic fluid power valves	thousands	S
3492G00	Parts for hydraulic and pneumatic valves	thousands	S
3492G96	Parts for nonaerospace hydraulic and pneumatic valves, sold separately	thousands	S
3492G98	Parts for aerospace-type fluid power (hydraulic and pneumatic) valves, sold separately	thousands	S
3492J00	Nonaerospace-type flared (metal) fittings, couplings for, and assemblies of tubing used in fluid power transfer systems		SV
3492J11	Fittings and coupling for tubings: Brass and bronze (SAE 45 degrees and 37 degrees)		SV
3492J13	Carbon steel (JIC 37 degrees)		SV
3492J15	Other, including alloy steel		SV
3492J41	Assemblies (fittings and tubings that are connected): Assemblies of tubing		SV
3492J42	Assemblies of tubing and hose		SV
3492K00	Nonaerospace-type flareless fittings and couplings (including nonmetal fittings) used in fluid power transfer systems		SV
3492K21	Metal fittings: Brass and bronze		SV
3492K23	Carbon steel		SV
3492K24	Stainless steel		SV
3492K28	Other, including alloy steel		SV
3492K38	Nonmetal fittings, including plastics		SV
3492M00	Hose fittings and couplings (nonaerospace-type)		SV
3492M44	Hydraulic and pneumatic permanent hose end fittings (crimped and swaged)		SV
3492M46	Hydraulic and pneumatic reusable end fittings		SV
3492M47	Hydraulic quick connect and disconnect couplings		SV
3492M48	Pneumatic quick connect and disconnect couplings		SV
3492M49	Manifolds and manifold assemblies, including valve subplates		SV
3492M50	All other, including steel adaptor connectors, swivel, rotating, and extensions		SV
3492N00	Nonaerospace-type hydraulic and pneumatic assemblies of hose		SV
3492N51	Permanent end fitting types		SV
3492N53	Reusable end fitting types		SV
3492H00	Aerospace-type fittings for and assemblies of tubing and hose used in fluid power transfer systems		SV
3492H61	Hose and tubing assemblies, including assemblies which combine tubing and hoses		SV
3492H62	Quick connect fittings, rotating, swivel, and extension fittings		SV
3492H63	Manifolds and manifold assemblies, including manifolds with filters, valves, etc.		SV
3492H69	Fittings for hose and tubing, n.e.c.		SV

	Hydraulic utility actuators:		
3593261	Linear actuators (cylinders) -----	thousands	S
3593262	Rotary actuators (limited rotation) -----	thousands	S
3593271	Shock absorbers, snubbers, and cushions, all types, excluding oleo strut assemblies -----	thousands	S
3593272	Pneumatic actuators and actuator assemblies (linear and rotary) -----	thousands	S
3593273	Accumulators and other hydraulic, pneumatic, or combination devices for fluid energy absorption and/or storage -----	thousands	S
3593274	Hydraulic fluid reservoirs and reservoir assemblies, including bootstrap reservoirs, spring pressure reservoirs, etc. -----	thousands	S
3593279	Other aerospace fluid power cylinders, actuators, accumulators, and related items, n.e.c. -----		SV
3594300	Nonaerospace-type hydraulic reciprocating pumps (except electrohydraulic) ----- Variable displacement:		SV
	Axial:		
3594315	Closed loop -----	thousands	S
3594327	Open loop -----	thousands	S
3594316	All other variable displacement types -----	thousands	S
	Fixed displacement, open and closed loop:		
3594336	Radial piston type -----	thousands	S
3594337	Axial piston type -----	thousands	S
3594400	Nonaerospace-type rotary and other fluid power pumps -----	thousands	SV
	Fixed displacement, open and closed loop:		
3594430	Internal gear type (including gerotor) -----	thousands	S
3594434	External gear type -----	thousands	S
3594435	Vane type -----	thousands	S
3594439	Other hydraulic pumps and pump packages, n.e.c. -----	thousands	S
3594411	Electrohydraulic pumps -----	thousands	S
3594500	Nonaerospace-type fluid power motors (continuous rotation) -----		SV
3594540	Pneumatic (air) motors -----	thousands	S
	Hydraulic motors (except electrohydraulic):		
	Gear type, including gerotors:		
3594552	Internal types -----	thousands	S
3594554	External types -----	thousands	S
3594542	Vane type, fixed and variable -----	thousands	S
3594543	Radial piston type, fixed and variable -----	thousands	S
	Axial piston type:		
3594544	Fixed displacement -----	thousands	S
3594545	Variable displacement -----	thousands	S
3594548	Electrohydraulic types -----	thousands	S
3594550	Drivers shipped with pumps -----		SV
3594600	Aerospace-type fluid power pumps and motors -----		SV
	Hydraulic pumps:		
3594671	Fixed and variable displacement types -----	thousands	S
3594672	Pump/electric motor assemblies, fixed, and variable displacement types -----	thousands	S
3594673	Other pump packages, n.e.c. -----	thousands	S
	Motors:		
3594683	Pneumatic (air) motors and motor packages -----	thousands	S
3594686	Hydraulic motors, fixed and variable displacement types -----	thousands	S
3594687	Hydraulic motor packages, motor/gearbox, motor/ valve, motor/ generator, and similar combination units -----	thousands	S
3594900	Parts for fluid power pumps and motors -----		SV
	Hydraulic:		
3594991	Nonaerospace -----	thousands	S
3594993	Aerospace -----	thousands	S
	Pneumatic:		
3594995	Nonaerospace -----	thousands	S
3594997	Aerospace -----	thousands	S

Product code	CIR and product description	Unit of measure	Data collected
	MA35P, PUMPS AND COMPRESSORS		
3561100	Industrial pumps, except fluid power pumps.....		SV
3561198	Value of drivers (reported separately)		SV
	Reciprocating pumps:		
3561101	Direct-acting steam-driven	thousands	S
3561102	Electric motor driven	thousands	S
3561104	Engine-driven	thousands	S
	Turbine pumps, vertical:		
3561105	Submersible, more than 5 hp	thousands	S
	Other than submersible:		
3561107	Up to 8 inch diameter bowl size	thousands	S
3561108	Over 8 inch to 16 inch diameter bowl size	thousands	S
3561110	More than 16 inch diameter bowl size	thousands	S
	Centrifugal pumps:		
	Submersible effluent pumps (less than 1 inch solids handling capacity):		
3561183	1/4 to 3/4 hp	thousands	S
3561184	1 hp or more	thousands	S
	Submersible solids handling pumps (1 to 2 inch solids handling capacity):		
3561185	1/3 to 1/2 hp	thousands	S
3561186	3/4 hp or more	thousands	S
	Submersible nonclog pumps (greater than 2 inch solids handling capacity):		
3561187	3 inch discharge outlet or less	thousands	S
3561188	4 inch to 6 inch discharge outlet	thousands	S
3561189	7 inch and 8 inch discharge outlet	thousands	S
3561190	9 inch to 12 inch discharge outlet	thousands	S
3561191	More than 12 inch discharge outlet	thousands	S
	Single stage, single suction, close coupled:		
3561111	1/2 inch discharge outlet or less	thousands	S
3561112	3/4 inch and 1 inch discharge outlet	thousands	S
3561114	1 1/4 inch and 1 1/2 inch discharge outlet	thousands	S
3561115	2 inch and 2 1/2 inch discharge outlet	thousands	S
3561116	3 inch and 4 inch discharge outlet	thousands	S
3561119	More than 4 inch discharge outlet	thousands	S
	Single stage, single suction, frame mounted:		
3561121	1/2 inch discharge outlet or less	thousands	S
3561122	3/4 inch and 1 inch discharge outlet	thousands	S
3561123	1 1/4 inch and 1 1/2 inch discharge outlet	thousands	S
3561124	2 inch and 2 1/2 inch discharge outlet	thousands	S
3561125	3 inch discharge outlet	thousands	S
3561126	4 inch to 6 inch discharge outlet	thousands	S
3561129	More than 6 inch discharge outlet	thousands	S
	Single stage, double suction:		
3561142	Less than 4 inch discharge outlet	thousands	S
3561144	4 inch and 5 inch discharge outlet	thousands	S
3561146	6 inch and 7 inch discharge outlet	thousands	S
3561148	8 inch to 12 inch discharge outlet	thousands	S
3561149	More than 12 inch discharge outlet	thousands	S
	Multistage (single or double suction):		
3561152	1 1/2 inch discharge outlet or less	thousands	S
3561154	2 inch and 3 inch discharge outlet	thousands	S
3561156	4 inch and 5 inch discharge outlet	thousands	S
3561158	6 inch and 7 inch discharge outlet	thousands	S
3561159	8 inch or more discharge outlet	thousands	S
	Propeller and mixed flow:		
3561162	20 inch or less	thousands	S
3561164	More than 20 inch	thousands	S
	All other centrifugal pumps:		
3561165	1 1/2 inch discharge outlet or less	thousands	S
3561166	2 inch to 6 inch discharge outlet	thousands	S
3561169	More than 6 inch discharge outlet	thousands	S
	Rotary pumps:		
	100 psi and under designed pressure:		
3561170	10 gpm or less designed capacity	thousands	S
3561171	11 to 99 gpm designed capacity	thousands	S
3561172	100 to 299 gpm designed capacity	thousands	S
3561173	300 gpm or more designed capacity	thousands	S
	101 to 250 psi designed pressure:		
3561174	10 gpm or less designed capacity	thousands	S
3561175	11 to 99 gpm designed capacity	thousands	S
3561176	100 gpm or more designed capacity	thousands	S
	251 to 500 psi designed pressure:		
3561177	10 gpm or less designed capacity	thousands	S
3561178	11 gpm or more designed capacity	thousands	S
3561179	Over 500 psi designed pressure	thousands	S
	Diaphragm pumps:		
3561182	Single diaphragm	thousands	S
3561192	More than one diaphragm	thousands	S
3561197	Other industrial pumps, not elsewhere classified	thousands	S
3561300	Domestic water systems		SV
3561313	Jet pump and convertible jet pump systems	thousands	S
3561320	Nonjet pump systems (except submersible)	thousands	S
	Submersible pump systems:		
3561326	Up to 1 hp	thousands	S
3561327	More than 1 hp to 3 hp	thousands	S
3561328	More than 3 hp	thousands	S
3561370	Domestic hand and windmill pumps, pump jacks, and cylinders (sold separately)	thousands	S
3561510	Oil well and oil field pumps		SV
3561598	Value of drivers (reported separately)		SV
3561511	Subsurface pumps for oil well pumping	thousands	S
3561513	Mud pumps (slush pumps)	thousands	S
3561515	Other oil well and oil field pumps	thousands	S
3561530	Domestic sump pumps, 1 hp or less	thousands	S
3561573	Pedestal	thousands	S
	Submersible:		
3561577	1/3 hp or less	thousands	S
3561578	More than 1/3 hp	thousands	S
3561520	Other pumps		SV
3561599	Value of drivers (reported separately)		SV
3561593	Packaged pump units assembled from purchased pumps	thousands	S
3561595	Hot water heating circulator pumps	thousands	S
3561597	Other pumps, except automotive, fire engine pumps, laboratory pumps, etc.	thousands	S
3563120	Vacuum pumps	thousands	S
3563193	Low vacuum, 29.5 inches mercury vacuum or less	thousands	S
3563194	High vacuum, 29.6 inches mercury vacuum or more	thousands	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-25

Product code	CIR and product description	Unit of measure	Data collected
	MA35P, PUMPS AND COMPRESSORS—Con.		
3563100	Air and gas compressors		SV
3563198	Value of drivers (reported separately)		SV
	Stationary air compressors:		
	Reciprocating, single acting:		
3563101	1 1/2 hp or less	thousands	S
3563102	More than 1 1/2 hp to 5 hp	thousands	S
3563103	6 hp to 25 hp	thousands	S
3563104	26 hp or more	thousands	S
	Reciprocating, double acting:		
3563105	150 hp or less	thousands	S
3563106	151 hp or more	thousands	S
	Rotary positive:		
3563107	Discharge pressure 50 psig or less, all hp sizes	thousands	S
3563110	Discharge pressures of 51 psig and over, 10 hp and under	thousands	S
3563111	Discharge pressures of 51 psig and over, 11 to 40 hp	thousands	S
3563112	Discharge pressures of 51 psig and over, 41 to 150 hp	thousands	S
3563113	Discharge pressures of 51 psig and over, 151 to 300 hp	thousands	S
3563115	Discharge pressures of 51 psig and over, 301 hp and over	thousands	S
	Centrifugal and axial:		
3563114	50 psig or less	thousands	S
3563117	51 psig and over, 350 hp or less	thousands	S
3563119	51 psig and over, 351 hp or more	thousands	S
	Portable air compressors:		
3563129	Less than 11 cfm	thousands	S
3563133	11 to 74 cfm	thousands	S
3563134	75 to 124 cfm	thousands	S
3563136	125 to 249 cfm	thousands	S
3563137	250 to 599 cfm	thousands	S
3563138	600 to 899 cfm	thousands	S
3563139	900 cfm or more	thousands	S
	Gas compressors:		
	Stationary, centrifugal and axial:		
3563142	Natural gas	thousands	S
3563143	All other gases	thousands	S
	Stationary reciprocating, integral engines:		
3563146	2,000 hp or less	thousands	S
3563147	2,001 to 4,000 hp	thousands	S
3563148	4,001 hp or more	thousands	S
	Stationary reciprocating, other than integral engines:		
3563151	1,000 hp or less	thousands	S
3563153	1,001 hp or more	thousands	S
3563156	Stationary rotary positive	thousands	S
3563189	Other compressors, including compressor packages	thousands	S
3563196	Packaged compressor units assembled from purchased compressors	thousands	S
	MA35Q, ANTIFRICTION BEARINGS		
3562100	Ball bearings, complete, unmounted		SV
	Annular:		
	Ground or precision, single row conrad:		
3562101	Miniature, regular (abec 1 and 3)	millions	S
3562102	Miniature, precision (abec 5 or more)	millions	S
3562103	Other regular, 9 mm od through 30 mm od	millions	S
3562104	Other regular, more than 30 mm od through 52 mm od	millions	S
3562105	Other regular, more than 52 mm od through 100 mm od	millions	S
3562107	Other regular, more than 100 mm od	millions	S
3562109	Other precision, 9 mm od through 30 mm od	millions	S
3562111	Other precision, more than 30 mm od through 52 mm od	millions	S
3562112	Other precision, more than 52 mm od through 100 mm od	millions	S
3562113	Other precision, more than 100 mm od	millions	S
3562114	Ground or precision, single row maximum capacity type	millions	S
	Integral shaft and integral spindle ball bearings:		
3562115	Not more than 30 mm od	millions	S
3562117	More than 30 mm od	millions	S
3562116	Double row	millions	S
3562119	Angular contact, regular	millions	S
3562122	Angular contact, precision	millions	S
3562121	All other ground or precision bearings (abec 1 or more)	millions	S
3562123	Ground bearings of less than abec 1 precision	millions	S
3562125	Unground, including self-aligning (less than abec 1)	millions	S
	Thrust ball bearings:		
3562133	Ground	millions	S
3562135	Unground	millions	S
3562153	Linear ball bearings	millions	S
3562155	Other ball bearings	millions	S
3562200	Tapered roller bearings (including cups and cones), unmounted		SV
3562232	Cup and cone assemblies shipped as a set	millions	S
3562233	Cups shipped separately	millions	S
3562234	Cone assemblies shipped separately	millions	S
3562300	Roller bearings, except tapered, unmounted		SV
	Cylindrical roller bearings:		
3562311	Regular (abec 1 and 3)	millions	S
3562312	Precision (abec 5 or more)	millions	S
	Spherical roller bearings:		
3562324	Single row	millions	S
3562325	Double row	millions	S
3562341	Needle roller bearings	millions	S
3562351	Linear roller bearings	millions	S
3562393	Other roller bearings not specified above	millions	S
3562400	Mounted bearings, except plain		SV
3562417	Ball bearings, unit and/ or split mounted	millions	S
	Roller:		
3562453	Unit mounted	millions	S
3562455	Split mounted	millions	S
3562900	Parts and components for ball and roller bearings		SV
3562911	Balls	millions	S
3562921	Other antifriction ball and bearing components and parts, etc.	millions	S
3562931	Rollers	millions	S
	Other roller bearings parts and components:		
3562935	For tapered roller bearings	millions	S
3562936	For cylindrical roller bearings	millions	S
3562937	For spherical roller bearings	millions	S
3562938	For needle roller bearings	millions	S
3562939	For linear roller bearings	millions	S
3562949	For other roller bearings	millions	S

3695022	3 1/2 inch up to but not including 5 1/4 inch	thousands	S
3695024	5 1/4 inch and greater	thousands	S
3695009	Optical disks	thousands	S
3695026	Bulk magnetic tape	thousands	S
	Packaged magnetic tape:		
3695011	In reels for computer use	thousands	S
3695013	In cassette and cartridge for computer use	thousands	S
3695028	In forms suitable for audio use	thousands	S
3695021	In video cassette, 8 mm and 1/2 inch	thousands	S
3695023	In video cassette, 3/4 inch (19 mm) and 2 inch (51 mm)	thousands	S
3695034	Other packaged magnetic tape	thousands	S
3695039	Other magnetic recording media, including parts	thousands	S
	MA35U, VENDING MACHINES		
3581100	Automatic merchandising (vending) machines, coin-operated		SV
	Beverage vending machines:		
	Hot beverage:		
3581101	Instant, freeze-dried, or liquid concentrate, nonoffice-type	number	S
3581103	Instant, freeze-dried, or liquid concentrate, office-type	number	S
3581104	Fresh brew, coffee, and combinations	number	S
	Soft drink:		
3581108	Canned and bottled beverage, refrigerated	number	S
3581109	Cup (postmix)	number	S
3581111	Packaged milk	number	S
3581119	Other vending machines for beverages	number	S
	Confections and food vending machines:		
3581121	Bulk confection and charms	number	S
3581124	Ice cream and frozen ices	number	S
3581125	Multipurpose food and confections	number	S
3581137	Bagged snacks and confections	number	S
3581129	Other vending machines for confections and foods	number	S
	Other vending machines:		
3581131	Cigarettes	number	S
3581134	Water	number	S
3581135	Postage stamp	number	S
3581149	All other vending machines	number	S
	MQ35W, METALWORKING MACHINERY		
3541D00	Boring and drilling machines		SV
3541D10	All boring machines valued less than \$3,025 each	number	S
	Boring machines valued at \$3,025 each or more:		
3541D15	Horizontal boring, drilling, and milling machines, table, floor and rail mounted	number	S
3541D40	Precision boring machines, including horizontal and vertical boring machines	number	S
3541D45	Jig boring and all other boring machines	number	S
3541D05	All drilling machines valued less than \$3,025 each	number	S
	Drilling machines valued at \$3,025 each or more:		
3541D15	Vertical (upright) drilling machines, including plain-upright and heavy-duty	number	S
3541D25	Radial drilling machines, including plain and universal	number	S
3541D35	Deep hole drilling machines	number	S
	Multiple spindle drilling machines (driven from one central power unit):		
3541D45	Adjustable joint and fixed center types	number	S
3541D55	All other automatic multiple spindle drilling machines	number	S
3541D65	All other drilling machines, n.e.c.	number	S
3541300	Gear cutting machines	number	S
3541400	Grinding, polishing, buffing, honing, and lapping machines		SV
3541410	All grinding, polishing, buffing, honing, and lapping machines valued less than \$3,025 each	number	S
	Machines valued at \$3,025 each or more:		
	External cylindrical grinding machines:		
3541411	Plain, including angular wheel types	number	S
3541413	Universal	number	S
3541414	All other external grinding machines, including roll, chucking, and centerless types	number	S
	Surface grinding machines:		
3541433	Rotary table type, horizontal and vertical	number	S
3541434	Reciprocating table type, including face grinders, horizontal and vertical	number	S
3541437	Reciprocating table type, including face grinders, hand surface type	number	S
3541442	All other disk, bench, floor, snag, double spindle, and abrasive belt grinders	number	S
3541452	Tool and cutter grinding machines	number	S
3541455	All other grinding machines, n.e.c., including internal cylindrical, plane, and thread grinding machines	number	S
	Honing and lapping machines, except gear honing and lapping:		
3541475	Internal, including combination bore-hone and external	number	S
3541479	Flat surface lapping machines, except gear lapping	number	S
3541484	All other honing and lapping or polishing and buffing machines, including speed lathes and multistation types	number	S

Product code	CIR and product description	Unit of measure	Data collected
	MQ35W, METALWORKING MACHINERY—Con.		
3541500	Lathes -----		SV
3541509	All lathes (turning machines) valued less than \$3,025 each -----	number	S
	Machines valued at \$3,025 each or more: -----		
	Numerically controlled turning machines, horizontal spindle: -----		
3541515	Multiple spindle numerically controlled turning machines -----	number	S
3541516	Small, single spindle -----	number	S
3541517	Medium, single spindle -----	number	S
3541518	Large, single spindle -----	number	S
3541522	Numerically controlled turning machines, vertical spindle lathes, boring and turning machines -----	number	S
	Nonnumerically controlled turning machines, horizontal spindle: -----		
3541523	Engine or toolroom lathes -----	number	S
3541583	Automatic lathes, single spindle -----	number	S
3541588	Automatic lathes, multiple spindle, bar (screw) machines -----	number	S
3541567	Automatic lathes, multiple spindle, chucking machines -----	number	S
3541557	All other horizontal turning machines (including turret lathes etc.) -----	number	S
3541586	Nonnumerically controlled vertical turning machines -----	number	S
3541600	Milling machines -----		SV
3541609	All milling machines valued less than \$3,025 each -----	number	S
	Machines valued at \$3,025 each or more: -----		
3541623	General-purpose type knee milling machines -----	number	S
3541632	Automatic single spindle, multiple spindle, and special-purpose machines -----	number	S
3541653	Profile machines and duplicators -----	number	S
3541662	All other milling machines, n.e.c., including planer type and thread milling machines -----	number	S
3541A00	Machining centers -----		SV
	Drill, mill, bore-vertical (automatic tool change): -----		
3541A05	Y-axis travel less than 20 inches -----	number	S
3541A07	Y-axis travel 20 inches through 26 inches -----	number	S
3541A09	Y-axis travel more than 26 inches -----	number	S
	Drill, mill, bore-horizontal (automatic tool change): -----		
3541A11	Y-axis travel less than 27 inches -----	number	S
3541A13	Y-axis travel 27 inches through 40 inches -----	number	S
3541A15	Y-axis travel more than 40 inches -----	number	S
3541A19	All other machining centers -----	number	S
3541B00	Station type machines -----		SV
3541B31	Dial or rotary, trunnion, and center column -----	number	S
3541B35	Transfer -----	number	S
3541B37	Other station type, n.e.c. -----	number	S
3541C00	Other metal cutting machine tools -----		SV
3541C41	Other metal cutting machine tools, n.e.c., valued less than \$3,025 -----	number	S
	Machines valued at \$3,025 each or more: -----		
3541C51	Broaching machines -----	number	S
	Sawing and cut-off machines: -----		
3541C53	Power hack saws -----	number	S
3541C55	Circular cut-off saws (cold) -----	number	S
3541C59	Band saws -----	number	S
3541C61	All other sawing and cut-off machines -----	number	S
3541C64	Spark erosion, ultrasound, and electrolytic machines -----	number	S
3541C91	Miscellaneous metal cutting machine tools -----	number	S
3542100	Punching, shearing, bending, and forming machines (power-operated only) -----		SV
3542108	All punching and shearing machines valued less than \$3,025 each -----	number	S
	Machines valued at \$3,025 each or more: -----		
3542111	Punches, including combination punching and shearing machines -----	number	S
3542116	Punching machines fixed position and two-axis positioning table -----	number	S
	Plate shearing machines (squaring, slitting, etc.): -----		
3542112	Mechanical -----	number	S
3542114	Hydraulic -----	number	S
3542119	Other power-operated punching and shearing machines -----	number	S
3542133	All bending and forming machines, power-operated, valued less than \$3,025 each -----	number	S
	Machines valued at \$3,025 each or more: -----		
3542134	Press brakes -----	number	S
3542137	Bending rolls, sheet, and plate -----	number	S
3542135	Bending rolls, angles, bars, shapes, and tubes -----	number	S
3542143	Rotary bending and forming machines, including rotary head -----	number	S
3542147	Ram and press bending machines -----	number	S
3542149	Other bending and forming machines, including folders -----	number	S
3542200	Presses, except forgings and die-stamping -----		SV
3542201	All presses valued less than \$3,025 each -----	number	S
	Machines valued at \$3,025 each or more: -----		
	Mechanical presses, open back inclinable (gap type): -----		
3542212	50 tons or less -----	number	S
3542202	51 tons to 120 tons -----	number	S
3542203	121 tons or more -----	number	S
	Mechanical presses, vertical straight sided, and arch frame: -----		
3542216	Single-point -----	number	S
3542217	Two-point, 300 tons or less -----	number	S
3542218	Two-point, 301 tons or more -----	number	S
3542245	Automatic mechanical presses, strip or coil feed -----	number	S
3542253	All other mechanical presses -----	number	S
	Metalworking hydraulic presses, vertical single action, all tonnages: -----		
3542256	Housing or straight-side type -----	number	S
3542257	Column-type (open rod) -----	number	S
	Metalworking hydraulic presses, gap or C-frame: -----		
3542258	15 tons or less -----	number	S
3542259	16 tons to 35 tons -----	number	S
3542260	More than 35 tons -----	number	S
3542292	Other hydraulic and pneumatic metalworking presses, including horizontal -----	number	S
3542300	All other metal-forming type machine tools -----		SV
3542320	Forging machines, including forging presses and die-stamping presses -----	number	S
3542397	All other metal-forming type machine tools valued less than \$3,025 each -----	number	S
	Machines valued at \$3,025 each or more: -----		
3542343	Thread rolling machinery -----	number	S
3542330	Metal container-making machinery -----	number	S
3542355	Die-casting machines -----	number	S
3542349	Riveting machines -----	number	S
3542393	All other metal-forming type machine tools -----	number	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-29

Product code	CIR and product description	Unit of measure	Data collected
	MA36A, SWITCHGEAR AND INDUSTRIAL CONTROLS		
3613200	Power circuit breakers, and parts, all voltages -----		SV
3613216	Power circuit breakers (sold separately) for use in metal-clad switchgear -----	thousands	S
3613217	Parts for power circuit breakers for use in metal-clad switchgear -----	thousands	S
3613221	Power circuit breakers, free standing, oil and oilless, from 15.5 kV through 800 kV and above -----	thousands	S
3613222	Parts for power circuit breakers, free standing, oil and oilless, from 15.5 kV through 800 kV and above -----	thousands	S
3613226	Power circuit breakers (sold separately) in individual enclosures and/or for use in low-voltage switchgear -----	thousands	S
3613227	Parts for power circuit breakers in individual enclosures and/or low-voltage switchgear -----	thousands	S
3613231	All other power circuit breakers (sold separately), oil and oilless, network protectors, etc. -----	thousands	S
3613232	Parts for all other power circuit breakers, network protectors, etc. -----	thousands	S
3613300	Low voltage panelboards, distribution boards, and other switching and interrupting devices -----		SV
	Panelboards (include enclosing cabinets): -----		
3613311	Fusible, including combination switch fuse -----	thousands	S
3613312	Circuit breaker -----	thousands	S
	Distribution switchboards: -----		
3613315	Fusible -----	thousands	S
3613317	Circuit breaker -----	thousands	S
3613319	Other, including theater switchboards -----	thousands	S
	Switches: -----		
	Knife switches, enclosed: -----		
3613321	Heavy-duty -----	thousands	S
3613322	General-duty -----	thousands	S
3613324	Enclosed fusible, service entrance, and branch circuit cutouts -----	thousands	S
3613326	Circuit breaker type -----	thousands	S
	Load centers: -----		
3613332	Grouped metering panels (combinations of two meters or more and related switching units, etc.) -----	thousands	S
3613333	Other switches (excluding snap, toggle, push, etc., including open knife switches, etc.) -----		SV
3613398	Other low voltage switchgear apparatus -----		SV
3613400	Fuses and fuse equipment, less than 2,300 volts, except power distribution cutouts -----		SV
3613431	Nonrenewable plug fuses -----		SV
3613451	Nonrenewable cartridge fuses -----		SV
3613471	Renewable plug and cartridge fuses, including renewable links -----		SV
3613493	Other fuses and open fuse material, including cutouts, clips, bases, etc. -----		SV
3613500	Molded case circuit breakers, 1,000 volts or less -----		SV
	Industrial-type: -----		
3613514	With ground fault detection capability -----	thousands	S
3613516	Without ground fault detection capability -----	thousands	S
	Residential or light-duty type: -----		
3613518	With ground fault detection capability -----	thousands	S
3613519	Without ground fault detection capability -----	thousands	S
3613531	Individually enclosed industrial-type, excluding panelboards and busway plugs -----	thousands	S
	Other molded case circuit breakers: -----		
3613591	Marine and Navy type -----	thousands	S
3613592	Aircraft and aerospace -----	thousands	S
3613593	Automotive -----	thousands	S
3613594	Electronic -----	thousands	S
3613595	All other types -----	thousands	S
3613600	Duct, including plug-in units and accessories, 1,000 volts or less -----		SV
3613611	Busways -----	thousands	S
3613631	Trolley-type and lighting distribution duct -----	thousands	S
3613900	Switchgear, except ducts -----		SV
3613907	Automatic and manual control panels (generators, transformers, feed-controls, etc.) -----		SV
3613909	Metal-clad switchgear (using power circuit breakers, oil and oilless), all voltages -----		SV
3613910	Metal-enclosed load interrupter, switchgear assemblies, all voltages -----		SV
3613913	Metal-enclosed low-voltage power circuit breaker switchgear assemblies -----		SV
3613917	Metal-enclosed bus bars when sold separately, more than 1,000 volts -----		SV
	Power switching equipment, 2,300 volts and over: -----		
3613941	Outdoor, excluding structures -----		SV
3613945	Indoor -----		SV
3613951	Power fuses and fuse links for 2,300 volts or more, AC service, excluding distribution cutouts -----		SV
3613981	Power and ground connectors generally used in substation construction -----		SV
3613991	Overhead transmission and distribution connectors (clamps, taps, terminals, etc.) -----		SV
3613993	Transmission and distribution connectors, n.e.c., including underground deadends, etc. -----		SV
3613983	Distribution cutouts -----		SV
3613998	Other switchgear devices, including regulators and switchboard devices (for sale separately) -----		SV
3625100	Relays -----		SV
3625101	Industrial control relays (all voltages), n.e.c. -----	thousands	S
	General-purpose electromechanical relays: -----		
	Over 100 MW actuating power and sealed (either hermetically or environmentally): -----		
3625103	0 through 2.0 amp contact rating -----	thousands	S
3625104	More than 2.0 through 10.0 amp contact rating -----	thousands	S
3625105	More than 10.0 amp contact rating -----	thousands	S
	Over 100 MW actuating power and not sealed: -----		
3625106	0 through 2.0 amp contact rating -----	thousands	S
3625107	More than 2.0 through 10.0 amp contact rating -----	thousands	S
3625108	More than 10.0 through 25.0 amp contact rating -----	thousands	S
3625109	More than 25.0 contact rating -----	thousands	S
3625111	0 through 100 MW actuating power (both sealed and not sealed) -----	thousands	S
	Miniature printed circuit mounted electromechanical relays: -----		
	Sealed (either hermetically or environmentally): -----		
3625112	0 through 2.0 amp contact rating -----	thousands	S
3625113	More than 2.0 through 5.0 amp contact rating -----	thousands	S
3625114	More than 5.0 amp contact rating -----	thousands	S
	Not sealed: -----		
3625116	0 through 2.0 amp contact rating -----	thousands	S
3625117	More than 2.0 through 5.0 amp contact rating -----	thousands	S
3625118	More than 5.0 amp contact rating -----	thousands	S
	DIP or SIP footprint: -----		
3625119	Sealed (either hermetically or environmentally) -----	thousands	S
3625121	Not sealed -----	thousands	S
	Telephone relays, all types: -----		
3625122	Sealed (either hermetically or environmentally) -----	thousands	S
3625123	Not sealed -----	thousands	S
	General-purpose solid state relays: -----		
	Pure solid state: -----		
3625124	0 through 2.0 amp switch rating -----	thousands	S
3625125	More than 2.0 through 10.0 amp switch rating -----	thousands	S
3625126	More than 10.0 amp switch rating -----	thousands	S
	Hybrid solid state: -----		
3625127	0 through 2.0 amp switch rating -----	thousands	S
3625128	More than 2.0 through 10.0 amp switch rating -----	thousands	S
3625129	More than 10.0 amp switch rating -----	thousands	S
	High performance military/ aerospace/ aircraft relays and contactors: -----		
3625131	Round and square can multipole airframe relays and contactors (all sizes) -----	thousands	S

Product code	CIR and product description	Unit of measure	Data collected
	MA36A, SWITCHGEAR AND INDUSTRIAL CONTROLS—Con.		
3625100	Relays—Con.		SV
	High performance military/ aerospace/ aircraft relays and contactors—Con.		
	Crystal can types (sealed):		
3625132	Larger than full size	thousands	S
3625133	Full size	thousands	S
3625135	Half size	thousands	S
3625138	Smaller than half size (including TO-5 package)	thousands	S
3625152	RF, antenna, and coaxial relays (sealed and not sealed) (excluding reed relays)	thousands	S
	Reed relays:		
	Dry reed:		
3625159	Miniature size (glass length less than .85 inch)	thousands	S
3625161	Standard size	thousands	S
	Mercury wetted reed:		
3625162	Miniature size (glass length less than .85 inch)	thousands	S
3625163	Standard size	thousands	S
3625169	Stepping switches, stepping and impulse relays	thousands	S
3625175	Switchgear and protective relays	thousands	S
	Timing relays (timers):		
3625179	Solid state/ EMR combination	thousands	S
3625181	Solid state pure	thousands	S
3625182	All other timing relays (timers), including pneumatic, motor-driven, electron	thousands	S
3625192	All other general-purpose and special-purpose relays, n.e.c.	thousands	S
3625196	Parts for general-purpose and special-purpose relays (sold separately)	thousands	S
3625200	Specific-purpose industrial controls		SV
3625245	U.S. Coast Guard, Navy, and Marine auxiliary controls and accessories	thousands	S
3625247	Metal mill control and accessories (all voltages)	thousands	S
3625248	Crane and hoist controls, constant and adjustable voltage, operators desks and stations	thousands	S
3625249	Definite-purpose contactors and starters (600 volts or less)	thousands	S
	Motion controllers, stand-alone:		
3625251	Positioning-type computer numerical control	thousands	S
3625255	Continuous path type computer numerical control	thousands	S
3625257	Robotic controls	thousands	S
	Other stand-alone motion controls:		
3625261	Servo-type	thousands	S
3625263	Stepper-type	thousands	S
	Subordinate motion controllers:		
3625264	Programmable controller motion modules	thousands	S
3625266	Bus motion modules	thousands	S
3625268	Chip level motion control devices	thousands	S
3625269	Other subordinate motion control devices	thousands	S
3625271	Programmable controllers (sold separately)	thousands	S
3625276	Other specific or special-purpose ac and dc controllers, other definite-purpose devices	thousands	S
3625300	General-purpose industrial controls		SV
	Ac full voltage noncombination magnetic starters, 1000 volts or less:		
3625302	Designed and rated to U.S. National Standards (NEMA)	thousands	S
3625304	Designed and rated to International Standards (IEC)	thousands	S
	Ac full voltage combination magnetic starters, 1000 volts or less:		
	Combination starters (less pumping panels):		
3625308	Designed and rated to U.S. National Standards (NEMA)	thousands	S
3625309	Designed and rated to International Standards (IEC)	thousands	S
	Pumping panels:		
3625311	Designed and rated to U.S. National Standards (NEMA)	thousands	S
3625312	Designed and rated to International Standards (IEC)	thousands	S
3625306	Disconnect switches, 600 volts or less	thousands	S
	Ac full voltage manual controllers, 1000 volts or less:		
3625323	Designed and rated to U.S. National Standards (NEMA)	thousands	S
3625325	Designed and rated to International Standards (IEC)	thousands	S
	Ac contactors, 1000 volts or less:		
3625327	Designed and rated to U.S. National Standards (NEMA)	thousands	S
3625329	Designed and rated to International Standards (IEC)	thousands	S
3625314	Ac reduced voltage controls, 1,000 volts or less (excluding synchronous motor)	thousands	S
3625315	Synchronous motor starters, 1,000 volts or less, (including both full and reduced voltage)	thousands	S
3625316	Motor control centers, 1,000 volts or less	thousands	S
3625318	Starters and contactors for squirrel cage and wound rotor and synchronous and nonsynchronous motors	thousands	S
3625321	Brakes and clutches	thousands	S
3625334	Digital readout systems, including dial or plugboard type	thousands	S
	Presence sensors and motion measurement devices:		
	Limit switches (positioning sensors):		
3625332	Electromechanical positioning sensors		SV
3625333	Movement sensors		SV
	Solid state positioning sensors:		
3625335	Nonoptical proximity sensors		SV
3625336	Optical proximity sensors		SV
3625337	All other pilot circuit devices (excluding relays and limit switches)		SV
3625338	Dc power circuit devices (all voltages)		SV
3625339	Other control sensors (all voltages)		SV
	Pushbuttons and pushbutton stations but excluding operators' desks and stations:		
3625341	Pushbuttons, explosion-proof: Classes 1, 11, and 111 - Division 1		SV
3625342	Pushbuttons, 18 mm and smaller		SV
3625346	Pushbuttons, 19 mm to 29 mm		SV
3625348	Pushbuttons, 30 mm and larger		SV
3625381	Rheostats and resistors (except for electronic applications) sold separately		SV
	Controls for adjustable speed drives:		
3625383	Controls for ac package drives	thousands	S
3625384	Controls for dc package drives	thousands	S
3625385	ac drive systems	thousands	S
3625386	dc drive systems	thousands	S
	Motion/ position drive amplifiers:		
3625373	Ac (ECM) drive amplifiers	thousands	S
3625375	Dc drive amplifiers	thousands	S
3625377	Stepper drive amplifiers	thousands	S
3625393	Solid state contactors (all voltages)	thousands	S
3625398	Solid state controllers (all voltages)	thousands	S
3625399	All other general industry devices and systems	thousands	S
3625400	Motor controller accessories and parts for industrial controls		SV
3625491	Motor controller accessories, including those items sold separately	thousands	S
3625497	Parts for industrial controls	thousands	S
	MQ36B, ELECTRIC LAMPS		
3641100	Electric lamps		SV
	Photographic incandescent:		
3641123	Photoflash (including blue)	millions	S
3641127	Projection	millions	S
3641125	Photoflood, photo enlarger, and other photolamps	millions	S

Product code	CIR and product description	Unit of measure	Data collected
	MA36E, ELECTRIC HOUSEWARES AND FANS—Con.		
3634100	Electric fans, except industrial-type—Con.		SV
3634198	All other electric fans except industrial type	thousands	S
3634500	Small electric household appliances, except fans		SV
	Electrothermal-type:		
	Broilers:		
3634516	Without rotisseries	thousands	S
3634517	With rotisseries	thousands	S
	Coffee makers:		
3634518	Drip-type	thousands	S
3634519	Percolator or vacuum-type	thousands	S
3634521	Urn-type	thousands	S
3634523	Deep fat fryers (excluding covers and controls shipped separately)	thousands	S
3634524	Ovens (including toaster ovens) and roasters (with or without broiler attachments)	thousands	S
3634529	Hot plates and disc stoves, 1,650 watts or less (except built-in units)	thousands	S
3634536	Toasters	thousands	S
3634539	Waffle irons, sandwich grills, griddles, and combinations	thousands	S
3634541	Casseroles, chafing dishes, and crockpots (slow cookers)	thousands	S
3634542	Frying pans and skillets (excluding covers and controls shipped separately)	thousands	S
	Air space heaters, portable:		
3634543	Fan forced type	thousands	S
3634544	Other than fan forced type (convector, radiant, etc.)	thousands	S
	Air space heaters for fixed installation, all types:		
3634545	Baseboard, excluding glass panel type	thousands	S
3634547	Other than baseboard, excluding warm-air furnaces	thousands	S
	Corn poppers:		
3634554	Hot-air type	thousands	S
3634555	Other	thousands	S
	Electric irons:		
3634550	Steam and spray (standard household)	thousands	S
3634563	Other than steam auto type (standard household and travel irons)	thousands	S
3634583	Electric blankets	thousands	S
3634585	Electric bed coverings, except blankets (including mattress covers, and comforters)	thousands	S
3634587	Electric heating pads (including foot warmers)	thousands	S
3634586	Hair curlers and curling irons	thousands	S
	Hair dryers:		
3634594	With bonnets	thousands	S
3634595	Without bonnets	thousands	S
3634596	Portable humidifiers	thousands	S
3634599	Other small electrothermal household appliances, including immersion heaters, etc.	thousands	S
	Electromechanical type (including cordless):		
	Electric razors and dry shavers:		
3634513	Men's	thousands	S
3634515	Ladies'	thousands	S
	Household food mixers (include value of standard attachments sold with mixers):		
3634571	Hand (portable)	thousands	S
3634575	Stand type	thousands	S
3634576	Blenders (liquefiers)	thousands	S
3634577	Ice crushers	thousands	S
3634581	Household food processors	thousands	S
3634582	Household food preparation appliances, except food mixers and food processors	thousands	S
3634590	Portable air purifiers and portable dehumidifiers	thousands	S
3634593	Can openers and combination can opener-knife sharpeners	thousands	S
3634599	Other small electromechanical appliances (including knives, knife sharpeners, etc.)	thousands	S
3634911	Parts and attachments for household electric fans		SV
3634920	Parts and attachments for other small electrical appliances		SV
3634913	Electrothermal in operation		SV
3634918	Electromechanical in operation		SV
3634988	For air space heaters for fixed installation (residential)		SV
3634989	Other		SV
	MA36F, MAJOR HOUSEHOLD APPLIANCES		
3631110	Electric, electronic, and microwave household ranges, ovens, surface cooking units, and equipment		SV
	Free-standing ranges (widths should be based on outside dimensions):		
3631111	Less than 23 inch (58.4 cm) width, all types, including apartment house type	thousands	S
	23 inches (58.4 cm) up to and including 32 inches (81.3 cm) in width:		
3631121	Low oven (including slide-ins)	thousands	S
3631124	High oven	thousands	S
3631126	High-low oven	thousands	S
3631135	33 inch (83.8 cm) width or more, all types	thousands	S
	Other than free-standing:		
	Built-in ranges:		
3631153	With built-in single oven	thousands	S
3631155	With built-in double ovens	thousands	S
3631161	Surface cooking tops	thousands	S
3631165	Drop-in ranges	thousands	S
3631173	Microwave ranges and ovens, including combination microwave/ electric ranges, etc.	thousands	S
3631174	Microwave ovens, including counter top, built-in, and wall or cabinet hung ovens	thousands	S
3631179	Other electric and electronic ranges and ovens not listed above	thousands	S
3631120	Parts and accessories for household electric ranges and ovens, such as burners, etc.	thousands	S
3631310	Gas household ranges, ovens, and surface cooking units, and equipment		SV
	Standard type, free-standing:		
3631311	More than 32 inch (81.3 cm) cooking top and oven	thousands	S
3631313	More than 24 inch (61 cm) to 32 inch (81.3 cm) cooking top and oven	thousands	S
3631315	Apartment ranges, 24 inch (61 cm) cooking top or less	thousands	S
3631317	Standard-type, for built-in installation (built-in or stack-on oven broiler units)	thousands	S
3631319	Surface cooking tops (one burner or more)	thousands	S
	Nonstandard types:		
3631321	Wall hung	thousands	S
3631323	Slide-in or drop-in (include as one unit a drop-in cooking surface with a slide-in oven)	thousands	S
3631339	Other gas household ranges, ovens, hot plates, and surface cooking units, not listed above	thousands	S
3631320	Parts and accessories for gas household ranges and ovens, such as burners, etc.	thousands	S
3631410	Other household ranges and cooking equipment (except gas and electric), and outdoor cooking equipment		SV
	Barbecues, grills, stoves, braziers, for outdoor cooking and other cooking:		
	Permanently installed units:		
3631411	Gas fuel or both gas and other fuel	thousands	S
3631412	Solid fuel (charcoal, wood, coal, etc.)	thousands	S
3631413	Liquid fuel (oil, kerosene, etc.)	thousands	S
3631414	Electric	thousands	S

3632210	19.5 to 21.4 cubic feet (552 liters but less than 608 liters)	thousands	S
3632212	21.5 cubic feet or more (608 liters or more)	thousands	S
	Chest-type freezers:		
3632251	6.4 cubic feet or less (less than 184 liters)	thousands	S
3632257	6.5 to 9.4 cubic feet (184 liters but less than 269 liters)	thousands	S
3632261	9.5 to 13.4 cubic feet (269 liters but less than 382 liters)	thousands	S
3632267	13.5 cubic feet or more (382 liters or more)	thousands	S
3632300	Parts and attachments for household refrigerators and freezers	thousands	S
3633010	Household laundry machines (defined as having a dry linen capacity not exceeding 10 kg (22 pounds))		SV
	Washing machines, mechanical:		
	Fully automatic washing machines (electric):		
3633011	Coin-operated	thousands	S
3633031	Noncoin-operated	thousands	S
3633037	Other washing machines, machines with a built-in centrifugal drier and gasoline-driven	thousands	S
	Dryers, mechanical (incorporating heat):		
3633051	Gas (noncoin-operated)	thousands	S
3633055	Electric (noncoin-operated)	thousands	S
3633015	Coin-operated	thousands	S
3633059	Other drying equipment, not incorporating heat (centrifuges, wringers, spinners, etc.)	thousands	S
3633020	Parts, accessories, and attachments for household laundry equipment		SV
3633096	For household washing machines		SV
3633097	For household drying machines		SV
3639100	Water heaters, electric (for permanent installation)		SV
	Storage-type:		
3639111	34 gallons or less	thousands	S
3639112	35 to 44 gallons	thousands	S
3639114	45 to 54 gallons	thousands	S
3639115	55 gallons or more	thousands	S
3639198	Other types, including circulating and portable storage	thousands	S
3639200	Water heaters (except electric)		SV
	Direct-fired water heaters:		
3639212	Gas	thousands	S
3639224	Oil	thousands	S
3639232	Coal or wood tank heaters	thousands	S
3639252	Indirect water heaters, including storage, cast or coil type (less tank)	thousands	S
3639510	Other household-type appliances, n.e.c.		SV
	Dishwashing machines:		
3639512	Portable type, including convertible type	thousands	S
3639514	Built-in type	thousands	S
3639563	Floor waxing, polishing, scrubbing, and shampooing machines (for household use only)	thousands	S
3639571	Food waste disposers (all sizes, of the electromechanical, comminuter-type)	thousands	S
3639572	Household trash compactors	thousands	S
3639575	Household sewing machines, heads for sale with cabinets or cases, and heads for sale separately	thousands	S
3639560	Other major household appliances, n.e.c.	thousands	S
3639520	Parts for other household appliances, n.e.c.		SV
3639591	For electric water heaters		SV
3639592	For nonelectric water heaters		SV
3639593	For dishwashing machines		SV
3639594	For floor waxing, polishing, scrubbing, and shampooing machines		SV
3639595	For food waste disposers		SV
3639596	For household trash compactors		SV
3639598	For household sewing machines, excluding cabinets and cases		SV
3639597	For other major household appliances, n.e.c.		SV
	MA36H, MOTORS AND GENERATORS		
3621100	Fractional horsepower (excluding hermetics and other rotating equipment)		SV
362110M	Used in automobile accessories (excluding starter motors and generators)	thousands	S
	Used in aircraft and spacecraft (excluding generators):		
362110N	Ac	thousands	S
362110P	Dc	thousands	S
362110R	Used in toys (all sizes, ac and dc)	thousands	S
362110S	Used for clock-type synchronous and subsynchronous timing, ac and dc	thousands	S

Product code	CIR and product description	Unit of measure	Data collected
	MA36H, MOTORS AND GENERATORS—Con.		
3621100	Fractional horsepower (excluding hermetics and other rotating equipment)—Con. All other uses:		SV
	Ac (noncommutated), single phase, skeleton-type shaded pole:		
362111A	Less than 2.75 inch diameter	thousands	S
362111B	2.75 inch diameter and over	thousands	S

3621215	0.746 to less than 3.371 kW, 1 through 5 hp-----	thousands	S
3621216	3.731 to less than 14.921 kW, 5 through 20 hp-----	thousands	S
3621217	14.921 to less than 37.301 kW, 20 through 50 hp-----	thousands	S
3621218	37.301 to less than 74.601 kW, 50 through 100 hp-----	thousands	S
3621219	74.601 to less than 149.201 kW, 100 through 200 hp-----	thousands	S
3621220	149.601 to less than 373.001 kW, 200 through 500 hp-----	thousands	S
3621227	373.001 to less than 746.001 kW, 500 through 1000 hp-----	thousands	S
3621228	746.001 to less than 1865.001 kW, 1000 through 2500 hp-----	thousands	S
3621229	1865.001 kW and over, more than 2500 hp-----	thousands	S
	Ac (noncommutated) motors, synchronous (servo and nonservo):		
3621231	Less than 149.201 kW, up to 200 hp-----	thousands	S
3621232	149.201 kW and over, over 200 hp-----	thousands	S
	Ac generators for internal combustion engines:		
3621236	Less than 1.5 kVA-----	thousands	S
3621237	1.5 to less than 5 kVA-----	thousands	S
3621238	5 to less than 15 kVA-----	thousands	S
3621239	15 to less than 40 kVA-----	thousands	S
3621241	40 to less than 75 kVA-----	thousands	S
3621242	75 to less than 200 kVA-----	thousands	S
3621243	200 to less than 375 kVA-----	thousands	S
3621244	375 to less than 750 kVA-----	thousands	S
3621245	750 to less than 1,250 kVA-----	thousands	S
3621246	1,250 to less than 2,500 kVA-----	thousands	S
3621247	2,500 to less than 10,000 kVA-----	thousands	S
3621248	10,000 kVA or more-----	thousands	S
	Dc motors and generators (excluding all arc welding generators and battery charging generators):		
3621261	0.746 to less than 3.375 kW, 1 through 5 hp, permanent magnet-----	thousands	S
3621262	0.746 to less than 3.375 kW, 1 through 5 hp, wound field-----	thousands	S
3621263	0.746 to less than 3.375 kW, 1 through 5 hp, other types, including universal and electrically commutated-----	thousands	S
3621264	3.731 to less than 14.921 kW, less than 5 through 20 hp-----	thousands	S
3621265	14.921 to less than 74.601 kW, less than 20 through 100 hp-----	thousands	S
3621266	74.601 to less than 149.201 kW, less than 100 through 200 hp-----	thousands	S
3621267	149.201 to less than 373.001 kW, less than 200 through 500 hp-----	thousands	S
3621268	373.001 kW and over, less than 500 hp-----	thousands	S
3621300	Motors and generators for land transportation (those used in control equipment)-----		SV
3621301	Used for trolley cars, trolley coaches, rapid transit cars, trolley locomotives-----	thousands	S
3621321	Used for gasoline-electric and diesel-electric buses, trucks, locomotives, etc.-----	thousands	S
3621341	All other types of land transportation-----	thousands	S
3621400	Prime mover generator sets, except steam turbine and electric motor driven-----		SV
	Gas/gasoline engine-driven generator sets, ac and dc output:		
3621403	Less than 1.5 kVA-----	thousands	S
3621404	1.5 to less than 5 kVA-----	thousands	S
3621405	5 to less than 15 kVA-----	thousands	S
3621407	15 to less than 50 kVA-----	thousands	S
3621408	50 to less than 100 kVA-----	thousands	S
3621410	100 to less than 500 kVA-----	thousands	S
3621412	500 to less than 1000 kVA-----	thousands	S
3621413	1000 kVA or more-----	thousands	S
	Diesel engine-driven generator sets, ac and dc output:		
3621441	Less than 15 kVA-----	thousands	S
3621442	15 to less than 50 kVA-----	thousands	S
3621443	50 to less than 100 kVA-----	thousands	S
3621444	100 to less than 200 kVA-----	thousands	S
3621445	200 to less than 400 kVA-----	thousands	S
3621446	400 to less than 600 kVA-----	thousands	S
3621447	600 to less than 800 kVA-----	thousands	S
3621448	800 to less than 1,000 kVA-----	thousands	S
3621449	1,000 to less than 2,000 kVA-----	thousands	S
3621450	2,000 to less than 3,000 kVA-----	thousands	S
3621451	3,000 kVA or more-----	thousands	S
	Dual fuel (oil and gas) engine-driven generator sets, ac and dc output:		
3621452	Less than 2,000 kVA-----	thousands	S
3621453	2,000 kVA or more-----	thousands	S
3511190	Gas turbine-driven generator sets (all sizes)-----	thousands	S
3621475	Other generator set units (wind-driven but excluding electric motor-driven generators)-----	thousands	S
3621700	Fractional motor generator sets and other rotating equipment, including hermetics-----	thousands	S
3621721	Ac and dc output rated at less than 746 watts-----	thousands	S
	Other rotating equipment:		
3621753	Rate generators, resolvers, and combinations (less than 746 watts)-----	thousands	S
3621757	Synchro-type components, less than 746 watts-----	thousands	S
3621797	All hermetic motors, 5.5 inch stator core diameter and smaller-----	thousands	S
3621798	All other rotating equipment rated at less than 746 watts-----	thousands	S
3621800	Integral motor generator sets and other rotating equipment, including hermetics-----	thousands	S
3621811	Synchro converters and double current generators, 746 watts or more-----	thousands	S
	Ac and dc output rated at 746 watts or more:		
3621832	Ac, output based on the rating of the largest ac generator:		
3621833	746 watts to less than 150 kW-----	thousands	S
	150 kW or more-----	thousands	S
3621834	Dc, output based on the rating of the largest dc generator:		
3621836	746 watts to less than 170 kW-----	thousands	S
3621897	170 kW or more-----	thousands	S
3621898	All hermetic motors over 5.5 inch stator core diameter-----	thousands	S
	All other rotating equipment rated at 746 watts or more-----	thousands	S
3621900	Parts for motors and generators regardless of output rating-----	thousands	S
3621990	Commutators-----	thousands	S
3621959	For use in land transportation equipment-----	thousands	S
3621995	All other parts-----	thousands	S
	MA36K, WIRING DEVICES AND SUPPLIES		
3643100	Lampholders-----		SV
	Incandescent:		
3643101	Nonmetallic outer shell, threaded, medium base only, keyless, push through and pull types-----	millions	S
3643102	Metal outer shell, threaded, medium base only, key, keyless, push through and pull types-----	millions	S
3643103	Outlet box, threaded, medium base only, pull and keyless types-----	millions	S
3643106	Weatherproof, threaded, medium base only-----	millions	S
3643111	Candleabra base, all types-----	millions	S

Product code	CIR and product description	Unit of measure	Data collected
	MA36K, WIRING DEVICES AND SUPPLIES—Con.		
3643100	Lampholders—Con.		SV
	Incandescent—Con.		
3643112	Mogul base, all types	millions	S
3643113	Sign and fixture, medium base only	millions	S
3643114	All other incandescent, medium, admedium, bayonet, intermediate, lumiline, miniature	millions	S
	Florescent:		
3643115	Bi-pin	millions	S
3643121	Slimline	millions	S
3643123	Recessed double contact	millions	S
3643125	All other florescent, including but not limited to circline, panelescent, and starter holders	millions	S
3643128	All other lampholders, including cold cathode neon, and bases for quartz lamps	millions	S
3643200	Convenience and power outlets, both general- and special-purpose		SV
3643227	Receptacles with ground fault interruptor circuitry (all types, all amperages)	millions	S
3643228	2-pole, 2-wire (flush, all types)	millions	S
	2-pole, 3-wire and up (flush):		
3643229	Locking, 15 amps or less	millions	S
3643230	Locking, 20 amps or more	millions	S
3643231	Nonlocking, 15 amps or less	millions	S
3643232	Nonlocking, 20 amps or more	millions	S
3643234	Appliance and special applications (all amperages, all types)	millions	S
3643235	Dust and explosion proof	millions	S
3643237	All other types, including surface outlets	millions	S
3643300	Switches for electrical circuitry		SV
	General use flush mounted switches:		
	Ac (except mercury):		
3643360	Single pole, 15 amps or less	millions	S
3643363	Single pole, more than 15 amps	millions	S
3643364	Other than single pole, all amperages	millions	S
	Ac-dc (except mercury):		
3643365	Single pole, all amperages	millions	S
3643366	Other than single pole, including double pole 3-way, 4-way	millions	S
3643367	Mercury	millions	S
3643368	All other general use switches, including surface-mounted	millions	S
	Special-purpose switches (except dimmers):		
3643370	Appliance and fixture, including pendant and canopy and variable speed controls	millions	S
3643371	Precision (1/8 inch gap or less) snap-acting switches, excluding limit switches	millions	S
3643372	Aircraft types	millions	S
3643376	Automotive types	millions	S
3643377	All other special-purpose switches (including foot actuated, light sensing, and signal activated)	millions	S
	Dimmers:		
	Incandescent:		
3643393	Infinitely variable, 600 watts or less	millions	S
3643394	Infinitely variable, more than 600 watts	millions	S
3643395	All other types, including but not limited to portable lamps and high-low switches	millions	S
3643400	Metal contacts, precious and other	millions	S
3643500	Wire connectors, including connectors used under national electrical applications		SV
3643582	Pressure connectors, where pressure is applied by a screw, cone, or mechanical device	millions	S
3643583	Compression connectors, uninsulated terminals, and splicers, tool installed	millions	S
3643584	Preinsulated terminals and splicers, tool installed	millions	S
3643586	Banded or strip terminals and splicers, machine installed	millions	S
3643587	Pigtail connectors, including wire nuts	millions	S
3643588	Blade or pin type, separable terminations and splicers	millions	S
3643589	Other wire connectors, n.e.c., including solder type	millions	S
3643600	Other current-carrying wiring devices, including attachment plug caps, etc.		SV
	Attachment plug caps and flanged inlets:		
3643640	2-pole, 2-wire, all types, general use locking and nonlocking, all amperages	millions	S
	2-pole, 3-wire and up:		
3643641	Locking, 15 amps or less	millions	S
3643642	Locking, 20 amps or more	millions	S
3643643	Nonlocking, 15 amps or less	millions	S
3643644	Nonlocking, 20 amps or more	millions	S
3643646	Appliance and special application types	millions	S
3643647	Dust and explosion, except pin-and-sleeve	millions	S
3643648	All other types, except pin-and-sleeve	millions	S
	Connector bodies and flanged outlets, all types:		
3643649	2-pole, 2-wire, and types, all amperages	millions	S
	2-pole, 3-wire and up:		
3643651	Locking, 15 amps or less	millions	S
3643653	Locking, 20 amps or more	millions	S
3643655	Nonlocking, 15 amps or less	millions	S
3643657	Nonlocking, 20 amps or more	millions	S
3643659	Appliance and special application types, all amperages	millions	S
3643661	Dust and explosion proof, except pin-and-sleeve	millions	S
3643663	All other types, except pin-and-sleeve	millions	S
	Pin-and-sleeve, general-purpose (120 volts and over, 20 amps and over):		
3643665	Convenience and power outlets	millions	S
3643667	Attachment plug caps	millions	S
3643669	Connector bodies	millions	S
	Pin-and-sleeve, dust and explosion proof (120 volts and over, 20 amps and over):		
3643671	Convenience and power outlets	millions	S
3643673	Attachment plug caps	millions	S
3643675	Connector bodies	millions	S
3643677	Pin-and-sleeve, less than 120 volts, less than 20 amps, all types, except electronic	millions	S
3643679	Fluorescent starters	millions	S
3643681	Terminal blocks	millions	S
3643683	Lightning arresters for alternating current power transmission systems and substations		SV
3643685	Lightning arresters for alternating current power distribution systems and substations		SV
3643687	Choke coils and all other protective devices		SV
3643689	Rail bonds for both propulsion and signal circuits		SV
3643691	Lightning rods		SV
3643692	Overhead trolley line material, except pole and transmission line construction materials		SV
3643694	Electric harnesses and assemblies, excluding engine harnesses		SV
3643698	All other wiring devices with integral ground fault circuit interrupting capacity	millions	S
3643699	Miscellaneous, including but not limited to combination devices, adapters, etc.		SV
3644100	Pole and transmission line hardware		SV
3644112	Construction materials		SV
3644113	Anchors		SV
3644114	Construction materials manufactured to specification		SV
3644151	Suspension hardware for high voltage insulators, clamps and fittings, strain yokes, etc.		SV
3644200	Electrical conduit and conduit fittings		SV
	Rigid conduit (excluding couplings, nipples, bends, and elbows):		
	Steel:		
3644221	Standard weights	short tons	S
3644222	Intermediate	short tons	S
3644225	Aluminum	short tons	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-37

Product code	CIR and product description	Unit of measure	Data collected
	MA36K, WIRING DEVICES AND SUPPLIES—Con.		
3644200	Electrical conduit and conduit fittings—Con.		SV
	Rigid conduit (excluding couplings, nipples, bends, and elbows)—Con.		
3644226	Other metal conduit	short tons	S
3644224	Nonmetallic conduit	1,000 lb	S
3644227	Electrical metallic tubing	short tons	S
3644233	Flexible steel and aluminum conduit	1,000 ft	S
3644232	Flexible nonmetallic conduit	1,000 lb	S
	Raceways and wire ways (including fittings, metal):		
3644234	Surface		SV
3644237	Underfloor		SV
3644238	Ventilated cable tray and accessories		SV
3644251	Cast conduit bodies, covers, and gaskets		SV
	Rigid conduit fittings (including couplings, nipples, bends, and elbows):		
3644253	Couplings, connectors, and unions		SV
3644254	Locknuts and bushings		SV
3644259	All other rigid conduit fittings, metal		SV
3644252	Nonmetallic conduit fittings		SV
	EMT fittings (couplings and connectors):		
3644256	Gland type		SV
3644257	Set-screw type		SV
3644258	All others		SV
3644244	Service entrance caps, ells, and connectors		SV
	Cable, cord, and flexible conduit fittings:		
3644271	Armored cable, metallic sheathed cable, and flexible conduit fittings		SV
3644277	Liquid-tight flexible conduit fittings		SV
3644272	Nonmetallic sheathed cable and cord fittings		SV
3644246	Other electric conduit fittings		SV
3644300	Other noncurrent-carrying wiring devices and supplies		SV
	Stamped metal boxes, covers, and accessories (including stamped conduit boxes):		
3644331	Switch and receptacle boxes		SV
3644332	Outlet boxes		SV
3644333	Covers		SV
3644334	Supports, bar hangers, and other accessories		SV
	Cast metal boxes, covers, gaskets and accessories:		
3644341	FS and FD switch and receptacle-type		SV
3644342	Outlet-type		SV
3644343	Junction-type		SV
	Switch, outlet, FM/TV, and telephone wall plates:		
3644335	Metallic	millions	S
3644336	Nonmetallic	millions	S
3644337	Plastics boxes and covers		SV
	Floor boxes and covers:		
3644339	Metallic		SV
3644340	Nonmetallic		SV
3644348	Other noncurrent-carrying wiring devices and supplies		SV
	MA36L, ELECTRIC LIGHTING FIXTURES		
3645100	Electric lighting fixtures, residential-type		SV
	Incandescent, interior (including bath and kitchen):		
3645111	Ceiling or pendant	millions	S
3645113	Wall or bracket	millions	S
	Track lighting:		
3645106	Single circuit track lengths and accessories		SV
3645107	Multiple circuit track lengths and accessories		SV
3645108	Line voltage heads	millions	S
3645109	Low voltage heads	millions	S
3645110	Track lengths and heads sold together (kits)	millions	S
3645112	Recessed IC (direct contact with ceiling insulation)	millions	S
3645114	Recessed non-IC (3-inch minimum clearance from ceiling insulation)	millions	S
	Incandescent, outdoor:		
3645115	Designed for attachment to house	millions	S
3645116	Custom lighting (lanterns, etc.)	millions	S
3645117	Not designed for attachment to house (garden, patio, yard)	millions	S
	Fluorescent:		
3645118	Wraparounds	millions	S
3645120	Ceiling mounted, decorative	millions	S
3645122	Ceiling mounted, general purpose	millions	S
3645124	Pendant	millions	S
3645126	Recessed IC (direct contact with ceiling insulation)	millions	S
3645128	Recessed non-IC (3-inch minimum clearance from ceiling insulation)	millions	S
3645130	Wall or bracket	millions	S
3645169	Components and renewal parts for residential type sold separately		SV
3646200	Electric lighting fixtures, commercial and institutional type, except spotlights and portable		SV
	Incandescent fixtures, utilitarian and ornamental types:		
3646211	Surface or pendant	millions	S
	Recessed:		
3646212	IC (direct contact with ceiling insulation)	millions	S
3646214	Non-IC (3-inch minimum clearance from ceiling insulation)	millions	S
	Track lighting:		
3646220	Single circuit track lengths and accessories		SV
3646222	Multiple circuit track lengths and accessories		SV
3646224	Line voltage heads	millions	S
3646226	Low voltage heads	millions	S
3646228	Track lengths and heads sold together (kits)	millions	S
3646218	Specialized custom lighting fixtures, chandeliers, church lighting, etc.		SV
3646219	Other incandescent fixtures such as interior display portable lamps, etc.		SV
	High intensity discharge types:		
3646230	Surface or pendant	millions	S
3646231	Indirect lighting	millions	S
	Recessed non-IC (3-inch minimum clearance from ceiling insulation)		
3646236	Open reflector	millions	S
3646238	Enclosed	millions	S
	Recessed IC (direct contact with ceiling insulation):		
3646239	Open reflector	millions	S
3646241	Enclosed	millions	S
	Florescent:		
	Recessed troffers, air handling (including heat extraction versions):		
3646243	Lensed	millions	S
3646244	Metal louvered	millions	S
3646245	Nonmetal louvered	millions	S
	Recessed troffers, nonair handling (including heat extraction versions):		
3646246	Lensed	millions	S
3646247	Metal louvered	millions	S
3646248	Nonmetal louvered	millions	S
3646249	Striplights (surface)	millions	S

Product code	CIR and product description	Unit of measure	Data collected
	MA36L, ELECTRIC LIGHTING FIXTURES—Con.		
3646200	Electric lighting fixtures, commercial and institutional type, except spotlights and portable—Con.		SV
	Florescent—Con.		
3646250	Striplights (recessed)	millions	S
3646255	Ceiling systems, including luminous ceilings		SV
3646256	Plastics wraparound	millions	S
3646257	Wall mounted fixtures	millions	S
3646265	Under-cabinet mount task light	millions	S
	Surface and pendant, all other:		
3646266	Lensed	millions	S
3646268	Louvered	millions	S
	Compact fluorescent downlights:		
3646270	Recessed IC (direct contact with ceiling insulation)	millions	S
3646272	Recessed non-IC (3-inch minimum clearance from ceiling insulation)	millions	S
3646259	Enclosed and gasketed (clean room fixtures)	millions	S
3646274	Indirect lighting, furniture mount	millions	S
3646276	Indirect lighting, pendant mount	millions	S
3646261	Indoor signs, including electroluminescent (exit, directional, etc.)	millions	S
3646262	Indoor emergency lighting (automatic self-powered)	millions	S
3646263	Vandal-resistant (specialty products designed for this application)	millions	S
3646264	All other		SV
3646269	Components and renewal parts for commercial and industrial type sold separately		SV
3646300	Electric lighting fixtures, industrial-type		SV
	General lighting:		
3646311	Incandescent	millions	S
3646313	Florescent	millions	S
	High energy discharge types (including integrally mounted and remote ballasts):		
3646306	Open reflector	millions	S
3646308	Enclosed	millions	S
3646310	Parking garage lighting (fixtures designed specifically for this application)	millions	S
	Hazardous lighting, UL listed, class, division, group:		
3646316	Incandescent (including portable)		SV
3646317	Florescent (including portable)		SV
3646319	High intensity discharge types (including integrally mounted and remote ballasts)		SV
3646329	Components and renewal parts for industrial type sold separately		SV
3647000	Vehicular lighting equipment		SV
	Motor vehicle incandescent lighting equipment:		
	Spot, fog, and auxiliary equipment (excluding bulbs):		
3647001	Shipments for domestic replacement		SV
3647003	Shipments to U.S. motor vehicle manufacturers for use in original equipment		SV
3647005	Shipments for export		SV
	Composite headlamp assemblies (excluding bulbs):		
3647011	Shipments for domestic replacement		SV
3647013	Shipments to U.S. motor vehicle manufacturers for use in original equipment		SV
3647015	Shipments for export		SV
	Other motor vehicle lighting equipment exc.bulbs, inc. parking, dome, and tail:		
3647022	Shipments for domestic replacement		SV
3647023	Shipments to U.S. motor vehicle manufacturers for use in original equipment		SV
3647024	Shipments for export		SV
3647029	Other than motor vehicle lighting equipment, including fluorescent fixtures		SV
3647039	Components and renewal parts for vehicular lighting sold separately		SV
3648500	Outdoor lighting equipment, excluding lamps		SV
	Street and highway lighting luminaires (including bridge and tunnel lighting):		
3648511	Incandescent (filament and quartz iodine)	millions	S
	High intensity discharge types (including low pressure sodium, etc.):		
3648513	Open	millions	S
3648514	Enclosed	millions	S
3648515	Florescent	millions	S
3648517	Special-purpose luminaires for highmast, sign lighting, and expressway fixtures (excluding value of poles)	millions	S
	Floodlights, area, and site lighting luminaires:		
	General-purpose floodlighting:		
3648520	Incandescent filament	millions	S
3648522	Incandescent quartz iodine	millions	S
3648523	High intensity discharge types, general (including low pressure sodium and integrally mounted and remote ballasted)	millions	S
3648526	Florescent	millions	S
3648527	HID sportslighting (fixtures designed specifically for this application)	millions	S
3648525	All other floodlighting, such as underwater fountain and pool lighting	millions	S
	HID area and site lighting:		
3648535	Site lighting (less than 20 foot mounting)	millions	S
3648539	Bollards	millions	S
3648540	Post-top	millions	S
3648542	Large area lighting (20 to 60 foot mounting)	millions	S
3648532	Wall packs (such as high intensity discharge, incandescent, and quartz)	millions	S
3648534	Outdoor PAR lampholders	millions	S
	Aviation ground lighting equipment (for fixed-base airports):		
3648531	Runway approach lighting (including fixtures, regulators, insulating transformers, isolating lamp transformers, etc.)		SV
3648533	Runway (except runway approach), taxiway and ramp light, including fixtures, regulators, and isolating lamp transformers		SV
	Poles, standards, newels, brackets, and accessories:		
	For street and highway lighting (including traffic signal standards):		
3648536	Steel and cast iron poles		SV
3648538	Aluminum poles		SV
3648540	Concrete poles		SV
3648537	Wood poles		SV
	For area lighting, sports, and other off-street use:		
3648546	Steel and cast iron poles (60 feet or more)		SV
3648547	Steel and cast iron poles (less than 60 feet)		SV
3648548	Aluminum poles		SV
3648549	Concrete and other nonwood poles		SV
	Other floodlighting and area lighting equipment:		
3648543	Spotlights (including indoor and stage, excluding vehicular)	millions	S
3648545	All other outdoor lighting equipment		SV
3648598	Components and renewal parts for outdoor lighting equipment sold separately	millions	S
	MA36M, CONSUMER ELECTRONICS		
	Automotive audio equipment (except speakers)	thousands	S
3651100	AM-FM radios with tape player combinations	thousands	S
3651134	CD players and radio/ CD combinations	thousands	S
3651139	Other automotive audio equipment, including equalizers and amplifiers (except speakers)	thousands	S
3651141			
3651200	Household television receivers, including combinations		SV
3651218	High-definition television	thousands	S
3651231	Projection television	thousands	S
	CRT-based color television:		
3651241	50 cm (19.7 inch) and under	thousands	S
3651251	Over 50 cm (19.7 inch)	thousands	S
3651261	Other household television receivers	thousands	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

Product code	CIR and product description	Unit of measure	Data collected
	MA36M, CONSUMER ELECTRONICS—Con.		
3651400	Other consumer audio and video equipment (except speakers)		SV
3651452	Coin-operated audio equipment	thousands	S
3651461	Compact and video disc players	thousands	S
3651478	Power amplifiers, including preamplifiers	thousands	S
3651481	Receivers, tuners, and other consumer audio equipment incorporating radio reception	thousands	S
3651467	Equalizers	thousands	S
3651469	Audio tape recorders and players	thousands	S
3651483	Other consumer audio and video equipment (except speakers)	thousands	S
3651500	Speakers, microphones, and home-type electronic kits		SV
3651551	Single loudspeakers mounted in an enclosure	thousands	S
3651552	Multiple loudspeakers mounted in an enclosure	thousands	S
3651553	Other loudspeakers, including unmounted speakers sold separately	thousands	S
3651555	Microphones	thousands	S
3651567	Home-type electronic kits designed for consumer assembly	thousands	S
3651594	Public address systems, including musical instrument amplifiers	thousands	S
3679930	Earphones, headsets, and phonograph cartridges, pickups, needles, and styli	thousands	S
	MA36P, COMMUNICATION EQUIPMENT		
3661100	Telephone switching and switchboard equipment		SV
3661123	Central office switching equipment:		
3661128	Local switching		SV
3661128	Toll switching		SV
3661141	Private branch exchange switching equipment:		
3661143	Up to 99 lines		SV
3661143	100 to 399 lines		SV
3661145	400 to 1,000 lines		SV
3661149	Over 1,000 lines		SV
3661151	Cellular mobile telephone switching		SV
3661155	Packet switching equipment		SV
3661191	Other telephone switching and switchboard equipment		SV
3661198	Parts, components, and subassemblies for telephone switching equipment		SV
3661300	Carrier line equipment and modems		SV
3661301	Carrier line equipment:		
3661305	Repeaters and line transceivers:		
3661309	Analog		SV
3661309	Digital, all copper wire		SV
3661309	Digital, optical input or output		SV
3661330	Multiplex equipment, including channel banks:		
3661333	Analog		SV
3661336	Digital, all copper wire		SV
3661336	Digital, optical input or output		SV
3661341	Other subscriber loop carrier terminal and line equipment:		
3661345	Analog		SV
3661349	Digital, all copper wire		SV
3661349	Digital, optical input or output		SV
3661351	Other carrier line equipment:		
3661355	Analog		SV
3661359	Digital, meeting or exceeding T1 standard (1.5 mbps)		SV
3661359	Other digital		SV
3661361	Modems (encased):		
3661365	Up through 10,000 bps	thousands	S
3661365	Over 10,000 bps	thousands	S
3661400	Other telephone and telegraph equipment and components		SV
3661421	Telephone sets:		
3661425	Single line and ISDN sets	thousands	S
3661429	Key sets	thousands	S
3661436	Public pay telephone equipment	thousands	S
3661436	Cordless handsets	thousands	S
3661438	Other telephone sets and accessories (e.g., headsets)	thousands	S
3661441	Other data communications equipment:		
3661443	Routers and gateways		SV
3661445	Bridges		SV
3661447	Terminal servers		SV
3661449	Concentrators		SV
3661451	Other data communications equipment (front end processors, translators, etc.)		SV
3661455	Voice frequency equipment		SV
3661459	Telephone key systems equipment		SV
3661461	Video teleconferencing equipment (video CODECS and other systems equipment)		SV
3661463	Voice/ call message processing equipment, including answering devices:		
3661465	Voice mail equipment		SV
3661467	Voice response equipment		SV
3661469	Automated attendance equipment		SV
3661491	Automatic call distributors		SV
3661497	Other voice or call processing equipment		SV
3661499	Facsimile communications equipment (complete)		SV
3663100	Other telephone/ telegraph equipment		SV
3663100	Parts, components, and subassemblies for other telephone equipment		SV
3663100	Communications systems and equipment, except broadcast		SV
3663117	Radio communications systems by radio station type:		
3663119	Amateur		SV
3663121	Broadcast (sound and television)		SV
3663123	Earth exploration		SV
3663125	Meteorological		SV
3663127	Fixed		SV
3663129	Intersatellite		SV
3663131	Telecommand		SV
3663133	Telemetry		SV
3663135	Radio navigational and locational		SV
3663142	Aeronautical communications		SV
3663144	Mobile:		
3663146	Cellular system equipment (except switching equipment)		SV
3663148	Other conventional and trunked system equipment		SV
3663153	Other mobile		SV
3663155	Checkout, monitoring, evaluation, and other electronic support equipment for communications systems		SV
3663157	Antenna systems, sold separately:		
3663159	Below 890 MHz		SV
3663161	890 MHz and above		SV
3663163	Fiber optics equipment (excluding connectors, cable, diodes, and multiplexors):		
3663157	Equipment meeting SONET standards:		
3663159	OC-1 equipment		SV
3663161	OC-2 and -3 equipment		SV
3663163	OC-4 up through OC-9 equipment		SV
3663163	Greater than OC-9 equipment		SV

Product code	CIR and product description	Unit of measure	Data collected
	MA36P, COMMUNICATION EQUIPMENT—Con.		
3663100	Communications systems and equipment, except broadcast—Con.		SV
3663169	Fiber optics equipment (excluding connectors, cable, diodes, and multiplexors)—Con.		SV
3663173	Equipment not meeting SONET standards		SV
3663173	Other carrier equipment, n.e.c.		SV
3663179	Other communications systems and equipment		SV
3663200	Broadcast, studio, and related electronic equipment		SV
3663212	Audio equipment (excluding consumer and PA types):	thousands	S
3663213	Amplifiers and preamplifiers	thousands	S
3663217	Control consoles and switchers		SV
3663217	Other audio equipment, including power supplies, terminal equipment, broadcast recorders, etc.		SV
3663222	Video equipment (excluding consumer and PA types):	thousands	S
3663224	Amplifiers	thousands	S
3663224	Television cameras	thousands	S
3663225	Videotape recorders	thousands	S
3663228	Other (power supplies, synchronization equipment, terminal equipment monitors, telecine chains, etc.)		SV
3663231	Transmitters, translators, RF power amplifiers, and related equipment:		SV
3663234	AM and FM transmitters		SV
3663234	Television transmitters		SV
3663237	Other (broadcast transmission line equipment, phasing equipment, television boosters and repeaters)		SV
3663239	Studio transmission links (STL) and remote pickup equipment		SV
3663241	Cable television (master antennae and CATV equipment):		SV
3663246	Head end equipment (antenna baluns, carrier generators, head-end control units, amplifiers, etc.)		SV
3663246	Subscriber converters		SV
3663249	Other subscriber equipment (decoders, switchers, wall outlet taps, distribution amplifiers, etc.)		SV
3663243	Broadcasting transmitting antennae and community antenna systems		SV
3663244	Closed circuit television systems and equipment		SV
3663245	Other broadcast, studio, theater, and commercial sound equipment, sold separately		SV
3663259	Parts and accessories for broadcast, studio, and related electronic equipment (sold separately)		SV
3669100	Alarm systems		SV
3669148	Intrusion detection:		SV
3669149	Local		SV
3669149	Central station		SV
3669150	Direct connect		SV
3669151	Holdup systems (commercial and industrial)		SV
3669152	Automotive		SV
3669153	Fire detection and prevention:		SV
3669154	Smoke and heat detection alarms:		SV
3669154	Ionization chamber type		SV
3669156	Other, including photocell type		SV
3669157	Central station		SV
3669157	Direct connect		SV
3669159	Other intercommunication and alarm systems, including electric sirens, horns, and security locking systems		SV
3669200	Vehicular and pedestrian traffic control equipment		SV
3669242	Signal heads, parts, and accessories		SV
3669243	Electronic and electromechanical controllers, detectors, and sensors		SV
3669245	Railway highway grade crossing signals (excluding relays and other control apparatus)		SV
3669246	Other railway signal systems and safety control equipment		SV
3669300	Intercommunications systems, including inductive paging systems		SV
3669312	Wired		SV
3669313	Nonwired		SV
3699100	Electronic teaching machines, teaching aids, trainers, and simulators		SV
3699181	Electronic trainers and simulators		SV
3699185	Other electronic teaching machines and teaching aids		SV
3699283	Laser designator/ ranging equipment		SV
3699284	Laser instrumentation (laboratory alignment devices, surveying equipment, etc.)		SV
3699285	Industrial laser equipment (material processing, printing, wirephoto)		SV
3699289	Other laser equipment:		SV
3699292	Lasers (except semiconductor lasers):		SV
3699292	Dye lasers		SV
3699295	Gas lasers		SV
3699298	Solid-state lasers		SV
3699298	Laser generators, power supplies, and other laser equipment and accessories sold separately		SV
3699500	Ultrasonic equipment, n.e.c.		SV
3699900	Other electronic systems and equipment, n.e.c.		SV
3699904	Automatic garage door openers		SV
3699951	Consumer electronic equipment, n.e.c.		SV
3699955	Scientific electronic equipment, n.e.c.		SV
3699961	Industrial electronic equipment, n.e.c.		SV
3699965	All other electronic equipment, n.e.c.		SV
	MA36Q, SEMICONDUCTORS, PRINTED CIRCUIT BOARDS, AND RELATED EQUIPMENT		
3671300	Transmittal, industrial, and special-purpose electron tubes (except x-ray)		SV
3671312	Power and special-purpose tubes:	thousands	S
3671317	High vacuum tubes:	thousands	S
3671323	Triodes and multigrid external anodes		S
3671326	Other, including diodes, triodes, and multigrid internal anodes		S
3671323	Gas and vapor tubes:	thousands	S
3671326	Thyratrons, including hydrogen	thousands	S
3671331	Other gas and vapor tubes		S
3671331	Klystron microwave tubes:	thousands	S
3671336	Amplifier	thousands	S
3671341	Reflex	thousands	S
3671341	Other klystrons	thousands	S
3671345	Magnetron microwave tubes:	thousands	S
3671350	Pulsed, fixed and tunable	thousands	S
3671355	Other, including cross-field and continuous wave		S
3671361	Microwave traveling wave tubes, forward continuous wave (cw):	thousands	S
3671365	Less than and including 10 watts cw power output rating	thousands	S
3671366	More than 10 watts cw power output rating	thousands	S
3671366	Microwave traveling wave tubes, forward wave, pulsed power:	thousands	S
3671392	Less than and including 1 kW peak power output rating	thousands	S
3671370	More than 1 kW peak power output rating	thousands	S
3671373	Microwave traveling wave tubes, backward wave	thousands	S
3671376	Light sensing tubes:	thousands	S
3671376	Camera tubes, photo emissive, and photo conductive	thousands	S
3671376	Image intensifiers and converters	thousands	S
3671376	Photo multipliers and other	thousands	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-41

Product code	CIR and product description	Unit of measure	Data collected
	MA36Q, SEMICONDUCTORS, PRINTED CIRCUIT BOARDS, AND RELATED EQUIPMENT—Con.		
3671300	Transmittal, industrial, and special-purpose electron tubes (except x-ray)—Con.		SV
3671381	Light emitting devices:		
	Storage tubes, all sizes	thousands	S
3671386	Cathode-ray tubes (CRT), industrial and military:		
	Color	thousands	S
3671387	Monochrome	thousands	S
3671388	Special display devices (including alphanumeric readout tubes):		
	Figure indicating tubes	thousands	S
3671391	Other	thousands	S
3671396	Miscellaneous special-purpose tubes, including reference cavities, radiation detection, etc.		SV
3671400	Receiving-type electron tubes, including cathode-ray picture tubes (new and rebuilt)		SV
3671401	Receiving-type electron tubes, all types	millions	S
	Cathode-ray picture tubes:		
	Television tubes (include any defective tube that has been rebuilt):		
3671405	Black and white, new and rebuilt	millions	S
3671411	Color, new, 19 inch and under (49 cm and under)	millions	S
3671413	Color, new, 20 inch (50 cm)	millions	S
3671415	Color, new, 21 inch through 25 inch (51 cm thru 63 cm)	millions	S
3671419	Color, new, 26 inch and over (66 cm and over)	millions	S
3671426	Color, rebuilt	millions	S
3671500	Electron tube parts, except glass blanks, bases, getters, cathodes, headers, etc.		SV
3672000	Printed-circuit (wiring) boards		SV
3672012	Single-sided glass printed		SV
3672014	Double-sided glass printed		SV
3672016	Multilayer glass printed		SV
3672018	Paper/ mat/ composite printed		SV
3672022	Flexible circuit printed		SV
3672024	Other rigid laminates		SV
3672026	Receipts for contract work on printed circuit boards		SV
3674100	Integrated microcircuit packages		SV
3674110	Hybrid integrated circuits, thick film composed of material deposited by silk		SV
3674111	Hybrid integrated circuits, thin film composed of material deposited by vacuum		SV
3674112	Hybrid integrated circuits, multichip circuits not incorporating film techniques		SV
	Monolithic integrated circuits, digital, nonsilicon (e.g. gallium arsenide):		
3674119	Memory	millions	S
3674128	Logic and other	millions	S
	Monolithic integrated circuits, digital, silicon:		
	Bipolar transistors, memory:		
3674107	Static read/write random access (SRAM)	millions	S
3674109	Other memory	millions	S
	Other bipolar transistors, including logic:		
3674113	Transistor-transistor logic (TTL)	millions	S
3674114	Emitter-coupled logic (ECL)	millions	S
3674115	Other	millions	S
	Metal oxide semiconductor (MOS) field effect transistors:		
3674181	Volatile memory DRAM's (dynamic read/write random access), through 80,000 bits	millions	S
3674182	Volatile memory DRAM's, over 80,000 bits through 300,000 bits	millions	S
3674183	Volatile memory DRAM's, over 300,000 bits through 3,000,000 bits	millions	S
3674184	Volatile memory DRAM's, over 3,000,000 bits through 15,000,000 bits	millions	S
3674185	Volatile memory DRAM's, over 15,000,000 bits	millions	S
3674191	Volatile memory SRAM's (static read/write random access), through 40,000 bits	millions	S
3674192	Volatile memory SRAM's, over 40,000 bits through 80,000 bits	millions	S
3674193	Volatile memory SRAM's, over 80,000 bits through 300,000 bits	millions	S
3674194	Volatile memory SRAM's, over 300,000 bits through 3,000,000 bits	millions	S
3674195	Volatile memory SRAM's, over 3,000,000 bits	millions	S
3674196	Nonvolatile EEPROM's (electrically erasable programmable read-only memory), through 80,000 bits	millions	S
3674197	Nonvolatile EEPROM's, over 80,000 bits through 900,000 bits	millions	S
3674198	Nonvolatile EEPROM's, over 900,000 bits	millions	S
3674186	Nonvolatile EPROM's (erasable (nonelectrically) programmable read-only memory), through 80,000 bits	millions	S
3674187	Nonvolatile EPROM's, over 80,000 bits through 900,000 bits	millions	S
3674188	Nonvolatile EPROM's, over 900,000 bits	millions	S
3674190	Other nonvolatile memories	millions	S
3674136	Other microprocessors having an internal data bus of 8 bits or less	millions	S
3674138	Other microprocessors having an internal data bus of 16 bits	millions	S
3674139	Other microprocessors having an internal data bus of 32 bits or more	millions	S
3674118	Other (microcontrollers, ASICs, PLA's, etc.)	millions	S
	Other, digital, silicon, including bipolar combined with MOS:		
3674120	Complementary BiMOS (BiCMOS) memory	millions	S
3674121	Other complementary BiMOS (BiCMOS), including logic	millions	S
3674126	Other digital silicon ICs	millions	S
	Nondigital silicon monolithic integrated circuits (e.g., linear, analog):		
3674149	Radio frequency	millions	S
3674102	Other, analog	millions	S
3674103	Other, including mixed signal (analog/digital), logic	millions	S
3674104	Other, including mixed signal (analog/digital), other	millions	S
	Hybrid integrated circuits:		
3674108	Radio frequency	millions	S
3674131	Other	millions	S
3674106	Other	millions	S
3674200	Transistors		SV
3674263	Signal (less than 1 watt dissipation)		SV
3674264	Power (1 watt or more dissipation)		SV
3674300	Diodes and rectifiers		SV
3674322	Signal diodes and assemblies thereof (maximum current 0.5 amps)	millions	S
3674342	Semiconductor rectifiers/power diodes and assemblies	millions	S
3674394	Zener diodes (voltage regulator and voltage reference diodes)	millions	S
3674312	Selenium rectifiers	millions	S
3674383	Microwave diodes (mixers, detectors, varactors, parametric, harmonic generators, etc.)	millions	S
3674900	Other semiconductor devices		SV
	Light sensitive and light emitting devices:		
3674912	Solar cells		SV
	Light emitting diodes (LED):		
3674914	Discrete, infrared and laser		SV
3674916	Alpha or numeric displays		SV
3674922	Photodiodes, including infrared detectors		SV
3674924	Optical coupled isolators, including sensors and emitters		SV
3674929	Other light sensitive and light emitting devices, including photovoltaic devices		SV
	Other semiconductor devices:		
3674985	Thyristors (SCR's, triacs, PNPN diodes)		SV
3674986	Hall effect devices		SV
3674987	All other semiconductor devices, including tunnel diodes, thermoelectric semiconductors, etc.		SV

Product code	CIR and product description	Unit of measure	Data collected
	MA36Q, SEMICONDUCTORS, PRINTED CIRCUIT BOARDS, AND RELATED EQUIPMENT—Con.		
3674900	Other semiconductor devices—Con.		SV
	Semiconductor parts:		
	Chips and wafers:		
3674994	For integrated circuits (IC's)		SV
3674996	For discrete semiconductors		SV
3674997	All other semiconductor parts (headers, packages, heat sinks, and other accessories, etc.)		SV
3675000	Capacitors		SV
	Fixed:		
	Paper, plastics (film), metalized, and dual (film/ paper) dielectric ac types:		
3675013	Less than 300 volts	thousands	S
3675016	300 volts to 599 volts	thousands	S
3675017	600 volts to 999 volts	thousands	S
3675018	1,000 volts or more	thousands	S
	Paper, plastics film, metalized, and film/ paper dielectric dc types and other:		
3675019	Axial lead	millions	S
3675021	Radial lead	millions	S
3675024	Chips and other leaded devices	millions	S
	Tantalum electrolytic:		
3675026	Metal case (including foil and wet)	millions	S
3675028	Dipped	millions	S
3675031	Chips	millions	S
3675033	Other leaded (molded axial and molded radial)	millions	S
	Aluminum electrolytic:		
3675036	18 mm diameter or less	millions	S
3675037	More than 18 mm through 35 mm	millions	S
3675041	Small can style (more than 35 mm through 51 mm)	millions	S
3675043	Other can style (more than 51 mm)	millions	S
3675045	Ac motor start	millions	S
	Ceramic dielectric, single layer:		
3675047	Axial	millions	S
3675049	Radial	millions	S
3675051	Chips	millions	S
	Ceramic dielectric, multilayer:		
3675053	Axial leads	millions	S
3675055	Radial leads	millions	S
3675057	Chips	millions	S
	Other:		
3675059	Mica dielectric	millions	S
3675061	All other fixed	millions	S
	Variable:		
3675063	Mica, ceramic or glass dielectric	millions	S
3675069	Other	millions	S
3675075	Parts of capacitors (including unfinished chips for further finishing and assembly)		SV
3676000	Resistors		SV
	Fixed carbon resistors, composition or film types:		
3676010	Surface mounted (SMD), having two terminals, cylindrical leadless	millions	S
	Resistors, having two leads:		
3676012	Carbon composition	millions	S
3676014	Carbon film	millions	S
	Other fixed resistors (power capacity 20 W or less):		
	Surface mounted (SBD), having two terminals:		
3676024	Flat resistor chips	millions	S
3676025	Cylindrical leadless resistors (including metal film, metal oxide, and thick cermet film)	millions	S
	Surface mounted (SMD), having more than two terminals:		
3676028	Dual in-line package	millions	S
3676032	Other (including flat packs)	millions	S
	Resistor, having two leads:		
3676034	Wirewound	millions	S
3676036	Other (including metal film, metal oxide, and thick cermet film)	millions	S
	Resistor networks, having more than two leads:		
3676038	Single in-line	millions	S
3676042	Dual in-line	millions	S
3676044	Other	millions	S
	Variable, nonwirewound:		
	Trimmers:		
3676051	Single-turn, carbon and other film	millions	S
3676054	Multiturn, carbon and other film	millions	S
3676058	Surface mounted	millions	S
	Potentiometers:		
3676059	Carbon types	millions	S
3676061	Cermet types	millions	S
	Variable, wirewound:		
3676065	Nonprecision, single turn (wiper or shaft traverses 360 degrees or less)	millions	S
	Single-turn trimmers:		
3676066	Enclosed	millions	S
3676068	Other	millions	S
	Multi-turn trimmers:		
3676069	Square and round	millions	S
3676071	Rectangular	millions	S
3676073	Potentiometers	millions	S
	Miscellaneous:		
3676075	Varistors	millions	S
3676077	Thermistors, bead-type, disk, rod	millions	S
3676079	Parts for resistors		SV
3677000	Coils, transformers, reactors, and chokes for electronic applications		SV
3677032	Audio frequency transformers	millions	S
3677033	Low frequency chokes	millions	S
3677041	Plate and filament transformers (including auto-transformers, except toroidal)	millions	S
3677061	Pulse transformers, computer, and other types	millions	S
3677012	Radio frequency chokes	millions	S
3677013	Radio frequency coils	millions	S
3677014	Intermediate frequency transformers	millions	S
3677071	Television transformers and reactors (horizontal output, vertical deflection, etc.)	millions	S
3677091	Toroidal windings (transformers and reactors), except complete magnetic amplifiers	millions	S
3677092	Other (balun coils, permeability tuning devices, etc.)		SV
3678100	Coaxial (RF) connectors		SV
3678122	Subminiature (SMA, SMB, SMC)	millions	S
3678121	Miniature (BNC, PNC, MHB)	millions	S
3678124	Other standard and precision	millions	S
3678200	Cylindrical connectors		SV
3678225	Heavy-duty and standard	millions	S
3678229	Miniature	millions	S
3678231	Subminiature	millions	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-43

Product code	CIR and product description	Unit of measure	Data collected
	MA36Q, SEMICONDUCTORS, PRINTED CIRCUIT BOARDS, AND RELATED EQUIPMENT—Con.		
3678300	Rack and panel (rectangular) connectors		SV
3678335	Integral shell, Mil-C-22857 (8434) and similar types	millions	S
	Subminiature:		
3678342	Ribbon (including planar cable type)	millions	S
3678344	D-subminiature (including planar cable type)	millions	S
3678346	Microminiatures	millions	S
3678400	Printed circuit connectors		SV
3678444	Card insertion types	millions	S
	Two-piece types:		
3678448	Post, header and receptacle type	millions	S
3678449	Other two-piece types	millions	S
3678500	Other connectors, including parts		SV
3678541	Hermetic sealed (except single-contact and coaxial types)	millions	S
3678551	Plate module types	millions	S
3678553	Fiber optic connectors	millions	S
3678559	Other connectors, including planar cable (flat conductor or ribbon cable) (excluding rack and panel)	millions	S
3678554	Miscellaneous special-purpose	millions	S
3678556	Parts for connectors (connectors shipped but still requiring further manufacture)		SV
3679100	Filters, except microwave and piezoelectric devices		SV
	Filters, except microwave:		
3679111	Mechanical, excluding optical lenses (germanium silicon, fused quartz, rock salt, and other)	thousands	S
	Radio frequency and electromagnetic interference control filters:		
3679113	Ceramic dielectric	thousands	S
3679115	Combination or other dielectric	thousands	S
3679121	Electronic wave filters (lc band and high pass)	thousands	S
	Piezoelectric devices:		
	Oscillator crystals:		
3679131	AT-cut	thousands	S
3679133	Crystal oscillators:	thousands	S
	Crystal oscillators:		
3679135	Oven	thousands	S
3679137	Temperature/ voltage controlled (tcxo/ vcxo)	thousands	S
3679139	Hybrid	thousands	S
3679141	Other	thousands	S
	Crystal filters:		
3679143	Monolithic (filter crystals and/ or monolithic filter not assembled into filters)	thousands	S
3679145	Packaged AT-cut (packaged monolithic, tandem monolithic, and resonator filter assemblies)	thousands	S
3679147	Other	thousands	S
	Crystal blanks:		
3679151	AT-cut	thousands	S
3679155	Other	thousands	S
3679300	Microwave components and devices, except antennae, tubes, and semiconductors		SV
3679311	Ferrite (including yttrium garnets) microwave components		SV
	Microwave devices:		
3679321	Attenuators, dummy loads, high- and low-power terminations, etc.		SV
3679323	Cavities, including amplifier cavities and coaxial tuned cavities		SV
3679325	Couplers (directional couplers, hybrid junctions, etc.)		SV
3679327	Reactive microwave components, n.e.c.		SV
3679329	Switches, coaxial and waveguide		SV
3679331	Rigid waveguide and fittings, including bend and twists, couplings, flanges, etc.		SV
3679333	Flexible waveguides and fittings		SV
3679351	Other microwave components, including coaxial to waveguide and other transitions		SV
3679371	Microwave subassemblies, including parametric amplifiers and other solid-state		SV
3679500	Transducers, electrical/ electronic input or output, n.e.c.		SV
3679511	Electroacoustic, including sonar, ultrasonic, and vibration	millions	S
	Electromechanical:		
3679521	Accelerometers	thousands	S
3679523	Pressure	thousands	S
3679525	Strain gauges and other mechanical	thousands	S
3679531	Thermoelectric, including pyrometers and thermocouples	thousands	S
3679598	Other, including optical, chemical, magnetic, and nuclear	thousands	S
3679600	Switches, mechanical types for electronic circuitry		SV
3679611	Toggle, including miniature and subminiature		SV
3679615	Slide, including rocker, miniature and subminiature		SV
3679619	Rotary selector, including lever and jog-lever, miniature and subminiature		SV
3679621	Keyboard		SV
3679625	Pushbutton		SV
3679629	Snap-action		SV
3679631	Thumbwheel		SV
3679698	Other switches, n.e.c. (including dip)		SV
3679800	Complex components (two components or more packaged and shipped as a single unit)		SV
3679811	Memory boards (including boards for adding memory to peripherals)		SV
3679813	Peripheral controller boards (e.g., graphics boards, I/ O controllers)		SV
3679817	Instrumentation boards (e.g., D/ A convertors, frequency counters)		SV
3679819	Communication boards (e.g., fax, modems, LAN adaptors)		SV
3679821	Other board level products for use within a computer system		SV
	Loaded computer processor boards and board subassemblies for replacement, upgrade, further assembly, etc.:		
3679831	Under \$1,000 MLP		SV
3679833	\$1,000 to \$5,000 MLP		SV
3679835	\$5,000 to \$15,000 MLP		SV
3679837	\$15,000 to \$50,000 MLP		SV
3679839	\$50,000 to \$250,000 MLP		SV
3679841	\$250,000 to \$1,000,000 MLP		SV
3679843	Over \$1,000,000 MLP		SV
3679920	Other electronic components, n.e.c.		SV
	Antenna systems, except structural towers sold separately:		
3679907	Home antennae	millions	S
3679908	Auto antennae	millions	S
3679909	Antenna accessories, pedestals, drives, passive reflectors, rotators, etc.	millions	S
3679911	Delay lines, distributed constant, lumped constant, magneto-strictive, etc.	millions	S
3679913	Oscillators, except instrumentation and crystal types	millions	S
3679914	Rectifiers, electronic, except solid state	millions	S
3679915	Variable frequency oscillators and antenna tuner kits to be assembled by purchaser		SV
	Magnetic recording and reproducing heads:		
3679916	Audio	millions	S
3679917	Video	millions	S
3679918	Digital	millions	S
3679919	Instrumentation	millions	S
	Static power supply convertors for electronic applications, sold separately:		
3679921	Regulated	millions	S
3679923	Unregulated	millions	S
3679925	Variable frequency	millions	S
3679929	Other (ac, dc, converters and inverters, klystron, vibrators, etc.)		SV
3679931	Electronic cable harness assemblies		SV

Product code	CIR and product description	Unit of measure	Data collected
	MA36Q, SEMICONDUCTORS, PRINTED CIRCUIT BOARDS, AND RELATED EQUIPMENT—Con.		
3679920	Other electronic components, n.e.c.—Con.		SV
3679933	Cryogenic cooling devices (cryostats, etc.) for infrared detectors, masers		SV
3679951	Liquid crystal displays and other liquid devices		SV
3679953	Magnetic bubble memories		SV
3679955	Magnetic cores		SV
	Electronic parts, n.e.c., and specialized electronic hardware:		
	Sockets for electronic component insertion:		
3679961	Tube sockets		SV
3679963	Relay sockets		SV
3679965	Discrete semiconductor sockets		SV
3679966	Integrated circuit sockets		SV
3679969	Other sockets, including sockets for crystals and switches, etc.		SV
	Enclosures for electronic equipment:		
3679971	Metal enclosures, assembled (welded, etc.)		SV
3679973	Metal enclosures, modular assembled, including card insertion, rack and panel, etc.		SV
3679979	Other enclosures, n.e.c.		SV
3679998	All other electronic parts, n.e.c., and specialized electronic hardware, n.e.c.		SV
	M37G, CIVIL AIRCRAFT AND ENGINES		
3721500	Complete civil aircraft		SV
	Civil aircraft:		
	Unladen weight not exceeding 2,000 kg (4,409 pounds):		
3721501	Single engine	number	S
3721503	Multiengine	number	S
3721505	Unladen weight exceeding 2,000 kg (4,405 pounds) but not exceeding 15,000 kg (33,069 pounds)	number	S
3721507	Unladen weight exceeding 15,000 kg (33,040 pounds)	number	S
	Helicopters (rotary wing, powered):		
3721532	Unladen weight not exceeding 2,000 kg (4,405 pounds)	number	S
3721534	Unladen weight exceeding 2,000 kg (4,405 pounds)	number	S
	Other civil aircraft (nonpowered) and kits:		
3721535	Balloons, dirigibles, and airships	number	S
3721537	Gliders and sailplanes	number	S
3721539	Other aircraft, including aircraft sold in kits (except hang gliders)	number	S
3724200	Complete civil aircraft engines		SV
3724201	Spark-ignition reciprocating or rotary internal-combustion	number	S
	Turbojet and turbofan:		
3724203	Thrust not exceeding 25 kn (5,620 pounds)	number	S
3724205	Thrust exceeding 25 kn (5,620 pounds)	number	S
	Turboshaft (turbo propeller):		
3724207	Power not exceeding 1,100 kW (820 hp)	number	S
3724209	Power exceeding 1,100 kW (820 hp)	number	S
3724214	Other, including auxiliary power units, excluding missile and space engines	number	S
	M37L, TRUCK TRAILERS		
3715100	Complete van trailers and chassis (except detachables)		SV
	Closed top:		
	Insulated (refrigerated):		
3715102	Steel	thousands	S
3715114	Aluminum	thousands	S
3715160	Flexible reinforced plastics	thousands	S
	Semi-insulated (nonrefrigerated):		
3715104	Steel	thousands	S
3715116	Aluminum	thousands	S
3715162	Flexible reinforced plastics	thousands	S
	Drop frame type (12 inch or more drop):		
3715105	Steel	thousands	S
3715115	Aluminum	thousands	S
3715164	Flexible reinforced plastics	thousands	S
	Livestock (including livestock drop frame):		
3715107	Steel	thousands	S
3715117	Aluminum	thousands	S
	All other closed-top dry freight vans, less than 30 feet long:		
3715110	Steel	thousands	S
3715123	Aluminum	thousands	S
3715167	Fiberglass reinforced plastics	thousands	S
	All other closed-top dry freight vans, 30 feet or greater:		
3715111	Steel	thousands	S
3715125	Aluminum	thousands	S
3715169	Fiberglass reinforced plastics	thousands	S
	Open top including low-side grain, fruit, etc.:		
3715112	Steel	thousands	S
3715121	Aluminum	thousands	S
3715170	Flexible reinforced plastics	thousands	S
	MA38B, SELECTED INSTRUMENTS AND RELATED PRODUCTS		
3491800	Automatic valves (regulating and control type) and parts (except nuclear)		SV
	Automated control valves:		
	Pneumatically actuated sliding stem valves:		
3491801	Globe body	thousands	S
3491802	All other types	thousands	S
	Pneumatically actuated rotary valves:		
3491803	Ball	thousands	S
3491804	Butterfly	thousands	S
3491806	Plug	thousands	S
3491807	All other rotary valves (including eccentric disk)	thousands	S
3491808	All other pneumatic power-operated control valves	thousands	S
3491809	Parts for pneumatic actuated valves (sold separately)		SV
	All other actuation, including electric-actuated and electro-hydraulic actuated:		
3491811	Sliding stem valves, globe body	thousands	S
3491812	All other sliding stem valve types	thousands	S
3491813	Rotary ball valves	thousands	S
3491814	Rotary butterfly valves	thousands	S
3491816	Rotary plug valves	thousands	S
3491817	All other rotary valves, including eccentric disk	thousands	S
3491818	All other power-operated (except pneumatic) control valves	thousands	S
3491821	Parts for all other power-operated (except pneumatic control valves)		SV
3491823	Valve actuators (sold separately)	thousands	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-45

Product code	CIR and product description	Unit of measure	Data collected
	MA38B, SELECTED INSTRUMENTS AND RELATED PRODUCTS—Con.		
3491800	Automatic valves (regulating and control type) and parts (except nuclear)—Con.		SV
	Regulator valves:		
3491825	Remote-sensing direct actuated temperature regulators	thousands	S
3491830	Self-contained direct actuated pressure regulators (except instrument type)	thousands	S
3491835	Pilot (internal and external) actuated pressure regulators	thousands	S
3491841	Self-contained direct-acting precision and instrument type pneumatic pressure regulators	thousands	S
3491845	Flow regulators for gas, vapors, or liquids	thousands	S
3491848	Other regulator valves	thousands	S
3491849	Parts for regulator valves (sold separately)		SV
3491900	Solenoid valves (except nuclear)		SV
	Commercial/ industrial types:		
3491956	Two-way	thousands	S
3491958	Three-way	thousands	S
3491959	Other	thousands	S
3491961	Household appliance type	thousands	S
3491979	Parts, components, and operators for solenoid valves, except nuclear and power transfer valves		SV
3812100	Aeronautical, nautical, and navigational instruments, except aircraft engine instruments		SV
	Flight and navigation sensors, transmitters, and displays:		
3812101	Compasses (magnetic and gyroscopic)		SV
3812108	Altimeters, except radio and radar altimeters		SV
3812110	Airspeed indicators, including machmeters and air data computers		SV
3812112	Acceleration indicators and systems components	thousands	S
3812113	Rate-of-climb indicators	thousands	S
3812115	Angle-of-attack indicators	thousands	S
3812117	Bank-and-turn indicators	thousands	S
3812118	Artificial horizon flight instruments	thousands	S
3812120	Other aerospace and navigational instruments		SV
	Gyroscopes sold separately:		
3812121	Vertical	thousands	S
3812123	Directional	thousands	S
3812125	Free, torqued and untorqued		SV
3812126	Rate, inertial grade		SV
3812128	Rate, noninertial grade		SV
	Airframe equipment instruments:		
3812161	Position indicators (mechanical, as for landing gear, cowl flaps, stabilizers, etc.)		SV
3812163	Hydraulic system (both electrical and mechanical measuring means)		SV
3812164	Cabin environmental measuring and control instrument (air-conditioning and heating, etc.)		SV
3812177	Thermocouple and thermocouple lead wire (aircraft type only)		SV
3812180	Other aerospace flight instruments		SV
3812185	Nautical instruments (all types, including temperature, speed, pitch)	thousands	S
3812189	Parts and components for aeronautical, nautical, and navigational instruments		SV
3812200	Search and detection systems and navigation and guidance systems and equipment		SV
3812211	Light reconnaissance and surveillance electronic systems and equipment		SV
3812213	IFF equipment		SV
3812215	Proximity fuses		SV
	Radar systems and equipment:		
	Search, detection, and acquisition:		
3812217	Airborne and missile/ space radar		SV
3812219	Ship (marine) radar		SV
3812221	Ground radar		SV
	Tracking radar systems and equipment:		
3812223	Airborne and missile/ space radar		SV
3812225	Ship (marine) radar		SV
3812227	Ground radar		SV
	Instrumentation radar systems and equipment:		
3812229	Airborne, missile/ space and ship (marine) radar		SV
3812231	Ground radar		SV
3812233	Electronic checkout, monitoring, evaluation, and electronic support equipment		SV
	Sonar search, detection, tracking, and communication system and equipment:		
3812235	Surface ship applications (destroyers, destroyer-escort etc.)		SV
3812237	Submarine applications		SV
3812239	Airborne		SV
3812241	Electronic checkout, monitoring, evaluation, and other electronic support equipment		SV
3812243	Specialized command and control data processing in display equipment from complete systems		SV
3812245	Search, detection, identification, and tracking systems and equipment, n.e.c.		SV
	Electronic warfare systems and equipment, including countermeasures equipment:		
3812247	Jamming equipment, communications, and radar		SV
3812249	Underwater countermeasures equipment		SV
3812251	Other active countermeasures equipment, excluding passive materials such as chaff, etc.		SV
3812253	Specialized electronic and communication intelligence equipment		SV
3812255	Missile borne and space vehicle borne equipment		SV
3812257	Nonmissile and space vehicle guidance equipment (ground, ship, airborne guidance systems, etc.)		SV
3812259	Electronic checkout, launching, and other missile and space vehicle support systems		SV
	Navigation systems and equipment for aircraft, ship, and ground navigation:		
	Airborne navigational systems:		
3812261	Radio navigation receivers and displays (omni, radio magnetic, glide slope/ localizer, etc.)		SV
3812263	Airborne integrated data systems/ flight recorders		SV
3812265	Distance measuring equipment (dme)		SV
3812267	Flight directors/ situation display		SV
3812269	Heads-up display (hud) systems		SV
3812271	Inertial navigation systems		SV
3812273	Proximity warning/ collision avoidance equipment		SV
3812275	Complete automatic pilots		SV
3812277	Other airborne navigational systems		SV
3812278	Directional finder kits to be assembled by the purchaser		SV
3812279	Surface (ship and ground) navigational systems		SV
3812281	Underwater navigational systems		SV
3812283	Electronic checkout, monitoring, evaluation, and other electronic support equipment		SV
3821010	Laboratory and scientific apparatus		SV
	Laboratory balances and scales:		
3821011	Sensitivity of 5 centigrams or better	thousands	S
3821013	Sensitivity of less than 5 centigrams	thousands	S
3821015	Laboratory furnaces and ovens		SV
	Laboratory centrifuges:		
3821017	Tabletop-type	thousands	S
	Floor-type:		
3821018	Refrigerated	thousands	S
3821020	Other	thousands	S
3821027	Laboratory evaporation and distillation apparatus		SV
3821028	Laboratory sterilizers and autoclaves		SV
3821029	Laboratory burners and hotplates		SV
3821031	Laboratory granulators, mills, and other particle-size reduction apparatus		SV
3821033	Laboratory dryers		SV
3821035	Laboratory blenders, mixers, shakers, dispensers, fraction collectors, etc.		SV
3821036	Laboratory incubators	thousands	S
3821037	Environmental test chambers	thousands	S

Product code	CIR and product description	Unit of measure	Data collected
	MA38B, SELECTED INSTRUMENTS AND RELATED PRODUCTS—Con.		
3821010	Laboratory and scientific apparatus—Con.		SV
3821038	Laboratory freezers	thousands	S
3821042	Microtomes	thousands	S
3821098	All other laboratory and scientific apparatus not specified above		SV
3821099	Components, parts and accessories for laboratory and scientific apparatus (sold separately)		SV
3821020	Laboratory furniture and parts sold separately		
3821081	Laboratory furniture, including cabinets, cases, benches, tables, stools, and reagent shelves		SV
3821088	Parts and components for laboratory furniture		SV
3822000	Automatic controls for regulating residential and commercial environments and appliances		SV
	Automatic controls principally used as components of air-conditioning, etc.:		
	Temperature responsive (thermostats):		
3822021	Electric	thousands	S
3822022	Pneumatic	thousands	S
3822025	Pressure responsive (pressurestats)	thousands	S
3822030	Hydronic responsive	thousands	S
3822035	Humidity responsive (humidstats)	thousands	S
3822040	Light responsive	thousands	S
3822045	Electrostatic responsive	thousands	S
3822050	Liquid level	thousands	S
3822055	Defrost controls (except appliance regulators)	thousands	S
3822060	Igniters	thousands	S
3822065	Inherent motor protectors	thousands	S
3822066	Microprocessor-based load programmers for building energy control	thousands	S
	Computerized energy control systems for buildings:		
3822067	Less than 100 points (systems)	thousands	S
3822068	100 to 199 points (systems)	thousands	S
3822069	200 or more points	thousands	S
3822071	Upgrades or additions to existing computerized energy control systems for buildings		SV
3822074	Other		SV
	Controls for major appliances such as a domestic laundry/cooking appliances, etc.:		
3822075	Temperature responsive	thousands	S
3822077	Hydraulic and pneumatic	thousands	S
3822078	Pressure responsive	thousands	S
3822081	All other controls for appliances	thousands	S
3822098	Parts and components for controls for monitoring residential and commercial environments and appliances		SV
3823000	Process control instruments		SV
	General-purpose control system instruments and related equipment:		
	Electronic systems, unified architecture:		
3823035	Controllers (recording, indicating, or blind)	thousands	S
3823036	Recorders, with or without self-contained set-point stations	thousands	S
3823037	Indicators, with or without self-contained set-point stations	thousands	S
3823038	Auxiliary stations and analog computing devices associated with the above	thousands	S
3823007	Electronic systems, nonunified architecture type		SV
3823012	Industrial multifunction process computers		SV
	Pneumatic systems:		
3823039	Controllers (recording, indicating, or blind)	thousands	S
3823040	Recorders, with or without self-contained set-point stations	thousands	S
3823041	Indicators, with or without self-contained set-point stations	thousands	S
3823042	Auxiliary stations and analog computing devices associated with the above	thousands	S
3823043	Receiver-type gauges, analog and digital	thousands	S
3823044	Annunciators, industrial (electromechanical and solid-state types)	thousands	S
	Temperature measuring instruments:		
	Electrical and electronic measuring types:		
3823045	Direct-deflecting types (controllers for all types of electrical temperature sensors)	thousands	S
3823046	Direct-deflecting types (indicators and recorders for electrical temperature sensors)	thousands	S
3823047	Electromechanical self-balancing types (electric or pneumatic controllers)	thousands	S
3823048	Electromechanical self-balancing types (indicators, recorders, and integrator)	thousands	S
3823049	Electronic controllers for all types of electrical temperature sensors	thousands	S
3823050	Digital indicators for all types of electrical temperature sensors (excluding data loggers)	thousands	S
3823054	Electric transmitters	thousands	S
3823055	Pneumatic transmitters	thousands	S
	Mechanical measuring types, filled systems (liquid filled, vapor pressure, etc.):		
3823052	Indicating or recording controllers	thousands	S
3823053	Recorders, noncontrol	thousands	S
3823056	Indicators only (excluding indoor/ outdoor and household or appliance type thermometers)	thousands	S
3823057	Transmitters producing standardized electric or pneumatic analog transmission signals	thousands	S
	Primary temperature sensors (exclude aircraft types):		
3823059	Thermocouples and thermocouple lead wire		SV
3823060	All other types (temperature detectors, radiation, optical sensors, thermistors, etc.)		SV
	Pressure (gauge, absolute, vacuum) and draft measurement instruments:		
3823061	Indicating or recording controllers	thousands	S
3823062	Recorders, noncontrol	thousands	S
	Indicators only (excluding receiver type gauges):		
3823020	3-inch diameter or more	thousands	S
3823021	Less than 3-inch diameter	thousands	S
	Transmitters producing standardized analog transmission signals:		
3823024	Transmitters producing standardized electronic analog transmission signals	thousands	S
3823025	Transmitters producing standardized pneumatic analog transmission signals	thousands	S
	Flow and liquid level measuring instruments:		
	Differential pressure types:		
3823065	Indicating or recording controllers	thousands	S
3823066	Recorders, noncontrol and indicators, noncontrol	thousands	S
3823027	Transmitters producing standardized electronic analog transmission signals	thousands	S
3823028	Transmitters producing standardized pneumatic analog transmission signals	thousands	S
3823029	Primary pressure sensors (load cells, strain gauges, etc.)	thousands	S
3823068	Primary flow elements (orifice plates, venturi tubes, flow tubes, flow nozzles, etc.)	thousands	S
	Electromagnetic flowmeters:		
3823003	Primary device (magnetic flow tube)	thousands	S
3823001	Secondary device (magnetic transmitter, recorder, indicator or controller)	thousands	S
3823004	Capacitance, ultrasonic, and other electronic types (including magnetic resonance)	thousands	S
3823071	Variable area-controlling, recording, indicating, and transmitting instruments, etc.)	thousands	S
3823072	Float and displacement (controlling, recording, indicating, and transmitting instruments, etc.)	thousands	S
3823073	Turbine, mass-flow and other types (controlling, recording, indicating, and transmitting instruments, etc.)	thousands	S
3823074	Humidity instruments (controlling, recording, indicating, and transmitting)	thousands	S
	Continuous process instruments for on-stream gas and liquid analysis:		
3823075	Chromatographic analyzers	thousands	S
3823076	Infrared analyzers	thousands	S
3823077	Oxygen analyzers	thousands	S
3823078	Other gas analyzers	thousands	S
3823079	Ph analyzers	thousands	S
3823080	Other liquid analyzers	thousands	S
	Instruments for all process variables not listed above:		
	Electrical and electronic measuring types:		
3823006	Direct-deflecting type controllers, indicators, and recorders	thousands	S
3823008	Electromechanical self-balance electric or pneumatic controllers, recorders, etc.	thousands	S
3823085	Digital indicators	thousands	S
3823086	Transmitters producing standardized electric or pneumatic analog transmission signals	thousands	S

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-47

Product code	CIR and product description	Unit of measure	Data collected
	MA38B, SELECTED INSTRUMENTS AND RELATED PRODUCTS—Con.		
3823000	Process control instruments—Con. Instruments for all process variables not listed above—Con.		SV
	Mechanical measuring types:		
3823087	Indicating or recording controllers	thousands	S
3823088	Recorders, noncontrol	thousands	S
3823089	Indicators only	thousands	S
3823090	Transmitter, producing standardized electric or pneumatic analog transmission signals	thousands	S
	All other industrial process instruments:		
3823091	Other temperature instruments		SV
3823092	Other flow and liquid level instruments		SV
3823093	Other continuous process instruments		SV
3823094	Other industrial type instruments		SV
	Parts, supplies, accessories, other primary sensors, n.e.c.:		
3823095	Primarily designed for temperature instruments		SV
3823096	Primarily designed for flow and liquid level instruments		SV
3823097	Primarily designed for continuous process instruments		SV
3823099	Primarily designed for industrial type instruments		SV
3824200	Integrating and totalizing meters for gas and liquids		SV
	Gas meters, consumption measuring:		
	Diaphragm type, positive displacement, aluminum, iron, and tin case:		
3824222	Residential size (400 cubic feet per hour of 0.64 specific gravity gas, at 0.5 inch water drop)	thousands	S
3824224	Other sizes, including commercial and industrial	thousands	S
3824226	Rotary type (all sizes)	thousands	S
3824228	Turbine type (all sizes)	thousands	S
3824229	Other gas meters, consumption registering	thousands	S
	Liquid meters, positive displacement with registers and counters:		
	Water meters, consumption measuring:		
3824233	Small meters, less than and including 1 inch	thousands	S
3824235	Intermediate meters, more than 1 inch up to and including 2 inch	thousands	S
3824237	Large meters, more than 2 inch	thousands	S
3824241	Liquid fuel dispensing meters (excluding service station dispensing pumps)	thousands	S
3824298	Other liquid meters (industrial bulk plants, pipeline, batching, treatment facilities)	thousands	S
3824299	Parts and components for gas and liquid meters (sold separately)		SV
3824300	Counting devices (excluding motor vehicle instruments)		SV
3824319	Tachometers, including speed indicators	thousands	S
	Other:		
3824321	Mechanical input	thousands	S
3824323	Electrical input	thousands	S
3824325	Electronic input	thousands	S
3824327	Pneumatic input	thousands	S
3824329	Other counters, including event recorders	thousands	S
3824376	Taximeters	thousands	S
3824382	Parking meters, including parts and components sold separately		SV
3824385	All other counting devices not specified above, toll meters, fare collection equipment, etc.		SV
3824388	Components and parts for counting devices, except parking meters (sold separately)		SV
3824400	Motor vehicle instruments		SV
3824411	Speedometers (speedometers that include odometers are classified as speedometers)		SV
3824421	Tachometers		SV
3824431	Odometers (speedometers that include odometers are classified as speedometers)		SV
3824441	Fuel level gauges		SV
3824445	Water temperature gauges		SV
3824451	Ammeters		SV
3824455	Oil pressure gauges		SV
3824460	Instrument panels, including cluster modules		SV
3824499	Other motor vehicle instruments		SV
3825100	Electrical integrating instruments		SV
	Ac watt-hour meters:		
	Single-phase:		
3825110	Detachable types	thousands	S
3825111	A-base types	thousands	S
3825114	Switchboard types	thousands	S
3825115	Polyphase	thousands	S
3825135	Demand meters (kW and kVA), combined watt-hour and demand meters (single- and poly-phase)	thousands	S
3825151	Other electrical integrating meters (including dc watt-hour meters, ampere-hour meters, etc.)		SV
3825161	Parts and accessories for electric integrating meters (including meter mountings and registers)		SV
3825200	Test equipment for testing electrical, radio, and communication circuits, and motors		SV
	Voltage, current, and resistance measuring equipment (except multimeters):		
	Electronic:		
3825220	Digital		SV
3825221	Analog		SV
3825222	Electrical (excluding panel meters)		SV
	Multimeters:		
	Electronic:		
3825228	Digital		SV
3825229	Analog		SV
3825230	Electrical		SV
	Power and energy measuring equipment:		
	Electronic:		
3825225	Analog		SV
3825226	Digital		SV
3825227	Electrical power measuring equipment (excluding electrical integrating instruments)		SV
	Frequency counters, timers, and other frequency and time measurement equipment:		
3825231	Universal counters with time interval measuring capability		SV
3825236	Stroboscopes		SV
3825232	Microwave counters (capable of operating more than 1300 MHz)		SV
3825233	Other frequency counters		SV
3825234	Frequency meters		SV
3825239	Other frequency counting and time measuring equipment		SV
	Waveform measuring and/or analyzing equipment:		
	Oscilloscopes and plug-in accessories:		
3825212	Under 10 MHz		SV
3825210	10 MHz up to 99.9 MHz		SV
3825211	100 MHz or more		SV
3825214	Oscillographs		SV
	Spectrum analyzers:		
3825215	Capable of operating above 100 kHz		SV
3825217	Other spectrum analyzers		SV
3825216	Other waveform measuring and analyzing equipment		SV
	Signal generating equipment:		
3825256	Audio		SV
3825258	RF (more than 20 kilocycles to 890 megacycles)		SV
3825259	Microwave (890 megacycles or more)		SV
	Field strength and intensity measuring equipment (inc. RFI measuring equipment):		
3825291	Electronic		SV
3825292	Electrical field measuring equipment		SV

Product code	CIR and product description	Unit of measure	Data collected
	MA38B, SELECTED INSTRUMENTS AND RELATED PRODUCTS—Con.		
3825200	Test equipment for testing electrical, radio, and communication circuits, and motors—Con.		SV
3825293	Impedance and standing wave ratio measuring equipment (transfer function):		
3825294	Electronic impedance and related measuring equipment		SV
3825297	Standing wave measuring equipment (slotted lines, sliding shorts, reflectometers, etc.)		SV
	X-Y plotters (recorders), electronic		SV
3825244	Automatic test and measuring equipment:		
	Combination and/or group test sets		SV
	Component part test sets:		
3825245	Electron tube test equipment		SV
3825261	Memory semiconductor test equipment		SV
3825263	Linear semiconductor test equipment		SV
3825265	Microprocessor semiconductor test equipment		SV
3825267	Other semiconductor component test equipment		SV
3825269	Circuit board loaded test equipment		SV
3825247	Other component part test sets and equipment		SV
3825248	Equipment and subassembly test equipment, n.e.c.		SV
	Standards and calibration equipment for test measuring equipment:		
3825272	Electronic		SV
3825274	Electrical		SV
	Analyzers for testing characteristics of internal combustion engines:		
3825237	Portable		SV
3825238	Other		SV
	Communications test equipment, n.e.c.:		
3825281	Network analyzers		SV
3825283	Cable backplane and other continuity testers		SV
3825285	Fiber optics test equipment (OTDR, optical S/N meters, etc.)		SV
3825287	Other communications test, monitoring, and control equipment (except microwave)		SV
3825252	Microwave test equipment, n.e.c. (1,300 MHz or more)		SV
	Logic test, development, and analysis equipment:		
3825201	Logic analyzers and similar logic state, timing, and signature analyzers		SV
3825203	Microprocessor development systems		SV
3825205	Pulse, function, and data generators and similar metered frequency synthesizers		SV
	Other field service test and measurement equipment:		
3825207	Logic probes, clips, comparators, pulsers, and current tracers		SV
3825209	Other field service equipment specifically designed for other troubleshooting		SV
3825202	Other measuring/checking instruments for testing electrical, radio communications, etc.		SV
	Other analyzing instruments for checking electrical quantities:		
3825204	With a recording device		SV
3825206	Other		SV
3825299	Parts and components for test equipment for electrical, communication circuits, and motors		SV
3825300	Instruments to measure electricity		SV
	Electrical indicating instruments:		
	Panel type instruments:		
3825308	Digital panel meters (dpm) between 0.05 percent and 1 percent, 1 digit accuracy	thousands	S
3825310	Analog solid-state panel meters (generally of plus or minus 2 percent accuracy)	thousands	S
3825312	Nonruggedized or sealed panel types, ac (including moving iron vane and dynamometer types)	thousands	S
3825313	Nonruggedized or sealed panel types, dc (including rectifier and self-contained thermocouple types)	thousands	S
3825311	Panel types, ruggedized or sealed (generally of 2 percent accuracy)	thousands	S
3825316	Panel types with control or signal initiating means, indicating	thousands	S
3825317	Panel types with control or signal initiating means, nonindicating	thousands	S
3825319	All other panel type instruments, including ammeters and voltmeters for motor vehicles	thousands	S
	Switchboard instruments which are generally of 1 percent accuracy:		
3825323	Ac (including moving iron vane and dynamometer types)	thousands	S
3825325	Dc (including rectifier and thermocouple types)	thousands	S
3825327	Elapsed time meters (with and without reset)	thousands	S
	Portable instruments which are generally capable of accuracies within 2 percent (plus or minus):		
3825329	Portable types (accuracy rating 0.11 percent through 0.50 percent)	thousands	S
3825330	Portable types (accuracy rating 0.51 percent through 2 percent)	thousands	S
3825335	Laboratory portable instruments with accuracies within plus or minus 1 percent	thousands	S
3825337	Volt-ohm millimeter (vom), accuracy 0.10 percent through 5 percent	thousands	S
3825345	Other electrical indicating instruments (except self-balancing types)	thousands	S
	Electrical recording instruments (portable and for panel mounted):		
3825350	Direct deflecting (direct acting), except temperature calibrated instruments	thousands	S
	Oscillographic recorders:		
3825363	Pen or stylus type	thousands	S
3825365	Light beam type	thousands	S
3825372	Other electrical recording instruments		SV
	Parts and accessories for indicating and recording instruments:		
3825374	Transducers for volts, amperes, watts, vars, frequency, temperature, and power factor		SV
3825375	Tachometer generators, except aerospace types		SV
3825376	Other, including instrument shunts		SV
3826000	Analytical and scientific instruments (except optical)		SV
	Electrochemical instruments:		
3826001	Ph electrodes and meters		SV
3826003	Ion selective electrodes and meters		SV
3826004	Electrophoresis instruments		SV
3826005	Other, except process type (include photometers)		SV
	Chromatographic instruments:		
3826007	Gas	number	S
3826008	Liquid	number	S
3826009	Other, including paper, gel, thin layer		SV
	Spectrophotometric instruments:		
3826024	Atomic absorption		SV
3826025	Optical emission, including spark, arc, and glow, spectrographs, all other, except ICP		SV
3826027	Optical emission, laser excited source (laser microprobe source emission)		SV
3826028	Optical emission with inductively coupled plasma, ICP		SV
3826030	Infrared (including Fourier transform methods)		SV
3826031	Ultraviolet, visible and colorimeters		SV
3826033	Fluorescent instruments, including fluorometers (except chemicals)		SV
3826035	Color measuring devices		SV
3826036	Other, vacuum ultraviolet, raman, light scattering reflectors, helium glow, etc.		SV
3826037	Thermal analysis instruments, including thermogravimetric analyzers (TGA)		SV
3826038	Nuclear magnetic resonance instruments, including electron paramagnetic spin types (EP)	number	S
3826039	Microscopes, electron and proton, including scanning type	number	S
3826053	Particle beam excitation instruments including electron microprobes, augers, etc.	number	S
3826055	Photon excitation analyzers, including x-ray fluorescence-simultaneous	number	S
3826061	Mass spectroscopy instrumentation		SV
	Clinical laboratory instrumentation:		
3826071	Chemistry (measure and identify substances, such as metabolites, enzymes, and drugs)	number	S
3826072	Hematology (measure and identify substances or cells contained in blood)	number	S
3826073	Microbiology (enumerate or identify pathogenic organisms or measure their susceptibility)	number	S
3826074	Histology (process tissue and cells, such as tissue processors, cell stainers, etc.)	number	S
3826075	Blood bank and immunology (process blood and specimens for testing)	number	S
3826076	Other clinical laboratory instrumentation not specified above	number	S
3826078	Elemental analysis instruments, including carbon, hydrogen, nitrogen, oxygen, and sulphur	number	S
3826092	Amino acid, protein, and/or peptide analyzers (including chromatographic type)	number	S
3826093	Gas detectors	number	S
3826094	Other analytical and scientific instruments, n.e.c., molecular weight, etc.		SV

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

A-49

Product code	CIR and product description	Unit of measure	Data collected
	MA38B, SELECTED INSTRUMENTS AND RELATED PRODUCTS—Con.		
3826000	Analytical and scientific instruments (except optical)—Con.		SV
3826098	Parts, components, and accessories for analytical and scientific instruments		SV
3827100	Sighting, tracking, and fire-control equipment, optical type		SV
3827101	Made from lenses, prisms, etc., produced in the same plant		SV
3827102	Made from purchased lenses, prisms, etc.		SV
3827199	Parts and accessories		SV
3827410	Binoculars and astronomical instruments		SV
3827401	Binoculars, prismatic and nonprismatic, terrestrial and celestial telescopes		SV
3827403	Other astronomical instruments (excluding radio astronomy)		SV
3827409	Parts and accessories for binoculars, optical telescopes, and other astronomical equipment		SV
3827420	Other optical instruments and lenses		SV
3827412	Optical test and inspection equipment including standard sources, modulators, etc.		SV
3827415	Optical microscopes		SV
3827417	Optical components: Filters and parts and accessories		SV
	Lenses, except ophthalmic focus lenses:		
3827421	Unmounted lenses		SV
3827422	Mounted photographic lenses		SV
3827423	Other mounted lenses		SV
3827429	Other (prisms, mirrors, etc.)		SV
3827439	Parts and accessories for optical microscopes		SV
3827449	Parts and accessories for other optical instruments		SV
3827459	Other optical instruments (including optical alignment and display instruments)		SV
3829100	Aircraft engine instruments, except flight		SV
3829145	Temperature sensors, transmitters, and displays		SV
3829146	Pressure ratio sensors, displays, and controls		SV
3829147	Pressure and vacuum sensors, transmitters, and displays		SV
3829158	Fuel and oil flow rate sensors, transmitters, and displays, including mixture controls		SV
3829160	Fuel and oil quantity sensors, transmitters, and displays including densitometers		SV
3829162	Tachometer generators and indicators		SV
3829198	All other not specified above		SV
3829199	Parts and components for aircraft engine instruments, except flight (sold separately)		SV
3829200	Physical properties testing equipment and kinematic testing and measuring equipment		SV
	Physical properties testing equipment:		
3829232	For testing of metals		SV
3829234	Other		SV
3829239	Parts for physical properties testing equipment (sold separately)		SV
	Physical properties inspection equipment:		
3829252	For testing of metals		SV
3829254	Measuring and checking flow of fluids		SV
3829256	Other		SV
3829258	Parts for physical properties inspection equipment (sold separately)		SV
	Kinematic testing and measuring equipment:		
3829294	For testing of metals		SV
3829295	Other		SV
3829298	Parts for kinematic testing and measuring equipment (sold separately)		SV
3829400	Nuclear radiation detection and monitoring instruments		SV
3829402	Radiation detecting elements (including ion chambers)	thousands	S
3829404	Solid-state detectors	thousands	S
3829406	Nuclear monitoring instruments (environmental, personal dosimetry, and medical, stationary and portable)	thousands	S
3829407	Medical and biological counting systems for in vivo counting		SV
3829409	Sample and flow counting systems, manual and automatic		SV
3829419	Scalers	thousands	S
3829421	Special amplifiers for nuclear applications	thousands	S
	Pulse analyzers (including nuclear spectrometers):		
3829422	Single channel pulse height analyzers	thousands	S
3829423	Multichannel pulse height analyzers	thousands	S
3829425	Count rate meters	thousands	S
3829429	Measurement and control devices using beta, gamma, or neutron gauge technology		SV
3829428	Input-output accessories for multichannel analyzers		SV
3829430	Nuclear power supplies		SV
3829432	Neutron and photon activation analysis systems		SV
3829434	Nuclear instrument modules, n.e.c.		SV
3829439	Other nuclear radiation detection and monitoring instruments		SV
3829498	Parts and components for nuclear radiation detection and monitoring instruments (sold separately)		SV
3829500	Commercial, geophysical, meteorological and general-purpose instruments		SV
3829520	Barometers and barographs, aneroid and mercurial types, recorders, pendant, meteorological, etc.		SV
3829521	Hydrometers, glass, all types, including thermohydrometers	thousands	S
	Liquid-in-glass thermometers:		
3829522	Engraved (etched) stem, thermoregulators, deep-sea reversing, laboratory, encased glass, etc.		SV
3829523	Threaded and flanged types, fixed angle, conditioning, and refrigeration installations	thousands	S
3829524	Household and commercial thermometers such as wall, outdoor, domestic science, etc.	thousands	S
3829534	Clinical (fever) thermometers (including digital)	thousands	S
	Bimetal thermometers:		
3829525	Threaded and flanged types, for pipeline installations, general and pocket test	thousands	S
3829526	Domestic science, commercial general test, indoor, outdoor, models, oven, refrigerator	thousands	S
3829528	Humidity indicating and recording instruments such as bihygroscopic and hygroscopic element, etc.	thousands	S
3829529	Other thermometers (infrared, meteorological, commercial and industrial)		SV
3829551	Meteorological electronics equipment and radio astronomy equipment		SV
3829531	Other meteorological instruments, including speed and direction instruments, etc.		SV
3829540	Seismic instruments		SV
3829545	All other geophysical instruments and equipment		SV
3829533	Other commercial and industrial instruments (except aircraft) including compasses, etc.		SV
3829539	Parts and accessories for meteorological and commercial and industrial instruments		SV
3829600	Surveying and drafting instruments and associated equipment		SV
3829611	Surveying instruments, including alidades, transits, plumb bobs, sextants, theodolites, etc.		SV
3829619	Parts and components for surveying instruments (sold separately)		SV
3829621	Drafting instruments and machines, manual and automatic, plotting instruments, etc.		SV
3829629	Parts and components for drafting instruments and machines (sold separately)		SV
3829631	Photogrammetric and geodetic equipment, excluding cameras		SV
3829639	Parts and components for photogrammetric and geodetic equipment (sold separately)		SV
3844000	Irradiation equipment, including x-ray, beta-ray, gamma-ray, and nuclear		SV
	Medical diagnostic equipment:		
	X-ray equipment:		
3844002	Digital radiography equipment	thousands	S
3844003	Computerized axial tomography (CT or CAT scan)	thousands	S
3844009	Dental	thousands	S
3844005	Conventional	thousands	S
3844011	All other medical diagnostic x-ray equipment		SV
3844006	Nuclear medicine equipment (all equipment used for nuclear in vivo studies)	thousands	S
3844032	Medical radiation therapy equipment (linear accelerators, x-ray, Cobalt 60, Brachtherapy)		SV

APPENDIX B.

Product Descriptions in Production-Only Current Industrial Reports

Product code	CIR and product description	Unit of measure	Data collected
M20A, FLOUR MILLING PRODUCTS			
0011171	Wheat flour milling:		
2041110	Wheat ground for flour only	mil bushels	P
2041213	Wheat flour	mil sacks (cwt)	P,I
	Wheat millfeed (bran, middlings, shorts, red dog, etc.) produced in the manufacture of flour	short tons	P
0011951	Rye flour milling:		
2041611	Rye ground for flour only	mil bushels	P
2041618	Rye flour	mil sacks (cwt)	P,I
	Rye millfeed (bran, middlings, shorts, red dog, etc.) produced in the manufacture of flour	short tons	P
0011173	Duram wheat milling:		
2041153	Duram wheat ground for flour	mil bushels	P
2041155	Straight semolina and durum flour	mil sacks (cwt)	P
	Blended semolina and durum flour	mil sacks (cwt)	P
M20J, FATS AND OILS: OILSEED CRUNCHINGS			
	Oilseeds, beans, and nuts:		
	Soybean:		
2075113	Crude oil	1,000 lb	P,I
2075211	Cake and meal, total	short tons	P,I
2075213	Produced for animal feed	short tons	P
2075215	Produced for edible protein products	short tons	P
2075261	Millfeed (hull meal)	short tons	P,I
2075142	Lecithin	short tons	P
	Cottonseed:		
2074100	Crude oil	1,000 lb	P,I
2074414	Cake and meal	short tons	P,I
2074451	Hulls	short tons	P,I
	Linters:		
2074313	First cut	1,000 lb	P,I
2074315	Second cut	1,000 lb	P,I
2074317	Mill run	1,000 lb	P,I
	Linseed (flaxseed):		
2076113	Crude oil	1,000 lb	P,I
2076311	Cake and meal	short tons	P,I
	Peanut:		
2076252	Crude oil	1,000 lb	P,I
2076351	Cake and meal	short tons	P,I
	Sunflower:		
2076262	Crude oil	1,000 lb	P,I
2076361	Cake and meal	short tons	P,I
	Corn:		
2046353	Crude oil	1,000 lb	P,I
	Safflower:		
2076261	Crude oil	1,000 lb	P,I
2076394	Cake and meal	short tons	P,I
	Rapeseed:		
2076271	Crude oil	1,000 lb	P,I
2076371	Cake and meal	short tons	P,I
	Other:		
2076299	Crude oil	1,000 lb	P,I
2076399	Cake and meal	short tons	P,I
	Crushed beans, seeds, nuts, and meat:		
0011611	Soybean	short tons	P,I
0013111	Cottonseed	short tons	P,I
0011918	Flaxseed	short tons	P,I
0013920	Peanut	short tons	P,I
0011912	Sunflower	short tons	P,I
0011917	Safflower	short tons	P,I
0011918	Rapeseed	short tons	P,I
0011915	Castor	short tons	P,I
0017351	Tung nut	short tons	P,I
0017987	Copra	short tons	P,I
M20K, FATS AND OILS: PRODUCTION, CONSUMPTION, AND STOCKS			
	Primary fats and oils:		
	Refined:		
2074211	Cottonseed oil	1,000 lb	P,C,I
2075121	Soybean oil	1,000 lb	P,C,I
	Linseed oil:		
2076111	Raw and boiled	1,000 lb	P,C,I
2076133	All other	1,000 lb	P,C,I
2076223	Coconut oil	1,000 lb	P,C,I
2046065	Corn oil	1,000 lb	P,C,I
2076257	Peanut oil	1,000 lb	P,C,I
2076247	Palm oil	1,000 lb	P,C,I
2076245	Palm kernel oil	1,000 lb	P,C,I
2076272	Rapeseed (canola) oil	1,000 lb	P,C,I
2076282	Sunflower oil	1,000 lb	P,C,I
2076233	Safflower oil	1,000 lb	P,C,I
2861293	Tall oil	1,000 lb	P,C,I
2076281	All other refined primary fats and oils	1,000 lb	P,C,I

Product code	CIR and product description	Unit of measure	Data collected
	M20K, FATS AND OILS: PRODUCTION, CONSUMPTION, AND STOCKS—Con.		
	Primary fats and oils—Con.		
	Other primary fats and oils:		
2076266	Tung oil	1,000 lb	P,C,I
2076269	Castor oil	1,000 lb	P,C,I
2077313	Vegetable oil foots	1,000 lb	P,C,I
2011515	Lard	1,000 lb	P,C,I
2011B41	Edible tallow	1,000 lb	P,C,I
2077110	Inedible tallow and grease	1,000 lb	P,C,I
2077111	Inedible tallow	1,000 lb	P,C,I
2077113	Grease	1,000 lb	P,C,I
2077210	Meat meal, meat and bone meal and tankage	1,000 lb	P,C,I
2077211	Meat meal and meat and bone meal	1,000 lb	P,C,I
2077212	Dry rendered tankage	1,000 lb	P,C,I
2077237	Feather meal	1,000 lb	P,C,I
2077298	All other products, including poultry fat and byproducts meal, blood meal, and raw products for pet food	1,000 lb	P,C,I
2077363	Sperm oil	1,000 lb	P,C,I
2077369	Fish oil (except cod or liver) and marine mammal oil (except sperm)	1,000 lb	P,C,I
	Fats and oils products:		
	Baking or frying fats (shortening):		
2079113	100 percent vegetable oil	1,000 lb	P,I
2079115	100 percent animal fat or blends of vegetable oil and animal fat	1,000 lb	P,I
2079200	Margarine	1,000 lb	P,I
	Glycerine:		
2841411	Crude	1,000 lb	P,I
2841441	Refined	1,000 lb	P,I
2899200	Fatty acids, all types	1,000 lb	P,I
2079150	Soybean cooking or salad oil	1,000 lb	P,I
2079158	All other cooking or salad oil	1,000 lb	P,I
	MA22F, TEXTURED AND SPUN YARN PRODUCTION		
	Textured yarn:		
	For sale:		
2282561	Nylon	1,000 lb	P
2282571	Rayon and acetate	1,000 lb	P
2282581	Polyester	1,000 lb	P
2282591	Other	1,000 lb	P
	For own use or on commission:		
2282562	Nylon	1,000 lb	P
2282572	Rayon and acetate	1,000 lb	P
2282582	Polyester	1,000 lb	P
2282592	Other	1,000 lb	P
	Spun yarn:		
	Cotton:		
	Carded:		
2281111	85 percent or more cotton	1,000 lb	P
2281112	All other chiefly cotton blends	1,000 lb	P
	Combed:		
2281221	85 percent or more cotton	1,000 lb	P
2281222	All other chiefly cotton blends	1,000 lb	P
	Wool and wool blends (36 percent or more wool, including reused and reprocessed):		
2281511	Carded (woolen)	1,000 lb	P
2281513	Combed (worsted)	1,000 lb	P
	Manmade fiber yarn:		
	Cellulosic (rayon and/ or acetate):		
2281311	85 percent or more rayon and/ or acetate	1,000 lb	P
2281312	All other chiefly rayon and/ or acetate blends	1,000 lb	P
	Noncellulosic:		
2281404	85 percent or more acrylic	1,000 lb	P
	Other chiefly acrylic blends:		
2281409	Mixed with cotton	1,000 lb	P
2281407	Mixed with wool	1,000 lb	P
2281412	Mixed with other fibers	1,000 lb	P
2281413	85 percent or more nylon	1,000 lb	P
2281415	Other chiefly nylon blends	1,000 lb	P
2281423	85 percent or more polyester	1,000 lb	P
	Other chiefly polyester blends:		
2281426	Mixed with cotton	1,000 lb	P
2281427	Mixed with wool	1,000 lb	P
2281429	Mixed with other fibers	1,000 lb	P
2281436	Other manmade fiber yarns 85 percent or more of one fiber	1,000 lb	P
2281437	All other manmade fiber yarns	1,000 lb	P
2281487	Silk yarns	1,000 lb	P
2299666	All other natural fiber yarn (flax, sisal, hemp, raimie, etc.)	1,000 lb	P
	MA22K, KNIT FABRICS PRODUCTION		
	Warp knit fabrics yard goods (more than 12 inches in width):		
	Pile fabrics (raschel and raschel crochet):		
	Long pile fabrics:		
2258101	All acrylic or modacrylic and chiefly acrylic or modacrylic	1,000 lb	P
2258102	All polyester and chiefly polyester	1,000 lb	P
2258103	All other fibers	1,000 lb	P
2258104	Looped pile fabrics (terry cloth):		
2258105	All cotton and chiefly cotton	1,000 lb	P
2258107	All manmade and chiefly manmade	1,000 lb	P
2258108	All other fibers	1,000 lb	P
2258109	All other pile fabrics (velour, etc.):		
2258113	All cotton and chiefly cotton	1,000 lb	P
2258115	All manmade and chiefly manmade	1,000 lb	P
2258116	All other fibers	1,000 lb	P
2258117	Elastic fabrics (containing by weight 5 percent or more elastomeric yarn or rubber thread	1,000 lb	P
2258119			
2258151			
2258161	All other warp knit fabrics:		
	By type:		
2258162	Tricot, simplex, and milanese	1,000 lb	P
2258163	All other	1,000 lb	P
	By fiber:		
2258171	All cotton and chiefly cotton	1,000 lb	P
2258172	All wool and chiefly wool	1,000 lb	P
2258173	All manmade and chiefly manmade	1,000 lb	P
2258175	All other fibers	1,000 lb	P

2257162	All wool and chiefly wool	1,000 lb	P
2257163	All manmade and chiefly manmade	1,000 lb	P
2257165	All other fibers	1,000 lb	P
2258191	Narrow warp knit fabrics yard goods (12 inches and narrower in width):		
2258193	Elastic fabrics	1,000 lb	P
2258195	All other narrow knit fabrics	1,000 lb	P
2257181	Narrow weft knit fabrics yard goods (12 inches or less)	1,000 lb	P
2257183	Elastic fabrics	1,000 lb	P
2257184	All other narrow knit fabrics	1,000 lb	P
	Knit garment lengths, trimmings, and collars:		
	Knit garment lengths, made on sweater, strip, v-bed strip, and full-fashioned machines		
	Knit trimmings and collars		
	MQ22T, BROADWOVEN FABRICS (GRAY)		
	85 percent or more filament yarn fabrics:		
	High tenacity yarn fabrics:		
2221BO2	100 percent and chiefly rayon	mil sq yd	P
2221CO2	100 percent and chiefly nylon	mil sq yd	P
2221CO4	100 percent and chiefly polyester	mil sq yd	P
2221CO7	85 percent or more filament yarn fabrics obtained from strip or the like, except rayon and/ or acetate	mil sq yd	P
	85 percent or more filament rayon, acetate and/ or triacetate fabrics:		
	Weighing not more than 5 ounces per square yard:		
2221B11	Plain weave	mil sq yd	P
2221B13	Other weaves	mil sq yd	P
	Weighing more than 5 ounces per square yard:		
2221B15	Plain weave	mil sq yd	P
2221B17	Other weaves	mil sq yd	P
	Other chiefly rayon and/ or acetate filament fabrics:		
2221B32	Weighing not more than 5 ounces per square yard	mil sq yd	P
2221B34	Weighing more than 5 ounces per square yard	mil sq yd	P
	85 percent or more filament nylon fabrics:		
2221C11	Typewriter and other impression fabrics	mil sq yd	P
	Other 85 percent or more filament nylon fabrics:		
2221C14	Weighing not more than 5 ounces per square yard, flat (nontextured)	mil sq yd	P
2221C16	Weighing not more than 5 ounces per square yard, other	mil sq yd	P
2221C22	Weighing more than 5 ounces per square yard, flat (nontextured)	mil sq yd	P
2221C24	Weighing more than 5 ounces per square yard, other	mil sq yd	P
	Other chiefly nylon filament fabrics:		
2221C32	Weighing not more than 5 ounces per square yard	mil sq yd	P
2221C34	Weighing more than 5 ounces per square yard	mil sq yd	P
	85 percent or more filament polyester fabrics:		
	Containing textured yarns:		
2221C42	Weighing not more than 5 ounces per square yard, flat	mil sq yd	P
2221C44	Weighing not more than 5 ounces per square yard, other	mil sq yd	P
2221C45	Weighing more than 5 ounces per square yard	mil sq yd	P
	Containing nontextured yarns:		
2221C50	Weighing not more than 5 ounces per square yard	mil sq yd	P
2221C55	Weighing more than 5 ounces per square yard	mil sq yd	P
2221C62	Other chiefly filament polyester fabrics	mil sq yd	P
	Glass fiber fabrics:		
2221C72	Woven roving and screening	mil sq yd	P
2221C74	All other fabrics	mil sq yd	P
	Other 85 percent or more filament yarn fabrics, including saran and olefin:		
	Carpet backing:		
2221C80	Woven synthetic	mil sq yd	P
2221C83	Jute and other backing	mil sq yd	P
2221C84	All other	mil sq yd	P

	More than 50 percent cotton:		
2211EO1	Finewales and pinwales	mil sq yd	P
2211EO3	Midwales	mil sq yd	P
2211EO6	Widewales and other	mil sq yd	P
2221HO1	50 percent or more manmade	mil sq yd	P
	Velvets, plushes, and other pile fabrics:		
2211E21	50 percent or more cotton	mil sq yd	P
2221H11	50 percent or more manmade	mil sq yd	P
	Terry cloth and toweling:		
2211E32	Terry toweling	mil sq yd	P
2211E34	Terry cloth	mil sq yd	P
	Plain weaves:		
	Tobacco cheese and bandage cloth:		
2211B02	More than 50 percent cotton	mil sq yd	P
2221D03	Chiefly spun polyester mixed with cotton	mil sq yd	P
2221D04	Chiefly spun rayon and/ or acetate	mil sq yd	P
2221D05	All other fabrics, 85 percent or more spun yarn	mil sq yd	P
	Spun/ filament yarn combinations:		
2211B05	Chiefly cotton	mil sq yd	P
2221G04	Chiefly manmade	mil sq yd	P
	Print cloth:		
2211B12	More than 50 percent cotton	mil sq yd	P
2221D13	Chiefly spun polyester mixed with cotton	mil sq yd	P
2221D15	Chiefly spun polyester mixed with rayon	mil sq yd	P
2221D16	Chiefly spun rayon and/ or acetate	mil sq yd	P
2221D18	All other fabrics, 85 percent or more spun yarn	mil sq yd	P
	Spun/ filament yarn combinations:		
2211B14	Chiefly cotton	mil sq yd	P
2221G07	Chiefly manmade	mil sq yd	P
	Poplin and broadcloth:		
	More than 50 percent cotton:		
2211B21	Weighing 5.9 ounces or less per square yard, carded	mil sq yd	P
2211B25	Weighing 5.9 ounces or less per square yard, combed	mil sq yd	P
2211B30	Weighing more than 5.9 ounces per square yard	mil sq yd	P
	Chiefly spun polyester mixed with cotton:		
2221D23	Weighing 5.0 ounces or less per square yard, carded	mil sq yd	P
2221D25	Weighing 5.0 ounces or less per square yard, combed	mil sq yd	P
2221D27	Weighing more than 5.0 ounces per square yard, carded	mil sq yd	P
2221D31	Weighing more than 5.0 ounces per square yard, combed	mil sq yd	P
2221D33	Chiefly spun rayon and/ or acetate	mil sq yd	P
2221D34	All other fabrics, 85 percent or more spun yarn	mil sq yd	P
	Spun/ filament yarn combinations:		
2211B35	Chiefly cotton	mil sq yd	P
2221G19	Chiefly manmade	mil sq yd	P
	Lawns, voiles, and batistes:		
2211B41	More than 50 percent cotton	mil sq yd	P
2221D41	Chiefly spun polyester mixed with cotton	mil sq yd	P
2221D44	Chiefly spun rayon and/ or acetate	mil sq yd	P
2221D42	All other fabrics, 85 percent or more spun yarn	mil sq yd	P
	Spun/ filament combinations:		
2211B43	Chiefly cotton	mil sq yd	P
2221G28	Chiefly manmade	mil sq yd	P
	Duck, including taped warp:		
2211B71	More than 50 percent cotton	mil sq yd	P
2221D89	Chiefly spun polyester mixed with cotton	mil sq yd	P
2221D91	All other fabrics, 85 percent or more spun yarn	mil sq yd	P

	Automotive castings	1,000 s tons	P
	Construction and utility castings	1,000 s tons	P
	Machinery uses	1,000 s tons	P
	Other ductile iron castings (except pressure pipe and fittings):		
	Gray iron castings:		
	Gray iron molds and stools for heavy steel ingots	1,000 s tons	P
	Gray iron pressure pipe and fittings:		
	Less than 14 inches (inside diameter)	1,000 s tons	P
	14 inches or more (inside diameter)	1,000 s tons	P
	Gray iron soil pipe and fittings	1,000 s tons	P
	Automotive castings	1,000 s tons	P
	Construction and utility castings	1,000 s tons	P
	Other gray iron castings (including white iron castings)	1,000 s tons	P
	Malleable iron castings:		
	Standard malleable	1,000 s tons	P
	Pearlitic malleable	1,000 s tons	P
	Steel castings (except investment):		
	Carbon steel railroad specialties:		
	Side frames, bolsters, couplers, yokes, draft gear, snubbers (self-contained unit type), hopper doors and frames, etc.	1,000 s tons	P
	Other carbon steel railway and transit rolling stock castings	1,000 s tons	P
	Other carbon steel castings, including rolls for rolling mills	1,000 s tons	P
	Alloy (except high alloy) steel castings:		
	Railway specialties	1,000 s tons	P
	Other alloy steel castings, including rolls for rolling mills	1,000 s tons	P
	High alloy steel castings	1,000 s tons	P
	Steel investment castings:		
	Carbon, including low alloy	1,000 s tons	P
	Alloy, including stainless	1,000 s tons	P
	M33D, ALUMINUM INGOT AND MILL PRODUCTS		
	Extrusion ingot, primary and secondary	1,000 lb	P
	Other ingot and molten metal, primary and secondary	1,000 lb	P
	Aluminum sheet, plate, and foil mill products:		
	Sheet:		
	Nonheat-treatable	1,000 lb	P
	Heat-treatable	1,000 lb	P
	Plate:		
	Nonheat-treatable	1,000 lb	P
	Heat-treatable	1,000 lb	P
	Foil	1,000 lb	P
	Aluminum rod, wire, and cable mill products:		
	Rod and bare wire:		
	Drawing stock (redraw rod)	1,000 lb	P
	Bare wire	1,000 lb	P
	Cable and insulated wire:		
	ACSR and aluminum cable, bare	1,000 lb	P
	Wire and cable, insulated or covered	1,000 lb	P
	Aluminum rod, bar, pipe, tube, and shaped mill products:		
	Rod and bar (rolled and extruded):		
	Alloys other than 2,000 and 7,000 series	1,000 lb	P
	Alloys in 2,000 and 7,000 series	1,000 lb	P
	Pipe and tube (extruded and drawn):		
	Alloys other than 2,000 and 7,000 series	1,000 lb	P
	Alloys in 2,000 and 7,000 series	1,000 lb	P
	Extruded shapes:		
	Alloys other than 2,000 and 7,000 series	1,000 lb	P
	Alloys in 2,000 and 7,000 series	1,000 lb	P
	All other aluminum mill products:		
	Atomized powder and paste	1,000 lb	P
	Other flake, powder and paste	1,000 lb	P
	Forgings	1,000 lb	P
	Impacts	1,000 lb	P

APPENDIX D.

Receipts for Work Done for Others on Materials Owned by Others on a Commission, Toll, or Other Basis

Product code	Check digit	Activity description	Product code	Check digit	Activity description
9300000	8	Receipts for work done for others on their materials	9300032	1	Printed circuit assemblies, loaded boards or modules (printed circuit boards with inserted electronic components)
9300003	2	Packing leaf, redried and not redried			
9300004	0	Stemming leaf, aged and not aged	9300085	9	Receipts for smelting and refining materials owned by others on a toll basis.
9300006	5	Receipts for contract or commission work on products other than hosiery	9300086	7	Receipts for conversion of steel for other companies
9300008	1	Receipts for work done for others on their materials; except for knit fabrics, underwear, and outerwear	9300087	5	Receipts for processing (rolling, drawing, redrawing, extruding, insulating, etc.) of materials owned by others
9300014	9	Other receipts for work done for others on their materials	9300088	3	Receipts for cutting and polishing stones on materials owned by others
9300023	0	Receipts for commission spinning of yarn	9360000	5	Receipts for recordings for other establishments of your company
9300024	8	Weaving broadwoven fabrics			
9300031	3	Printed circuit (wiring boards)			

APPENDIX E.

Receipts for Selected Nonmanufacturing Activities

Product code	Check digit	Activity description	Unit of measure
1411011	8	Rough dimension limestone -----	short tons
1411015	9	Rough dimension granite, including gneiss, syenite, and diorite -----	short tons
1422000	8	Crushed and broken limestone -----	short tons
1423000	7	Crushed and broken granite, including gneiss, syenite, and diorite -----	short tons
1429000	1	Other crushed or broken stone, including slate, marble, traprock, sandstone, etc.; excluding limestone -----	short tons
2011093	8	Receipts for custom slaughtering -----	
2041993	3	Receipts for custom mixing of feeds from materials owned by others -----	
2048093	5	Receipts for custom milling, custom mixing of feeds from materials owned by others -----	
2241693	7	Receipts for commission weaving, knitting, or braiding of narrow fabrics from yarns owned by others -----	
2251993	8	Receipts for contract or commission work on womens' hosiery, except socks -----	
2252993	7	Receipts for contract or commission work on hosiery (except womens' full-length and knee-length stockings) -----	
2254993	5	Contract and commission receipts for knitting only or knitting and finishing underwear and nightwear -----	
2259193	7	Contract and commission receipts for knitting only or knitting and finishing gloves and mittens -----	
2269993	8	Receipts for commission finishing of cotton and manmade fiber textiles (except broadwoven fabrics and threads) -----	
2273993	2	Receipts for commission finishing of tufted carpet and rugs owned by others -----	
2295993	6	Receipts for commission coating of fabrics owned by others -----	
2323993	2	Receipts for contract or commission work on men's and boys' neckwear -----	
2371993	3	Receipts for contract or commission work on fur coats, capes, jackets, neck pieces, etc. -----	
2381093	0	Receipts for making gloves and mittens from woven or purchased knit fabrics owned by others -----	
2384993	8	Receipts for contract or commission work on robes and dressing gowns -----	
2386993	6	Receipts for contract or commission work on leather and sheep-lined clothing -----	
2387993	5	Receipts for contract or commission work on apparel belts -----	
2389993	3	Receipts for contract or commission work on handkerchiefs, garters, garter belts, academic caps, gowns, costumes, etc. -----	
2396993	4	Contract printing and/or silk screen printing on garments or apparel accessories owned by others -----	
2397993	3	Schiffli machine embroidering on materials owned by others -----	
3151193	4	Receipts for making gloves and mittens from leather owned by others -----	
9505100	9	Steel service centers (including steel slitting on a customer basis) -----	1,000 lb
9512011	9	Subprimal and fabricated cuts package in plastics (boxed beef) -----	
9512063	0	Wiping rags, including receipts for washing and reconditioning of rags -----	
9512065	5	Unstemmed leaf tobacco not redried before packing -----	
9599501	5	Receipts for grinding lenses to individual prescriptions -----	
9599902	5	Receipts for artificial limbs, internal body replacement parts, braces, trusses, etc., made to individual prescriptions -----	
9679400	3	Publishing receipts for records, tapes, and compact discs -----	
9733400	7	Receipts for photocopying and duplicating -----	
9737210	6	Custom computer programming services -----	
9737220	5	Packaged computer software -----	
9737225	4	Receipts for publishing prepackaged computer software -----	
9737230	4	Computer integrated system design -----	
9737420	1	Computer facilities management services -----	
9737430	0	Computer processing and data preparation services -----	
9737440	9	Electronic information retrieval services -----	
9737910	1	Computer rental and leasing -----	
9737920	0	Computer maintenance and repair -----	
9737990	3	Computer related services, not elsewhere classified -----	
9738900	1	Receipts for services as print broker -----	
9738901	9	Steel slitting on a contract basis -----	
9739000	9	Receipts for equipment rental and leasing -----	
9739900	0	Receipts for recordings for others outside your company -----	
9753200	6	Custom conversion of vans owned by others -----	
9769900	3	Sharpening services -----	
9781901	5	Video discs, prerecorded (including laser) -----	
9781902	3	Video tapes, prerecorded -----	
9998000	5	Miscellaneous receipts, including receipts for repair work, sales of scrap and refuse, etc. -----	
9998013	8	Sales of scrap and refuse -----	
9998015	3	Bark -----	
9998017	9	Sales of mill residues other than bark, including sawdust, shavings, slabs, cores, fuelwood, chipper rejects, etc. -----	
9998031	0	Receipts for installation or construction of products of this establishment -----	
9998035	1	Receipts for maintenance contracts -----	
9998041	9	Receipts for research and development -----	
9998043	5	Receipts for repairing and renovating mattresses -----	
9998045	0	Receipts for construction work (paving, etc.) -----	
9998051	8	Receipts for sold electricity -----	
9998061	7	Receipts for repair work -----	
9998063	3	Receipts for repair, renovating, refurbishing, or reupholstering furniture -----	
9998065	8	Factory rebuilt and retreaded tires -----	
9998081	5	Receipts from public warehousing and storage conducted at this establishment -----	
9998097	1	Other miscellaneous receipts (including repair work, installation, sales of scrap and refuse) -----	
9998098	9	Other miscellaneous receipts -----	
9998900	6	Sales of products bought and sold without further manufacture, processing, or assembly at this establishment -----	
9998901	4	Ice sold wholesale -----	
9998902	2	Ice sold retail -----	
9998903	0	Other products -----	
9998911	3	Sales of carbonated soft drinks bought and sold without further processing -----	
9998912	1	Sales of soft drink syrup bought and sold without further processing -----	
9998913	9	Sales of aseptic drinks bought and sold without further processing -----	
9998914	7	Sales of sparkling bottled waters bought and sold without further processing -----	
9998915	4	Sales of other bottled waters bought and sold without further processing -----	
9998916	2	Sales of other products bought and sold and resold without further manufacture, processing, or assembly at this location -----	
9998931	1	Sale of green olives, bought and sold without further manufacture or processing, other than repackaging. -----	1,000 gal

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

E-1

APPENDIX F.

Receipts for Selected Nonmining Activities

Product code	Check digit	Activity description	Unit of measure
2819900	8	Recovered elemental sulfur	
2951051	8	Asphalt and tar paving mixtures (including bituminous or asphaltic concrete) and asphaltic paving cements	1,000 cu yd
3273000	4	Ready-mixed concrete	
3274000	3	Lime (quicklime, hydrated lime, and dead burned dolomite)	cubic feet
3281100	2	Dressed dimension granite	
3281200	0	Dressed dimension limestone	cubic feet
3281300	8	Dressed dimension stone, other than granite and limestone	cubic feet
3599500	0	Receipts for machine shop job work	
9512001	0	Receipts for hauling minerals and mine equipment beyond mine property	
9512003	6	Receipts for hauling oil and gas field supplies and equipment	
9998900	6	Sales of products bought and sold without further processing	
9998905	5	Sales of coal purchased and sold without further processing	short tons

APPENDIX G.

Selected Product Classes and Products Primary to More Than One Industry

Product code	Description	Product code	Description
20116 20136	Pork, processed or cured (not canned or made into sausage) Made in slaughtering plants Made elsewhere	2064200 2066200	Chocolate and chocolate-type confectionary products Made from purchased chocolate Made from cocoa beans ground in same establishment
2011612 2013612	Sweet-pickled or dry-cured pork (not smoked or cooked) Made in slaughtering plants Made elsewhere	2211F 22617	Finished cotton broadwoven fabrics Finished in weaving mills Finished in other industries
2011622 2013622	Dry salt pork Made in slaughtering plants Made elsewhere	2211F01 2261701	Print cloth Finished in weaving mills Finished in other industries
2011631 2013631	Hams and picnics, except canned Made in slaughtering plants Made elsewhere	2211F03 2261703	Poplin and broadcloth Finished in weaving mills Finished in other industries
2011635 2013635	Slab bacon Made in slaughtering plants Made elsewhere	2211F05 2261705	Sheeting, including bedsheeting and osnaburgs Finished in weaving mills Finished in other industries
2011641 2013641	Sliced bacon Made in slaughtering plants Made elsewhere	2211F07 2261707	Tobacco, cheese, and bandage cloth Finished in weaving mills Finished in other industries
2011652 2013652	Other smoked pork Made in slaughtering plants Made elsewhere	2211F09 2261709	Duck Finished in weaving mills Finished in other industries
2011661 2013661	Boiled ham, barbecue pork, and other cooked pork, except canned meats and sausages Made in slaughtering plants Made elsewhere	2211F11 2261711	Other, including lawns, voiles, and batistes Finished in weaving mills Finished in other industries
20117 20137	Sausages and similar products (not canned) Made in slaughtering plants Made elsewhere	2211F13 2261713	Twill weave, except pile Finished in weaving mills Finished in other industries
2011711 2013711	Fresh sausage Made in slaughtering plants Made elsewhere	2211F15 2261715	Sateens Finished in weaving mills Finished in other industries
2011717 2013717	Dry or semidry sausage and similar products Made in slaughtering plants Made elsewhere	2211F19 2261719	Other, including oxfords, table damask, jacquard, dobby shirting, and birdseye diaper cloth Finished in weaving mills Finished in other industries
2011721 2013721	Frankfurters, including weiners Made in slaughtering plants Made elsewhere	2211F23 2261723	Pile fabrics (velvets, plushes, corduroy, terry toweling, terry cloth, etc.) Finished in weaving mills Finished in other industries
2011735 2013735	Other sausage, smoked or cooked Made in slaughtering plants Made elsewhere	2211G 23923	Towels and washcloths Made in weaving mills Made in other industries
2011791 2013791	Jellied goods and similar preparations, not canned Made in slaughtering plants Made elsewhere	2211G10 2392310	Terry towels and washcloths, including pile Made in weaving mills Made in other industries
2011800 2013800	Canned meats (except dog, cat, and baby food) Made in slaughtering plants Made elsewhere	2211G30 2392313	Other towels, including huck and crash Made in weaving mills Made in other industries
20415 20450	Flour mixes, and refrigerated and frozen doughs and batters Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2211H25 2221K00 2392200	Sheets and pillowcases Made in weaving mills Wholly or chiefly cotton fabrics Wholly or chiefly manmade fibers and silk Made in other industries
2041511 2045011	Pancake and waffle mixes Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J 22628	Finished manmade fiber and silk broadwoven fabrics Finished in weaving mills Finished in other industries
2041513 2045013	Cake mixes, including gingerbread Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J01 2262801	Print cloth Finished in weaving mills Finished in other industries
2041515 2045015	Biscuit mixes Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J03 2262803	Poplin and broadcloth Finished in weaving mills Finished in other industries
2041517 2045017	Pie crust mixes Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J05 2262805	Sheeting, including bedsheeting and osnaburgs Finished in weaving mills Finished in other industries
2041519 2045019	Doughnuts and other sweet yeast goods mixes Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J07 2262807	Lawns, voiles, and batistes Finished in weaving mills Finished in other industries
2041521 2045021	Bread and bread-type roll mixes Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J11 2262811	Other types Finished in weaving mills Finished in other industries
2041525 2045025	Other prepared flour mixes, including cookie mixes Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J13 2262813	Twill weave, except pile Finished in weaving mills Finished in other industries
2041581 2045081	Biscuit dough Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J15 2262815	Sateens Finished in weaving mills Finished in other industries
2041585 2045085	Bread and bread-type roll dough, including dinner Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J19 2262819	Other, including oxfords, table damask, jacquard, and dobby shirting Finished in weaving mills Finished in other industries
2041586 2045086	Cookie dough Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J23 2262823	Pile fabrics Finished in weaving mills Finished in other industries
2041588 2045088	Pasta dough Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J25 2262825	Chiefly rayon and/or acetate Finished in weaving mills Finished in other industries
2041589 2045089	Other doughs and batters, including pizza, coffeecake, pancake, etc. Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J27 2262827	Chiefly polyester Finished in weaving mills Finished in other industries
2041591 2045091	Bread and bread-type roll dough Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J29 2262829	Other Finished in weaving mills Finished in other industries
2041592 2045092	Cookie dough Made chiefly from flour milled in the same establishment Made chiefly from purchased flour	2221J31 2262831	Other fabrics, including combinations of spun yarn and filament, blends with wool, silk, and blends with silk Finished in weaving mills Finished in other industries
2041595 2045095	Other doughs and batters, including pizza, coffeecake, pancake, etc. Made chiefly from flour milled in the same establishment Made chiefly from purchased flour		

NUMERICAL LIST OF MANUFACTURED AND MINERAL PRODUCTS

G-1

Product code	Description	Product code	Description
2253400 2329360	Men's and boys' sweaters Made in knitting mills Made in cut-and-sew shops	3211424 3231884	Other glass products: Tempered glass for construction, architectural, and automotive purposes Made by glass producers Made from purchased glass
2253500 2339730	Women's, misses', and juniors' sweaters Made in knitting mills Made in cut-and-sew shops	3211429 3231889	Tempered glass for other uses, such as for appliances Made by glass producers Made from purchased glass
2253600 2369370	Girls', children's, and infants' sweaters Made in knitting mills Made in cut-and-sew shops	3211431 3231871	Multiple-glazed, sealed insulating units Made by glass producers Made from purchased glass
2253A00 2321300	Men's and boys' knit shirts Made in knitting mills Made in cut-and-sew shops	3229500 3229600 3229700	Machine-made pressed and blown glassware Made by glass producers Machine-made table, kitchen, art, and novelty glassware Machine-made lighting, automotive, and electronic glassware All other machine-made glassware (including technical and scientific glassware, glass blocks, and lens blanks) Made from purchased glass
2253B00 2331300	Women's, misses', and juniors' knit shirts and blouses Made in knitting mills Made in cut-and-sew shops	3231100	Handmade pressed and blown glassware Made by glass producers Made from purchased glass
2253C00 2361300	Girls', children's, and infants' knit shirts and blouses Made in knitting mills Made in cut-and-sew shops	3229800 3231200	Steel wire Made in steel mills Not made in steel mills
22541	Men's and boys' knit underwear and nightwear Made in knitting mills Made in cut-and-sew shops	3312500 3315500	Steel pipe and tubes Made in steel mills Not made in steel mills
2254111 2322100	Underwear Made in knitting mills Made in cut-and-sew shops	3312600 3317000	Cold-rolled steel sheet and strip Made in steel mills Not made in steel mills
2254113 2322206	Nightwear Made in knitting mills Made in cut-and-sew shops	3312700 3316700	Cold-finished steel bars and bar shapes Made in steel mills Not made in steel mills
22544	Women's and childrens knit underwear and nightwear Made in knitting mills Made in cut-and-sew shops	3312800 3316800	Seamless rolled ring forgings, ferrous Made in steel mills Not made in steel mills
2254411 2341200	Underwear Made in knitting mills Made in cut-and-sew shops	3312A 34627	Carbon and alloy steel, excluding stainless and hi-temp Made in steel mills Not made in steel mills
2254413 2341300	Nightwear Made in knitting mills Made in cut-and-sew shops	3312A17 3462712	Stainless and hi-temp (iron, nickel, or cobalt-base alloy) Made in steel mills Not made in steel mills
2259020 2381300 2381400 3151000	Gloves and mittens Made in weaving mills, leather-and-fabric and fabric only Made from purchased knit fabrics Made from purchased leather-and-fabric (combinations) Gloves and mittens, all leather	3312A26 3462716	Open die or smith forgings (hammer or press), ferrous Made in steel mills Not made in steel mills
2282500	Textured, crimped, or bulked filament yarns, including stretch yarns Made from purchased filament yarn Made by filament yarn producers	3312B 34628	Carbon and alloy steel (excluding stainless and hi-temp) Made in steel mills Not made in steel mills
2823036 2824815 2824851 2824875 2824879	Rayon and acetate Nylon and other polyamides Polyester Polyolefin Other noncellulosic manmade fibers	3312B62 3462812	Stainless and hi-temp (iron, nickel, or cobalt-base alloy) Made in steel mills Not made in steel mills
28656	Aromatics Not made in petroleum refineries Made in petroleum refineries	3312B66 3462816	Fencing and fence gates Made in wire drawing plants Not made in wire drawing plants
2865658 2911D55	Manufactured as a chemical raw material Not made in petroleum refineries Made in petroleum refineries	33151 34961	Noninsulated ferrous wire rope, cable, and strand Made in wire drawing plants Not made in wire drawing plants
2865659 2911D57	Manufactured for other uses Not made in petroleum refineries Made in petroleum refineries	3315113 3496113	Rope and cable made from steel wire (excluding fabricated wire rope assemblies) Made in wire drawing plants Not made in wire drawing plants
28691 2911A	Aliphatics Not made in petroleum refineries Made in petroleum refineries	3315115 3496115	Fabricated wire rope assemblies (including lifting slings) Made in wire drawing plants Not made in wire drawing plants
2869132 2911A21	Manufactured as a chemical raw material Not made in petroleum refineries Made in petroleum refineries	3315125 3496152	Wire forms (excluding rope assemblies) and composite rope and cable Made in wire drawing plants Not made in wire drawing plants
2869133 2911A22	Manufactured for other uses Not made in petroleum refineries Made in petroleum refineries	3315134 3496134	Steel wire strand (including strand for prestressed concrete, composite wire strand except ACSR, and guard rail cable) Made in wire drawing plants Not made in wire drawing plants
28744 28750	Mixed fertilizers Made by plants which manufacture fertilizer materials Made by plants which mix fertilizers from purchased materials	33156 34966	Fencing and fence gates Made in wire drawing plants Not made in wire drawing plants
2874410 2875010	In packages, tablets, and similar forms of a gross weight not exceeding 10 kg (22 lb) Made by plants which manufacture fertilizer materials Made by plants which mix fertilizers from purchased materials	3315613 3496613	Chain link fencing, excluding posts, gates, and fittings (including galvanized and plastics coated) Made in wire drawing plants Not made in wire drawing plants
2874411 2875011	Dry, shipped in bulk Made by plants which manufacture fertilizer materials Made by plants which mix fertilizers from purchased materials	3315621 3496621	Woven and welded fencing, excluding posts, gates, and fittings (including galvanized and plastics coated) Made in wire drawing plants Not made in wire drawing plants
2874421 2875021	Dry, shipped in bags Made by plants which manufacture fertilizer materials Made by plants which mix fertilizers from purchased materials	3315635 3496635	Fence gates, posts, and fittings Made in wire drawing plants Not made in wire drawing plants
2874431 2875031	Liquid Made by plants which manufacture fertilizer materials Made by plants which mix fertilizers from purchased materials	3315671 3496671	Ornamental lawn fence, excluding posts, gates, and fittings Made in wire drawing plants Not made in wire drawing plants
29117 29920	Lubricating oils and greases Made in petroleum refineries Not made in petroleum refineries	3315700 3496400	Ferrous wire cloth and other ferrous woven wire products Made in wire drawing plants Not made in wire drawing plants
2911721 2992021	Lubricating and similar oils Made in petroleum refineries Not made in petroleum refineries	33159 34968	Other fabricated ferrous wire products, except springs Made in wire drawing plants Other fabricated wire products (except springs) not produced by wire drawers
2911731 2992031	Lubricating greases Made in petroleum refineries Not made in petroleum refineries	3315942 3496842	Wire chain, including tire chain, stud-link, and welded-link Made in wire drawing plants Not made in wire drawing plants
2911D62 2999020	Waxes Made in petroleum refineries Not made in petroleum refineries	3315951 3496851	Barbed and twisted wire Made in wire drawing plants Not made in wire drawing plants
2911D72 2911D82 2999030	Microcrystalline Made in petroleum refineries Not made in petroleum refineries	3315955 3496855	Wire bale ties Made in wire drawing plants Not made in wire drawing plants
3211300 2321300	Crystalline Made in petroleum refineries Fully refined Other Not made in petroleum refineries	3315963 3496863	Welded steel wire fabrics, including concrete reinforcing mesh Made in wire drawing plants Not made in wire drawing plants
	Laminated glass Made by glass producers Made from purchased glass	3315971 3496871	Wire garment hangers Made in wire drawing plants Not made in wire drawing plants

1992

Census of Mineral Industries

MIC92-S-1

SUBJECT SERIES

General Summary

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Mineral Industries. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

Manufacturing and Construction Division prepared this report. **Barry A. Rappaport**, Assistant Chief for Construction and Mineral Censuses, was responsible for the overall planning, management, and coordination of the census of mineral industries. Planning and implementation were under the direction of **Patricia L. Horning**, Chief, Construction and Mineral Census Branch, assisted by **M. Susan Bucci**, Section Chief, with primary staff assistance by **Susan L. DiCola**, **Nancy I. Higgins**, **John F. Roehl**, **Eva J. Snapp**, and **Robert A. Wright**.

Brian Greenberg, Assistant Chief for Research and Methodology Programs, assisted by **Stacey Cole**, provided the mathematical and statistical techniques as well as the coverage operations.

Charles T. Lee, under the direction of **A. William Visnansky**, Chief, Special Reports Branch, performed overall coordination of the publication process. **Julius Smith, Jr.** and **Andrew W. Hait** provided primary staff assistance.

The Economic Planning and Coordination Division provided the computer processing procedures. **Shirin A. Ahmed**, Assistant Chief for Post Data Collection Processing, was responsible for editing and the analysts' interactive database review and correction system. Design and specifications were prepared under the supervision of **Dennis L. Wagner**, Chief, Post Collection Census Branch, assisted by **S. Mark Schmidt** and **Robert A. Rosati**.

The staff of the Data Preparation Division, **Judith N. Petty**, Chief, performed mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review.

The Geography Division staff developed geographic coding procedures and associated computer programs.

The Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, developed and coordinated the computer processing systems. **Martin S. Harahush**, Assistant Chief for Quinquennial Programs, was responsible for design and implementation of the computer systems. **Gary T. Sheridan**, Chief, Manufactures and Construction Branch, assisted by **Hugh P. Watters**, supervised the preparation of the computer programs.

Computer Services Division, **Marvin D. Raines**, Chief, performed the computer processing.

The staff of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Cynthia G. Brooks** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-4680.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, financial, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic

activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Mineral Industries

SURVEY DESCRIPTION

In the farm-oriented economy of the early 19th century, the need for mineral statistics for setting government policy, except for tariffs and taxes, was slight. The only sources of information on the mining sector were the censuses of mineral industries, then taken at 10-year intervals. Today, the need for mining statistics has greatly increased so there is now a vast array of detailed information covering virtually every measurable aspect of mining activity including employment; payrolls; hours worked; production; prices; inventories; investment in structures; machinery and equipment; and consumption of raw materials, and fuels. The census of mineral industries, though conducted only at 5-year intervals, still plays an essential role, since no other source measures the structure of the mining sector in such a comprehensive and detailed way.

For every mining establishment with one employee or more, the census obtains data on its input of labor, materials, and capital; its output of products and services; its location; and the legal form of organization of the owning firm.¹

A set of summary or general statistics is developed for each establishment (i.e., total employment, payroll, production-worker employment, hours worked, wages, cost of supplies, value of shipments and receipts, capital expenditures, and value added by mining) and aggregated by industry, by area, by employment size of establishment, and by type of ownership. Reports are published on the detailed industrial characteristics of each State, and overall measures of mining activity are shown at the county level provided the information can be published without compromising the confidentiality of individual company data. Since census legislation guarantees confidentiality to the firms that are required to report, it is frequently necessary to suppress some aggregates.

The census of mineral industries also is used to update other indicators of economic activity, especially the national income accounts. Census data on materials consumed and product output by industry are basic to the input-output matrix developed by the Bureau of Economic Analysis for the mining sector. The Federal Reserve Board monthly

Index of Industrial Production, a key indicator of current economic activity, relies on census industry and product data as benchmarks and weights to sum industries to higher levels of aggregation. The census also provides benchmarks for surveys conducted by other government agencies and by associations.

INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

Structures of the standard industrial classification.

The establishments in the census of mineral industries are classified according to the Standard Industrial Classification (SIC) Manual.² The SIC manual covers the entire field of economic activities, subdivided as follows:

Below the major group level, the SIC provides for three-digit groups and finally for four-digit industries. To illustrate:

Division B, Mining

Major group 10-----Metal mining
Industry group 104 -----Gold and silver ores
Industry 1044-----Silver ores

The SIC was developed to classify establishments as distinguished from similar systems used to classify companies or enterprises. An establishment is defined as a single physical location engaged in one of the industry categories of the SIC.

The SIC is the responsibility of an interagency technical committee established by the Office of Management and Budget. The system is used by all Federal Government agencies engaged in the classification of establishments. Many State and local governments and business concerns also organize their own records along SIC lines in order to facilitate comparison with Federal statistics.

The first SIC manual was issued in 1939. For the mining sector, the nucleus was the set of industry classifications developed over many years for use in the census of mineral industries. A revised manual was issued for the mining industries in 1945 and, with minor modifications, used for the 1954 Census of Mineral Industries. Minor

¹Since 1967, some of this information for small companies was not obtained directly, but estimated from other government records. See the discussion of coverage of establishments in Industry Classification of Establishments and Planning and Preparation.

²**Standard Industrial Classification Manual: 1987:** For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

revisions of the SIC between 1958 and 1967 introduced some four-digit industry changes, but none of them crossed three-digit group lines. Another revision of the SIC for 1972 produced additional four-digit industry changes. This revision affected 17 industries, as defined for 1967, by merging them into 6 newly defined industries. These revisions and their impact on comparability appear in the introduction, "Industry and Product Classification" of the 1972 census General Summary. The latest revision affecting comparability was issued for 1987. Appendix A of the 1987 manual notes the revisions in the four-digit industry levels between 1972 and 1987.

Structure of the SIC mining division. For the mining division, there are 4 two-digit SIC major groups (10, 12, 13, and 14), which are subdivided into 20 three-digit SIC groups (101 to 149), and further subdivided into 31 four-digit industries (1011 to 1499).

Most of the 31 mineral industries are defined in terms of specific groups of related products. In determining the boundaries of industries, it is essential that each industry comprises a group of establishments that are highly specialized in producing products that define the industry (primary products) and that a large proportion of all the products be made in establishments classified in the industry.

There are wide differences among industries in their purity; i.e., the extent to which the establishments classified in the industry:

1. Account for the total production of commodities "primary" to the industry.
2. Produce products or services "belonging" to other industries; i.e., secondary products.
3. Use similar materials or processes.

These variations are frequently construed to be shortcomings. However, these limitations in the classification structure arise from the inherent complexity of our economic system and from the variation in types of production that take place in individual establishments.

While the SIC is the basis for aggregating census data, the data collected, in turn, provide the statistical basis for periodic critical evaluation of that classification system and its revision.³

No general-purpose system of industrial classification can satisfy all users of census data. Some business users are interested primarily in a narrow range of products which they and their competitors produce. Others are involved in a wide range of products that move through the same marketing channel. Others seek data relating to the consumers of one or more types of materials. Some are

interested only in the data for highly specialized plants; others, for plants producing a "full line" of products. Those studying productivity may require data for plants using the same techniques.

The large number of SIC industries provides the analyst with the "building blocks" for making useful approximations, even if specific data cannot be developed to resolve many of these problems. A single general-purpose system of classification can only partially satisfy these diverse needs; a point is soon reached at which the adaptation of a system to better serve one use will reduce its ability (sometimes disproportionately) to serve an alternative use.

Accordingly, users of data frequently regroup detailed SIC industries differently from the two- and three-digit SIC categories. Public and private agencies also recombine the detailed classes. The four-digit industries are more susceptible to allocation to such categories than the two-digit SIC groups.

Subindustries. The Bureau of the Census frequently has further classified some of the basic four-digit SIC industries into "subindustries." Subindustries are employed where there are wide disparities in the operating ratios of the establishment in the industry because the establishment is operated as a mine only, a mine with treatment plant, a treatment plant only, or because the operated mine is underground, open pit, or a combination. This technique was used for all mining industries for editing purposes, and many were regarded as significant enough to be used for publication.

Definition of mining. The mineral industries include all establishments primarily engaged in mining. This term is used in the broad sense to include the extraction of:

1. Minerals occurring naturally.
2. Solids, such as coal and ores.
3. Liquids, such as crude petroleum.
4. Gases, such as natural gas.

The term "mining" is also used in the broad sense to include quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparation and beneficiating needed to render the mineral marketable. Exploration is included as is the development of mineral properties. Services performed on a contract, fee, or other basis in the development of mineral properties are classified separately within this division.

Mining operations are classified by industry on the basis of the principal mineral produced or, if there is no production, on the basis of the principal mineral for which exploration or development work is in process. The recovery of material from culm banks, ore dumps, and other waste minerals piles is classified in the appropriate mining industry according to the mineral product recovered.

³See **Industry Classification and Sector Measures of Industrial Production** by James W. McKid, Bureau Working Paper No. 20, 1965, and **Historical Comparability of Census of Manufactures Industries, 1929-1958** by Harold T. Goldstein, Bureau of the Census Working Paper No. 9, 1959.

Mineral preparation plants are usually operated together with mines or quarries and, frequently, no separate records are maintained. All such preparation plants are included in the scope of the minerals census. Coal cleaning and sizing plants operated at mines or as separate establishments are also included. However, crushing, grinding, and other treatment of certain nonmetallic minerals at separately operated plants are included in the manufacturing industries. Contract hauling (except out of open pits in conjunction with mining) is excluded from the mineral industries.

Statistics on mining operations which are carried on as secondary activities at manufacturing establishments (such as clay pits at clay products plants) are not within the scope of this census. However, certain information on these operations has been obtained in the census of manufactures and is included in some of the industry reports and in the State reports. Wherever such inclusion occurs, it is clearly specified.

All blast furnaces; metal smelters; metal and petroleum refineries; plants manufacturing cement, brick, tile, and pottery; and plants engaged in dressing or polishing stone are classified in the manufacturing industries. Separate reports were obtained and included in the minerals census for the few ore dressing plants operated in conjunction with smelters.

SIC classifies establishments. The SIC is an establishment classification system, and the census of mineral industries is conducted on an establishment basis. That is, a company with operations at more than one location is required to submit a report for each location. On the other hand, a company engaged in distinctly different lines of activity at one location is required to submit a separate report for each activity if the plant records permit such a separation and if the activities are substantial in size.

For oil and field operations and contract services, reporting was somewhat different from the "establishment" reporting basis used for other types of mining. Concerns operating oil and gas wells, drilling wells, or exploring for oil and gas for their own account were required to submit a separate report for each State or offshore area adjacent to each State in which they conducted such activities. Concerns which supplied contract services for mining establishments were required to submit one report covering all such activities in the United States. Information on receipts for services, production-workers' wages and hours, was requested by State. These consolidated reports were then allocated to State establishments based on the data reported at the State level. The 1992 figures for establishments include the summation of operations for each State allocated from these nationwide reports.

The requirement that distinct lines of activity at the same location be separately reported was applied only where the establishment produced and shipped significant amounts of products classified in different SIC industries. In widely varying degrees, many mining establishments extract products that fall into different SIC industries. Generally, the amounts involved are not significant enough to warrant the

filing of separate reports, even if feasible. However, there are a number of locations at which large numbers of employees are engaged in activities defined in different industries of the SIC. Frequently, companies organize their operations and their records separately for the diverse activities and report them as separate plants. When they do not do so on their own initiative, the Bureau of the Census requests separate reports if it appears that 100 employees or more are involved in each activity. For the most part, companies have cooperated and "split out" the different activities that would otherwise significantly distort the relationship of the industry and product statistics. Frequently, however, the two groups of products cannot be distinguished sufficiently in company records to provide establishment-type reporting.

Establishments included in census of mineral industries. Since the 1967 Census of Mineral Industries, the censuses have included only establishments of companies with one paid employee or more. Prior to 1967, different criteria were used to determine if an establishment had to report in the census. In the 1963, 1958, and 1954 censuses, establishments without paid employees were excluded if any of the following three items amounted to less than \$500 for the entire year:

1. Value of products shipped and services performed for others.
2. Expenses for wages, salaries, supplies, minerals received for preparation, fuel, purchased electric energy, contract work, and purchased machinery.
3. Capital expenditures for development and exploration of mineral properties, new construction and major alterations, and new and used machinery and equipment.

In general, small establishments were excluded from the 1939 and 1929 censuses if each of three similar items amounted to less than \$2,500 and from the 1919 census if value of products was less than \$500 and expenditures for development work less than \$5,000. An output criterion of

Table A. **Percent of Mining Establishments, Value Added by Mining, and Capital Expenditures, by Employment-Size Class: 1992**

Employment-size	Percent of total		
	Mining establishments	Value added by mining	Capital expenditures
All establishments.....	100.0	100.0	100.0
0 to 4 employees.....	51.8	5.7	7.9
5 to 9 employees.....	16.5	4.6	4.5
10 to 19 employees.....	13.5	7.2	6.8
20 to 49 employees.....	10.8	14.5	15.2
50 to 99 employees.....	3.7	10.2	8.8
100 to 249 employees.....	2.4	17.4	17.4
250 to 499 employees.....	.8	13.3	12.6
500 to 999 employees.....	.3	16.9	16.0
1,000 employees or more....	.1	10.3	10.7

1,000 tons for bituminous coal and lignite was used in these three censuses. Common sand and gravel operations were excluded in 1939 if they produced less than 15,000 tons of sand and gravel and had expenses of less than \$15,000. For 1929, common sand and gravel establishments producing less than 25,000 tons were excluded. This industry was not covered in censuses prior to 1929. In earlier censuses, there were no minimums for size of establishments.

The production of minerals, particularly stone, sand, and gravel, by Federal, State, and local governments is excluded from the census. Also excluded is production of these items by highway contractors and construction contractors who do not maintain separate records for sand and gravel production.

The census includes, however, mining establishments of the same company, such as coal mines serving only coke ovens operated by the same company, oil and gas wells serving only refineries or public utilities owned by the same company, and copper mines and mills where all of the ore is transferred to a company-owned smelter.

The percent of mining establishments, value added by mining, and capital expenditures by employment-size classes are shown in table A.

In general, the 1992 minerals census reports provide complete coverage of production and development operations although there are certain limitations to coverage in some industries. These limitations are discussed in detail in the industry reports.

Special treatment of small establishments. Beginning with the 1967 census, an effort was made to relieve the very small establishments from the necessity of filing a census report. In the 1992 minerals census, small single-unit companies with up to 20 employees (the cut off varied by industry), were excused from filing reports. In 1992, 12,000 companies fell into this category. Limited data on payrolls, sales, and industry classification from the administrative records of the Social Security Administration (SSA) and the Internal Revenue Service (IRS) were made available to the Bureau of the Census. (Special arrangements were made to safeguard the confidentiality of both tax and census records.) Data other than payrolls and sales for these small establishments were imputed from industry average ratios. The effect on industry aggregates is slight in most industries; for mining as a whole, these small “administrative records” accounted for only 1.9 percent of the value added. Detailed product and materials data for these small establishments were not estimated; the entire value of product shipments and cost of materials was imputed to a “not specified by kind” category.

If these establishments had been included in the 1987 Census of Mineral Industries, they were assigned the industry classifications to which they had been coded. If they had started operations later, they were coded on the basis of brief descriptions of the general activity of the establishment as reported to the Social Security Administration. Where the description is incomplete or there are

relatively fine lines of demarcation between industries or between mining and nonmining activity, the code assigned to an establishment could differ from that which would have been assigned on the basis of more complete product information. Therefore, the Bureau of the Census conducted a special classification survey in order to clarify the industry codes of some of the establishments in the administrative-record file. All establishments without specific four-digit codes and those where there could be significant misclassification between mining and other sectors were either sent a classification questionnaire or a general schedule, Form NC-9923. Nevertheless, the total establishment counts in most industries should be viewed as approximations rather than precise measurements. The counts for establishments with 20 employees or more are far more reliable than the total number of establishments.

Auxiliary units. Mining requires a wide range of diverse support activities. These activities include general administrative; supervisory; purchasing; accounting; general engineering and systems planning; and legal, financial, and related management functions usually performed centrally for other establishments of the same company. These separate locations are referred to as auxiliaries. An auxiliary is an establishment whose employees work primarily in supporting services for other establishments of the same company (i.e., its mines, factories, retail stores, etc.) rather than for other business firms or organizations. Employment and payroll data for auxiliary units are included in the published data for the census of mineral industries.

Product codes. The SIC coding system is designed to describe industries and operates in such a way that the definitions become progressively narrower with successive additions of numerical digits. There are 4 very broad two-digit groups, 20 three-digit groups, and 31 four-digit industries. Based on the SIC, the Bureau of the Census has developed a product coding system along similar lines which contains 71 five-digit product classes and 152 individual seven-digit products. The seven-digit products and five-digit product classes are considered the primary products of the industry with the same first four digits as the product code. For example, the seven-digit product code number 10312 01 refers to lead concentrates. The first five digits of this code number, 10312, refer to the “product class” lead and zinc concentrates and the first four digits, 1031, refer to the industry in which these products were made (the lead and zinc ores industry). The same system is applied to the coding of supplies. The first four digits of a supply code (for example, the code number 101121, crude iron ore received from concentration) used as a supply describe the industry that produces it; e.g., 1011, the iron ore industry.

The SIC-based commodity classification is used in the Bureau of the Census’ entire industrial statistics program, including monthly, quarterly, and annual surveys. The Bureau of the Census also publishes data on imports and exports in terms of SIC-based categories as well as the

traditional Schedule B and Tariff Schedule of United States Annotated (TSUSA) systems.⁴

Primary and secondary products of establishments.

An establishment is classified in a particular industry if its production of the primary products of that industry exceeds in value its production of products of any other single industry. The industry code assigned to the establishment is derived from a summation of values of seven-digit product codes to their four-digit industry and the selection of the largest four-digit value as the establishment's industry classification. However, as mentioned earlier, the industry classification of an establishment may be determined not only by the products it makes but also by the processes employed or materials used in making those products.

While some establishments produce only the primary products of the industry in which they are classified, it rarely happens that all the establishments in any industry specialize to this extent. Therefore, the general statistics (employment, payrolls, inventories, value added by mining, total value of shipments and receipts, capital expenditures, etc.) shown for an industry (tables 1 to 4 of the industry reports) encompass not only the primary activities of the establishments in that industry but also their secondary activities. On the other hand, the product statistics in table 6 of the industry reports measure the total output of specific products whether they are produced by establishments classified in the same industry as the product or not. For this reason, in relating the general statistics of an industry, especially the industry total value of shipments (industry reports, tables 1 to 4), to the product statistics (table 6), the composition of the industry's output as shown in table 5 should be considered.

GEOGRAPHIC CLASSIFICATION

The 1992 Census of Mineral Industries measures industrial activity at the National, State, and county levels. Prior to 1977, similar information was summarized for the traditional nine geographic divisions (e.g., New England, Middle Atlantic, etc.) and the four geographic regions (Northeast, South, Middle Atlantic, and West).

The presentation of data for individual industries and industry groups at all these geographic levels has always created serious problems in protecting the confidentiality of individual company data. Consequently, it has frequently been necessary to set priorities as to what will be published. In the past, the preference was given to publishing data for the broad geographic regions over States leading to greater suppression of industry detail at the State level. There has been increasing interest in State information in preference to the broader regions. As a result, since 1977 the censuses of mineral industries has given first precedence to publishing State figures. A decision also was

made to forgo publication of any divisional and regional totals. This was desirable to avoid suppressing industry detail that could have been published in one State to protect data for another State in the same division that had to be suppressed to preserve the confidentiality of a respondent's figures.

Table B. Value Added by Mining for States: 1992

Geographic area	Value added (million dollars)	Percent
United States	113 621.3	100
Alabama	1 525.7	1.3
Alaska	8 522.0	7.5
Arizona	1 821.9	1.6
Arkansas	461.4	.4
California	6 038.8	5.3
Colorado	2 407.9	2.1
Connecticut	79.7	.1
Delaware and District of Columbia ..	7.3	(V)
Florida	979.9	.9
Georgia	804.9	.7
Hawaii	27.3	(V)
Idaho	203.1	.2
Illinois	1 999.9	1.8
Indiana	825.6	.7
Iowa	153.4	.1
Kansas	2 290.0	2.0
Kentucky	3 687.8	3.2
Louisiana	14 834.6	13.1
Maine	5.0	(V)
Maryland	201.3	.2
Massachusetts	69.7	.1
Michigan	1 675.9	1.5
Minnesota	748.5	.7
Mississippi	643.6	.6
Missouri	470.5	.4
Montana	1 100.0	1.0
Nebraska	136.8	.1
Nevada	1 968.3	1.7
New Hampshire	25.3	(V)
New Jersey	199.1	.2
New Mexico	3 955.1	3.5
New York	476.6	.4
North Carolina	322.2	.3
North Dakota	859.9	.8
Ohio	1 453.9	1.3
Oklahoma	6 406.9	5.6
Oregon	105.3	.1
Pennsylvania	2 344.7	2.1
Rhode Island	12.1	(V)
South Carolina	177.5	.2
South Dakota	213.1	.2
Tennessee	348.3	.3
Texas	26 192.6	23.1
Utah	1 755.4	1.5
Vermont	77.7	.1
Virginia	1 601.8	1.4
Washington	310.5	.3
West Virginia	4 212.4	3.7
Wisconsin	251.2	.2
Wyoming	5 965.6	5.3
Offshore areas not associated with a State	2663.0	2.3

(V) Rounds to zero.

⁴Schedule B is the U.S. export classification, while TSUSA is applied to imports.

Thus, some summary tables for the nine geographic divisions and four regions that were published prior to the 1977 censuses, do not appear in the publications of the 1992 Census of Mineral Industries. The relative importance of mining among the States is shown in table B.

PLANNING AND PREPARATION

General. The Bureau of the Census has an obligation to meet public needs for timely and reliable information while holding costs and the burden on respondents to a minimum. During the planning stages of each economic census, the advice of trade and professional associations, Federal and State Government agencies, individual companies, labor unions, and research and educational organizations is sought in an effort to reach both the users of data and the respondents who supply the basic figures. Simultaneously, the problems encountered in the previous censuses are studied; and improved methods of collection, processing, and tabulation are explored.

Mailing lists. Beginning with the 1954 economic censuses, the basic mailing lists have been obtained from IRS and SSA records. After the 1963 censuses, feasibility studies indicated that greater use could be made of the data in the IRS-SSA records. In the 1992 census, approximately 12,000 small mining firms were exempted from the filing requirement. Instead, census-type statistics for this group were developed from IRS-SSA records. IRS and SSA information was obtained under provisions of the Internal Revenue Code as amended by the Tax Reform Act of 1976. (Before that, Internal Revenue Service records were available through a series of executive orders.) In close cooperation with IRS and SSA, specific procedures for the use of individual tax returns were developed that assured confidential treatment of them. The name, address, payroll, and general business receipts were obtained from these reports, in addition to the SIC industrial activity code assigned by SSA. The Census Bureau and the Bureau of Labor Statistics signed a memorandum of understanding in April 1991 which spelled out procedures that allowed census access to certain standard industrial classification information collected under Bureau of Labor Statistics sponsorship. The agreement's purpose was to assist the Census Bureau in improving the coverage and accuracy of its business classifications by matching those classifications with those in the Bureau of Labor Statistics' Business Establishment List. Other census statistics for these small firms were imputed using industry average ratios of the data item to payrolls and sales.⁵

Planning the content of questionnaires. As in previous censuses, the content of the 1992 questionnaires was developed in consultation with a large number of organizations and individuals, representing both the mineral

concerns who supply the data and those who use the statistics. Those consulted included Government agencies, individual firms, the American Statistical Association, the American Economic Association, and all mining associations covering specific industries.

Many individual mining companies and their trade associations were consulted about the content of the sections of the report forms dealing with the output of specific products. Drafts of the proposed 1992 report forms were circulated among trade associations and mining companies. These draft report forms included new product detail reflecting suggestions received by the Bureau of the Census after the 1987 canvass. Items whose total value was \$10 million or less were not retained separately in the list unless they were needed to assure correct classification of other products or were of strategic importance. A restriction was also placed on proposals for new product detail; it was stipulated that the 1992 value of any new product category should exceed \$25 million.

The mining operations were requested to comment specifically on the availability of the data requested in their records and the appropriateness of the product descriptions and units of measure.

The many comments and suggestions received in this clearance procedure were evaluated by the census staff. A detailed account of the clearance procedure and the decisions reached was forwarded to the Office of Management and Budget, along with the report forms developed by the Bureau of the Census as a result.

A final review was made by the Office of Management and Budget with the assistance of the Advisory Council on Federal Reports. The latter organization is a group of business executives such as controllers, economists, and market research directors, representing a cross section of all industries.

REPORTING FORMS

A representative selection of the reporting forms used in the census are discussed below.⁶

General forms. This group of forms was used in the economic censuses, either as company-wide reports or as reports for establishments whose classification was not known precisely in advance of mailing.

NC-9901, Report of Organization. This company-wide report was used prior to mailing the 1992 census questionnaires to develop the directory of establishments operated by multiunit companies. A more detailed account of their use is given under Mailing Lists.

NC-9926, Classification Report. This form went only to small manufacturing and mineral industry single-establishment companies to obtain specific classification codes needed to identify each establishment's activity.

⁵Imputation was only about 2 percent of overall totals.

⁶Samples of general forms and mineral industry forms are reproduced in appendix E.

NC-9923, General Schedule. This questionnaire was designed to obtain information from single-establishment companies for which the available industry code was not sufficient enough to indicate which one of the standard census questionnaires should be mailed. The information provided on form NC-9923 helped assign the industry necessary for either mailing the appropriate 1992 questionnaires to establishments, if they were large, or for classifying and tabulating administrative-record data in the appropriate census.⁷

ES-9200, Auxiliary Establishment Report—Many multiestablishment companies maintain separate establishments to provide centralized administrative, management, or other supporting services for other establishments of the same company, but not for the general public or other companies. They were asked to complete form ES-9200 for those establishments. The form contained questions on the approximate number of employees engaged in such functions as centralized administration, research and development, warehousing, and other auxiliary activities, and on the cost of research and development work performed by these nonmining establishments. The respondent also was asked to describe the industry activity of the operating establishments serviced by the auxiliary unit reporting on form ES-9200.

ES-9100, Enterprise Summary Report. Each large multiestablishment company received a form ES-9100, in addition to a specific questionnaire for each establishment. The ES-9100 requested consolidated company totals for receipts, new capital expenditures, inventories, and fixed assets, which are published as part of the Census Bureau's Enterprise Statistics Program.

Census of mineral industries forms and instruction manuals. The questionnaire and instructions reproduced in the appendix, form MC-1403, is typical of the 10 long forms used for operating mining establishments. Each of these forms was designed to be used for a specific group of industries. The inquiries on the 10 long forms were identical except for the detailed questions on products shipped, materials used, assets for oil and gas extraction industries, and miscellaneous topics such as operations performed and metal contents of complex ores.

Short form. The oil and gas extraction and stone and sand and gravel industries include a large number of small-to-medium sized firms that account for a significant portion of the industry's output. Usually these firms are not so small that the limited data in the administrative-record files would meet the needs of the census. To obtain sufficient data, yet hold the reporting burden down for these smaller firms, a special abbreviated short form was designed. Key input and output statistics were obtained without the detail requested on the standard form.

MAILING LISTS

General. As discussed in the Planning and Preparation section, the list of respondents for 1992 was obtained from IRS-SSA records. Since the IRS-SSA lists consist essentially of the names and addresses of companies rather than establishments,⁸ it was necessary to follow separate procedures for multiestablishment companies (those operating at more than one location).

The prec canvass. Multiestablishment companies were required to file at least one establishment report⁹ covering each location operated by multiestablishment companies. The Bureau of the Census conducts an annual update of its directory of establishments operated by large companies in which "Report of Organization" (form NC-9901) is mailed each year to known multiestablishments with 50 or more employees and to a rotating sample of smaller multiestablishment companies with fewer than 50 employees.

This form consists of a report on company affiliation and a list of the domestic establishments operated by the company. The company's establishments as identified in census records are prelisted and the respondents are asked to correct this list. They are also asked to describe new establishments not prelisted and indicate their size.

Large multiestablishment companies are segregated for special handling because of possible overlap and duplication. Many of these companies are active in manufacturing, retail, and wholesale trade as well as in mining. The reporting instructions are reviewed in discussions with officials of the accounting departments of many of these firms to make certain that the procedure is understood and the establishments are properly described on form NC-9901.

Single-establishment companies. The mailing lists for single establishment companies (those operating at only one location) were developed from an initial control file assembled from IRS and SSA records. Out-of-scope companies (those whose activities were not to be surveyed in the economic censuses) and those identified as multiestablishments in the multiestablishment directory were removed.

The final step was to identify the small companies to which forms were not to be mailed because census-type statistics were to be developed from administrative records. The remaining records constituted the mailing lists for single-establishment companies.

⁸SSA records for multiestablishment companies identify "reporting units," which, in many instances, correspond to census establishments. Differences are such, however, that it was found necessary to obtain up-to-date lists of establishments as described in this section. Also, the Bureau of the Census concept of a company differs from IRS-SSA definition, since the Census company includes all establishments under common ownership or control. In IRS-SSA records, subsidiary corporations are often treated as independent companies.

⁹If two or more distinct lines of activity were carried on at one location, separate reports were obtained under some circumstances. (For a complete discussion, see SIC Classification of Establishments.)

⁷Use of form NC-9923 is also discussed in Mailing Lists.

General schedule. While these lists generally contained adequate industry information to determine the proper form for mailing, a number of the records did not have precise industry information. Form NC-9923, General Schedule, was mailed to these companies. Since it was assumed that these companies were quite small, only the dollar volume of business was requested. The completed reports were coded and included in the tabulations. If form NC-9923 indicated that the company was actually large, it was later requested to file one or more of the appropriate standard questionnaires.

COVERAGE AND ACCURACY

Since the list of companies obtained from IRS and SSA records was considered to be complete, no field coverage check was conducted. The prec canvass and other special procedures for multiestablishment companies described in Mailing Lists and Data Collection were designed to secure complete lists of establishments, thereby amplifying the IRS-SSA company list. Control totals, in terms of employment and payrolls of multiestablishment companies, also were used to verify the completeness of establishment coverage.

Comparison of statistics tabulated from the census of mineral industries with data originating with other agencies was possible in many instances, thus providing a further confirmation of completeness and accuracy. In the industry reports, differences between the census of mineral industries and other statistics are explained wherever possible. The Bureau of the Census' other procedures designed to improve the accuracy of the census data are discussed below in the items of data collection and processing.

GEOGRAPHIC AREA CODING

Accurate and complete information on the physical location of each establishment is required in order to tabulate the minerals census data by State and county. Prior to the census, the mailing address information was matched by computer to geographic reference files in order to assign geographic codes. Computer file flags were assigned to indicate how confident we were of the codes assigned. Large establishments with low confidence codes were researched clerically.

As in previous censuses, a post office box address or ZIP Code of the establishment was not accepted as defining the physical location. Respondents were requested to check the address labels on the questionnaires and if incorrect or with a nonphysical location address (such as post office box) to provide the following information; street address, place (post office name), State abbreviation, ZIP Code, county name, type place, and whether the establishment was located inside or outside the legal boundaries of the place. Any changes and corrections that were returned were noted and geographically coded accordingly.

Because of the unique establishment definitions in mineral industries and the rural locations of mining establishments in general, geographic coding is particularly difficult. In these cases, the name or number of the nearest highway and the distance from the nearest town or urban place was reported.

DATA COLLECTION

Although the greater use of administrative records in 1992 substantially reduced the number of companies canvassed directly, there remained over 16,000 mineral operations that were required to file; small mineral operators for whom the administrative records sufficed numbered about 12,000. The assembly of several hundred different questionnaires into mailing packages was an extensive operation.

Most of the 1992 questionnaires were mailed by late December 1992, with a due date of February 15, 1993. The collection phase was completed by late October 1993. Companies which did not return their questionnaires by the due date had to be reminded that their returns were overdue. In all, there were four mail followups. Telephone calls were made to the large companies to help with reporting problems and to request that the forms be completed and returned.

Estimates based on data from administrative records were included in the census tabulations for the relatively small number that had not responded by the closeout date in October 1993. Thus, reported or estimated data for all companies and establishments in the original mailing list (except those determined to be inactive during 1992) were included in the final statistical results. A special effort was made to obtain actual returns from all large firms, so that the dollar volume of business represented by proxy returns was relatively small.

DATA PROCESSING

General. The editing,¹⁰ coding, and tabulation of data for all of the establishments represented in the 1992 economic census were complicated tasks. Automated data processing and other advanced techniques were used in all phases.

The questionnaires were mailed from and returned to the Bureau of the Census office at Jeffersonville, Indiana, where most noncomputer (that is, clerical) processing operations were performed. Data were placed on a key-to-disc system, and the encoded data sent to Washington on a high-speed transmission system. The Washington, DC staff handled computer operations and all operations in connection with the use of IRS and SSA records.

¹⁰In data processing, the term editing means the review of information collected on questionnaires or from other sources, with the objective of locating and correcting erroneous entries.

Preliminary processing. After they were checked in, the questionnaires were keyed and subjected to simple edits to see that they conformed to certain minimum requirements before further processing. For multiestablishment companies, the sums of employment and payroll reported on its establishment questionnaire were compared with the control totals received on IRS form 941. Questionnaires received from single-establishment firms were reviewed to ascertain whether they had become multiestablishments through merger or acquisition. Questions arising in these operations were resolved by writing or telephoning the respondents. Complex problems were referred to the Washington, DC professional staff.

Computer editing. The review for consistency among data items and completeness was done on the computer. Average values and tolerance limits for key operating ratios (for example, cost of supplies per dollar of shipments, payroll per employee, production-worker wages per hours worked, etc.) played a fundamental role in the editing process.

A detailed description of the step-by-step processing procedures appears in the Bureau of the Census publication, *History of the 1992 Economic Census*. This volume describes the procedures followed in both the centralized overall processing and in the individual censuses such as mineral industries.

ESTABLISHMENTS DURING THE YEAR AND AT THE END OF THE YEAR

The establishment data shown as "Establishments during year" in the tables represent all establishments of companies with one paid employee or more that have production, development, or exploration activities at any time during the year. Also included are separately operated auxiliary establishments. Of the approximately 30,800 establishments with such activities during the year, approximately 30,450 or 99 percent of them were also operating at the end of the year.

EMPLOYMENT AND PAYROLL IN AUXILIARIES

Employment, payroll, and establishment counts of auxiliaries are included in all tables of the census of mineral industries. Table 7 in chapter 1 and table 4 in chapter 2 of this report show employment and payroll data separately by industries and States.

SUPPLIES CONSUMED

Every establishment was requested to report the total cost of supplies. In addition, quantity and all cost information were collected for approximately 45 specific supplies. Supplies were generally collected only in those industries in which the supplies were important inputs. Detailed

consumption information was collected in item 17A of the questionnaire, the standard supplies inquiry. The resulting statistics are presented mainly in table 7a of the industry reports.

In using the detailed data on supplies consumed, the following limitations should be noted:

1. Supplies were reported for the establishment as a whole, and no attempt was made to ascertain how much of the material was used in each of various products. Thus, the industry total for supplies appearing in tables 7a of the industry reports includes consumption in secondary products as well as primary products of the industry. The extent of secondary production in each industry is shown in table 5, chapter 1 of this report.
2. Special attention should be paid to the codes ending in "000" and captioned "Undistributed minerals, purchased machinery, parts, attachments and supplies used." The amounts appearing on these lines are totals imputed for:
 - a. Establishments whose statistics were developed from administrative records.
 - b. Establishments whose reports were not received at the time the data were tabulated.
 - c. Totals for establishments that returned report forms but failed to report their consumption in specific terms.

Thus, for most industries, the data for specific supplies are understated. A judgement on the statistical significance of the understatement may be made from the ratio of the value shown for the "not specified by kind" data to the total of selected supplies, minerals received for preparation, and purchased machinery installed for the industry.

1. Establishments consuming less than a specified amount of a supply were not requested to report consumption of the supply separately. For the majority of individual supplies, the minimum amount was \$25,000. The use of this cutoff is not believed to have had a significant effect on the totals.
2. A total of "not elsewhere classified" (n.e.c.), supply code 970099, was collected on most forms and is published for each industry. This is the total cost of supplies for an industry for which no supply items were prelisted on the form.

VALUE OF SHIPMENTS AND RECEIPTS

Value of shipments of multiestablishment companies. Respondents were instructed to report net selling values, f.o.b. mine, well, or plant, after discounts and allowances and excluding freight charges and excise and sales taxes. Multiestablishment companies were instructed to report for each establishment as if it were a separate economic unit

and, in particular, to report interplant transfers at their full economic value. Full economic value is defined as not only the cost of production but also a reasonable proportion of company overhead and profits. Generally, there is no advertising or other selling cost assigned by companies to interplant transfers, so it would be expected that the value per unit of such transfers would be less than that for commercial sales. To assure consistency in the valuation as the interplant transfer moved through the company, the plant receiving the transferred goods was instructed to include them in its cost of materials at the same value as at the shipping point plus the cost of freight and other handling charges.

Individual products. In the 1992 census program, information was collected on the output of 152 individual product items.¹¹ A "product," as used in the census of mineral industries, is the finest level of detail for which output information was requested. It is not necessarily synonymous with the term "product" as used in the marketing sense. In some cases, it may be much more detailed, and in other cases, it is more aggregative. If detailed production figures are available from other government sources or reliable private surveys, it was not considered necessary to request extensive detail in the census. Frequently, large aggregative values at the products level indicated that detailed production figures were available from other statistical programs.

Typically, both quantity and value of shipments were collected. However, physical quantity measures are not meaningful for some product lines, and for these, only value of shipments was collected. If a product was used to a large degree in the fabrication of other products within the same establishment in which it was produced, total quantities produced and often the quantities consumed were collected. Information on production, as well as shipments, was also collected for products for which there are significant differences between the two in a given year.

Classes of products. The individual products were aggregated into classes of products which were, in turn, grouped into all primary products of each industry. In the code structure, a seven-digit number is assigned to the individual product, a five-digit code to the class of product, and a four-digit code to the total primary products in an industry. (See Industry Classification of Establishments for application of coding structure to the assignment of SIC codes for establishments.)

The 152 product items in the 1992 census were grouped into 71 separate product classes. General similarity was the basis for the product class combinations within each four-digit industry; i.e., kind or use of the products. The economic significance of the class was also taken into

account; residual products of an industry were grouped when the dollar value of the products did not warrant separate classes.

Effect of use of administrative records on product data. As noted elsewhere in this Introduction, approximately 12,000 small mining companies were not mailed report forms and most of their detail was imputed based on limited information in IRS and SSA administrative records used in conjunction with industry averages and other information. All of the value of products of these small establishments were coded only to the four-digit products of the industry in which they were classified. These product shipments are uniquely identified in table 6 of the industry reports. Also included are product shipments of reporting companies that were described too generally to code below the four-digit level. Frequently, these were residuals in the company's records which the company felt it could not further break down.

One factor tends to reduce the value of products, n.s.k., attributed to administrative-record companies. In some four-digit industries, there is only one product category (an example is Industry 1422, Crushed and Broken Limestone). Administrative-record estimates for these products were treated as specific information and not published as "n.s.k."

In using the data for the specific seven-digit products shown in table 6 of the industry reports, the importance of the "n.s.k." has to be considered. The shipments of individual products tend to be understated somewhat in proportion to the size of the "n.s.k." Census-to-census comparison of seven-digit products should be made with caution if there has been a significant increase or decrease in the importance of the "n.s.k."

VALUE ADDED BY MINING

Value added is computed by subtracting the cost of supplies, purchased fuels and electric energy, contract work, purchased machinery installed, and minerals received from other establishments and used in mineral production from the value of shipments and receipts plus capital expenditures. This measure avoids the duplication in the value of shipments and receipts that results from the use of products of some establishments as supplies, energy sources, or materials by other establishments. Moreover, it provides a measure of value added in mineral production and also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

"Value of shipments and receipts," used in this calculation, includes the shipments of all products of the mining establishment, together with receipts for work done for others. "Capital expenditures" includes expenditures for development of mineral properties as well as for new construction and major alterations of preparation plants

¹¹See 1992 Census of Manufactures and Census of Mineral Industries, MC92-R-1, **Numerical List of Manufactured and Mineral Products**.

and other structures and expenditures for new and used machinery and equipment. The “costs” used in this calculation include costs charged to both the current and capital accounts. Both the shipments and costs figures include products bought and resold in the same condition.

CAPITAL EXPENDITURES AND GROSS ASSETS

Capital expenditures. Under this heading, mining establishments were instructed to report expenditures of the type chargeable to fixed assets accounts for which depreciation reserves are normally maintained. Actual capital outlays during the year were requested, not the final value of equipment put in place or structures completed during the year. Included in such expenditures totals are expenditures for development and exploration of mineral properties. Excluded are cost of maintenance and repair charged to current operating expense, and cost of land and mineral rights.

The Bureau of the Census estimates of capital expenditures tend to be lower than those published by the Bureau of Economic Analysis. The major source of difference results in the scope of the two series. Census data relate only to mining establishments, whereas the BEA-SEC series relating to mining includes all establishments of mining companies, nonmining as well as mining, but excludes mining establishments of companies that they have classified as chiefly nonmining.

Gross value of fixed assets. In addition to reporting capital expenditures during the year, assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained, along with depreciation and/or depletion and retirements during the year. As the Census capital expenditure series differs from the BEA series, the Census gross asset series will differ from similar series based on company level reports; i.e., those appearing in the *IRS Statistics of Income* and the Bureau of the Census *Quarterly Financial Report of Corporations*. (See appendix A for more complete definition of terms.)

INVENTORIES

The value of end-of-year inventories held by each mining establishment was obtained for 1991 and 1992. For the majority of the mineral industries, separate information was requested for:

1. Mined or quarried products.
2. Supplies, parts, fuels, etc.

A measure of the changes in mined or quarried product inventories from the beginning to the end of each year is essential to the conversion of value of shipments during the

year to value of production. The ratios of inventories to shipments at different times also are used in analysis of trends and business-cycle movements. For the best use of all of these measures, the inventories should be valued in the same prices as the shipments are valued.

Beginning in the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census when respondents were permitted to value their inventories using any generally accepted accounting method.

In using inventory data by stage of production for all industries at the industry level, it should be noted that an item treated as a mined or quarried product by an establishment in one industry may be reported as a raw material by another establishment in a different industry. Such differences are present in the inventory figures by stage of production shown for individual industries, industry groups, and “all mining” which are merely aggregates of figures reported by establishments in specified industries.

CONFIDENTIALITY

The Bureau of the Census is prohibited by law from publishing any statistics that disclose information reported by individual companies. However, the number of companies classified in a given industry is not considered a disclosure, so this item may be given even though other information is withheld. In suppressing figures to avoid disclosing information of individual companies, individual States are given precedence over geographic regions and divisions. This change was initiated in 1977. In prior censuses, the large geographic areas were given precedence. As a result of this change in philosophy, it has become more difficult to produce industry detail for the larger geographic areas, and data for these areas are no longer published. States are given precedence over counties.

In tables showing industry detail, major industry group (two-digit totals take precedence over industry group (three-digit) totals which, in turn, take precedence over individual (four-digit) industries. Similarly, in product tables, four-digit product groupings take precedence over five-digit product classes and the latter over individual seven-digit products.

Such order of precedence was used because:

1. It was considered preferable to show State data for an industry, even at the cost of withholding data for a region. In recent years, there seemed to be more need for and use of data for individual States than for the larger regions especially since many regional development programs encompassed clusters of States different from the standard regions and divisions.
2. By giving preference to industry-group statistics over individual industries within each State, the extent to which individual States can be compared within the SIC industry classification framework is greatly increased.

The disclosure analysis for the State statistics in the tables of this report is based on the total value of shipments and receipts and capital expenditures. Whenever the total value of shipments and receipts cannot be shown without disclosing information for individual companies, the complete line has been suppressed, except for capital expenditures. If capital expenditures alone is a disclosure, only total capital expenditures and cost of supplies statistics are suppressed. However, the suppressed data are included in higher level totals.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Mineral Industries may be requested. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications. Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6901.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

- Represents zero.
- (D) Withheld to avoid disclosing data for individual companies; data are included in higher level totals.
- (NA) Not available.
- (NC) Not comparable.
- (S) Withheld because estimate did not meet publication standards.
- (X) Not applicable.
- (Z) Less than half the unit shown.
- n.e.c. Not elsewhere classified.
- n.s.k. Not specified by kind.
- r Revised.
- SIC Standard Industrial Classification.

Other abbreviations, such as lb, gal, yd, and bbl, are used in the customary sense.

¹Beginning with 1967, data for single-establishment companies without paid employees were excluded from the census.

²Represents net value of shipments and receipts.

³Includes gross shipments for ferroalloy ores and metallic ores, n.e.c. In 1963, the difference between gross and net shipments for these industries was about \$7.6 million.

Table 1–1b. **Statistics by Industry Groups and Industries: 1992 and 1987**

[Data in this table are comparable to those published in table 1 of the industry series which has historical data by four-digit industry. These data may differ slightly from those in the industry series due to minor corrections identified after the industry series was issued. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry group, industry, and census year		Companies (number)	Establishments during year		All employees		Production, development, and exploration workers			Value added by mining (million dollars)	Cost of supplies used, purchased machinery installed, etc. (million dollars)	Value of shipments and receipts (million dollars)	Capital expenditures (million dollars)
				Total (number)	With 20 employees or more (number)	Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)

Table 1–1b. **Statistics by Industry Groups and Industries: 1992 and 1987—Con.**

[Data in this table are comparable to those published in table 1 of the industry series which has historical data by four-digit industry. These data may differ slightly from those in the industry series due to minor corrections identified after the industry series was issued. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry group, industry, and census year	Companies (number)	Establishments during year		All employees		Production, development, and exploration workers			Value added by mining (million dollars)	Cost of supplies used, purchased machinery installed, etc. (million dollars)	Value of shipments and receipts (million dollars)	Capital expenditures (million dollars)	
			Total (number)	With 20 employees or more (number)	Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)

Table 1–2. **Industry Group Statistics for Selected States and Offshore Areas: 1992 and 1987**—
Con.

[Data in this table are comparable to those published in table 2 of the industry series which has data for four-digit industries by State. These data may differ slightly from those in the industry series due to minor corrections identified after the industry series was issued. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry group and geographic area	1992											1987		
		Establishments during year		All employees		Production, development, and exploration workers			Value added by mining (million dollars)	Cost of supplies used, purchased machinery installed, etc. (million dollars)	Value of shipments and receipts (million dollars)	Capital expenditures (million dollars)	All employees ² (1,000)	Value added by mining (million dollars)	
		E ¹	Total (number)	With 20 employees or more (number)	Number ² (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)							Wages (million dollars)

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of figures shown: E1–10 to 19 percent; E2–20 to 29 percent; E3–30 to 39 percent; E4–40 to 49 percent; E5–50 to 59 percent; E6–60 to 69 percent; E7–70 to 79 percent; E8–80 to 89 percent; E9–90 percent or more.

²States with 100 employees or more are shown. Some statistics are withheld to avoid disclosing data for individual companies. If employment is 100 or more, number of establishments is shown and employment-size range is indicated by one of the following symbols: C–100 to 249 employees; E–250 to 499 employees; F–500 to 999 employees; G–1,000 to 2,499 employees; H–2,500 to 4,999 employees; I–5,000 to 9,999 employees.

³Represents offshore areas not associated with a State.

Table 1–3a. Summary Statistics by Major Group and Industry: 1992

[Data in this table are comparable to those published in table 3a of the industry series which has data by four-digit industry. These data may differ slightly from those in the industry series due to minor corrections identified after the industry series was issued. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

Note: Data shown as (D) are included in underscored figures above.

¹Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time data were tabulated. The following symbols are shown where estimated data based on administrative-record data account for 10 percent or more of figures shown: E1–10 to 19 percent; E2–20 to 29 percent; E3–30 to 39 percent; E4–40 to 49 percent; E5–50 to 59 percent; E6–60 to 69 percent; E7–70 to 79 percent; E8–80 to 89 percent; E9–90 percent or more.

²Some payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate statistics for these small establishments. Data are also included in respective size classes shown.

Table 1–5. Industry–Product Analysis—Summary of Industry Shipments and Receipts and Net Shipments of Primary Products: 1992

[Million dollars. An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as resales or contract work. Columns A-E show this product pattern for an industry. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H. Data in this table are comparable to those published in table 5 of the industry series. These data may differ slightly from those in the industry series due to minor corrections identified after the industry series was issued. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendixes]

SIC code	Industry	Value of shipments and receipts					Value of net shipments of primary products or services		
		Total	Primary products	Secondary products	Receipts for services	Products purchased and resold without further processing	Total produced in all industries	Produced in this industry	Produced in other industries

¹Represents sum of direct-shipping ores, iron ore concentrates for consumption, and iron agglomerates.

²Represents gross shipments less minerals received for preparation.

³Represents gross shipments excluding coal not specified by kind and less coal received for preparation.

⁴Represents raw coal for use without preparation plus prepared coal.

⁵Represents net natural gas liquids only.

⁶Represents net shipments obtained by subtracting minerals received for preparation from gross shipments.

¹Includes data for separately operated auxiliary establishments and establishments that were not possible to classify based on information available.

²Represents offshore areas not associated with a State.

Appendix A.

Explanation of Terms

Employment and related items. The report forms requested separate information on production, development, and exploration workers for a specific payroll period within each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees. This item includes all full-time and part-time employees on the payrolls of mining establishments during any part of the pay period which included the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Also included are employees working for miners paid on a per ton, car, or yard basis. Excluded are employees at the mine but on the payroll of another employer (such as employees of contractors) and employees at company stores, boardinghouses, bunkhouses, and recreational centers. Also excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Production, development, and exploration workers. This item includes employees (up through the working-supervisor level) engaged in manual work (using tools, operating machines, hauling materials, loading and hauling products out of the mine in mine cars or trucks, and caring for mines, plants, mills, shops, or yards). Included are exploration work, mine development, storage, shipping, maintenance, repair, janitorial, and guard services, auxiliary production for use at establishments (such as power plant), recordkeeping, and other services closely associated with these production and development operations at the establishment covered by the report. Gang and straw bosses and supervisors who performed manual labor are included, as are employees paid on either a time- or piece-rate basis. Also included are miners paid on a per ton, car, or yard basis and persons engaged by them and paid out of the total amount received by these miners. In addition, other employees at the establishment but not on its payroll are included if paid directly through its own employees, such as superintendents and supervisors. The payments received by these types of employees are included as part of the establishments payroll. Employees above the working-supervisor level are excluded from this category.

All other employees. This item covers nonproduction employees of the establishment including those engaged

in the following activities: supervision above the working-supervisor level, sales, highway trucking (by employees not entering mines or pits), advertising, credit, collection, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria and medical), professional (such as engineers and geologists), and technical activities. Also included are employees on the payroll of the establishment engaged in the construction of major additions or alterations to the plant and utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified as production, development, and exploration workers.)

Separately operated auxiliary establishments employees. This item includes employment at separate central administrative offices or auxiliary units of multiestablishment companies and at those offices or units servicing more than one establishment during the payroll period which included March 12. Establishments are classified on the basis of the industry or principal industry served. Employees at an office located at or near the mining establishment are usually included in the mine report.

All employees, average for year. The 1992 census report form requested employment figures for production, development, and exploration workers for four selected pay periods (mid-March, May, August, and November). For all other employees, only a mid-March figure was requested. The annual average is an average of the four monthly figures for production, development, and exploration workers plus the March figure for all other employees. This approach was used to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods closely approximates, for most industries, the average employment for the year that would be obtained from 12 monthly pay periods.

Payroll. This item includes the gross earnings of all employees on the payroll of mining establishments paid in the calendar year 1992. It includes all forms of compensation such as salaries, wages, commissions, payments received on a ton, car, or yard basis, dismissal pay, bonuses, vacation and sick leave pay, employee contributions to pension plans (such as 401(K) plan), and compensation in kind, prior to such deductions as employees'

Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to proprietors or partners of unincorporated concerns, and payments to members of Armed Forces and pensioners carried on the active payroll of mining establishments. Also excluded are royalty payments to unions and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production, development, and exploration work but charged to employees and deducted from their wages.

As in the case of employment and establishment figures, the annual payrolls of separate auxiliary establishments of multiestablishment companies are included in the totals for individual industries and for States.

Production-, development-, and exploration-worker hours.

This item represents all hours that production, development, and exploration workers worked, both on active days during which there was production or development work and on inactive days when only security guards, inspectors, repair persons, and other maintenance persons were on duty. It includes all hours worked or paid for at the mining operations, except hours paid for vacations, holidays, or sick leave, when the employee was not at the establishment. Included are actual overtime hours, not straight time equivalent hours. Hours of working proprietors or partners and employees of contractors are excluded.

Supplemental labor costs. This item represents employer's cost for fringe benefits not included in payrolls.

Legally required expenditures, including Social Security contributions. This cost includes employer contributions for all programs required under Federal and State legislation, such as Federal Old Age and Survivors' Insurance, unemployment compensation, and worker's compensation. Also included are legally required State temporary disability payments.

Payments for voluntary programs. Included in this cost are payments resulting from union negotiated contracts and all employer payments of insurance premiums on hospital and medical plans, life insurance premiums, and premiums on supplementary accident and sickness insurance. For programs supported by joint employer-employee contributions, only the employer payments are included. Also included are payments or allocations on all pension plans regardless of methods of administration, supplemental unemployment compensation plans, welfare plans, stock purchase plans in which the employer payment is not subject to withholding tax, and deferred profit sharing plans.

Value added by mining. This measure of mining activity is derived by subtracting the cost of supplies, minerals received for preparation, purchased machinery installed, purchased fuel, purchased electricity, and contract work

from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. This statistic avoids the duplication in value of shipments and receipts which results from the use of products of some establishments as supplies, energy sources, or materials by others. Moreover, it provides a measure of value added not only in mineral production but also in the development of mineral properties. For these reasons, it is considered to be the best value measure for comparing the relative economic importance of mining among industries and geographic areas.

Cost of supplies used, purchased machinery installed, etc. Besides supplies used and purchased machinery installed, this cost includes fuels and electric energy used and contract work done by others for each establishment. It includes charges to both the current and capital accounts. It also includes the cost of items used during 1992 whether they were purchased, withdrawn from inventories, or received from other establishments of the company. For selected supplies and fuels and for electric energy, both quantity and cost data were requested. The cost data refer to direct charges actually paid or payable (after discounts) for items used during the year. Freight charges and other direct charges incurred by the establishment in acquiring the item are included. Companies whose records did not show actual amounts used were asked to approximate use by adding purchases (or receipts) during the year to beginning inventory and subtracting ending inventory. Separate figures were requested for (1) selected supplies used, minerals received for preparation, and purchased machinery installed; (2) electric energy purchased; (3) purchased fuels used for heat, power, or the generation of electricity; (4) contract work done by others; and (5) products bought and resold in the same condition. Supplies and equipment used in mine development, plant expansion, and capitalized repairs, which are chargeable to fixed assets accounts, are included in this item, as are supplies furnished without charge to contractors for use at the mining operation and supplies sold to employees for use at the establishment. Excluded are such costs as advertising, insurance, telephone, and research and consulting services of other establishments or such overhead costs as depreciation charges, rent, interest, and royalties.

Selected supplies used, minerals prepared, etc. In addition to the total cost of supplies used, purchased machinery installed, etc., which every establishment was required to report, information also was collected on the consumption of major supplies used in mining. These inquiries were restricted to supplies which were important parts of the cost of production, exploration, and development of a particular industry and for which cost information was available. On report forms for most mineral industries (except the contract services and the crude petroleum and natural gas industries), a uniform inquiry was included on minerals prepared at the reported establishments. Figures were obtained on crude minerals mined at the establishment (quantity), received from other establishments of the

company or purchased from others (quantity and cost), and received for preparation on a custom or toll basis (quantity and estimated value). Establishments consuming less than a specified amount (usually \$25,000) were not required to report the cost of a supply. For small establishments for which administrative records were used, the cost of supplies was included in "not specified by kind."

Value of shipments and receipts. The amounts shown as value of shipments and receipts for each industry and for individual products or classes of products are the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during 1992, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1992. Prepared material or concentrates includes preparation from ores mined at the same establishment, purchased, received from other operations of the same company, or received for milling on a custom or toll basis. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry, (2) the value of secondary products which are primary to other industries, (3) the receipts for contract work done for others, except custom milling, and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

Shipments of individual products. In the 1992 Census of Mineral Industries, information was collected on output for about 150 individual mineral products. In general, the shipments figures of the 1992 and 1987 minerals censuses were confined to separate totals for each crude and each prepared mineral. When shipments were significant, separate figures also were obtained on crude minerals going to preparation plants and those going to consumers.

Figures were collected on both quantity and value of shipments. Shipments includes commercial shipments and transfers of products to other operations of the same company. For products that are used to a significant extent within the same establishment for power or heat, and for

minerals mined and prepared in the same establishment, total production figures or separate data on production for such uses were collected. Typically, production also was collected for products for which there was usually significant differences between total production and total shipments because of stock changes.

For service industries, the amount received or due for services performed during 1992 was collected as a measure of output. For mine operators who also perform services, the amount received for such services was added to the total value of products shipped to determine total value of shipments and receipts for each establishment.

Capital expenditures. This item covers expenditures made during the year for development and exploration of mineral properties, for new construction, and for purchased machinery chargeable to fixed assets accounts of the mineral establishment. They are the type for which depreciation, depletion, or Office of Minerals Exploration accounts are ordinarily maintained. Capital expenditures during 1992 were determined as "additions completed during the year plus construction in progress at the end of the year minus construction in progress at the beginning of the year." Reported capital expenditures include work done on contract, as well as by the mine forces. Expenditures for machinery and equipment include those made for replacement purposes, as well as those for additions to capacity. Excluded from these expenditures were costs of maintenance and repairs charged as current operating expense and expenditures for land and mineral rights.

Whenever applicable, separate figures were provided for expenditures for development and exploration of mineral property, construction of preparation plants and other construction, new machinery and equipment, used plant, and used equipment acquired from others.

Gross value of depreciable assets. Assets data were collected on buildings, other structures, machinery, equipment, capitalized mineral exploration and development, and mineral land and rights for which depreciation, amortization, or depletion accounts are maintained. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation costs). The data were collected for the beginning and end of the year. Assets at the beginning of the year plus new and used capital expenditures minus retirements should equal assets at the end of the year. For new construction or other improvement projects in progress but not completed by the end of the year, the cumulative capital expenditures were included in the beginning- and end-of-year assets figures.

Retirements. This item represents the gross value of depreciable assets sold, retired, scrapped, destroyed, abandoned, etc., during 1992. The values shown are the acquisition costs of the retired assets. This item also

includes the value of assets (at acquisition cost rather than current market value) transferred to other establishments of the same company.

Depreciation. This item shows the reduction in value of depreciable assets brought about through use, gradual obsolescence, or the effect of the elements (decay or corrosion) during the year. Included are charges against assets acquired or completed during the year.

Rental payments. This item consists of rental payments made to other companies for use of such depreciable assets as buildings, other structures, machinery, and equipment. It does not include payments made to the parent company or another subsidiary of the parent company for the use of buildings and equipment owned by the parent company or its subsidiary. The value of such company-owned assets is included in the gross value of depreciable assets.

Rented equipment is reported according to the type of lease negotiated with the lessor. If the lease qualified as an "operating lease" the periodic payments made to the producer or the lessor are reported in the rental section. However, if the leasing arrangement met the criteria set down by the Financial Accounting Standards Board for a "capital lease," the original cost or market value of the equipment or building is reported as a value of fixed assets and not as rental payments.

Current account expenditures. This item includes all expenses for mineral properties, exploration, and development charged to current accounts. This includes all supplies, machinery, equipment, parts, fuels, power, etc., used for development or exploration and charged to current

operating expenses. Also included are royalty payments, acquisition costs for mineral land and rights which were not capitalized, and the cost of maintenance and repairs associated with exploration or development activity and charged to current accounts.

Inventories. This item includes inventories of mined or quarried products and supplies, parts, fuels, etc., at the beginning and end of the year. Included as mined or quarried products are stockpiles of products ready for shipment and stocks of raw products awaiting treatment or beneficiation. Beginning with the 1982 Census of Mineral Industries, all respondents were requested to report their inventories at (the lower of) cost or market prior to adjustment to LIFO cost. This is a change from the 1977 census in which respondents were permitted to value their inventories using any generally accepted accounting method.

Fuels and electric energy used. This item includes the quantity and cost of fuels and electric energy used in mining. For most industries, separate quantity and cost figures are shown for purchased coal, distillate fuel oil, residual fuel oil, gas, gasoline, and electric energy, and a cost figure is shown for "other fuels" (see table 7b of the industry series). Data also were obtained on the quantity of fuels and electric energy produced and consumed at the same establishment. These data are shown for coal, crude petroleum, and natural gas used at the producing establishments for heat and power, and for electric energy generated and used at the same mining operations. For electric energy, the quantity generated and used is approximated by subtracting the quantity of electric energy sold from the total quantity generated (excluding generating station use).

Appendix B. Industry Descriptions

10 METAL MINING

This major group includes establishments primarily engaged in mining, developing mines, or exploring for metallic minerals (ores). These ores are valued chiefly for the metals contained, to be recovered for use as such or as constituents of alloys, chemicals, pigments or other products. This major group also includes all ore dressing and beneficiating operations, whether performed at mills operated in conjunction with the mines served or at mills, such as custom mills, operated separately. These include mills which crush, grind, wash, dry, sinter, calcine, or leach ore, or perform gravity separation or flotation operations. Magnesite and brucite operations are classified in industry 1459, and crushed dolomite operations are classified in industry 1422. Smelters and refineries are classified in Manufacturing, major group 33, and establishments engaged in producing primary magnesium metal are classified in Manufacturing, industry 3339. The operation of brine wells or sea water plants for the production of magnesium is classified in Manufacturing, major group 28.

When performed by operators of the properties, exploration under preliminary phases of operation should be classified according to the type of ore expected to be found. Exploration performed on a contract or fee basis is classified in industry 1081.

101 IRON ORES

1011 Iron Ores

Establishments primarily engaged in mining, beneficiating, or otherwise preparing iron ores and manganiferous ores valued chiefly for their iron content. This industry includes production of sinter and other agglomerates except those associated with blast furnace operations. Blast furnaces primarily engaged in producing pig iron from iron ore are classified in Manufacturing, industry 3312.

102 COPPER ORES

1021 Copper Ores

Establishments primarily engaged in mining, milling, or otherwise preparing copper ores. This industry also includes establishments primarily engaged in the recovery of copper concentrates by precipitation and leaching of copper ore.

Establishments primarily engaged in the recovery of refined copper by leaching copper concentrates are classified in Manufacturing, major group 33.

103 LEAD AND ZINC ORES

1031 Lead and Zinc Ores

Establishments primarily engaged in mining, milling, or otherwise preparing lead ores, zinc ores, or lead-zinc ores.

104 GOLD AND SILVER ORES

1041 Gold Ores

Establishments primarily engaged in mining gold ores from lode deposits or in the recovery of gold from placer deposits by any method. In addition to ore dressing methods such as crushing, grinding, gravity concentration, and froth flotation, this industry includes amalgamation, cyanidation, and the production of bullion at the mine, mill, or dredge site.

1044 Silver Ores

Establishments primarily engaged in mining, milling, or otherwise preparing silver ores. The production of bullion at the mine or mill site is included.

106 FERROALLOY ORES, EXCEPT VANADIUM

1061 Ferroalloy Ores, Except Vanadium

Establishments primarily engaged in mining, milling, or otherwise preparing ferroalloy ores, except vanadium. The mining of manganiferous ores valued chiefly for their iron content is classified in industry 1011. Establishments primarily engaged in mining vanadium ore are classified in industry 1094, and those mining titanium ore are classified in industry 1099.

108 METAL MINING SERVICES

1081 Metal Mining Services

Establishments primarily engaged in performing metal mining services for others on a contract or fee basis, such as the removal of overburden, strip mining for metallic ores,

prospect and test drilling, and mine exploration and development. Establishments which have complete responsibility for operating mines for others on a contract or fee basis are classified according to the product mined rather than as metal mining services. Establishments primarily performing hauling services are classified in Division E, Transportation.

109 MISCELLANEOUS METAL ORES

1094 Uranium-Radium-Vanadium Ores

Establishments primarily engaged in mining, milling, or otherwise preparing uranium-radium-vanadium ores.

1099 Miscellaneous Metal Ores, Not Elsewhere Classified

Establishments primarily engaged in mining, milling, or otherwise preparing miscellaneous metal ores, not elsewhere classified. Production of metallic mercury by furnacing or retorting at the mine site is also included.

12 COAL MINING

This major group includes establishments primarily engaged in producing bituminous coal, anthracite, and lignite. Included are mining operations and preparation plants (also known as cleaning plants and washeries), whether or not such plants are operated in conjunction with mine sites. The production of coal fuel briquettes and packaged fuel is classified in Manufacturing, industry 2999. Establishments primarily engaged in the production of gas and hydrocarbon liquids from coal at the mine site are classified in major group 13.

122 BITUMINOUS COAL AND LIGNITE MINING

1221 Bituminous Coal and Lignite Surface Mining

Establishments primarily engaged in producing bituminous coal or lignite at surface mines or in developing bituminous coal or lignite surface mines. This industry includes auger mining, strip mining, culm bank mining, and other surface mining, by owners or lessees or by establishments which have complete responsibility for operating bituminous coal and lignite surface mines for others on a contract or fee basis. Bituminous coal and lignite preparation plants performing such activities as cleaning, crushing, screening or sizing are included if operated in conjunction with a mine site, or if operated independently of any type of mine.

1222 Bituminous Coal Underground Mining

Establishments primarily engaged in producing bituminous coal in underground mines or in developing bituminous coal underground mines. This industry includes underground mining by owners or lessees or by establishments

which have complete responsibility for operating bituminous coal underground mines for others on a contract or fee basis. Bituminous coal preparation plants performing such activities as cleaning, crushing, screening or sizing are included if operated in conjunction with a mine. Independent bituminous coal preparation plants are classified in industry 1221.

123 ANTHRACITE MINING

1231 Anthracite Mining

Establishments primarily engaged in producing anthracite or in developing anthracite mines. All establishments in the United States that are classified in this industry are located in Pennsylvania. This industry includes mining by owners or lessees or by establishments which have complete responsibility for operating anthracite mines for others on a contract or fee basis. Also included are anthracite preparation plants, whether or not operated in conjunction with a mine.

124 COAL MINING SERVICES

1241 Coal Mining Services

Establishments primarily engaged in performing coal mining services for others on a contract or fee basis. Establishments which have complete responsibility for operating mines for others on a contract or fee basis are classified according to the product mined, rather than as mining services.

13 OIL AND GAS EXTRACTION

This major group includes establishments primarily engaged in: (1) producing crude petroleum and natural gas; (2) extracting oil from oil sands and oil shale; (3) producing natural gasoline and cycle condensate; and (4) producing gas and hydrocarbon liquids from coal at the mine site. Types of activities included are exploration, drilling, oil and gas well operation and maintenance, the operation of natural gasoline and cycle plants, and the gasification, liquefaction, and pyrolysis of coal at the mine site. This major group also includes such basic activities as emulsion breaking and desilting of crude petroleum in the preparation of oil and gas customarily done at the field site. Pipeline transportation of petroleum, gasoline, and other petroleum products (except crude petroleum field gathering lines) is classified in Transportation and Public Utilities, major group 46, and of natural gas in major group 49. Establishments primarily engaged in petroleum refining and in the production of lubricating oils and greases are classified in Manufacturing, major group 29.

131 CRUDE PETROLEUM AND NATURAL GAS

1311 Crude Petroleum and Natural Gas

Establishments primarily engaged in operating oil and gas field properties. Such activities may include exploration for crude petroleum and natural gas; drilling, completing,

and equipping wells; operation of separators, emulsion breakers, desilting equipment, and field gathering lines for crude petroleum; and all other activities in the preparation of oil and gas up to the point of shipment from the producing property. This industry includes the production of oil through the mining and extraction of oil from oil shale and oil sands and the production of gas and hydrocarbon liquids through gasification, liquefaction, and pyrolysis of coal at the mine site. Also included are establishments which have complete responsibility for operating oil and gas wells for others on a contract or fee basis. Establishments primarily engaged in performing oil field services for operators on a contract or fee basis are classified in industry group 138.

132 NATURAL GAS LIQUIDS

1321 Natural Gas Liquids

Establishments primarily engaged in producing liquid hydrocarbons from oil and gas field gases. Establishments recovering liquefied petroleum gases incidental to petroleum refining or to the manufacturing of chemicals are classified in Manufacturing, major group 28 or 29. Establishments recovering helium from natural gas are classified in Manufacturing, major group 28.

138 OIL AND GAS FIELD SERVICES

1381 Drilling Oil and Gas Wells

Establishments primarily engaged in drilling wells for oil or gas field operations for others on a contract or fee basis. This industry includes contractors that specialize in spudding in, drilling in, redrilling, and directional drilling.

1382 Oil and Gas Field Exploration Services

Establishments primarily engaged in performing geophysical, geological, and other exploration services for oil and gas on a contract or fee basis.

1389 Oil and Gas Field Services, Not Elsewhere Classified

Establishments primarily engaged in performing oil and gas field services, not elsewhere classified, for others on a contract or fee basis. Services included are excavating slush pits and cellars; grading, and building of foundations at well locations; well surveying; running, cutting, and pulling casings, tubes, and rods; cementing wells; shooting wells; perforating well casings; acidizing and chemically treating wells; and cleaning out, bailing, and swabbing wells. Establishments which have complete responsibility for operating oil and gas wells for others on a contract or fee basis are classified according to the product extracted rather than as oil and gas field services. Establishments primarily engaged in hauling oil and gas field supplies and

equipment are classified in Division E, Transportation and Public Utilities. Establishments primarily engaged in oil and gas field machine shop work are classified in Manufacturing, industry 3599.

14 MINING AND QUARRYING OF NONMETALLIC MINERALS, EXCEPT FUELS

This major group includes establishments primarily engaged in mining or quarrying, developing mines, or exploring for nonmetallic minerals, except fuels. Also included are certain well and brine operations, and primary preparation plants, such as those engaged in crushing, grinding, washing, or other concentration. Establishments primarily engaged in manufacturing cement are classified in industry 3241; those engaged in manufacturing lime are classified in industry 3274; those engaged in cutting and finishing stone and stone products are classified in industry 3281; and those engaged in manufacturing brick and other structural clay products are classified in industry group 325. Establishments primarily engaged in crushing, pulverizing, or otherwise treating earths, rocks, and minerals mined in industry group 145 or 149; or barite mined in Industry 1479, not in conjunction with mining or quarrying operations, are classified in Manufacturing, industry 3295; establishments primarily engaged in these activities in conjunction with mines or quarries are classified in Mining. Establishments primarily engaged in crushing, pulverizing, or otherwise treating other nonmetallic minerals are classified in Mining, whether or not they are operated in conjunction with mines. Establishments primarily engaged in manufacturing other stone, clay, glass, and concrete products from minerals mined at the same establishment are classified in Manufacturing, major group 32, when separate reports are not available for the mining and manufacturing activities.

141 DIMENSION STONE

1411 Dimension Stone

Establishments primarily engaged in mining or quarrying dimension stone. Also included are establishments engaged in producing rough blocks and slabs. Establishments primarily engaged in mining dimension soapstone or in mining or quarrying and shaping grindstones, pulpstones, millstones, burrstones, and sharpening stones are classified in industry 1499. Establishments primarily engaged in dressing (shaping, polishing, or otherwise finishing) blocks and slabs are classified in Manufacturing, industry 3281. Nepheline syenite mining operations are classified in industry 1459.

142 CRUSHED AND BROKEN STONE, INCLUDING RIPRAP

1422 Crushed and Broken Limestone

Establishments primarily engaged in mining or quarrying crushed and broken limestone, including related rocks, such as dolomite, cement rock, marl, travertine, and calcareous tufa. Also included are establishments primarily

engaged in the grinding or pulverizing of limestone, but establishments primarily engaged in producing lime are classified in Manufacturing, industry 3274.

1423 Crushed and Broken Granite

Establishments primarily engaged in mining or quarrying crushed and broken granite, including related rocks, such as gneiss, syenite, and diorite.

1429 Crushed and Broken Stone, Not Elsewhere Classified

Establishments primarily engaged in mining or quarrying crushed and broken stone, not elsewhere classified.

144 SAND AND GRAVEL

1442 Construction Sand and Gravel

Establishments primarily engaged in operating sand and gravel pits and dredges, and in washing, screening, or otherwise preparing sand and gravel for construction uses.

1446 Industrial Sand

Establishments primarily engaged in operating sand pits and dredges, and in washing, screening, and otherwise preparing sand for uses other than construction, such as glassmaking, molding, and abrasives.

145 CLAY, CERAMIC, AND REFRACTORY MINERALS

Establishments primarily engaged in mining, milling, or otherwise preparing clays and refractory minerals. Mines operated in conjunction with plants manufacturing cement, brick or other structural clay products, or pottery and related products, are included in this industry when separate reports are available. Establishments primarily engaged in grinding, pulverizing, or otherwise treating clay, ceramic, and refractory minerals not in conjunction with mining or quarrying operations are classified in Manufacturing, industry 3295.

1455 Kaolin and Ball Clay

Establishments primarily engaged in mining, milling, or otherwise preparing kaolin or ball clay, including china clay, paper clay, and slip clay.

1459 Clay, Ceramic, and Refractory Minerals, Not Elsewhere Classified

Establishments primarily engaged in mining, milling, or otherwise preparing clay, ceramic, or refractory minerals, not elsewhere classified. Establishments producing clay in conjunction with the manufacture of refractory or structural clay and pottery products are classified in Manufacturing, major group 32.

147 CHEMICAL AND FERTILIZER MINERAL MINING

1474 Potash, Soda, and Borate Minerals

Establishments primarily engaged in mining, milling, or otherwise preparing natural potassium, sodium, or boron compounds. Establishments primarily engaged in mining common salt are classified in industry 1479.

1475 Phosphate Rock

Establishments primarily engaged in mining, milling, drying, calcining, sintering, or otherwise preparing phosphate rock, including apatite. Establishments primarily engaged in the production of phosphoric acid, superphosphates, or other manufactured phosphate compounds or chemicals are classified in Manufacturing, major group 28.

1479 Chemical and Fertilizer Mineral Mining, Not Elsewhere Classified

Establishments primarily engaged in mining, milling, or otherwise preparing chemical or fertilizer mineral raw materials, not elsewhere classified. Establishments primarily engaged in milling, grinding, or otherwise preparing barite not in conjunction with mining or quarry operations are classified in Manufacturing, industry 3295; similar establishments preparing other minerals of this industry are included here. Establishments primarily engaged in producing salt by evaporation of sea water or brine are classified in Manufacturing, industry 2899.

148 NONMETALLIC MINERALS SERVICES, EXCEPT FUELS

1481 Nonmetallic Minerals Services, Except Fuels

Establishments primarily engaged in the removal of overburden, strip mining, and other services for nonmetallic minerals, except fuels, for others on a contract or fee basis. Establishments primarily engaged in performing hauling services are classified in Division E, Transportation and Public Utilities.

149 MISCELLANEOUS NONMETALLIC MINERALS, EXCEPT FUELS

1499 Miscellaneous Nonmetallic Minerals, Except Fuels

Establishments primarily engaged in mining, quarrying, milling, or otherwise preparing nonmetallic minerals, except

fuels. This industry includes the shaping of natural abrasive stones at the quarry. Establishments primarily engaged in the production of blast, grinding, or polishing sand are

classified in industry 1446, and those calcining gypsum are classified in Manufacturing, industry 3275.

Appendix C.

Authority for Census: Title 13, United States Code

COLLECTION AND PUBLICATION; FIVE-YEAR PERIODS (131)

The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses ... in the year 1964, then in the year 1968, and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof.

GEOGRAPHIC SCOPE OF CENSUSES (191A)

(a)Each of the censuses authorized by this chapter shall include each State, the District of Columbia, the Virgin Islands, the Commonwealth of Puerto Rico, and as may be determined by the Secretary, such other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty. Inclusion of the other areas over which the United States exercises jurisdiction or control shall be subject to the concurrence of the Secretary of State.

WRONGFUL DISCLOSURE OF INFORMATION (214)

Whoever, being or having been an employee or staff member referred to in subchapter II of chapter I of this title, having taken and subscribed the oath of office, or having sworn to observe the limitations imposed by section 9 of

this title, publishes or communicates any information, the disclosure of which is prohibited under the revisions of section 9 of this title, and which comes into his possession by reason of his being employed (or otherwise providing services) under the provisions of this title, shall be fined not more than \$5,000 or imprisoned not more than 5 years, or both.

FAILURE TO ANSWER QUESTIONS AFFECTING COMPANIES, BUSINESSES, RELIGIOUS BODIES, AND OTHER ORGANIZATIONS: FALSE ANSWERS (224)

Whoever, being the owner, official, agent, person in charge or assistant to the person in charge of any company, business, institution establishments, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule or questionnaire prepared and submitted to him under the authority of this title, shall be fined not more than \$500; and if he willfully gives a false answer to any such question, he shall be fined not more than \$10,000.

Appendix D.

Alphabetic Index of Products and Services of Mineral Establishments

This index provides an alphabetic list of products and services classified in the mineral industries for which data are shown in table 6 of the industry reports. The references in this index refer to items for which statistics are either shown separately in that table or are included as part of a group of products or services. The index also includes products and services referred to in the industry descriptions in the explanatory text of the separate industry reports.

References to products may be found in various tables in the industry chapters; however, detailed product information is typically given in table 6. The industry codes are based on the 1987 edition of the *Standard Industrial Classification (SIC) Manual*¹ published by the Office of Management and Budget.

¹**Standard Industrial Classification Manual: 1987:** For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

A	
Abandoning of wells for oil or gas field operations.....	13890
Abrasive, natural (except quartz and sand)	14994
Acidizing and other chemical treatment of wells, except hydraulic fracturing	13890
Agate.....	14999
Alabaster, crude	14997
Alabaster, prepared	14997
Alum, natural, crude.....	14741
Alum, natural, prepared	14742
Aluminum ores, crude.....	10992
Aluminum ores, prepared	10992
Amblygonite	14798
Amethyst.....	14999
Andalusite, crude.....	14599
Andalusite, prepared	14599
Anthracite, crushed.....	12312
Anthracite, mechanically cleaned	12312
Anthracite, raw, shipments, other than to coal preparation plants.....	12311
Anthracite, raw, shipped to coal preparation plants	12311
Anthracite, screened	12312
Anthracite, sized.....	12312
Anthracite, stripping overburden services.....	12410
Antimony concentrates.....	10998
Antimony ores, crude	10998
Apatite, crude, shipped to washer or concentrate.....	14751
Apatite, dried	14752
Aplite, crude	14599
Aplite, prepared	14599
Argillite, crude, dimension stone.....	14110
Arsenic minerals.....	14798
Asbestos	14999
Ash, volcanic	14993
Asphalt, native.....	14992
Auger mining services, bituminous coal	12410
Auger mining services, lignite	12410

B	
Bailing out wells, oil and gas field.....	13890
Ball clay, crude	14551
Ball clay, prepared	14552
Barite, crude	14791
Barite, crushed	14791
Barite flotation concentrates	14791
Barite, ground	14791
Barite, prepared	14791
Barium ores, crude	14791
Basalt, rough, dimension stone.....	14110
Basalt, crushed and broken	14290
Bastnaesite, crude	10998
Bastnaesite, prepared.....	10998
Bauxite, calcined or activated	10992
Bauxite, crude, undried	10992
Bauxite, crude, undried, for direct shipping.....	10992
Bauxite, dried.....	10992
Bentonite, crude	14591
Bentonite, prepared	14591
Beryllium concentrates.....	10998
Beryllium ores, crude	10998
Bitumens, native.....	14992
Bituminous coal, crushed-surface	12212
Bituminous coal, crushed-underground	12222
Bituminous coal, mechanically cleaned-surface	12212
Bituminous coal, mechanically cleaned; underground	12222
Bituminous coal, raw, shipments other than to coal preparation plants from surface.....	12211
Bituminous coal, raw, shipments other than to coal preparation plants-from underground	12221
Bituminous coal, raw, shipped to coal preparation plants from surface	12211
Bituminous coal, raw, shipped to coal preparation plants from underground	12221

B—Con.

Bituminous coal, screened-surface.....	12212
Bituminous coal, screened-underground.....	12222
Bituminous coal, sized-surface.....	12212
Bituminous coal, sized-underground.....	12222
Bituminous limestone.....	14992
Bituminous sandstone.....	14992
Blasting services for anthracite mining.....	12410
Blasting services for bituminous coal mining.....	12410
Blasting services for lignite mining.....	12410
Blasting services for metal mining.....	10810
Blasting services for nonmetallic minerals (except fuels) mining.....	14810
Bleaching clay, crude.....	14593
Bleaching clay, prepared.....	14593
Bluestone, crude, dimension.....	14110
Board roads, building of, for oil or gas field operations.....	13890
Borate compounds and minerals, prepared.....	14744
Borax.....	14744
Boron compounds.....	14744
Boulders (mixed), crushed and broken.....	14290
Brimstone.....	14794
Briquets, iron.....	10112
Brucite, crude.....	14599
Brucite, prepared.....	14599
Building board roads for oil or gas field operations.....	13890
Building, erecting, repairing, and dismantling rigs and derricks for oil or gas field operations.....	13890
Bullion, gold, produced at mine site.....	10413
Burley fire clay, crude.....	14592
Burley fire clay, prepared.....	14592
Burrstones, natural.....	14994
Butane, natural.....	13212

C

Cadmium, concentrates.....	10997
Calamine, prepared.....	10312
Calaverite, prepared.....	10412
Calcareous tufa, rough, dimension.....	14110
Calcareous tufa, crushed and broken.....	14220
Calcined phosphate rock.....	14752
Calcite, optical grade.....	14999
Canal dredging for oil or gas field operations.....	13890
Carbonates, sodium.....	14743
Celestite.....	14798
Cement rock, crushed and broken.....	14220
Cementing wells for oil or gas field operations.....	13890
Cerium concentrates.....	10998
Cerium ores, crude.....	10998
Cerrusite, prepared.....	10312
Cesium.....	10998
Chalcocite, prepared.....	10212
Chalcopyrite, prepared.....	10212
Chalk, crushed and broken.....	14220
Chemical treatment of wells for oil or gas field operations.....	13890

C—Con.

China clay, crude.....	14551
China clay, prepared.....	14552
Chromite, concentrates or prepared.....	10997
Chromite, crude.....	10997
Chromium concentrates.....	10997
Chromium ores, crude.....	10997
Cinnabar, crude.....	10998
Cinnabar, prepared.....	10998
Clay, ball, crude.....	14551
Clay, ball, prepared.....	14552
Clay, bleaching.....	14593
Clay, ceramic and refractory minerals, crude.....	14599
Clay, ceramic and refractory minerals, prepared.....	14599
Clay, china, crude.....	14551
Clay, china, prepared.....	14552
Clay, common, crude.....	14597
Clay, common, prepared.....	14597
Clay, fire, crude.....	14592
Clay, fire, prepared.....	14592
Clay, paper, crude.....	14551
Clay, paper, prepared.....	14552
Clay, slip, crude.....	14551
Clay, slip, prepared.....	14552
Clays, natural, bleaching.....	14593
Cleaning lease tanks for oil or gas field operations.....	13890
Cleaning out, including steam cleaning, bailing out, or swabbing wells for oil or gas field operations.....	13890
Clearing locations for oil or gas field operations.....	13890
Cobalt ores, concentrates.....	10997
Cobalt ores, crude.....	10997
Colemanite.....	14744
Columbite, crude.....	10997
Columbite, prepared.....	10997
Columbium ores, crude.....	10997
Columbium ores, prepared.....	10997
Common clay, crude.....	14597
Common clay, prepared.....	14597
Condensate, cycle.....	13212
Construction of oil or gas pipelines on lease; construction of gathering lines to point where distribution company takes over.....	13890
Construction sand, crude.....	14421
Construction sand, treated.....	14422
Contract services, general, for oil or gas field operations.....	13890
Copper concentrates.....	10212
Copper ore, crude, and old tailings shipped to mills for treatment.....	10211
Copper ore, crude, and old tailings shipped to smelters.....	10211
Copper-water precipitates, including precipitates from ore leached in place.....	10213
Core cutting in oil or gas wells.....	13890
Core drilling, oil or gas field exploration services.....	13820

C—Con.

Cornwall stone, crude	14599
Corundum	14994
Crane work-on lease, for oil or gas field operations	13890
Crude oil	13111
Crude petroleum	13111
Cryolite	14999
Culm bank recovery, for anthracite (services)	12410
Cuprite, prepared	10212
Cutting casing, tubes or rods for oil or gas field operations	13890
Cutting cores in oil or gas wells	13890
Cyanite, crude	14599
Cyanite, prepared	14599
Cycle condensate	13212

D

Diabase, crude, dimension stone	14110
Diabase, crushed and broken	14290
Diamonds, industrial	14994
Diaspore, crude	14592
Diaspore, prepared	14592
Diatomaceous earth	14996
Diatomite	14996
Dimension stone, rough, other than granite or limestone	14110
Diorite, crude, dimension stone	14110
Diorite, crushed and broken	14230
Directional drilling for oil or gas field operations	13810
Dirt work in oil or gas fields	13890
Disposal systems, salt water, for oil or gas field operations	13890
Dolomite, rough, dimension stone	14110
Dolomite, crushed and broken	14220
Dolomite marble, rough, dimension, stone	14110
Dolomitic marble, crushed and broken	14290
Dragstones	14994
Dredging canals for oil or gas field operations	13890
Dried phosphate rock	14752
Drill stem testing in oil, gas, dry and service well drilling	13890
Drilling, core, oil or gas field exploration services	13820
Drilling, directional, oil or gas field	13810
Drilling dry holes for gas and oil field	13810
Drilling gas wells	13810
Drilling oil wells	13810
Drilling rat holes and mouse holes for oil or gas field operations	13890
Drilling service wells for oil or gas field operations	13810
Drilling, shot hole, oil or gas field exploration services	13820
Drilling sites, preparation of, for oil or gas field operations	13890
Drilling, stratigraphic oil or gas field exploration services	13820
Drilling water intake wells, oil or gas field	13810
Drilling wells for gas or oil field operations	13810

D—Con.

Driving keyways for oil or gas field operations	13890
Dumortierite, crude	14599
Dumortierite, prepared	14599

E

Earth, diatomaceous	14996
Earth, fuller's (including all natural bleaching clays)	14593
Emery	14994
Engine installing for oil or gas field operations	13890
Electrowon copper recovered from leaching operations	10213
Erecting, cleaning, repairing, and dismantling lease tanks for oil or gas field operations	13890
Ethane, natural gas liquid	13212
Excavating mud pits, slush pits, and cellars for oil or gas field operations	13890
Exploration services for anthracite mining	12410
Exploration services for bituminous coal mining	12410
Exploration services for lignite mining	12410
Exploration services for metal mining	10810
Exploration services for nonmetallic minerals (except fuels) mining	14810

F

Feldspar, crude	14596
Feldspar, crushed or ground	14596
Feldspar, prepared	14596
Ferberite concentrates	10997
Ferberite crude ores	10997
Ferroalloy ores, except molybdenum and vanadium, crude	10997
Fertilizer minerals, natural	14798
Fire clay, crude (including plastic, flint, diaspore, burley and stoneware)	14592
Fire clay, plastic, crude	14592
Fire clay, plastic, prepared	14592
Fishing for tools (for oil or gas field operations)	13890
Flagstones, crude, dimension	14110
Flint, fire clay, crude	14592
Flint, fire clay, prepared	14592
Flooding and water injection for oil or gas field operations	13890
Fluorite, crude	14798
Fluorspar, crude	14798
Fluorspar, crushed	14798
Fluorspar flotation concentrates	14798
Fluorspar, ground	14798
Fluorspar, prepared	14798
Fuller's earth	14593

G

Gabbro, crude, dimension stone	14110
Gabbro, crushed and broken stone	14290
Galena, prepared	10312
Ganister, crushed and broken stone	14290
Garnet	14994
Gas, natural	13115
Gas or oil field geological exploration	13820
Gas or oil field geophysical exploration	13820

G—Con.

Gas residue.....	13213
Gasoline, natural	13212
Gem stones, natural	14999
General oil or gas field contracting.....	13890
Geological exploration, oil or gas field	13820
Geophysical exploration, oil or gas field	13820
Geophysical surveying services for anthracite mining	12410
Geophysical surveying services for bituminous coal mining	12410
Geophysical surveying services for lignite mining.....	12410
Geophysical surveying services for metal mining	10810
Geophysical surveying services for the mining of nonmetallic minerals (except fuels)	14810
Germanium	10998
Gilsonite.....	14992
Glass sand for melting only.....	14461
Glauber's salt.....	14743
Gneiss, rough, dimension.....	14110
Gneiss, crushed and broken.....	14230
Gold concentrates.....	10412
Gold mill bullion and precipitates recovered by amalgamation	10413
Gold mill bullion and precipitates recovered by cyanidation	10413
Gold ore, lode, crude, and old tailings shipped to mills for treatment.....	10411
Gold ore, lode, crude, and old tailings shipped to smelters.....	10411
Gold, placer.....	10413
Grading well foundations at well locations for oil or gas field operations.....	13890
Grahamite.....	14992
Granite, rough, dimension stone	14110
Granite, crushed and broken	14230
Granules, slate	14290
Graphite.....	14999
Gravel, crude	14421
Gravel, prepared	14422
Gravel, run of pit or bank	14421
Gravel, washed and screened.....	14422
Greensand.....	14999
Greenstone, crude, dimension.....	14110
Grinding pebbles	14994
Grindstones.....	14994
Grits, crushed and broken stone	14290
Guano.....	14798
Gypsite, crude	14997
Gypsite, prepared	14997
Gypsum, crude	14997
Gypsum, crushed, ground, screened or dried	14997

H

Hafnium	10998
Hones	14994
Huebnerite, crude	10997

H—Con.

Huebnerite, prepared	10997
Humus, peat	14995
Hydraulic fracturing.....	13890

I

Iceland spar	14999
Ilmenite, concentrates.....	10998
Ilmenite ore, crude	10998
Indium.....	10998
Industrial sand.....	14469
Installing production equipment for oil or gas field operations	13890
Iridium.....	10998
Iron briquets, agglomerates.....	10112
Iron ore, crude, beneficiating-grade and/or agglomeration-grade	10111
Iron ore, crude, for direct shipping.....	10111
Iron pellets, agglomerates	10112
Iron sinter, agglomerates.....	10112
Isopentane, natural gas liquid	13212

J

Jade.....	14999

K

Kaolin and ball clay, crude.....	14551
Kaolin and ball clay, prepared	14552
Kernite	14744
Keyway driving for oil or gas field operations	13890
Kyanite, crude	14599
Kyanite, prepared	14599

L

Laterite, crude	14599
Laterite, prepared	14599
Lead concentrates.....	10312
Lead ore, crude, and old tailings shipped to mills for treatment	10311
Lead ore, crude, and old tailings shipped to smelters.....	10311
Lease condensate	13111
Lease maintenance for oil or gas field operations	13890
Lease tanks, oil or gas field, erecting, cleaning and repairing	13890
Lepidolite.....	14798
Leveling for oil or gas field operations	13890
Lignite, crushed	12212
Lignite, mechanically cleaned	12212
Lignite, raw, shipped to coal preparation plants	12211
Lignite, screened	12212
Lignite, sized.....	12212
Limestone, bituminous	14992
Limestone, rough, dimension stone	14110
Limestone, crushed and broken.....	14220
Limonite, for treatment	10111
Limonite, for agglomeration plants not at blast furnace.....	10112
Lithium, minerals	14798
Location clearing for oil or gas field operations	13890
Lode gold concentrates	10412

L—Con.

Lode gold, mill bullion	10413
Logging wells, gas or oil field	13890
M	
Magnesite, crude	14599
Magnesite, prepared	14599
Magnetite, for treatment	10111
Magnetite, for agglomeration plants not at blast furnace	10112
Manganese concentrates	10997
Manganese and manganiferous ores, crude for treatment	10997
Manganese nodules	10997
Manganese ore, crude, for treatment	10997
Manganese ore, crude, beneficiating-grade and agglomeration grade	10997
Manganese ore, crude, direct shipping	10997
Manganese ores, treated	10997
Manganese sinter	10997
Manganite, crude, for treatment	10997
Manganite, prepared	10997
Marble, crude, dimension stone	14110
Marble, including dolomitic marble, crushed and broken	14290
Marcasite	14798
Marl, crushed and broken	14222
Meerschaum	14999
Mercury ore, crude	10998
Mercury, metal	10998
Mica	14991
Mica schist, crude, dimension	14110
Mica schist, crushed and broken	14290
Microlite, crude	10998
Microlite, prepared	10998
Millstones	14994
Mine shaft sinking services for anthracite	12410
Mine shaft sinking services for bituminous coal mining	12410
Mine shaft sinking services for lignite mining	12410
Mine shaft sinking services for metal mining	10810
Mine shaft sinking services for nonmetallic minerals (except fuels) mining	14810
Mine tunneling services for anthracite mining	12410
Mine tunneling services for bituminous coal mining	12410
Mine tunneling services for lignite mining	12410
Mine tunneling services for metal mining	10810
Mine tunneling services for nonmetallic minerals (except fuels) mining	14810
Mineral pigments, natural	14798
Molding sand	14465
Molybdenite, crude	10997
Molybdenite, prepared	10997
Molybdenum concentrates	10997
Molybdenum ores, crude	10997

M—Con.

Molybdenite, crude	10997
Molybdenite, prepared	10997
Monazite, crude	10998
Monazite, prepared	10998
Mouse hole and rat hole drilling for oil or gas field operation	13890
Mud logging for oil or gas field operations	13890
Muscovite	14991

N

Native asphalt	14992
Natural abrasives (except quartz)	14994
Natural gas	13115
Natural gasoline	13212
Nepheline syenite, crude (feldspathic material use)	14596
Nepheline syenite, prepared (feldspathic material use)	14596
Nickel concentrates	10997
Nickel ores, crude	10997

O

Ocher	14798
Oil, crude	13111
Oilstones	14994
Olivine	14599
Onyx marble, crude, dimension	14110
Onyx marble, crushed and broken	14290
Optical grade calcite	14999
Osmium	10998
Overburden stripping services for anthracite mining	12410
Overburden stripping services for bituminous coal mining	12410
Overburden stripping services for lignite mining	12410
Overburden stripping services for metal mining	10810
Overburden stripping services for nonmetallic minerals (except fuels) mining	14810

P

Palladium	10998
Paper clay, crude	14551
Paper clay, prepared	14552
Paraffin services for oil or gas field operations	13890
Pavers	14994
Peat	14995
Pebbles, grinding	14994
Pegmatite (feldspar), crude	14596
Perforating well casing, oil or gas field services	13890
Perlite, crude or prepared	14999
Petroleum, crude	13111
Phlogopite	14991
Phosphate rock, crude, shipped to washer or concentrator	14751
Phosphate rock, dried, calcined or sintered	14752
Phosphate rock, washed or concentrated: shipped to drier	14752
Pigments, mineral, natural	14798
Pinite, crude	14599

P—Con.

Pinite, prepared	14599
Pipe line construction on lease; construction of gathering lines to point where distribution company takes over (oil or gas only)	13890
Pipe testing for oil or gas field operations	13890
Pipestones	14999
Pitchblende, crude	10941
Pitchblende, prepared	10942
Placer gold	10413
Placer silver	10443
Plastic fire clay, crude	14592
Plastic fire clay, prepared	14592
Platinum	10998
Platinum-group metals	10998
Plugging wells, oil or gas field services	13890
Potassium bromide	14742
Potassium salts, crude	14741
Potassium salts, processed or refined	14742
Propane (natural)	13212
Precious stones	14999
Preparation of drilling sites for oil or gas field operations	13890
Prospect and test drilling services for anthracite mining	12410
Prospect and test drilling services for bituminous coal mining	12410
Prospect and test drilling services for lignite mining	12410
Prospect and test drilling services for metal mining	10810
Prospect and test drilling services for nonmetallic minerals (except fuels) mining	14810
Psilomelane, crude, ore for treatment	10997
Pulling casing, tubes, or rods for oil or gas field operations	13890
Pulpstones, natural	14994
Pumice	14993
Pumicite	14993
Pumps installed for oil or gas field operations	13890
Pyrite concentrates	14798
Pyrites, fines	14798
Pyrites, lump ore	14798
Pyrolusite, crude, for treatment	10997
Pyrolusite, prepared	10997
Pyrophyllite, crude	14998
Pyrophyllite flotation concentrates	14998
Pyrophyllite, prepared	14998
Pyrophyllite, sawed, crushed or ground	14998
Pyrrhotite	14798

Q

Quartz crystal (pure)	14999
Quartzite, crushed and broken	14290
Quartzite, ganister, crushed and broken	14290
Quicksilver (metal), prepared at mine site	10998
Quicksilver ore	10998

R

Radium ores	10941
Rare-earth metal concentrates	10998
Rare-earth metal ores, crude	10998
Rat hole and mouse hole drilling for oil and gas field operations	13890
Reconditioning wells for oil or gas field operations	13810
Remedial work, subsurface, for oil or gas field operations	13810
Residue gas	13213
Reworking wells, oil or gas field operations	13810
Rhodium	10998
Rhodochrosite, crude, for treatment	10997
Rhodochrosite, prepared	10997
Rig building, repairing and dismantling oil or gas wells	13890
Rig skidding, for oil or gas field operations	13890
Rigs built, erected, repaired and dismantled for oil or gas field operations	13890
Riprap, granite	14230
Riprap, limestone	14220
Riprap, miscellaneous stone (except limestone and granite)	14290
Roads, board, building of, for oil or gas field operations	13890
Rock salt (sodium chloride)	14793
Rock, volcanic, light colored, crushed and broken	14290
Rocks, volcanic, light colored, rough, dimension	14110
Rolling pipe for oil or gas field operations	13890
Roscoelite, crude	10941
Roscoelite, prepared	10942
Roustabout work for oil or gas field operations	13890
Rubber clay, crude	14551
Rubber clay, prepared	14552
Rubbing stones	14994
Rubble	14110
Rubidium	10998
Ruby	14999
Running, cutting and pulling casting, tubes or rods for oil or gas field operations	13890
Ruthenium	10998
Rutile concentrates	10998
Rutile ore, crude	10998

S

Salt, common	14793
Salt, (rock), sodium chloride	14793
Salt water disposal systems, for oil or gas field operations	13890
Sand, blast	14469
Sand blasting pipe lines on lease for oil or gas field operations	13890
Sand, common, crude	14421
Sand, common, prepared	14422
Sand, construction, prepared	14422
Sand, construction, run of pit or bank	14421

S—Con.

Sand, construction, screened.....	14422
Sand, construction, washed, screened, ground, or prepared	14422
Sand, engine	14469
Sand, filtration	14469
Sand, glass, for melting only	14461
Sand, grinding	14469
Sand, industrial	14469
Sand, oil	14469
Sandstone, bituminous.....	14992
Sandstone, crude, dimension.....	14110
Sandstone, crushed and broken	14290
Sapphire	14999
Scandium	10998
Scheelite, crude	10997
Scheelite, prepared	10997
Schist, mica, crude, dimension	14110
Schist, mica, crushed and broken.....	14290
Scoria	14993
Scythestones	14994
Selenium.....	10998
Seismograph surveys for oil or gas field operations	13820
Selenite, crude	14997
Selenite, prepared.....	14997
Semianthracite, mechanically cleaned from surface operations	12212
Semianthracite, mechanically cleaned from underground operations	12222
Semianthracite, raw, (shipped to preparation plants) from surface operations	12211
Semianthracite, raw, (shipped to preparation plants) from underground operations	12221
Semiprecious stones.....	14999
Serpentine, crude, dimension stone.....	14110
Serpentine, crushed and broken stone	14290
Shale, crude	14597
Shale, prepared	14597
Shell mining	14998
Shooting wells for oil or gas field operations	13890
Shot hole drilling, oil or gas field services	13890
Siderite (carbonate), crude, for treatment.....	10111
Siderite concentrates, for agglomeration plants not at blast furnace	10112
Sienna	14798
Silica (from sand).....	14461
Sillimanite, crude	14599
Sillimanite, prepared	14599
Silver concentrates.....	10442
Silver mill bullion and precipitates recovered by amalgamation	10443
Silver mill bullion and precipitates recovered by cyanidation	10443
Silver ore, crude, for shipment to mills for treatment	10441

S—Con.

Silver ore, crude, and old tailings shipped to mills for treatment.....	10441
Silver ore, crude, and old tailings shipped to smelters	10441
Silver placer	10443
Sintered iron	10112
Sintered phosphate rock	14752
Skidding of rigs for oil or gas field operations	13890
Slate, crude, dimension stone	14110
Slate, crush and broken	14290
Slate granules, crushed and broken	14290
Slip clay, crude	14551
Slip clay, prepared	14552
Smithsonite, crude, for shipment to mills for treatment	10311
Smithsonite, prepared.....	10312
Soapstone, crude	14998
Soapstone, crushed, ground or sawed	14998
Soapstone flotation concentrates.....	14998
Soapstone, prepared.....	14998
Soda ash, natural	14743
Sodium borates.....	14744
Sodium carbonates, natural	14743
Sodium chloride (rock salt)	14793
Sodium sulfate.....	14743
Spar, Iceland, prepared	14998
Sphalerite, crude, for shipment to mill for treatment	10311
Sphalerite, prepared	10312
Spodumene.....	14798
Spudding in wells for oil or gas field operations.....	13810
Staurolite.....	14999
Steam cleaning for oil or gas wells	13890
Steatite, crude	14998
Steatite, prepared	14998
Stone, crude, dimension other than limestone and granite	14110
Stone, crushed and broken, other than granite or limestone	14290
Stone, abrasive.....	14994
Stoneware fire clay, crude	14592
Stoneware fire clay, prepared	14592
Stratigraphic drilling, oil or gas field exploration.....	13820
Strip mining services for anthracite mining	12410
Strip mining services for bituminous coal mining.....	12410
Strip mining services for lignite mining.....	12410
Strip mining services for metal mining	10810
Strip mining services for nonmetallic minerals (except fuels) mining.....	14810
Stripping overburden services for anthracite mining	12410
Stripping overburden services for bituminous coal mining	12410
Stripping overburden services for lignite mining.....	12410
Stripping overburden services for metal mining	10810

S—Con.

Stripping overburden services for nonmetallic minerals (except fuels) mining	14810
Strontianite.....	14798
Strontium minerals	14798
Subbituminous coal, mechanically crushed, screened or sized from surface operations	12212
Subbituminous coal, mechanically crushed, screened or sized from underground operations.....	12222
Subbituminous coal, raw, shipment to coal preparation plants from surface operations.....	12211
Subbituminous coal, raw, shipment to coal preparation plants from underground operations ..	12221
Subsurface remedial work for oil or gas field operations	13810
Sulfate, sodium	14743
Sulfate, native	14794
Surveying wells for oil or gas field operations	13890
Swabbing wells for oil or gas field operations	13890
Syenite (except nepheline), crude, dimension stone	14110
Syenite (except nepheline), crushed and broken ...	14230
Syenite (nepheline), crude	14596
Syenite (nepheline), prepared	14596
Sylvanite, crude ore for shipment to smelters	10411
Sylvanite, concentrates	10412

T

Taconite pellets	10112
Taconite, crude ore for treatment	10111
Tailing in wells, oil or gas field.....	13810
Talc, crude	14998
Talc, crushed, ground or sawed	14998
Talc, flotation concentrates	14998
Talc, prepared	14998
Tantalite, crude ore for treatment.....	10997
Tantalite, prepared	10997
Tantalum, crude ores for direct shipment	10997
Tantalum, prepared.....	10997
Telluride (gold) mining, crude, for shipment to mills	10411
Tellurium	10998
Testing, drill-stem, for oil or gas field operations	13890
Testing, pipe, for oil or gas field operations	13890
Thallium.....	10998
Thorite, crude.....	10998
Thorite, prepared	10998
Thorium ores, crude.....	10998
Thorium, prepared.....	10998
Tripoli.....	14994
Trona.....	14743
Tufa, calcareous, crude, dimension	14110
Tufa, calcareous, crushed and broken	14220
Tungsten concentrates.....	10997
Tungsten ores, crude	10997
Turquoise	14999

U

Ulexite.....	14744
Umber.....	14798
Uraninite, crude	10941
Uraninite, prepared.....	10942
Uranium-vanadium concentrates	10942
Uranium-vanadium ore, crude	10941

V

Vacuum truck service for oil or gas field operations.....	13890
Vanadium, concentrates	10942
Vanadium ores, crude.....	10941
Verde antique, rough, dimension stone	14110
Verde antique, crushed and broken stone	14290
Vermiculite	14999
Volcanic ash	14993
Volcanic rock, light colored, rough, dimension.....	14110
Volcanic rock, light colored, crushed and broken ...	14290

W

Washeries, anthracite	12312
Washeries, bituminous coal	12212
Water injection or flooding for oil or gas field operations	13890
Water intake well drilling for oil or gas field operations	13810
Well casing running, cutting and pulling for oil or gas field operations	13890
Well logging, oil or gas field	13890
Well plugging, for oil or gas field operations.....	13890
Well surveying, for oil or gas field operations	13890
Wellhead fittings, installed for oil or gas field operations	13890
Wells, oil, gas, dry, or service: reworking	13810
Wells, oil, gas, or service: drilling in, spudding in, tailing in	13810
Whetstones	14994
Whiting, crushed and broken	14220
Willemite, crude, for shipment to smelters.....	10311
Willemite, prepared.....	10312
Wireline services for oil or gas field operations	13890
Wolframite, crude.....	10997
Wolframite, prepared	10997
Wollastonite.....	14999
Workover of wells for oil or gas field operations	13810
Wulfenite, crude	10997
Wulfenite, prepared	10997
Wurtzilite	14992

Y

Yttrium, prepared.....	10998

Z

Zinc concentrates	10312
Zinc ore, crude, for shipment to smelters	10311
Zinc ore, crude, and old tailings shipped to mills for treatment	10311
Zinc ore, crude, and old tailings shipped to smelters.....	10311
Zirconium concentrates	10998
Zirconium ores, curde	10998

Appendix E.

Report Forms

This appendix contains reproductions of a representative selection of the report forms used in the 1992 Economic Census with emphasis on the census of mineral industries. The use of each of the forms is described in the Introduction, Report Forms. Following is a list of forms included in this appendix:

Number	Title	Number	Title
NC-9901	Report of Organization. This company-wide report was used prior to mailing the 1992 census questionnaires to develop the directory of establishments operated by multiunit companies.	ES-9200	Auxiliary Establishment Report. This form was completed by establishments whose function was to provide centralized administrative, management, or other supporting services for other establishments of the same company, but not for the general public or other companies.
NC-9923	General Schedule. This questionnaire was used to obtain information from small companies for which the industry code available in the Social Security Administration records was not precise enough to indicate which one of the standard questionnaires should be mailed.	MC-1403	Chemical and Fertilizer and Miscellaneous Nonmetallic Minerals—. This is a typical example of the types of general statistics, supplies, and product and service questions asked and how each form was tailored to reflect the uniqueness of each industry
ES-9100	Enterprise Summary Report. This form was sent to each large multiestablishment company in addition to a specific questionnaire for each establishment and requested consolidated company totals of selected data.		

Publication Program

1992 CENSUS OF MINERAL INDUSTRIES

Publications of the 1992 Census of Mineral Industries, containing data on establishments primarily engaged in the extraction of minerals, are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Customer Services, Bureau of the Census, Washington, DC 20233-8300.

Preliminary Reports

Industry series—12 reports (MIC92-I-10A(P) to -14E(P))

Preliminary data from the 1992 census are issued in 12 separate reports covering 31 mineral industries. Preliminary summary data for the United States and States are released in one report.

Final Reports

Industry series—12 reports (MIC92-I-10A to -14E)

Each of the 12 reports provides information for an industry or a group of related industries (e.g., clay, ceramic, and refractory minerals). Final figures for the United States are shown for each of 31 mineral industries on quantity and value of products shipped and supplies used; inventories; quantity and cost of fuels and electric energy purchased and the quantities of fuels produced and consumed; capital expenditures; assets; rents; employment; depreciation, amortization, and depletion; payroll; hours worked; cost of purchased machinery; value added by mining; mineral development, and exploration costs; number of establishments; and number of companies. Comparative statistics for earlier years are included. Industry statistics are shown by State, type of operation, and size of establishment.

Geographic area series—9 reports (MIC92-A-1 to -9)

A separate report for each of the nine geographic divisions presents statistics for individual States and off-shore areas for two- and three-digit industry groups by

type of operation and by county. Also, data are shown for value of shipments; value added by mining; employment; payroll; hours worked; capital expenditures; cost of supplies, etc.; purchased machinery installed; and number of mining establishments, with comparative 1987 data on employment and value added by mining.

Subject series—2 reports (MIC92-S-1 and -2)

One of these reports is a general national-level summary; the other report contains detailed statistics on fuels and electric energy consumed by mineral industries.

Reference series—1 report (MC92-R-1)

The *Numerical List of Manufactured and Mineral Products* includes a description of the principal products and services published in the 1992 Censuses of Manufactures and Mineral Industries.

Electronic Media

All data included in the printed reports are available on compact disc—read only memory (CD-ROM). The CD-ROM's provide the same information found in the reports. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, financial, insurance, real estate, construction industries, manufactures, transportation, communications, utilities, enterprise statistics, minority-owned businesses, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Commonwealth of the Northern Mariana Islands. Separate announcements describing these reports are available free of charge from Customer Services, Bureau of the Census, Washington, DC 20233-8300.
