a The cost of collecting the internal revenue embraces the following items: Salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, and expenses of detecting and punishing violations of internal-revenue laws.

b The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include expenditures for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor expenditures for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the expenditures for salaries, etc., incident to auditing these accounts in the Departments at Washington.

NOTE 1.—There are no data prior to 1821 showing the values of free and dutiable foreign merchandise separately.

NOTE 2.—In the table of receipts from all sources, published annually in the Finance Report, the column headed "Customs" shows the total annual customs collections from all sources covered by warrant into the Treasury, after deducting expenses of collection. From 1791 to 1850 collectors paid from customs receipts all expenses of their offices and turned the net amount remaining into the Treasury, but from 1850 to the present time they have been compelled by law to turn into the Treasury all amounts collected, while the expenses of their offices are paid by warrants from the Treasury of the United States. The figures in the column of the above table headed "Amounts of duty collected" from 1791 to 1866, inclusive, show the annual amounts of duty collected on merchandise only, without any deductions for expenses of collection and omitting the collections from tonnage, light-houses, fines, penalties, forfeitures, etc. (Explanation given by Register of Treasury.) For these reasons the figures of "duties collected" prior to 1851 in the above table largely exceed in many cases the amount of receipts from customs as shown in the Finance Report, inasmuch as the expenses of collection were of considerable magnitude during the years when the net receipts only were covered into the Treasury. From 1850 to 1866 the receipts in the table in the Finance Report should exceed the duties collected in the above table by amounts of collections from sources other than duties on merchandise, such as tonnage dues, fines, penalties, and forfeitures, hospital dues, etc. Since 1866, the duties collected as shown by the above table are taken from the accounts of this office. While these data showing the duties collected on merchandise from 1802 to the present time are somewhat diverse in character, they are the best attainable.

NOTE 3.—The annual average ad valorem rates of duty prior to 1853 are based upon the values of the gross imports; from 1853 to include 1866, upon the value of the net imports, and after 1866, upon the values of imported merchandise entered for consumption, as returned by collectors of customs, considering ordinary duties only. The reason for basing the average ad valorem rates of duty prior to 1853 upon the values of the gross imports is that the amounts of "duty collected" for those years include the duties afterward refunded upon exports of foreign merchandise.

NOTES.—(1) The production of domestic wines from 1875 to 1889 was estimated by the Department of Agriculture, by Mr. Charles McK. a No detailed statement of the trade of each port with foreign countries was published for this year which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

b A small portion of the tonnage from the United Kingdom during this year entered at lake ports and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statement of navigation for 1876.

a The population of Alaska for 1890 was 31,795; males, 19,130; females, 12,665; white, 4,363; mixed, 1,819; Indian, 23,274; Mongolian, 2,327; all other, 112.

b The population of Indian Territory for 1890 was 177,772 (page 6, Census Bulletin No. 25).

c The figures given for Oklahoma Territory include the area of the former public land strip, 5,738 square miles, or 3,672,320 acres.

d It is impossible to state whether the areas of the original States and the admitted States, as given in the table, embrace both land and water surface. The source from which they were originally obtained is not known. In regard to the areas of the public land States and Territories where the public land surveys have been completed (Ohio, Indiana, Mississippi, Illinois, Alabama, Missouri, Arkansas, Michigan, Iowa, Wisconsin, and Kansas), the areas as given are from actual surveys, and include the surfaces of all nonmeandered streams, lakes, etc., but exclude the areas of meandered waters. In the States and Territories in which the public land surveys are still in progress, the total area embraces both land and water surface, but the area of surveyed land does not include the surface of meandered waters.

NOTES.—(1) No comprehensive figures of the business of the railways of the United States are attainable prior to the above. And even these tables are the fruit of private enterprise, in compiling from the official annual reports of each road the results of the traffic as shown above. (2) This table differs from Table No. 224 in that it does not include New York elevated railroads.

b On all grain except corn, on which rate was 26 cents.

NOTE.—The Interstate Commerce Commission, March 28, 1892, states that the freight rates on grain and flour, per 100 pounds, are as follows:

	<i>Cents.</i>		<i>Cents.</i>
From Chicago to New York	25	From St. Louis to New York	29

The greatly increased mileage since 1880 is principally due to the fact that in 1881 the Western Union Telegraph Company absorbed by purchase all the lines of the American Union and the Atlantic and Pacific Telegraph Companies, the former having previously in operation over 12,000 miles of line and the latter 8,706 miles. Capital stock of the Western Union, \$86,200,000.

The Western Union has exclusive contracts with several international cable companies, operating eight Atlantic cables, and guarantees 5 per cent annual dividends on the stock of the American Cable Company; amount, \$14,000,000.

Besides the above, there are many new lines of telegraph which have complied with the United States telegraph act of 1866, and are operating wires with or without connection with railway companies.

The New York Mutual Telegraph Company, established in 1881, has about 8,000 miles of line, 60,000 miles of wire, 1,200 offices, and has extended its lines north and south, operating from Boston to Chicago, St. Louis, Washington, etc. Capital stock, \$2,500,000. This line is now leased and operated by the Western Union Telegraph Company, at a rental of 6 per cent per annum on the stock.

The Baltimore and Ohio Railroad Telegraph, having lines coextensive with its railway system and branches, besides many newly extended wires south and west, constituting 6,711 miles of line and 54,087 miles of wire, was purchased in 1887 for

\$5,000,000 and \$60,000 annual rental for fifty years, by the Western Union Company, which now owns and operates it.

The Bankers and Merchants' Telegraph Company, New York, organized March 23, 1881, has about 4,000 miles of line, 28,300 miles of wire, and is in operation to many leading points. Capital authorized, \$3,000,000. Debt, about \$7,500,000, as stated in August, 1874. Sold in foreclosure July 31, 1885, and now operated by the United Lines of Telegraph.

The American Rapid Telegraph Company, New York to Boston, Philadelphia, Baltimore, Washington, Buffalo, etc., with capital stock of \$4,000,000, has been leased by the Western Union Company.

The Postal Telegraph Cable Company, of New York, organized June 21, 1881, has about 1,500 miles of line and 4,500 miles of wire in operation from New York to Boston, Washington, Chicago, etc., and owns what are claimed to be very valuable patents in improved wires and telegraphy. Capital stock, \$10,000,000.

The Northwestern Telegraph Company owns 8,000 miles of wire. It is leased to the Western Union for ninety-nine years, which guarantees dividends (6 per cent after 1896) and interest on bonds.

The aggregate mileage of telegraph lines in the United States open for public business exceeds 210,000 miles, besides railways, Government, private, and telephonic lines; length not ascertainable.

The number of instruments in the hands of licensees under rental at the beginning of 1891 was 483,790. The number of exchange connections daily in the United States is 1,438,294, or a total per year of over 450,000,000. The average number of daily calls per subscriber is 7.10. The company received in rental of telephones in 1890, \$2,913,369. It paid its stockholders in dividends in 1890, \$1,256,274. The capital of the company is \$12,500,000.

The Bell Telephone and its subsidiary companies represent about \$80,000,000 of capital; the Long Distance Telephone Company about \$5,000,000.

The following data relating to the telephone business are for the year ending January 1, 1892, and will be found of interest: The American Bell Telephone Company, Boston, had in use, by its licenses, 512,407 telephones and 788 telephone exchanges in various cities of the United States. The aggregate length of telephone wires operated by these was 266,456. Capital stock April 1, 1892, \$17,500,000. Gross earnings year ending January 1, 1892, \$4,736,007; net earnings \$3,126,820. Dividends paid in 1891, 18 per cent.

The aggregate number of telephones in use in all the cities of the country, including those of competing companies, is much greater than the above.

The extent in mileage of wires put up for telephone use in the United States is estimated at 3,126,820 miles.

b The vital statistics in regard to Indians are defective.

c See Dakota.

d The reduction below the population for 1889 is due mainly to reduced estimates of the number of Pimas, Papagoes, and Navajoes in Arizona.

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits, in a concise form, the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be comprehensive to all who are interested in wool. In the special features of character and condition, "Washed Ohio Fleece Wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character, and condition, liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.
