INTRODUCTION

This yearbook mainly uses statistical tables to report the R.O.C. social-economic development in Taiwan-Fukien Area¹ for the period from 1979 to 2008.

1. To facilitate international comparison, a cross-reference table of the correspondent statistical table numbers between the 51st issue of the United Nations' *Statistical Yearbook* and the R.O.C. 2008 *Statistical Yearbook* is placed before the list of contents in this publication.
2. The introduction to compilation methodology for each section of statistical tables is condensed to a maximum of two pages and put at the start of the related section.

This yearbook divided into 16 sections, and 161 tables. The table numbers contained in each section are arranged as follows :

<i>Table</i>	1 - 7	Land and Climate
	8 - 20	Population and Housing
	21 - 36	Manpower
	37 - 62	Education, Science and Technology, Culture and Mass Communication
	63 - 78	Health and Environment
	79 - 85	Justice and Public Safety
	86 - 92	Social Welfare
	93 - 105	National Economics
	106 - 113	Agriculture, Forestry and Fishing
	114 - 118	Industry
	119 - 127	Commerce and External Trade
	128 - 136	Transportation, Storage and Communications
	137 - 138	Revenues and Expenditures of Government
	139 - 147	Finance
	148 - 154	Prices
	155 - 161	Administration

¹Taiwan-Fukien Area referred to Taiwan District's Taiwan Province, Taipei Municipality, Kaohsiung Municipality and Fukien Province's Kinmen Hsien and Lienchiang Hsien.

EXPLANATION OF SYMBOLS

Not available.....	...
None	-
Magnitude insignificant, i.e., less than half of the unit of measurement.....	0
Revised figure.....	(R)
Preliminary figure.....	(P)
Forecasted figure	(F)
Estimated figure.....	(E)

Decimal figures are always preceded by a period (.).

Thousands and millions are separated by a space.

Significant breaks in the homogeneity of a series are indicated by a horizontal or vertical line across the column.

CONTENTS

INTRODUCTION

CORRESPONDING TABLE NUMBERS BETWEEN THE 51ST ISSUE OF THE UNITED NATIONS' STATISTICAL YEARBOOK AND 2008 STATISTICAL YEARBOOK OF THE REPUBLIC OF CHINA

EXPLANATION OF SYMBOLS

<i>Table</i>	<i>Page</i>
LAND AND CLIMATE	
Explanatory notes	1
1. Area, cultivated land area and forest land area	2
2. Average temperature	3
3. Average relative humidity	4
4. Precipitation at station.....	5
5. Number of days with precipitation.....	6
6. Duration of sunshine	7
7. Number of occurrence of perceptible earthquake	8
POPULATION AND HOUSING	
Explanatory notes	9
8. Population by sex, rate of population increase, average persons per household, density and natural increase rate	11
9. Number and rate of birth, death, marriage and divorce.....	12
10. Age-specific distribution of population, dependency ratio, index of aging and median age	13
11. Population by sex and age.....	14
12. Population of age 15 years and over by sex and marital status.....	20
13. Population of cities over 150 000 inhabitants	22
14. Population in localities over 150 000 and between 20 000 and 150 000 inhabitants.....	26
15. Fertility rates for women of childbearing age	27
16. Death rates by age and sex	28
17. Life expectation by age and sex	34
18. Live births by age of mother and number of births.....	36
19. Household appliances saturation.....	38
20. Population projections (2008 - 2056).....	40
MANPOWER	
Explanatory notes	41
21. Important labor force status.....	43
22. Important indicators of labor force status.....	44
23. Persons not in the labor force by reason for nonparticipation.....	45
24. Labor force by age	46
25. Employed persons by industry	48
26. Employed persons by occupation.....	50

27. Employed persons by class of workers	52
28. Employed persons by educational attainment	54
29. Unemployed persons and unemployment rate by educational attainment	54
30. Average monthly earnings of employees by industry	56
31. Average monthly working hours of employees by industry	56
32. Indexes of labor productivity by industry	58
33. Labor unions and members by type of labor unions	59
34. Occupational injuries	60
35. Labor dispute.....	62
36. Labor turnover rates of employees by industry.....	64

EDUCATION, SCIENCE AND TECHNOLOGY, CULTURE AND MASS COMMUNICATION

Explanatory notes	67
37. Education preceding the first level: institutions, teachers and students	69
38. Education at the first level: institutions, teachers, graduates and students.....	70
39. Education at the second level (general, vocational and teacher-training) : institutions, teachers, graduates and students	72
40. Education at the third level: institutions, teachers, graduates and students.....	78
41. Education at the special and other levels: institutions, teachers, graduates and students.....	80
42. Enrollment rates by school-age population group.....	86
43. Net percentage of graduates entering advanced levels.....	87
44. Opportunity for graduates entering advanced levels.....	88
45. Number of students per teacher at all levels.....	89
46. Educational attainments of population aged 25 and over.....	90
47. Total educational expenditures.....	92
48. Total educational expenditures at all level of schools.....	93
49. Number of foreign students in Taiwan by field of study	94
50. Research and development (R & D)personnel by occupation, expenditures for R & D	98
51. National research and development (R & D) expenditures by type of work and type of cost	98
52. National research and development (R & D) expenditures by sector of performance	99
53. National research and development (R & D) expenditures by source of funds	99
54. Advanced studies for scientific and technical researchers	100
55. Supporting research projects on science and technology	101
56. Science and technology output indicators	102
57. Number of patents applied and granted.....	103
58. Saturation rate of newspapers and magazines	104
59. General conditions of culture and mass communication.....	105
60. General condition of historical sites.....	106
61. Average entertainment expenditure per person.....	108
62. Saturation rate of playground and recreational apparatuses.....	108

HEALTH AND ENVIRONMENT

Explanatory notes	109
63. General conditions of medical facilities.....	111
64. Number of health personnel	112

65. Health services in contracted medical institutions	113
66. Death rates of the leading causes, infant and maternity	114
67. Daily nutrient consumption per capita	116
68. Number of patients of notifiable diseases	118
69. Nature protected areas.....	119
70. Concentration of air pollutants.....	120
71. Pollutant standard indices (PSI)	120
72. General quality of major rivers	122
73. Pollution level of major rivers.....	123
74. Environmental noise monitoring (Leq)	124
75. Clearance of municipal solid waste by all organizations	124
76. Budget of environmental agencies	126
77. Pollution inspection and administrative penalty.....	128
78. Water withdrawal	129
JUSTICE AND PUBLIC SAFETY	
Explanatory notes	131
79. Offenses, offenders and cleared cases.....	132
80. Burglary and larceny	134
81. Violent crimes	135
82. Juvenile offenders	136
83. Treatment of criminals by the justice	137
84. Fire losses and casualties.....	140
85. Traffic accidents.....	141
SOCIAL WELFARE	
Explanatory notes	143
86. Insured persons of social insurance.....	144
87. Life insurance.....	146
88. Expenditure for social assistance	147
89. Low-income households and population.....	147
90. Assistance service organizations and inmates	148
91. General conditions of nursery	149
92. Net expenditure on social welfare	150
NATIONAL ECONOMICS	
Explanatory notes	151
93. Key indicators of national income.....	153
94. Gross domestic product.....	154
95. Cost component of gross domestic product	154
96. Gross domestic product by kind of industry	156
97. National income and national disposable income	156
98. Capital finance	158
99. External transactions	158
100. Governmental final consumption expenditure	160
101. Private final consumption expenditure.....	162

102. Gross capital formation	164
103. Disposable income, consumption expenditure and savings of households	168
104. Income, expenditure and savings per household, 2007.....	170
105. Transactions table at producers' prices, 2004 (excluding net import duties)	172
AGRICULTURE, FORESTRY AND FISHING	
Explanatory notes	179
106. Indexes of agricultural, forestry and fishery production	180
107. Quantity of major agricultural production.....	182
108. Value of major agricultural production.....	186
109. Production and consumption of chemical fertilizers.....	190
110. Farm machine.....	190
111. Agricultural household, population and employment	192
112. Available food supplies.....	194
113. Cultivated, forest and fish-culture land area	196
INDUSTRY	
Explanatory notes	197
114. Indexes of industrial production.....	198
115. Indexes of manufacturing.....	200
116. Production of major manufactured goods	202
117. Energy	204
118. Construction of building	206
COMMERCE AND EXTERNAL TRADE	
Explanatory notes	207
119. Value of external trade	208
120. Indexes of external trade	210
121. Composition of exports and imports	211
122. Exports by regions and principal countries (areas)	212
123. Imports by regions and principal countries (areas)	214
124. Exports and imports by SITC sections	216
125. Number of registered business stores.....	216
126. Number of newly registered corporations and its capital	218
127. Balance of payments	220
TRANSPORTATION, STORAGE AND COMMUNICATIONS	
Explanatory notes	223
128. Railways, highways, motor vehicles in use.....	224
129. International maritime transport.....	225
130. Civil aviation.....	226
131. Telephones and internet	227
132. International telephone business	228
133. Postal service.....	229
134. Visitor arrivals by purpose of visit.....	229
135. Number of foreign visitor arrivals by residence.....	230

136. Visitor arrivals and their average expenditures	232
REVENUES AND EXPENDITURES OF GOVERNMENT	
Explanatory notes	233
137. Net revenues and expenditures of general government.....	234
138. Total tax revenues	240
FINANCE	
Explanatory notes	245
139. Exchange rates, money supply and reserve money.....	246
140. International liquidity.....	247
141. Rates of the Central Bank of China.....	248
142. Stock price index and money market interest rates.....	250
143. Weighted average interest rates on loans	250
144. Government bonds: issues, redemption and outstanding volumes.....	251
145. Consolidated assets and liabilities of monetary institution	252
146. Consolidated assets and liabilities of financial institution.....	252
147. Number of financial institutions.....	254
PRICES	
Explanatory notes	257
148. Indices of wholesale price.....	258
149. Indices of wholesale price by industry.....	259
150. Indices of wholesale price by stage of processing	259
151. Indices of consumer price by commodity quality	260
152. Indices of consumer price	261
153. Indices of import price by S.I.T.C.....	262
154. Indices of export price by S.I.T.C	262
ADMINISTRATION	
Explanatory notes	263
155. Civil service personnel by organizations.....	264
156. Civil service personnel by ages	266
157. Central public office elections.....	268
158. Local public office elections	270
159. Technical missions sent out by the government of the Republic of China	272
160. Number of technical assistance participants dispatched	274
161. Trainees in Japan under Taiwan-Japan technical cooperation programs	275

LAND AND CLIMATE

This chapter is concerned with the land and climate in Taiwan Area. The information on land is obtained from data compiled by the Land Administration Department, the Ministry of the Interior. Please refer to the *Statistical Abstract of Interior of the Republic of China* for details. The information on climate comes from data collected by the eleven weather observatories of the Central Weather Bureau located all over Taiwan Area and published in the Monthly Statistics of Transportation and Communications, R.O.C. and the *Statistical Abstract of Transportation and Communications, R.O.C.* by the Ministry of Transportation and Communications as well as in the *Climatological Data Annual Report* by the Central Weather Bureau.

The size of Taiwan Area, calculated at the time of full tide, is 35,961.2125 square kilometers which excludes the reclaimed tidal land. The data of reclaimed tidal land is provided in the table for reference only. The cultivated land contains all types of registered land and unregistered land, including reclaimed river bed, reclaimed tidal land, slope-land, and virgin land, which have been used for farming purposes. Before 1995, data of forest land area is obtained from an aerial survey from 1973 to 1977 while data of 1995 was from survey from 1983 to 1994; however, the data prevailing before the survey is still cited for the Penghu District because Penghu was not covered by the aerial survey. The climatic observation time adopts the central standard time at the meridian 120°E except the number of sunshine hours for which apparent solar time is used. Each climatic observatory conducts general observation for eight times a day once every three hours from 2 a.m. The number of days with precipitation refer to the days in each of which the rainfalls amount to one-tenth of millimeter and above. The seismic data are collected by the Seismic Observation and Reporting Center of the Central Weather Bureau from its 24-hour observation of the region from 21° to 26° North Latitude and from 119° to 123° East Longitude.

The Republic of China (ROC) Government currently controls the Taiwan, Kinmen and Matsu areas. The Taiwan Area with 36,006 square kilometers includes Taiwan proper, the Penghu Islands, Green Island, Orchid Island, and Tiaoyutai Islets. Taiwan, also known as Formosa, is an island about 160 kilometers off the southeast coast of mainland China. It is separated from Fukien Province on the mainland China by the Taiwan Straits. The island measures 394km long and 144km wide at its widest point. The Central Mountain Range slopes gently to a broad and fertile plain in the west. In the east, the mountains descend precipitously to the Pacific. The island's uplands are so extensive that only about one-fourth of Taiwan is arable. Shorelines are fairly straight and good natural harbors few. Rivers are short and useful for power generation, but not for navigation. Physiographically, Taiwan has five major divisions: the Central Mountain Range, volcanic mountains, foothills, tablelands, and coastal plains and basins. The Kinmen and Matsu, with 182 square kilometers, are two island groups just off the mainland China.

Table 1. Area, cultivated land area and forest land area

Year	Area ¹			Cultivated ² land area	Forest land area
	Total	Land area	Reclamation		
1979	36 179.12	36 140.27	38.85	9 153.93	18 651.41

Note : Central Weather Bureau adopted new equipments detecting earthquake vibration from 1991.

Before 1991, the figures of Taipei area include the data Yilan area.

POPULATION AND HOUSING

This chapter is concerned with population and housing. On the front of population, it contains information on population growth as well as the current status and projections of population. The population projections are obtained from the *Projections of the population of the Taiwan Area, Republic of China 2008 to 2056* prepared by the Manpower Planning Department of Council for Economic Planning and Development, Executive Yuan. Other population statistics come from the *Taiwan-Fukien Demographic Fact Book, R.O.C.*, the *Taiwan-Fukien Demography Quarterly*, and the *Abridged Life Tables of Taiwan Area, the Republic of China*, published by the Ministry of the Interior, and the *Report on Population and Housing Census, Taiwan-Fukien Area, R.O.C.*, published by Census Office of the Executive Yuan. Data on living standards of households are obtained from the personal income distribution survey (Please refers to the chapter on national economy for details.)

The population statistics mainly come from the household registration and the household/population census. According to the provisions of laws and regulations, the registered population refers to all of the R.O.C. nationals maintaining household registration in Taiwan-Fukien Area. The demographic data can be divided into two types: i.e., static year-end stocks and dynamic changes about registered population. Included in the first type are demographic data on composition in sex, in age and population by education, marital status, industry, occupation, and employment status. Contained in the seconds type is data concerning birth, death, marriage, divorce, and migration. All of the static demographic data were based on the fact registered as of December 31, except for statistics about population classified by economic activities, industries, occupations, and employment status that were based on the fact prevailing in the period from December 1 to 31. An annual year-end household check, except for the census year, has been conducted to correct errors, omissions, and other incorrect data , in an effort to make demographic statistics more accurate and reliable. The population projection, designed to provide data required by the government in drawing up its national economic plans as well as in formulating its policies, adopts the cohort-component approach by which moving projection is calculated separately for each age group with a compute program derived from one used by the US. Census Bureau in its projection of population for a specific age.

Fertility Rates -- Four kinds of fertility rates are presented in this section, i.e., general fertility rate, total fertility rate, gross reproduction rate, and net reproduction rate. The general fertility rate refers to the number of live births per thousand of mid-year childbearing age women(aged 15 to 49). The total fertility rate refers to the birth rate derived from the total number of births likely to come out from the current generation of childbearing age women during their childbearing period without death. The gross reproduction rate refers to the number of live female infants given by every 1,000 childbearing age women during their childbearing period. The net reproduction rate refers to the number of live female infants given by every 1,000 childbearing women surviving during their childbearing period.

Housing Unit -- The housing unit refers to a residential building or any other place which, bearing an address and occupied or available for occupation by household, is equipped with a complete set of housing facilities.

In addition to the above publications, demographic data can also be found in the *Monthly Bulletin of Interior Statistics Taiwan and Fukien Area, R.O.C.*, and the *Statistical Yearbook of Interior of the Republic of China* published by the Ministry of the Interior. Housing data can also be found in the *Report on the*

Housing Survey in Taiwan Area, R.O.C., published by the Directorate General of Budget, Accounting and Statistics, Executive Yuan.

Table 8. Population by sex, rate of population increase, average persons per household, density and natural increase rate

End of Year	Population			Annual rate of increase (%)	Sex ratio (Female=100)	Average persons per household	Density (Persons/km ²)	Natural increase rate (%)
	Both sexes	Male	Female

Notes : ¹The number of population does not include those foreign people who are residing in Taiwan Area.

²All figures are based on the household registration data at the end of year.

³Data included Taiwan-Fukien area beginning 1981.

by sex and age

Notes : ¹ All figures before 1977 presented were based on registration; from 1977, data were compiled on ages according to occurrence.

² Standardized death rate is based on 2000 midyear population age structure.

³ Data included Taiwan-Fukien area beginning 1981.

Notes : ¹All figures before 1975 presented were based on ages according to registration. From 1975, data were compiled on ages according to occurrence.

²Data included Taiwan-Fukien area beginning 1992.

³The figures apply new calculating methods in 2005, and revised the data since 1996.

by age and sex

Note : Data are based on the population at the end of year, and adopted medium projection.

MANPOWER

This chapter is concerned with labor force, employment, labor productivity, occupational injuries, labor disputes and labor unions. The first three kinds of data are mainly obtained from the results produced by the manpower resource survey and the employees' earnings survey regularly conducted by the Directorate General of Budget, Accounting and Statistics, Executive Yuan, which are incorporated in the *Yearbook of Manpower Survey Statistics, Taiwan Area, Republic of China*, *the Monthly Bulletin of Manpower Statistics, Taiwan Area, Republic of China*, *the Yearbook of Earnings and Productivity Statistics, Taiwan Area, Republic of China* and *the Monthly Bulletin of Earnings and Productivity Statistics, Taiwan Area, Republic of China*. Data on occupational injuries, labor disputes and labor unions come from the official statistics compiled by the Council of Labor Affairs (CLA) and incorporated in the *Yearbook of Labor Statistics, Taiwan Area, Republic of China* published by CLA.

The manpower resource survey, conducted once a month, and the week containing the fifteenth day of a month is set as the reference week. The survey covers all the population of age 15 or over who are engaged in economic activities in Taiwan Area, but excludes those in active military services and in prison. Everyone is classified into only one of the following three slots; employment, unemployment, or not in labor force. Where a person in employment has more than one job, the job occupying the longest working time in the reference week is counted as his job. The survey adopts the two-stage stratified sampling method with the basic administration unit of Tsun or Li as the first stage sampling unit and the household as the second stage sampling unit.

In the employees' earnings survey, unless otherwise specified, the number of employees on payroll at the end of a month is collected while earning, working hours and turnover of employees at the end of each month during a year. The employees' earnings, working hours, accession and separation are monthly data multiply the number of employees of the month. Then calculate the 12-month weighted average. The object of this survey are public and private firms and their employees, excluding the factories owned by the Ministry of National Defense, consumers cooperatives, workshops of schools, relief institutions and prisons. In the survey period, if a surveyed worker has two jobs, these two jobs will both be counted, a way different from that for the manpower resource survey. The survey adopts both of the complete investigation approach and the cut-off stratified random sampling approach which uses the Dalenius-Hodges approximate optimum method for stratum division and the Neyman optimum Allocation for allocation of samples in each stratum. The survey is conducted in accordance with the seventh revision of the Industrial Classification Standard of the Republic of China.

Labor force -- It is defined as those civilians who, during the reference week, are 15 years of age or over and who are available to work, including both the employed and the unemployed. The employed population comprise all the persons who, during the reference week, work for pay or work for 15 hours or more as unpaid family workers. The unemployed population comprise all the persons who, during the reference week, are 15 years of age or over and under the following conditions: (1) no job, (2) available to work, (3) seeking for a job, or had sought work but waiting for result. Besides, the unemployed population also includes the persons who are waiting to recall or start a new job but not working and paid yet.

Not in Labor Force -- The category comprises those civilians who during the reference week are 15 years or over and not in labor force, including the persons who intend to work but not seeking for , attending school, being engaged in housekeeping, aged, disabled, as well as, not working and not seeking for a job.

Number of Employees -- The employees refer to those white and blue collar workers on payroll at the end of a month, including full-time and part-time workers, permanent workers, temporary workers under projects, contract workers, students working under cooperation programs between industries and schools (excluding who do not work for a full month), and apprentices with pay. Also included are those who are temporarily on leave, such as going abroad on official trip, training, transfer, military training, education, illness, vacation, marriage, and child delivery. However, excluded are: (1) employers participating the operation without pay, own-account workers, and unpaid family workers, (2) members of boards of directors, supervisors and advisors not actually participating the operation, (3) those drafted for military service with partial pay, without participating in operation for the entire month, (4) contracted workers outside the factories and paid by piece of work.

Earnings of Employees -- The earnings of an employee are composed of the following three categories: (1) Regular earnings: It refers to regular rewards paid to employees every month. Included in the regular earnings are basic pay, regular allowance and awards such as housing allowance, transportation allowance, free meals, free water and electricity, regularly (production, good job-rating, good sales, etc.) performance awards, full attendance award, etc. Pay in kind should be converted into value at the current prices. The regular earnings should not include payable income tax, insurance premium and labor union fees. (2) Over time pay: it refers to the rewards paid for employees working overtime. (3) Other irregular earnings: Included are performance awards, full attendance award, year-end bonus, bonus for Dragon Festival and/or other festivals, official trip per diems, and job transfer allowance.

Productivity -- The productivity data can be classified into labor productivity, capital productivity, and multi-factor productivity. This chapter includes only the labor productivity measured by value of output which is specifically defined as the real value of output produced by an employee within a unit of time. It is derived by dividing the total input into the total output. The real gross domestic product (GDP) as shown in the national income product account (NIPA) is the output while the working hours of an employee, derived jointly from the manpower resource survey and the employees survey, are the input. Information and compilation methods for labor productivity measured by quantum of output, capital productivity, and multi-factor productivity, please see the *Trends in Labor Productivity, Taiwan Area, Republic of China*, the *Research on Measurement of Capital Productivity Statistics, Taiwan Area, Republic of China* and the *Trends in Multi-factor Productivity of Industrial Sector, Taiwan Area, Republic of China* all published by the Directorate-General of Budget, Accounting and Statistics, Executive Yuan.

Labor Union -- The number of labor unions refers to the total of labor union federation, industrial labor unions, and trade (occupational labor) unions. The industrial labor union refers to a union organized within an industry and composed of workers of different occupations. The trade union refers to a labor union organized by workers of a specific occupation. The labor union federation refers to an organization formed by several industrial labor unions and/or trade unions. For information on operation and activities of labor unions, please refer to *Yearbook of Labor Statistics, Taiwan Area, Republic of China* published by the Council of Labor Affairs.

For statistics on conditions of labor, readers may also refer to the Report on the Manpower Utilization Survey, Taiwan Area, Republic of China published by the Directorate-General of Budget, Accounting and Statistics, Executive Yuan and Analytical Report on Living Conditions of Labor, Taiwan Area, Republic of China, and the Report for Survey about Enterprises' Employment Administration System and Labor's Sense of Work, Taiwan Area. Republic of China (Chinese edition) published by the Council of Labor Affairs, Executive Yuan.

Notes : ¹ Frequency of disability = Times of disability ÷ Total person-workhours × 1,000,000

² Severity of disability = Total workday lost ÷ Total person-workhours × 1,000,000

³ The current data can not be compared with the data prior to 2004 due to categories of occupational revised tables and the method was amended in 2005.

Notes: ¹The classification of dispute permits more than one dispute issues for each case from year 2000 to 2007. For the previous years and 2008, it contains just the major type of labor dispute only.

²Unresolving cases occurred in the previous year are included.

³The time series before 1988 included the settlements by legal channels.

EDUCATION, SCIENCE AND TECHNOLOGY, CULTURE AND MASS COMMUNICATION

This chapter is concerned with information on education, science & technology, culture, and mass communication in our country. On the front of education, it contains data on the status of education at various stages, net percentage of graduates entering advanced levels, opportunity for graduates entering advanced levels, educational attainments, and educational expenditure. All of the educational statistics are obtained from the *Educational Statistics of the Republic of China* and the *Education Statistical Indicators, Republic of China*, both compiled by the Ministry of Education based on statistical reports regularly submitted by all of the public and private schools, except for information on educational attainments which come from the official statistics of the Ministry of the Interior. On the front of science and technology, this chapter contains data on national research and development (R&D) expenditures, publication of scientific and technical (S&T) papers and number of patents granted. Information on R&D expenditures and publication of (S&T) papers are obtained from the *Indicators of Science and Technology, Republic of China* compiled from results of the Annual National Technology survey conducted by the National Science Council, Executive Yuan, the Republic of China. On the front of culture, this chapter contains data on the status of libraries and the status of historic relics. Information on culture are obtained from official statistics compiled by the Ministry of Education and the Ministry of the Interior, respectively. On the front of mass communication, this chapter introduces the status of mass communication enterprises and the saturation rates for newspapers and magazines. The information on mass communication enterprises come from official statistics produced by the Government Information Office while that on newspapers and magazines, from the *Report on the Survey of Family Income and Distribution* published by the Directorate-General of Budget, Accounting and Statistics, Executive Yuan, Republic of China.

The Annual National Technology Survey takes place once a year. Objects of the survey are all of the organizations engaging in research in the fields of natural sciences, engineering, medical sciences, agricultural sciences, humanities and social sciences, including departments and institutes of all public and private colleges and universities, independent research institutes, and public and private industries. For investigation, private industries are drawn by the stratified sampling method, and the data are used as a base to estimate the population of each related parameter by ratio estimation. For all other kinds, every object is investigated in the survey, and the data obtained from this part are directly compiled and tabulated in the statistical tables without going through any estimation process. The survey adopts the calender year as the survey period.

School Year -- A school year begins August 1 of a year to July 31 of the next year. Each school year is divided into two semesters, with the first semester being from August 1 of a year to January 31 of the next year and the second semester, from February 1 to July 31 of the next year.

Education at All Levels -- Education can be classified into following five stages: preschool education (preceding the first level), primary education (first level), secondary education (second level), higher education (third level), and social education (special and other levels). The preschool education is offered to toddlers (age 3 to 5) at the kindergartens. The primary education is offered to students (age 6 to 11) at the elementary schools. The secondary education is offered to students (age 12 to 17) at the junior high, senior high, and vocational senior schools (including the first three years of the 5-year junior colleges). The higher

education is offered to students (age 18 to 21) at the colleges/universities and above (excluding the first three year of the 5-year junior colleges).

Opportunity for graduates entering advanced levels -- This refers to the chance for a school graduate to enroll in a school the next higher level. For instance, the opportunity for a junior high school graduate entering advanced levels is the first-year students at the senior high schools, vocational senior schools (including supplementary schools and prolonged education classes), and 5-year junior colleges as a percentage of total graduates coming out of all junior high schools in the current year.

Education Attainments -- This refers to the highest school education received or the highest qualification test passed or the best knowledge gained from informal schools, at home and overseas, by a person of age 25 or above at the benchmark date. An informal school may be a tutorial class, unregistered college, correspondence course program (school), symposium, training class, supplementary education class, seminars, and self-study.

To facilitate comparison with international statistics, the indicators has presented R&D expenditures and personnel since 2001, which are classified according to the definitions in the newest edition of the OECD's R&D manual "Frascati Manual". In the OECD criterion, only persons with university degree or above are counted as "researchers". Those with lower formal qualifications are counted as "technicians."

Scientific and Technical Paper -- This refers to the papers produced in the process of the scientific and technological activities, including referee papers, conference papers and monographs. The research reports published yet never in any academic journals and the dissertations of doctors or masters are excluded from the statistics.

For additional information on education, please refer to the *Statistical Abstract of Education of the Republic of China*, and the *Statistics on Status of Universities and Colleges of the Republic of China*. For additional information on scientific and technological activities, please refer to the *Science and Technology Yearbook of the Republic of China*. For more information on culture and mass communication, please refer to the *Cultural Statistics*.

Notes : ¹ Number of students in subject of Humanities excluded those in language centers subordinating to colleges and universities from 1987.

² Number of students in language center was calculated from Jan-Dec. of a year while No. of formal students in colleges and universities was calculated based on the school year, from Oct. 20 of a year on.

Note : ¹After 1994, number of books referred to published books with International Standard Book Number (ISBN) by National Central Library.

²Beginning from 2008, the figures are reclassified according to the sixth revision of Standard Industrial Classification on Taxation of the Republic of China.

1998	60 977	27.81	99.17	-	32.31	68.09	11.59
1999	61 002	27.61	99.31	7.25	38.92	67.87	11.00
2000	71 963	32.30	99.45	13.47	46.49	71.96	10.80
2001	4 056	2.31	99.29	22.49	50.86	72.34	10.92
2002	4 130	2.34	99.56	32.86	56.80	74.81	11.64
2003	4 439	2.53	99.51	40.11	58.74	76.12	10.71
2004	4 705	2.65	99.47	45.99	62.37	78.53	11.06
2005	4 785	2.67	99.46	48.60	63.15	79.02	11.42
2006	5 027	2.80	99.55	53.53	66.12	79.82	11.29
2007	5 534	3.00	99.37	52.68	67.13	79.93	10.58
2008	5 736	3.12	99.39	44.11	69.27	81.65	10.44

Note : Total area of park, Green Area, Play Ground, Athletic Complex and Square referred to the total playground before 2000, since 2001 it referred to the area in urban planning area only.

HEALTH AND ENVIRONMENT

This chapter is concerned with information on public health and environments in our country. In the area of public health, this chapter contains data on medical care facilities, health personnel, causes of death, nutrient consumption and health services. Data on medical care facilities, health personnel, health services and death rates of the leading causes, infant and maternity are obtained from the official statistics contained in the *Health and Vital Statistics*, an annual report published by the Department of Health. Data on nutrient supply are obtained from the *Taiwan Agriculture Yearbook* published by the Council of Agriculture. In the area of the environment, this chapter includes information on air pollution, pollution of rivers, environmental noise monitoring, Clearance of municipal solid waste, expenditure of departments of environment protection, natural protected area and water withdrawal. Data on environment come from the official statistics contained in the *Yearbook of Environmental Protection Statistics* published by the Environmental Protection Administration, and data on natural protected area and water withdrawal are from the Council of Agriculture and Water Resources Agency, MEA, respectively.

The scope of data on medical care facilities covered only public medical care institutions owned by provincial and country/city governments before 1971. Public and private medical care institutions in Taiwan Area have been included in the statistics since 1971, with the health offices under the jurisdiction of the Taiwan Provincial Government excluded beginning 1987. The classification standards for major causes of death is based on the *International Statistical Classification of Diseases, Injuries, and Causes of Death* published in 1975 by the World Health Organization. The hospital beds include those for abrupt and chronic diseases. The nutrient supply is derived from the nutrients contained in the foods taken each day by each person.

Pollutants Standard Index (PSI) -- The procedure to calculate the PSI follows: First, each of the air pollutants -- including suspended particulate with a diameter less than $10\mu\text{m}$, sulfur dioxide density, nitrogen dioxide density, carbon monoxide density, and ozone density -- monitored in the air by one of the 19 monitoring stations scattered in Taiwan Area is converted to the PSI sub-index value. Second, the largest one picked from the 5 PSI sub-index values calculated by the station for a day is to serve as the PSI for the station on the specific day.

**PSI value cross reference table
(Under conditions of 25°C and 760 mm Hg)**

PSI value	24-hr. PM ₁₀		24-hr. SO ₂		8-hr. CO		1-hr. O ₃		1-hr. NO ₂	
	$\mu\text{g}/\text{m}^3$	$\mu\text{g}/\text{m}^3$	ppm	$\mu\text{g}/\text{m}^3$	ppm	$\mu\text{g}/\text{m}^3$	ppm	$\mu\text{g}/\text{m}^3$	ppm	
50	50	80	0.03	5	4.5	120	0.06	-	-	
100	150	365	0.14	10	9	235	0.12	-	-	
200	350	800	0.30	17	15	400	0.2	1130	0.6	
300	420	1600	0.60	34	30	800	0.4	2260	1.2	
400	500	2100	0.80	46	40	1000	0.5	3000	1.6	
500	600	2620	1.00	58	50	1200	0.6	3750	2.0	

Pollution Level of Major River -- -- The pollution Level of river is measured by the average points converted from dissolved oxygen (DO), biological oxygen demand (BOD₅), suspended solid (S.S.), and ammonium nitrate (NH₃-N) found in water.

Level of river pollution

Category	Degree	Non - polluted	Light - polluted		Medium - polluted		Heavy - polluted	
DO	(mg/l)	Over 6.5	4.6	~	6.5	2.0	~	4.5
BOD ₅	(mg/l)	Under 3.0	3.0	~	4.9	5.0	~	15
S.S.	(mg/l)	Under 20	20	~	49	50	~	100
NH ₃ -N	(mg/l)	Under 0.5	0.5	~	0.99	1	~	3
Points		1	3		6		10	
Average		Under 2.0	1	~	3	3.1	~	6
							Over	6.0

- Notes: (1) The average is adopted for each category of dissolved oxygen, biological oxygen demand, suspended solid, and ammonium nitrate.
(2) For example, tests are conducted to measure the dissolved oxygen, biological oxygen demand, suspended solid, and ammonium nitrate. If the average of the points measured in the tests or all of the four categories exceed 6.0, the water is "heavy-polluted".

Environmental Noise Monitoring -- The value of noise monitored, also called "average noise", refers to the average of noises detected in a given period of time. It is calculated for each of the four controlled areas which are defined as follows:

- 1st Class Control Area:Referring to the residential community which badly required serenity.
- 2nd Class Control Area:Referring to an area, mainly used for residential purpose, requiring relative serenity.
- 3rd Class Control Area:Referring to an area used for a combination of industrial, commercial, and residential purposes where serenity is required for the residential part.
- 4th Class Control Area:Referring to an industrial area where noises need to be controlled to prevent from disturbing the neighboring residences.

For additional information on public health, please refer to the *Report on Morbidity Survey in Public and Private Hospitals Clinics, Taiwan Area, R.O.C.* published by the Department of Health. For additional information on environments, please refer to the *Environmental Protection Statistics Monthly, Taiwan Area, the Republic of China* and *Information on Twiwan Environment, R.O.C.* published by the Environmental Protection Administration, Executive Yuan.

Table 63. General conditions of medical facilities

End of Year	Medical care facilities ^{1,2}			Beds ¹	
	Total (Numbers)	Per medical care facility		Total (Numbers)	Number of beds per 10 000 population
		Area served (Km ²)	Population served (Persons)

2008	20 174	1.79	1 142	152 901	66.37

Notes : ¹ Figures before 1971 were the numbers of provincial, county and city medical facilities and their beds; while figures after 1971 were the numbers of public and private hospitals and clinics and their beds.

² According to the Medical Practice Law, the number of medicare offices are excluded since 1987.

³ Data included Taiwan-Fukien area beginning 1994.

Table 64. Number of health personnel

JUSTICE AND PUBLIC SAFETY

This chapter is concerned with information on status and treatment of crimes, traffic accidents, and fire accidents. Data on status of crimes and traffic accidents are obtained from the official statistics contained in the *Statistics Annual Report of Police Affairs, R.O.C.*, an annual report published by the National Police Administration, the Ministry of the Interior. Data on fire accidents come from National Fire Administration, Ministry of Interior. Data on treatment of crimes mainly come from the official statistics compiled by the Ministry of Justice and the Judicial Yuan, contained in the *Statistical Handbook*, an annual report published by the Statistical Department, the Ministry of Justice.

Data on the status of crimes include criminal cases, cleared cases, and the number of offenders. A criminal case refers to a case in which one is found offending against the criminal codes, indicted and punished according to the Criminal Suit Law. Statistics on criminal cases are reported by the police agencies regarding complaints or accusations filed by ordinary persons or crimes found by policemen while on duty, with the figure for a specific period. The number of cleared cases refers to the criminal cases which, after investigation, are cleared by police in a specific period. Statistics on offenders refer to the number of criminal suspects who are implicated and after being revised, the monthly statistics are compiled into an annual report at the end of a year.

The treatment of crimes refers to investigation, trial and execution of court sentence as regard to crimes according to the Criminal Suit Law, the Juvenile Delinquency Treatment Law, and related laws. For a crime, a prosecutor shall conduct investigation in accordance with law and indict a suspect if the evidences obtained from his investigation are sufficient to prove the suspect guilty. After court trials, if the suspect is found guilty and convicted, he will be sent to the public prosecutor's offices of the courts for execution of punishment.

Violent Crime -- It principally refers to murder and nonnegligent manslaughter, serious intimidation, robbery and forceful taking, kidnapping, serious injury and forcible rape (gang rape). Data on forcible rape could be traced back to 1977; consequently, the revision was made only to data on violent crime as far back to 1977.

Theft -- It refers to stealing of automobiles, motorcycles and other properties.

Offender Rate -- It refers to the number of offenders per 100 000 of mid-year population. Offenders are divided to 4 categories according to their age:

1. An adult offender -- refers to the offender who is of age 24 or more.
2. An adolescent offender -- refers to the offender who is of age 18 - 24.
3. A juvenile offender -- refers to the offender who is of age 12 - 17.
4. A child offender -- refers to the offender who is of age less than 12.

Motor Vehicle Accident -- It refers to a major, heavily wounded traffic accident. The death toll refers to the number of deaths instantly caused by the accident and deaths occurring within 24 hours following the accident.

For additional information on status of crimes, please refer to the *Statistics on Criminal Cases in Taiwan*, published by the Criminal Investigation Bureau. For additional information on treatment of crimes, please refer to the *Special Report for Justice Affairs Statistics in Taiwan*, published by the Prosecutors published by the Taiwan High Court, and the *Statistical Abstract of Judicial Affairs*, published by the Statistical Department of the Judicial Yuan.

Notes : ¹ Cases of traffic accidents referred to deaths or seriously injuries only before 2000 and included cases of injuries not heavily afterwards.

² Because revised reporting system and new statistical process were inaugurated in 2000. Besides, strengthened to follow cases of seriously injured, caused number of deaths and injuries of traffic accidents increased sharply.

SOCIAL WELFARE

This chapter is concerned with statistics on social insurance, social assistance and relief, low income households, social welfare services, and social welfare expenditure. For social insurance, the data of Government Employees' and School Staffs' Insurance, and Retired Government Employees' Insurance are obtained from the *Statistical Data for Government Employees' and School Staffs' Insurance, Republic of China*, published by Bank of Taiwan. Data on Labor Insurance and Farmers' Health Insurance come from the *Yearbook of Labor Insurance Statistics, Republic of China*, published by the Bureau of Labor Insurance. Statistics on National Health Insurance are obtained from National Health Bureau. Statistics on social welfare expenditure are obtained from the *Yearbook of Financial Statistics of the Republic of China*, published by the Department of Statistics, Ministry of Finance. All other information comes from the *Monthly Statistics of Interior, Republic of China*, and *Statistical Yearbook of Interior* published by the Department of Statistics, Ministry of Interior.

Social welfare statistics are compiled by the Ministry of Interior from monthly and quarterly reports regularly submitted by Municipal Governments. As it is hard to secure data concerning private social relief institutions, readers shall pay attention to revisions to data of the previous year.

Social Insurance -- It shall cover National Health Insurance, Government Employees' and School Staffs' Insurance, Retired Government Employee's Insurance, Labor Insurance, Farmers' Health Insurance and Employment Insurance.

Low Income Household -- Before FY1998, the criteria for a low income household were set by the provincial (or) municipal government every year on the basis of minimal living expenses required for each locality. In Taiwan Province and Kaohsiung Municipality, the minimal living expenses were fixed at the level no more than one-third of monthly average income per capita for the previous year. In Taipei Municipality, the cut point was set at a level no more than 40 percent of the current expenditure derived from the survey on household income and expenditure for the previous year. After FY1999, the minimal living expense has been defined by 60 percent of the average consumption expenditure each locality.

Net Expenditure for Social Welfare -- The expenditure is compiled on a basis of fiscal year and it is net of the double counting arising from inter-governmental transfers. Beginning FY1971, the expenditure for social welfare paid from the special budget was added to that from the general budget. The social welfare expenditure covered social insurance (including pension), social assistance and social relief, social welfare services, employment service, medical care and public health, public housing and community development, and environment protection before FY1989. Since FY1990, it excluded expenditure on public housing and community development, environmental protection and the retired pension. Data from FY1981 to 1989 recalculate by the definition of the social welfare expenditure made in 1990.

For additional social welfare statistics, please refer to the *Report on Social Welfare Institutions Survey*, *the Report on Female's Living Conditions Survey*, *Report on Youth Living Conditions Survey* and *the Report on Low Income Household's Living Conditions Survey* published by the Statistical Department, Ministry of Interior.

Notes : 1. Retired government employees' insurance has been stopped implementing since 1985. The part of medicare in above each insurance has been moved to National Health Insurance since March 1995.

2. Government Employees' and School Staffs' Insurance(GESSI) launched on May 31, 1999, was the combination of Government Employees' Insurance program(GEI) and Insurance for Teaching and Administrative Staffs of Private School (ITASPS). Data before 1998 covered GEI only, and that of 1999 was summation of GEI and ITASPS from Jan. to May, with GESSI from June to Dec.

3. Owing to the modification of National Health Insurance(NHI) Law on Jan. 30, 2001, all soldiers were insured. Therefore, data Of NHI insured persons since 2001 has not included that of the fourth category(including compulsory soldiers, etc.) for the sake of national security. And the figure of percent of the qualified was not available any more.

4. Unemployment Insurance Launched in Jan. 1999.The unemployment benefit belongs to the labor insurance system at first, after employment insurance implemented on January 1st in 2003,change to belong to employment insurance.

NATIONAL ECONOMICS

This chapter is concerned with information on national income, family income and expenditure and industrial inter-relations, all coming from the Directorate-General of Budget, Accounting and Statistics. Statistics for national income and industrial inter-relations, compiled based on the principles set by the United Nations, are incorporated in the National Income in Taiwan Area, R.O.C. and the Input-Output Tables in Taiwan Area, R.O.C. Data on family income and expenditure, derived from the family income and expenditure surveys, are contained in the *Report on the Survey of Family Income and Expenditure in Taiwan Area, R.O.C.*

In 1953, our country began compiling annual national income statistics, based on the national economic account system set by the United Nations. Preliminary Compilation of quarterly national product and income statistics started in 1970. Beginning 1978, a macro-econometric model has been used to forecast economic conditions for the current quarter. The forecasts together with the preliminary statistics for the previous quarter are compiled into the *Quarterly National Economic Trends* published in every February, May, August, and November of a year. In 1986, the projection was extended to cover a quarter beyond the current one, an additional quarter in 1987, and four quarters to come in 1988. Our country starting to adopt the new UN national economic account system, as revised by the United Nations in 1993, to compile its national income statistics in August 2005.

The family income and expenditure sampling survey was launched in 1964. Its objects are ROC nationals dwelling in Taiwan Area and the families these ROC nationals have organized to live together economically. Interview and bookkeeping are both adopted in the survey. The survey uses the stratified two-stage sampling method to draw out families for interview, some of which are again drawn to do bookkeeping. Data for dynamic changes are based on cumulation for the entire year while static stocks, at the end of the survey year. It can be divided into thirteen stages:

Stage 1 (1964-1970): During the period, the survey was conducted every other year, and the ratio of samples drawn -- samples as a share of total households--raise in the range from 0.13% to 0.16%.

Stage 2 (1972-1974): The frequency of the survey was changed to once every year, and the ratio of samples drawn was raised to 0.18%.

Stage 3 (1975-1977): The survey was undertaken annually, and the ratio of samples drawn was raised to 0.3%.

Stage 4 (1978-1983): The survey was undertaken annually, and the ratio of samples drawn was raised to 0.4%.

Stage 5 (1984-1994): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 16,434 households.

Stage 6 (Since 1995): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 14,706 households.

Stage 7 (Since 1996): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 13,702 households.

Stage 8 (Since 1997): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 13,701 households.

Stage 9 (Since 1998): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 14,031 households.

Stage 10 (1999-2000): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 13,801 households.

Stage 11 (Since 2001): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 13,601 households.

Stage 12 (2002-2005): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 13,681 households.

Stage 13 (Since 2006): The survey was undertaken annually, and the numbers of samples drawn has been fixed at 13,776 households.

In our country, 15 years of industrial inter-dependence tables have been compiled. The first table for 1954 was built by Professor Hsing Mu-huan. The second table for 1955 was compiled by the Joint Commission on Rural Reconstruction, which has been reorganized to the present Council of Agriculture. Subsequently, the Council for International Economic Cooperation and Development, which has been reorganized to the present Council for Economic Planning and Development, compiled the eight tables for 1961, 1964, 1966, 1969, 1971, 1974, 1976, and 1979. The Directorate-General of Budget, Accounting and Statistics took over the job in 1982, preparing the nine tables for 1981, 1984, 1986, 1989, 1991, 1994, 1996, 1999, 2001 and 2004. The industrial inter-dependence table for 2004 is composed of seven tables for purchasers' trading price, producers' trading prices, input coefficients, industrial inter-dependence, trading of domestic manufactured products, and trading of import products, respectively.

For additional national economic data, please refer to the *National Income Statistics Yearbook*, the *Statistical Abstract of National Income*, and the *Quarterly National Economic Trends* published by the Directorate-General of Budget, Accounting and Statistics, Executive Yuan.

AGRICULTURE, FORESTRY AND FISHING

This chapter is concerned with information on agriculture, forestry, fisheries, and livestock husbandry. All data on agriculture, forestry and fishing are obtained from the *Agricultural Statistics Yearbook* published by Council of Agriculture, Executive Yuan. Data on agricultural employees are from the *Yearbook of Manpower Survey Statistics, Taiwan Area, R.O.C.* published by Directorate-General of Budget, Accounting and Statistics, Executive Yuan.

The scope of agricultural production reporting system cover all agricultural products produced in Taiwan Area except sheep, horses and deer. Production does not exclude intermediate inputs and consumption or waste. The productions of principal products are all reported. For by-products only productions of forestry are reported. From the reported data, the Council of Agriculture picks out a number of representative products for calculation of the agricultural production index which adopts the Laspeyres fixed base weighted formula, with the weights being the prices of farm products prevailing in the base year. In shifting the base year, the Fisher Ideal formula are used to splice the new and old indices. To avoid double counting the agricultural output, seeds are deducted from the output of a crop in calculation of the output index for the crop. In calculation of the general agricultural production index, crop products used as animal feed are further deducted in order to avoid double counting of the animal feeds in the crop sector. Animal feeds are included in the livestock and fisheries production. Planted Area -- Crops can be divided into two broad categories, i.e., short-term crops whose growing period is shorter than one year and long-term crops whose growing period is one year or longer. For short-term crops which are further classified by timing of cropping (or term) into winter crops, first crops, and second crops, the investigation of planted area is done once for each term of cropping, and the planted areas for the three terms of cropping in a year are added up to the total planted areas in the year. For long-term crops, the investigation of planted area is done twice a year, and only the area recorded in the second investigation is treated as the planted area.

Fisheries -- This line of business can be divided into five categories, i.e., deep-sea fishery, offshore fishery, coastal fishery, marine culture, and inland water fishing. The deep-sea fishery refers to fishing on waters beyond the economic zones of our country by means of powered vessels. The offshore fishery refers to fishing on the waters within the economic zones of our country, i.e., 12 knotical miles to 200 knotical miles from the coast by means of powered vessels. The coastal fishery refers to fishing on the territorial waters, i.e., 12 knotical miles from the coast, by fishing raft or other means. The marine culture refers to raising fish in the waters along the coast or inland. The inland water fishing refers to fishing or harvesting of marine plants on inland waters.

For additional information, please refer to *Agricultural Statistics Yearbook* and *Food Supply and Utilization Yearbook* both published by the Council of Agriculture, Executive Yuan.

Table 106. Indexes of

2006=100

Note : Cultivated land refers to land under temporary and permanent crops, and can be classified paddy field and upland field. It includes all registered land and non-registered land of river alluvial land, tidal land, slop land, and virgin field which are used for cultivation.

INDUSTRY

This chapter is concerned with statistical data on industries and energy. Data on industrial production and industrial production indices are obtained from statistical results of the monthly industrial and mining production, shipment and inventory survey contained in the Yearbook of *Industrial Production Statistics Monthly, Taiwan Area of the Republic of China* published by the Department of Statistical, Ministry of Economic Affairs. Statistics on energy demand, supply and production come mainly from the official statistics contained in the *Energy Statistics Monthly* and the *Taiwan Energy Statistics* published by the Energy Commission, the Ministry of Economic Affairs.

The industrial and mining production, shipment and inventory survey is conducted once a month, and its scope covers the four industrial sectors in Taiwan Area, i.e. mining, manufacturing, public utilities (electricity, gas and water) and housing construction. Objects of the survey are enterprises selected from the files of the *Industry, commerce and service census in 2006*. Enterprises of the mining, housing construction and public enterprises sectors are subject to complete survey. Other sectors adopted the method of cut-off stratified sampling method. Samples covered by the survey totaled 8,000 enterprises, accounting for 11.4% of the population. (or 16.2% of the population excluding firms having employees less than 5 persons) Different survey methods are adopted for different industries of different nature. Mining industries are investigated by Taiwan Provincial Mining Bureau. For housing construction industries, are investigated by county (city) bureau of reconstruction. For manufacturing and public utilities industries, the data are obtained from the enterprises by completing the questionnaires themselves. The industrial production indices are derived from the data obtained from the above-mentioned investigations, using the selected production in the *Industry, commerce and service census in 2006* weighted by unit value-added method , and calculating with the Laspeyres formula.

On the front of energy statistics, all sorts of energy are converted to the amount of oil equivalent based on their calorie content as recognized in theory. The calorie content for the electricity generated by thermal power plants is derived from the average rate of calorie consumption of an electric power plant. The approach is applicable to hydroelectric and nuclear power plants. The value of calorie consumption of a power plant is 860 calories per watt hour, different from the criterion of 2,236 calories per watt hour set by the World Energy Conference. To facilitate international comparisons, please refer to the *Energy Balance Sheet of Taiwan, R.O.C.*, published by the Energy Commission, the Ministry of Economic Affairs.

For additional information on industrial activities and energy, please refer to the *Economic Statistics Annual* published by the Department of Statistics, the Ministry of Economic Affairs and the *Development of Industry Yearbook* published by the Industrial Development Bureau and *Taiwan Energy Statistics* published by the Energy Commission, the Ministry of Economic Affairs.

2006 = 100

Items	1996	1997	1998	1999	2000
Indexes of manufacturing production	60.11	64.46	66.51	71.69	77.31
By four industries					
Metal & machinery industry	78.19	85.78	85.76	88.36	90.72
Information & electron industry	31.51	35.81	40.20	47.02	56.59
Chemistry industry	65.46	68.38	68.80	73.35	76.21
Food, textile & other industries	124.10	123.14	120.22	120.96	122.18
By public or private					
Public	90.43	92.35	93.98	98.14	94.74
Private	58.44	62.87	64.93	70.13	76.41
By heavy or light industries					
Light industries	119.39	119.02	115.79	116.80	117.47
Heavy industries	47.55	52.68	55.65	61.49	68.23
By usage					
Final demand goods	84.00	88.11	90.78	94.98	99.05
Investment goods	64.90	73.96	82.12	89.99	94.04
Capital goods	56.29	66.84	76.64	87.06	92.70
Construction materials	103.39	104.96	105.00	100.31	98.49
Consumer goods	102.95	101.65	98.35	98.54	102.63
Durable goods	90.28	92.36	91.01	90.47	96.30
Non-durable goods	107.09	104.44	100.38	100.85	104.38
Producer goods	50.17	54.60	56.39	61.95	68.21
For mining & M.F.G. goods	51.12	55.97	57.96	63.82	70.75
Other producer goods	51.03	51.12	50.73	54.03	55.65
By intensity					
Labor					
High intensity	77.89	80.96	81.29	87.71	91.10
Medium intensity	42.61	46.79	51.36	57.52	61.43
Low intensity	57.21	62.48	63.78	67.00	76.33
Capital					
High intensity	51.67	55.45	56.21	58.67	65.14
Medium intensity	67.07	72.22	75.42	84.05	89.23
Low intensity	98.31	102.40	107.62	111.28	113.65
Energy					
High intensity	66.35	72.35	74.42	79.12	83.02
Medium intensity	59.81	62.41	61.29	63.95	67.54
Low intensity	54.29	58.62	62.85	70.04	78.54
Human capital					
High intensity	36.66	41.56	44.82	49.99	57.13
Medium intensity	80.98	85.47	86.86	92.41	96.19
Low intensity	136.42	133.02	126.63	127.53	126.74
Indexes of producer's shipment	62.09	67.23	68.80	73.13	78.57
Indexes of producer's inventory	79.58	81.11	89.16	86.27	90.95

COMMERCE AND EXTERNAL TRADE

This chapter is concerned with statistical information on commerce and external trade. Data on commerce, including new corporations registration in number of companies and total registered capital as well as business stores registration, come from the official statistics of the Department of Commerce, the Ministry of Economic Affairs. External trade, covering imports and exports in value, trade composition and trade indices, are compiled from the import and export declaration documents on a monthly basis, with the results incorporated in the *Monthly Statistics of Exports and Imports, Taiwan Area, R.O.C.* published by the Department of Statistics of the Ministry of Finance. Statistics on international balance of payments are taken from the *Balance of Payments, Taiwan District, Republic of China*, which is compiled on a quarterly basis and on an annual basis, following the definition, classification, and rules given in the fourth edition of the international balance of payments handbook published by the International Monetary Fund.

Imports and exports refer to cargoes going in and out in Taiwan Area. Landings overseas by fishing boats of our country as well as sales of fuel to foreign vessels and aircraft at ports of our country had not been included in the exports until 1970. The day when cargoes cleared by a customs service office for loading is considered as the date of the exports, and export shipments are priced on a free-on-board (F.O.B.) basis. The countries which cargoes are declared shipped to are the destinations of exports. If several destinations are declared for a shipment, the first one where the cargo reached is treated as the destination of the shipment. The day when imports are cleared by the customs service office is the date of the imports. Imports are priced on a cost-insurance-freight (C.I.F.) basis, and the producing country is the origin of the imports. Trade indices, compiled from a sample of 1,921 export items and 1,992 import items, can be classified into five categories and their formulas as follows:

$$1. \text{ Value index: } I_v = \sum p_i q_i / \sum p_0 q_0 \times 100$$

where $\sum p_i q_i$ refers to the total value of export (import) commodities of the given group in the given period, $\sum p_0 q_0$ refers to that in the base period.

$$2. \text{ Unit value index : } I_p = \sqrt{\sum p_i q_i / \sum p_0 q_0} \times \sum p_i q_i / \sum p_0 q_0 \times 100$$

where P_i refers to the given period unit value, P_0 refers to the base period unit value, q_i refers to the given period quantity, q_0 refers to the base period quantity, and $\sum p_i q_i$, $\sum p_0 q_0$ refer to the total sample values of commodities of the given group in the given period, the base period respectively.

$$3. \text{ Quantum index: } I_Q = I_v / I_p \times 100$$

$$4. \text{ Net terms of trade: } T_N = I_{PE} / I_{PI} \times 100$$

Where I_{PE} means unit value index of export, I_{PI} means unit value index of import.

$$5. \text{ Income terms of trade: } T_I = T_N \times I_{QE} / 100$$

Where I_{QE} means the quantum index of export.

For additional information on commercial activities, please refer to the *Economic Statistics Annual in Taiwan Area, R.O.C.* and the *Domestic and foreign Economic Statistics Indicators* published by the Department of the Ministry of Economic Affairs. For additional information on external trade, please refer to the *Monthly Statistics on Export Orders* published by the Department of Statistics of the Ministry of Economic Affairs, and the *Trends of Trade, R.O.C.* published by the Board of Foreign Trade, the Ministry of Economic Affairs.

2008	8 010 379	255 629	- 1.0	7 551 084

Note: ¹ From Jan. 2006, the Compilation of Customs Trade Statistics adopts the United Nations "International Merchandise Trade Statistics (IMTS) Compilers Manual, 2004". Under IMTS Criteria, the data of re-exports and re-imports of each Classification are included in their relevant total exports/imports, respectively. The historical data of 1991 to 2005 have been revised on this table.

² Annual change(%) refers to the annual increase rate of million of NT\$.

external trade

TRANSPORTATION, STORAGE AND COMMUNICATIONS

This chapter is concerned with statistical data on sea transportation, inland transportation, air transportation, postal services, communications, and tourism. All of the information except for tourism is obtained from official registration data, which are incorporated in the *Statistical Abstract of Transportation and Communications, Republic of China* published by the Department of Statistics, Ministry of Transportation and Communications. On the front of tourism, information on visitor arrivals by nationality and outbound departures of nationals of the Republic of China, contained in the *Report on Tourism Statistics* published by the Tourism Bureau, is obtained from the entry and exit records kept by the Entry and Exit Service Bureau, Ministry of Interior. Visitor arrivals by length of stay and visitor expenditure in Taiwan from the *Report on Tourists' Consumption and Activities Survey* published by the Tourism Bureau.

The tourists' consumption and activities survey is conducted once a year. Objective of the survey are foreign nationals or overseas Chinese coming to Taiwan for visits, excluding those staying in Taiwan for less than 24 hours and those staying for over 60 days. The survey adopts the "quota sampling" method to draw an effective sample of 5,004 tourists receiving interview at the waiting lounge of the CKS International Airport and the Kao-Hsiung Hsiao Keung International Airport.

Passenger-Kilometer (or Ton-Kilometer) -- The passenger-kilometer, a unit used to measure the passenger transportation volume, refers to carrying a passenger for a distance of one kilometer. The number of passengers refers to the number of persons buying tickets, excluding the passengers exempt from transportation service charges. The distance of transportation is the one stated on the ticket. Therefore, the passenger transportation volume can be derived from the number of passengers multiplied by the distance of transportation. The ton-kilometer, a unit used to measure the volume of freight transportation, refers to carrying a ton of freight for a distance of one kilometer. The freight excludes mail, personal luggage, and fuel. The volume of freight is based on the amount and the distance stated on the invoice, and the volume of freight transportation can be derived from the weight of freight multiplied by the distance of transportation.

Number of Motor Vehicles -- The motor vehicles refer to those registered with and licensed by the vehicle administration agencies, excluding military vehicles, tricars, 3-wheel motor trucks, and motor vehicles without license plate or with temporary license plate. In March 1987, the motor vehicles further excluded those license plates having expired. Commercial vehicles include buses, trucks, pick-up truck. Specially constructed vehicles, which are installed with special equipment to serve special purposes, include towing vehicles, ambulances, fire engines, armored police vehicles, and police patrol cars.

For more information on transport, storage, and communications, please refer to the *Monthly Statistics of Transportation and Communications, Republic of China* and the *Report on Survey of Quantity and Value of Production on Transportation, Communication and Warehousing Business, Republic of China* published by the Ministry of Transportation and Communications, the *Survey Report on Motor Vehicle Freight Traffic Taiwan Area, Republic of China* published by the Department of Statistics, Ministry of Transportation and Communications, the *Statistical Report of Taiwan Railway Administration* published by the Taiwan Railway Administration.

REVENUES AND EXPENDITURES OF GOVERNMENT

This chapter is concerned with statistical data on the revenues and expenditures of general governments. The governments' net revenues and expenditures are based on an accrual basis. All of the data are obtained from the *Yearbook of Financial Statistics, Republic of China* published by the Department of Statistics of the Ministry of Finance.

Net Revenues and Expenditures of General Governments -- Revenues are not include the proceeds of public debt, receipts from loans for economic construction and surplus of previous years. Expenditures are excluded the principal repayment.

Actual Revenues and Expenditures -- The actual revenue refers to the net revenues of general governments net of three items of insubstantial revenue, specifically public bonds issued, borrowings, and appropriation of cash savings from the previous fiscal years. The actual expenditure refers to the net expenditure of general governments net of debt serving payments.

The tax statistics of our country include direct taxes and indirect taxes. The direct taxes include income taxes, land taxes (agricultural land tax, land value tax, and land value increment tax), house tax, estate and gift taxes, security transactions tax, mining lot tax, education surtax, and temporary tax. All other taxes are classified as indirect taxes (including monopoly profits).

For additional information on governments' revenues and expenditures, please refer to the *Monthly Report of Financial Statistics, Republic of China*, the *Preliminary Statistics of Financial Indicators*, and the *Yearbook of Tax Statistics, Republic of China* published by the Ministry of Finance.

FINANCE

This chapter is concerned with all sort of financial statistics and international balance of payments data, all sourced from the Central Bank of China. Information on money supply, exchange rates, interest rates, government bonds, currency in circulation, and balance sheets of financial institutions comes from the *Financial Statistics Monthly, the Republic of China*, which is based on the monthly reports submitted by the financial institutions. Data on foreign exchange reserves are obtained from the *Financial Statistics, Taiwan District, Republic of China*.

The financial institutions refer to business firms registered according to law with the competent authorities to engage in banking and financial business. They can be classified into two categories, i.e., monetary institutions which are capable of creating money supply and other financial institutions which are incapable of creating money supply. The monetary institutions include the Central Bank of China, domestic banks, local branches of foreign banks, medium business banks, credit cooperatives, credit departments of farmers' and fishermen's associations. With the exception of the Central Bank of China, all of the monetary institutions are also called the deposit money institutions. The other financial institutions include trust and investment companies, postal savings system, and life insurance companies. In compilation of financial statistics, property and casualty insurance companies, bills finance companies, and securities finance companies are not considered a part of the financial institutions sector because the liability instruments they offer are significantly different from those offered by financial institutions. Instead, they are viewed as a part of the private enterprises sector.

Stock price index, compiled by the Taiwan Stock Exchange, is a weighted annual index using 1966 as the base year. The index is based on the closing prices of selected issues, using amount issued as the weight and calculated by the Peyres formula. The annual average is derived from the number of total trading days in a year.

Net Currency in Circulation -- It refers to the currency circulating outside the monetary institutions. In other words, the net currency in circulation equals the total amount of currency issued by the Central Bank of China minus the amount of cash in vaults by the monetary institutions.

Quasi-Money -- This refers to the time deposits (including general time deposits and negotiable certificates of deposit (NCDs)), time savings deposits, and foreign currency deposits of enterprises and individuals in monetary institutions. In addition, postal deposits are also included. From the data of Jan. 1994 on, it also includes repurchase agreements and non-resident NT deposits. From the data of Oct. 2004 on, it also includes money market mutual funds.

Reserve Money -- It is a kind of monetary liability of the Central Bank of China, including reserves held by deposit money banks, postal saving system(since 1982) and currency outside monetary institutions.

Money Supply (M_{1b}) -- It is composed of net currency in circulation, deposit money and postal saving system(since 1987).

Liquid Liabilities -- It includes currency outside financial institutions, deposits, trust funds, life insurance reserves, bank debentures, savings bonds and treasury bills-b issued by CBC held by enterprises and individuals.

PRICES

This chapter is concerned with data on price indices, including wholesale price index, consumer price index, import price index, and export price index. These four kinds of indices are compiled by the Directorate-General of Budget, Accounting and Statistics, using the intentional sampling method and calculated by the Laspeyres formula. Results of the compilation are published in the *Price Statistics Monthly*.

The Wholesale price survey covers a scope limited only to the tradable goods at the processing stage (including materials, semi-finished goods, and finished goods) and importing commodities, excluding such non-tradable products as services, real estates, and securities. The commodities under investigation are picked based on the economic structure of Taiwan Area in the base year, updated once every five years, a practice applicable to all other price indices. The priced commodities include 424 items for consumer prices, 1,123 items for wholesale prices, 273 items for import prices, 275 items for export prices and 106 items for construction cost and 2,364 units for house rent price indices. The investigation is conducted by correspondence inquiry. The price of domestic manufactured goods are surveyed by monthly inquiry mailing to selected companies except the prices of Agriculture, Forestry and Fishing goods are obtained from the digital transmission data dispatch by the Council of Agriculture , Executive Yuan. The designated companies are required to report the actual selling prices of selected commodities most close to the 20th day of a month. (In principal, prices after adjustment for rebates, tax, and shipment, etc.) The prices of import and export goods are directly provided by the Import and Export Price Indices Survey conducted by the Directorate-General of Budget, Accounting and Statistics, Executive Yuan.

The consumer price survey covers a scope of consumer goods and services purchased by ordinary families, excluding investment or savings goods such a financial assets and real estates. The priced items were selected based on the family consumption structure in the base year. During pricing period, the actual retail prices of the selected items are taken by investigators in 16 pricing counties and cities. Rural areas were included in the pricing scope in the base year of 1981; however, due to the restraint of funding, the priced items have been less than those of the urban areas. In the base year of 2006, a total of 424 items of goods and services were designated for pricing in 8 cities, and the price investigation has since been conducted 3 times a month (specifically on the 5th, 15th and 25th days of the month) for some items or 9 times a month (specifically on the days of the month with the first digit being 2, 5, and 8) for some others, depending on the characteristics of their price changes. A total of 269 items of goods and services were designated for pricing in 8 counties, and price investigation has since been conducted once a month (specifically on the 15th day of the month) for some items or 3 times a month (specifically on the days of the month with the first digit being 5).

The import and export price survey covers a scope of commodities imported and exported. The priced items were picked based on the structure of imports and exports prevailing in the base year. The pricing is conducted by way of correspondence investigation. Selected importers and exporters are required to report the actual transaction prices most close to the 20th day of a month. The export price is on a F.O.B. basis while the import, on a C.I.F. basis. For the base year of 2006, a total of 273 import categories items and 275 export categories items have been selected for pricing.

The price data contained in this chapter are not seasonally adjusted ones. For seasonally adjusted price statistics, please refer to the *Price Statistics Monthly*. For the four price indices, the seasonal price adjustment is done, following the X-11-ARIMA program adopted by the US Census Bureau.

ADMINISTRATION

This chapter is concerned with information on civil service personnel, central and local public office elections and aids extended for foreign countries. Information on civil service personnel is obtained from the official statistics of the Ministry of Civil Service, contained in the *Personnel Affairs Statistics*, an annual report published by the Ministry of Civil Service. Data on public office elections are compiled by the Central Election Commission one month after the elections are closed and incorporated in the *Statistical Yearbook of Interior of the Republic of China* published by the Ministry of Interior. As for data on aids extended for foreign countries is from the International Cooperation & Development Fund and the International Cooperation Department, Ministry of Economic Affairs.

Civil Service Personnel -- They include all politically appointed officials and administrative officers filling in civil service positions given with specific titles, grades and steeds at executive agencies, public enterprises, public schools, and other organizations formed on accordance with laws. Also included in this category are elected chiefs of government offices and military officers filling in civil service positions.

Central Public Office Elections -- After our country put the Constitution into force, the first central public office elections took place in 1947. Legislators had a term of three years. Meanwhile national assemblymen and members of Control Yuan had a terms of six years. However, due to the loss of the mainland to the Chinese communists, the central public offices could not be put for re-election. To meet the national requirement and to make up the vacancies left for one reason or another, several additional and supplementary elections had been conducted. When the Mobilization Period ended in 1991, the second term of national assemblymen were elected in accordance with the provisions of the Constitution as amended. The election for the second term of legislators were elected for late December 1992.

Local Public Office Elections -- Local elected public offices include Taiwan provincial governer, Taiwan provincial assemblymen, mayers and councilmen at Taipei and Kaohsiung Cities, county(or city)councilmen, county magistrates, and city mayors in Taiwan Province. The term for each of these offices is four years.

For additional information on civil service personnel, please refer to the *Personnel Affairs Statistics* published by the Ministry of Civil Service. For additional information on elections, please refer to the *Election Statistics Abstract of R.O.C., the Consolidated Report on Status of Local Public Office elections, and the Central Public Office Elections in free District During Mobilization Period -- Election Records* published by the Central Election Commission.
