Appendix A.
General Explanation

CENSUS COVERAGE AND METHODOLOGY

Structure and method of enumeration. Firms in the 1992 Census of Retail Trade were divided into the nonmail universe and mail universe. The coverage and the method of obtaining census information from each follow:

1. The nonmail universe consisted of firms which were not required to file a regular census return and included:

   a. All nonemployers, i.e., all firms with no paid employment during 1992. Sales information for these firms was obtained from administrative records of other Federal agencies. Although consisting of many firms, nonemployers account for less than 5 percent of total retail sales.

      The census included only those retail nonemployer firms which reported a sales volume of $1,000 or more during 1992.

      Data on nonemployers are provided in subsequent 1992 Census of Retail Trade reports; Nonemployer Statistics (RC92-N-1) and Selected Statistics (RC92-SP-1).

   b. Selected small employers, i.e., single-establishment firms with payroll below a specified cutoff. (The term ''employers'' refers to all business firms with one or more paid employees at any time during 1992 as shown in the active administrative records of other Federal agencies.) Although the payroll cutoff varied by kind of business, small employers generally included firms with one to four employees and represented about 10 percent of total retail sales of establishments covered in the census.

      Data on sales, payroll, and employment for employer firms below the payroll cutoff were derived or estimated from administrative records of other Federal agencies except for a sample of small employer firms. This sample was included in the mail universe.

2. The mail universe consisted of firms for which information was obtained by means of a mail canvass and included:

   a. Large employers; i.e., all multiestablishment firms and all employer firms above the payroll size cutoff referred to in section 1b. Within this category, a report of company organization was conducted periodically to identify firms which operated establishments at more than one location and to obtain information on payroll and mid-March employment at each location. The 1991 Report of Company Organization was used as a coverage check in the census. In the 1992 census, all multiestablishment firms were asked to notify the Census Bureau of any establishments for which a form was not received. Report forms were subsequently provided to the firms for these establishments.

   b. A sample of small employer firms referred to in section 1b. These firms were sent the census mailing packages containing the appropriate 1992 questionnaire. For the retail trade sector, the overall sample of small employer firms was 20.6 percent which varied by kind of business.

Method of classifying kinds of business. The retail trade classifications for all establishments were based on the *Standard Industrial Classification Manual: 1987*[1] (SIC). However, the method of assigning these classifications, and the level of detail at which establishments were classified, differed between the nonmail and mail universe as follows:

1. The nonmail universe.

   a. Nonemployers were classified on the basis of information obtained from administrative records of other Federal agencies.

   b. Selected small employers were classified on the basis of the most current census kind-of-business classification available from one of the Census Bureau's current sample surveys or the 1987 census. Otherwise, the classification was obtained from administrative records of other Federal agencies.

      If the census or administrative record classifications proved inadequate (none corresponded to a 1992 census classification in the detail required for employers), the firm was sent a brief inquiry requesting information necessary to assign a 1992 census kind-of-business code.

[1] *Standard Industrial Classification Manual:* 1987. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

2. Establishments in the mail universe were classified on the basis of their self-designation, answers to questions on sales by merchandise line, and other special inquiries.

COMPARABILITY OF THE 1987 AND 1992 CENSUSES

The 1987 and 1992 censuses were conducted under similar conditions and procedures except for the following:

Geographic areas. The boundaries of a number of areas for which data are shown in the 1992 census are not the same as in the 1987 census because of annexations; other boundary changes; and redefinitions of metropolitan statistical areas (MSA's), primary metropolitan statistical areas (PMSA's), and consolidated metropolitan statistical areas (CMSA's).[2] In addition, data for consolidated cities are included in the 1992 census.

Data for special economic urban areas (SEUA's) with 10,000 inhabitants or more in Michigan, Minnesota, New York, and Wisconsin qualified for publication in the 1992 census. This included townships in Michigan and Minnesota and towns in New York and Wisconsin. However, Minnesota did not have any townships that met the publication criteria.

Nonemployer firms. In 1987, data for nonemployer firms were published for the United States, States, metropolitan areas, counties, and places in four regional reports in the Nonemployer Statistics Series (RC87-N-1 to -4).

For 1992, data for nonemployers by kind of business are presented in one Nonemployer Statistics report (RC92-N-1) for the United States, States, and metropolitan areas. Nonemployer data for counties and places are available on compact discs-read only memory (CD-ROM).

NONEMPLOYER STATISTICS

Since the 1954 Census of Business, data for nonemployer businesses have been obtained from administrative records of the Internal Revenue Service (IRS). These nonemployer statistics are primarily comprised of sole proprietorship businesses filing IRS Form 1040, Schedule C, although a small percentage of the data are derived from filers of partnership and corporation tax returns.

IRS tax forms include a list of ''principal business activities'' and filers are instructed to select a category which matches their operations and to enter a numerical code corresponding to that category onto the tax form. Businesses filing Form 1040, Schedule C, are also asked to provide a written description of their business or profession. If a valid principal business activity code was reported on the 1992 tax return, the code was converted to a corresponding Standard Industrial Classification (SIC) code for census processing. Sole proprietorships without a valid code were subjected to an automated procedure which assigned an SIC code based on the written business description provided on the tax form. Descriptions which could not be automatically coded were reviewed and codes were manually assigned. Over 95 percent of all employer businesses were assigned a kind-of-business code for the 1992 Economic Census.

The industry categories on the IRS forms generally correspond to SIC categories although the level of detail is limited. Because of this, data for nonemployers in this report are provided at broader levels of industry detail than data for employers.

EXPLANATION OF TERMS

Establishments. An establishment is a single physical location at which business is conducted. It is not necessarily identical with a company or enterprise, which may consist of one establishment or more. Census of retail trade figures represent a summary of reports for individual establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records of other Federal agencies were used instead of a census report, no information was available on the number of locations operated. Estimates of this number were derived from a sample and are provided in the retail trade report, *Miscellaneous Subjects* (RC92-S-4). Each retail establishment was tabulated according to the physical location at which the business was conducted. The count of establishments represents those in business at any time during 1992. Appendix G provides a comparison of the number of establishments active any time during the year versus the number in business at the end of the year.

When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, and when conditions prescribed by the SIC manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were obtained in the census.

Leased departments are treated as separate establishments and are classified according to the kind of business they conduct. For example, a leased department selling shoes within a department store would be considered a separate retail establishment under the ''shoe store'' classification.

Firms. A firm is a business organization or entity consisting of one domestic establishment (location) or more under

[2]Newly defined metropolitan areas (MA's) were announced by the Office of Management and Budget (OMB) effective June 30, 1993.

common ownership or control. All establishments of subsidiary firms are included as part of the owning or controlling firm. For the economic census, the terms ''firm'' and ''company'' are synonymous.

Sales. Sales include merchandise sold for cash or credit at retail and wholesale by establishments primarily engaged in retail trade; amounts received from customers for layaway purchases; receipts from rental or leasing of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; the total value of service contracts; and gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed on to the retailer.

Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Total sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; commissions from vending machine operators; sales and receipts of departments or concessions operated by other firms; commissions or receipts from the sale of government lottery tickets; installment payments from leasing of vehicles, equipment, instruments, tools, etc. marketed under capital, finance, or full payout leases; and nonoperating income from such sources as investments, rental or sale of real estate, etc.

Sales in this report do not include retail sales made by manufacturers, wholesalers, service establishments, or other businesses whose primary activity is other than retail trade. They do include receipts other than from the sale of merchandise at retail, e.g., service receipts, sales to industrial users, and sales to other retailers, by establishments primarily engaged in retail trade.

Annual payroll. Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick-leave pay, employee contributions to qualified pension plans, and the value of payments in kind (e.g., free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons and reported to employers are included. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service (IRS) on form 941.

Legal form of organization. The legal form of organization for firms in the mail universe was based on the response to the organizational status inquiry on the various census forms. The legal form of organization of nonmail firms was generally based on information from administrative records of other Federal agencies.

Limited data are published in this report on number of individual proprietors and partnerships. The retail trade report, Establishment and Firm Size (Including Legal Form of Organization), RC92-S-1, presents data by the following legal forms for establishments with payroll:

1. Corporations.
2. Individual proprietorships.
3. Partnerships.
4. Other.

Auxiliary establishments. Each company included in this census was asked to identify and separately report auxiliary locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data presented in this report do not include auxiliary establishments. Data for auxiliaries are presented in a subsequent report issued as part of the 1992 Enterprise Statistics reports.

KIND-OF-BUSINESS CLASSIFICATIONS

Retail trade, SIC major groups 52 through 59 in the SIC manual, includes establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. Exceptions to this general rule are lumber yards; paint, glass, and wallpaper stores; typewriter stores; stationery stores; and gasoline service stations, which sell to both the general public for personal and household consumption and to businesses. These types of stores are included in retail trade even if a higher proportion of their sales is made to other than individuals for personal or household consumption. However, such establishments that sell their products only to institutional or industrial users and to other wholesalers and establishments that sell similar merchandise for use exclusively by business establishments are classified in wholesale trade.

Other important characteristics of retail trade establishments are that they are usually places of business; they are engaged in activities to attract the general public to buy; they buy or receive as well as sell merchandise; they may process their products, although processing is incidental or subordinate to selling; and they are considered as retail in the trade. Not all of these characteristics need be present and some are modified by trade practice.

The retail trade industries were covered in the 1992 Economic and Agriculture Census. However, retail establishments of the following types were excluded from census coverage:

1. Federal, State, and local government agencies that sold merchandise, other than liquor stores operated by State and local governments
2. Officers' clubs and officers' open messes (classified based on primary activity with a T/ O code of 90); and

public school lunch programs except those which operated on a fee or contract basis (classified based on primary activity with a T/ O code of 55)

The following types of retail establishments were covered in the census:

1. Appliance stores owned by public utilities if the establishments were primarily engaged in selling appliances to customers

2. Liquor stores operated by State and local governments

Establishments covered by the census were assigned kind-of-business classifications according to the industry classifications defined in the 1987 SIC manual. When a more detailed classification than defined in the SIC manual was needed, additional kinds of business were identified within a SIC industry.

In general, retail establishments were classified according to the principal lines of commodities sold (groceries, hardware, etc.), or the usual trade designation (drug store, cigar store, etc.).

Kind-of-business classifications are not interchangeable with commodity classifications; most businesses sell several kinds of commodities. The kind-of-business code generally reflects either the individual commodity or the commodity group which is the primary source of the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. For example, the food stores classification excludes stores selling food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as food stores, some of their receipts may be derived from the sale of nonfood products. (Information on the extent to which various broad groups of commodities or merchandise lines are sold by different kinds of business is available in the 1992 Census of Retail Trade report, *Merchandise Line Sales*, RC92-S-3.)

Building Materials and Garden Supplies Stores (SIC Major Group 52)

This major group includes retail establishments primarily engaged in selling lumber and other building materials; paint, glass, and wallpaper; hardware; nursery stock; lawn and garden supplies; and manufactured (mobile) homes. It includes lumber and other building materials dealers and paint, glass, and wallpaper stores selling to the general public, even if sales to contractors account for a larger proportion of total sales; these establishments are known as retail in the trade. Establishments primarily selling these products but not selling to the general public are classified in wholesale trade.

Lumber and other building materials dealers (SIC 521). Establishments primarily engaged in selling lumber, or lumber and a general line of building materials, to the general public. While these establishments may also sell to contractors, they are known as retail in the trade, even if sales to contractors account for a higher proportion of the sales. The lumber they sell may include rough and dressed lumber, flooring, molding, doors, sashes, frames, and other millwork. The building materials may include roofing, siding, shingles, wallboard, paint, brick, tile, cement, sand, gravel, and other building materials and supplies. For lumber yards, at least 32 percent of sales must be from the sale of lumber and millwork. Hardware is often an important line of retail lumber and building materials dealers. Also included in this group are home centers. These are retail establishments that sell both lumber and building materials and hardware. Additionally, they must sell at least 5 of the following merchandise lines: housewares, tools (power and/ or hand), floor coverings, electrical supplies, kitchen cabinets, plumbing and bath supplies, lawn and garden products, paints and/ or sundries, windows and/ or doors, roofing, wallcoverings, ceiling products and materials, lawn and garden supplies, and appliances. Establishments not selling to the general public or known in the trade as wholesale are classified in SIC 503.

Paint, glass, and wallpaper stores (SIC 523). Establishments primarily engaged in selling paint, glass, and wallpaper, or any combination of these lines, to the general public. While these establishments may also sell to contractors, they are known as retail in the trade, even if sales to contractors account for a higher proportion of the sales. Establishments which do not sell to the general public are classified in wholesale trade.

Hardware stores (SIC 525). Establishments primarily engaged in selling a number of basic hardware lines, such as tools, builders' hardware, locks and other security hardware, paint and glass, housewares, household appliances, cutlery, and building materials, no one of which accounts for 50 percent or more of the sales of the establishments.

Retail nurseries, lawn and garden supply stores (SIC 526). Establishments primarily engaged in selling trees, shrubs, other plants, seeds, bulbs, mulches, soil conditioners, fertilizers, pesticides, garden tools, and other garden supplies to the general public. These establishments primarily sell products purchased from others, but may sell some plants which they grow themselves. Establishments primarily engaged in growing trees, shrubs, other plants, seeds, and bulbs are classified in SIC major group 01, and those growing Christmas trees are classified in SIC major group 08.

Manufactured (mobile) home dealers (SIC 527). Establishments primarily engaged in the retail sale of new and used mobile homes, parts and equipment. Establishments

primarily selling travel trailers and campers are classified in SIC 5561 and those primarily selling utility trailers are classified in SIC 5599.

General Merchandise Stores (SIC Major Group 53)

This major group includes retail stores which sell a number of lines of merchandise, such as dry goods, apparel and accessories, furniture and homefurnishings, small wares, hardware, and food. The stores included in this group are known as department stores, variety stores, general merchandise stores, catalog showrooms, warehouse clubs, and general stores. Establishments primarily engaged in selling used general merchandise are classified in SIC 593, and those selling general merchandise by mail, vending machine, or direct selling are classified in SIC 596.

Department stores (SIC 531). Retail stores normally having 50 employees or more, having sales of apparel and soft goods combined amounting to 20 percent or more of total sales, and selling each of the following groups of merchandise:

1. Household linens, dry goods, furniture, homefurnishings, appliances, and radio and TV sets
2. A general line of apparel for the family

The employment and lines of merchandise sold in leased departments are both taken into account when classifying a department store.

To qualify as a department store, sales of each of the lines listed above must be less than 80 percent of total store sales. An establishment with total sales of $10 million or more is classified as a department store even if sales of one of the merchandise lines listed above exceed the maximum percent of total sales, provided that the sales of the other group is $1 million or more. Relatively few stores are included in this classification as a result of this special rule and most of those which are would otherwise have been classified in the apparel group (SIC major group 56).

Due to the relatively high level of leased department activity in department stores, department store sales have been separately presented for the following classifications:

Department stores (including leased depts.)

Department stores (excluding leased depts.)

For States and for areas with 10,000 retail establishments or more, the following subcategories of department stores also are presented:

Variety stores (SIC 533). Establishments primarily engaged in the retail sale of a variety of merchandise in the low and popular price ranges. Sales usually are made on a cash-and-carry basis, with the open selling method of display and customer selection of merchandise. These stores generally do not carry a complete line of merchandise, are not departmentalized, do not carry their own charge service, and do not deliver merchandise.

Miscellaneous general merchandise stores (SIC 539). Establishments primarily engaged in the retail sale of a general line of apparel, dry goods, hardware, housewares or homefurnishings, groceries, and other lines in limited amounts. Stores selling commodities covered in the definition for department stores but normally having less than 50 employees, and stores usually known as country or general stores are included here. Also included are most catalog showrooms. Establishments primarily engaged in the retail sales of merchandise by catalog, mail, or television order are classified in SIC 5961.

Food Stores (SIC Major Group 54)

This major group includes retail stores primarily engaged in selling food for home preparation and consumption. Establishments primarily engaged in selling prepared foods and drinks for consumption on the premises are classified in major group 58, and stores primarily engaged in selling packaged beers and liquors are classified in SIC 5921.

Grocery stores (SIC 541). Establishments primarily selling (1) a wide variety of canned or frozen foods such as vegetables, fruits, and soups; (2) packaged or bulk dry groceries such as tea, coffee, cocoa, dried fruits, spices, sugar, flour, and crackers, and (3) other processed foods and nonedible grocery items. These establishments often sell smoked and prepared meats, fresh fish and poultry, fresh vegetables and fruits, and fresh or frozen meats.

Meat and fish (seafood) markets (SIC 542). Establishments primarily engaged in the retail sale of fresh, frozen or cured meats, fish, shellfish, and other seafoods. They may also sell poultry, dairy products, eggs, and other commodities. Meat markets may butcher animals on their own account, or they may buy from others. This industry includes freezer and locker meat provisioners. Food locker plants primarily engaged in renting locker space for the storage of food products for individual households are classified in industry 4222. Establishments primarily engaged in the retail sale of food via frozen food plans delivered to households or individuals are classified in SIC 5963, and establishments primarily engaged in the retail sale of poultry are classified in SIC 549.

Fruit and vegetable markets (SIC 543). Establishments primarily selling fresh fruits and fresh vegetables. They frequently also carry a limited line of grocery items. They are often found in public or municipal markets, or roadside stands. However, roadside stands of farmers selling only their own produce are classified in SIC major group 01.

Candy, nut, and confectionery stores (SIC 544). Establishments primarily engaged in selling nuts, popcorn, boxed or bulk candy and other confections such as candied fruits,

and chewing gum. Ice cream, frozen yogurt, and soft drinks are often sold in these stores. Candy or confectionery stores making their own products, and candy and popcorn stands in theaters are classified here.

Dairy products stores (SIC 545). Establishments primarily engaged in the retail sale of packaged dairy products such as milk, cream, butter, cheese, and related products to over-the-counter customers. Ice cream and frozen yogurt stands are classified in SIC 5812 and establishments selling ice cream and similar products from trucks or wagons are classified in SIC 5963. Establishments primarily engaged in processing and distributing milk and cream are classified in SIC 2026.

Retail bakeries (SIC 546). Establishments primarily engaged in the retail sale of bakery products. The products may be purchased from others or made on the premises. Establishments manufacturing bakery products for the trade are classified in SIC 2051 and those purchasing bakery products and selling them house to house are classified in SIC 5963.

Miscellaneous food stores (SIC 549). Establishments primarily engaged in the retail sale of specialized foods, not elsewhere classified, such as eggs, poultry, health foods, vitamins, spices, herbs, coffee, and tea. The poultry stores may sell live poultry, slaughter and clean poultry for their own account, and sell dressed fowls or sell fowls cleaned and dressed by others.

Automotive Dealers and Gasoline Service Stations (SIC Major Group 55)

This major group includes retail dealers selling new and used automobiles, boats, recreational vehicles and utility trailers, and motorcycles and mopeds; dealers selling new automobile parts and accessories; and gasoline service stations selling gasoline and lubricating oils. Automobile repair shops maintained by establishments engaged in the sale of new automobiles also are included unless reported separately.

New and used car dealers (SIC 551). Establishments primarily engaged in the sale of new automobiles or new and used automobiles. These establishments have a franchise for the sale of new domestic and/ or new imported automobiles. They frequently maintain repair departments and carry stocks of replacement parts, tires, batteries, and automotive accessories. These establishments also frequently sell pickups and vans at retail.

Used car dealers (SIC 552). Establishments primarily engaged in selling used cars and not holding a franchise for the sale of new passenger cars. Some of these dealers may sell a small quantity of trucks and farm equipment. Some maintain repair and service departments. These establishments also frequently sell used pickups and vans at retail.

Auto and home supply stores (SIC 553). Establishments primarily engaged in the retail sale of auto supplies such as automotive batteries, parts, accessories; and sundry supplies such as polishes, paint, and decorative items. Establishments where used tires, batteries, and accessories exceed 49 percent of total sales are classified in SIC 501.

Gasoline service stations (SIC 554). Establishments primarily engaged in selling gasoline and automotive lubricants. These establishments frequently sell other merchandise such as tires, batteries, accessories, and other automobile parts or perform minor repair work. Establishments called garages but deriving more than half of their receipts from the sale of gasoline and automotive lubricants are included. Gasoline stations combined with other activities such as grocery stores, convenience stores, or car washes are classified based on primary activities as determined by sales.

Boat dealers (SIC 555). Establishments primarily engaged in the retail sale of new and used motorboats and other watercraft including parts, accessories, marine supplies, and outboard motors.

Recreational vehicle dealers (SIC 556). Establishments primarily engaged in the retail sale of new and used motor homes, recreational trailers, and campers (pickup coaches) including parts and accessories. Establishments primarily engaged in the retail sale of manufactured (mobile) homes are classified in SIC 527, and those primarily selling utility trailers are classified in SIC 559.

Motorcycle dealers (SIC 557). Establishments primarily engaged in the retail sale of new and used motorcycles, including motor scooters, mopeds, all-terrain vehicles, and parts and accessories.

Automotive dealers, not elsewhere classified (SIC 559). Establishments primarily engaged in the retail sale of new and used automotive vehicles, utility trailers, and automotive equipment and supplies, not elsewhere classified, such as snowmobiles, dunebuggies, and go-carts. Also included are establishments primarily engaged in the retail sale of aircraft.

Apparel and Accessory Stores (SIC Major Group 56)

This major group includes retail stores primarily engaged in selling clothing of all kinds and related articles for personal wear and adornment. Not included are establishments which meet the criteria for Department Stores (SIC 531) or Miscellaneous General Merchandise Stores (SIC 539) even though most of their receipts are from the sale of apparel and apparel accessories.

Men's and boys' clothing and accessory stores (SIC 561). Establishments primarily engaged in selling men's and boys' ready-to-wear clothing and accessories. Establishments are included in this category if (1) sales of

all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of total sales and (2) receipts from sales of all men's and boys' apparel are three or more times the receipts from sales of all women's and girls' apparel.

Women's clothing stores (SIC 562). Establishments primarily engaged in selling women's and girls' ready-to-wear apparel. Establishments are included in this category if (1) sales of all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of total sales, (2) sales of all women's and girls' apparel are three or more times the sales of all men's and boys' apparel, and (3) sales of dresses, skirts, slacks, coats, suits, and furs are two or more times greater than the sales of millinery, hosiery, underwear, blouses, handbags, and other apparel and accessories. Custom tailors primarily engaged in making women's clothing to individual order are classified in SIC 569.

Women's accessory and specialty stores (SIC 563). Establishments primarily engaged in selling women's accessories and specialties such as millinery, hats, foundation garments, lingerie, hosiery, costume jewelry, gloves, handbags, and fur including custom-made.

Children's and infants' wear stores (SIC 564). Establishments primarily engaged in the retail sale of children's and infants' clothing, furnishings, and accessories. They may specialize in either children's or infants' wear or sell a combination of children's and infants' wear.

Family clothing stores (SIC 565). Establishments primarily engaged in selling clothing, furnishings, and accessories for men, women, and children, without specializing in sales for an individual sex or age group. Establishments are included in this category if (1) sales of all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of their total sales, and (2) sales of apparel items for an individual sex or age group are not more than three times the sales of all other apparel items.

Shoe stores (SIC 566). Establishments primarily engaged in the retail sale of men's, women's, and children's footwear, including athletic footwear. These establishments frequently carry accessory lines, such as hosiery, gloves, and handbags.

Miscellaneous apparel and accessory stores (SIC 569). Establishments primarily engaged in the retail sale of specialized lines of apparel and accessories, not elsewhere classified, such as uniforms, bathing suits, raincoats, riding apparel, sports apparel, umbrellas, wigs, and toupees. This industry also includes custom tailors primarily engaged in making and selling men's and women's clothing, except fur apparel. Establishments primarily engaged in making fur apparel to custom order are classified in SIC 563.

Furniture and Homefurnishings Stores (SIC Major Group 57)

This major group includes retail stores selling goods used for furnishing the home such as furniture, floor coverings, draperies, glass and chinaware, domestic stoves, refrigerators, and other household electric and gas appliances. Establishments selling electric and gas appliances are included in this group only if the major part of their sales consists of articles for home use. These stores also may perform repair work on household appliances, radios, televisions, and stereo equipment; but establishments primarily engaged in repair of these products are classified in SIC 76. Dealers primarily engaged in selling antique and secondhand furniture are classified in SIC 5932. Stores furnishing interior decorating service are classified according to the merchandise handled. Stores primarily engaged in selling furnishings in conjunction with an interior decorator service are classified according to the merchandise handled; if the interior designer primarily advises clients on selection of merchandise, the establishment is classified in SIC 7389.

Furniture stores (SIC 5712). Establishments primarily engaged in selling new household furniture, beds, mattresses, springs, and other sleep equipment. Also included in this classification are establishments selling household appliances, phonographs, radios, television sets, and floor coverings, provided the receipts from sales of furniture and sleep equipment exceed those from sales of other merchandise. Furniture warehouse showrooms, sleep shops and waterbed stores, and specialty furniture stores such as baby furniture stores, are classified here. If sales of new office furniture account for more than half of the total sales, the establishments are classified in SIC 502120.

Floor covering stores (SIC 5713). Establishments primarily engaged in the retail sale of rugs, carpets, linoleum, floor tile, and related products. Stores selling ceramic (wall or floor) tile are classified in SIC 521130. Establishments included in this industry may incidentally perform installation but contractors primarily engaged in installing floor coverings for others are classified in SIC 1743 or 1752.

Drapery, curtain, and upholstery stores (SIC 5714). Establishments primarily engaged in selling draperies, curtains, slipcovers, and upholstery materials. Establishments primarily selling custom-made draperies and slipcovers for household use also are included. Establishments primarily engaged in reupholstering or repairing furniture are classified in SIC 7641.

Miscellaneous homefurnishings stores (SIC 5719). Establishments primarily engaged in the retail sale of miscellaneous homefurnishings such as china, glassware, and metalware for kitchen and table use; bedding and linen; brooms and brushes; lamps and shades; mirrors and pictures; and venetian blinds and window shades. Establishments primarily engaged in the retail sale of miscellaneous homefurnishings by house-to-house canvass or by party-plan merchandising are classified in SIC 5963.

Household appliance stores (SIC 572). Establishments primarily engaged in the retail sale of electric and gas refrigerators, stoves, microwave ovens, home freezers, and other household appliances such as electric irons, percolators, hot plates, vacuum cleaners, sewing machines, dehumidifiers, and self contained room air-conditioners. Many such stores also sell radios and television sets.

Radio, television, and electronics stores (SIC 5731). Establishments primarily engaged in the retail sale of radios, television sets, compact disc players, record players, high fidelity (hi-fi) sound reproducing equipment, and other consumer electronics equipment. Such establishments also may sell additional lines such as household appliances, computers, computer peripheral equipment, software, musical instruments, and records. Establishments in this industry may perform incidental installation and repair work on radios, televisions, and other consumer electronics equipment. Establishments primarily engaged in the installation and repair of these products are classified in SIC 7622.

Computer and software stores (SIC 5734). Establishments primarily engaged in the retail sale of computers, computer peripheral equipment, and software.

Record and prerecorded tape stores (SIC 5735). Establishments primarily engaged in selling phonograph records, compact discs, and prerecorded audio and video tapes and discs. Establishments primarily engaged in the retail sale of computer software are classified in SIC 5734 and those primarily engaged in the rental of video tapes in SIC 7841.

Musical instrument stores (SIC 5736). Establishments primarily engaged in selling musical instruments such as organs, pianos, horns, stringed instruments, and percussion instruments; sheet music; and similar supplies.

Eating and Drinking Places (SIC Major Group 58)

This major group includes retail establishments engaged in selling prepared foods and drinks for consumption on the premises. Also included are caterers which serve prepared food other than at the place of business and lunch counters and refreshment stands selling prepared foods and drinks for immediate consumption. In-plant food contractors are included here as well as leased eating and drinking concessions in hotels, motels, sports arenas, and other amusement places.

Eating places (SIC 5812). Establishments primarily engaged in the retail sale of prepared foods and drinks for on-premise or immediate consumption. Caterers and industrial and institutional food service establishments are also included in this industry.

Drinking places (SIC 5813). Establishments primarily engaged in the retail sale of alcoholic drinks such as beer, ale, wine, and liquor for consumption on the premises. The sale of food frequently accounts for a substantial portion of the receipts of these establishments. Meals may or may not be served.

Miscellaneous Retail Stores (SIC Major Group 59)

This major group includes retail establishments not elsewhere classified. These establishments fall into the following categories: drug stores and proprietary stores; liquor stores; used merchandise stores; miscellaneous shopping goods stores; nonstore retailers, fuel dealers, florists, cigar stores and stands, news dealers and newsstands, and miscellaneous retail stores not elsewhere classified.

Drug stores and proprietary stores (SIC 591). Establishments engaged in the retail sale of prescription drugs, proprietary drugs, and nonprescription medicines, and which may also carry a number of related lines, such as cosmetics, toiletries, tobacco, and novelty merchandise.

Liquor stores (SIC 592). Establishments primarily engaged in selling packaged alcoholic beverages such as ale, beer, wine, and liquor for consumption off the premises. Liquor stores operated by States, counties, and municipalities are included.

Used merchandise stores (SIC 593). This industry includes stores primarily engaged in the retail sale of used merchandise, antiques, and secondhand goods such as clothing and shoes; furniture; books and rare manuscripts; musical instruments; office furniture; phonographs and phonograph records; and store fixtures and equipment. The industry also includes pawnshops. Dealers primarily engaged in selling used motor vehicles, trailers, and boats are classified in major group 55; and those primarily selling used mobile homes in SIC 5271. Establishments primarily selling used automobile parts and accessories are classified in SIC 5015 and scrap and waste dealers are classified in SIC 5093. Establishments primarily engaged in automobile repair are classified in SIC 753.

Sporting goods stores and bicycle shops (SIC 5941). Establishments primarily engaged in the retail sale of sporting goods, sporting equipment, and bicycles, bicycle parts, and accessories.

Book stores (SIC 5942). Establishments primarily engaged in selling new books and periodicals. Stationery and related items may also be sold. The subclassifications are general, specialty, and college book stores. Book clubs (not engaged in publishing) primarily selling new books through the mail are included in mail-order houses (SIC 5961). Establishments primarily engaged in the sale of used books are classified in SIC 593.

Stationery stores (SIC 5943). Establishments primarily engaged in the retail sale of stationery such as paper and paper products (including printing and engraving), post cards, novelties, and school supplies. These establishments also may sell additional lines of office type supplies such as accounting and legal forms, blankbooks and forms, and office forms and supplies. Establishments primarily engaged in selling office supply forms and supplies are classified in SIC 5112. Stores specializing in the sale of artists' supplies are classified in SIC 5999.

Jewelry stores (SIC 5944). Establishments primarily engaged in the retail sale of any combination of the lines of jewelry such as diamonds and other precious stones; rings, bracelets, and brooches; sterling and plated silverware; and watches and clocks. Stores primarily engaged in watch and jewelry repair are classified in SIC 7631. Establishments primarily engaged in selling costume jewelry are classified in kind of business 563210.

Hobby, toy, and game shops (SIC 5945). Establishments primarily engaged in the retail sale of toys, games, and hobby and craft kits and supplies. Establishments primarily engaged in selling artists' supplies or collectors' items such as coins, stamps, and autographs are classified in SIC 5999.

Camera and photographic supply stores (SIC 5946). Establishments primarily engaged in the retail sale of cameras, film, and other photographic supplies and equipment. Establishments primarily engaged in the retail sale of video cameras are classified in SIC 5731. Establishments primarily engaged in finishing films are classified in SIC 7384.

Gift, novelty, and souvenir shops (SIC 5947). Establishments primarily engaged in the retail sale of combined lines of gifts and novelty merchandise, souvenirs, greeting cards, holiday decorations, and miscellaneous small art goods.

Luggage and leather goods stores (SIC 5948). Establishments primarily engaged in the retail sale of luggage, trunks, and leather goods, except apparel.

Sewing, needlework, and piece goods stores (SIC 5949). Establishments primarily engaged in the retail sale of sewing supplies, fabrics, patterns, yarn, and other needlework accessories.

Catalog and mail-order houses (SIC 5961). Establishments primarily selling merchandise as a result of orders received by catalog, mail, or television order. Customers are made aware of goods available for sale through catalogs, mailing pieces, advertisements in newspapers and magazines, advertising on radio and television, and by operating catalog stores that carry little stock other than display items. They receive their orders by phone or mail and fill most of their orders by mail. These establishments do not ordinarily maintain stock for sale on the premises. Departmentalized retail stores normally with 50 employees or more and operated by mail-order houses and selling a general line of merchandise are classified in SIC 531. Retail stores normally with less than 50 employees and operated by mail-order houses and selling a general line of merchandise are classified in SIC 539. Establishments primarily engaged in mail-order sales of computer hardware and/ or software and television order (home shopping) sales are included within the classification.

Automatic merchandising machine operators (SIC 5962). Establishments primarily engaged in the retail sale of products by automatic merchandising units (vending machines) which are generally located on the premises of other businesses. This industry does not include coin-operated service machines such as washers and dryers (SIC 7215), music machines and amusement game machines (SIC 7993), lockers and scales (SIC 7299), or insurance policies sold through vending machines (SIC 63). The "establishment" is the location from which the vending route (or routes) is serviced, not the number of vending machines or the number of business locations in which vending machines are located.

Direct selling establishments (SIC 5963). Establishments primarily engaged in selling merchandise by house-to-house canvass, by party plan, by telephone, or from trucks or wagons or other temporary locations. The ''establishment'' is the location from which the canvassers operate. Canvassers who do not have any paid help are excluded from the tabulations in this report. In some tabulations at the national level, direct selling organizations are divided into subclassifications on the basis of the merchandise they sell. The subclassifications are furniture, homefurnishings, and equipment; mobile food service; books and stationery; and other direct selling.

Fuel oil dealers (SIC 5983). Establishments primarily engaged in the retail sale of fuel oil. Establishments primarily selling fuel oil burners are classified in SIC 5074; dealers primarily engaged in installing and servicing fuel oil burners, in SIC 1711; and fuel oil burner repair service only, in SIC 7699.

Liquefied petroleum gas (bottled gas) dealers (SIC 5984). Establishments primarily engaged in the retail sale of bottled or bulk liquefied petroleum (LP) gas.

Fuel dealers, not elsewhere classified (SIC 5989). Establishments primarily engaged in the retail sale of coal, coke, charcoal, wood, or any combination of these lines. Establishments primarily selling fuel oil are classified in SIC 5983 and those primarily selling bottled gas in SIC 5984.

Florists (SIC 5992). Establishments primarily engaged in the retail sale of cut flowers and growing plants. Stores primarily engaged in the retail sale of seeds, bulbs, and

nursery stock are classified in SIC 5261, and greenhouses and nurseries primarily engaged in growing seeds, bulbs, flowers, and nursery stock are classified in SIC 0181.

Tobacco stores and stands (SIC 5993). Establishments primarily engaged in the retail sale of cigarettes, cigars, tobacco, and smokers' supplies. Many of the establishments included in this classification are operated as concessions in places of amusement, railway stations, airports, and other public places.

News dealers and newsstands (SIC 5994). Establishments primarily engaged in the retail sale of newspapers, magazines, and other periodicals. Home delivery of newspapers by other than printers or publishers is classified in SIC 5963. Establishments engaged in delivering newspapers for subsequent home delivery are classified in SIC 4212.

Optical goods stores (SIC 5995). Establishments primarily engaged in the retail sale of prescription eyeglasses and contact lenses for individuals. Offices of oculists, ophthalmologists and optometrists are classified in major group 80 even though a majority of their revenue is from the sale of eyeglass frames or prescription eyeglasses and contact lenses.

Miscellaneous retail stores, not elsewhere classified (SIC 5999). Establishments primarily engaged in the retail sale of specialized lines of merchandise, not elsewhere classified, such as artists' supplies; orthopedic and artificial limbs; rubber stamps; pets; religious goods; and monuments and tombstones. This industry also includes establishments primarily engaged in selling a general line of their own or consigned merchandise at retail on an auction basis.

Publication Program

1992 CENSUS OF RETAIL TRADE

Publications of the 1992 Census of Retail Trade, containing data on retail establishments in the United States, are described below. Publications order forms for specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services , Bureau of the Census, Washington, DC 20233-8300. The first results were issued in press releases. Final detailed statistics are issued in separate paperbound reports and compact disc-read only memory (CD-ROM).

Final Reports

Geographic area series—52 reports (RC92-A-1 to -52)

A separate paperbound report containing data for establishments with payroll is published for each State, the District of Columbia, and the United States. Each report presents general statistics for establishments with payroll including number of establishments, sales, payroll, and employment by varied retail classifications. All statistics are presented for the State, metropolitan areas (MA's), counties, and places with 2,500 inhabitants or more. Greater kind-of-business detail is shown for larger areas. For each State, the District of Columbia, and the United States, 1992 data are provided by kind of business on sales and employees per establishment and sales and payroll per employee. Comparative statistics showing percent changes in sales and payroll between 1987 and 1992 are shown by kind of business.

Nonemployer statistics series—1 report (RC92-N-1)

This report includes number of establishments and sales by kind of business for all establishments, establishments with payroll, and establishments without payroll for the United States and States. Data on sales size of establishments without payroll and the number of proprietorships and partnerships is also provided for the United States. Also presented are statistics for establishments without payroll including number of establishments and sales by varied retail classifications for MA's. Similar data for counties and places with 2,500 inhabitants or more are available on electronic media only.

Subject series—4 reports (RC92-S-1 to -4)

The *Establishment and Firm Size* report (RC92-S-1) presents data for establishments with payroll, based on size of establishment, size of company or firm, and legal form of organization. Establishment statistics are presented by sales size and by employment size; statistics for firms by sales size (including concentration by largest firms), by employment size, and by number of establishments operated (single units and multiunits). Statistics are presented by kind of business on the number of establishments, sales, payroll, and employment for the United States.

The *Measures of Value Produced, Capital Expenditures, Depreciable Assets, and Operating Expenses* report (RC92-S-2) presents data on measures of value produced, capital expenditures, depreciable assets, and operating expenses for firms with payroll for the United States by major kind of business. Operating expenses include annual payroll, supplemental labor costs, purchased services, etc. Receipts data also are provided.

The *Merchandise Line Sales* report (RC92-S-3) presents data on major categories of merchandise sold by retail kinds of business for each State and the District of Columbia, each MA, and the United States as a whole. Data for States and MA's will be available on electronic media only. Tables present data for establishments with payroll for each kind of business and show, for each merchandise line, the number of establishments handling the line and their sales of the line; the percentage of total sales of the kind of business accounted for by each of the lines carried; and, for establishments actually handling a specific line, the percentage of their total sales represented by sales of that line. Summary statistics also are provided for the 43 broad merchandise line categories, including counts of establishments and the amount and percentage of the line sold by various kinds of retail businesses.

The *Miscellaneous Subjects* report (RC92-S-4) contains special statistics on eating and drinking places, gasoline service stations, shoe stores, optical goods stores, and other miscellaneous subjects. Data are presented for the United States as a whole and, where feasible, for States and MA's.

Special report series—1 report (RC92-SP-1)

The *Selected Statistics* report presents selected data for establishments with and without payroll for 1992 and 1987 by kind of business. Data include number of establishments, sales, payroll and employment, and selected ratios and rankings. Data are presented for the United States as a whole and for States and MA's.

Electronic Media

All data included in the printed reports are available on CD-ROM. The CD-ROM's provide the same information found in the final reports as well as additional information not published in the final reports such as ZIP Code statistics available from series RC92-Z, merchandise line sales statistics for States and MA's from series RC92-S, and nonemployer data for counties and places from series RC92-N. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUS REPORTS

Data on wholesale trade, service industries, transportation, communications, utilities, financial, insurance, real estate, construction industries, manufactures, mineral industries, enterprise statistics, minority-owned business enterprises, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas: Puerto Rico, Virgin Islands of the United States, Guam, and the Northern Marianas. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services , Bureau of the Census, Washington, DC 20233-8300.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Retail Trade. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

This report was prepared in the Services Division. **Bobby E. Russell,** Assistant Chief for Census Programs, was responsible for the overall planning, management, and coordination of the census of retail trade. Planning and implementation were under the direction of **Anne S. Russell,** Chief, Retail Census Branch, with primary staff assistance by **Fay Dorsett, Charles F. Brady, Pamela J. Palmer, Thomas G. Dassel, Jennifer E. Lins, Cheryl E. Merkle, Barbara T. Parlett, Maria P. Ray, Barbara A. Collier, Venita L. Holland,** and **Judith O. Belt.**

Systems and procedures for mailout, receipt, correspondence, data input, industry classification, other clerical processing, administrative record processing, quality control, and the associated electronic computer programs, were developed in the Economic Planning and Coordination Division.

Mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review were performed by the staff of the Data Preparation Division, **Judith N. Petty,** Acting Chief.

Geographic coding procedures and associated computer programs were developed by the staff of the Geography Division.

The computer processing systems were developed and coordinated in the Economic Statistical Methods and Programming Division**, Charles P. Pautler, Jr.,** Chief. **Martin S. Harahush,** Assistant Chief for Quinquennial Censuses, was responsible for the design and implementation of the computer systems. The computer programs were prepared under the supervision of **William C. Wester,** Chief, Services Branch, assisted by **Josephine S. McLaughlin, Jeffrey S. Rosen, Tsung C. Chu, Linda Ludwigson, John Jeffrey Milner, Duc-Mong Nguyen, James Joseph Pratt,** and **Patricia H. Young.** Additional programming assistance was provided by **Robert S. Jewett.**

Computer processing was performed in the Computer Services Division, **Marvin D. Raines,** Chief.

The staff of the Administrative and Publications Services Division, **Walter C. Odom,** Chief, performed planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Bernadette J. Gayle** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-2687.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/ output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, finance, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Retail Trade

GENERAL

The 1992 Census of Retail Trade, part of the 1992 Economic Census, covered retail trade as defined in the *Standard Industrial Classification Manual: 1987*[1] (SIC). It included all establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. The census excluded governmental organizations classified in the covered industries except for liquor stores operated by State and local governments. Data for direct sellers (SIC 5963) with no paid employees and post exchanges, ship stores, and similar establishments operated on military posts by agencies of the Federal Government were not included. The basic tabulations in this report do not include data for establishments which are auxiliary (primary function is providing a service, such as warehouses) to retail establishments within the same organization. Data for auxiliaries are presented in a subsequent report issued as part of the 1992 Enterprise Statistics reports.

For the 1992 Census of Retail Trade, large- and medium-size firms, plus all firms known to operate more than one establishment, were sent questionnaires to be completed and returned to the Census Bureau by mail. For most very small firms, including those with no paid employees, data from existing administrative records of other Federal agencies were used instead. These records provided basic information on location, kind of business, sales, payroll, number of employees, and legal form of organization. In addition, more detailed information for selected kinds of business was obtained on the various questionnaires.

Appendix A gives a more detailed explanation of census coverage and methodology.

ESTABLISHMENT AND FIRM SIZE

This report represents a recompilation of data collected in the 1992 Census of Retail Trade and is divided into three categories: size of establishment, size of firm, and legal form of organization.

Size of establishment. Only establishments which operated the entire year have been classified into the various size groups used in the establishment size tables (tables 1 and 2). An establishment is classified as ''operated entire year'' if it operated 10 months or more during the year. Data for establishments which reported that they were in operation fewer than 10 months are separately summarized as ''not operated entire year.''

Sales size. Data in table 1 are classified into sales size groups depending on the value of sales and other receipts reported for the year 1992.

Employment size. Data in table 2 are classified into employment size groups depending on the number of employees on the payroll during the pay period including March 12, 1992. Proprietors, partners, and unpaid family workers were not regarded as employees in determining the employment size of an establishment.

Size of firm. A firm may be either a single establishment (single unit) firm or a multiestablishment (multiunit) firm. Firm size groups are based on aggregate data for all establishments operated by the same firm in the kind-of-business classification, group, or total for which data are presented. For example, a firm operates three retail establishments: a department store (SIC 531), a variety store (SIC 533), and a grocery store (SIC 541). At each of the three most detailed levels of classification, each of the establishments is a single unit operated by a multiestablishment firm. At the general merchandise group level (SIC 53), it is a two-establishment multiunit. At the retail trade total level, it is a three-establishment multiunit. Data are presented based on sales size of firms, employment size of firms, and concentration by largest firms, as well as for single units and multiunits (by number of establishments operated). In tables 4 and 5, only firms which operated the entire year are classified into the various size groups. A firm is considered to have ''operated entire year'' if any of its establishments at that SIC level operated 10 months or more during the year. Data for firms which reported that none of their establishments operated 10 months or more are separately summarized as ''not operated entire year.''

Single unit and multiunit firms. Data in table 3 are classified into firm size groups based on number of establishments operated. A single unit is a firm with only one establishment engaged in economic activities. A multiunit (multiestablishment) firm is a firm with two establishments or more engaged in economic activities. A multiestablishment firm may, however, operate only one establishment classified in retail trade.

[1] *Standard Industrial Classification Manual: 1987.* For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

Sales size. Data in table 4 are classified into sales size groups depending on the value of sales and other receipts reported for 1992.

Employment size. Data in table 5 are classified into employment size groups depending on the number of employees on the payroll during the pay period including March 12. Proprietors, partners, and unpaid family workers were not regarded as employees in determining the employment size of a firm.

Concentration of largest firms. Data in table 6 are presented separately for the 4, 8, 20, and 50 largest firms based on total sales.

Legal form of organization. Data in table 7 are presented for individual establishments and firms by legal form of organization for four separate categories. For the method of assigning legal form, see Explanation of Terms, Legal form of organization, in appendix A.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind-of-business classification is not considered a disclosure; therefore, this information may be released even though other information is withheld.

GEOGRAPHIC AREAS COVERED

This report series presents data by kind of business for the United States as a whole.

DOLLAR VALUES

All dollar values presented in this report are expressed in current dollars; i.e., 1992 data are expressed in 1992 dollars and 1987 data in 1987 dollars. Consequently, when making comparisons to prior years, users of the data should consider the inflation that has occurred.

RELIABILITY OF DATA

All data compiled in this report originated from either census questionnaires or administrative records of other Federal agencies and, therefore, are not subject to sampling errors. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources: inability to identify all cases in the actual universe; definition and classification difficulties; differences in the interpretation of questions; errors in recording or coding the data obtained; and other errors of collection, response, coverage, and estimation for missing or misreported data.

The accuracy of these tabulated data is determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained except for estimation for missing or misreported data; however, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors.

The Census Bureau obtains on computer tape limited information extracted from administrative records of other Federal agencies. This information is used in conjunction with other information available to the Census Bureau to develop estimates for nonemployers, small employers, and other establishments for which responses were not received in time for publication. For an indication of the extent that data included in these reports were obtained from the administrative records of other Federal agencies and from estimation, rather than reports directly from respondents, see appendix E. Also, see appendix A for a more detailed explanation of census coverage and methodology.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Retail Trade may be obtained, depending on availability of time and personnel, on diskette, computer tape, or in tabular form. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Services Division, Bureau of the Census, Washington, DC 20233.

To discuss a special tabulation before submitting specifications, call 1-800-541-8345.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

–	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in broader kind-of-business totals.
(NA)	Not available.
(X)	Not applicable.
n.e.c.	Not elsewhere classified.
pt.	Part.
r	Revised.
SIC	Standard industrial classification.

The following symbols are used in this publication to show employment size ranges for employment data that has been withheld to avoid disclosing data for individual companies (employment size range codes are provided for the first time in the 1992 Economic Census):

Symbol	Employment Size
AA	0–19
BB	20–99
CC	100–249
EE	250–499
FF	500–999
GG	1,000–2,499
HH	2,500–4,999
II	5,000–9,999
JJ	10,000–24,999
KK	25,000–49,999
LL	50,000–99,999
MM	100,000 or more

Appendix A.
General Explanation

CENSUS COVERAGE AND METHODOLOGY

Structure and method of enumeration. Firms in the 1992 Census of Retail Trade were divided into the nonmail universe and mail universe. The coverage and the method of obtaining census information from each follow:

1. The nonmail universe consisted of firms which were not required to file a regular census return and included:

   a. All nonemployers, i.e., all firms with no paid employment during 1992. Sales information for these firms was obtained from administrative records of other Federal agencies. Although consisting of many firms, nonemployers account for less than 5 percent of total retail sales.

      The census included only those retail nonemployer firms which reported a sales volume of $1,000 or more during 1992.

      Data on nonemployers are provided in subsequent 1992 Census of Retail Trade reports; Nonemployer Statistics (RC92-N-1) and Selected Statistics (RC92-SP-1).

   b. Selected small employers, i.e., single-establishment firms with payroll below a specified cutoff. (The term ''employers'' refers to all business firms with one or more paid employees at any time during 1992 as shown in the active administrative records of other Federal agencies.) Although the payroll cutoff varied by kind of business, small employers generally included firms with one to four employees and represented about 10 percent of total retail sales of establishments covered in the census.

      Data on sales, payroll, and employment for employer firms below the payroll cutoff were derived or estimated from administrative records of other Federal agencies except for a sample of small employer firms. This sample was included in the mail universe.

2. The mail universe consisted of firms for which information was obtained by means of a mail canvass and included:

   a. Large employers; i.e., all multiestablishment firms and all employer firms above the payroll size cutoff referred to in section 1b. Within this category, a report of company organization was conducted periodically to identify firms which operated establishments at more than one location and to obtain information on payroll and mid-March employment at each location. The 1991 Report of Company Organization was used as a coverage check in the census. In the 1992 census, all multiestablishment firms were asked to notify the Census Bureau of any establishments for which a form was not received. Report forms were subsequently provided to the firms for these establishments.

   b. A sample of small employer firms referred to in section 1b. These firms were sent the census mailing packages containing the appropriate 1992 questionnaire. For the retail trade sector, the overall sample of small employer firms was 20.6 percent which varied by kind of business.

Method of classifying kinds of business. The retail trade classifications for all establishments were based on the *Standard Industrial Classification Manual: 1987*[1] (SIC). However, the method of assigning these classifications, and the level of detail at which establishments were classified, differed between the nonmail and mail universe as follows:

1. The nonmail universe.

   a. Nonemployers were classified on the basis of information obtained from administrative records of other Federal agencies.

   b. Selected small employers were classified on the basis of the most current census kind-of-business classification available from one of the Census Bureau's current sample surveys or the 1987 census. Otherwise, the classification was obtained from administrative records of other Federal agencies.

      If the census or administrative record classifications proved inadequate (none corresponded to a 1992 census classification in the detail required for employers), the firm was sent a brief inquiry requesting information necessary to assign a 1992 census kind-of-business code.

[1] *Standard Industrial Classification Manual:* 1987. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

2. Establishments in the mail universe were classified on the basis of their self-designation, answers to questions on sales by merchandise line, and other special inquiries.

COMPARABILITY OF THE 1987 AND 1992 CENSUSES

The 1987 and 1992 censuses were conducted under similar conditions and procedures except for the following:

Geographic areas. The boundaries of a number of areas for which data are shown in the 1992 census are not the same as in the 1987 census because of annexations; other boundary changes; and redefinitions of metropolitan statistical areas (MSA's), primary metropolitan statistical areas (PMSA's), and consolidated metropolitan statistical areas (CMSA's).[2] In addition, data for consolidated cities are included in the 1992 census.

Data for special economic urban areas (SEUA's) with 10,000 inhabitants or more in Michigan, Minnesota, New York, and Wisconsin qualified for publication in the 1992 census. This included townships in Michigan and Minnesota and towns in New York and Wisconsin. However, Minnesota did not have any townships that met the publication criteria.

Legal form of organization. In 1987, data on the number of individual proprietorships/ partnerships were published in the Geographic Area Series. In 1992, individual proprietorship/ partnership data are published in this report and in the Nonemployer Statistics report (RC92-N-1).

EXPLANATION OF TERMS

Establishments. An establishment is a single physical location at which business is conducted. It is not necessarily identical with a company or enterprise, which may consist of one establishment or more. Census of retail trade figures represent a summary of reports for individual establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records of other Federal agencies were used instead of a census report, no information was available on the number of locations operated. Estimates of this number were derived from a sample and are provided in the retail trade report, *Miscellaneous Subjects* (RC92-S-4). Each retail establishment was tabulated according to the physical location at which the business was conducted. The count of establishments represents those in business at any time during 1992. Appendix G provides a comparison of the number of establishments active any time during the year versus the number in business at the end of the year.

When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, and when conditions prescribed by the SIC manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were obtained in the census.

Leased departments are treated as separate establishments and are classified according to the kind of business they conduct. For example, a leased department selling shoes within a department store would be considered a separate retail establishment under the ''shoe store'' classification.

Firms. A firm is a business organization or entity consisting of one domestic establishment (location) or more under common ownership or control. All establishments of subsidiary firms are included as part of the owning or controlling firm. For the economic census, the terms ''firm'' and ''company'' are synonymous.

Sales. Sales include merchandise sold for cash or credit at retail and wholesale by establishments primarily engaged in retail trade; amounts received from customers for layaway purchases; receipts from rental or leasing of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; the total value of service contracts; and gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed on to the retailer.

Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Total sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; commissions from vending machine operators; sales and receipts of departments or concessions operated by other firms; commissions or receipts from the sale of government lottery tickets; installment payments from leasing of vehicles, equipment, instruments, tools, etc. marketed under capital, finance, or full payout leases; and nonoperating income from such sources as investments, rental or sale of real estate, etc.

Sales in this report do not include retail sales made by manufacturers, wholesalers, service establishments, or other businesses whose primary activity is other than retail trade. They do include receipts other than from the sale of merchandise at retail, e.g., service receipts, sales to industrial users, and sales to other retailers, by establishments primarily engaged in retail trade.

[2]Newly defined metropolitan areas (MA's) were announced by the Office of Management and Budget (OMB) effective June 30, 1993.

Annual payroll. Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick-leave pay, employee contributions to qualified pension plans, and the value of payments in kind (e.g., free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons and reported to employers are included. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service (IRS) on form 941.

First-quarter payroll. This item consists of payroll, as defined above, paid to persons employed at any time during the quarter January to March 1992.

Paid employees for pay period including March 12. Paid employees consist of the full- and part-time employees, including salaried officers and executives of corporations, who were on the payroll during the pay period including March 12. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses. The definition of paid employees is the same as that used on IRS form 941.

Auxiliary establishments. Each company included in this census was asked to identify and separately report auxiliary locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data presented in this report do not include auxiliary establishments. Data for auxiliaries are presented in a subsequent report issued as part of the 1992 Enterprise Statistics reports.

Legal form of organization. The legal form of organization for firms in the mail universe was based on the response to the organizational status inquiry on the various census forms. The legal form of organization of nonmail firms was generally based on information from administrative records of other Federal agencies.

This report presents data for establishments of firms by the following legal forms of organization:

1. Corporations.
2. Individual proprietorships.
3. Partnerships.
4. Other.

KIND-OF-BUSINESS CLASSIFICATIONS

Retail trade, SIC major groups 52 through 59 in the SIC manual, includes establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. Exceptions to this general rule are lumber yards; paint, glass, and wallpaper stores; typewriter stores; stationery stores; and gasoline service stations, which sell to both the general public for personal and household consumption and to businesses. These types of stores are included in retail trade even if a higher proportion of their sales is made to other than individuals for personal or household consumption. However, such establishments that sell their products only to institutional or industrial users and to other wholesalers and establishments that sell similar merchandise for use exclusively by business establishments are classified in wholesale trade.

Other important characteristics of retail trade establishments are that they are usually places of business; they are engaged in activities to attract the general public to buy; they buy or receive as well as sell merchandise; they may process their products, although processing is incidental or subordinate to selling; and they are considered as retail in the trade. Not all of these characteristics need be present and some are modified by trade practice.

The retail trade industries were covered in the 1992 Economic and Agriculture Census. However, retail establishments of the following types were excluded from census coverage:

1. Federal, State, and local government agencies that sold merchandise, other than liquor stores operated by State and local governments
2. Officers' clubs and officers' open messes (classified based on primary activity with a T/ O code of 90); and public school lunch programs except those which operated on a fee or contract basis (classified based on primary activity with a T/ O code of 55)

The following types of retail establishments were covered in the census:

1. Appliance stores owned by public utilities if the establishments were primarily engaged in selling appliances to customers
2. Liquor stores operated by State and local governments

Establishments covered by the census were assigned kind-of-business classifications according to the industry classifications defined in the 1987 SIC manual. When a more detailed classification than defined in the SIC manual was needed, additional kinds of business were identified within a SIC industry.

In general, retail establishments were classified according to the principal lines of commodities sold (groceries, hardware, etc.), or the usual trade designation (drug store, cigar store, etc.).

Kind-of-business classifications are not interchangeable with commodity classifications; most businesses sell several kinds of commodities. The kind-of-business code generally reflects either the individual commodity or the

commodity group which is the primary source of the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. For example, the food stores classification excludes stores selling food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as food stores, some of their receipts may be derived from the sale of nonfood products. (Information on the extent to which various broad groups of commodities or merchandise lines are sold by different kinds of business is available in the 1992 Census of Retail Trade report, *Merchandise Line Sales*, RC92-S-3.)

Building Materials and Garden Supplies Stores (SIC Major Group 52)

This major group includes retail establishments primarily engaged in selling lumber and other building materials; paint, glass, and wallpaper; hardware; nursery stock; lawn and garden supplies; and manufactured (mobile) homes. It includes lumber and other building materials dealers and paint, glass, and wallpaper stores selling to the general public, even if sales to contractors account for a larger proportion of total sales; these establishments are known as retail in the trade. Establishments primarily selling these products but not selling to the general public are classified in wholesale trade.

Lumber and other building materials dealers (SIC 521). Establishments primarily engaged in selling lumber, or lumber and a general line of building materials, to the general public. While these establishments may also sell to contractors, they are known as retail in the trade, even if sales to contractors account for a higher proportion of the sales. The lumber they sell may include rough and dressed lumber, flooring, molding, doors, sashes, frames, and other millwork. The building materials may include roofing, siding, shingles, wallboard, paint, brick, tile, cement, sand, gravel, and other building materials and supplies. For lumber yards, at least 32 percent of sales must be from the sale of lumber and millwork. Hardware is often an important line of retail lumber and building materials dealers. Also included in this group are home centers. These are retail establishments that sell both lumber and building materials and hardware. Additionally, they must sell at least 5 of the following merchandise lines: housewares, tools (power and/ or hand), floor coverings, electrical supplies, kitchen cabinets, plumbing and bath supplies, lawn and garden products, paints and/ or sundries, windows and/ or doors, roofing, wallcoverings, ceiling products and materials, lawn and garden supplies, and appliances. Establishments not selling to the general public or known in the trade as wholesale are classified in SIC 503.

Paint, glass, and wallpaper stores (SIC 523). Establishments primarily engaged in selling paint, glass, and wallpaper, or any combination of these lines, to the general public. While these establishments may also sell to contractors, they are known as retail in the trade, even if sales to contractors account for a higher proportion of the sales. Establishments which do not sell to the general public are classified in wholesale trade.

Hardware stores (SIC 525). Establishments primarily engaged in selling a number of basic hardware lines, such as tools, builders' hardware, locks and other security hardware, paint and glass, housewares, household appliances, cutlery, and building materials, no one of which accounts for 50 percent or more of the sales of the establishments.

Retail nurseries, lawn and garden supply stores (SIC 526). Establishments primarily engaged in selling trees, shrubs, other plants, seeds, bulbs, mulches, soil conditioners, fertilizers, pesticides, garden tools, and other garden supplies to the general public. These establishments primarily sell products purchased from others, but may sell some plants which they grow themselves. Establishments primarily engaged in growing trees, shrubs, other plants, seeds, and bulbs are classified in SIC major group 01, and those growing Christmas trees are classified in SIC major group 08.

Manufactured (mobile) home dealers (SIC 527). Establishments primarily engaged in the retail sale of new and used mobile homes, parts and equipment. Establishments primarily selling travel trailers and campers are classified in SIC 5561 and those primarily selling utility trailers are classified in SIC 5599.

General Merchandise Stores (SIC Major Group 53)

This major group includes retail stores which sell a number of lines of merchandise, such as dry goods, apparel and accessories, furniture and homefurnishings, small wares, hardware, and food. The stores included in this group are known as department stores, variety stores, general merchandise stores, catalog showrooms, warehouse clubs, and general stores. Establishments primarily engaged in selling used general merchandise are classified in SIC 593, and those selling general merchandise by mail, vending machine, or direct selling are classified in SIC 596.

Department stores (SIC 531). Retail stores normally having 50 employees or more, having sales of apparel and soft goods combined amounting to 20 percent or more of total sales, and selling each of the following groups of merchandise:

1. Household linens, dry goods, furniture, homefurnishings, appliances, and radio and TV sets
2. A general line of apparel for the family

The employment and lines of merchandise sold in leased departments are both taken into account when classifying a department store.

To qualify as a department store, sales of each of the lines listed above must be less than 80 percent of total store sales. An establishment with total sales of $10 million or more is classified as a department store even if sales of one of the merchandise lines listed above exceed the maximum percent of total sales, provided that the sales of the other group is $1 million or more. Relatively few stores are included in this classification as a result of this special rule and most of those which are would otherwise have been classified in the apparel group (SIC major group 56).

Due to the relatively high level of leased department activity in department stores, department store sales have been separately presented for the following classifications:

Department stores (including leased depts.)

Department stores (excluding leased depts.)

For States and for areas with 10,000 retail establishments or more, the following subcategories of department stores also are presented:

Conventional department stores (SIC 531 pt.). Establishments which satisfy the criteria of a department store (see above) and:

1. Usually provide check-out service and customer assistance (sales persons) within each department
2. May have a catalog order service
3. Are not affiliated with a company which operates similar establishments on a national basis

These stores often sell:

1. Soft goods and hard goods which are primarily nationally advertised brands
2. Appliances which are serviced by another company
3. Limited lines of merchandise through seasonal or special catalogs

Discount or mass merchandising department stores (SIC 531 pt.). Establishments which satisfy the criteria of a department store (see above) and usually:

1. Convey the image of a high-volume, fast turnover outlet selling a variety of merchandise for less than conventional prices
2. Provide centralized check-out service
3. Sell merchandise through self-service with minimal customer assistance provided in any department
4. Do not have a catalog order service

These stores often sell:

1. Soft goods which are usually their own corporate brands or are unbranded
2. Hard goods which are primarily nationally advertised brands
3. Appliances which are serviced by another company

National chain department stores (SIC 531 pt.). Establishments which satisfy the criteria of a department store (see above) and:

1. Usually provide check-out service and customer assistance (sales persons) within each department
2. Usually have a catalog order service
3. Are affiliated with a company which operates similar establishments on a national basis

These stores often sell:

1. Soft goods and hard goods which are their own corporate brands or are unbranded
2. Appliances which are serviced by their own company

Variety stores (SIC 533). Establishments primarily engaged in the retail sale of a variety of merchandise in the low and popular price ranges. Sales usually are made on a cash-and-carry basis, with the open selling method of display and customer selection of merchandise. These stores generally do not carry a complete line of merchandise, are not departmentalized, do not carry their own charge service, and do not deliver merchandise.

Miscellaneous general merchandise stores (SIC 539). Establishments primarily engaged in the retail sale of a general line of apparel, dry goods, hardware, housewares or homefurnishings, groceries, and other lines in limited amounts. Stores selling commodities covered in the definition for department stores but normally having less than 50 employees, and stores usually known as country or general stores are included here. Also included are most catalog showrooms. Establishments primarily engaged in the retail sales of merchandise by catalog, mail, or television order are classified in SIC 5961.

Food Stores (SIC Major Group 54)

This major group includes retail stores primarily engaged in selling food for home preparation and consumption. Establishments primarily engaged in selling prepared foods and drinks for consumption on the premises are classified in major group 58, and stores primarily engaged in selling packaged beers and liquors are classified in SIC 5921.

Grocery stores (SIC 541). Establishments primarily selling (1) a wide variety of canned or frozen foods such as vegetables, fruits, and soups; (2) packaged or bulk dry groceries such as tea, coffee, cocoa, dried fruits, spices, sugar, flour, and crackers, and (3) other processed foods and nonedible grocery items. These establishments often sell smoked and prepared meats, fresh fish and poultry, fresh vegetables and fruits, and fresh or frozen meats.

Supermarkets and other general-line grocery stores (SIC 541 pt.). Establishments commonly known as supermarkets, food stores, grocery stores, and food warehouses primarily engaged in the retail sale of a wide variety of grocery store merchandise. Customers normally make large, volume purchases from these stores.

Convenience food stores (SIC 541 pt.). Establishments primarily engaged in the retail sale of a medium variety of canned goods, dairy products, pre-packaged meats, and other grocery items in limited amounts. They also may sell newspapers, magazines, refreshment items, cigarettes, beer, wine, and novelties. Customers normally utilize a convenience store to purchase a few items, whereas grocery stores are utilized for large, volume purchases. Convenience stores normally have a maximum of two check-out counters; less than 2,500 square feet of total under-roof floor space; a small, private parking lot; and hours of operation which normally extend beyond those of traditional grocery stores. Establishments primarily selling convenience store items but also selling gasoline are classified in kind of business 541130.

Convenience food/ gasoline stores (SIC 541 pt.). These are establishments that satisfy the criteria of a convenience food store and also sell gasoline; however, gasoline sales may not exceed 49 percent of total sales. Establishments selling convenience store items but primarily selling gasoline are classified in kind of business 554130.

Delicatessens (SIC 541 pt.). Establishments primarily engaged in the retail sale of cold cuts, oven-roasted meats, bread, and other grocery items. They often prepare sandwiches for carry-out and party platters, and may prepare gourmet platters for take-home consumption.

Meat and fish (seafood) markets (SIC 542). Establishments primarily engaged in the retail sale of fresh, frozen or cured meats, fish, shellfish, and other seafoods. They may also sell poultry, dairy products, eggs, and other commodities. Meat markets may butcher animals on their own account, or they may buy from others. This industry includes freezer and locker meat provisioners. Food locker plants primarily engaged in renting locker space for the storage of food products for individual households are classified in industry 4222. Establishments primarily engaged in the retail sale of food via frozen food plans delivered to households or individuals are classified in SIC 5963, and establishments primarily engaged in the retail sale of poultry are classified in SIC 549.

Fruit and vegetable markets (SIC 543). Establishments primarily selling fresh fruits and fresh vegetables. They frequently also carry a limited line of grocery items. They are often found in public or municipal markets, or roadside stands. However, roadside stands of farmers selling only their own produce are classified in SIC major group 01.

Candy, nut, and confectionery stores (SIC 544). Establishments primarily engaged in selling nuts, popcorn, boxed or bulk candy and other confections such as candied fruits, and chewing gum. Ice cream, frozen yogurt, and soft drinks are often sold in these stores. Candy or confectionery stores making their own products, and candy and popcorn stands in theaters are classified here.

Dairy products stores (SIC 545). Establishments primarily engaged in the retail sale of packaged dairy products such as milk, cream, butter, cheese, and related products to over-the-counter customers. Ice cream and frozen yogurt stands are classified in SIC 5812 and establishments selling ice cream and similar products from trucks or wagons are classified in SIC 5963. Establishments primarily engaged in processing and distributing milk and cream are classified in SIC 2026.

Retail bakeries (SIC 546). Establishments primarily engaged in the retail sale of bakery products. The products may be purchased from others or made on the premises. Establishments manufacturing bakery products for the trade are classified in SIC 2051 and those purchasing bakery products and selling them house to house are classified in SIC 5963.

Retail bakeries—baking and selling (SIC 546 pt.). Establishments selling, over the counter, bakery products such as breads, rolls, cakes, cookies, and pies at least part of which are baked on the premises.

Retail bakeries—selling only (SIC 546 pt.). Establishments primarily engaged in the retail sale of bakery products such as breads, cakes, and pies none of which are produced on the premises.

Miscellaneous food stores (SIC 549). Establishments primarily engaged in the retail sale of specialized foods, not elsewhere classified, such as eggs, poultry, health foods, vitamins, spices, herbs, coffee, and tea. The poultry stores may sell live poultry, slaughter and clean poultry for their own account, and sell dressed fowls or sell fowls cleaned and dressed by others.

Automotive Dealers and Gasoline Service Stations (SIC Major Group 55)

This major group includes retail dealers selling new and used automobiles, boats, recreational vehicles and utility trailers, and motorcycles and mopeds; dealers selling new

automobile parts and accessories; and gasoline service stations selling gasoline and lubricating oils. Automobile repair shops maintained by establishments engaged in the sale of new automobiles also are included unless reported separately.

New and used car dealers (SIC 551). Establishments primarily engaged in the sale of new automobiles or new and used automobiles. These establishments have a franchise for the sale of new domestic and/ or new imported automobiles. They frequently maintain repair departments and carry stocks of replacement parts, tires, batteries, and automotive accessories. These establishments also frequently sell pickups and vans at retail.

Used car dealers (SIC 552). Establishments primarily engaged in selling used cars and not holding a franchise for the sale of new passenger cars. Some of these dealers may sell a small quantity of trucks and farm equipment. Some maintain repair and service departments. These establishments also frequently sell used pickups and vans at retail.

Auto and home supply stores (SIC 553). Establishments primarily engaged in the retail sale of auto supplies such as automotive batteries, parts, accessories; and sundry supplies such as polishes, paint, and decorative items. Establishments where used tires, batteries, and accessories exceed 49 percent of total sales are classified in SIC 501.

Auto parts, tires, and accessories stores (SIC 553 pt.). Establishments primarily engaged in the retail sale of new automotive tires and tubes. These establishments frequently have facilities for tire recapping and vulcanizing. These establishments also sell auto supplies such as automotive batteries, parts, and accessories. Establishments engaged in producing and installing custom-made seat covers for household users are included here.

Home and auto supply stores (SIC 553 pt.). Establishments primarily engaged in selling a combination of lines such as tires, batteries and accessories; household appliances; sporting goods; housewares and hardware. These differ from tire, battery, and accessory stores in that, although the largest merchandise line sales may be in automotive parts, accessories, and repairs, a considerable amount of sales also are made in nonautomotive lines.

Gasoline service stations (SIC 554). Establishments primarily engaged in selling gasoline and automotive lubricants. These establishments frequently sell other merchandise such as tires, batteries, accessories, and other automobile parts or perform minor repair work. Establishments called garages but deriving more than half of their receipts from the sale of gasoline and automotive lubricants are included. Gasoline stations combined with other activities such as grocery stores, convenience stores, or car washes are classified based on primary activities as determined by sales.

Gasoline/ convenience food stores (SIC 554 pt.). Establishments primarily engaged in the retail sale of gasoline and automotive lubricants and also sell a line of convenience store items such as milk, eggs, bread, beer, pet food, detergents, etc. Establishments selling gasoline and lubricants but primarily selling convenience food items are classified in SIC 541.

Other gasoline service stations and truck stops (SIC 554 pt.). Establishments primarily engaged in selling gasoline and automotive lubricants. These establishments usually sell tires, batteries, and accessories and perform related services. They also may do minor repair work. Truck stops primarily sell diesel fuel to truckers. They also may sell gasoline and lubricants, provide repair services, and operate a restaurant or motel as part of the truck stop establishment. They normally are open on a 24-hour per day basis.

Boat dealers (SIC 555). Establishments primarily engaged in the retail sale of new and used motorboats and other watercraft including parts, accessories, marine supplies, and outboard motors.

Recreational vehicle dealers (SIC 556). Establishments primarily engaged in the retail sale of new and used motor homes, recreational trailers, and campers (pickup coaches) including parts and accessories. Establishments primarily engaged in the retail sale of manufactured (mobile) homes are classified in SIC 527, and those primarily selling utility trailers are classified in SIC 559.

Motorcycle dealers (SIC 557). Establishments primarily engaged in the retail sale of new and used motorcycles, including motor scooters, mopeds, all-terrain vehicles, and parts and accessories.

Automotive dealers, not elsewhere classified (SIC 559). Establishments primarily engaged in the retail sale of new and used automotive vehicles, utility trailers, and automotive equipment and supplies, not elsewhere classified, such as snowmobiles, dunebuggies, and go-carts. Also included are establishments primarily engaged in the retail sale of aircraft.

Apparel and Accessory Stores (SIC Major Group 56)

This major group includes retail stores primarily engaged in selling clothing of all kinds and related articles for personal wear and adornment. Not included are establishments which meet the criteria for Department Stores (SIC 531) or Miscellaneous General Merchandise Stores (SIC 539) even though most of their receipts are from the sale of apparel and apparel accessories.

Men's and boys' clothing and accessory stores (SIC 561). Establishments primarily engaged in selling men's and boys' ready-to-wear clothing and accessories. Establishments are included in this category if (1) sales of

all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of total sales and (2) receipts from sales of all men's and boys' apparel are three or more times the receipts from sales of all women's and girls' apparel.

Women's clothing stores (SIC 562). Establishments primarily engaged in selling women's and girls' ready-to-wear apparel. Establishments are included in this category if (1) sales of all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of total sales, (2) sales of all women's and girls' apparel are three or more times the sales of all men's and boys' apparel, and (3) sales of dresses, skirts, slacks, coats, suits, and furs are two or more times greater than the sales of millinery, hosiery, underwear, blouses, handbags, and other apparel and accessories. Custom tailors primarily engaged in making women's clothing to individual order are classified in SIC 569.

Women's accessory and specialty stores (SIC 563). Establishments primarily engaged in selling women's accessories and specialties such as millinery, hats, foundation garments, lingerie, hosiery, costume jewelry, gloves, handbags, and fur including custom-made.

Children's and infants' wear stores (SIC 564). Establishments primarily engaged in the retail sale of children's and infants' clothing, furnishings, and accessories. They may specialize in either children's or infants' wear or sell a combination of children's and infants' wear.

Family clothing stores (SIC 565). Establishments primarily engaged in selling clothing, furnishings, and accessories for men, women, and children, without specializing in sales for an individual sex or age group. Establishments are included in this category if (1) sales of all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of their total sales, and (2) sales of apparel items for an individual sex or age group are not more than three times the sales of all other apparel items.

Men's shoe stores (SIC 566 pt.). Establishments primarily engaged in selling men's and boys' shoes and other footwear. Establishments selling women's and girls' and/ or children's and infants' footwear are included in this classification, if sales of men's and boys' footwear are more than three times the combined sales of women's, girls', children's, and infants' footwear.

Women's shoe stores (SIC 566 pt.). Establishments primarily engaged in selling women's and girls' shoes and other footwear. Establishments selling men's and boys' and/ or children's and infants' footwear are included in this classification, if sales of women's and girls' footwear are more than three times the combined sales of men's, boys', children's, and infants' footwear.

Children's and juveniles' shoe stores (SIC 566 pt.). Establishments primarily engaged in selling children's and infants' shoes and other footwear. Establishments selling men's, boys', and/ or women's and girls' footwear are included in this classification, if sales of children's and infants' footwear are more than three times the combined sales of men's, boys', women's, and girls' footwear.

Family shoe stores (SIC 566 pt.). Establishments primarily engaged in selling both men's and women's shoes and other footwear; they may or may not sell children's shoes. Frequently, they also sell accessories such as hosiery, gloves, and handbags. Establishments are included in this classification, if sales of any one of the three major groupings (men's and boys' footwear, women's and girls' footwear, and children's and infants' footwear) are not more than three times the sales of the other two groups combined.

Athletic footwear stores (SIC 566 pt.). Establishments primarily engaged in selling athletic shoes for activities such as tennis, jogging, baseball, softball, basketball, boxing, racquetball, football, volleyball, etc. These establishments may also sell athletic apparel.

Miscellaneous apparel and accessory stores (SIC 569). Establishments primarily engaged in the retail sale of specialized lines of apparel and accessories, not elsewhere classified, such as uniforms, bathing suits, raincoats, riding apparel, sports apparel, umbrellas, wigs, and toupees. This industry also includes custom tailors primarily engaged in making and selling men's and women's clothing, except fur apparel. Establishments primarily engaged in making fur apparel to custom order are classified in SIC 563.

Furniture and Homefurnishings Stores (SIC Major Group 57)

This major group includes retail stores selling goods used for furnishing the home such as furniture, floor coverings, draperies, glass and chinaware, domestic stoves, refrigerators, and other household electric and gas appliances. Establishments selling electric and gas appliances are included in this group only if the major part of their sales consists of articles for home use. These stores also may perform repair work on household appliances, radios, televisions, and stereo equipment; but establishments primarily engaged in repair of these products are classified in SIC 76. Dealers primarily engaged in selling antique and secondhand furniture are classified in SIC 5932. Stores furnishing interior decorating service are classified according to the merchandise handled. Stores primarily engaged in selling furnishings in conjunction with an interior decorator service are classified according to the merchandise handled; if the interior designer primarily advises clients on selection of merchandise, the establishment is classified in SIC 7389.

Furniture stores (SIC 5712). Establishments primarily engaged in selling new household furniture, beds, mattresses, springs, and other sleep equipment. Also included in this classification are establishments selling household appliances, phonographs, radios, television sets, and floor coverings, provided the receipts from sales of furniture and sleep equipment exceed those from sales of other merchandise. Furniture warehouse showrooms, sleep shops and waterbed stores, and specialty furniture stores such as baby furniture stores, are classified here. If sales of new office furniture account for more than half of the total sales, the establishments are classified in SIC 502120.

Floor covering stores (SIC 5713). Establishments primarily engaged in the retail sale of rugs, carpets, linoleum, floor tile, and related products. Stores selling ceramic (wall or floor) tile are classified in SIC 521130. Establishments included in this industry may incidentally perform installation but contractors primarily engaged in installing floor coverings for others are classified in SIC 1743 or 1752.

Drapery, curtain, and upholstery stores (SIC 5714). Establishments primarily engaged in selling draperies, curtains, slipcovers, and upholstery materials. Establishments primarily selling custom-made draperies and slipcovers for household use also are included. Establishments primarily engaged in reupholstering or repairing furniture are classified in SIC 7641.

Miscellaneous homefurnishings stores (SIC 5719). Establishments primarily engaged in the retail sale of miscellaneous homefurnishings such as china, glassware, and metalware for kitchen and table use; bedding and linen; brooms and brushes; lamps and shades; mirrors and pictures; and venetian blinds and window shades. Establishments primarily engaged in the retail sale of miscellaneous homefurnishings by house-to-house canvass or by party-plan merchandising are classified in SIC 5963.

Household appliance stores (SIC 572). Establishments primarily engaged in the retail sale of electric and gas refrigerators, stoves, microwave ovens, home freezers, and other household appliances such as electric irons, percolators, hot plates, vacuum cleaners, sewing machines, dehumidifiers, and self contained room air-conditioners. Many such stores also sell radios and television sets.

Radio, television, and electronics stores (SIC 5731). Establishments primarily engaged in the retail sale of radios, television sets, compact disc players, record players, high fidelity (hi-fi) sound reproducing equipment, and other consumer electronics equipment. Such establishments also may sell additional lines such as household appliances, computers, computer peripheral equipment, software, musical instruments, and records. Establishments in this industry may perform incidental installation and repair work on radios, televisions, and other consumer electronics equipment. Establishments primarily engaged in the installation and repair of these products are classified in SIC 7622.

Computer and software stores (SIC 5734). Establishments primarily engaged in the retail sale of computers, computer peripheral equipment, and software.

Record and prerecorded tape stores (SIC 5735). Establishments primarily engaged in selling phonograph records, compact discs, and prerecorded audio and video tapes and discs. Establishments primarily engaged in the retail sale of computer software are classified in SIC 5734 and those primarily engaged in the rental of video tapes in SIC 7841.

Musical instrument stores (SIC 5736). Establishments primarily engaged in selling musical instruments such as organs, pianos, horns, stringed instruments, and percussion instruments; sheet music; and similar supplies.

Eating and Drinking Places (SIC Major Group 58)

This major group includes retail establishments engaged in selling prepared foods and drinks for consumption on the premises. Also included are caterers which serve prepared food other than at the place of business and lunch counters and refreshment stands selling prepared foods and drinks for immediate consumption. In-plant food contractors are included here as well as leased eating and drinking concessions in hotels, motels, sports arenas, and other amusement places.

Restaurants (SIC 5812 pt.). Establishments primarily engaged in serving prepared food and beverages. Included here are only those establishments in which waiters/ waitresses take orders from patrons while the patrons are seated at a counter, booth, or table. They often serve alcoholic beverages. Establishments in which sales of alcoholic beverages for consumption on the premises exceed sales of prepared food and nonalcoholic beverages are classified in Drinking Places (SIC 5813).

Cafeterias (SIC 5812 pt.). Establishments engaged in serving a wide variety of prepared food and beverages primarily through the use of a cafeteria line where customers make selections from displayed items. Some limited waiter/ waitress service may be provided. Table and/ or booth seating facilities are usually provided.

Refreshment places (SIC 5812 pt.). Establishments primarily engaged in selling limited lines of refreshments and prepared food. Included in this group are establishments which prepare items such as chicken and hamburgers for consumption either on or near the premises or for ''take-home'' consumption. Such establishments do not have waiter/ waitress service where the patron's order is taken while the patron is seated at a table, booth, or counter.

Other eating places (SIC 5812 pt.). This includes social caterers, contract feeding and ice cream and frozen yogurt shops. See following descriptions.

Drinking places (SIC 5813). Establishments primarily engaged in the retail sale of alcoholic drinks such as beer, ale, wine, and liquor for consumption on the premises. The sale of food frequently accounts for a substantial portion of the receipts of these establishments. Meals may or may not be served.

Miscellaneous Retail Stores (SIC Major Group 59)

This major group includes retail establishments not elsewhere classified. These establishments fall into the following categories: drug stores and proprietary stores; liquor stores; used merchandise stores; miscellaneous shopping goods stores; nonstore retailers, fuel dealers, florists, cigar stores and stands, news dealers and newsstands, and miscellaneous retail stores not elsewhere classified.

Drug stores (SIC 591 pt.). Establishments primarily engaged in the retail sale of prescription drugs. They may carry a number of related lines such as cosmetics, toiletries, tobacco, and novelty merchandise and may operate a soda fountain or lunch counter. Some of these stores sell small electrical appliances, window fans, dishes, lawn chairs, and similar products. Drug stores are classified here if any prescriptions are sold or if there is an indication that a pharmacist is employed. These stores are classified on the basis of their usual trade designation rather than on the stricter interpretation of commodities handled.

Proprietary stores (SIC 591 pt.). Establishments generally selling the same merchandise as drug stores, except that prescriptions are not filled and sold.

Liquor stores (SIC 592). Establishments primarily engaged in selling packaged alcoholic beverages such as ale, beer, wine, and liquor for consumption off the premises. Liquor stores operated by States, counties, and municipalities are included.

Used merchandise stores (SIC 593). This industry includes stores primarily engaged in the retail sale of used merchandise, antiques, and secondhand goods such as clothing and shoes; furniture; books and rare manuscripts; musical instruments; office furniture; phonographs and phonograph records; and store fixtures and equipment. The industry also includes pawnshops. Dealers primarily engaged in selling used motor vehicles, trailers, and boats are classified in major group 55; and those primarily selling used mobile homes in SIC 5271. Establishments primarily selling used automobile parts and accessories are classified in SIC 5015 and scrap and waste dealers are classified in SIC 5093. Establishments primarily engaged in automobile repair are classified in SIC 753.

General-line sporting goods stores (SIC 5941 pt.). Establishments primarily engaged in selling a general line of sporting goods and equipment for hunting, camping, fishing, skiing, riding, tennis, golf, and other sports; and gymnasium and playground equipment.

Specialty-line sporting goods stores (SIC 5941 pt.). Establishments specializing in a maximum of four lines of sporting goods and equipment such as guns, bicycles, trophies, skiing, golfing, bowling, and billiards equipment. These stores may also sell parts and/ or accessories for the specialized line and often rent and/ or repair the line they sell. Sales of motorcycles and motor scooters (including mopeds) are classified in SIC 5571. Establishments primarily engaged in the retail sale of athletic footwear are classified in SIC 5661.

Book stores (SIC 5942). Establishments primarily engaged in selling new books and periodicals. Stationery and related items may also be sold. The subclassifications are general, specialty, and college book stores. Book clubs (not engaged in publishing) primarily selling new books through the mail are included in mail-order houses (SIC 5961). Establishments primarily engaged in the sale of used books are classified in SIC 593.

Stationery stores (SIC 5943). Establishments primarily engaged in the retail sale of stationery such as paper and paper products (including printing and engraving), post cards, novelties, and school supplies. These establishments also may sell additional lines of office type supplies such as accounting and legal forms, blankbooks and forms, and office forms and supplies. Establishments primarily engaged in selling office supply forms and supplies are classified in SIC 5112. Stores specializing in the sale of artists' supplies are classified in SIC 5999.

Jewelry stores (SIC 5944). Establishments primarily engaged in the retail sale of any combination of the lines of jewelry such as diamonds and other precious stones; rings, bracelets, and brooches; sterling and plated silverware; and watches and clocks. Stores primarily engaged in watch and jewelry repair are classified in SIC 7631. Establishments primarily engaged in selling costume jewelry are classified in kind of business 563210.

Hobby, toy, and game shops (SIC 5945). Establishments primarily engaged in the retail sale of toys, games, and hobby and craft kits and supplies. Establishments primarily engaged in selling artists' supplies or collectors' items such as coins, stamps, and autographs are classified in SIC 5999.

Camera and photographic supply stores (SIC 5946). Establishments primarily engaged in the retail sale of cameras, film, and other photographic supplies and equipment. Establishments primarily engaged in the retail sale of video cameras are classified in SIC 5731. Establishments primarily engaged in finishing films are classified in SIC 7384.

Gift, novelty, and souvenir shops (SIC 5947). Establishments primarily engaged in the retail sale of combined lines of gifts and novelty merchandise, souvenirs, greeting cards, holiday decorations, and miscellaneous small art goods.

Luggage and leather goods stores (SIC 5948). Establishments primarily engaged in the retail sale of luggage, trunks, and leather goods, except apparel.

Sewing, needlework, and piece goods stores (SIC 5949). Establishments primarily engaged in the retail sale of sewing supplies, fabrics, patterns, yarn, and other needlework accessories.

Catalog and mail-order houses (SIC 5961). Establishments primarily selling merchandise as a result of orders received by catalog, mail, or television order. Customers are made aware of goods available for sale through catalogs, mailing pieces, advertisements in newspapers and magazines, advertising on radio and television, and by operating catalog stores that carry little stock other than display items. They receive their orders by phone or mail and fill most of their orders by mail. These establishments do not ordinarily maintain stock for sale on the premises. Departmentalized retail stores normally with 50 employees or more and operated by mail-order houses and selling a general line of merchandise are classified in SIC 531. Retail stores normally with less than 50 employees and operated by mail-order houses and selling a general line of merchandise are classified in SIC 539. Establishments primarily engaged in mail-order sales of computer hardware and/ or software and television order (home shopping) sales are included within the classification.

Automatic merchandising machine operators (SIC 5962). Establishments primarily engaged in the retail sale of products by automatic merchandising units (vending machines) which are generally located on the premises of other businesses. This industry does not include coin-operated service machines such as washers and dryers (SIC 7215), music machines and amusement game machines (SIC 7993), lockers and scales (SIC 7299), or insurance policies sold through vending machines (SIC 63). The "establishment" is the location from which the vending route (or routes) is serviced, not the number of vending machines or the number of business locations in which vending machines are located.

Direct selling establishments (SIC 5963). Establishments primarily engaged in selling merchandise by house-to-house canvass, by party plan, by telephone, or from trucks or wagons or other temporary locations. The ''establishment'' is the location from which the canvassers operate. Canvassers who do not have any paid help are excluded from the tabulations in this report. In some tabulations at the national level, direct selling organizations are divided into subclassifications on the basis of the merchandise they sell. The subclassifications are furniture, homefurnishings, and equipment; mobile food service; books and stationery; and other direct selling.

Fuel oil dealers (SIC 5983). Establishments primarily engaged in the retail sale of fuel oil. Establishments primarily selling fuel oil burners are classified in SIC 5074; dealers primarily engaged in installing and servicing fuel oil burners, in SIC 1711; and fuel oil burner repair service only, in SIC 7699.

Liquefied petroleum gas (bottled gas) dealers (SIC 5984). Establishments primarily engaged in the retail sale of bottled or bulk liquefied petroleum (LP) gas.

Fuel dealers, not elsewhere classified (SIC 5989). Establishments primarily engaged in the retail sale of coal, coke, charcoal, wood, or any combination of these lines. Establishments primarily selling fuel oil are classified in SIC 5983 and those primarily selling bottled gas in SIC 5984.

Florists (SIC 5992). Establishments primarily engaged in the retail sale of cut flowers and growing plants. Stores primarily engaged in the retail sale of seeds, bulbs, and nursery stock are classified in SIC 5261, and greenhouses and nurseries primarily engaged in growing seeds, bulbs, flowers, and nursery stock are classified in SIC 0181.

Tobacco stores and stands (SIC 5993). Establishments primarily engaged in the retail sale of cigarettes, cigars, tobacco, and smokers' supplies. Many of the establishments included in this classification are operated as concessions in places of amusement, railway stations, airports, and other public places.

News dealers and newsstands (SIC 5994). Establishments primarily engaged in the retail sale of newspapers, magazines, and other periodicals. Home delivery of newspapers by other than printers or publishers is classified in SIC 5963. Establishments engaged in delivering newspapers for subsequent home delivery are classified in SIC 4212.

Optical goods stores (SIC 5995). Establishments primarily engaged in the retail sale of prescription eyeglasses and contact lenses for individuals. Offices of oculists, ophthalmologists and optometrists are classified in major group 80 even though a majority of their revenue is from the sale of eyeglass frames or prescription eyeglasses and contact lenses.

Miscellaneous retail stores, not elsewhere classified (SIC 5999). Establishments primarily engaged in the retail sale of specialized lines of merchandise, not elsewhere classified. This industry also includes establishments primarily engaged in selling a general line of their own or consigned merchandise at retail or at auction. Establishments primarily engaged in auctioning tangible personal property of others on a fee basis are classified in SIC 7389.

Pet shops (SIC 5999 pt.). These are retail stores selling pets such as dogs, cats, birds, rabbits, and tropical fish; pet foods and remedies. Aquariums, cages, pet toys, and aquatic plants are often sold in these types of stores. Many

of these shops board pets on the premises. If receipts from the boarding of pets account for more than 49 percent of total receipts, the establishments are classified in Agriculture, Industry 075200 6.

Art dealers (SIC 5999 pt.). These are retail establishments primarily engaged in the retail sale of art goods, including original oil paintings, sculptures, glassware items and ceramics, at retail or at auction. Establishments primarily selling supplies for making ceramic items are classified in kind of business 594520. Establishments primarily selling artists' supplies are classified in kind of business 599990. Establishments primarily selling art reproductions are classified in Industry 571900.

Other miscellaneous retail stores, not elsewhere classified (SIC 5999 pt.). These are retail stores, not elsewhere classified, which sell specialized lines such as artists' supplies, above-ground swimming pools and supplies, orthopedic and artificial limbs, drafting materials, hearing aids, furniture polish, rubber stamps, monuments and tombstones, sanitary supplies (including disinfectants), seasonal decorations, artificial flowers and plants, fireworks, etc. Religious goods stores are classified here.

Publication Program

1992 CENSUS OF RETAIL TRADE

Publications of the 1992 Census of Retail Trade, containing data on retail establishments in the United States, are described below. Publications order forms for specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services , Bureau of the Census, Washington, DC 20233-8300. The first results were issued in press releases. Final detailed statistics are issued in separate paperbound reports and compact disc-read only memory (CD-ROM).

Final Reports

Geographic area series—52 reports (RC92-A-1 to -52)

A separate paperbound report containing data for establishments with payroll is published for each State, the District of Columbia, and the United States. Each report presents general statistics for establishments with payroll including number of establishments, sales, payroll, and employment by varied retail classifications. All statistics are presented for the State, metropolitan areas (MA's), counties, and places with 2,500 inhabitants or more. Greater kind-of-business detail is shown for larger areas. For each State, the District of Columbia, and the United States, 1992 data are provided by kind of business on sales and employees per establishment and sales and payroll per employee. Comparative statistics showing percent changes in sales and payroll between 1987 and 1992 are shown by kind of business.

Nonemployer statistics series—1 report (RC92-N-1)

This report includes number of establishments and sales by kind of business for all establishments, establishments with payroll, and establishments without payroll for the United States and States. Data on sales size of establishments without payroll and the number of proprietorships and partnerships is also provided for the United States. Also presented are statistics for establishments without payroll including number of establishments and sales by varied retail classifications for MA's. Similar data for counties and places with 2,500 inhabitants or more are available on electronic media only.

Subject series—4 reports (RC92-S-1 to -4)

The *Establishment and Firm Size* report (RC92-S-1) presents data for establishments with payroll, based on size of establishment, size of company or firm, and legal form of organization. Establishment statistics are presented by sales size and by employment size; statistics for firms by sales size (including concentration by largest firms), by employment size, and by number of establishments operated (single units and multiunits). Statistics are presented by kind of business on the number of establishments, sales, payroll, and employment for the United States.

The *Measures of Value Produced, Capital Expenditures, Depreciable Assets, and Operating Expenses* report (RC92-S-2) presents data on measures of value produced, capital expenditures, depreciable assets, and operating expenses for firms with payroll for the United States by major kind of business. Operating expenses include annual payroll, supplemental labor costs, purchased services, etc. Receipts data also are provided.

The *Merchandise Line Sales* report (RC92-S-3) presents data on major categories of merchandise sold by retail kinds of business for each State and the District of Columbia, each MA, and the United States as a whole. Data for States and MA's will be available on electronic media only. Tables present data for establishments with payroll for each kind of business and show, for each merchandise line, the number of establishments handling the line and their sales of the line; the percentage of total sales of the kind of business accounted for by each of the lines carried; and, for establishments actually handling a specific line, the percentage of their total sales represented by sales of that line. Summary statistics also are provided for the 43 broad merchandise line categories, including counts of establishments and the amount and percentage of the line sold by various kinds of retail businesses.

The *Miscellaneous Subjects* report (RC92-S-4) contains special statistics on eating and drinking places, gasoline service stations, shoe stores, optical goods stores, and other miscellaneous subjects. Data are presented for the United States as a whole and, where feasible, for States and MA's.

Special report series—1 report (RC92-SP-1)

The *Selected Statistics* report presents selected data for establishments with and without payroll for 1992 and 1987 by kind of business. Data include number of establishments, sales, payroll and employment, and selected ratios and rankings. Data are presented for the United States as a whole and for States and MA's.

Electronic Media

All data included in the printed reports are available on CD-ROM. The CD-ROM's provide the same information found in the final reports as well as additional information not published in the final reports such as ZIP Code statistics available from series RC92-Z, merchandise line sales statistics for States and MA's from series RC92-S, and nonemployer data for counties and places from series RC92-N. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300.

OTHER ECONOMIC CENSUS REPORTS

Data on wholesale trade, service industries, transportation, communications, utilities, financial, insurance, real estate, construction industries, manufactures, mineral industries, enterprise statistics, minority-owned business enterprises, and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas: Puerto Rico, Virgin Islands of the United States, Guam, and the Northern Marianas. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services , Bureau of the Census, Washington, DC 20233-8300.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Retail Trade. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

This report was prepared in the Services Division. **Bobby E. Russell,** Assistant Chief for Census Programs, was responsible for the overall planning, management, and coordination of the census of retail trade. Planning and implementation were under the direction of **Fay Dorsett,** Chief, Retail Census Branch, with primary staff assistance by **Pamela J. Palmer, Thomas G. Dassel, Jennifer E. Lins, Cheryl E. Merkle, Barbara T. Parlett, Maria P. Ray, Barbara A. Collier, Venita L. Holland,** and **Judith O. Belt.**

Systems and procedures for mailout, receipt, correspondence, data input, industry classification, other clerical processing, administrative record processing, quality control, and the associated electronic computer programs, were developed in the Economic Planning and Coordination Division.

Mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review were performed by the staff of the Data Preparation Division, **Judith N. Petty,** Chief.

Geographic coding procedures and associated computer programs were developed by the staff of the Geography Division.

The computer processing systems were developed and coordinated in the Economic Statistical Methods and Programming Division**, Charles P. Pautler, Jr.,** Chief. **Martin S. Harahush,** Assistant Chief for Quinquennial Censuses, was responsible for the design and implementation of the computer systems. The computer programs were prepared under the supervision of **William C. Wester,** Chief, Services Branch, assisted by **Jeffrey S. Rosen, David L. Sipes,** and **Donell D. Barnes.** Additional programming assistance was provided by **Robert S. Jewett.**

Computer processing was performed in the Computer Services Division, **Marvin D. Raines,** Chief.

The staff of the Administrative and Publications Services Division, **Walter C. Odom,** Chief, performed planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Bernadette J. Gayle** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-2687.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/ output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, finance, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Retail Trade

GENERAL

The 1992 Census of Retail Trade, part of the 1992 Economic Census, covered retail trade as defined in the *Standard Industrial Classification Manual: 1987*[1] (SIC). It included all establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. The census excluded governmental organizations classified in the covered industries except for liquor stores operated by State and local governments. Data for direct sellers (SIC 5963) with no paid employees and post exchanges, ship stores, and similar establishments operated on military posts by agencies of the Federal Government were not included. The basic tabulations in this report do not include data for establishments which are auxiliary (primary function is providing a service, such as warehouses) to retail establishments within the same organization. Data for auxiliaries are presented in a subsequent report issued as part of the 1992 Enterprise Statistics reports.

For the 1992 Census of Retail Trade, large- and medium-size firms, plus all firms known to operate more than one establishment, were sent questionnaires to be completed and returned to the Census Bureau by mail. For most very small firms, including those with no paid employees, data from existing administrative records of other Federal agencies were used instead. These records provided basic information on location, kind of business, sales, payroll, number of employees, and legal form of organization. In addition, more detailed information for selected kinds of business was obtained on the various questionnaires.

Appendix A gives a more detailed explanation of census coverage and methodology.

MERCHANDISE LINE SALES

This report represents a recompilation of establishment and sales data collected in the 1992 Census of Retail Trade according to various categories of merchandise lines sold by retail establishments. Tables in this report present data only for establishments with payroll. An individual establishment (i.e., business location) is the unit to which a single kind-of-business classification is assigned and for which data are summarized in most retail census tabulations.

Sales are presented in this report by broad merchandise line category. In planning the merchandise line inquiries for the 1992 Census of Retail Trade, the Bureau of the Census consulted extensively with trade associations and businesses. The amount of detail requested in the census primarily reflected considerations for reportability.

Forty-three broad merchandise lines were devised to account for all the sales and receipts of retail establishments regardless of kind-of-business classification. These lines are identified in the tables by merchandise line codes ending in "0." In addition to the 43 broad merchandise lines, detail within some of these broad lines was requested on many of the report forms. These detail lines are identified in the tables by merchandise line codes ending with a digit other than "0." Unlike the broad lines, the detail lines were adapted to the merchandise line characteristics of an individual kind of business or a group of closely related kinds of businesses. Thus, while it is possible to compute a total for each of the broad merchandise lines to cover all kinds of business, no such totals can be calculated for the detail lines.

Appendix I gives merchandise line descriptions, codes, and the reporting-form number on which each line appears. Appendix A presents more detailed information about the statistics contained in this report.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind-of-business classification is not considered a disclosure; therefore, this information may be released even though other information is withheld.

GEOGRAPHIC AREAS COVERED

This report presents data for the United States as a whole. These data and comparable data for the following areas are available on compact discs-read only memory (CD-ROM):

1. Each State and the District of Columbia.
2. Each consolidated metropolitan statistical area (CMSA) and primary metropolitan statistical area (PMSA) defined by the Office of Management and Budget (OMB) as of June 30, 1993. A CMSA is an

[1] *Standard Industrial Classification Manual: 1987.* For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

area used to facilitate the presentation and analysis of data for large concentrations of metropolitan populations. It includes two or more contiguous PMSA's which have a population of at least 1,000,000[2] and which meet specific criteria of urban character and of social and economic integration.

3. Each metropolitan statistical area (MSA) defined by the OMB as of June 30, 1993. An MSA is an integrated economic and social unit with a population nucleus of at least 50,000 inhabitants.[2] Each MSA consists of one or more counties meeting standards of metropolitan character; in New England, cities and towns rather than counties are the component geographic units.
4. The area within the State outside metropolitan areas (MA's).

DOLLAR VALUES

All dollar values presented in this report are expressed in current dollars; i.e., 1992 data are expressed in 1992 dollars and 1987 data in 1987 dollars. Consequently, when making comparisons to prior years, users of the data should consider the inflation that has occurred.

RELIABILITY OF DATA

The merchandise line sales data presented in this report are based, in part, upon a sample and, therefore, are subject to both sampling errors and nonsampling errors. Specifically, these data are estimated based on information obtained from census questionnaires mailed to all large employers and to a sample of small employers in the retail universe. Sampling errors affect these estimates insofar as they may differ from a complete enumeration. Nonsampling errors can be attributed to many sources: inability to identify all cases in the actual universe; definition and classification difficulties; differences in the interpretation of questions; errors in recording or coding the data obtained; and other errors of collection, response, coverage, processing, and estimation for missing or misreported data.

The reliability of the merchandise line sales estimates in this report is determined by the joint effects of sampling and nonsampling errors. No direct measurement of nonsampling errors has been obtained except for estimation for missing or misreported data; however, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize these effects. For more detailed information on the sampling procedure, estimation procedure, and sampling error that apply to these data, see appendix A. Table 3 presents information on merchandise line sales coverage for the published estimates, and appendix A describes the derivation and significance of these coverage data. Also, see appendix E for an indication of the extent that data for kind-of-business totals included in this report were obtained from the administrative records of other Federal agencies and from estimation, rather than reports directly from respondents.

Finally, it should be noted that selected data in table 1 are not subject to sampling errors, but may be affected by nonsampling errors. These data are the figures presented for retail trade and for each kind-of-business category on total number of establishments with payroll and total sales for establishments with payroll. These figures are based on data obtained either from census questionnaires or from the administrative records of other Federal agencies and are not estimates derived from a sample.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Retail Trade may be obtained, depending on availability of time and personnel, on diskette, computer tape, or in tabular form. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Services Division, Bureau of the Census, Washington, DC 20233.

To discuss a special tabulation before submitting specifications, call 1-800-541-8345.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

–	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in broader kind-of-business totals.
(NA)	Not available.
(V)	Less than 0.05 percent.
(X)	Not applicable.
(Y)	Withheld due to insufficient coverage of merchandise lines or to avoid disclosing data for individual companies. Some data are shown at a lower kind-of-business level.
#	Merchandise line detail withheld due to insufficient reporting or to avoid disclosing data for individual companies.
n.e.c.	Not elsewhere classified.
pt.	Part.
r	Revised.
SIC	Standard industrial classification.

[2]According to the 1990 Census of Population or subsequent special census.

Appendix A.
General Explanation

CENSUS COVERAGE AND METHODOLOGY

Structure and method of enumeration. Firms in the 1992 Census of Retail Trade were divided into the nonmail universe and mail universe. The coverage and the method of obtaining census information from each follow:

1. The nonmail universe consisted of firms which were not required to file a regular census return and included:

   a. All nonemployers, i.e., all firms with no paid employment during 1992. Sales information for these firms was obtained from administrative records of other Federal agencies. Although consisting of many firms, nonemployers account for less than 5 percent of total retail sales.

      The census included only those retail nonemployer firms which reported a sales volume of $1,000 or more during 1992.

      Data on nonemployers are provided in subsequent 1992 Census of Retail Trade reports; Nonemployer Statistics (RC92-N-1) and Selected Statistics (RC92-SP-1).

   b. Selected small employers, i.e., single-establishment firms with payroll below a specified cutoff. (The term ''employers'' refers to all business firms with one or more paid employees at any time during 1992 as shown in the active administrative records of other Federal agencies.) Although the payroll cutoff varied by kind of business, small employers generally included firms with one to four employees and represented about 10 percent of total retail sales of establishments covered in the census.

      Data on sales, payroll, and employment for employer firms below the payroll cutoff were derived or estimated from administrative records of other Federal agencies except for a sample of small employer firms. This sample was included in the mail universe.

2. The mail universe consisted of firms for which information was obtained by means of a mail canvass and included:

   a. Large employers; i.e., all multiestablishment firms and all employer firms above the payroll size cutoff referred to in section 1b. Within this category, a report of company organization was conducted periodically to identify firms which operated establishments at more than one location and to obtain information on payroll and mid-March employment at each location. The 1991 Report of Company Organization was used as a coverage check in the census. In the 1992 census, all multiestablishment firms were asked to notify the Census Bureau of any establishments for which a form was not received. Report forms were subsequently provided to the firms for these establishments.

   b. A sample of small employer firms referred to in section 1b. These firms were sent the census mailing packages containing the appropriate 1992 questionnaire. For the retail trade sector, the overall sample of small employer firms was 20.6 percent which varied by kind of business.

Method of classifying kinds of business. The retail trade classifications for all establishments were based on the *Standard Industrial Classification Manual: 1987*[1] (SIC). However, the method of assigning these classifications, and the level of detail at which establishments were classified, differed between the nonmail and mail universe as follows:

1. The nonmail universe.

   a. Nonemployers were classified on the basis of information obtained from administrative records of other Federal agencies.

   b. Selected small employers were classified on the basis of the most current census kind-of-business classification available from one of the Census Bureau's current sample surveys or the 1987 census. Otherwise, the classification was obtained from administrative records of other Federal agencies.

      If the census or administrative record classifications proved inadequate (none corresponded to a 1992 census classification in the detail required for employers), the firm was sent a brief inquiry requesting information necessary to assign a 1992 census kind-of-business code.

[1] *Standard Industrial Classification Manual:* 1987. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

2. Establishments in the mail universe were classified on the basis of their self-designation, answers to questions on sales by merchandise line, and other special inquiries.

COMPARABILITY OF THE 1987 AND 1992 CENSUSES

The 1987 and 1992 censuses were conducted under similar conditions and procedures except for the following:

Geographic areas. The boundaries of a number of areas for which data are shown in the 1992 census are not the same as in the 1987 census because of annexations; other boundary changes; and redefinitions of metropolitan statistical areas (MSA's), primary metropolitan statistical areas (PMSA's), and consolidated metropolitan statistical areas (CMSA's).[2] In addition, data for consolidated cities are included in the 1992 census.

Data for special economic urban areas (SEUA's) with 10,000 inhabitants or more in Michigan, Minnesota, New York, and Wisconsin qualified for publication in the 1992 census. This included townships in Michigan and Minnesota and towns in New York and Wisconsin. However, Minnesota did not have any townships that met the publication criteria.

MERCHANDISE LINE SALES

Merchandise line inquiry composition. The merchandise line inquiries on 1992 retail questionnaires were tailored to the kinds of business that would receive them. That is, a broad merchandise line was listed on a particular report form only if it accounted for at least 0.1 percent of sales reported by the kind-of-business categories receiving that form in 1987.

Because a complete set of broad merchandise lines was not present on any particular retail questionnaire, respondents sometimes found that part of their sales did not fit any available merchandise line category. When this occurred, they were asked to report these sales on lines for "all other merchandise" and to describe the kind of merchandise represented. Census personnel subsequently attempted to classify this merchandise based on the respondent's description and to assign the sales to the appropriate merchandise line category. A small percentage of sales could not be classified and is therefore summarized in this report in a category called "unclassified merchandise."

The effect of excluding insignificant broad merchandise lines on particular report forms is an understatement of the number of establishments handling each merchandise line and, to a lesser extent, the corresponding sales figure. The magnitude of this understatement for all merchandise lines combined is indicated, at least in part, by the data presented for the "unclassified merchandise" category.

Limitations in reporting sales by merchandise lines. Respondents often failed to report sales for detail lines for their particular business and only reported sales for broad lines. This deficiency causes an understatement in the number of outlets for detail merchandise lines and, to a lesser extent, affects the measurement of the sales volume of detail lines.

Merchandise line categories by which individual retailers group their sales are not uniform. These categories do not always correspond to the categories established by the census of retail trade for collecting and presenting merchandise line data. In addition, some retailers have little, if any, recorded information on sales by line of merchandise. A related reporting problem for retail firms is the absence of merchandise line records on an individual establishment basis. Some firms have information available only for the group of stores within a warehouse district or some other grouping used by the firm. In such cases, the firm may estimate sales for individual stores by using the pattern of sales shown by the entire group of stores. The effect of individual reporting differences and the use of approximation is assumed to be negligible in summary tabulation.

Differences between 1987 and 1992 merchandise lines. The 1987 census presented data for 41 broad merchandise lines. For 1992, these merchandise lines were restructured into 43 categories. The two new broad lines are:

1. Children's wear (ML 240). Previously reported under "Men's and boys' wear" (ML 200) and "Women's, girls', infants', and toddlers' wear" (ML 220).

2. Books (ML420). Previously reported under "All other merchandise" (ML 850).

Treatment of nonresponse. Reporting was incomplete or inadequate for establishments representing about XX.X percent of the total dollar volume of establishments with payroll. However, merchandise line data were expanded to estimate the sales of all retail establishments with payroll. The expansion is based on the premise that the merchandise line data for those establishments not reporting this information are similar to merchandise line data for those establishments in the same kind of business that reported this information. Merchandise line data were expanded at the lowest published level of geography and kind-of-business classification based on reported data at that level. If there were no reported merchandise line data for a particular combination of geographic area and kind of business, expansion factors developed at the United States level were used to produce an estimate. These estimates for the most detailed level of geography and kind of business were then summed to produce higher level geography and kind-of-business estimates.

[2]Newly defined metropolitan areas (MA's) were announced by the Office of Management and Budget (OMB) effective June 30, 1993.

Coverage. Table 3 presents coverage percents for each kind of business shown. Coverage percents indicate the degree to which establishments in each kind of business acceptably reported sales for broad merchandise lines. Coverage was determined by dividing total sales of establishments reporting acceptable data for broad lines (whether or not additional detail lines were reported) by total sales of all establishments classified in that particular kind of business.

In addition, coverage percents are presented for selected broad merchandise lines where additional detailed merchandise line information within the broad line was requested. This data indicates the degree to which detail lines within that broad line were acceptably reported. The table presents each broad line under which additional detail line reporting was requested and shows the degree to which businesses that reported the specified broad merchandise line gave the additional detail breakdown. The coverage percent was computed by dividing total sales of establishments reporting detail within the particular broad line by the estimated sales of establishments reporting that broad line within the particular kind of business.

Except when precluded by the census disclosure rules (see Introduction), data are shown for individual kinds of business when the dollar volume of reporting coverage accounts for 60 percent or more of sales after weighting merchandise line sales of the sample of "small employers" described in the Census Coverage and Methodology section above.

Measures of sampling variability. Because the merchandise lines estimates are based in part on a sample, exact agreement with the results that would be obtained from a complete census of establishments using the same enumeration procedure should not be expected. However, because each establishment's chance of being selected for the sample was known, it was possible to estimate the sampling variability of the estimates made from the sample.

The standard error of the estimate is a measure of the variability among the estimates from all possible samples of the same size and design and, thus, is a measure of the precision with which an estimate from a particular sample approximates the results of a complete enumeration. The coefficient of variation (expressed as a percent) is the standard error of the estimate divided by the value being estimated. Note that measures of sampling variability, such as the standard error or coefficient of variation, are estimated from the sample and are also subject to sampling variability. Tables of coefficients of variation for the broad and detail line estimates are shown in appendix H, tables 1 and 2.

The coefficients of variation presented in these tables allow certain confidence statements about the sample estimates. The particular sample used in this survey was one of a large number of samples of the same size that could have been selected using the same design. In about 2 out of 3 (67 percent) of these samples, the estimates would differ from the results of a complete enumeration by less than the corresponding percentages for that estimate shown in the coefficients of variation tables. In about 9 out of 10 (90 percent) of these samples, the estimates would differ from the results of a complete enumeration by less than 1.65 times the percentages shown. In about 19 out of 20 (95 percent) of the samples, the estimates would differ from the results of a complete enumeration by less than two times the percentage shown.

To illustrate the computations involved in the above confidence statements as related to the dollar value estimates, assume that an estimate of sales is $10,750 million for a particular broad line, and that the coefficient of variation for this estimate is 1.8 percent or 0.018. First obtain the standard error of the estimate by multiplying the estimate by the coefficient of variation. In this example, $10,750 million times 0.018 yields a standard error of $194 million. The upper bound of the 67-percent confidence interval can then be formed by adding the standard error to the estimate and the lower bound formed by subtracting the standard error from the estimate. Thus, the 67-percent confidence interval for this example is $10,556 million to $10,944 million ($10,750 million plus or minus $194 million). If corresponding confidence intervals were constructed for all possible samples of the same size and design, approximately 2 out of 3 (67 percent) of the intervals would contain the figure obtained from a complete enumeration.

Typical practice is to construct a 90- or 95-percent confidence interval. Using the same illustration as above, a 90-percent confidence interval would be $10,430 million to $11,070 million ($10,750 million plus or minus $320 million). Similarly, a 95-percent confidence interval is $10,362 million to $11,138 million ($10,750 million plus or minus $388 million).

EXPLANATION OF TERMS

Establishments. An establishment is a single physical location at which business is conducted. It is not necessarily identical with a company or enterprise, which may consist of one establishment or more. Census of retail trade figures represent a summary of reports for individual establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records of other Federal agencies were used instead of a census report, no information was available on the number of locations operated. Estimates of this number were derived from a sample and are provided in the retail trade report, *Miscellaneous Subjects* (RC92-S-4). Each retail establishment was tabulated according to the physical location at which the business was conducted. The count of establishments represents those in business at any time during 1992. Appendix G provides a comparison of the number of establishments active any time during the year versus the number in business at the end of the year.

When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, and when conditions prescribed by the SIC manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were obtained in the census.

Leased departments are treated as separate establishments and are classified according to the kind of business they conduct. For example, a leased department selling shoes within a department store would be considered a separate retail establishment under the ''shoe store'' classification.

Firms. A firm is a business organization or entity consisting of one domestic establishment (location) or more under common ownership or control. All establishments of subsidiary firms are included as part of the owning or controlling firm. For the economic census, the terms ''firm'' and ''company'' are synonymous.

Sales. Sales include merchandise sold for cash or credit at retail and wholesale by establishments primarily engaged in retail trade; amounts received from customers for layaway purchases; receipts from rental or leasing of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; the total value of service contracts; and gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed on to the retailer.

Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Total sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; commissions from vending machine operators; sales and receipts of departments or concessions operated by other firms; commissions or receipts from the sale of government lottery tickets; installment payments from leasing of vehicles, equipment, instruments, tools, etc. marketed under capital, finance, or full payout leases; and nonoperating income from such sources as investments, rental or sale of real estate, etc.

Sales in this report do not include retail sales made by manufacturers, wholesalers, service establishments, or other businesses whose primary activity is other than retail trade. They do include receipts other than from the sale of merchandise at retail, e.g., service receipts, sales to industrial users, and sales to other retailers, by establishments primarily engaged in retail trade.

Annual payroll. Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick-leave pay, employee contributions to qualified pension plans, and the value of payments in kind (e.g., free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons and reported to employers are included. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service (IRS) on form 941.

First-quarter payroll. This item consists of payroll, as defined above, paid to persons employed at any time during the quarter January to March 1992.

Paid employees for pay period including March 12. Paid employees consist of the full- and part-time employees, including salaried officers and executives of corporations, who were on the payroll during the pay period including March 12. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses. The definition of paid employees is the same as that used on IRS form 941.

Auxiliary establishments. Each company included in this census was asked to identify and separately report auxiliary locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data presented in this report do not include auxiliary establishments. Data for auxiliaries are presented in a subsequent report issued as part of the 1992 Enterprise Statistics reports.

KIND-OF-BUSINESS CLASSIFICATIONS

Retail trade, SIC major groups 52 through 59 in the SIC manual, includes establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. Exceptions to this general rule are lumber yards; paint, glass, and wallpaper stores; typewriter stores; stationery stores; and gasoline service stations, which sell to both the general public for personal and household consumption and to businesses. These types of stores are included in retail trade even if a higher proportion of their sales is made to other than individuals for personal or household consumption. However, such establishments that sell their products only to institutional or industrial users and to other wholesalers and establishments that sell similar merchandise for use exclusively by business establishments are classified in wholesale trade.

Other important characteristics of retail trade establishments are that they are usually places of business; they are engaged in activities to attract the general public to

buy; they buy or receive as well as sell merchandise; they may process their products, although processing is incidental or subordinate to selling; and they are considered as retail in the trade. Not all of these characteristics need be present and some are modified by trade practice.

The retail trade industries were covered in the 1992 Economic and Agriculture Census. However, retail establishments of the following types were excluded from census coverage:

1. Federal, State, and local government agencies that sold merchandise, other than liquor stores operated by State and local governments
2. Officers' clubs and officers' open messes (classified based on primary activity with a T/O code of 90); and public school lunch programs except those which operated on a fee or contract basis (classified based on primary activity with a T/O code of 55)

The following types of retail establishments were covered in the census:

1. Appliance stores owned by public utilities if the establishments were primarily engaged in selling appliances to customers
2. Liquor stores operated by State and local governments

Establishments covered by the census were assigned kind-of-business classifications according to the industry classifications defined in the 1987 SIC manual. When a more detailed classification than defined in the SIC manual was needed, additional kinds of business were identified within a SIC industry.

In general, retail establishments were classified according to the principal lines of commodities sold (groceries, hardware, etc.), or the usual trade designation (drug store, cigar store, etc.).

Kind-of-business classifications are not interchangeable with commodity classifications; most businesses sell several kinds of commodities. The kind-of-business code generally reflects either the individual commodity or the commodity group which is the primary source of the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. For example, the food stores classification excludes stores selling food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as food stores, some of their receipts may be derived from the sale of nonfood products. (Information on the extent to which various broad groups of commodities or merchandise lines are sold by different kinds of business is available in this report.)

Building Materials and Garden Supplies Stores (SIC Major Group 52)

This major group includes retail establishments primarily engaged in selling lumber and other building materials; paint, glass, and wallpaper; hardware; nursery stock; lawn and garden supplies; and manufactured (mobile) homes. It includes lumber and other building materials dealers and paint, glass, and wallpaper stores selling to the general public, even if sales to contractors account for a larger proportion of total sales; these establishments are known as retail in the trade. Establishments primarily selling these products but not selling to the general public are classified in wholesale trade.

Lumber and other building materials dealers (SIC 521). Establishments primarily engaged in selling lumber, or lumber and a general line of building materials, to the general public. While these establishments may also sell to contractors, they are known as retail in the trade, even if sales to contractors account for a higher proportion of the sales. The lumber they sell may include rough and dressed lumber, flooring, molding, doors, sashes, frames, and other millwork. The building materials may include roofing, siding, shingles, wallboard, paint, brick, tile, cement, sand, gravel, and other building materials and supplies. For lumber yards, at least 32 percent of sales must be from the sale of lumber and millwork. Hardware is often an important line of retail lumber and building materials dealers. Also included in this group are home centers. These are retail establishments that sell both lumber and building materials and hardware. Additionally, they must sell at least 5 of the following merchandise lines: housewares, tools (power and/or hand), floor coverings, electrical supplies, kitchen cabinets, plumbing and bath supplies, lawn and garden products, paints and/or sundries, windows and/or doors, roofing, wallcoverings, ceiling products and materials, lawn and garden supplies, and appliances. Establishments not selling to the general public or known in the trade as wholesale are classified in SIC 503.

Paint, glass, and wallpaper stores (SIC 523). Establishments primarily engaged in selling paint, glass, and wallpaper, or any combination of these lines, to the general public. While these establishments may also sell to contractors, they are known as retail in the trade, even if sales to contractors account for a higher proportion of the sales. Establishments which do not sell to the general public are classified in wholesale trade.

Hardware stores (SIC 525). Establishments primarily engaged in selling a number of basic hardware lines, such as tools, builders' hardware, locks and other security hardware, paint and glass, housewares, household appliances, cutlery, and building materials, no one of which accounts for 50 percent or more of the sales of the establishments.

Retail nurseries, lawn and garden supply stores (SIC 526). Establishments primarily engaged in selling trees, shrubs, other plants, seeds, bulbs, mulches, soil conditioners, fertilizers, pesticides, garden tools, and other garden supplies to the general public. These establishments primarily sell products purchased from others, but

may sell some plants which they grow themselves. Establishments primarily engaged in growing trees, shrubs, other plants, seeds, and bulbs are classified in SIC major group 01, and those growing Christmas trees are classified in SIC major group 08.

Manufactured (mobile) home dealers (SIC 527). Establishments primarily engaged in the retail sale of new and used mobile homes, parts and equipment. Establishments primarily selling travel trailers and campers are classified in SIC 5561 and those primarily selling utility trailers are classified in SIC 5599.

General Merchandise Stores (SIC Major Group 53)

This major group includes retail stores which sell a number of lines of merchandise, such as dry goods, apparel and accessories, furniture and homefurnishings, small wares, hardware, and food. The stores included in this group are known as department stores, variety stores, general merchandise stores, catalog showrooms, warehouse clubs, and general stores. Establishments primarily engaged in selling used general merchandise are classified in SIC 593, and those selling general merchandise by mail, vending machine, or direct selling are classified in SIC 596.

Department stores (SIC 531). Retail stores normally having 50 employees or more, having sales of apparel and soft goods combined amounting to 20 percent or more of total sales, and selling each of the following groups of merchandise:

1. Household linens, dry goods, furniture, homefurnishings, appliances, and radio and TV sets
2. A general line of apparel for the family

The employment and lines of merchandise sold in leased departments are both taken into account when classifying a department store.

To qualify as a department store, sales of each of the lines listed above must be less than 80 percent of total store sales. An establishment with total sales of $10 million or more is classified as a department store even if sales of one of the merchandise lines listed above exceed the maximum percent of total sales, provided that the sales of the other group is $1 million or more. Relatively few stores are included in this classification as a result of this special rule and most of those which are would otherwise have been classified in the apparel group (SIC major group 56).

Due to the relatively high level of leased department activity in department stores, department store sales have been separately presented for the following classifications:

Department stores (including leased depts.)

Department stores (excluding leased depts.)

For States and for areas with 10,000 retail establishments or more, the following subcategories of department stores also are presented:

Conventional department stores (SIC 531 pt.). Establishments which satisfy the criteria of a department store (see above) and:

1. Usually provide check-out service and customer assistance (sales persons) within each department
2. May have a catalog order service
3. Are not affiliated with a company which operates similar establishments on a national basis

These stores often sell:

1. Soft goods and hard goods which are primarily nationally advertised brands
2. Appliances which are serviced by another company
3. Limited lines of merchandise through seasonal or special catalogs

Discount or mass merchandising department stores (SIC 531 pt.). Establishments which satisfy the criteria of a department store (see above) and usually:

1. Convey the image of a high-volume, fast turnover outlet selling a variety of merchandise for less than conventional prices
2. Provide centralized check-out service
3. Sell merchandise through self-service with minimal customer assistance provided in any department
4. Do not have a catalog order service

These stores often sell:

1. Soft goods which are usually their own corporate brands or are unbranded
2. Hard goods which are primarily nationally advertised brands
3. Appliances which are serviced by another company

National chain department stores (SIC 531 pt.). Establishments which satisfy the criteria of a department store (see above) and:

1. Usually provide check-out service and customer assistance (sales persons) within each department
2. Usually have a catalog order service
3. Are affiliated with a company which operates similar establishments on a national basis

These stores often sell:

1. Soft goods and hard goods which are their own corporate brands or are unbranded

2. Appliances which are serviced by their own company

Variety stores (SIC 533). Establishments primarily engaged in the retail sale of a variety of merchandise in the low and popular price ranges. Sales usually are made on a cash-and-carry basis, with the open selling method of display and customer selection of merchandise. These stores generally do not carry a complete line of merchandise, are not departmentalized, do not carry their own charge service, and do not deliver merchandise.

Miscellaneous general merchandise stores (SIC 539). Establishments primarily engaged in the retail sale of a general line of apparel, dry goods, hardware, housewares or homefurnishings, groceries, and other lines in limited amounts. Stores selling commodities covered in the definition for department stores but normally having less than 50 employees, and stores usually known as country or general stores are included here. Also included are most catalog showrooms. Establishments primarily engaged in the retail sales of merchandise by catalog, mail, or television order are classified in SIC 5961.

Warehouse clubs (SIC 539 pt.). Establishments primarily engaged in the retail sale of general lines of merchandise such as groceries; automotive tires, batteries, parts, and accessories; audio and video equipment; household appliances; office equipment and supplies; apparel; and books through warehouse-based operations. These establishments are sometimes known as membership warehouse clubs.

Catalog showrooms (SIC 539 pt.). Establishments primarily engaged in the retail sale of general lines of merchandise such as homefurnishings, housewares, jewelry, radios, televisions, stereo equipment, and sporting goods. Inventory is stored at the location but not usually on display. Customers order using a catalog and wait while the merchandise is being delivered from the stock room.

Other miscellaneous general merchandise stores (SIC 539 pt.). Establishments primarily engaged in the retail sale of several lines of merchandise such as piece goods, men's and women's apparel and accessories, dry goods, hardware, housewares, homefurnishings, and other lines in limited amounts. Included in this industry are stores selling commodities covered in the definition for industry 5311, but normally having less than 50 employees. Also included are stores known as country general stores.

Food Stores (SIC Major Group 54)

This major group includes retail stores primarily engaged in selling food for home preparation and consumption. Establishments primarily engaged in selling prepared foods and drinks for consumption on the premises are classified in major group 58, and stores primarily engaged in selling packaged beers and liquors are classified in SIC 5921.

Grocery stores (SIC 541). Establishments primarily selling (1) a wide variety of canned or frozen foods such as vegetables, fruits, and soups; (2) packaged or bulk dry groceries such as tea, coffee, cocoa, dried fruits, spices, sugar, flour, and crackers, and (3) other processed foods and nonedible grocery items. These establishments often sell smoked and prepared meats, fresh fish and poultry, fresh vegetables and fruits, and fresh or frozen meats.

Supermarkets and other general-line grocery stores (SIC 541 pt.). Establishments commonly known as supermarkets, food stores, grocery stores, and food warehouses primarily engaged in the retail sale of a wide variety of grocery store merchandise. Customers normally make large, volume purchases from these stores.

Convenience food stores (SIC 541 pt.). Establishments primarily engaged in the retail sale of a medium variety of canned goods, dairy products, pre-packaged meats, and other grocery items in limited amounts. They also may sell newspapers, magazines, refreshment items, cigarettes, beer, wine, and novelties. Customers normally utilize a convenience store to purchase a few items, whereas grocery stores are utilized for large, volume purchases. Convenience stores normally have a maximum of two check-out counters; less than 2,500 square feet of total under-roof floor space; a small, private parking lot; and hours of operation which normally extend beyond those of traditional grocery stores. Establishments primarily selling convenience store items but also selling gasoline are classified in kind of business 541130.

Convenience food/ gasoline stores (SIC 541 pt.). These are establishments that satisfy the criteria of a convenience food store and also sell gasoline; however, gasoline sales may not exceed 49 percent of total sales. Establishments selling convenience store items but primarily selling gasoline are classified in kind of business 554130.

Delicatessens (SIC 541 pt.). Establishments primarily engaged in the retail sale of cold cuts, oven-roasted meats, bread, and other grocery items. They often prepare sandwiches for carry-out and party platters, and may prepare gourmet platters for take-home consumption.

Meat and fish (seafood) markets (SIC 542). Establishments primarily engaged in the retail sale of fresh, frozen or cured meats, fish, shellfish, and other seafoods. They

may also sell poultry, dairy products, eggs, and other commodities. Meat markets may butcher animals on their own account, or they may buy from others. This industry includes freezer and locker meat provisioners. Food locker plants primarily engaged in renting locker space for the storage of food products for individual households are classified in industry 4222. Establishments primarily engaged in the retail sale of food via frozen food plans delivered to households or individuals are classified in SIC 5963, and establishments primarily engaged in the retail sale of poultry are classified in SIC 549.

Fruit and vegetable markets (SIC 543). Establishments primarily selling fresh fruits and fresh vegetables. They frequently also carry a limited line of grocery items. They are often found in public or municipal markets, or roadside stands. However, roadside stands of farmers selling only their own produce are classified in SIC major group 01.

Candy, nut, and confectionery stores (SIC 544). Establishments primarily engaged in selling nuts, popcorn, boxed or bulk candy and other confections such as candied fruits, and chewing gum. Ice cream, frozen yogurt, and soft drinks are often sold in these stores. Candy or confectionery stores making their own products, and candy and popcorn stands in theaters are classified here.

Dairy products stores (SIC 545). Establishments primarily engaged in the retail sale of packaged dairy products such as milk, cream, butter, cheese, and related products to over-the-counter customers. Ice cream and frozen yogurt stands are classified in SIC 5812 and establishments selling ice cream and similar products from trucks or wagons are classified in SIC 5963. Establishments primarily engaged in processing and distributing milk and cream are classified in SIC 2026.

Retail bakeries (SIC 546). Establishments primarily engaged in the retail sale of bakery products. The products may be purchased from others or made on the premises. Establishments manufacturing bakery products for the trade are classified in SIC 2051 and those purchasing bakery products and selling them house to house are classified in SIC 5963.

Retail bakeries—baking and selling (SIC 546 pt.). Establishments selling, over the counter, bakery products such as breads, rolls, cakes, cookies, and pies at least part of which are baked on the premises.

Retail bakeries—selling only (SIC 546 pt.). Establishments primarily engaged in the retail sale of bakery products such as breads, cakes, and pies none of which are produced on the premises.

Miscellaneous food stores (SIC 549). Establishments primarily engaged in the retail sale of specialized foods, not elsewhere classified, such as eggs, poultry, health foods, vitamins, spices, herbs, coffee, and tea. The poultry stores may sell live poultry, slaughter and clean poultry for their own account, and sell dressed fowls or sell fowls cleaned and dressed by others.

Automotive Dealers and Gasoline Service Stations (SIC Major Group 55)

This major group includes retail dealers selling new and used automobiles, boats, recreational vehicles and utility trailers, and motorcycles and mopeds; dealers selling new automobile parts and accessories; and gasoline service stations selling gasoline and lubricating oils. Automobile repair shops maintained by establishments engaged in the sale of new automobiles also are included unless reported separately.

New and used car dealers (SIC 551). Establishments primarily engaged in the sale of new automobiles or new and used automobiles. These establishments have a franchise for the sale of new domestic and/ or new imported automobiles. They frequently maintain repair departments and carry stocks of replacement parts, tires, batteries, and automotive accessories. These establishments also frequently sell pickups and vans at retail.

Used car dealers (SIC 552). Establishments primarily engaged in selling used cars and not holding a franchise for the sale of new passenger cars. Some of these dealers may sell a small quantity of trucks and farm equipment. Some maintain repair and service departments. These establishments also frequently sell used pickups and vans at retail.

Auto and home supply stores (SIC 553). Establishments primarily engaged in the retail sale of auto supplies such as automotive batteries, parts, accessories; and sundry supplies such as polishes, paint, and decorative items. Establishments where used tires, batteries, and accessories exceed 49 percent of total sales are classified in SIC 501.

Auto parts, tires, and accessories stores (SIC 553 pt.). Establishments primarily engaged in the retail sale of new automotive tires and tubes. These establishments frequently have facilities for tire recapping and vulcanizing. These establishments also sell auto supplies such as automotive batteries, parts, and accessories. Establishments engaged in producing and installing custom-made seat covers for household users are included here.

Home and auto supply stores (SIC 553 pt.). Establishments primarily engaged in selling a combination of lines such as tires, batteries and accessories; household appliances; sporting goods; housewares and hardware. These differ from tire, battery, and accessory stores in that, although the largest merchandise line sales may be in automotive parts, accessories, and repairs, a considerable amount of sales also are made in nonautomotive lines.

Gasoline service stations (SIC 554). Establishments primarily engaged in selling gasoline and automotive lubricants. These establishments frequently sell other merchandise such as tires, batteries, accessories, and other automobile parts or perform minor repair work. Establishments called garages but deriving more than half of their receipts from the sale of gasoline and automotive lubricants are included. Gasoline stations combined with other activities such as grocery stores, convenience stores, or car washes are classified based on primary activities as determined by sales.

Gasoline/ convenience food stores (SIC 554 pt.). Establishments primarily engaged in the retail sale of gasoline and automotive lubricants and also sell a line of convenience store items such as milk, eggs, bread, beer, pet food, detergents, etc. Establishments selling gasoline and lubricants but primarily selling convenience food items are classified in SIC 541.

Other gasoline service stations and truck stops (SIC 554 pt.). Establishments primarily engaged in selling gasoline and automotive lubricants. These establishments usually sell tires, batteries, and accessories and perform related services. They also may do minor repair work. Truck stops primarily sell diesel fuel to truckers. They also may sell gasoline and lubricants, provide repair services, and operate a restaurant or motel as part of the truck stop establishment. They normally are open on a 24-hour per day basis.

Boat dealers (SIC 555). Establishments primarily engaged in the retail sale of new and used motorboats and other watercraft including parts, accessories, marine supplies, and outboard motors.

Recreational vehicle dealers (SIC 556). Establishments primarily engaged in the retail sale of new and used motor homes, recreational trailers, and campers (pickup coaches) including parts and accessories. Establishments primarily engaged in the retail sale of manufactured (mobile) homes are classified in SIC 527, and those primarily selling utility trailers are classified in SIC 559.

Motorcycle dealers (SIC 557). Establishments primarily engaged in the retail sale of new and used motorcycles, including motor scooters, mopeds, all-terrain vehicles, and parts and accessories.

Automotive dealers, not elsewhere classified (SIC 559). Establishments primarily engaged in the retail sale of new and used automotive vehicles, utility trailers, and automotive equipment and supplies, not elsewhere classified, such as snowmobiles, dunebuggies, and go-carts. Also included are establishments primarily engaged in the retail sale of aircraft.

Apparel and Accessory Stores (SIC Major Group 56)

This major group includes retail stores primarily engaged in selling clothing of all kinds and related articles for personal wear and adornment. Not included are establishments which meet the criteria for Department Stores (SIC 531) or Miscellaneous General Merchandise Stores (SIC 539) even though most of their receipts are from the sale of apparel and apparel accessories.

Men's and boys' clothing and accessory stores (SIC 561). Establishments primarily engaged in selling men's and boys' ready-to-wear clothing and accessories. Establishments are included in this category if (1) sales of all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of total sales and (2) receipts from sales of all men's and boys' apparel are three or more times the receipts from sales of all women's and girls' apparel.

Women's clothing stores (SIC 562). Establishments primarily engaged in selling women's and girls' ready-to-wear apparel. Establishments are included in this category if (1) sales of all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of total sales, (2) sales of all women's and girls' apparel are three or more times the sales of all men's and boys' apparel, and (3) sales of dresses, skirts, slacks, coats, suits, and furs are two or more times greater than the sales of millinery, hosiery, underwear, blouses, handbags, and other apparel and accessories. Custom tailors primarily engaged in making women's clothing to individual order are classified in SIC 569.

Women's accessory and specialty stores (SIC 563). Establishments primarily engaged in selling women's accessories and specialties such as millinery, hats, foundation garments, lingerie, hosiery, costume jewelry, gloves, handbags, and fur including custom-made.

Children's and infants' wear stores (SIC 564). Establishments primarily engaged in the retail sale of children's and infants' clothing, furnishings, and accessories. They may specialize in either children's or infants' wear or sell a combination of children's and infants' wear.

Family clothing stores (SIC 565). Establishments primarily engaged in selling clothing, furnishings, and accessories for men, women, and children, without specializing in sales for an individual sex or age group. Establishments are included in this category if (1) sales of all types of apparel (except as noted in the definition for general merchandise stores) account for 50 percent or more of their total sales, and (2) sales of apparel items for an individual sex or age group are not more than three times the sales of all other apparel items.

Men's shoe stores (SIC 566 pt.). Establishments primarily engaged in selling men's and boys' shoes and other footwear. Establishments selling women's and girls' and/ or children's and infants' footwear are included in this classification, if sales of men's and boys' footwear are more than three times the combined sales of women's, girls', children's, and infants' footwear.

Women's shoe stores (SIC 566 pt.). Establishments primarily engaged in selling women's and girls' shoes and other footwear. Establishments selling men's and boys' and/ or children's and infants' footwear are included in this classification, if sales of women's and girls' footwear are more than three times the combined sales of men's, boys', children's, and infants' footwear.

Children's and juveniles' shoe stores (SIC 566 pt.). Establishments primarily engaged in selling children's and infants' shoes and other footwear. Establishments selling men's, boys', and/ or women's and girls' footwear are included in this classification, if sales of children's and infants' footwear are more than three times the combined sales of men's, boys', women's, and girls' footwear.

Family shoe stores (SIC 566 pt.). Establishments primarily engaged in selling both men's and women's shoes and other footwear; they may or may not sell children's shoes. Frequently, they also sell accessories such as hosiery, gloves, and handbags. Establishments are included in this classification, if sales of any one of the three major groupings (men's and boys' footwear, women's and girls' footwear, and children's and infants' footwear) are not more than three times the sales of the other two groups combined.

Athletic footwear stores (SIC 566 pt.). Establishments primarily engaged in selling athletic shoes for activities such as tennis, jogging, baseball, softball, basketball, boxing, racquetball, football, volleyball, etc. These establishments may also sell athletic apparel.

Miscellaneous apparel and accessory stores (SIC 569). Establishments primarily engaged in the retail sale of specialized lines of apparel and accessories, not elsewhere classified, such as uniforms, bathing suits, raincoats, riding apparel, sports apparel, umbrellas, wigs, and toupees. This industry also includes custom tailors primarily engaged in making and selling men's and women's clothing, except fur apparel. Establishments primarily engaged in making fur apparel to custom order are classified in SIC 563.

Furniture and Homefurnishings Stores (SIC Major Group 57)

This major group includes retail stores selling goods used for furnishing the home such as furniture, floor coverings, draperies, glass and chinaware, domestic stoves, refrigerators, and other household electric and gas appliances. Establishments selling electric and gas appliances are included in this group only if the major part of their sales consists of articles for home use. These stores also may perform repair work on household appliances, radios, televisions, and stereo equipment; but establishments primarily engaged in repair of these products are classified in SIC 76. Dealers primarily engaged in selling antique and secondhand furniture are classified in SIC 5932. Stores furnishing interior decorating service are classified according to the merchandise handled. Stores primarily engaged in selling furnishings in conjunction with an interior decorator service are classified according to the merchandise handled; if the interior designer primarily advises clients on selection of merchandise, the establishment is classified in SIC 7389.

Furniture stores (SIC 5712). Establishments primarily engaged in selling new household furniture, beds, mattresses, springs, and other sleep equipment. Also included in this classification are establishments selling household appliances, phonographs, radios, television sets, and floor coverings, provided the receipts from sales of furniture and sleep equipment exceed those from sales of other merchandise. Furniture warehouse showrooms, sleep shops and waterbed stores, and specialty furniture stores such as baby furniture stores, are classified here. If sales of new office furniture account for more than half of the total sales, the establishments are classified in SIC 502120.

Floor covering stores (SIC 5713). Establishments primarily engaged in the retail sale of rugs, carpets, linoleum, floor tile, and related products. Stores selling ceramic (wall or floor) tile are classified in SIC 521130. Establishments included in this industry may incidentally perform installation but contractors primarily engaged in installing floor coverings for others are classified in SIC 1743 or 1752.

Drapery, curtain, and upholstery stores (SIC 5714). Establishments primarily engaged in selling draperies, curtains, slipcovers, and upholstery materials. Establishments primarily selling custom-made draperies and slipcovers for household use also are included. Establishments primarily engaged in reupholstering or repairing furniture are classified in SIC 7641.

Miscellaneous homefurnishings stores (SIC 5719). Establishments primarily engaged in the retail sale of miscellaneous homefurnishings such as china, glassware, and metalware for kitchen and table use; bedding and linen; brooms and brushes; lamps and shades; mirrors and pictures; and venetian blinds and window shades. Establishments primarily engaged in the retail sale of miscellaneous homefurnishings by house-to-house canvass or by party-plan merchandising are classified in SIC 5963.

Household appliance stores (SIC 572). Establishments primarily engaged in the retail sale of electric and gas refrigerators, stoves, microwave ovens, home freezers, and other household appliances such as electric irons, percolators, hot plates, vacuum cleaners, sewing machines, dehumidifiers, and self contained room air-conditioners. Many such stores also sell radios and television sets.

Radio, television, and electronics stores (SIC 5731). Establishments primarily engaged in the retail sale of radios, television sets, compact disc players, record players, high fidelity (hi-fi) sound reproducing equipment, and

other consumer electronics equipment. Such establishments also may sell additional lines such as household appliances, computers, computer peripheral equipment, software, musical instruments, and records. Establishments in this industry may perform incidental installation and repair work on radios, televisions, and other consumer electronics equipment. Establishments primarily engaged in the installation and repair of these products are classified in SIC 7622.

Computer and software stores (SIC 5734). Establishments primarily engaged in the retail sale of computers, computer peripheral equipment, and software.

Record and prerecorded tape stores (SIC 5735). Establishments primarily engaged in selling phonograph records, compact discs, and prerecorded audio and video tapes and discs. Establishments primarily engaged in the retail sale of computer software are classified in SIC 5734 and those primarily engaged in the rental of video tapes in SIC 7841.

Musical instrument stores (SIC 5736). Establishments primarily engaged in selling musical instruments such as organs, pianos, horns, stringed instruments, and percussion instruments; sheet music; and similar supplies.

Eating and Drinking Places (SIC Major Group 58)

This major group includes retail establishments engaged in selling prepared foods and drinks for consumption on the premises. Also included are caterers which serve prepared food other than at the place of business and lunch counters and refreshment stands selling prepared foods and drinks for immediate consumption. In-plant food contractors are included here as well as leased eating and drinking concessions in hotels, motels, sports arenas, and other amusement places.

Restaurants (SIC 5812 pt.). Establishments primarily engaged in serving prepared food and beverages. Included here are only those establishments in which waiters/ waitresses take orders from patrons while the patrons are seated at a counter, booth, or table. They often serve alcoholic beverages. Establishments in which sales of alcoholic beverages for consumption on the premises exceed sales of prepared food and nonalcoholic beverages are classified in Drinking Places (SIC 5813).

Cafeterias (SIC 5812 pt.). Establishments engaged in serving a wide variety of prepared food and beverages primarily through the use of a cafeteria line where customers make selections from displayed items. Some limited waiter/ waitress service may be provided. Table and/ or booth seating facilities are usually provided.

Refreshment places (SIC 5812 pt.). Establishments primarily engaged in selling limited lines of refreshments and prepared food. Included in this group are establishments which prepare items such as chicken and hamburgers for consumption either on or near the premises or for ''take-home'' consumption. Such establishments do not have waiter/ waitress service where the patron's order is taken while the patron is seated at a table, booth, or counter.

Other eating places (SIC 5812 pt.). This includes social caterers, contract feeding and ice cream and frozen yogurt shops.

Drinking places (SIC 5813). Establishments primarily engaged in the retail sale of alcoholic drinks such as beer, ale, wine, and liquor for consumption on the premises. The sale of food frequently accounts for a substantial portion of the receipts of these establishments. Meals may or may not be served.

Miscellaneous Retail Stores (SIC Major Group 59)

This major group includes retail establishments not elsewhere classified. These establishments fall into the following categories: drug stores and proprietary stores; liquor stores; used merchandise stores; miscellaneous shopping goods stores; nonstore retailers, fuel dealers, florists, cigar stores and stands, news dealers and newsstands, and miscellaneous retail stores not elsewhere classified.

Drug stores (SIC 591 pt.). Establishments primarily engaged in the retail sale of prescription drugs. They may carry a number of related lines such as cosmetics, toiletries, tobacco, and novelty merchandise and may operate a soda fountain or lunch counter. Some of these stores sell small electrical appliances, window fans, dishes, lawn chairs, and similar products. Drug stores are classified here if any prescriptions are sold or if there is an indication that a pharmacist is employed. These stores are classified on the basis of their usual trade designation rather than on the stricter interpretation of commodities handled.

Proprietary stores (SIC 591 pt.). Establishments generally selling the same merchandise as drug stores, except that prescriptions are not filled and sold.

Liquor stores (SIC 592). Establishments primarily engaged in selling packaged alcoholic beverages such as ale, beer, wine, and liquor for consumption off the premises. Liquor stores operated by States, counties, and municipalities are included.

Used merchandise stores (SIC 593). This industry includes stores primarily engaged in the retail sale of used merchandise, antiques, and secondhand goods such as clothing and shoes; furniture; books and rare manuscripts; musical instruments; office furniture; phonographs and phonograph records; and store fixtures and equipment. The industry also includes pawnshops. Dealers primarily engaged

in selling used motor vehicles, trailers, and boats are classified in major group 55; and those primarily selling used mobile homes in SIC 5271. Establishments primarily selling used automobile parts and accessories are classified in SIC 5015 and scrap and waste dealers are classified in SIC 5093. Establishments primarily engaged in automobile repair are classified in SIC 753.

General-line sporting goods stores (SIC 5941 pt.). Establishments primarily engaged in selling a general line of sporting goods and equipment for hunting, camping, fishing, skiing, riding, tennis, golf, and other sports; and gymnasium and playground equipment.

Specialty-line sporting goods stores (SIC 5941 pt.). Establishments specializing in a maximum of four lines of sporting goods and equipment such as guns, bicycles, trophies, skiing, golfing, bowling, and billiards equipment. These stores may also sell parts and/ or accessories for the specialized line and often rent and/ or repair the line they sell. Sales of motorcycles and motor scooters (including mopeds) are classified in SIC 5571. Establishments primarily engaged in the retail sale of athletic footwear are classified in SIC 5661.

Book stores (SIC 5942). Establishments primarily engaged in selling new books and periodicals. Stationery and related items may also be sold. The subclassifications are general, specialty, and college book stores. Book clubs (not engaged in publishing) primarily selling new books through the mail are included in mail-order houses (SIC 5961). Establishments primarily engaged in the sale of used books are classified in SIC 593.

Stationery stores (SIC 5943). Establishments primarily engaged in the retail sale of stationery such as paper and paper products (including printing and engraving), post cards, novelties, and school supplies. These establishments also may sell additional lines of office type supplies such as accounting and legal forms, blankbooks and forms, and office forms and supplies. Establishments primarily engaged in selling office supply forms and supplies are classified in SIC 5112. Stores specializing in the sale of artists' supplies are classified in SIC 5999.

Jewelry stores (SIC 5944). Establishments primarily engaged in the retail sale of any combination of the lines of jewelry such as diamonds and other precious stones; rings, bracelets, and brooches; sterling and plated silverware; and watches and clocks. Stores primarily engaged in watch and jewelry repair are classified in SIC 7631. Establishments primarily engaged in selling costume jewelry are classified in kind of business 563210.

Hobby, toy, and game shops (SIC 5945). Establishments primarily engaged in the retail sale of toys, games, and hobby and craft kits and supplies. Establishments primarily engaged in selling artists' supplies or collectors' items such as coins, stamps, and autographs are classified in SIC 5999.

Camera and photographic supply stores (SIC 5946). Establishments primarily engaged in the retail sale of cameras, film, and other photographic supplies and equipment. Establishments primarily engaged in the retail sale of video cameras are classified in SIC 5731. Establishments primarily engaged in finishing films are classified in SIC 7384.

Gift, novelty, and souvenir shops (SIC 5947). Establishments primarily engaged in the retail sale of combined lines of gifts and novelty merchandise, souvenirs, greeting cards, holiday decorations, and miscellaneous small art goods.

Luggage and leather goods stores (SIC 5948). Establishments primarily engaged in the retail sale of luggage, trunks, and leather goods, except apparel.

Sewing, needlework, and piece goods stores (SIC 5949). Establishments primarily engaged in the retail sale of sewing supplies, fabrics, patterns, yarn, and other needlework accessories.

Catalog and mail-order houses (SIC 5961). Establishments primarily selling merchandise as a result of orders received by catalog, mail, or television order. Customers are made aware of goods available for sale through catalogs, mailing pieces, advertisements in newspapers and magazines, advertising on radio and television, and by operating catalog stores that carry little stock other than display items. They receive their orders by phone or mail and fill most of their orders by mail. These establishments do not ordinarily maintain stock for sale on the premises. Departmentalized retail stores normally with 50 employees or more and operated by mail-order houses and selling a general line of merchandise are classified in SIC 531. Retail stores normally with less than 50 employees and operated by mail-order houses and selling a general line of merchandise are classified in SIC 539. Establishments primarily engaged in mail-order sales of computer hardware and/ or software and television order (home shopping) sales are included within the classification.

Automatic merchandising machine operators (SIC 5962). Establishments primarily engaged in the retail sale of products by automatic merchandising units (vending machines) which are generally located on the premises of other businesses. This industry does not include coin-operated service machines such as washers and dryers (SIC 7215), music machines and amusement game machines (SIC 7993), lockers and scales (SIC 7299), or insurance policies sold through vending machines (SIC 63). The "establishment" is the location from which the vending route (or routes) is serviced, not the number of vending machines or the number of business locations in which vending machines are located.

Direct selling establishments (SIC 5963). Establishments primarily engaged in selling merchandise by house-to-house canvass, by party plan, by telephone, or from

trucks or wagons or other temporary locations. The ''establishment'' is the location from which the canvassers operate. Canvassers who do not have any paid help are excluded from the tabulations in this report. In some tabulations at the national level, direct selling organizations are divided into subclassifications on the basis of the merchandise they sell. The subclassifications are furniture, homefurnishings, and equipment; mobile food service; books and stationery; and other direct selling.

Fuel oil dealers (SIC 5983). Establishments primarily engaged in the retail sale of fuel oil. Establishments primarily selling fuel oil burners are classified in SIC 5074; dealers primarily engaged in installing and servicing fuel oil burners, in SIC 1711; and fuel oil burner repair service only, in SIC 7699.

Liquefied petroleum gas (bottled gas) dealers (SIC 5984). Establishments primarily engaged in the retail sale of bottled or bulk liquefied petroleum (LP) gas.

Fuel dealers, not elsewhere classified (SIC 5989). Establishments primarily engaged in the retail sale of coal, coke, charcoal, wood, or any combination of these lines. Establishments primarily selling fuel oil are classified in SIC 5983 and those primarily selling bottled gas in SIC 5984.

Florists (SIC 5992). Establishments primarily engaged in the retail sale of cut flowers and growing plants. Stores primarily engaged in the retail sale of seeds, bulbs, and nursery stock are classified in SIC 5261, and greenhouses and nurseries primarily engaged in growing seeds, bulbs, flowers, and nursery stock are classified in SIC 0181.

Tobacco stores and stands (SIC 5993). Establishments primarily engaged in the retail sale of cigarettes, cigars, tobacco, and smokers' supplies. Many of the establishments included in this classification are operated as concessions in places of amusement, railway stations, airports, and other public places.

News dealers and newsstands (SIC 5994). Establishments primarily engaged in the retail sale of newspapers, magazines, and other periodicals. Home delivery of newspapers by other than printers or publishers is classified in SIC 5963. Establishments engaged in delivering newspapers for subsequent home delivery are classified in SIC 4212.

Optical goods stores (SIC 5995). Establishments primarily engaged in the retail sale of prescription eyeglasses and contact lenses for individuals. Offices of oculists, ophthalmologists and optometrists are classified in major group 80 even though a majority of their revenue is from the sale of eyeglass frames or prescription eyeglasses and contact lenses.

Miscellaneous retail stores, not elsewhere classified (SIC 5999). Establishments primarily engaged in the retail sale of specialized lines of merchandise, not elsewhere classified. This industry also includes establishments primarily engaged in selling a general line of their own or consigned merchandise at retail or at auction. Establishments primarily engaged in auctioning tangible personal property of others on a fee basis are classified in SIC 7389.

Pet shops (SIC 5999 pt.). These are retail stores selling pets such as dogs, cats, birds, rabbits, and tropical fish; pet foods and remedies. Aquariums, cages, pet toys, and aquatic plants are often sold in these types of stores. Many of these shops board pets on the premises. If receipts from the boarding of pets account for more than 49 percent of total receipts, the establishments are classified in Agriculture, Industry 075200 6.

Art dealers (SIC 5999 pt.). These are retail establishments primarily engaged in the retail sale of art goods, including original oil paintings, sculptures, glassware items and ceramics, at retail or at auction. Establishments primarily selling supplies for making ceramic items are classified in kind of business 594520. Establishments primarily selling artists' supplies are classified in kind of business 599990. Establishments primarily selling art reproductions are classified in Industry 571900.

Other miscellaneous retail stores, not elsewhere classified (SIC 5999 pt.). These are retail stores, not elsewhere classified, which sell specialized lines such as artists' supplies, above-ground swimming pools and supplies, orthopedic and artificial limbs, drafting materials, hearing aids, furniture polish, rubber stamps, monuments and tombstones, sanitary supplies (including disinfectants), seasonal decorations, artificial flowers and plants, fireworks, etc. Religious goods stores are classified here.

106	Bakery products not baked on the premises (except frozen)	5400, 5504
107	Delicatessen items (including service delicatessen items only; prepared sandwiches are included within line 120)	5400
108	Bottled, canned, and packaged soft drinks	5400, 5504, 5901, 5902
109	Candy	5400, 5504, 5913
111	All other foods (including dry groceries, canned and bottled foods, and other food items not covered by lines 101 through 109)	5400
112	All other foods (dry groceries; canned, frozen, and bottled foods; produce, etc.). Includes items not covered by lines 104, 106, 108, or 109)	5504
113	All other foods (dry groceries, canned and bottled foods, candy, bakery products, etc.). Includes items not covered by line 108	5901, 5902
114	All other foods (including dry groceries, canned and bottled foods, etc.; fruit and gourmet food baskets are included within line 877). Includes items not covered by 109	5913
	MEALS AND SNACKS	
120	Meals, snacks, sandwiches, and nonalcoholic beverages generally served for immediate consumption (including sales from soup and salad bars, party platters, and hand-dipped ice cream)	All forms
121	Food/ nonalcoholic beverages prepared for carry-out and consumption off the premises	5801, 5802
122	Food/ nonalcoholic beverages prepared for consumption on the premises	5801, 5802
123	Soup and salad bars	5400
124	All other meals and snacks	5400
	ALCOHOLIC DRINKS	
130	Alcoholic drinks (served at this establishment)	All forms
131	Distilled spirits	5801
132	Wine	5801
133	Beer and ale	5801
	PACKAGED ALCOHOLIC BEVERAGES	
140	Packaged liquor, wine, and beer	All forms
141	Distilled spirits (including liquor, brandy, and liqueurs)	5400, 5902
142	Wine	5400, 5902
143	Beer and ale	5400, 5902
	CIGARS, CIGARETTES, AND TOBACCO	
150	Cigars, cigarettes, tobacco, and smokers' accessories (excluding sales from vending machines operated by others)	All forms
	DRUGS, HEALTH AIDS, AND BEAUTY AIDS	
160	Drugs, health aids, and beauty aids (including cosmetics)	All forms
161	Prescriptions (included here only if pharmacist engaged)	5301, 5400, 5901, 5911
162	Nonprescription medicines	5301, 5400, 5901, 5911
163	Vitamins, minerals, and other dietary supplements	5301, 5400, 5901, 5911
164	Health aids (including first-aid products, foot products, prescription accessories, and convalescent aids; first-aid and footcare nonprescription medicines are included within line 162)	5301, 5400, 5901, 5911
165	Cosmetics (including face creams, make-up, perfumes and colognes, etc.)	5301, 5400, 5901, 5911, 5916
166	Other hygiene needs (including deodorants; hair and shaving products; oral, feminine, and baby hygiene needs; hand products; etc.)	5301, 5400, 5901, 5911, 5916
167	Orthopedic equipment	5916
168	All other drugs and health and beauty aids (including prescription and nonprescription drugs, vitamins, first-aid and foot products, etc.). Includes items not covered by lines 165, 166, and 167	5916
	SOAPS, DETERGENTS, AND HOUSEHOLD CLEANERS	
180	Soaps, detergents, and household cleaners	All forms
	PAPER PRODUCTS	
190	Paper and related products (including paper towels, toilet tissue, wraps, bags, foils, etc.)	All forms
	MEN'S WEAR, EXCEPT FOOTWEAR	
200	Men's wear (boys' wear is included within line 240, and footwear within line 260)	All forms
201	Men's overcoats, topcoats, raincoats, and outer jackets	5301, 5601
202	Men's suits and formal wear	5301, 5601
203	Men's sport coats and blazers	5301, 5601
204	Men's tailored and dress slacks	5301, 5601
205	Men's casual slacks and jeans, walking shorts, etc.	5301, 5601
206	Men's career and work uniforms	5301, 5601

Publication Program

1992 CENSUS OF RETAIL TRADE

Publications of the 1992 Census of Retail Trade, containing data on retail establishments in the United States, are described below. Publications order forms for specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, DC 20233. The first results were issued in press releases. Final detailed statistics are issued in separate paperbound reports and compact disc-read only memory (CD-ROM).

Final Reports

Geographic area series—52 reports (RC92-A-1 to -52)

A separate paperbound report containing data for establishments with payroll is published for each State, the District of Columbia, and the United States. Each report presents general statistics for establishments with payroll, on number of establishments, sales, payroll, and employment by varied retail classifications. All statistics are presented for the State, metropolitan areas (MA's), counties, and places with 2,500 inhabitants or more. Greater kind-of-business detail is shown for larger areas. For each State, the District of Columbia, and the United States, 1992 data are provided by kind of business on sales and employees per establishment and sales and payroll per employee. Comparative statistics showing percent changes in sales and payroll between 1987 and 1992 are shown by kind of business.

Nonemployer statistics series—1 report (RC92-N-1)

This report includes number of establishments and sales by kind of business for all establishments, establishments with payroll, and establishments without payroll for the United States and States. Data on sales size of establishments without payroll and the number of proprietorships and partnerships is also provided for the United States. Also presented are statistics for establishments without payroll including number of establishments and sales by varied retail classifications for MA's. Similar data for counties and places with 2,500 inhabitants or more are available on electronic media only.

Subject series—4 reports (RC92-S-1 to -4)

The *Establishment and Firm Size* report (RC92-S-1) presents data for establishments with payroll, based on size of establishment, size of company or firm, and legal form of organization. Establishment statistics are presented by sales size and by employment size; statistics for firms by sales size (including concentration by largest firms), by employment size, and by number of establishments operated (single units and multiunits). Statistics are presented by kind of business on the number of establishments, sales, payroll, and employment for the United States.

The *Measures of Value Produced, Capital Expenditures, Depreciable Assets, and Operating Expenses* report (RC92-S-2) presents data on measures of value produced, capital expenditures, depreciable assets, and operating expenses for firms with payroll for the United States by major kinds of business. Operating expenses include annual payroll, supplemental labor costs, purchased services, etc. Receipts data also are provided.

The *Merchandise Line Sales* report (RC92-S-3) presents data on major categories of merchandise sold by retail kinds of business for each State and the District of Columbia, each MA, and the United States as a whole. Data for States and MA's will be available on electronic media only. Tables present data for establishments with payroll for each kind of business and show, for each merchandise line, the number of establishments handling the line and their sales of the line; the percentage of total sales of the kind of business accounted for by each of the lines carried; and, for establishments actually handling a specific line, the percentage of their total sales represented by sales of that line. Summary statistics also are provided for the 43 broad merchandise line categories, including counts of establishments and the amount and percentage of the line sold by various kinds of retail businesses.

The *Miscellaneous Subjects* report (RC92-S-4) contains special statistics on eating and drinking places, gasoline service stations, shoe stores, optical goods stores, and other miscellaneous subjects. Data are presented for the United States as a whole and, where feasible, for States and MA's.

Special report series—1 report (RC92-SP-1)

The *Selected Statistics* report presents selected data for establishments with and without payroll for 1992 and 1987 by kind of business. Data include number of establishments, sales, payroll and employment, and selected ratios and rankings. Data are presented for the United States as a whole and for States and MA's.

Electronic Media

All data included in the printed reports are available on compact disc-read only memory (CD-ROM). The CD-ROM's provide the same information found in the final reports as well as additional information not published in the final reports such as ZIP Code statistics available from series RC92-Z, merchandise line sales statistics for States and MA's from series RC92-S, and nonemployer data for counties and places from series RC92-N. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233.

OTHER ECONOMIC CENSUS REPORTS

Data on wholesale trade; service industries; transportation, communications, and utilities; financial, insurance, and real estate; construction industries; manufactures; mineral industries; enterprise statistics; minority-owned business enterprises; and women-owned businesses also are available from the 1992 Economic Census. A separate series of reports covers the census of outlying areas: Puerto Rico, Virgin Islands of the United States, Guam, and the Northern Marianas. Separate announcements describing these reports are available free of charge from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, DC 20233.

Acknowledgments

Many persons participated in the various activities of the 1992 Census of Retail Trade. The overall planning and review of the census operations were performed by the Economic Census Staff of the Economic Planning and Coordination Division.

This report was prepared in the Services Division. **Bobby E. Russell,** Assistant Chief for Census Programs, was responsible for the overall planning, management, and coordination of the census of retail trade. Planning and implementation were under the direction of **Fay Dorsett,** Chief, Retail Census Branch, with primary staff assistance by **Charles F. Brady, Pamela J. Palmer, Thomas G. Dassel, Jennifer E. Lins, Cheryl E. Merkle, Barbara T. Parlett, Maria P. Ray, Barbara A. Collier, Thomas E. Bell, Donna M. Cable, Venita L. Holland,** and **Judith O. Belt.**

Systems and procedures for mailout, receipt, correspondence, data input, industry classification, other clerical processing, administrative record processing, quality control, and the associated electronic computer programs were developed in the Economic Planning and Coordination Division.

Mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review were performed by the staff of the Data Preparation Division, **Judith N. Petty,** Chief.

Geographic coding procedures and associated computer programs were developed by the staff of the Geography Division.

The computer processing systems were developed and coordinated in the Economic Statistical Methods and Programming Division**, Charles P. Pautler, Jr.,** Chief. **Martin S. Harahush,** Assistant Chief for Quinquennial Censuses, was responsible for the design and implementation of the computer systems. The computer programs were prepared under the supervision of **William C. Wester,** Chief, Services Branch, assisted by **Josephine S. McLaughlin, Jeffrey S. Rosen, Tsung C. Chu, Linda Ludwigson, John Jeffrey Milner, Duc-Mong Nguyen, James Joseph Pratt,** and **Patricia H. Young.** Additional programming assistance was provided by **Robert S. Jewett.**

Computer processing was performed in the Computer Services Division, **Marvin D. Raines,** Chief.

The staff of the Administrative and Customer Services Division, **Walter C. Odom,** Chief, performed planning, design, composition, editorial review, and printing planning and procurement for publications and report forms. **Bernadette J. Gayle** provided publication coordination and editing.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

If you have any questions concerning the statistics in this report, call 301-457-2687.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/ output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-8300. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, finance, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Census of Retail Trade

GENERAL

The 1992 Census of Retail Trade, part of the 1992 Economic Census, covered retail trade as defined in the *Standard Industrial Classification Manual: 1987*[1] (SIC). It included all establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. The census excluded governmental organizations classified in the covered industries except for liquor stores operated by State and local governments. Data for direct sellers (SIC 5963) with no paid employees and post exchanges, ship stores, and similar establishments operated on military posts by agencies of the Federal Government were not included. The basic tabulations in this report do not include data for establishments which are auxiliary (primary function is providing a service, such as warehouses) to retail establishments within the same organization. Data for auxiliaries are presented in a subsequent report issued as part of the 1992 Enterprise Statistics reports.

For the 1992 Census of Retail Trade, large- and medium-size firms, plus all firms known to operate more than one establishment, were sent questionnaires to be completed and returned to the Census Bureau by mail. For most very small firms, including those with no paid employees, data from existing administrative records of other Federal agencies were used instead. These records provided basic information on location, kind of business, sales, payroll, number of employees, and legal form of organization. In addition, more detailed information for selected kinds of business was obtained on the various questionnaires.

Appendix A gives a more detailed explanation of census coverage and methodology.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind-of-business classification is not considered a disclosure; therefore, this information may be released even though other information is withheld.

GEOGRAPHIC AREAS COVERED

This report series presents data for the following areas:

1. The United States as a whole.
2. Each State and the District of Columbia.
3. Each consolidated metropolitan statistical area (CMSA) and primary metropolitan statistical area (PMSA) defined by the Office of Management and Budget (OMB) as of June 30, 1993. A CMSA is an area used to facilitate the presentation and analysis of data for large concentrations of metropolitan populations. It includes two or more contiguous PMSA's which have a population of at least 1,000,000[2] and which meet specific criteria of urban character and of social and economic integration.
4. Each metropolitan statistical area (MSA) defined by the OMB as of June 30, 1993. An MSA is an integrated economic and social unit with a population nucleus of at least 50,000 inhabitants.[2] Each MSA consists of one or more counties meeting standards of metropolitan character; in New England, cities and towns rather than counties are the component geographic units.

DOLLAR VALUES

All dollar values presented in this report are expressed in current dollars; i.e., 1992 data are expressed in 1992 dollars and 1987 data in 1987 dollars. Consequently, when making comparisons to prior years, users of the data should consider the inflation that has occurred.

RELIABILITY OF DATA

The data presented on various subjects included in this report are based, in part, upon a sample and, therefore, are subject to both sampling errors and nonsampling errors. Specifically, these data are estimated based on information obtained from census questionnaires mailed to all large employers and to a sample of small employers in the retail universe. Sampling errors effect these estimates

[1] *Standard Industrial Classification Manual: 1987.* For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

[2] According to the 1990 Census of Population or subsequent special census.

insofar as they may differ from a complete enumeration. Nonsampling errors can be attributed to many sources: inability to identify all cases in the actual universe; definition and classification difficulties; differences in the interpretation of questions; errors in recording or coding the data obtained; and other errors of collection, response, coverage, processing, and estimation for missing or misreported data.

The reliability df data estimates on the selected topics presented in this report is determined by the joint effects of sampling and nonsampling errors. No direct measurement of these effects has been obtained except for estimation for missing or misreported data; however, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors. Appendix A provides more detailed information on the sampling procedure (see Census Coverage and Methodology) and estimation procedure (see Treatment of Nonresponse) that apply to those data. Also, see appendix E for an indication on the extent that data for kind-of-business totals included in this report were obtained from the administrative records of other Federal agencies and from estimation, rather than reports directly from respondents.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Census of Retail Trade may be obtained, depending on availability of time and personnel, on diskette, computer tape, or in tabular form. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Services Division, Bureau of the Census, Washington, DC 20233.

To discuss a special tabulation before submitting specifications, call 1-800-541-8345.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

–	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies; data are included in broader kind-of-business totals.
(NA)	Not available.
(S)	Withheld because estimates did not meet publication standards on the basis of feither response rate, associated standard error, or a consistency review.
(V)	Less than 0.05 percent.
(X)	Not applicable.
CMSA	Consolidated metropolitan statistical area.
MA	Metropolitan area.
MSA	Metropolitan statistical area.
n.e.c.	Not elsewhere classified.
PMSA	Primary metropolitan statistical area.
pt.	Part.
r	Revised.
SIC	Standard industrial classification.

The following symbols are used in this publication to show employment size ranges for employment data that has been withheld to avoid disclosing data for individual companies (employment size range codes are provided for the first time in the 1992 Economic Census):

Symbol	Employment Size
AA	0–19
BB	20–99
CC	100–249
EE	250–499
FF	500–999
GG	1,000–2,499
HH	2,500–4,999
II	5,000–9,999
JJ	10,000–24,999
KK	25,000–49,999
LL	50,000–99,999
MM	100,000 or more

Table 6. Gallon Sales of Automotive Fuels and Number of Automotive Fuel Pumps for Selected Metropolitan Areas: 1992

[Includes only establishments with payroll. Data shown for Consolidated Metropolitan Statistical Areas (CMSA's), Metropolitan Statistical Areas (MSA's), and Primary Metropolitan Statistical Areas (PMSA's). For meaning of abbreviations and symbols, see introductory text. For explanation of terms and comparability of 1987 and 1992 censuses, see appendix A. For definitions of CMSA's, MSA's, and PMSA's, see appendix D]

Geographic area	Establishments in business—			Gallon sales		Pumps[1]		Self-service gallon sales of gasoline and other automotive fuels (1,000)	Self-service gasoline and other automotive fuel pumps[1] (number)	Sales of establishments responding to inquiries as percent of total sales by column—					
	Any time during year (number)	At end of year (number)	Sales ($1,000)	Gasoline (1,000)	Other automotive fuels (1,000)	Gasoline (number)	Other automotive fuels (number)

Table 6. **Gallon Sales of Automotive Fuels and Number of Automotive Fuel Pumps for Selected Metropolitan Areas: 1992**—Con.

[Includes only establishments with payroll. Data shown for Consolidated Metropolitan Statistical Areas (CMSA's), Metropolitan Statistical Areas (MSA's), and Primary Metropolitan Statistical Areas (PMSA's). For meaning of abbreviations and symbols, see introductory text. For explanation of terms and comparability of 1987 and 1992 censuses, see appendix A. For definitions of CMSA's, MSA's, and PMSA's, see appendix D]
